critical evidence, the testimony of MSS. versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version and maintained, against much opposition, even from his patron Bp. Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use.—7. Among those who had known and valued Mill was R. BENTLEY, the greatest of English scholars. In his earliest work, in 1691, Bentley had expressed generous admiration of the labours of Mill, and afterwards, in 1713, in his *Remarks*, triumphantly refuted the charges of impiety with which they were assailed. But Mill had only “accumulated various readings as a promptuary to the judicious and critical reader;” Bentley would “make use of that promptuary . . . and not leave the reader in doubt and suspense” (*Answer to Remarks*, iii. 503). With this view he announced, in 1716, his intention of publishing an edition of the Greek Testament on the authority of the oldest Greek and Latin MSS., “exactly as it was in the best examples at the time of the Council of Nice, so that there shall not be twenty words nor even particles’ difference” (iii. 477 to Archbp. Wake). Bentley continued his labours till 1729. After that time they seemed to have ceased. The troubles in which he was involved render it unnecessary to seek for any other explanation of the suspension of his work.—8. The conception of Bentley was in advance both of the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars held the first place. Foremost among these was BENDEL (1687-1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (i. §12); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. The labours of WESTSTEIN ((1693-1754) formed an important epoch in the history of the N. T. His Greek Testament did not appear till 1751-2 at Amsterdam. The great service which Weststein rendered to sacred criticism was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact.—9. It was the work of GRIESBACH (1745-1812) to place the comparative value of existing documents in a clearer light. His first editions were based for the most part on the critical collections of Weststein. Not long afterwards MATTHÆI published an edition based on the accurate collation of Moscow MSS. These new materials were further increased by the collections of Alter (1786-7), Birch, Adler, and Moldenhawer (1788-1801), as well as by the labours of Griesbach himself. And when Griesbach published his second edition (1796-1806, 2nd ed. of vol. i. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh; but in acuteness, vigour, and candour he stands below no editor of the N. T., and his judgment will always retain a peculiar value.—10. The edition of SCHOLZ contributed more in appearance than reality to the fur-

therance of criticism (1830-1836). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inaccurate, and his own collations singularly superficial.—iii. *From Lachmann to the present time*.—11. In the year after the publication of the first volume of Scholz's N. T. a small edition appeared in a series of classical texts prepared by LACHMANN († 1851). In this the admitted principles of scholarship were for the first time applied throughout to the construction of the text of the N. T. The prescriptive right of the *textus receptus* was wholly set aside, and the text in every part was regulated by ancient authority. Lachmann delighted to quote Bentley as his great precursor (§7); but there was an important difference in their immediate aims. Bentley believed that it would be possible to obtain the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterwards very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the fourth century, which might then become the basis of further criticism. This at least was a great step towards the truth, though it must not be accepted as a final one. But Lachmann's edition, great as its merits are as a first appeal to ancient evidence, is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the Oriental versions, however necessary at the time, left a wide margin for later change. The neglect of primary curves often necessitated absolute confidence on slender MS. authority.—12. The chief defects of Lachmann's edition arise from deficiency of authorities. Another German scholar, TISCHENDORF, has devoted twenty years to enlarging our accurate knowledge of ancient MSS. The first edition of Tischendorf (1841) has now no special claims for notice. In his second (Leipzig) edition (1849) he fully accepted the great principle of Lachmann, that the text "must be sought solely from ancient authorities, and not from the so-called received edition," and gave many of the results of his own laborious and valuable collations. During the next few years Tischendorf prosecuted his labours on MSS. with unwearied diligence, and in 1855-9 he published his third (seventh) critical edition. The text, except in details of orthography, exhibits generally a retrograde movement from the most ancient testimony. The Prolegomena are copious and full of interest.—13. Meanwhile the sound study of sacred criticism had revived in England. In 1844 TREGELLES published an edition of the *Azocapypse* in Greek and English, and announced an edition of the N. T. The first part, containing St. Matthew and St. Mark, appeared in 1857; the second, completing the Gospels in 1861. This edition of Tregelles differs from that of Lachmann by the greater width of its critical foundation; and from that of Tischendorf by a more constant adherence to ancient evidence. The editions of Knapp (1797, &c.), Vater (1824), Tittmann (1820, &c.), and Hahn (1840, &c.) have no peculiar critical value. Meyer (1829, &c.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory. In the Greek Testament

of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance which has been made by the editor in true principles of criticism during the course of its publication.—14. Besides the critical editions of the text of the N. T. various collections of readings have been published separately, which cannot be wholly omitted. In addition to those already mentioned (§9) the most important are by Kinck, *Lucubratio Critica*, 1830; Keiche *Codicum MSS. N. T. Gr. aliquot insigniorum in Bibl. Reg. . . collatio* 1847; Scrivener, *A Collation of about Twenty Greek MSS. of the Holy Gospels . . .* 1853; *A Transcript of the Cod. Aug., with a full Collation of Fifty MSS.* 1859; and E. de Muralt, of Russian MSS. (N. T. 1848).

III. PRINCIPLES OF TEXTUAL CRITICISM.—The work of the critic can never be shaped by definite rules. The formal enunciation of principles is but the first step in the process of revision. Canons of criticism are more frequently corollaries than laws of procedure. Yet such canons are not without use in marking the course to be followed, but they are intended only to guide and not to dispense with the exercise of tact and scholarship. What appears to be the only sound system of criticism will be seen from the rules which follow.—1. *The text must throughout be determined by evidence without allowing any prescriptive right to printed editions.* The received text may or may not be correct in any particular case, but this must be determined solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not *What is to be changed?* but, *What is to be read?*—2. *Every element of evidence must be taken into account before a decision is made.* Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it is implied that it must rest on an examination of the whole evidence. But it can never be said that the mines of criticism are exhausted. To exclude remote chances of error it is necessary to take account of every testimony. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one.—3. *The relative weight of the several classes of evidence is modified by their generic character.* Manuscripts, versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. The first are peculiarly liable to errors from transcription. The two last are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the italicised words in the A. V. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. As a general rule the evidence of both

may be trusted where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. The evidence of versions may show at once that a MS. reading is a transcriptional error; and the absence of their support throws doubt upon readings otherwise of the highest probability. The testimony of an early Father is again sufficient to give preponderating weight to slight MS. authority: and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MS. with the most ancient text.

—4. *The mere preponderance of numbers is in itself of no weight.* If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies preserved from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the 13th to the scantier documents of the 4th century.—5. *The more ancient reading is generally preferable.* This principle seems to be almost a truism.—6. *The more ancient reading is generally the reading of the more ancient MSS.* This proposition is fully established by a comparison of explicit early testimony with the text of the oldest copies. It would be strange, indeed, if it were otherwise.—7. *The ancient text is often preserved substantially in recent copies.* But while the most ancient copies, as a whole, give the most ancient text, yet it is by no means confined exclusively to them. The text of D in the Gospels, however much it has been interpolated, preserves in several cases almost alone the true reading. Other MSS. exist of almost every date, which contain in the main the oldest text.—8. *The agreement of ancient MSS., or of MSS. containing an ancient text with all the earliest versions and citations marks a certain reading.* The final argument in favour of the text of the most ancient copies lies in the combined support which they receive in characteristic passages from the most ancient versions and patristic citations. The reading of the oldest MSS. is, as a general rule, upheld by the true reading of Versions and the certain testimony of the Fathers, where this can be ascertained.—9. *The disagreement of the most ancient authorities often marks the existence of a corruption anterior to them.* But it happens by no means rarely that the most ancient authorities are divided. In this case it is necessary to recognise an alternative reading.—10. *The argument from internal evidence is always precarious.* If a reading is in accordance with the general style of the writer, it may be said on the one side that this fact is in its favour, and on the other that an acute copyist probably changed the exceptional expression for the more usual one: e. g. Matt. i. 24, ii. 14, vii. 21, &c. If a reading is more emphatic, it may be urged that the sense is improved by its adoption; if less emphatic, that scribes were habitually inclined to prefer stronger terms: e. g. Matt. v. 13, vi. 4, &c.—11. *The more difficult reading is preferable to the simpler.* Except in cases of obvious corruption this canon probably holds good without exception, in questions of language, construction, and sense.—12. *The shorter reading is generally preferable to the longer.* This canon is very often coincident with the former one; but it admits also of a wider application. Except in very rare cases copyists never omitted intentionally, while they constantly introduced into the text marginal

glosses and even various readings.—13. *That reading is preferable which explains the origin of the others.* This rule is chiefly of use in cases of great complication, and it would be impossible to find a better example than one (Mark ii. 22) which has been brought forward by Tischendorf for a different purpose (N. T. *Praef.* pp. xxxiii-iv.).

IV. THE LANGUAGE OF THE NEW TESTAMENT.—1. The eastern conquests of Alexander opened a new field for the development of the Greek language. It may be reasonably doubted whether a specific Macedonian dialect is not a mere fiction of grammarians; but increased freedom, both in form and construction, was a necessary consequence of the wide diffusion of Greek. Even in Aristotle there is a great declension from the classical standard of purity, though the Attic formed the basis of his language; and the rise of the common or Grecian dialect is dated from his time.—2. At no place could the corruption have been greater or more rapid than at Alexandria, where a motley population, engaged in active commerce, adopted Greek as their common medium of communication. And it is in Alexandria that we must look for the origin of the language of the New Testament. Two distinct elements were combined in this marvellous dialect which was destined to preserve for ever the fullest tidings of the Gospel. On the one side there was Hebrew conception, on the other Greek expression. The thoughts of the East were wedded to the words of the West. This was accomplished by the gradual translation of the Hebrew Scriptures into the vernacular Greek.—3. The Greek of the LXX., like the English of the A. V. or the German of Luther, naturally determined the Greek dialect of the mass of the Jews. It is more correct to call the N. T. dialect Hellenistic than Alexandrine, though the form by which it is characterised may have been peculiarly Alexandrine at first.—4. The position of Palestine was peculiar. The Aramaic (Syro-Chaldaic), which was the national dialect after the Return, existed side by side with the Greek. Both languages seem to have been generally understood, though, if we may judge from other instances of bilingual countries, the Aramaic would be the chosen language for the common intercourse of Jews (2 Macc. vii. 8, 21, 27). It was in this language, we may believe, that our Lord was accustomed to teach the people; and it appears that He used the same in the more private acts of His life (Mark ii. 17, v. 41, vii. 34; Matt. xxvii. 46; John i. 43; cf. John xx. 16). But the habitual use of the LXX. is a sufficient proof of the familiarity of the Palestinian Jews with the Greek dialect; and the judicial proceedings before Pilate must have been conducted in Greek.—5. The Roman occupation of Syria was not altogether without influence upon the language. A considerable number of Latin words, chiefly referring to acts of government, occur in the N. T., and they are probably only a sample of larger innovations. Other words in common use were of Shemitic, Persian, or Egyptian origin.—6. The language which was moulded under these various influences presents many peculiarities, both philological and exegetical, which have not yet been placed in a clear light. For a long time it has been most strangely assumed that the linguistic forms preserved in the oldest MSS. are Alexandrine and not in the widest sense Hellenistic, and on the other hand that the Aramaic modifications of the N. T. phraseology remove it from the sphere

at strict grammatical analysis. These errors are necessarily fatal to all real advance in the accurate study of the words or sense of the apostolic writings. In detail comparatively little remains to be done, but a philosophical view of the N. T. language as a whole is yet to be desired.—7. The formal differences of the Greek of the N. T. from classical Greek are partly differences of vocabulary and partly differences of construction. Old words are changed in orthography or in inflection, new words and rare or novel constructions are introduced.—8. The peculiarities of the N. T. language which have been hitherto mentioned have only a rare and remote connexion with interpretation. They illustrate more or less the general history of the decay of a language. Other peculiarities have a more important bearing on the sense. These are in part Hebraisms (Aramaisms) in (1) expression or (2) construction, and in part (3) modifications of language resulting from the substance of the Christian revelation. (1) The general characteristic of Hebraic expression is vividness, as simplicity is of Hebraic syntax. Hence there is found constantly in the N. T. a personality of language (if the phrase may be used) which is foreign to classical Greek. At one time this occurs in the substitution of a pregnant metaphor for a simple word; at another time in the use of prepositions in place of cases; at another in the use of a vivid phrase for a preposition; and sometimes the one personal act is used to describe the whole spirit and temper. (2) The chief peculiarities of the syntax of the N. T. lie in the reproduction of Hebrew forms. Two great features by which it is distinguished from classical syntax may be specially singled out. It is markedly deficient in the use of particles and of oblique and participial constructions. Sentences are more frequently co-ordinated than subordinated. One clause follows another rather in the way of constructive parallelism than by distinct logical sequence. Only the simplest words of connexion are used in place of the subtle varieties of expression by which Attic writers exhibit the interdependence of numerous ideas. Constructions which are most distinctly Hebraic are not those which give the deepest Hebrew colouring to the N. T. diction, but rather that pervading monotony of form which, though correct in individual clauses, is wholly foreign to the vigour and elasticity of classical Greek. The character of the style lies in its total effect and not in separable elements. (3) The purely Christian element in the N. T. requires the most careful handling. Words and phrases already partially current were transfigured by embodying new truths, and for ever consecrated to their service. To trace the history of these is a delicate question of lexicography which has not yet been thoroughly examined. There is a danger of confounding the apostolic usage on the one side with earlier Jewish usage, and on the other with later ecclesiastical terminology.—9. For the language of the N. T. calls for the exercise of the most rigorous criticism. The complexity of the elements which it involves makes the inquiry wider and deeper, but does not set it aside. The overwhelming importance, the manifold expression, the gradual development of the message which it conveys, call for more intense devotion in the use of every faculty trained in other schools, but do not suppress inquiry. The literal sense of the apostolic writings must be gained in the same way as the literal sense of any other writings,

by the fullest use of every appliance of scholarship, and the most complete confidence in the necessary and absolute connexion of words and thoughts. No variation of phrase, no peculiarity of idiom, no change of tense, no change of order, can be neglected. The truth lies in the whole expression, and no one can presume to set aside any part as trivial or indifferent.—10. The importance of investigating most patiently and most faithfully the literal meaning of the sacred text must be felt with tenfold force, when it is remembered that the literal sense is the outward embodiment of a spiritual sense, which lies beneath and quickens every part of Holy Scripture.

NEW YEAR. [TRUMPETS, FEAST OF.]

Nes'ah. The descendants of Neziab were among the Nethinim who returned with Zerubbabel (Ezr. ii. 54; Neh. vii. 56).

Nesib, a city of Judah (Josh. xv. 43 only), in the district of the Shefelah or Lowland, one of the same group with Keilah and Mareshah. To Eusebius and Jerome it was evidently known. They place it on the road between Eleutheropolis and Hebron, 7 or 9 (Euseb.) miles from the former, and there it still stands under the almost identical name of *Beit Nāsib*, or *Chirbek Nasib*, 2½ hours from *Beit Jibrin*, on a rising ground at the southern end of the *Wady es-Sūr*, and with Keilah and Mareshah within easy distance.

Nibhas, a deity of the Avites, introduced by them into Samaria in the time of Shalmaneser (2 K. xvii. 31). There is no certain information as to the character of the deity, or the form of the idol so named. The Rabbins derived the name from a Hebrew root *nābach*, "to bark," and hence assigned to it the figure of a dog, or a dog-headed man. There is no *a priori* improbability in this: the Egyptians worshipped the dog. Some indications of the worship of the dog have been found in Syria, a colossal figure of a dog having formerly existed between Berytus and Tripolis. It is still more to the point to observe that on one of the slabs found at Khoisabad and represented by Botta (pl. 141), we have the front of a temple depicted with an animal near the entrance, which can be nothing else than a bitch suckling a puppy, the head of the animal having, however, disappeared. According to another equally unsatisfactory theory, Nibhas is identified with the god of the nether world of the Sabian worship.

Nibshan, one of the six cities of Judah (Josh. xv. 62) which were in the district of the Midbar (A. V. "wilderness"). Under the name of Nempshan or Neban it is mentioned by Eusebius and Jerome, but with no attempt to fix its position.

Nicanor, the son of Patroclus (2 Macc. viii. 9), a general who was engaged in the Jewish wars under Antiochus Epiphanes and Demetrius I. He took part in the first expedition of Lysias, B.C. 166 (1 Macc. iii. 38), and was defeated with his fellow-commander at Emmaus (1 Macc. iv.; cf. 2 Macc. viii. 9 ff.). After the death of Antiochus Eupator and Lysias, he stood high in the favour of Demetrius (1 Macc. vii. 26), who appointed him governor of Judaea (2 Macc. xiv. 12), a command which he readily undertook as one "who bare deadly hate unto Israel" (1 Macc. vii. 26). At first he seems to have endeavoured to win the confidence of Judas, but when his treacherous designs were discovered he had recourse to violence. A battle took place at Capharsalama, which was indecisive in its results.

but shortly after Judas met him at Adasa (B.C. 161), and he fell "first in the battle." A general rout followed; and the 13th of Adar, on which the engagement took place, "the day before Mardocheus' day," was ordained to be kept for ever as a festival (1 Macc. vii. 49; 2 Macc. xv. 36). There are some discrepancies between the narratives in the two books of Maccabees as to Nicanor. Internal evidence is decidedly in favour of 1 Macc.—2. One of the first seven deacons (Acts vi. 5).

Nicodemus, a Pharisee, a ruler of the Jews, and teacher of Israel (John iii. 1, 10), whose secret visit to our Lord was the occasion of the discourse recorded only by St. John. The high station of Nicodemus as a member of the Jewish Sanhedrim, and the avowed scorn under which the rulers concealed their inward conviction (John iii. 2) that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity is discernible in the character of the inquiring Pharisee. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously rested on a general principle (John vii. 50), and betray no indication of his faith in the Galilean whom his sect despised. And even when the power of Christ's love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (xix. 39). In these three notices of Nicodemus a noble candour and a simple love of truth shine out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection he became a professed disciple of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. If the Nicodemus of St. John's Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible, since the term *γέρων*, in John iii. 4, may not be intended to apply to Nicodemus himself.

Nicolaitans. The question how far the sect that is mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolas of Acts vi. 5, and the traditions that have gathered round his name, will be discussed below. It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age. It has been suggested as one step towards this result that the name before us was symbolic rather than historical. The Greek *Νικόλαος* is, it has been said, an approximate equivalent to the Hebrew Balaam, the lord, or, according to another derivation, the devourer of the people. If we accept this explanation we have to deal with one sect instead of two. We are now in a position to form a clearer judgment of the characteristics of the sect. It comes before us as presenting the ultimate phase of a great controversy which threatened at one time to destroy the unity of the Church, and afterwards to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted in any large numbers into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? The apostles and elders at Jerusalem met the question calmly and wisely. The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from

"meats offered to idols" and from "fornication" (Acts xv. 20, 29), and this decree was welcomed as the great charter of the Church's freedom. Strange as the close union of the moral and the positive commands may seem to us, it did not seem so to the synod at Jerusalem. The two sides were very closely allied, often even in the closest proximity of time and place. The messages to the Churches of Asia and the later Apostolic Epistles (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their true character. The men who did and taught such things were followers of Balaam (2 Pet. ii. 15; Jude 11). They, like the false prophet of Pethor, united brave words with evil deeds. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indifferent (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impurities of those feasts into the meetings of the Christian Church. And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system, supported by a "doctrine," accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicolas may be, they point to the same distinctive evils. It confirms the view which has been taken of their character to find that stress is laid in the first instance on the "deeds" of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well-nigh to forfeit the glory of having been faithful under persecution (Rev. ii. 14, 15).

Nicolas (Acts vi. 5), a native of Antioch, and a proselyte to the Jewish faith. When the church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen by the whole multitude of the disciples to be one of the first seven deacons, and he was ordained by the apostles, A.D. 33. A sect of Nicolaitans is mentioned in Rev. ii. 6, 15; and it has been questioned whether this Nicolas was connected with them, and if so, how closely. The Nicolaitans themselves, at least as early as the time of Irenaeus, claimed him as their founder. Epiphanius, an inaccurate writer, relates some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impurity, and becoming the originator of the Nicolaitans and other immoral sects. The same account is believed, at least to some extent, by Jerome and other writers in the 4th century; but it is irreconcilable with the traditional account of the character of Nicolas given by Clement of Alexandria, an earlier and more discriminating writer than Epiphanius. He states that Nicolas led a chaste life and brought up his children in purity; that on a certain occasion, having been sharply reproved by the apostles as a jealous husband, he expelled the charge by offering to allow his wife to become the wife of any other person; and that he was in the habit of repeating a saying which is ascribed to the apostle Matthias also,—that it is our duty to fight against the flesh and to abuse it. It is

words were perversely interpreted by the Nicolaitans as authority for their immoral practices. Theodoret, in his account of the sect, repeats the foregoing statement of Clement; and charges the Nicolaitans with false dealing in borrowing the name of the deacon. Tillemont concludes that if not the actual founder, he was so unfortunate as to give occasion to the formation of the sect. Neander held that some other Nicolas was the founder.

Nicopolis is mentioned in Tit. iii. 12, as the place where, at the time of writing the Epistle, St. Paul was intending to pass the coming winter, and where he wished Titus to meet him. Nothing is to be found in the Epistle itself to determine which Nicopolis is here intended. There were cities of this name in Asia, Africa, and Europe. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis. Another Nicopolis was in Cilicia; and Schrader pronounces for this; but this opinion is connected with a peculiar theory regarding the Apostle's journeys. We have little doubt that Jerome's view is correct, and that the Pauline Nicopolis was the celebrated city of Epirus. This city (the "City of Victory") was built by Augustus in memory of the battle of Actium. Nicopolis was on a peninsula to the west of the bay of Actium, in a low and unhealthy situation, and it is now a very desolate place.

Nîger is the additional or distinctive name given to the Simon who was one of the teachers and prophets in the Church at Antioch (Acts xiii. 1). He is not known except in that passage.

Night. The period of darkness, from sunset to sunrise, including the morning and evening twilight, was known to the Hebrews by the term *layil*, or *laylâh*. It is opposed to "day," the period of light (Gen. i. 5). Following the Oriental sunset is the brief evening twilight (*neshaph*, Job xxiv. 15, rendered "night" in Is. v. 11, xxi. 4, lxx. 10), when the stars appeared (Job iii. 9). This is also called "evening" (*'ereb*, Prov. vii. 9, rendered "night" in Gen. xlix. 27, Job vii. 4), but the term which especially denotes the evening twilight is *âlâhâh* (Gen. xv. 17, A. V. "dark;" Ez. xii. 6, 7, 12). This period of the day must also be that which is described as "night" when Boaz winnowed his barley in the evening breeze (Ruth iii. 2). The time of midnight (Ruth iii. 7; Ex. xi. 4) or greatest darkness is called in Prov. vii. 9 "the pupil of night," (A. V. "black night"). The morning twilight is denoted by the same term, *neshaph*, as the evening twilight, and is unmistakably intended in 1 Sam. xxxi. 12; Job vii. 4; Ps. cxix. 147; possibly also in Is. v. 11.

Night-Hawk (Heb. *tachmûs*). Bochart has endeavoured to prove that the Hebrew word, which occurs only (Lev. xi. 16; Deut. xiv. 15) amongst the list of unclean birds, denotes the "male ostich." The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulg., and perhaps Onkelos, understand some kind of "owl;" most of the Jewish doctors indefinitely render the word "a rapacious bird." Michaelis believes some kind of swallow (*Hirundo*) is intended. The rendering of the A. V. rests on no authority. As the LXX. and Vulg. are agreed that *tachmûs* denotes some kind of owl, we believe it is safer to follow these versions than modern commentators. The

Greek γλαύξ is used by Aristotle for some common species of owl, if all probability for the *Strix flammea* (white owl) or the *Syrnium stridula* (tawny owl). It is probable that *tachmûs* may denote the *Strix flammea* or the *Athene meridionalis*, which is extremely common in Palestine and Egypt.

Nile. 1. *Names of the Nile.*—The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. They are *Shîchôr*, "the black," a name perhaps of the same sense as Nile; *Yêôr*, "the river," a word originally Egyptian; "the river of Egypt;" "the Nachal of Egypt;" and "the rivers of Cush," or "Ethiopia." It must be observed that the word Nile nowhere occurs in the A. V. (a.) *Shîchôr*, "the black." The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense. It seems, however, to be indicative of a very dark colour. That the Nile is meant by *Shîchôr* is evident from its mention as equivalent to *Yêôr*, "the river," and as a great river (Is. xxiii. 3); from its being put as the western boundary of the Promised Land (Josh. xiii. 3; 1 Chr. xii. 5), instead of "the river of Egypt" (Gen. xv. 18); and from its being spoken of as the great stream of Egypt, just as the Euphrates was of Assyria (Jer. ii. 18). If, but this is by no means certain, the name Nile be really indicative of the colour of the river, it must be compared with the Sanskrit *Âlâh*, "blue" especially, probably "dark blue," also even "black," and must be considered to be the Indo-European equivalent of *Shihor*. (b.) *Yêôr* is the same as the ancient Egyptian ATUI, AUR, and the Coptic *ciero* or *âuro*. *Yêôr*, in the singular, is used of the Nile alone, excepting in a passage in Daniel (xii. 5, 6, 7), where another river, perhaps the Tigris (comp. x. 4), is intended by it. In the plural this name is applied to the branches and canals of the Nile (Ps. lxxviii. 44; Ezek. xxix. 3, seqq., xxx. 12); but it is also used of streams or channels, in a general sense, when no particular ones are indicated (see Is. xxxiii. 21; Job xxviii. 10). It is thus evident that this name specially designates the Nile. (c.) "The river of Egypt" (Gen. xv. 18). (d.) "The Nachal of Egypt" has generally been understood to mean "the torrent" or "brook of Egypt," and to designate a desert stream at Rhinocorura, now El-'Areesh, on the eastern border. This name must signify the Nile, for it occurs in cases parallel to those where *Shihor* is employed (Num. xxxiv. 5; Josh. xv. 4, 47; 1 K. viii. 65; 2 K. xxiv. 7; Is. xxvii. 12), both designating the easternmost or Pelusiac branch of the river as the border of the Philistine territory, where the Egyptians equally put the border of their country towards Kanaan or Kanana (Canaan). It remains for us to decide whether the name signify the "brook of Egypt," or whether Nachal be a Hebrew form of Nile. The Hebrew word *nachal* might have been adopted as very similar in sound to an original proper name. (e.) "The rivers of Cush" are alone mentioned in the extremely difficult prophecy contained in Is. xviii. From the use of the plural we must suppose them to be the confluent or tributaries of the Nile. With the ancient Egyptians the river was sacred, and had, besides its ordinary name already given, a sacred name, under which it was worshipped, HAPÊE, or HAPÊE-MU, "the abyss," or "the abyss of waters," or "the hidden." Corresponding to the two regions of Egypt, the

Upper Country and the Lower, the Nile was called **HAPEH-RES**, "the Southern Nile," and **HAPEE-MEHEET**, "the Northern Nile," the former name applying to the river in Nubia as well as in Upper Egypt. The god Nilus was one of the lesser divinities.—2. *Description of the Nile*.—We cannot as yet determine the length of the Nile, although recent discoveries have narrowed the question. There is scarcely a doubt that its largest confluent is fed by the great lakes on and south of the equator. It has been traced upwards for about 2700 miles, measured by its course, not in a direct line, and its extent is probably upwards of 1000 miles more, making it longer than even the Mississippi, and the longest of rivers. To trace it downwards we must first go to equatorial Africa, the mysterious half-explored home of the negroes, where animal and vegetable life flourishes around and in the vast swamp-land that waters the chief part of the continent. Here are two great shallow lakes, one nearer to the coast than the other. From the more eastern (the Ukerewe, which is on the equator), a chief tributary of the White Nile probably takes its rise, and the more western (the Ujereeje) may feed another tributary. Captain Speke (*Journal*, p. 610) concludes that "the White River, which issues from the N'yanza at the Ripon Falls, is the true or parent Nile." Great, however, as is the body of water of this the longer of the two chief confluent, it is the shorter (the Bahr el-Azrak, or Blue River) which brings down the alluvial soil that makes the Nile the great fertilizer of Egypt and Nubia. The Bahr el-Azrak rises in the mountains of Abyssinia. The two streams form a junction at Khartoom, now the seat of government of Soodan, or the Black Country under Egyptian rule. Further to the north another great river, the Athara, rising, like the Bahr el-Azrak, in Abyssinia, falls into the main stream, which, for the remainder of its course, does not receive one tributary more. Throughout the rest of the valley the Nile does not greatly vary, excepting that in Lower Nubia, through the fall of its level by the giving way of a barrier in ancient times, it does not inundate the valley on either hand. From time to time its course is impeded by cataracts or rapids, sometimes extending many miles, until, at the First Cataract, the boundary of Egypt, it surmounts the last obstacle. After a course of about 550 miles, at a short distance below Cairo and the Pyramids, the river parts into two great branches, which water the Delta, nearly forming its boundaries to the east and west, and flowing into the shallow Mediterranean. The great annual phenomenon of the Nile is the inundation, the failure of which produces a famine, for Egypt is virtually without rain (see Zech. xiv. 17, 18). At Khartoom the increase of the river is observed early in April, but in Egypt the first signs of rising occur about the summer solstice, and generally the regular increase does not begin until some days after, the inundation commencing about two months after the solstice. The river then pours, through canals and cuttings in the bank, which are a little higher than the rest of the soil, over the valley, which it covers with sheets of water. It attains to its greatest height about, or not long after, the autumnal equinox, and then, falling more slowly than it had risen, sinks to its lowest point at the end of nine months, there remaining stationary for a few days before it again begins to rise. The inundations are very various, and when they are but a few feet deficient or ex-

cessive cause great damage and distress. The Nile in Egypt is always charged with alluvium, especially during the inundation; but the annual deposit, excepting under extraordinary circumstances, is very small in comparison with what would be conjectured by any one unacquainted with subjects of this nature. Inquirers have come to different results as to the rate, but the discrepancy does not generally exceed an inch in a century. The ordinary average increase of the soil in Egypt is about four inches and a half in a century. The cultivable soil of Egypt is wholly the deposit of the Nile, but it is obviously impossible to calculate, from its present depth, when the river first began to flow in the rocky bed now so deeply covered with the rich alluvium. In Upper Egypt the Nile is a very broad stream, flowing rapidly between high, steep mud-banks, scarped by the constant rush of the water, which from time to time washes portions away, and stratified by the regular deposit. On either side rise the bare yellow mountains, usually a few hundred feet high, rarely a thousand, looking from the river like cliffs. Frequently the mountain on either side approaches the river in a rounded promontory. Rarely both mountains confine the river in a narrow bed, rising steeply on either side from a deep rock-cut channel through which the water pours with a rapid current. In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the east and west by the desert, of which the edge is low and sandy, unlike the mountains above, though essentially the same, and that the two branches of the river are narrower than the undivided stream. On either bank, during Low Nile, extend fields of corn and barley, and near the riverside stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm-groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perished" (Is. ix. 6). The banks of the river are enlivened by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the herds of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, like the good kine that Pharaoh saw in his dream as "he stood by the river," which were "coming up out of the river," and "fed in the marsh-grass" (Gen. xli. 1, 2). The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabitants of the country. The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt freely" (Num. xi. 5). In the Thebaïs crocodiles are found, and during Low Nile they may be seen basking in the sun upon the sand-banks. The crocodile is constantly spoken of in the Bible as the emblem or Pharaoh, especially in the prophecies of Ezekiel. The great difference between the Nile of Egypt in the present day and in ancient times is caused by the failure of some of its branches, and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, as dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries. The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, there were but seven principal ones. Herodotus notices

that there were seven, of which he says that two, the present Damietta and Rosetta branches, were originally artificial, and he therefore speaks of "the five mouths" (ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus distinguishes as in origin works of man. The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times a stream bordered by flags and reeds, the covert of abundant wild-fowl, and bearing on its waters the fragrant flowers of the various-coloured lotus. Now in Egypt scarcely any reeds or water-plants—the famous papyrus being nearly if not quite extinct, and the lotus almost unknown—are to be seen, excepting in the marshes near the Mediterranean. Of old the great river must have shown a more fair and busy scene than now. Boats of many kinds were ever passing along it, by the painted walls of temples, and the gardens that extended around the light summer pavilions, from the pleasure-galley, with one great square sail, white or with variegated pattern, and many oars, to the little papyrus skiff, dancing on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the dangerous chase of the hippopotamus or the crocodile. The Nile is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some canal or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river—a main support of the people—and its waters everywhere, were turned into blood.

Nim'rah, a place mentioned, by this name, in Num. xxiii. 3 only, among those which formed the districts of the "land of Jazer and the land of Gilead." If it is the same as BETH-NIMRAH (ver. 36) it belonged to the tribe of Gad. By Eusebius, however, it is cited as a "city of Reuben in Gilead." A wady and a town, both called *Nimreh*, have been met with in *Bethenijeh*, east of the *Lejah*, and five miles north-west of *Kunavdi*. On the other hand the name of *Nimrin* is said to be attached to a watercourse and a site of ruins in the Jordan valley, a couple of miles east of the river, at the embouchure of the *Wady Shoaib*. It must be left to future explorers to ascertain which (if either) of the places so named is the Nimrah in question.

Nim'rim, the Waters of, a stream or brook within the country of Moab, which is mentioned in the denunciations of that nation uttered, or quoted, by Isaiah (xv. 6) and Jeremiah (xlviii. 34). We should perhaps look for the site of Nimrim in Moab proper, i. e. on the south-eastern shoulder of the Dead Sea. A name resembling Nimrim still exists in the *Wady en-Nemeirah* and *Burf en-Nemeirah*, which are situated on the beach, about half-way between the southern extremity and the promontory of *el-Lissan*. Eusebius places it north of Soara, i. e. Zoar. How far the situation of *en-Nemeirah* corresponds with the statement of Eusebius cannot be known until that of Zoar is ascertained.

Nim'rod, a son of Cush and grandson of Ham. The events of his life are recorded in a passage (Gen. x. 8 ff.) which, from the conciseness of its language, is involved in considerable uncertainty. We may notice, in the first place, the terms in vers. 8, 9,

rendered in the A. V. "mighty" and "mighty hunter before the Lord." The idea of any moral qualities being conveyed by these expressions may be at once rejected. They may be regarded as betokening personal prowess with the accessory notion of gigantic stature. It is somewhat doubtful whether the prowess of Nimrod rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation of a proverbial expression originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations. But the context certainly favours the special application of the term to the case of conquest. The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in connexion with the commencement of ver. 11, which admits of the double sense: "Out of that land went forth Asshur," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the margin. These two passages mutually react on each other; for if the words "beginning of his kingdom" mean, as we believe to be the case, "his first kingdom," or, as Gesenius renders it, "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that "he went forth to Assyria." If, however, the sense of ver. 11 be, "out of that land went forth Asshur," then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects, and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, either sense is permissible in point of grammatical construction. Authorities, both ancient and modern, are divided on the subject, but the most weighty names of modern times support the marginal rendering, as it seems best to accord with historical truth. The chief events in the life of Nimrod, then, are (1) that he was a Cushite; (2) that he established an empire in Shinar (the classical Babylonia), the chief towns being Babel, Erch, Accad, and Calneh; and (3) that he extended this empire northwards along the course of the Tigris over Assyria, where he founded a second group of capitals, Nineveh, Rehoboth, Calah, and Resen. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. 1. In the first place there is abundant evidence that the race that first held sway in the lower Babylonian plain was of Cushite or Hamitic extraction. The name Cush itself was preserved in Babylonia and the adjacent countries under the forms of Cossaei, Cissia, Cuthah, and Susiana or *Chuzistan*. The earliest written language of Babylonia, as known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia. Even the name Nimrod appears in the list of the Egyptian kings of the 22nd dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction.—2. In the second place, the earliest seat of empire was in the south part of the Babylonian plain. The large mounds, which for a vast number of centuries have covered the ruins of

ancient cities, have already yielded some evidences of the dates and names of their founders, and we can assign the highest antiquity to the towns represented by the mounds of *Niffer* (perhaps the early Babel, though also identified with Calneh), *Warka* (the Biblical Erech), *Mugheir* (Ur), and *Senkerah* (Ellasar), while the name of Accad is preserved in the title *Kinzi-Akkad*, by which the founder or embellisher of those towns was distinguished (Rawlinson, i. 435). The date of their foundation may be placed at about B.C. 2200.—3. In the third place, the Babylonian empire extended its sway northwards along the course of the Tigris at a period long anterior to the rise of the Assyrian empire in the 13th century B.C. The existence of Nineveh itself can be traced up by the aid of Egyptian monuments to about the middle of the 15th century B.C. Our present information does not permit us to identify Nimrod with any personage known to us either from inscriptions or from classical writers.

Nim'shi. The grandfather of Jehu, who is generally called "the son of Nimshi" (1 K. xix. 16; 2 K. ix. 2, 14, 20; 2 Chr. xxii. 7).

Nin'evah, the capital of the ancient kingdom and empire of Assyria. The name appears to be compounded from that of an Assyrian deity, "Nin," corresponding, it is conjectured, with the Greek *Hercules*, and occurring in the names of several Assyrian kings, as in "Ninus," the mythic founder, according to Greek tradition, of the city. In the Assyrian Inscriptions Nineveh is also supposed to be called "the city of Bel." Nineveh is first mentioned in the O. T. in connexion with the primitive dispersment and migrations of the human race. Ashur, or, according to the marginal reading which is generally preferred, Nimrod, is there ascribed (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north, and founding four cities, of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (cf. Mic. v. 6), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period; as in Num. xxiv. 22, 24, and Ps. lxxxiii. 8: but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of Jonah, or the 8th century B.C., supposing we accept the earliest date for that narrative, which, however, according to some critics, must be brought down 300 years later, or to the 5th century B.C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, about B.C. 770. Nahum (? B.C. 645) directs his prophecies against Nineveh; only once against the king of Assyria, ch. iii. 18. In 2 Kings (xix. 36) and Isaiah (xxxvii. 37) the city is first distinctly mentioned as the residence of the monarch. Sennacherib was slain there when worshipping in the temple of Nisroch his god. In 2 Chronicles (xxxii. 21), where the same event is described, the name of the place where it occurred is omitted. Zephaniah, about B.C. 630, couples the capital and the kingdom together (ii. 13); and this is the last mention of Nineveh as an existing city. It has been generally

assumed that the destruction of Nineveh and the extinction of the empire took place between the time of Zephaniah and that of Ezekiel and Jeremiah. The exact period of these events has consequently been fixed, with a certain amount of concurrent evidence derived from classical history, at B.C. 606. It may have occurred 20 years earlier. The city was then laid waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Nineveh is fully confirmed by the records of profane history. Herodotus (i. 193) speaks of the Tigris as "the river upon which the town of Nineveh formerly stood." The historians of Alexander, with the exception of Arrian, do not even allude to the city, over the ruins of which the conqueror must have actually marched. It is evident that the later Greek and Roman writers, such as Strabo, Ptolemy, and Pliny, could only have derived any independent knowledge they possessed of Nineveh from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle or fortified town, appears to have stood on some part of the site of the ancient city. It appears to have borne the ancient traditional name of Nineve, as well as its corrupted form of Ninos and Ninus. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heraclius gained the great victory over the Persians in the battle of Nineveh, fought on the very site of the ancient city, A.D. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninawi." Benjamin of Tudela, in the 12th century, mentions the site of Nineveh as occupied by numerous inhabited villages and small townships. The name remained attached to the ruins during the Middle Ages. After the Arab conquest of the west of Asia, Mosul, at one time the flourishing capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Traditions of the unrivalled size and magnificence of Nineveh were equally familiar to the Greek and Roman writers, and to the Arab geographers. Diodorus Siculus asserts (ii. 3) that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (no less than 60 miles), and was surrounded by walls 100 feet high, broad enough for three chariots to drive abreast upon them, and defended by 1500 towers, each 200 feet in height. According to Strabo (xvi. 737) it was larger than Babylon, which was 385 stadia in circuit. In the O. T. we only find vague allusions to the splendour and wealth of the city. It is obvious that the accounts of Diodorus are for the most part absurd exaggerations, founded upon fabulous traditions, for which existing remains afford no warrant. The political history of Nineveh is that of Assyria, of which a sketch has already been given. It has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighbourhood of the capital petty kings appear to have ruled over semi-independent states, owing allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his Oriental title, who dwelt at Nineveh. The fall of the capital was the signal for universal disruption.—*The Ruins.*—Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to con-

sist of mere shapeless heaps or mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there the traces of a rude wall of sun-dried bricks. Some of these mounds were of

that river with the great Zab, the ancient Lycus. Eastward they extend to Khorsabad, about 10 miles N. by E. of Shereef Khan, and to Karamless, about 15 miles N.E. of Nimroud. Within the area of this irregular quadrangle are to be found, in every direction, traces of ancient edifices and of former

Plan of Kouyunjik and Nebbi Yunus.

enormous dimensions—looking in the distance rather like natural elevations than the work of men's hands. They differ greatly in form, size and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad flat summit, and very precipitous cliff-like sides, furrowed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the east of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collection of mounds on the eastern bank of the Tigris may be fixed at the Shereef Khan, and the southern at Nimroud, about $6\frac{1}{2}$ miles from the junction of

with very unequal sides—the northern being 2333 yards, the western, or the river face, 4533, the eastern (where the wall is almost the segment of a circle) 5300 yards, and the southern but little more than 1000; altogether 13,200 yards, or 7 English miles 4 furlongs. The present height of this earthen wall is between 40 and 50 feet. The mound of Kouyunjik is of irregular form, being nearly square at the S.W. corner, and ending almost in a point at the N. E. It is about 1300 yards in length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but falls from the W. to the E. Nebbi Yunus is considerably smaller than Kouyunjik, being about 530 yards by 430, and occupying an area of about 40 acres. In

height it is about the same. Upon it is a Turcoman village containing the apocryphal tomb of Jonah. It is remarkable that within the inclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size. Nimroud

Mound of Nimroud.

consists of a similar inclosure of consecutive mounds—the remains of ancient walls. The system of defences is however very inferior in importance and completeness to that of Kouyunjik. The indications of towers occur at regular intervals; 108 may still be traced on the N. and E. sides. The area forms an irregular square, about 2331 yards by 2095, containing about 1000 acres. The N. and E. sides were defended by moats, the W. and S. walls by the river, which once flowed immediately beneath them. On the S.W. face is a great mound, 700 yards by 400, and covering about 60 acres, with a cone or pyramid of earth, about 140 feet high, rising in the N.W. corner of it. At the S.E. angle of the inclosure is a group of lofty mounds, called by the Arabs, after Nimroud's lieutenant, Athur (cf. Gen. x. 11). The inclosure-walls of Khorsabad form a square of about 2000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the N.W. face. It may be divided into two parts or stages, the upper about 650 ft. square, and 30 ft. high, and the lower adjoining it, about 1350 by 300. Shereef Khan, so called from a small village in the neighbourhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer wall. Selamiyah is an inclosure of irregular form, situated upon a high bank overlooking the Tigris, about 5000 yards in circuit, and containing an area of about 410 acres, apparently once surrounded by a ditch or moat. The greater part of the discoveries which, of late years, have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Nimroud, Kouyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Baghdad; but his investigations were almost entirely confined to Kouyunjik and the surrounding mounds, of which he made a survey in 1820. He subsequently visited the mound of Nimroud, of which, however, he was unable to make more than a hasty examination. Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them systematically until M. Botta was appointed French consul at Mosul in 1843. The French Government having given the necessary funds, the ruins were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charcoal showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre came from these ruins. M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Nimroud and Kouyunjik, made between the years 1845 and 1850. The mound of Nimroud was found to contain the ruins of several distinct edifices, erected at different periods. The most ancient stood at the N.W. corner of the platform, the most recent at the S.E. In general plan and in construction they resembled

CON. D. B.

the ruins at Khorsabad—consisting of a number of halls, chambers, and galleries, panelled with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement of which was a square of 165 feet, and consisted, to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, bevelled, and adjusted. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it. It had evidently been broken into and rifled of its contents at some remote period, and may have been a royal sepulchre—the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It appears to have been raised by the son of the king who built the N.W. palace, and whose name in the cuneiform inscriptions is supposed to be identified with that of Sardanapalus. Shalmanubar or Shalmaneser, the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. On the W. face of the mound, and adjoining the centre palace, are the remains of a third edifice, built by the grandson of Shalmanubar, whose name is read Iva-Lush, and who is believed to be the Pul of the Hebrew Scriptures. Essarhaddon raised (about B.C. 680) at the S.W. corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S.E. corner are the ruins of a still later palace built by his grandson Ashur-emit-ili, very inferior in size and in splendour to other Assyrian edifices. At the S.W. corner of the mound of Kouyunjik stood a palace built by Sennacherib (about B.C. 700), exceeding in size and in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. The entrances to the edifice and to the principal chambers were flanked by groups of winged human-headed lions and bulls of colossal proportions—some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Essarhaddon, the third king of the name of Sardanapalus. No propylæa or detached buildings have as yet been discovered within the inclosure. At Shereef Khan are the ruins of a temple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Selamiyah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered. The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Kouyunjik. This platform was probably faced with stone masonry, remains of which were discovered at Nimroud, and broad flights of steps or inclined ways led up to its summit. Although only the general plan of the ground-floor can now be traced, it is evident

that the palaces had several stories built of wood and sun-dried bricks, which, when the building was deserted and allowed to fall to decay, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the alabaster slabs varied from a few inches to about 20 feet. It is to this accumulation of rubbish above them that the bas-reliefs owe their extraordinary preservation. The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition walls vary from 6 to 15 feet in thickness, and are solidly built of sun-dried bricks, against which are placed the panelling or skirting of alabaster slabs. No windows have hitherto been discovered, and it is probable that in most of the smaller chambers light was only admitted through the doors. The wall, above the wainscoting of alabaster, was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of alabaster, or large flat kiln-burnt bricks. It rested upon layers of bitumen and fine sand. Of nearly similar construction are the modern houses of Mosul. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monuments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians. By such means Mr. Fergusson has, with much ingenuity, attempted to reconstruct a palace of Nineveh. The sculptures, with the exception of the human-headed lions and bulls, were for the most part in low relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, &c. &c. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal valour of the king as the head of the people—"the mighty hunter before the Lord." The sculptures appear to have been painted—remains of colour having been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not however devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. These great edifices, the depositories of the national records, appear to have been at the same time the abode of the king and the temple of the gods. No building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies.—*Site of the City*.—Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson and those who concur in his interpretation of the cuneiform characters, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nimroud is supposed to read "Kalkhu," and the ruins are consequently identified with those of the Calah of Genesis (x. 11); Khorsabad is Sargina, as founded by Sargon, the name

having been retained in that of Sarghan, or Sarama, by which the ruins were known to the Arab geographers; Sherref Khan is Tarbisai. Selamiyah has not yet been identified, no inscription having been found in the ruins. The name of Nineveh is limited to the mounds opposite Mosul, including Kouyunjik and Nebbi Yunus. Furthermore, the ancient and primitive capital of Assyria is supposed to have been not Nineveh, but a city named Asshur, whose ruins have been discovered at Kalah Sherghat, a mound on the right or W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the presumed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but of fortified royal residences, each combining palaces, temples, propylæa, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Ispahan, or perhaps more appropriately with Delhi. It is thus alone that the ancient descriptions of Nineveh, if any value whatever is to be attached to them, can be reconciled with existing remains. As at Babylon, no great consecutive wall of inclosure comprising all the ruins, such as that described by Diodorus, has been discovered at Nineveh, and no such wall ever existed. The river Gomel, the modern Ghazir-Su, may have formed the eastern boundary or defence of the city. As to the claims of the mound of Kalah Sherghat to represent the site of the primitive capital of Assyria called Asshur, they must rest entirely on the interpretation of the inscriptions. This city was founded, or added to, they are supposed to declare, by one Shamas-Iva, the son and viceroy, or satrap, of Ismi-Dagon, king of Babylon, who reigned, it is conjectured, about B.C. 1840. Assyria and its capital remained subject to Babylonia until B.C. 1273, when an independent Assyrian dynasty was founded, of which fourteen kings, or more, reigned at Kalah Sherghat. About B.C. 930 the seat of government, it is asserted, was transferred by Sardanapalus (the second of the name, and the Sardanapalus of the Greeks) to the city of Kalkhu or Calah (Nimroud), which had been founded by an earlier monarch named Shalmanubar. There it continued about 250 years, when Sennacherib made Nineveh the capital of the empire.—*Prophecies relating to Nineveh and Illustrations of the O. T.*—These are exclusively contained in the Books of Nahum and Zephaniah; for although Isaiah foretells the downfall of the Assyrian empire (ch. x. and xiv.), he makes no mention of its capital. Nahum threatens the entire destruction of the city, so that it shall not rise again from its ruins: "With an overrunning flood he will make an utter end of the place thereof." "He will make an utter end; affliction shall not rise up the second time" (i. 8, 9). "Thy people is scattered upon the mountains, and no one gathereth them. There is no healing of thy bruise" (ii. 18, 19). The manner in which the city should be taken seems to be indicated. "The defence shall be prepared" (ii. 5) is rendered in the marginal

reading "the covering or coverer shall be prepared," and by Mr. Vance Smith, "the covering machine," the covered battering-ram or tower supposed to be represented in the bas-reliefs as being used in sieges. Some commentators believe that "the overrunning flood" refers to the agency of water in the destruction of the walls by an extraordinary overflow of the Tigris, and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 6, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Nimroud or Kouyunjik appears to have been washed away by the river. The likening of Nineveh to "a pool of water" (ii. 8) has been conjectured to refer to the moats and dams by which a portion of the country around Nineveh could be flooded. The city was to be partly destroyed by fire, "The fire shall devour thy bars," "then shall the fire devour thee" (iii. 13, 15). The gateway in the northern wall of the Kouyunjik inclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overcome with wine. The captivity of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been despoiled of their sacred images. Only one or two fragments of the precious metals were found in the ruins. Nineveh, after its fall, was to be "empty, and void, and waste" (ii. 10); "it shall come to pass, that all they that look upon thee shall flee from thee, and say, Nineveh is laid waste" (iii. 7). These epithets describe the present state of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and deserted condition is that given by Zephaniah, who probably lived to see its fall (ii. 13, 14, 15). The canals which once fertilised the soil are now dry. Except when the earth is green after the periodical rains the site of the city, as well as the surrounding country, is an arid yellow waste. Many allusions in the O. T. to the dress, arms, modes of warfare, and customs of the people of Nineveh, as well as of the Jews, are explained by the Nineveh monuments. Thus (Nah. ii. 3), "the shield of his mighty men is made red, the valiant men are in scarlet." The shields and the dresses of the warriors are generally painted red in the sculptures. The magnificent description of the assault upon the city (iii. 1, 2, 3) is illustrated in almost every particular. The mounds built up against the walls of a besieged town (Is. xxxvii. 33; 2 K. xix. 32; Jer. xxxii. 24, &c.), the battering-ram (Ex. iv. 2), the various kinds of armour, helmets, shields, spears, and swords, used in battle during a siege; the chariots and horses (Nah. iii. 3) are all seen in various bas-reliefs. The interior decoration of the Assyrian palaces is described by Ezekiel, himself a captive in

Assyria and an eye-witness of their magnificence (xxiii. 14, 15); a description strikingly illustrated by the sculptured likenesses of the Assyrian kings and warriors. The mystic figures seen by the prophet in his vision (ch. i.), uniting the man, the lion, the ox, and the eagle, may have been suggested by the eagle-headed idols, and man-headed bulls and lions, and the sacred emblem of the "wheel within wheel" by the winged circle or globe frequently represented in the bas-reliefs.—*Arts.*—The origin of Assyrian art is a subject at present involved in mystery, and one which offers a wide field for speculation and research. Those who derive the civilisation and political system of the Assyrians from Babylonia would trace their arts to the same source. One of the principal features of their architecture, the artificial platform serving as a substructure for their national edifices, may have been taken from a people inhabiting plains perfectly flat, such as those of Shinar, rather than an undulating country in which natural elevations are not uncommon, such as Assyria proper. But it still remains to be proved that there are artificial mounds in Babylonia of an earlier date than mounds on or near the site of Nineveh. Whether other leading features and the details of Assyrian architecture came from the same source, is much more open to doubt. In none of the arts of the Assyrians have any traces hitherto been found of progressive change. In the architecture of the most ancient known edifice all the characteristics of the style are already fully developed; no new features of any importance seem to have been introduced at a later period. In sculpture, as probably in painting also, if we possessed the means of comparison, the same thing is observable as in the remains of ancient Egypt. The earliest works hitherto discovered show the result of a lengthened period of gradual development, which, judging from the slow progress made by untutored man in the arts, must have extended over a vast number of years. They exhibit the arts of the Assyrians at the highest stage of excellence they probably ever attained. The only change we can trace, as in Egypt, is one of decline or "decadence." The latest monuments, such as those from the palaces of Esarhaddon and his son, show perhaps a closer imitation of nature, and a more careful and minute execution of details than those from the earlier edifices; but they are wanting in the simplicity yet grandeur of conception, in the imagination, and in the variety of treatment displayed in the most ancient sculptures. This will at once be perceived by a comparison of the ornamental details of the two periods. The lions of the earlier period are a grand, ideal, and, to a certain extent, conventional representation of the beast. In the later bas-reliefs the lions are more closely imitated from nature without any conventional elevation; but what is gained in truth is lost in dignity. The same may be observed in the treatment of the human form, though in its representation the Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. No new forms or combinations appear to have been introduced into Assyrian art during the four or five centuries, if not longer period, in which we are acquainted with it. The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone to the races who at various periods

the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especially characteristic of them, it may well and conveniently bear their name. From whence it was originally derived there is nothing as yet to show. If from Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be found between it and that of Egypt, but they are not sufficient to convince us that the one was the offspring of the other. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded, or the Phœnicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. At a late period of Assyrian history, at the time of the building of the Khorsabad palace (about the 8th century B.C.), a more intimate intercourse with Egypt through war or dynastic alliances than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians. The arts of the Assyrians, especially their architecture, spread to surrounding nations, as is usually the case when one race is brought into contact with another in a lower state of civilisation. They appear to have crossed the Euphrates, and to have had more or less influence on the countries between it and the Mediterranean. Monuments of an Assyrian character have been discovered in various parts of Syria, and further researches would probably disclose many more. The arts of the Phœnicians, judging from the few specimens preserved, show the same influence. The Assyrian inscriptions seem to indicate a direct dependence of Judæa upon Assyria from a very early period. From the descriptions of the temple and "houses" of Solomon (cf. 1 K. vi., vii.; 2 Chr. iii. iv.), it would appear that there was much similarity between them and the palaces of Nineveh, if not in the exterior architecture, certainly in the interior decorations. The Jewish edifices were however very much inferior in size to the Assyrian. Of objects of art (if we may use the term) contained in the Temple we have the description of the pillars, of the brazen sea, and of various bronze or copper vessels. The Assyrian character of these objects is very remarkable. The influence of Assyria to the eastward was even more considerable, extending far into Asia. The Persians copied their architecture (with such modifications as the climate and the building-materials at hand suggested), their sculpture, probably their painting and their mode of writing, from the Assyrians. The ruined palaces of Persepolis show the same general plan of construction as those of Nineveh—the entrances formed by human-headed animals, the skirting of sculptured stone, and the inscribed slabs. The various religious emblems and the ornamentation have the same Assyrian character. Amongst the Assyrians,

the arts were principally employed, as amongst all nations in their earlier stages of civilisation, for religious and national purposes. The colossal figures at the doorways of the palaces were mythic combinations to denote the attributes of a deity. The "Man-Bull" and the "Man-Lion," are conjectured to be the gods "Nin" and "Nergal," presiding over war and the chase; the eagle-headed and fish-headed figures so constantly repeated in the sculptures, and as ornaments of vessels of metal, or in embroideries—Nisroch and Dagon. The bas-reliefs almost invariably record some deed of the king, as head of the nation, in war, and in combat with wild beasts, or his piety in erecting vast palace-temples to the gods. Hitherto no sculptures specially illustrating the private life of the Assyrians have been discovered, except one or two incidents, such as men baking bread or tending horses, introduced as mere accessories into the historical bas-reliefs. This may be partly owing to the fact that no traces whatever have yet been found of their burial places, or even of their mode of dealing with the dead. Although the site of Nineveh afforded no special advantages for commerce, and although she showed her greatness rather to her political position as the capital of the empire, yet, situated upon a navigable river communicating with the Euphrates and the Persian Gulf, she must have soon formed one of the great trading stations between that important inland sea, and Syria, and the Mediterranean, and must have become a depôt for the merchandise supplied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel (xxvii. 24) as trading in blue clothes and broided work (such as is probably represented in the sculptures), and in Nahum (iii. 16) as "multiplied above the stars of heaven."—*Writing and Language*.—The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterwards baked in a furnace or kiln. (Comp. Ez. iv. 1.) The character employed was the arrow-headed or cuneiform—so called from each letter being formed by marks or elements resembling an arrow-head or a wedge. This mode of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empires, from the earliest times to which any known record belongs, or at least 20 centuries before the Christian era, down to the period of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted by Armenia. A cursive writing resembling the ancient Syrian and Phœnician, appears to have also been occasionally employed in Assyria. The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. The Assyrian and Babylonian alphabet (if the term may be applied to above 200 signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic—the same character being frequently used indifferently. The people of Nineveh spoke a Semitic dialect, connected with the Hebrew and with the so-called Chaldee of the Book

of Daniel and Ezra. This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria, as well as in Babylonia, a more ancient tongue belonging to a Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilisation and the greater part of their mythology. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifices in which they are found, records of his wars and expeditions into distant countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. These inscribed bricks are of the greatest value in restoring the royal dynasties. The most important inscription hitherto discovered in connexion with Biblical history, is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and describing, amongst other events, his wars with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of Lachish. A long list might be given of

Sennacherib on his throne before Lachish.

Biblical names occurring in the Assyrian inscriptions. Those of three Jewish kings have been read, Jehu son of Khumri (Omri), on the black obelisk, Menahem on a slab from the S.W. palace, Nimroud, now in the British Museum, and Hezekiah in the Kouyunjik records. The most important inscribed terra-cotta cylinders are—those from Kalah Sherghat, with the annals of a king, whose name is believed to read Tiglath Pileser, not the same men-

tioned in the 2nd Book of Kings, but an earlier monarch, who is supposed to have reigned about B.C. 1110, those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebbi Yunus with the records of Esarhaddon, and the fragments of three cylinders with those of his son. The most important results may be expected when inscriptions so numerous and so varied in character are deciphered. A list of nineteen or twenty kings can already be compiled, and the annals of the greater number of them will probably be restored to the lost history of one of the most powerful empires of the ancient world, and of one which appears to have exercised perhaps greater influence than any other upon the subsequent condition and development of civilised man. The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered descendants from the ancient inhabitants of the country are the so-called Chaldaean or Nestorian tribes, inhabiting the mountains of Kurdistan, the plains round the lake of Ooroomiyah in Persia, and a few villages in the neighbourhood of Mosul. They still speak a Shemitic dialect, almost identical with the Chaldee of the books of Daniel and Ezra. A resemblance, which may be but fanciful, has been traced between them and the representations of the Assyrians in the bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. A curse appears to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favoured country should remain other than a wilderness.

Ninevites. The inhabitants of Nineveh (Luke xi. 30).

Nisan. [MONTHS.]

Nisⁿon = Nisan. Esth. xi. 2.

Nisⁿroch. The proper name of an idol of Nineveh, in whose temple Sennacherib was worshipping when assassinated by his sons, Adram-melech and Sharezer (2 K. xix. 37; Is. xxxvii. 38). Rashi, in his note on Is. xxxvii. 38, explains Nis-roch as "a beam, or plank, of Noah's ark," from the analysis which is given of the word by Rabbinical expositors. What the true etymology may be is extremely doubtful. If the origin of the word be Shemitic, it may be derived, as Gesenius suggests, from the Heb. *nasher*, which is in Arab. *nisr*, "an eagle," with the termination *och* or *ach*, so that Nisroch would signify "the great eagle." But it must be confessed that this explanation is far from satisfactory. It is adopted, however, by Mr. Layard, who identifies with Nisroch the eagle-headed human figure, which is one of the most prominent on the earliest Assyrian monuments, and is always represented as contending with and conquering the lion or the bull.

Nitre (Heb. *nether*) occurs in Prov. xxv. 20, "and as vinegar upon *nether*;" and in Jer. ii. 22. The substance denoted is not that which we now understand by the term *nitre*, i. e. nitrate of potassa—"saltpetre"—but the *vitro* or *λίτρον* of the Greeks, the *nitrum* of the Latins, and the *natron* or native carbonate of soda of modern chemistry. The latter part of the passage in Proverbs is well explained by Shaw, who says (*Trav.* ii. 387), "the unsuitableness of the singing of songs to a heav-

heart is very finely compared to the contrariety there is between vinegar and natron." Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny, and referred to by Strabo, which are situated in the barren valley of *Bahr delama* (the Waterless Sea), about 50 miles W. of Cairo.

No. [NO-AMON.]

Noadiah. 1. A Levite, son of Binnui, who with Meremoth, Eleazar, and Jozabad, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. viii. 33).—2. The prophetess Noadiah joined Sanballat and Tobiah in their attempt to intimidate Nehemiah (Neh. vi. 14).

No'ah, the tenth in descent from Adam, in the line of Seth, was the son of Lamech, and grandson of Methuselah. Of his father Lamech all that we know is comprised in the words that he uttered on the birth of his son, words the more significant when we contrast them with the saying of the other Lamech of the race of Cain, which have also been preserved. In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He called his name Noah (Noach, *rest*), saying, "this name shall *comfort* us" (*yenachaménú*). It is quite plain that the name "rest," and the verb "comfort," are of different roots; and we must not try to make a philologist of Lamech, and suppose that he was giving an accurate derivation of the name Noah. He merely plays upon the name, after a fashion common enough in all ages and countries. Of Noah himself from this time we hear nothing more till he is 500 years old, when it is said he begat three sons, Shem, Ham, and Japhet. Very remarkable, however, is the glimpse which we get of the state of society in the ante-diluvian world. The narrative it is true is brief, and on many points obscure: a mystery hangs over it which we cannot penetrate. It stands thus: "And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took to them wives of all that they chose. And Jehovah said, My spirit shall not for ever rule (or be humbled) in men, seeing that they are [or, in their error they are] but flesh, and their days shall be a hundred and twenty years. The Nephilim were on the earth in those days; and also afterwards when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown." Here a number of perplexing questions present themselves: Who were the sons of God? Who the daughters of men? Who the Nephilim? What is the meaning of "My spirit shall not always rule, or dwell, or be humbled in men;" and of the words which follow, "But their days shall be an hundred and twenty years?" We will briefly review the principal solutions which have been given of these difficulties. *a.* Sons of God and daughters of men. Three different interpretations have from very early times been given of this most singular passage. 1. The "sons of Elohim" were explained to mean sons of princes, or men of high rank who degraded themselves by contracting marriages with "the daughters of men," *i. e.* with women of inferior position. 2. A second interpretation,

perhaps not less ancient, understands by the "sons of Elohim," angels. Two modern poets, Byron (in his drama of *Cain*) and Moore (in his *Loves of the Angels*), have availed themselves of this last interpretation for the purpose of their poems. 3. The interpretation, however, which is now most generally received, is that which understands by "the sons of the Elohim" the family and descendants of Seth, and by "the daughters of man (Adam)," the women of the family of Cain. 4. A fourth interpretation has recently been advanced and maintained with considerable ingenuity, by the author of the *Genesis of the Earth and Man*. He understands by "the sons of the Elohim" the "servants or worshippers of false gods" [taking Elohim to mean not God but gods], whom he supposes to have belonged to a distinct pre-Adamite race. "The daughters of men," he contends, should be rendered "the daughters of Adam, or the Adamites," women, that is, descended from Adam. These last had hitherto remained true in their faith and worship, but were now perverted by the idolaters who intermarried with them. *b.* But who were the Nephilim? It should be observed that they are not spoken of as the offspring of the "sons of the Elohim" and "the daughters of men." The sacred writer says, "the Nephilim were on the earth in those days," before he goes on to speak of the children of the mixed marriages. The name, which has been variously explained, only occurs once again in Num. xiii. 33, where the Nephilim are said to have been one of the Canaanitish tribes. If it is of Hebrew origin (which however may be doubted) it must mean either "fallen," *i. e.* apostate ones; or those who "fall upon" others, violent men, plunderers, freebooters, &c. It is of far more importance to observe that if the Nephilim of Canaan were descendants of the Nephilim in Gen. vi. 4, we have here a very strong argument for the non-universality of the Deluge. *c.* In consequence of the grievous and hopeless wickedness of the world at this time, God resolves to destroy it. "My spirit," He says, "shall not always dwell" or "bear sway" in man—inasmuch as he is but flesh. The meaning of which seems to be that whilst God had put His Spirit in man, *i. e.* not only the breath of life, but a spiritual part capable of recognising, loving, and worshipping Him, man had so much sunk down into the lowest and most debasing of fleshly pleasures, as to have almost extinguished the higher light within him. Then follows: "But his days shall be a hundred and twenty years," which has been interpreted by some to mean, that still a time of grace shall be given for repentance, *viz.*, 120 years before the Flood shall come; and by others, that the duration of human life should in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Of Noah's life during this age of almost universal apostasy we are told but little. It is merely said, that he was a righteous man and perfect in his generations (*i. e.* amongst his contemporaries), and that he, like Enoch, walked with God. St. Peter calls him "a preacher of righteousness." Besides this we are merely told that he had three sons, each of whom had married a wife; that he built the Ark in accordance with Divine direction; and that he was 600 years old when the Flood came. Both about the Ark and the Flood so many questions have been

raised, that we must consider each of these separately. *The Ark*.—The precise meaning of the Hebrew word (*tēbāh*) is uncertain. The word only occurs here and in Exodus (ii. 3). In all probability it is to the old Egyptian that we are to look for its original form. Bunsen, in his vocabulary, gives *tba*, "a chest," *tbt*, "a boat," and in the Copt. Vers. of Exod. ii. 3, 5, *tēbē* is the rendering of *tēbāh*. This "chest," or "boat," was to be made of gopher (*i. e.* cypress) wood, a kind of timber which both for its lightness and its durability was employed by the Phœnicians for building their vessels. The planks of the ark, after being put together, were to be protected by a coating of pitch, or rather bitumen, which was to be laid on both inside and outside, as the most effectual means of making it water-tight, and perhaps also as protection against the attacks of marine animals. The ark was to consist of a number of "nests" or small compartments, with a view no doubt to the convenient distribution of the different animals and their food. These were to be arranged in three tiers, one above another; "with lower, second, and third (stories) shalt thou make it." Means were also to be provided for letting light into the ark. In the A. V. we read, "A window shalt thou make to the ark, and in a cubit shalt thou finish it above:"—words which it must be confessed convey no very intelligible idea. The original, however, is obscure, and has been differently interpreted. What the "window," or "light-hole" was, is very puzzling. It was to be at the top of the ark apparently. If the words "unto a cubit shalt thou finish it above," refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof. But if so, it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem so. A different word is used in chap. viii. 6, where it is said that Noah opened the window of the ark. There the word is (*challōn*), which frequently occurs elsewhere in the same sense. Supposing then the *tēbāh* to be, as we have said, a skylight, or series of skylights running the whole length of the ark, the *challōn* might very well be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. This was to be placed in the side of the ark. Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Taking 21 inches for the cubit, the ark would be 525 feet in length, 87 feet 6 inches in breadth, and 52 feet 6 inches in height. This is very considerably larger than the largest British man-of-war. It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or oblong box rather. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. After having given Noah the necessary instructions for the building of the ark, God tells him the purpose for which it was designed. The earth is to be destroyed by water. "And I, behold I do bring

the flood—waters upon the earth—to destroy all flesh wherein is the breath of life . . . but I will establish my covenant with thee, &c." (vi. 17, 18). The inmates of the ark are then specified. They are to be Noah and his wife, and his three sons with their wives. Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive; birds, domestic animals, and creeping things are particularly mentioned. He is to provide for the wants of each of these stores "of every kind of food that is eaten." It is added, "Thus did Noah; according to all that God (Elohim) commanded him, so did he." A remarkable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of *unclean* animals, whilst of *clean* animals and birds (ver. 2), Noah is to take to him seven pairs. How is this addition to be accounted for? May we not suppose that we have here traces of a separate document interwoven by a later writer with the former history? Are we then to understand that Noah literally conveyed a pair of all the animals of the world into the ark? This question virtually contains in it another, viz., whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room but for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. But it is not only the inadequate size of the ark to contain all, or anything like all, the progenitors of our existing species of animals, which is conclusive against a universal deluge. Another fact points with still greater force, if possible, in the same direction, and that is the manner in which we now find these animals distributed over the earth's surface. We now know that every great continent has its own peculiar fauna; that the original centres of distribution must have been not one, but many; further that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noachian Deluge. It is quite plain, then, that if all the animals of the world were literally gathered together in the ark and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used with regard to the Flood itself, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal. *The Flood*.—The ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description which in a modern historian or poet would have occupied the largest space. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. From vii. 17 to the end of the chapter a very simple but very powerful and impressive description is given of the appalling catastrophe. "The waters of the Flood increased for a period of 90 days (40+50, comparing vii. 12 and 24).

And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month on the mountains of Ararat. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. It was then that Noah sent forth, first, the raven, which flew hither and thither, resting probably on the mountain-tops, but not returning to the ark; and next, after an interval of seven days (cf. ver. 10), the dove, "to see if the waters were abated from the ground" (i. e. the lower plain country). "But the dove found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time with a fresh olive-leaf in her mouth, a sign that the waters were still lower. And once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. On reading this narrative it is difficult, it must be confessed, to reconcile the language employed with the hypothesis of a partial deluge. The difficulty does not lie in the largeness of most of the terms used, but rather in the precision of one single expression. It is natural to suppose that the writer, when he speaks of "all flesh," "all in whose nostrils was the breath of life," refers only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the sea it would have been quite impossible for this to have been covered, the water reaching 15 cubits, i. e. 26 feet above it, unless the whole earth were submerged. The plain meaning of the narrative is, that far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. But there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. Assuming, then, that the Ararat here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an inrush of the waters of the Persian gulf, similar to what occurred in the Runn of Cutch, on the eastern arm of the Indus, in 1819, when the sea flowed in, and in a few hours converted a tract of land, 2000 square miles in area, into an inland sea or lagoon. It has sometimes been asserted that the facts of geology are conclusive against the possibility of a universal deluge. Formerly, indeed, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth

of the Scripture narrative. Even within the last thirty years geologists like Cuvier and Buckland have thought that the *superficial deposits* might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and indeed before the creation of man. So far then, it is clear, there is no evidence now on the earth's surface in favour of a universal deluge. But is there any positive geological evidence against it? Hugh Miller and other geologists have maintained that there is. They appeal to the fact that in various parts of the world, such as Auvergne in France, and along the flanks of Aetna, there are cones of loose scoriae and ashes belonging to long extinct volcanoes, which must be at least triple the antiquity of the Noachian Deluge, and which yet exhibit no traces of abrasion by the action of water. These loose cones, they argue, must have been swept away had the water of the Deluge ever reached them. But this argument is by no means conclusive. There is, however, other evidence conclusive against the hypothesis of a universal deluge, miracle apart. "The first effect of the covering of the whole globe with water would be a complete change in its climate, the general tendency being to lower and equalize the temperature of all parts of its surface. *Pari passu* with this process . . . would ensue the destruction of the great majority of marine animals. And this would take place, partly by reason of the entire change in climatal conditions, too sudden and general to be escaped by migration; and, in still greater measure, in consequence of the sudden change in the depth of the water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet in a few months, and to be raised again with equal celerity, it follows that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral-reefs of the Pacific would at once have been converted into dead coral, never to grow again. But so far is this from being the case, that acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand Noah was not directed to take marine animals of any kind into the ark, nor indeed is it easy to see how they could have been preserved. Again, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred. Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture. There are, then, it must be confessed, very strong grounds for believing

that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, for instance, the valley of the Euphrates to have been submerged; and then the necessity for preserving all the species of animals disappears. For, in the first place, there was nothing to prevent the birds and many of the large mammals from getting away; and in the next, the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant." All these considerations point with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe. It now only remains to notice the later allusions to the catastrophe occurring in the Bible, and the traditions of it preserved in other nations besides the Jewish. The word specially used to designate the Flood of Noah (*hamnabbal*) occurs in only one other passage of Scripture, Ps. xxix. 10. In Is. liv. 9, the Flood is spoken of as "the waters of Noah." In the N. T. our Lord gives the sanction of His own authority to the historical truth of the narrative, Matt. xxiv. 37 (cf. Luke xvii. 26). St. Peter speaks of the "long suffering of God," which "waited in the days of Noah." And again, in his Second Epistle (ii. 5) he cites it as an instance of the righteous judgment of God who spared not the old world, &c. The traditions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, or whether they were of national growth. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost amongst these is the Chaldean. It is preserved in a fragment of Berosus, and tells how Xisuthrus built a vessel in which he was saved from a great deluge, with different animals, birds, and quadrupeds. Other notices of a Flood may be found (a) in the Phœnician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned: (b) in the Sibylline Oracles, partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. To these must be added (c) the Phrygian story of king Annakos or Nannakos (Enoch) in Iconium, who reached an age of more than 300 years, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus, a medal was struck at Apamea, on which the Flood is commemorated. As belonging to this cycle of tradition, must be reckoned also (1) the Syrian, related by Lucian, and connected with a huge chasm in the earth near Hieropolis into which the waters of the Flood are supposed to have drained: and (2) the Armenian quoted by Josephus. A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses anything like an historical aspect. The Chinese story is, in many respects, singularly like the Biblical. The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in

the Mahābhārata. The account of the Flood in the Koran is drawn apparently, partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving. Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark; he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. A third cycle of traditions is to be found among the American nations. These, as might be expected, show occasionally some marks of resemblance to the Asiatic legends. "Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxcoc, viz., the Aztecs, the Mixtecs, the Zapotecs, the Tlascaltecs, and the Mechoacans. The Noah, Xisuthrus, or Manu of these nations is termed Coxcoc, Teo-Cipactli, or Tezpi. He saved himself with his wife Pochiquetzatl in a bark, or according to other traditions on a raft." A peculiarity of many of these American Indian traditions must be noted, and that is, that the Flood, according to them, usually took place in the time of the First Man, who, together with his family escape. It may not be amiss, before we go on to speak of the traditions of more cultivated races, to mention the legend still preserved among the inhabitants of the Fiji islands, although not belonging to our last group. One more cycle of traditions we shall notice—that, viz., of the Hellenic races. Hellas has two versions of a flood, one associated with Ogyges and the other, in a far more elaborate form, with Deucalion. Both, however, are of late origin,—they were unknown to Homer and Hesiod, Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood (i. 56). Pindar is the first writer who mentions it (*Olymp. ix. 37ff.*). It must be confessed, that the later the narrative, the more definite the form it assumes, and the more nearly it resembles the Mosaic account. It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. *After the Flood.*—Noah's first act after he left the ark was to build an altar, and to offer sacrifices. This is the first altar of which we read in Scripture, and the first burnt sacrifice. Jehovah accepts the sacrifice of Noah as the acknowledgment on the part of man that he desires reconciliation and communion with God. Then follows the blessing of God (Elohim) upon Noah and his sons. All living creatures are now given to man for food; but express provision is made that the blood (in which is the life) should not be eaten. Next, God makes provision for the security of human life. The blood of man, in which is his life, is yet more precious than the blood of beasts. Hence is laid the first foundation of the civil power. Thus with the beginning of a new world God gives, on the one hand, a promise which secures the stability of the natural order of the universe, and, on the other hand, consecrates human life with a special sanctity as resting upon these two pillars—the brotherhood of men, and man's likeness to God. Of the seven precepts of Noah, as they are called, the observance of which was required of all Jewish proselytes, three only are here expressly mentioned. It is in the terms of the blessing and the covenant

made with Noah after the Flood that we find the strongest evidence that in the sense of the writer it was universal, *i. e.*, that it extended to *all the then known world*. The literal truth of the narrative obliges us to believe that *the whole human race*, except eight persons, perished by the waters of the flood. Noah is clearly the head of a new human family, the representative of the whole race. It is as such that God makes His covenant with him; and hence selects a *natural* phenomenon as the sign of that covenant. The bow in the cloud, seen by every nation under heaven, is an unfailing witness to the truth of God. Was the rainbow, then, we ask, never seen before the flood? Was this "sign in the heavens" beheld for the first time by the eight dwellers in the ark when, after their long imprisonment, they stood again upon the green earth, and saw the dark humid clouds spanned by its glorious arch? Such seems the meaning of the narrator. And yet this implies that there was no rain before the flood, and that the laws of nature were changed, at least in that part of the globe, by that event. Hence, many writers have supposed that the meaning of the passage is, not that the rainbow now appeared for the first time, but that it was now for the first time invested with the sanctity of a sign. It must be confessed, however, that this is not the *natural* interpretation of the words. Noah now for the rest of his life betook himself to agricultural pursuits, following in this the tradition of his family. It is particularly noticed that he planted a vineyard. Whether in ignorance of its properties or otherwise, we are not informed, but he drank of the juice of the grape till he became intoxicated and shamefully exposed himself in his own tent. One of his sons, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavoured to hide it. When he recovered from the effects of his intoxication, he declared that a curse should rest upon the sons of Ham. With the curse on his youngest son was joined a blessing on the other two. It is uncertain whether in the words "And let him dwell in the tents of Shem," "God," or "Japhet," is the subject of the verb. At first it seems more natural to suppose that Noah prays that God would dwell there. But the blessing of Shem has been spoken already: It is better therefore to take Japhet as the subject. What then is meant by his dwelling in the tents of Shem? Not of course that he should so occupy them as to thrust out the original possessors; nor even that they should melt into one people; but as it would seem, that Japhet may enjoy the *religious privileges* of Shem. After this prophetic blessing we hear no more of the patriarch but the sum of his years.

No'ah. One of the five daughters of Zelo-phehad (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3).

No-amon (Nah. iii. 8), **No** (Jer. xlv. 25; Ez. xxx. 14, 15, 16), a city of Egypt, Thebes (Thebes), or Diospolis Magna. The second part of the first form is the name of AMEN, the chief divinity of Thebes, mentioned or alluded to in connexion with this place in Jeremiah, "Behold, I will punish Amon in No, and Pharaoh, and Egypt, with their gods, and their kings;" and perhaps also alluded to in Ezekiel (xxx. 15). There is a difficulty as to the meaning of No. It seems most reasonable to suppose that No is a Shemitic name, and that Amon is added in Nahum (*i. c.*) to distinguish Thebes from

some other place bearing the same name, or on account of the connexion of Amen with that city. Jerome supposes No to be either Alexandria or Egypt itself. Champollion takes it to be Diospolis in Lower Egypt; but Gesenius (*l. c.*), well observes that it would not then be compared in Nahum to Nineveh. This and the evidence of the Assyrian record leave no doubt that it is Thebes. The description of No-Amon, as "situate among the rivers, the waters round about it" (Nah. *l. c.*), remarkably characterizes Thebes.

Nob (1 Sam. xxiii. 11; Neh. xi. 32) was a sacerdotal city in the tribe of Benjamin, and situated on some eminence near Jerusalem. That it was on one of the roads which led from the north to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army. In this spirited sketch the poet sees the enemy pouring down from the north. It is implied here clearly that Nob was the last station in their line of march, whence the invaders could see Jerusalem, and whence they could be seen, as they "shook the hand" in proud derision of their enemies. Nob was one of the places where the tabernacle, or ark of Jehovah, was kept for a time during the days of its wanderings before a home was provided for it on mount Zion (2 Sam. vi. 1, &c.). A company of the Benjamites settled here after the return from the exile (Neh. xi. 32). But the event for which Nob was most noted in the Scripture annals, was a frightful massacre which occurred there in the reign of Saul (1 Sam. xxii. 17-19). All trace of the name has disappeared from the country long ago. Jerome states that nothing remained in his time to indicate where it had been. Geographers are not agreed as to the precise spot with which we are to identify the ancient locality. Some of the conjectures on this point may deserve to be mentioned. Kiepert's Map places Nob at *El-Isauieh*, not far from *Anáth*, about a mile north-west of Jerusalem. But it must be regarded as fatal to this identification that Jerusalem is not to be seen from that point. Mr. Porter expresses the confident belief that Nob is to be sought on a low peaked tell, a little to the right of the northern road and opposite to *Sháfát*. The Nob spoken of above is not to be confounded with another which Jerome mentions in the plain of Sharon, not far from Lydda.

No'bah. The name conferred by the conqueror of KENATH and the villages in dependence on it on his new acquisition (Num. xxxii. 42). For a certain period after the establishment of the Israelite rule the new name remained, and is used to mark the course taken by Gideon in his chase after Zebah and Zalmunna (Judg. viii. 11). But it is not again heard of, and the original appellation, as is usual in such cases, appears to have recovered its hold, which it has since retained; for in the slightly modified form of *Kunawát* it is the name of the place to the present day.

No'bah. An Israelite warrior (Num. xxxii. 42), probably, like Jair, a Manassite, who during the conquest of the territory on the east of Jordan possessed himself of the town of Kenath and the villages or hamlets dependent upon it (Heb. "daughters"), and gave them his own name.

Nod. [GAIN.]

Nodab, the name of an Arab tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe

of Manasseh, against the Hagarites (verses 9-22, ver. 19). It has been supposed that Nodab was one of the sons of Ishmael. But we have no other mention of Nodab, and it is probable that he was a grandson or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant.

No'ah. The patriarch Noah (Tob. iv. 12; Matt. xxiv. 37, 38; Luke iii. 36, xvii. 26, 27).

No'eba = NEKODA I (1 Esdr. v. 31; comp. Esr. ii. 48).

No'gah. One of the thirteen sons of David who were born to him in Jerusalem (1 Chr. iii. 7, xiv. 6).

No'hah. The fourth son of Benjamin (1 Chr. vii. 2).

Nun. Nun, the father of Joshua (1 Chr. vii. 27).

Noph (Is. xix. 13, Jer. ii. 16, Ez. xxx. 13, 16), **NOPIH** (Hos. ix. 6), a city of Egypt, Memphis. These forms are contracted from the ancient Egyptian common name, MEN-NUFR, or MEN-NEFRU, "the good abode," or perhaps "the abode of the good one." The Hebrew forms are regarded as representing colloquial forms of the name, current with the Shemites, if not with the Egyptians also. It is probable that the epithet "good" refers to Osiris, whose sacred animal Apis was here worshipped. As the great upper Egyptian city is characterized in Nahum as "situate among the rivers" (iii. 8), so in Hosea the lower Egyptian one is distinguished by its Necropolis.

Nophah, a place mentioned only in Num. xxi. 30, in the remarkable song apparently composed by the Amorites after their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dibon and Medeba, and was possibly in the neighbourhood of Heshbon. A name very similar to Nophah is Nobah, which is twice mentioned. Ewald decides that Nophah is identical with the latter of these.

Nose-jewel (Gen. xiv. 22; Ex. xxxiv. 22 "car-ring;" Is. iii. 21; Ez. xvi. 12, "jewel on the forehead"). A ring of metal, sometimes of gold or silver, passed usually through the right nostril, and worn by way of ornament by women in the East. Its diameter is usually 1 in. or 1½ in., but sometimes as much as 3½ in. Upon it are strung beads, coral, or jewels. In Egypt it is now almost confined to the lower classes.

Number. Like most Oriental nations, it is probable that the Hebrews in their written calculations made use of the letters of the alphabet. That they did so in post-Babylonian times we have conclusive evidence in the Maccabaean coins; and it is highly probable that this was the case also in earlier times. But though, on the one hand, it is certain that in all existing MSS. of the Hebrew text of the O. T. the numerical expressions are written at length, yet, on the other, the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. These variations appear to have proceeded from the alphabetic method of writing numbers. There can be little doubt, however, that some at least of the numbers mentioned in Scripture are intended to be representative rather than deter-

minative. Certain numbers, as 7, 10, 40, 100, were regarded as giving the idea of completeness. Without entering into St. Augustine's theory of this usage, we may remark that the notion of representative numbers in certain cases is one extremely common among Eastern nations, who have a prejudice against counting their possessions accurately; that it enters largely into many ancient systems of chronology, and that it is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers, of the Gnostics, and also of such Christian writers as St. Augustine himself. We proceed to give some instances of numbers used (a), representatively, and thus probably by design indefinitely or (b), definitely, but, as we may say preferentially, i. e., because some meaning (which we do not in all cases understand) was attached to them. 1. *Seven*, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, e. g. *seven-fold*, Gen. iv. 24; *seven times*, i. e. completely, Lev. xxvi. 24; Ps. xii. 6; *seven* (i. e. many) *ways*, Deut. xxviii. 25. 2. *Ten* as a preferential number is exemplified in the Ten Commandments and the law of Tithe. 3. *Seventy*, as compounded of 7 × 10, appears frequently, e. g., *seventy fold* (Gen. iv. 24; Matt. xviii. 22). Its definite use appears in the offerings of 70 shekels (Num. vii. 13, 19, and foll.); the 70 elders (xi. 16); 70 years of captivity (Jer. xxv. 11). 4. *Five* appears in the table of punishments, of legal requirements (Ex. xxii. 1; Lev. v. 16, xxii. 14, xxvii. 15; Num. v. 7, xviii. 16), and in the five empires of Daniel (Dan. ii.). 5. *Four* is used in reference to the 4 winds (Dan. vii. 2); and the so-called 4 corners of the earth; the 4 creatures, each with 4 wings and 4 faces, of Ezekiel (i. 5 and foll.); 4 rivers of Paradise (Gen. ii. 10); 4 beasts (Dan. vii., and Rev. iv. 6); the 4 equal-sided Temple-chamber (Ez. ii. 47). 6. *Three* was regarded, both by the Jews and other nations, as a specially complete and mystic number. 7. *Twelve* (3 × 4) appears in 12 tribes, 12 stones in the high-priest's breast-plate, 12 Apostles, 12 foundation-stones, and 12 gates (Rev. xxi. 19-21). 8. *Forty* appears in many enumerations; 40 days of Moses (Ex. xiv. 18); 40 years in the wilderness (Num. xiv. 34); 40 days and nights of Elijah (1 K. xix. 8). 9. *One hundred*.—100 cubits' length of the Tabernacle-court (Ex. xxvii. 18); 100 men, i. e. a large number (Lev. xxvi. 8); Gideon's 300 men (Judg. vii. 6); leader of 100 men (1 Chr. xii. 14); 100 stripes (Prov. xvii. 10, &c.). 10. Lastly, the mystic number 666 (Rev. xiii. 18).

Numbering. [CENSUS.]

Numbers, the Fourth Book of the Law or Pentateuch. It takes its name in the LXX. and Vulg. (whence our 'Numbers') from the double numbering or census of the people. A. *Contents*.—The Book may be said to contain generally the history of the Israelites from the time of their leaving Sinai, in the second year after the Exodus, till their arrival at the borders of the Promised Land in the fortieth year of their journeyings. It consists of the following principal divisions:—I. The preparations for the departure from Sinai (i. 1-x. 10). II. The journey from Sinai to the borders of Canaan (x. 11-xiv. 45). III. A brief notice of laws given, and events which transpired, during the thirty-seven years' wandering in the wilderness (xv. 1-xix. 22).

IV. The history of the last year, from the second arrival of the Israelites in Kadesh till they reach "the plains of Moab by Jordan near Jericho" (xx. 1-xxvi. 13).—I. (a.) The object of the encampment at Sinai has been accomplished. It is now time to depart in order that the object may be achieved for which Israel has been sanctified. That object is the occupation of the Promised Land. Therefore Israel must be organized as Jehovah's army: and to this end a mustering of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people, chapters i.-iv. These contain, first, the census of all the tribes or clans (chap. i.); secondly, the arrangement of the camp, and the order of march (chap. ii.); thirdly, the special and separate census of the Levites (chaps. iii., iv.). (b.) Chapters v., vi. Certain laws apparently supplementary to the legislation in Leviticus. (c.) Chapters vii. 1-x. 10. Events occurring at this time, and regulations connected with them.—II. March from Sinai to the borders of Canaan. (a.) We have here, first, the order of march described (x. 14-28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journeys; and the chant which accompanied the moving and the resting of the ark (vers. 35, 36). (b.) An account of several of the stations and of the events which happened at them (x. 11-xii. 15); the sending of the spies from the wilderness of Paran (*et Iyh*), their report, the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16-xiv. 45).—III. What follows must be referred apparently to the thirty-seven years of wanderings; but we have no notices of time or place (xv. 1-xix.).—IV. (a.) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron are not allowed to enter the Promised Land (xx. 1-13). They intended perhaps, as before, to enter Canaan from the south. They therefore desired a passage through the country of Edom. The Edomites refused the request, and turned out in arms to defend their border. The Israelites abandoned the attempt as hopeless and turned southwards, keeping along the western borders of Idumea till they reached Ezion-geber (xx. 14-21). On their way southwards they stop at Mount Hor; or rather at Moserah, on the edge of the Edomite territory; and from this spot it would seem that Aaron, accompanied by his brother Moses and his son Eleazar, quitted the camp in order to ascend the mountain. After Aaron's death, the march is continued southward. The passage (xxi. 1-3) which speaks of the Canaanite king of Arad as coming out against the Israelites is clearly out of place, standing as it does after the mention of Aaron's death on Mount Hor. Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighbourhood of Kadesh. (b.) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successively encounter and defeat the kings of the Amorites and of Bashan (xxi. 10-35). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of Balaam (xxii. 1-xxiv. 25). Other artifices

are employed by the Moabites to weaken the Israelites, especially through the influence of the Moabitish women (xxv. 1). The book concludes with a recapitulation of the various encampments of the Israelites in the desert (xxiii. 1-49); the command to destroy the Canaanites (xxiii. 50-56); the boundaries of the Promised Land, and the men appointed to divide it (xxiv.); the appointment of the cities of the Levites and the cities of refuge (xxv.); and further directions respecting heifers. B. *Integrity*.—This, like the other books of the Pentateuch, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents. According to De Wette, the following portions are the work of the Elohist:—Chap. i. 1-x. 28; xiii. 2-16 (in its original, though not in its present form); xv. 1, 2-11, 16-23, 24 (?); xvii.-xix.; xx. 1-13, 22-29; xxv.-xxxi. (except perhaps xxvi. 8-11); xxxii. 5, 28-42 (vers. 1-4 uncertain); xxxiii.-xxxvi. The rest of the book is, according to him, by the Jehovist or later editor. Vaihinger finds traces of three distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns chap. x. 29-36; xi. 1-12, 16 (in its original form); xx. 14-21; xxi. 1-9, 13-35; xxxii. 33-42; xxxiii. 55, 56. To the Elohist belong chap. i. 1-x. 28; xi. 1-xii. 16; xiii. 1-xx. 13; xx. 22-29; xxi. 10-12; xxii. 1; xxv. 1-xxxi. 34; xxxii. 1-32; xxxiii. 1-xxvi. 19. To the Jehovist, xi. 1-xii. 16; xxii. 2-xxiv. 25; xxxi. 8, &c. But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or colouring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later document. In chap. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded even in his own family. Considering the almost absolute nature of that authority, this is perhaps hardly to be wondered at. The pretext for the outburst of this feeling on the part of Miriam and Aaron was that Moses had married an Ethiopian woman (a woman of Cush). This was probably, as Ewald suggests, a second wife married after the death of Zipporah. But there is no reason for supposing, as he does, that we have here a confusion of two accounts. It is not perhaps to be wondered at that the episode of Balaam (xxii. 2-xxiv. 25) should have been regarded as a later addition. The language is peculiar, as well as the general cast of the narrative. The prophecies are vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry which meet us in chap. xxi. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the 8th century B.C., and hence he accounts for the reference to Assyria and the Cypriotes (the Kittim). The prophecies of Balaam therefore, on this hypothesis, are *vaticinia ex eventu*, put into his mouth by a clever, but not very scrupulous, writer of the time of Isaiah. But this sort of criticism is so purely arbitrary that it scarcely merits a serious refutation, not to mention that it rests entirely on the assumption that in prophecies

there is no such thing as prediction. Even granting that this episode is not by the same writer as the rest of the book of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Euphrates, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness. The Book of Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed. Such, for instance, is the blessing of the high-priest (vi. 24-26). Such too are the chants which were the signal for the Ark to move when the people journeyed, and for it to rest when they were about to encamp. In chap. xxi. we have a passage cited from a book called the 'Book of the Wars of Jehovah.' This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the Book of the Wars of Jehovah,

'Valley in Suphah and the torrent-beds;
Arnon and the slope of the torrent beds
Which turneth to where Ar lieth,
And which leaneth upon the border of Moab.'

The next is a song which was sung on the digging of a well at a spot where they encamped, and which from this circumstance was called Beër, or 'The Well.' It runs as follows:—

"Spring up, O well! sing ye to it:
Well, which the princes dug,
Which the nobles of the people bored
With the sceptre-of-office, with their staves."

This song, first sung at the digging of the well, was afterwards no doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labour. Immediately following this 'Song of the Well,' comes a song of victory, composed after a defeat of the Moabites and the occupation of their territory. It is in a taunting, mocking strain; and is commonly considered to have been written by some *Israelitish* bard on the occupation of the Amorite territory. Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad, commemorating the conquest of Sihon from Moab. If the song is of Hebrew origin, then the former part of it is a biting taunt. C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed in other articles, DEUTERONOMY; EXODUS; PENTATEUCH.

Numenius, son of Antiochus, was sent by Jonathan on an embassy to Rome (1 Macc. xii. 16) and Sparta (xii. 17), to renew the friendly con-

nexions between these nations and the Jews, c. B.C. 144. He was again despatched to Rome by Simon, c. B.C. 141 (1 Macc. xiv. 24).

Nun. The father of the Jewish captain Joshua (Ex. xxiii. 11, &c.). His genealogical descent from Ephraim is recorded in 1 Chr. vii.

Nurse. It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honour and importance. (See Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Macc. i. 20.) The same term is applied to a foster-father or mother, e. g., Num. xi. 12; Ruth iv. 16; Is. xlix. 23. In great families male servants, probably eunuchs in later times, were entrusted with the charge of the boys, 2 K. x. 1, 5.

Nuts. The representative in the A. V. of the words *botnim* and *egôz*. 1. *Botnim*. Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, were *botnim* (Gen. xliii. 11). There can scarcely be a doubt that the *botnim* denote the fruit of the Pistachio tree (*Pistacia vera*), though most modern

Pistacia vera.

versions are content with the general term *nuts* Syria and Palestine have been long famous for Pistachio-trees. The district around Aleppo is especially celebrated for the excellence of the Pistachio nuts; the town of Batna in the same district is believed to derive its name from this circumstance: Betonim, a town of the tribe of Gad (Josh. xiii. 26), has in all probability a similar etymology. There is scarcely any allusion to the occurrence of the *Pistacia vera* in Palestine amongst the writings of modern travellers. Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the north gate of Jerusalem. But he says the tree is cultivated at Beirut and elsewhere in Syria. 2. *Egôz* occurs only in Cant. vi. 11. The Hebrew word in all probability is here to be understood to refer to the *Walnut-tree*. According to Josephus

the walnut-tree was formerly common, and grew most luxuriantly around the lake of Gennesareth.

Nymphas, a wealthy and zealous Christian in Laodicea, Col. iv. 15.

Oak. The following Hebrew words, which appear to be merely various forms of the same root, occur in the O. T. as the names of some species of oak, viz. *él*, *éláh*, *élón*, *lân*, *alláh*, and *allón*. 1. *El* occurs only in the sing. number in Gen. xiv. 6 ("El-paran"). It is uncertain whether *él* should be joined with *Paran* to form a proper name, or whether it is to be taken separately, as the "terebinth," or the "oak," or the "grove," of Paran. Three plural forms of *él* occur; *élim*, *élóth*, and *élath*. *Elin*, the second station where the Israelites halted after they had crossed the Red Sea, in all probability derived its name from the seventy palm-trees there; the name *él*, which more particularly signifies an "oak," being here put for any grove or plantation. Similarly the other plural form, *élóth élath*, may refer, as Stanley conjectures, to the palm-grove at Akuba. The plural *élim* occurs in Is. i. 29, where probably "oak" are intended: in Is. lxi. 3, and Ex. xxxi. 14, any strong flourishing trees may be denoted. 2. *Elah* ("oak," "elah," "teal-tree" in Is. vi. 13; "elms" in Hos. iv. 13). There is much difficulty in determining the exact meanings of the several varieties of the term mentioned above. Celsius has endeavoured to shew that *él*, *élim*, *élón*, *éláh*, and *alláh*, all stand for the terebinth-tree (*Pistacia terebinthus*), while *allón* denotes an oak. Rosenmüller gives the terebinth to *él* and *éláh*, and the oak to *alláh*, *allón*, and *élón*. That various species of oak may well have deserved the appellation of mighty trees is clear from the fact, that noble oaks are to this day occasionally seen in Palestine and Lebanon. If we examine the claims of the terebinth to represent the *éláh*, we shall see that in point of size it cannot compete with some of the oaks of Palestine. Dr. Thomson (*The Land and the Book*, p. 243) remarks on this point: "There are more mighty oaks here in this immediate vicinity (*Mejdel es-Sheva*) than there are terebinths in all Syria and Palestine together." Two oaks (*Quercus pseudo-coccifera* and *Q. agrifolia*) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes. 3. *Elón* occurs frequently in the O. T., and denotes, there can be little doubt, some kind of oak. 4. *Lân* is found only in Dan. iv. as the tree which Nebuchadnezzar saw in his dream. 5. *Alláh* occurs only in Josh. xxiv. 26, and is correctly rendered "oak" by the A. V. 6. *Allón* is uniformly rendered "oak" by the A. V. and has always been so understood by commentators. It should be stated that *allón* occurs in Hos. iv. 13, as distinguished from the other form *éláh*; consequently it is necessary to suppose that two different trees are signified by the terms. We believe that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: *allón* may stand for an evergreen oak, as the *Quercus pseudo-coccifera*, and *éláh* for one of the deciduous kinds. The oaks of Bashan belong in all probability to the species known as *Quercus agrifolia*,

the *Valonia* oak, which is said to be common in Gilead and Bashan. Another species of oak, besides those named above, is the *Quercus infectoria*, which is common in Galilee and Samaria. It is rather a small tree in Palestine, and seldom grows above 30 feet high, though in ancient times it might have been a noble tree.

Oath. I. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, viz. as an ultimate appeal to divine authority to ratify an assertion. There the Almighty is represented as promising or denouncing with an oath, i. e. doing so in the most positive and solemn manner.—II. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (a) Thus believers in Jehovah appealed to Him, both judicially and extra-judicially. (b) Appeals of this kind to authorities recognised respectively by adjoining parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offences against divine justice.—III. As a consequence of this principle, (a) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (Ex. xxiii. 13, xxiv. 6; Dent. xix. 12, &c.). (b) So also the sovereign's name is sometimes used as a form of obligation (Gen. xlii. 15; 2 Sam. xi. 11, xiv. 19).—IV. Other forms of oath, serious or frivolous, are mentioned, some of which are condemned by our Lord (Matt. v. 33, xxiii. 16-22; and see Jam. v. 12). As to the subject matter of oaths the following cases may be mentioned:—1. Agreement or stipulation for performance of certain acts (Gen. xiv. 22, xxiv. 2, 8, 9, &c.). 2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccl. viii. 2; 2 Chr. xxxvi. 13; 1 K. xviii. 10). 3. Promissory oath of a ruler (Josh. vi. 26; 1 Sam. xiv. 24; 28, &c.). Priests took no oath of office (Heb. vii. 21). 4. Vow made in the form of an oath (Lev. v. 4). 5. Judicial oaths. (a) A man receiving a pledge from a neighbour was required, in case of injury happening to the pledge, to clear himself by oath of the blame of damage (Ex. xxii. 10, 11; 1 K. viii. 31; 2 Chr. vi. 22). (b) It appears that witnesses were examined on oath, and that a false witness, or one guilty of suppression of the truth, was to be severely punished (Lev. v. 1; Prov. xxix. 24; Dent. xix. 16-19). (c) A wife suspected of incontinence was required to clear herself by oath (Num. v. 19-22). The forms of adjuration mentioned in Scripture are—1. Lifting up the hand. Witnesses laid their hands on the head of the accused (Gen. xiv. 22; Lev. xxiv. 14; Dent. xxxiii. 40; Is. iii. 7). 2. Putting the hand under the thigh of the person to whom the promise was made (Gen. xxiv. 2, xlvii. 29). It has been explained (a) as having reference to the covenant of circumcision; (b) as containing a principle similar to that of phallic symbolism; (c) as referring to the promised Messiah. 3. Oaths were sometimes taken before the altar, or, as some understand the passage, if the persons were not in Jerusalem, in a position looking towards the Temple (1 K. viii. 31; 2 Chr. vi. 22). 4. Dividing a victim and passing between or distributing the pieces (Gen. xv. 10, 17; Jer. xxxiv. 18). As the sanctity of oaths was carefully inculcated by the law, so the crime of perjury was strongly condemned; and to a false witness the same punish-

ment was assigned which was due for the crime to which he testified (Ex. xx. 7; Lev. xix. 12; Deut. xix. 16-19; Ps. xv. 4; Jer. v. 2, vii. 9; Ez. xvi. 59; Hos. x. 4; Zech. viii. 17). The Christian practice in the matter of oaths was founded in great measure on the Jewish. Thus the oath on the Gospels was an imitation of the Jewish practice of placing the hands on the book of the Law. The most solemn Mohammedan oath is made on the open Koran. Bedouin Arabs use various sorts of adjuration, one of which somewhat resembles the oath "by the Temple." The person takes hold of the middle tent-pole, and swears by the life of the tent and its owners. The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T., e. g. Matt. viii. 9, Acts xii. 19, xvi. 27, xxvii. 42.

Obadi'ah. 1. The sons of Obadiah are enumerated in a corrupt passage of the genealogy of the tribe of Judah (1 Chr. iii. 21).—2. According to the received text, one of the five sons of Izrahiah, a descendant of Issachar and a chief man of his tribe (1 Chr. vii. 3).—3. One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).—4. A Levite, son of Shemalah, and descended from Jeduthun (1 Chr. ix. 16). He appears to have been a principal musician in the Temple choir in the time of Nehemiah (Neh. xii. 25).—5. The second of the lion-faced Gadites, who joined David at Ziklag (1 Chr. xii. 9).—6. One of the princes of Judah in the reign of Jehoshaphat (2 Chr. xvii. 7).—7. The son of Jehiel, of the sons of Joab, who came up in the second caravan with Ezra (Ezr. viii. 9).—8. A priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5).—9. The prophet Obadiah. We know nothing of him except what we can gather from the short book which bears his name. The Hebrew tradition adopted by St. Jerome, and maintained by Abrabanel and Kimchi, that he is the same person as the Obadiah of Ahab's reign, is as destitute of foundation as another account, also suggested by Abrabanel, which makes him to have been a converted Idumaean. The question of his date must depend upon the interpretation of the 11th verse of his prophecy. He there speaks of the conquest of Jerusalem and the captivity of Jacob. If he is referring to the well-known captivity by Nebuchadnezzar he must have lived at the time of the Babylonish captivity, and have prophesied subsequently to the year B.C. 588. If, further, his prophecy against Edom found its first fulfilment in the conquest of that country by Nebuchadnezzar in the year B.C. 583, we have its date fixed. It must have been uttered at some time in the five years which intervened between those two dates. The only argument of any weight for the early date of Obadiah is his position in the list of the books of the minor prophets. Why should he have been inserted between Amos and Jonah if his date is about B.C. 585? Schnurrer seems to answer this question satisfactorily when he says that the prophecy of Obadiah is an amplification of the last five verses of Amos, and was therefore placed next after the book of Amos. The book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (cf. Joel iii., Am. ix.) into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and have repaid double upon her enemies.

Previous to the captivity, the Edomites were in a similar relation to the Jews to that which the Samaritans afterwards held. They were near neighbours, and they were relatives. The Edomites are the types of those who ought to be friends and are not—of those who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet complains that they looked on and rejoiced in the destruction of Jerusalem; that they triumphed over her and plundered her; and that they cut off the fugitives who were probably making their way through Idumaea to Egypt. The last six verses are the most important part of Obadiah's prophecy. The vision presented to the prophet is that of Zion triumphant over the Idumaeans and all her enemies, restored to her ancient possessions, and extending her borders northward and southward and eastward and westward. He sees the house of Jacob and the house of Joseph consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Sepharad, are to return to Jerusalem, and to occupy not only the city itself, but the southern tract of Judaea (ver. 20). Those who had dwelt in the southern tract are to overrun and settle in Idumaea (ver. 19). The former inhabitants of the plain country are also to establish themselves in Philistia (ib.). To the north the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displaced, takes possession of Gilead (ib.). The captives of the ten tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta near Sidon (ver. 20). The question is asked, Have the prophet's denunciations of the Edomites been fulfilled, and has his vision of Zion's glories been realised? Typically, partially, and imperfectly they have been fulfilled, but they await a fuller accomplishment. The first fulfilment of the denunciation on Edom in all probability took place a few years after its utterance. Five years after the capture of Jerusalem Nebuchadnezzar reduced the Ammonites and Moabites, and after their reduction made an expedition into Egypt. This he could hardly have done without at the same time reducing Idumaea. A more full, but still only partial and typical, fulfilment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumaeans. Similarly the return from the Babylonish captivity would typically and imperfectly fulfil the promise of the restoration of Zion and the extension of her borders. The full completion of the prophetic descriptions of the glories of Jerusalem—the future golden age towards which the seers stretched their hands with fond yearnings—is to be looked for in the Christian, not in the Jewish Zion—in the antitype rather than in the type. The book of Obadiah is a favourite study of the modern Jews. It is here especially that they read the future fate of their own nation and of the Christians. Those unversed in their literature may wonder where the Christians are found in the book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites are prophetically meant Christians, and that by Edom is meant Rome. Abrabanel has written a commentary on Obadiah resting on this hypothesis as its basis. The first nine verses of Obadiah are so similar to Jer. xlix., 7, &c., that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the

two wrote first is doubtful. Those who give an early date to Obadiah thereby settle the question. Those who place him later leave the question open, as he would in that case be a contemporary of Jeremiah.—10. An officer of high rank in the court of Ahab, who is described as "over the house," that is, apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (1 K. xviii. 4, 13). The occasion upon which Obadiah appears in the history shows the confidential nature of his office (1 K. xviii. 7-16). According to the Jewish tradition preserved in Ephrem Syrus, Obadiah the chief officer of Ahab was the same with Obadiah the prophet. He was of Shechem in the land of Ephraim, and a disciple of Elijah, and was the third captain of fifty who was sent by Ahaziah (2 K. i. 13).—11. The father of Ishmaiah, who was chief of the tribe of Zebulun in David's reign (1 Chr. xxvii. 19).—12. A Merarite Levite in the reign of Josiah, and one of the overseers of the workmen in the restoration of the Temple (2 Chr. xxiv. 12).

O'bal. A son of Joktan, and, like the rest of his family, apparently the founder of an Arab tribe (Gen. x. 28), which has not yet been identified. In 1 Chr. i. 22 the name is written EBAL, which has been compared with the *Avalitae* and the *Gebanitae*.

Obdia. Probably a corruption of Obain, the form in which the name HABAIAH appears (comp. 1 Esdr. v. 38 with Ezr. ii. 61).

O'bed. 1. Son of Boaz and Ruth the Moabitess (Ruth iv. 17). The circumstances of his birth, which make up all that we know about him, are given with much beauty in the book of Ruth, and form a most interesting specimen of the religious and social life of the Israelites in the days of Eli, which a comparison of the genealogies of David, Samuel, and Abiathar shows to have been about the time of his birth. The name of Obed occurs only Ruth iv. 17, and in the four genealogies, Ruth iv. 21, 22; 1 Chr. ii. 12; Matt. i. 5; Luke iii. 32. In all these five passages, and in the first with peculiar emphasis, he is said to be the father of Jesse.—2. A descendant of Jarha, the Egyptian slave of Sheshan in the line of Jerahmeel. He was grandson of Zabab, one of David's mighty men (1 Chr. ii. 37, 38).—3. One of David's mighty men (1 Chr. xi. 47).—4. One of the gate-keepers of the Temple: son of Shemaiah the first-born of Obed-edom (1 Chr. xxvi. 7).—5. Father of Azariah, one of the captains of hundreds who joined with Jehoiada in the revolution by which Athaliah fell (2 Chr. xxiii. 1).

O'bed-edom. 1. A Levite, apparently of the family of Kohath. He is described as a Gittite (2 Sam. vi. 10, 11), that is, probably, a native of the Levitical city of Gath-Rimmon in Manasseh, which was assigned to the Kohathites (Josh. xxi. 45). After the death of Uzzah, the ark, which was being conducted from the house of Abinadab in Gibeah to the city of David, was carried aside into the house of Obed-edom, where it continued three months. It was brought thence by David (1 Chr. xv. 25; 2 Sam. vi. 12).—2. "Obed-edom the son

of Jeduthun" (1 Chr. xvi. 38), a Merarite Levite, appears to be a different person from the last-mentioned. He was a Levite of the second degree and a gatekeeper for the ark (1 Chr. xv. 18, 24), appointed to sound "with harps on the Sheminith to exel" (1 Chr. xv. 21, xvi. 5). There is one expression, however, which seems to imply that Obed-edom the gatekeeper and Obed-edom the Gittite may have been the same. After enumerating his seven sons the chronicler (1 Chr. xxvi. 5) adds, "for God blessed him," referring apparently to 2 Sam. vi. 11.

O'beth. EBED the son of Jonathan (1 Esdr. viii. 32).

O'bil. An Ishmaelite who was appropriately appointed keeper of the herds of camels in the reign of David (1 Chr. xxvii. 30).

Oblation. [SACRIFICE.]

O'both, one of the encampments of the Israelites, east of Moab (Num. xxi. 10, xxxiii. 43). Its exact site is unknown.

Ochi'el = JEIEL, 1 Esdr. i. 9 (comp. 2 Chr. xxxv. 9).

Ocidesus. A corruption of Jozabad in Ezr. x. 22 (1 Esdr. iv. 22).

Oci'na. "Sour and Ocina" are mentioned (Jud. ii. 28) among the places on the sea-coast of Palestine, which were terrified at the approach of Holofernes. Its position agrees with that of the ancient ACCHO.

Oc'ran. An Asherite, father of Pagiel (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

O'ded. 1. The father of Azariah the prophet in the reign of Asa (2 Chr. xv. 1).—2. A prophet of Jehovah in Samaria, at the time of Pekah's invasion of Judah (2 Chr. xxviii. 9).

Odo'lam. The Greek form of the name ADULLAM; found in 2 Macc. xii. 38 only. Adullam is stated by Eusebius and Jerome to have been in their day a large village, about 10 miles east of Eleutheropolis; and here (if *Beit-jibrin* be Eleutheropolis) a village with the name of *Bet-Dala* or *Beit Ula* now stands. The obstacle to this identification is that in the catalogue of Joshua xv. it is mentioned with a group of towns (Zoreah, Socoh, &c.) which lay at the N.W. corner of Judah, while *Bet Dala* is found with those (Nezib, Keilah, &c.) of a separate group, farther south. Further investigation is requisite before we can positively say if there is any cavern in the neighbourhood of *Bet Dala* answering to the "cave of Adullam." The cavern at *Ahureitun*, 3 miles south of Bethlehem, usually shown to travellers as Adullam, is so far distant as to put it out of the question.

Odonar'kes, the chief of a nomad tribe slain by Jonathan (1 Macc. ix. 66).

Offerings. [SACRIFICE.]

Officer. It is obvious that most, if not all, of the Hebrew words rendered "officer," are either of an indefinite character, or are synonymous terms for functionaries known under other and more specific names, as "scribe," "eunuch," &c. The two words so rendered in the N. T. each bear in ordinary Greek a special sense. In the case of *ὑποπέρης* this is of no very definite kind, but the word is used to denote an inferior officer of a court of justice, a messenger or bailiff, like the Roman viator or lictor. *ὑπάρχος* at Athens were officers whose duty it was to register and collect fines imposed by courts of justice; and "deliver to the officer" means, give in the name of the debtor to

the officer of the court. The word "officers" is used (1 Macc. x. 41, xiii. 37) in speaking of the revenue-officers of Demetrius. In Eccles. x. 2, the meaning is clearly the subordinates in a general sense to a supreme authority.

Og, an Amoritish king of Bashan, whose rule extended over sixty cities, of which the two chief were Ashtaroth-Karnaim and Edrei (Josh. xiii. 12). He was one of the last representatives of the giant-race of Rephaim. According to Eastern traditions, he escaped the deluge by wading beside the ark. He was, with his children and his people, defeated and exterminated by the Israelites at Edrei, immediately after the conquest of Sihon, who is represented by Josephus as his friend and ally. His sixty proud fenced cities were taken, and his kingdom assigned to the Reubenites, Gadites, and half the tribe of Manasseh (Deut. iii. 1-13; Num. xxxii. 33. Also Deut. i. 4, iv. 47, xxii. 4; Josh. ii. 10, ix. 10, xiii. 12, 30). The belief in Og's enormous stature is corroborated by an appeal to a relic still existing in the time of the author of Deut. iii. 11. This was an iron bedstead, or bier, preserved in "Rabbath of the children of Ammon." Some have supposed that this was one of the common flat beds used sometimes on the housetops of Eastern cities, but made of iron instead of palm-branches, which would not have supported the giant's weight. It is more probable that the words mean a "sarcophagus of black basalt," a rendering of which they undoubtedly admit.

Ohad. One of the six sons of Simeon (Gen. xlv. 10; Ex. vi. 15).

O'hel. As the text now stands Ohel was one of the seven sons of Zerubabel (1 Chr. iii. 20).

Oil. 1. Of the numerous substances, animal and vegetable, which were known to the ancients as yielding oil, the olive-berry is the one of which most frequent mention is made in the Scriptures. The best oil is made from fruit gathered about November or December, when it has begun to change colour, but before it has become black. The berry in the more advanced state yields more oil, but of an inferior quality. 1. *Gathering*.—Great care is necessary in gathering, not to injure either the fruit itself or the boughs of the tree; and with this view it was either gathered by hand or shaken off carefully with a light reed or stick. After gathering and careful cleansing, the fruit was either at once carried to the press, which is recommended as the best course; or, if necessary, laid on tables with hollow trays made sloping, so as to allow the first juice to flow into other receptacles beneath, care being taken not to heap the fruit too much, and so prevent the free escape of the juice, which is injurious to the oil though itself useful in other ways. 2. *Pressing*.—In order to make oil, the fruit was either bruised in a mortar, crushed in a press loaded with wood or stones, ground in a mill, or trodden with the feet. Special buildings used for grape-pressing were used also for the purpose of olive-pressing, and contained both the press and the receptacle for the pressed juice. The "beaten" oil of Ex. xxvii. 20; Lev. xxiv. 2, and Ex. xxix. 40; Num. xxviii. 5, was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Mishna. Oil-mills are often made of stone, and turned by hand. Others consist of cylinders enclosing a beam, which is turned by a camel or other animal. 3. *Keeping*.—Both olives

and oil were kept in jars carefully cleansed; and oil was drawn out for use in horns or other small vessels. Oil of Tekoa was reckoned the best. Trade in oil was carried on with the Tyrians, by whom it was probably often re-exported to Egypt, whose olives do not for the most part produce good oil (2 Chr. ii. 10). Direct trade in oil was also carried on between Egypt and Palestine (Ezr. iii. 7; Is. xxx. 6, lvii. 9; Ez. xxvii. 17; Hos. xii. 1). ii. Besides the use of olives themselves as food, common to all olive-producing countries, the principal uses of olive-oil may be thus stated. 1. *As food*.—Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria. 2. *Cosmetic*.—As is the case generally in hot climates, oil was used by the Jews for anointing the body, *e. g.* after the bath, and giving to the skin and hair a smooth and comely appearance, *e. g.* before an entertainment. At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat (Deut. xxviii. 40; 2 Sam. xiv. 2; Ruth iii. 3; 2 Sam. xii. 20). 3. *Funerary*.—The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews. 4. *Medicinal*.—As oil is in use in many cases in modern medicine, so it is not surprising that it should have been much used among the Jews and other nations of antiquity for medicinal purposes. Celsus repeatedly speaks of the use of oil, especially old oil, applied externally with friction in fevers, and in many other cases. Josephus mentions that among the remedies employed in the case of Herod, he was put into a sort of oil-bath. The prophet Isaiah (i. 6) alludes to the use of oil as ointment in medical treatment; and it thus furnished a fitting symbol, perhaps also an efficient remedy, when used by our Lord's disciples in the miraculous cures which they were enabled to perform (Mark vi. 13). With a similar intention, no doubt, its use was enjoined by St. James (v. 14). 5. *Oil for light*.—The oil for "the light" was expressly ordered to be olive-oil, beaten, *i. e.* made from olives bruised in a mortar (Ex. xxv. 6, xxvii. 20, 21, xxxv. 8; Lev. xxiv. 2). In the same manner the great lamps used at the Feast of Tabernacles were fed. 6. *Ritual*.—*a.* Oil was poured on, or mixed with the flour or meal used in offerings. On the other hand, certain offerings were to be devoid of oil; the sin-offering, Lev. v. 11, and the offering of jealousy, Num. v. 15. The principle on which both the presence and the absence of oil were prescribed is clearly, that as oil is indicative of gladness, so its absence denoted sorrow or humiliation (Is. lxi. 3; Joel ii. 19; Rev. vi. 6). *b.* Kings, priests, and prophets, were anointed with oil or ointment. 7. *a.* As so important a necessary of life, the Jew was required to include oil among his first-fruit offerings (Ex. xxii. 29, xxiii. 16; Num. xviii. 12; Deut. xviii. 4; 2 Chr. xxxi. 5). *b.* Tithes of oil were also required (Deut. xii. 17; 2 Chr. xxxi. 5, &c.). 8. Shields, if covered with hide, were anointed with oil or grease previous to use. Shields of metal were perhaps rubbed over in like manner to polish them. Of the substances which yield oil, besides the olive-tree, myrrh is the only one specially mentioned in Scripture (Esth. ii. 12). Oil of myrrh is the juice which exudes from the tree *Balsamodendron Myrrha*.

Oil-tree. The Hebrew words occur in Neh.

viii. 15 (A. V. "pine-branches"), 1 K. vi. 23 ("olive-tree"), and in Is. xli. 19 ("oil-tree"). From the passage in Nehemiah, where the *ets shemen* is mentioned as distinct from the "olive-tree," writers have sought to identify it with the *zackum*-tree of the Arabs, the *Balanites Aegyptiaca*, a well-known and abundant shrub or small tree in the plain of Jordan. It is found all the way from the peninsula of India and the Ganges to Syria, Abyssinia, and the Niger. The *zackum*-oil is held in high repute by the Arabs for its medicinal properties. It is quite probable that the *zackum*, or *Balanites Aegyptiaca*, is the *ets shemen*, or oil-tree of Scripture.

Balanites Aegyptiaca.

Ointment. The following list will point out the Scriptural uses of ointment:—1. *Cosmetic.*—The Greek and Roman practice of anointing the head and clothes on festive occasions prevailed also among the Egyptians, and appears to have had place among the Jews (Ruth iii. 3; Eccl. vii. 1, ix. 8; Prov. xxvii. 9, 16, &c.). Oil of myrrh, for like purposes, is mentioned Esth. ii. 12. Egyptian paintings represent servants anointing guests on their arrival at their entertainer's house, and alabaster vases exist which retain the traces of the ointment which they were used to contain. 2. *Funereal.*—Ointments as well as oil were used to anoint dead bodies and the clothes in which they were wrapped (Matt. xxvi. 12; Mark xiv. 3, 8; Luke xxiii. 56; John xii. 3, 7, xix. 40). 3. *Medicinal.*—Ointment formed an important feature in ancient medical treatment (Is. i. 6). The mention of balm of Gilead and of eye-salve (*collyrium*) points to the same method (Is. i. 6; John ix. 6; Jer. viii. 22; Rev. iii. 18, &c.). 4. *Ritual.*—Besides the oil used in many ceremonial observances, a special ointment was appointed to be used in consecration (Ex. xxx. 23, 33, xxxix. 7, xxxvii. 29, xl. 9, 15). Strict prohibition was issued against using this unguent for any secular purpose, or on the

person of a foreigner, and against imitating it in any way whatsoever (Ex. xxx. 32, 33). The weight therefore of the oil in the mixture would be 12 lbs. 8 oz. English. A question arises, in what form were the other ingredients, and what degree of solidity did the whole attain? According to Maimonides, Moses, having reduced the solid ingredients to powder, steeped them in water till all the aromatic qualities were drawn forth. He then poured in the oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use. Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, but whether in an unctuous state or in that of powder cannot be ascertained. A process of making ointment, consisting, in part at least, in boiling, is alluded to in Job xli. 31. Kings, and also in some cases prophets, were, as well as priests, anointed with oil or ointment; but Scripture only mentions the fact as actually taking place in the cases of Saul, David, Solomon, Jehu, and Joash. It is evident that the sacred oil was used in the case of Solomon, and probably in the cases of Saul and David. A person whose business it was to compound ointments in general was called an "apothecary" (Neh. iii. 8; Eccl. x. 1; Eccles. xlix. 1). The work was sometimes carried on by women "confectionaries" (1 Sam. viii. 13). In the Christian Church the ancient usage of anointing the bodies of the dead was long retained. The ceremony of Chrism or anointing was also added to baptism.

Ola'mus. MESHULLAM of the sons of Bani (1 Esd. ix. 30; comp. Ezr. x. 29).

Old Testament. This article will treat (A) of the Text and (B) of the Interpretation of the Old Testament. Some observations will be subjoined respecting (C) the Quotations from the Old Testament in the New. — A.—TEXT OF THE OLD TESTAMENT. 1. *History of the Text.*—A history of the text of the O. T. should properly commence from the date of the completion of the Canon; from which time we must assume that no additions to any part of it could be legitimately made, the sole object of those who transmitted and watched over it being thenceforth to preserve that which was already written. Of the care, however, with which the text was transmitted we have to judge, almost entirely, by the phenomena which it and the versions derived from it now present, rather than by any recorded facts respecting it. As regards the form in which the sacred writings were preserved, there can be little doubt that the text was ordinarily written on skins, rolled up into volumes, like the modern synagogue-rolls (Ps. xl. 7; Jer. xxxvi. 14; Zech. v. 1; Ez. ii. 9). The original character in which the text was expressed is that still preserved to us, with the exception of four letters, on the Maccabean coins, and having a strong affinity to the Samaritan character. At what date this was exchanged for the present Aramaic or square character is still as undetermined, as it is at what date the use of the Aramaic language in Palestine superseded that of the Hebrew. The Old Jewish tradition, repeated by Origen and Jerome, ascribed the change to Ezra. [WRITING.] No vowel points were attached to the text: they were, through all the early period of its history, entirely unknown. Convenience had indeed, at the time

when the later books of the O. T. were written, suggested a larger use of the *matres lectionis*: it is thus that in those books we find them introduced into many words that had been previously spelt without them. There is reason to think that in the text of the O. T., as originally written, the words were generally, though not uniformly, divided. Of the Phœnician inscriptions, though the majority proceed continuously, some have a point after every word, except when the words are closely connected. The same point is used in the Samaritan manuscripts. The practice of separating words by spaces instead of points probably came in with the square writing. Of ancient date, probably, are also the separations between the lesser *parshioth* or sections; whether made, in the case of the more important divisions, by the commencement of a new line, or, in the case of the less important, by a blank space within the line. These lesser and earlier *parshioth*, of which there are in the Pentateuch 669, must not be confounded with the greater and later *parshioth*, or Sabbath-lessons, which are first mentioned in the Masorah. The name *parshioth* is in the Mishna applied to the divisions in the Prophets as well as to those in the Pentateuch. Of their real age we know but little. Hupfeld has found that they do not always coincide with the capitula of Jerome. That they are nevertheless more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary, their discordance with the Kazin of the Samaritan Pentateuch, which are 966 in number, seems to indicate that they had a historical origin; and it is possible that they also may date from the period when the O. T. was first transcribed in the square character. Of any logical division, in the written text, of the prose of the O. T. into *Pesukim*, or verses, we find in the Talmud no mention; and even in the existing synagogue-rolls such division is generally ignored. In the poetical books, the *Pesukim* mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable both from some expressions of Jerome, and from the analogous practice of other nations that the poetical text was written stichometrically. Of the documents which directly bear upon the history of the Hebrew text, the two earliest are the Samaritan copy of the Pentateuch, and the Greek translation of the LXX. [SAMARITAN PENTATEUCH; SEPTUAGINT.] In the translations of Aquila and the other Greek interpreters, the fragments of whose works remain to us in the Hexapla, we have evidence of the existence of a text differing but little from our own: so also in the Targums of Onkelos and Jonathan. A few centuries later we have, in the Hexapla, additional evidence to the same effect in Origen's transcriptions of the Hebrew text. And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, who was instructed by the Palestinian Jews, and mainly relied upon their authority for acquaintance not only with the text itself, but also with the traditional unwritten vocalization of it. This brings us to the middle of the Talmudic period. The learning of the schools which had been formed in Jerusalem about the time of our Saviour by Hillel and Shammai was preserved, after the destruction of the city, in the academies of Jabneh, Sepphoris, Cesarea, and Tiberias. The

great pillar of the Jewish literature of this period was R. Judah the Holy, to whom is ascribed the compilation of the Mishna, the text of the Talmud, and who died about A.D. 220. After his death there grew into repute the Jewish academies of Sura, Nahardea, and Pumbeditha, on the Euphrates. The twofold Gemara, or commentary, was now appended to the Mishna, thus completing the Talmud. The Jerusalem Gemara proceeded from the Jews of Tiberias, probably towards the end of the 4th century: the Babylonian from the academies on the Euphrates, perhaps by the end of the 5th. That along with the task of collecting and commenting on their various legal traditions, the Jews of these several academies would occupy themselves with the text of the sacred writings is in every way probable; and is indeed shown by various Talmudic notices. In these the first thing to be remarked is the entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samaritan Pentateuch and the Septuagint. Interpretation, properly so called, had become the province of the Targumist, not of the transcriber; and the result of the entire divorce of the task of interpretation from that of transcription had been to obtain greater security for the transmission of the text in its purity. In place, however, of such glosses of interpretation had crept in the more childish practice of reading some passages differently to the way in which they were written, in order to obtain a play of words, or to fix them artificially in the memory. But these traditional and confessedly apocryphal readings were not allowed to affect the written text. The case of the Talmudic doctors for the text is shown by the pains with which they counted up the number of verses in the different books, and computed which were the middle verses, words, and letters in the Pentateuch and in the Psalms. The scrupulousness with which the Talmudists noted what they deemed the truer readings, and yet abstained from introducing them into the text, indicates at once both the diligence with which they scrutinized the text, and also the care with which, even while acknowledging its occasional imperfections, they guarded it. Critical procedure is also evinced in a mention of their rejection of manuscripts which were found not to agree with others in their readings; and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them. The Talmud further makes mention of the euphemistic *Keris*, which are still noted in our Bible, *e. g.* at 2 K. vi. 25. It also reckons six instances of extraordinary points placed over certain words, *e. g.* at Gen. xvii. 9; and of some of them it furnishes mystical explanations. It is after the Talmudic period that Hupfeld places the introduction into the text of the two large points (in Hebrew *Soph-pasuk*) to mark the end of each verse. They are manifestly of older date than the accents, by which they are, in effect, supplemented. Coeval, perhaps, with the use of the *Soph-pasuk* is that of the *Makkeph*, or hyphen, to unite words that are so closely conjoined as to have but one accent between them. It must be older than the accentual marks, the presence or absence of which is determined by it. Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Masoretic period.

It is evident from the notices of the Talmud that a number of oral traditions had been gradually accumulating respecting both the integrity of particular passages of the text itself, and also the manner in which it was to be read. This vast heterogeneous mass of traditions and criticisms, compiled and embodied in writing, forms what is known as the *Masorah*, i. e. Tradition. Buxtorf ranges its contents under the three heads of observations respecting the verses, words, and letters of the sacred text. In regard of the verses, the Masorets recorded how many there were in each book, and the middle verse in each; also how many verses began with particular letters or began and ended with the same word, or contained a particular number of words and letters, or particular words a certain number of times, &c. In regard of the words, they recorded the *Keris* and *Chethibs*, where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written *plene* or *defective*, i. e. with or without the *matres lectionis*; also their vocalization and accentuation, and how many times they occurred so vocalized and accented. In regard of the letters, they computed how often each letter of the alphabet occurred in the O. T.: they noted fifteen instances of letters stigmatized with the extraordinary points: they commented also on all the unusual letters, viz. the *majuscula*, which they variously computed; the *minuscule*, of which they reckoned thirty-three; the *suspensa*, four in number; and the *inversa*, of which there are eight or nine. The most valuable feature of the *Masorah* is undoubtedly its collection of *Keris*. The first rudiments of this collection meet us in the Talmud. It seems clear that the *Keris* in all cases represent the readings which the Masorets themselves approved as correct. The *Masorah* furnishes also eighteen instances of what it calls "Correction of the scribes." The real import of this is doubtful. Furthermore the *Masorah* contains certain "Conjectures," which it does not raise to the dignity of *Keris*, respecting the true reading in difficult passages. The *Masorah* was originally preserved in distinct books by itself. A plan then arose of transferring it to the margins of the MSS. of the Bible. For this purpose large curtailments were necessary. The *Masorah* is now distinguished into the *Masora magna* and the *Masora parva*, the latter being an abridgment of the former, and including all the *Keris* and other compendious observations, and being usually printed in Hebrew Bibles at the foot of the page. The *Masorah* itself was but one of the fruits of the labours of the Jewish doctors in the Masoretic period. A far more important work was the furnishing of the text with vowel-marks, by which the traditional pronunciation of it was imperishably recorded. That the insertion of the Hebrew vowel-points was post-Talmudic is shown by the absence from the Talmud of all reference to them. The vowel-marks are referred to in the *Masorah*; and as they are all mentioned by R. Judah Chiug, in the beginning of the eleventh century, they must have been perfected before that date. Contemporaneous with the written vocalization was the

accentuation of the text. The import of the accents was, as Hupfeld has shown, essentially rhythmical: hence they had from the first both a logical and a musical significance. Besides the evidences of various readings contained in the *Keris* of the *Masorah*, we have two lists of different readings purporting or presumed to be those adopted by the Palestinian and Babylonian Jews respectively. The first of these was printed by R. Jacob ben Chaiur in the Bomberg Bible. The different readings are 216 in number. They are generally of but little importance. The other is the result of a collation of MSS. made in the eleventh century by two Jews, R. Aaron ben Asher, a Palestinian, and R. Jacob ben Naphtali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the *Makkeph*, and in one instance (Cant. viii. 6) to the division of one word into two. From the end of the Masoretic period onward, the *Masorah* became the great authority by which the text given in all the Jewish MSS. was settled. 2. *Manuscripts*.—We must now give an account of the O. T. MSS. known to us. They fall into two main classes: Synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinic or cursive character. The synagogue-rolls contain, separate from each other, the Pentateuch, the *Haphtaroth*, or appointed sections of the Prophets, and the so-called *Megilloth*, viz. Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. The text of the synagogue-rolls is written without vowels, accents, or *sophras*: the greater *parashioth* are not distinguished, nor yet, strictly, the verses; these last are indeed often slightly separated, but the practice is against the ancient tradition. The two modifications of the square character in which these rolls are written are distinguished by the Jews as the *Tam* and the *Welsh*, i. e., probably, the Perfect and the Foreign. Private MSS. in the square character are in the book-form, either on parchment or on paper, and of various sizes, from folio to 12mo. Some contain the Hebrew text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the *Masorah*, sometimes by rabbinical commentaries, &c. The date of a MS. is ordinarily given in the subscription; but as the subscriptions are often concealed in the *Masorah* or elsewhere, it is occasionally difficult to find them: occasionally also it is difficult to decipher them. Even when found and deciphered, they cannot always be relied on. No satisfactory criteria have been yet established by which the ages of MSS. are to be determined. Few existing MSS. are supposed to be older than the 12th century. Kennicott and Bruns assigned one of their collation (No. 590) to the 10th century; De Rossi dates it A.D. 1018; on the other hand, one of his own (No. 634) he adjudges to the 8th century. It is usual to distinguish in these MSS. three modifications of the square character: viz. a Spanish writing, upright and regularly formed; a German, inclined and sharp-pointed; and a French and Italian, intermediate to the two preceding. One important distinction between the Spanish and German MSS. consists in the difference of order in which the books are generally arranged. The former follow the *Masorah*, placing the *Chronicles* before the rest of the *Hagiographa*: the latter con-

form to the Talmud, placing Jeremiah and Ezekiel before Isaiah, and Ruth, separate from the other Megilloth, before the Psalms. Private MSS. in the rabbinic character are mostly on paper, and are of comparatively late date. Since the days of Kennicott and De Rossi modern research has discovered various MSS. beyond the limits of Europe. Of many of these there seems no reason to suppose that they will add much to our knowledge of the Hebrew text. It is different with the MSS. examined by Piinner at Odesa. One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from Derbend in Daghestan, appears by the subscription to have been written previously to the year A.D. 580; and, if so, is the oldest known Biblical Hebrew MS. in existence. The forms of the letters are remarkable. Another MS. (B. No. 3) containing the Prophets, on parchment, in small folio, although only dating, according to the inscription, from A.D. 916, and furnished with a Masorah, is a yet greater treasure. Its vowels and accents are wholly different from those now in use, both in form and in position, being all above the letters: they have accordingly been the theme of much discussion among Hebrew scholars. The Samaritan MSS., collated by Kennicott are all in the book-form. 3. *Printed Text.*—The history of the printed text of the Hebrew Bible commences with the early Jewish editions of the separate books. First appeared the Psalter, in 1477, probably at Bologna, in 4to., with Kimchi's commentary interspersed among the verses. Only the first four psalms had the vowel-points, and these but clumsily expressed. At Bologna there subsequently appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum and the commentary of Rashi; and the five Megilloth (Ruth—Esther), in folio, with the commentaries of Rashi and Aben Ezra. From Soncino, near Cremona, issued in 1486 the *Prophetæ priores* (Joshua—Kings), folio, unpointed, with Kimchi's commentary. The honour of printing the first entire Hebrew Bible belongs to the above-mentioned town of Soncino. The edition is in folio, pointed and accentuated. Nine copies only of it are now known, of which one belongs to Exeter College, Oxford. The earlier printed portions were perhaps the basis of the text. This was followed, in 1494, by the 4to. or 8vo. edition printed by Gersom at Brescia, remarkable as being the edition from which Luther's German translation was made. This edition, along with the preceding, formed the basis of the first edition, with the Masorah, Targums, and rabbinical comments, printed by Bomberg at Venice in 1518, fol., under the editorship of the converted Jew Felix del Prato; though the "*plurimis collatis exemplaribus*" of the editor seems to imply that MSS. were also used in aid. This edition was the first to contain the Masorah magna, and the various readings of Ben Asher and Ben Naphtali. After the Brescian, the next primary edition was that contained in the Complutensian Polyglot, published at Complutum (Alcala) in Spain, at the expense of Cardinal Ximenes, dated 1514-17, but not issued till 1522. The Hebrew is pointed, but unaccentuated: it was taken from seven MSS., which are still preserved in the University Library at Madrid. To this succeeded an edition which has had more influence than any on the text of later times—the Second Rabbinical Bible, printed by Bomberg at Venice, 4 vols. fol., 1525-6. The editor, was the learned

Tunisian Jew, R. Jacob ben Chaim. The great feature of his work lay in the correction of the text by the precepts of the Masorah, in which he was profoundly skilled, and on which, as well as on the text itself, his labours were employed. The Royal or Antwerp Polyglot, printed by Plantin, 8 vols. fol. 1569-72, at the expense of Philip II. of Spain, and edited by Arias Montanus and others, took the Complutensian as the basis of its Hebrew text, but compared this with one of Bomberg's, so as to produce a mixture of the two. This text was followed both in the Paris Polyglot of Le Jay, 9 vols. fol. 1645, and in Walton's Polyglot, London, 6 vols. fol. 1657. A text compounded of several of the preceding was issued by the Leipsic Professor, Elias Hutter, at Hamburg, fol. 1587: it was intended for students, the servile letters being distinguished from the radicals by hollow type. A special mention is also due to the labours of the elder Buxtorf, who carefully revised the text after the Masorah, publishing it in 8vo. at Basle, 1611, and again, after a fresh revision, in his valuable Rabbinical Bible. Neither the text of Hutter nor that of Buxtorf was without its permanent influence; but the Hebrew Bible which became the standard to subsequent generations was that of Joseph Athias, a learned rabbi and printer at Amsterdam. His text was based on a comparison of the previous editions with two MSS.; one bearing date 1299, the other a Spanish MS., boasting an antiquity of 900 years. It appeared at Amsterdam, 2 vols. 8vo. 1661, with a preface by Leusden, professor at Utrecht; and again, revised afresh, in 1667. The progeny of the text of Athias was as follows:—a. That of Clodius, Frankfurt-on-Maine, 8vo. 1677; reprinted, with alterations, 8vo. 1692, 4to. 1716. b. That of Jablonsky, Berlin, large 8vo. or 4to. 1699; reprinted, but less correctly, 12mo. 1712. c. That of Van der Hooght, Amsterdam and Utrecht, 2 vols. 8vo. 1705. This edition, of good reputation for its accuracy, but above all for the beauty and distinctness of its type, deserves special attention, as constituting our present *textus receptus*. d. That of Opitz, Kiel, 4to. 1709. e. That of J. H. Michaelis, Halle, 8vo. and 4to. 1720. The modern editions of the Hebrew Bible now in use are all based on Van der Hooght. 4. *Critical Labours and Apparatus.*—The history of the criticism of the text has already been brought down to the period of the labours of the Masorets and their immediate successors. It must be here resumed. In the early part of the 13th century, R. Meir Levita, a native of Burgos and inhabitant of Toledo, known by abbreviation as Haramah, by patronymic as Todrosius, wrote a critical work on the Pentateuch called *The Book of the Masorah the Hedge of the Law*, in which he endeavoured, by a collation of MSS., to ascertain the true reading in various passages. At a later period R. Menahem de Lonzano collated ten MSS., chiefly Spanish, some of them five or six centuries old, with Bomberg's 4to. Bible of 1544. The results were given in the work "*Light of the Law*," printed at Venice, 1618. They relate only to the Pentateuch. A more important work was that of R. Solomon Norzi of Mantua, in the 17th century, "*Repairer of the Breach*:" a copious critical commentary on the whole of the O. T., drawn up with the aid of MSS. and editions, of the Masorah, Talmud, and all other Jewish resources within his reach. In 1746 the expectations of the public were raised by the *Pro-*

legomena of Houbigant, of the Oratory at Paris; and in 1753 his edition appeared, splendidly printed, in 4 vols. fol. The text was that of Van der Hooght, divested of points, and of every vestige of the Masorah. In the notes copious emendations were introduced. In the same year, 1753, appeared at Oxford Kennicott's first Dissertation on the state of the Printed Text: the second followed in 1759. The result of these and of the author's subsequent annual reports was a subscription of nearly 10,000*l.* to defray the expenses of a collation of Hebrew MSS. throughout Europe, which was performed from 1760 to 1769, partly by Kennicott himself, but chiefly, under his direction, by Professor Bruns of Helmstadt and others. The collation extended in all to 581 Jewish and 16 Samaritan MSS., and 40 printed editions, Jewish works, &c.; of which, however, only about half were collated throughout, the rest in select passages. The fruits appeared at Oxford in 2 vols. fol. 1776-80: the text is Van der Hooght's, unpointed; the various readings are given below; comparisons are also made of the Jewish and Samaritan texts of the Pentateuch, and of the parallel passages in Samuel and Chronicles, &c. The labours of Kennicott were supplemented by those of De Rossi, professor at Parma. His plan differed materially from Kennicott's: he confined himself to a specification of the various readings in select passages; but for these he supplied also the critical evidence to be obtained from the ancient versions, and from all the various Jewish authorities. For the passages on which it treats, the evidence in De Rossi's work may be regarded as almost complete. A small Bible, with the text of Reineccius, and a selection of the more important readings of Kennicott and De Rossi, was issued by Döderlein and Meisner at Leipzig, 8vo. 1793. It is printed (except some copies) on bad paper, and is reputed very incorrect. A better critical edition is that of Jahn, Vienna, 4 vols. 8vo. 1806. The first attempt to turn the new critical collations to public account was made by Boothroyd, in his unpointed Bible, with various readings and English notes, Pontefract, 4to. 1810-16, at a time when Houbigant's principles were still in the ascendant. This was followed in 1821 by Hamilton's *Codex Criticus*, modelled on the plan of the N. T. of Griesbach. The most important contribution towards the formation of a revised text that has yet appeared is Dr. Davidson's *Hebrew Text of the O. T., revised from critical Sources*, 1855. It presents a convenient epitome of the more important various readings of the MSS. and of the Masorah, with the authorities for them. It must be confessed that little has yet been done for the systematic criticism of the Hebrew text from the ancient versions, in comparison with what might be accomplished. We have even yet to learn what critical treasures those versions really contain. It might be well, too, if along with the version-readings were collected together all, or at least all the more important, conjectural emendations of the Hebrew text proposed by various scholars during the last hundred years, which at present lie buried in their several commentaries and other publications. 5. *Principles of Criticism*.—The method of procedure required in the criticism of the O. T. is widely different from that practised in the criticism of the N. T. Our O. T. *textus receptus* is a far more faithful representation of the genuine Scripture, but, on the other hand, the means of detecting and correcting

the errors contained in it are more precarious, the results are more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished. It is indeed to the direct testimony of the MSS. that, in endeavouring to establish the true text, we must first have recourse. Where the MSS. disagree, it has been laid down as a canon that we ought not to let the mere numerical majority preponderate, but should examine what is the reading of the earliest and best. The MSS. lead us for the most part only to our first sure standing-ground, the Masoretic text: in other words, to the average written text of a period later by a thousand or fifteen hundred years than the latest book of the O. T. In ascending upwards from the Masoretic text, our first critical materials are the Masoretic Keri's, valuable as witnesses to the preservation of many authentic readings. A Keri therefore is not to be received in preference to a Chetib unless confirmed by other sufficient evidence, external or internal; and in reference to the Keri's let the rule be borne in mind, "*Procliviscriptioni prestat ardua*," many of them being but untrusty softening down of difficult readings in the genuine text. The express assertions of the Masorah, as also of the Targum, respecting the true reading in particular passages, are of course important. From these we ascend to the version of Jerome, the most thoroughly trustworthy authority on which we have to rely in our endeavours to amend the Masoretic text. Dependent as Jerome was, for his knowledge of the Hebrew text and everything respecting it, on the Palestinian Jews, and accurate as are his renderings, it is not too much to say that a Hebrew reading which can be shown to have been received by Jerome, should, if sanctioned or countenanced by the Targum, be so far preferred to one upheld by the united testimony of all MSS. whatever. Of the other versions, although more ancient, none can on the whole be reckoned, in a critical point of view, so valuable as his. Of the Greek versions of Aquila, Symmachus, and Theodotion, we possess but mere fragments. The Syriac bears the impress of having been made too much under the influence of the Septuagint. The Targums are too often paraphrastic. Still they all furnish most important material for the correction of the Masoretic text; and their cumulative evidence, when they all concur in a reading different to that which it contains, is very strong. The Septuagint itself, venerable for its antiquity, but on various accounts untrustworthy in the readings which it represents, must be treated for critical purposes in the same way as the Masoretic Keri's. The presence of any Hebrew reading in it can pass for little, unless it can be independently shown to be probable that that reading is the true one. In the opposite direction of confirming a Masoretic reading against which later testimonies militate, the authority of the Septuagint, on account of its age, necessarily stands high. Similar remarks would, *a priori*, seem to apply to the critical use of the Samaritan Pentateuch: it is, however, doubtful whether that document be of any real additional value. In the case of the O. T., unlike that of the N. T., another source of emendations is generally allowed, viz. critical conjecture. The comparative purity of the Hebrew text is probably different in different parts of the O. T. In the revision of Dr. Davidson, who has generally

restricted himself to the admission of corrections warranted by MS., Masoretic, or Talmudic authority, those in the book of Genesis do not exceed 11; those in the Psalms are proportionately three times as numerous; those in the historical books and the Prophets are proportionately more numerous than those in the Psalms. In all emendations of the text, whether made with the aid of the critical materials which we possess, or by critical conjecture, it is essential that the proposed reading be one from which the existing reading may have been derived: hence the necessity of attention to the means by which corruptions were introduced into the text. One letter was accidentally exchanged by a transcriber for another. Words, or parts of words, were repeated; or they were dropped, and this especially when they ended like those that preceded. Occasionally a letter may have travelled from one word, or a word from one verse, to another. Wilful corruption of the text on polemical grounds has also been occasionally charged upon the Jews; but the allegation has not been proved, and their known reverence for the text militates against it. To the criticism of the vowel-marks the same general principles must be applied, *mutatis mutandis*, as to that of the consonants. Nothing can be more remote from the truth than the notion that we are at liberty to supply vowels to the text at our unfettered discretion.

B. INTERPRETATION OF THE OLD TESTAMENT.

—1. *History of the Interpretation.*—We shall here endeavour to present a brief but comprehensive sketch of the treatment which the scriptures of the O. T. have in different ages received. At the period of the rise of Christianity two opposite tendencies had manifested themselves in the interpretation of them among the Jews; the one to an extreme literalism, the other to an arbitrary allegorism. The former of these was mainly developed in Palestine, where the Law of Moses was, from the nature of things, most completely observed. The Jewish teachers, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded and which they should have unfolded from them, there endeavoured to supply by other means the imperfections inherent in every law in its mere literal acceptance. On the other hand at Alexandria the allegorizing tendency prevailed. Germs of it had appeared in the apocryphal writings, as where in the Book of Wisdom (xviii. 24) the priestly vestments of Aaron had been treated as symbolical of the universe. It had been fostered by Aristobolus, and at length, two centuries later, it culminated in Philo, from whose works we best gather the form which it assumed. For in the general principles of interpretation which Philo adopted, he was but following, as he himself assures us, in the track which had been previously marked out by those, probably the Therapeutae, under whom he had studied. His expositions have chiefly reference to the writings of Moses, whom he regarded as the arch-prophet, the man initiated above all others into divine mysteries; and in the persons and things mentioned in these writings he traces, without denying the outward reality of the narrative, the mystical designations of different abstract qualities and aspects of the invisible. The Alexandrian interpreters were striving to vindicate for the Hebrew Scriptures a new dignity in the eyes of the Gentile world, by showing that Moses had anticipated all the doctrines

of the philosophers of Greece. It must not be supposed that the Palestinian literalism and the Alexandrian allegorism ever remained entirely distinct. In fact the two extremes of literalism and arbitrary allegorism, in their neglect of the direct moral teaching and prophetic import of Scripture, had too much in common not to mingle readily the one with the other. And thus we may trace the development of the two distinct yet co-existent spheres of Halachah and Hagadah, in which the Jewish interpretation of Scripture, as shown by the later Jewish writings, ranged. The former ("repetition," "following") embraced the traditional legal determinations for practical observance: the latter ("discourse") the unrestrained interpretation, of no authentic force or immediate practical interest. The earliest Christian non-apostolic treatment of the O. T. was necessarily much dependent on that which it had received from the Jews. The Alexandrian allegorism reappears the most fully in the fanciful epistle of Barnabas; but it influenced also the other writings of the sub-apostolic Fathers. Even the Jewish cabbalism passed to some extent into the Christian Church, and is said to have been largely employed by the Gnostics. But this was not to last. Irenaeus, himself not altogether free from it, raised his voice against it; and Tertullian well laid it down as a canon that the words of Scripture were to be interpreted only in their logical connexion, and with reference to the occasion on which they were uttered. In another respect all was changed. The Christian interpreters by their belief in Christ stood on a vantage-ground for the comprehension of the whole burden of the O. T. to which the Jews had never reached; and thus, however they may have erred in the details of their interpretations, they were generally conducted by them to the right conclusions in regard of Christian doctrine. The view held by the Christian Fathers that the whole doctrine of the N. T. had been virtually contained and foreshadowed in the Old, generally induced the search in the O. T. for such Christian doctrine rather than for the old philosophical dogmas. Their general convictions were doubtless here more correct than the details which they advanced; and it would be easy to multiply from the writings of either Justin, Tertullian, or Irenaeus, typical interpretations that could no longer be defended. It was at Alexandria, which through her previous learning had already exerted the deepest influence on the interpretation of the O. T., that definite principles of interpretation were by a new order of men, the most illustrious and influential teachers in the Christian Church, first laid down. Clement here led the way. He held that in the Jewish law a fourfold import was to be traced; literal, symbolical, moral, prophetic. Of these the second was the relic of the philosophical element that others had previously engrafted on the Hebrew Scriptures. Clement was succeeded by his scholar Origen. With him biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, moulded anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed upon the O. T. disappeared. Origen recognizes in Scripture, as it were, a body, soul, and spirit, answering to the body, soul, and spirit of man: the first serves for the edification of the simple, the second for that of the more advanced, the third for that of the perfect

The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, which is in fact the moral sense of Scripture, he illustrates by the interpretation of Deut. xxv. 4 in 1 Cor. ix. 9. The third, however, is that on which he principally dwells, showing how the Jewish Law, spiritually understood, contained a shadow of good things to come. Both the spiritual and (to use his own term) the psychical meaning he held to be always present in Scripture: the bodily not always. Origen's own expositions of Scripture were, no doubt, less successful than his investigations of the principles on which it ought to be expounded. Yet as the appliances which he brought to the study of Scripture made him the father of biblical criticism, so of all detailed Christian scriptural commentaries his were the first; a fact not to be forgotten by those who would estimate aright their several merits and defects. The value of Origen's researches was best appreciated, a century later, by Jerome. He adopted and repeated most of Origen's principles; but he exhibited more judgment in the practical application of them: he devoted more attention to the literal interpretation, the basis of the rest, and he brought also larger stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically, mystically: the first meaning was the lowest, the last the highest. But elsewhere he gave a new threefold division of Scriptural interpretation, identifying the ethical with the literal or first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood "*secundum futurorum beatitudinem*." The influence of Origen's writings was supreme in the Greek Church for a hundred years after his death. Towards the end of the 4th century Diodore, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole of the O. T., attending only to the letter of Scripture. Of the disciples of Diodore, Theodore of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism, rejecting the greater part of the prophetic reference of the O. T., and maintaining it to be only applied to our Saviour by way of accommodation. Chrysostom, another disciple of Diodore, followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons. He was followed by Theodoret, who interpreted both literally and historically, and also allegorically and prophetically. In the Western Church the influence of Origen, if not so unqualified at the first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his Commentary on the Psalms. But in truth, as a practical interpreter, he greatly excelled Origen; carefully seeking out not what meaning the Scripture might bear, but what it really intended, and drawing forth the evangelical sense from the literal with cogency, terseness, and elegance. Here too Augustine stood somewhat in advance of Origen; carefully preserving in its integrity the literal sense of the historical narrative of Scripture as the substructure of the mystical, lest otherwise the latter should prove to be but a building in the air. But whatever advances had been made in the treatment of O. T. scripture by the Latins since the days of Origen were unhappily not perpetuated. We may

see this in the *Morals* of Gregory on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads: the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connexion: the very idea of such a connexion is ignored. Such was the general character of the interpretation which prevailed through the middle ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the 11th and following centuries; Rashi (†1105), Aben Ezra (†1167), Kimchi (†1240), and others. Following in the wake of these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy (†1341), produced his *Postillae Perpetuae* on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which they all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew (†1435), who upheld, by the side of the literal, the traditional interpretations, to which he was probably at heart exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root.—2. *Principles of Interpretation*.—From the foregoing sketch it will have appeared that it has been very generally recognized that the interpretation of the O. T. embraces the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence in Scripture of more than a single sense; rather, then, let it be said that there are in it three elements, co-existing and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly too there are three portions of the O. T. in which the respective elements, each in its turn, shine out with peculiar lustre. The literal (and historical) element is most obviously displayed in the historical narrative: the moral is specially honoured in the Law, and in the hortatory addresses of the Prophets: the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may by the student of Scripture be traced. In perusing the story of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts narrated; the moral, in the warnings which God's dealings with the people and their own several disobediences convey; and the spiritual in the prefiguration by that journey, in its several features, of the Christian pilgrimage through the wilderness of life. If the question be asked, Are the three several elements in the O. T. mutually coextensive? we reply, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so as that they are all to be traced in each several section. The historical element may occasionally exist alone. On the other hand there are passages of direct and simple moral exhortation, *e.g.* a considerable part of the Book of Proverbs, into which the historical element hardly enters. Occasionally also, as in Psalm ii., the prophetic element, though not alto-

gether divorced from the historical and the moral yet completely overshadows them. That we should use the New Testament as the key to the true meaning of the Old, and should seek to interpret the latter as it was interpreted by our Lord and His apostles, is in accordance both with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the appeals to the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the Old Testament would be found completely interpreted in the New. With these preliminary observations we may glance at the several branches of the interpreter's task. First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyse. He must ascertain the thing outwardly asserted, commanded, foetold, prayed for, or the like; and this with reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. Taken in its wide sense, the outward form of Scripture will itself, no doubt, include much that is figurative. To the outward form of Scripture thus belong all metonymies, in which one name is substituted for another; and metaphors, in which a word is transformed from its proper to a cognate signification; so also all prosopopeias, or personifications; and even all anthropomorphic and anthropopathic descriptions of God, which could never have been understood in a purely literal sense, at least by any of the right-minded among God's people. It is not to be denied that it is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element involved in it: on the other hand the very large use of figurative language in the O. T., and more especially in the prophecies, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs through the whole. Yet no unhallowed or unworthy task can it ever be to study, even for its own sake, the historical form in which the O. T. comes to us clothed. Even by itself it proclaims to us the historical workings of God, and reveals the care wherewith He has ever watched over the interests of His Church. Above all the history of the O. T. is the indispensable preface to the historical advent of the Son of God in the flesh. We need hardly labour to prove that the N. T. recognizes the general historical character of what the O. T. records. Of course in reference to that which is not related as plain matter of history, there will always remain the question how far the descriptions are to be viewed as definitely historical, how far as drawn, for a specific purpose, from the imagination. Such a question presents itself, for example, in the book of Job. It is one which must plainly be in each case decided according to the particular circumstances. In examining the extent of the historical element in the prophecies, both of the prophets and the psalmists, we must distinguish between those which we either

definitely know or may reasonably assume to have been fulfilled at a period not entirely distant from that at which they were uttered, and those which reached far beyond in their prospective reference. The former, once fulfilled, were thenceforth annexed to the domain of history (Is. xvii.; Ps. cvii. 33). With the prophecies of more distant scope the case stood thus. A picture was presented to the prophet's gaze, embodying an outward representation of certain future spiritual struggles, judgments, triumphs, or blessings; a picture suggested in general by the historical circumstances of the present (Zech. vi. 9-15; Ps. v., lxxii.), or of the past (Ez. xx. 35, 36; Is. xl. 15, xlviii. 21; Ps. xcix. 6, seqq.), or of the near future, already anticipated and viewed as present (Is. xlix. 7-26; Ps. lvi. 6-11), or of all these variously combined, altered, and heightened by the imagination. But it does not follow that that picture was ever outwardly brought to pass: the local had been exchanged for the spiritual, the outward type had merged in the inward reality before the fulfilment of the prophecy took effect. Respecting the rudiments of interpretation, let the following here suffice:—The knowledge of the meanings of Hebrew words is gathered (a) from the context, (b) from parallel passages, (c) from the traditional interpretations preserved in Jewish commentaries and dictionaries, (d) from the ancient versions, (e) from the cognate languages, Chaldee, Syriac, and Arabic. The syntax must be almost wholly gathered from the O. T. itself; and for the special syntax of the poetical books, while the importance of a study of the Hebrew parallelism is now generally recognized, more attention needs to be bestowed than has been bestowed hitherto on the centralism and inversion by which the poetical structure and language is often marked. From the outward form of the O. T. we proceed to its moral element or soul. It was with reference to this that St. Paul declared that all Scripture was given by inspiration of God, and was profitable for doctrine, for reproof, for correction, for instruction in righteousness (2 Tim. iii. 16); and it is in the implicit recognition of the essentially moral character of the whole, that our Lord and His apostles not only appeal to its direct precepts (e. g. Matt. xv. 4; xix. 17-19), and set forth the fulness of their bearing (e. g. Matt. ix. 13), but also lay bare moral lessons in O. T. passages which lie rather beneath the surface than upon it (Matt. xix. 5, 6, xxii. 32; John x. 34, 35; Acts vii. 48, 49; 1 Cor. ix. 9, 10; 2 Cor. viii. 13-15). With regard more particularly to the Law, our Lord shows in His Sermon on the Mount how deep is the moral teaching implied in its letter; and in His denunciation of the Pharisees, upbraids them for their omission of its weightier matters—judgment, mercy, and faith. The history too of the O. T. finds frequent reference made in the N. T. to its moral teaching (Luke vi. 3; Rom. iv., ix. 17; 1 Cor. x. 6-11; Heb. iii. 7-11, xi.; 2 Pet. ii. 15-16; 1 John iii. 12). The interpreter of the O. T. will have, among his other tasks, to analyse in the lives set before him the various yet generally mingled workings of the spirit of holiness and of the spirit of sin. The moral errors by which the lives of even the greatest saints were disfigured are related, and that for our instruction, but not generally criticized. The O. T. sets before us just those lives—the lives generally of religious men—which will best repay our study, and will most strongly suggest the moral lessons that God would

have us learn; and herein it is that, in regard of the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote. But the O. T. has further its spiritual and therefore prophetic element. Our attention is here first attracted to the avowedly predictive parts of the O. T., of the prospective reference of which, at the time that they were uttered, no question can exist, and the majority of which still awaited their fulfilment when the Redeemer of the world was born. With Christ the new era of the fulfilment of prophecy commenced. A marvellous amount there was in His person of the verification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because His outward mission, up to the time of His death, was but to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet it would plainly be impossible to suppose that the significance of such prophecies as Zech. ix. 9 was exhausted by the mere outward verification. Hence the entire absence from the N. T. of any recognition, by either Christ or His apostles, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (John x. 16, xi. 52; Acts ii. 39, xv. 15-17; Rom. ix. 25, 26, 32, 33, x. 11, 13, xi. 25, 26, 27, &c.). Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies contain within themselves, in sufficient measure, the evidence of their spiritual import. The substance of these prophecies is the glory of the Redeemer's spiritual kingdom: it is but the form that is derived from the outward circumstances of the career of God's ancient people, which had passed, or all but passed, away before the fulfilment of the promised blessings commenced. Nor was even the form in which the announcement of the new blessings had been clothed to be rudely cast aside; the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. But then arises the question, Must not this language have been divinely designed from the first as the language of God's Church? The typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. ("the Holy Ghost this signifying"), and is almost universally allowed; and it is not easy to tear asunder the events of Israel's history from the ceremonies of Israel's worship; nor yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N. T. itself implies the typical import of a large part of the O. T. narrative. In the O. T. itself we have, and this even in the latest times, events and persons expressly treated as typical (Ps. cxviii. 22; Zech. iii., vi. 9, &c.). A further testimony to the typical character of the history of the Old Testament is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical. So too the outward fulfilments of prophecy in the Redeemer's life were types of the deeper though less immediately striking fulfilment which it was to continue to receive ideally. It is not unlikely that there is an unwillingness to recognize the spiritual element in the historical parts of the O. T., arising from the

fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight upon the rest. But this does not affect its existence. Of another danger besetting the path of the spiritual interpreter of the O. T., we have a warning in the unedifying puerilities into which some have fallen. Against such he will guard by foregoing too curious a search for mere external resemblance between the Old Testament and the New, though withal thankfully recognizing them wherever they present themselves. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have nought morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfilment of prophecy. However remarkable the outward fulfilment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that that which was forbidden or sinful can, so far as it was sinful, not be regarded as typical of that which is free from sin. So again that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect.

C. QUOTATIONS FROM THE OLD TESTAMENT IN THE NEW TESTAMENT.—The New Testament quotations from the Old form one of the outward bonds of connexion between the two parts of the Bible. They are manifold in kind. Some of the passages quoted contain prophecies or involve types of which the N. T. writers designed to indicate the fulfilment. Others are introduced as direct logical supports to the doctrines which they were enforcing. It may not be easy to distribute all the quotations into their distinctive classes; but among those in which a prophetic or typical force is ascribed in the N. T. to the passage quoted, may fairly be reckoned all that are introduced with an intimation that the Scripture was "fulfilled;" and it may be observed that the word "fulfil," as applied to the accomplishment of what had been predicted or foreshadowed, is in the N. T. only used by our Lord Himself and his companion apostles. In the quotations of all kinds from the Old Testament in the New, we find a continual variation from the *letter* of the older Scriptures. To this variation three causes may be specified as having contributed:—First, all the N. T. writers quoted from the Septuagint; correcting it indeed more or less by the Hebrew, especially when it was useful for their purpose; occasionally deserting it altogether; still abiding by it to so large an extent as to show that it was the primary source whence their quotations were drawn. Secondly, the N. T. writers must have frequently quoted from memory. Thirdly, combined with this, there was an alteration of conscious or unconscious design. Sometimes the object of this was to obtain increased force. Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose (Acts i. 20; 1 Cor. i. 81.). At other times a passage is enlarged by the incorporation of a passage from another source: thus in Luke iv. 18, 19, although the contents are pro-

fessedly those read by our Lord from Is. lxi., we have the words "to set at liberty them that are bruised," introduced from Is. lviil. 6 (Sept.): similarly in Rom. xi. 8, Deut. xxix. 4 is combined with Is. xxix. 10. In some cases still greater liberty of alteration is assumed. In some places again, the actual words of the original are taken up, but employed with a new meaning. Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Matt. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by Zechariah: the reason being that the prophecy is based upon that in Jer. xlviii., xix., and that without a reference to this original source the most essential features of the fulfilment of Zechariah's prophecy would be misunderstood. The above examples will sufficiently illustrate the freedom with which the apostles and evangelists interwove the older Scriptures into their writings. It could only result in failure were we to attempt any merely mechanical account of variations from the O. T. text which are essentially not mechanical.

Olive. No tree is more closely associated with the history and civilization of man. Our concern with it here is in its sacred relations, and in its connexion with Judaea and the Jewish people. Many of the Scriptural associations of the olive-tree are singularly poetical. It has this remarkable interest, in the first place, that its foliage is the earliest that is mentioned by name, when the waters of the flood began to retire (Gen. viii. 11). Next we find it the most prominent tree in the earliest allegory (Judg. ix. 8, 9). With David it is the emblem of prosperity and the divine blessing (Ps. lii. 8, cxviii. 3). So with the later prophets it is the symbol of beauty, luxuriance, and strength. We must bear in mind, in reading this imagery, that the olive was among the most abundant and characteristic vegetation of Judaea. Thus after the captivity, when the Israelites kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing "olive-branches" from the "mount" (Neh. viii. 15). "The mount" is doubtless the famous Olivet, or Mount of Olives, the "Olivetum" of the Vulgate. Turning now to the mystic imagery of Zechariah (iv. 3, 11-14), and of St. John in the Apocalypse (Rev. xi. 3, 4), we find the olive-tree used, in both cases, in a very remarkable way. Finally, in the argumentation of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, this tree supplies the basis of one of his most forcible allegories (Rom. xi. 16-25). The Gentiles are the "wild olive" grafted in upon the "good olive," to which once the Jews belonged, and with which they may again be incorporated. The olive-tree grows freely almost everywhere on the shores of the Mediterranean, but it was peculiarly abundant in Palestine. See Deut. vi. 11, viii. 8, xxviii. 40. Oliveyards are a matter of course in descriptions of the country like vineyards and corn-fields (Judg. xv. 5; 1 Sam. viii. 14). The kings had very extensive ones (1 Chr. xxvii. 28). Even now the tree is very abundant in the country. Almost every village has its olive-grove. Certain districts may be specified where at various times this tree has been very luxuriant. The cultivation of the olive-tree had the closest connexion with the domestic life of the Israelites (2 Chr. ii. 10), their trade (Ez. xxvii. 17; Hos. xii. 1), and even their public ceremonies and religious worship. The oil was used in coronations:

thus it was an emblem of sovereignty (1 Sam. x. 1, xii. 3, 5). It was also mixed with the offerings in sacrifice (Lev. ii. 1, 2, 6, 15). For the burning of it in common lamps see Matt. xiv. 3, 4, 8. The use of it on the hair and skin was customary, and indicative of cheerfulness (Ps. xxiii. 5, Matt. vi. 17). It was also employed medicinally in surgical cases (Luke x. 34). See again Mark vi. 13; Jam. v. 14, for its use in combination with prayer on behalf of the sick. In Solomon's temple the cherubim were "of olive-tree" (1 K. vi. 23), as also the doors (vers. 31, 32) and the posts (ver. 33). As to the berries (Jam. iii. 12; 2 Esd. xvi. 29), which produce the oil, they were sometimes gathered by shaking the tree (Is. xxiv. 13), sometimes by beating it (Deut. xxiv. 20). Then followed the treading of the fruit (Deut. xxiii. 24; Mic. vi. 15). Hence the mention of "oil-fats" (Joel ii. 24). The wind was dreaded by the cultivator of the olive, for the least ruffling of a breeze is apt to cause the flowers to fall (Job xv. 33). It is needless to add that the locust was a formidable enemy of the olive (Amos iv. 9). It happened not unfrequently that hopes were disappointed, and that "the labour of the olive failed" (Hab. iii. 17). As to the growth of the tree, it thrives best in warm and sunny situations. It is of a moderate height, with knotty gnarled trunks, and a smooth ash-coloured bark. It grows slowly, but it lives to an immense age. Its look is singularly indicative of tenacious vigour; and this is the force of what is said in Scripture of its "greenness," as emblematic of strength and prosperity. The leaves, too, are not deciduous. Those who see olives for the first time are occasionally disappointed by the dusty colour of their foliage; but those who are familiar with them find an inexpressible charm in the rippling changes of their slender grey-green leaves.

Olives, Mount of. The exact expression "the Mount of Olives" occurs in the O. T. in Zech. xiv. 4 only; in the other places of the O. T. in which it is referred to, the form employed is the "ascend of the olives" (2 Sam. xv. 30; A. V. inaccurately "the ascent of Mount Olivet"), or simply "the Mount" (Neh. viii. 15), "the mount facing Jerusalem" (1 K. xi. 7), or "the mountain which is on the east side of the city" (Ez. xi. 23). In the N. T. three forms of the word occur: 1. The usual one, "the Mount of Olives." 2. By St. Luke twice (xix. 29, xxi. 37), "the mount called Elaidn." 3. Also by St. Luke (Acts i. 12), the "mount called Olivet." It is the well-known eminence on the east of Jerusalem, intimately and characteristically connected with some of the gravest and most significant events of the history of the Old Testament, the New Testament, and the intervening times, and one of the firmest links by which the two are united; the scene of the flight of David and the triumphal progress of the Son of David, of the idolatry of Solomon, and the agony and betrayal of Christ. If anything were wanting to fix the position of the Mount of Olives, it would be amply settled by the account of the first of the events just named, as related in 2 Sam. xv., with the elucidations of the LXX. and Josephus (*Ant.* vii. 9). David's object was to place the Jordan between himself and Absalom. He therefore flies by the road called "the road of the wilderness" (xv. 23). This leads him across the Kidron, past the well-known olive-tree (LXX.) which marked the path, up the toilsome ascent of the mount—else-

where exactly described as facing Jerusalem on the east (1 K. xi. 7; Ez. xi. 23; Mk. xiii. 3)—to the summit, where was a consecrated spot at which he was accustomed to worship God. At this spot he again performed his devotions—it must have seemed for the last time—and took his farewell of the city, “with many tears, as one who had lost his kingdom.” He then turned the summit, and after passing Bahurim, probably about where Bethany now stands, continued the descent through the “dry and thirsty land” until he arrived “weary” at the bank of the river (Joseph. *Ant.* vii. 9, §2-6; 2 Sam. xvi. 14, xxvii. 21, 22). This, which is the earliest mention of the Mount of Olives, is also a complete introduction to it. The remaining references to it in the Old Testament are but slight. The “high places” which Solomon constructed for the gods of his numerous wives, were in the mount “facing Jerusalem” (1 K. xi. 7)—an expression which applies to the Mount of Olives only, as indeed all commentators apply it. During the next four hundred years we have only the brief notice of Josiah’s iconoclasm at this spot. Another two hundred years and we find a further mention of it: this time in a thoroughly different connexion. It is now the great repository for the vegetation of the district, planted thick with olive, and the bushy myrtle, and the feathery palm. “Go out” of the city “into the mount”—was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after the return from Babylon—“and fetch olive branches, and ‘oil-tree’ branches, and myrtle-boughs, and palm-leaves, and branches of thick trees to make booths, as it is written” (Neh. viii. 15). The cultivated and umbrageous character which is implied in this description, as well as in the name of the mount, is retained till the N. T. times. At this point in the history it will be convenient to describe the situation and appearance of the Mount of Olives. It is not so much a “mount” as a ridge, of rather more than a mile in length, running in general direction north and south; covering the whole eastern side of the city. At its northern end the ridge bends round to the west, so as to form an enclosure to the city on that side also. But there is this difference, that whereas on the north a space of nearly a mile of tolerably level surface intervenes between the walls of the city and the rising ground, on the east the mount is close to the walls, parted only by that which from the city itself seems no parting at all—the narrow ravine of the Kidron. It is this portion which is the real Mount of Olives of the history. The northern part is, though geologically continuous, a distinct mountain. We will therefore confine ourselves to this portion. In general height it is not very much above the city: 300 feet higher than the Temple mount, hardly more than 100 above the so-called Zion. The word “ridge” has been used above as the only one available for an eminence of some length and even height, but that word is hardly accurate. There is nothing “ridge-like” in the appearance of the Mount of Olives, or of any other of the limestone hills of this district of Palestine; all is rounded, swelling, and regular in form. At a distance its outline is almost horizontal, gradually sloping away at its southern end; but when seen from below the eastern wall of Jerusalem, it divides itself into three, or rather perhaps four, independent summits or eminences. Proceeding from north to south these occur in the following

order:—Galilee, or Viri Galilaei; Mount of the Ascension; Prophets, subordinate to the last, and almost a part of it; Mount of Offence. 1. Of these the central one, distinguished by the minaret and domes of the Church of the Ascension, is in every way the most important. Three paths lead from the valley to the summit. The first passes under the north wall of the enclosure of Gethsemane, and follows the line of the depression between the centre and the northern hill. The second parts from the first about 50 yards beyond Gethsemane, and striking off to the right up the very breast of the hill, surmounts the projection on which is the traditional spot of the Lamentation over Jerusalem, and thence proceeds directly upwards to the village. The third leaves the other two at the N.E. corner of Gethsemane, and making a considerable detour to the south, visits the so-called “Tombs of the Prophets,” and, following a very slight depression which occurs at that part of the mount, arrives in its turn at the village. Of these three paths the first, from the fact that it follows the natural shape of the ground, is unquestionably older than the others, which deviate in pursuit of certain artificial objects. Every consideration is in favour of its being the road taken by David in his flight. It is, with equal probability, that usually taken by our Lord and His disciples in their morning and evening transit between Jerusalem and Bethany, and that also by which the Apostles returned to Jerusalem after the Ascension. The central hill, which we are now considering, purports to contain the sites of some of the most sacred and impressive events of Christian history. During the middle ages most of these were protected by an edifice of some sort; and to judge from the reports of the early travellers, the mount must at one time have been thickly covered with churches and convents. The majority of these sacred spots now command little or no attention; but three still remain, sufficiently sacred—if authentic—to consecrate any place. These are: 1. Gethsemane, at the foot of the mount. 2. The spot from which our Saviour ascended, on the summit. 3. The place of the Lamentation of Christ over Jerusalem, halfway up. (1.) Of these, Gethsemane is the only one which has any claim to be authentic. Its claims, however, are considerable: they are spoken of elsewhere. (2.) The first person who attached the Ascension of Christ to the Mount of Olives seems to have been the Empress Helena (A.D. 325). Eusebius states that she erected, as a memorial of that event, a sacred house of assembly on the highest part of the mount, where there was a cave which a sure tradition testified to be that in which the Saviour had imparted mysteries to His disciples. But neither this account, nor that of the same author when the cave is again mentioned, do more than name the Mount of Olives, generally, as the place from which Christ ascended: they fix no definite spot thereon. It took nearly three centuries to harden and narrow this general recognition of the connexion of the Mount of Olives with Christ, into a lying invention in contradiction of the Gospel narrative of the Ascension. (3.) The third of the three traditional spots mentioned—that of the Lamentation over Jerusalem (Luke xix. 41-44)—is not more happily chosen than that of the Ascension. It is on a mamelon or protuberance which projects from the slope of the breast of the hill, about 300 yards above Gethsemane. The inappropriateness of this place has been noticed by many; but Dr.

Stanley was the first who gave it its death-blow, by pointing out the true spot to take its place. In a well-known passage of *Sinai and Palestine* (190-193), he shows that the road of our Lord's "Triumphal entry" must have been, not the short and steep path over the summit used by small parties of pedestrians, but the longer and easier route round the southern shoulder of the southern of the three divisions of the mount. 2. We have spoken of the central and principal portion of the mount. Next to it on the southern side, separated from it by a slight depression, up which the path mentioned above as the third takes its course, is a hill which appears neither to possess, nor to have possessed, any independent name. It is remarkable only for the fact that it contains the "singular catacomb" known as the "Tombs of the Prophets," probably in allusion to the words of Christ (Matt. xxiii. 29). 3. The most southern portion of the Mount of Olives is that usually known as the "Mount of Offence," *Mons Offensionis*, though by the Arabs called *Boten el Hana*, "the bag of the wind." It rises next to that last mentioned; and in the hollow between the two, more marked than the depressions between the more northern portions, runs the road from Bethany, which was without doubt the road of Christ's entry to Jerusalem. The title Mount of Offence, or of Scandal, was bestowed on the supposition that it is the "Mount of Corruption" on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiii. 13; 1 K. xi. 7). The southern summit is considerably lower than the centre one, and, as already remarked, it is much more definitely separated from the surrounding portions of the mountain than the others are. It is also sterner and more repulsive in its form. 4. The only one of the four summits remaining to be considered is that on the north of the "Mount of Ascension"—the *Karem es-Seyid*, or Vineyard of the Sportsman; or, as it is called by the modern Latin and Greek Christians, the *Viri Gallilæi*. This is a hill of exactly the same character as the Mount of the Ascension, and so nearly its equal in height that few travellers agree as to which is the more lofty. The summits of the two are about 400 yards apart. It stands directly opposite the N.E. corner of Jerusalem, and is approached by the path between it and the Mount of Ascension, which strikes at the top into a cross path leading to *el-Isawiyyeh* and *Anata*. The Arabic name well reflects the fruitful character of the hill, on which there are several vineyards, besides much cultivation of other kinds. The Christian name is due to the singular tradition, that here the two angels addressed the Apostles after our Lord's ascension—"Ye men of Galilee!" This idea, which is so incompatible, on account of the distance, even with the traditional spot of the Ascension, is of late existence and inexplicable origin. The presence of the crowd of churches and other edifices implied in the foregoing description must have rendered the Mount of Olives, during the early and middle ages of Christianity, entirely unlike what it was in the time of the Jewish kingdom or of our Lord. Except the high places on the summit, the only buildings then to be seen were probably the walls of the vineyards and gardens, and the towers and presses which were their invariable accompaniment. But though the churches are nearly all demolished there must be a considerable difference between the aspect of the mountain now and in those days when it received

its name from the abundance of its olive-groves. It does not now stand so pre-eminent in this respect among the hills in the neighbourhood of Jerusalem. "It is only in the deeper and more secluded slope leading up to the northernmost summit that these venerable trees spread into anything like a forest." The cedars commemorated by the Talmud, and the date-palms implied in the name Bethany, have fared still worse: there is not one of either to be found within many miles. Two religious ceremonies performed there must have done much to increase the numbers who resorted to the mount. The appearance of the new moon was probably watched for, certainly proclaimed, from the summit. The second ceremony referred to was burning of the Red Heifer. This solemn ceremonial was enacted on the central mount, and in a spot so carefully specified that it would seem not difficult to fix it. It was due east of the sanctuary, and at such an elevation on the mount that the officiating priest, as he slew the animal and sprinkled her blood, could see the façade of the sanctuary through the east gate of the Temple. To this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it far above all possible proximity with graves or other defilements. It was probably demolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account satisfactorily for its not being alluded to by Josephus.

Olivet (2 Sam. xv. 30; Acts i. 12), probably derived from the Vulgate, in the latter of these two passages. [See OLIVES, MOUNT OF.]

Olym'pas, a Christian at Rome (Rom. xvi. 15), perhaps of the household of Philologus.

Olym'pius, one of the chief epithets of the Greek deity Zeus, so called from Mount Olympus in Thessaly, the abode of the gods (2 Macc. vi. 2).

Omae'rus. AMRAM of the sons of Bani (1 Esd. ix. 34; comp. Ezr. x. 34).

O'mar, son of Eliphaz the firstborn of Esau, and "duke" or phylarch of Edom (Gen. xxxvi. 11, 15; 1 Chr. i. 36). The name is supposed to survive in that of the tribe of *Amir* Arabs east of the Jordan.

O'mega, The last letter of the Greek alphabet, as Alpha is the first. It is used metaphorically to denote the end of anything: "I am Alpha and Omega, the beginning and the ending . . . the first and the last" (Rev. i. 8, 11).

Omer. [WEIGHTS AND MEASURES.]

Om'ri. 1. Originally "captain of the host" to ELAH, was afterwards himself King of Israel, and founder of the third dynasty. When Elah was murdered by Zimri at Tirzah, then capital of the northern kingdom, Omri was engaged in the siege of Gibbethon, situated in the tribe of Dan, which had been occupied by the Philistines. As soon as the army heard of Elah's death, they proclaimed Omri king. Thereupon he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xvi. 21) desired to raise to the throne, and who was bravely assisted by his brother Joram (LXX.). The civil war lasted four years (cf. 1 K. xvi. 15, with 23). After the defeat and death of Tibni and Joram, Omri reigned for six years in

Tirzah; but at the end of that time he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain Shomron, better known by its Greek name Samaria, which he bought for two talents of silver from a rich man, otherwise unknown, called Shemer. At Samaria Omri reigned for six years more. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intercourse and alliances with foreign states. The probable date of Omri's accession (*i. e.* of the deaths of Elah and Zimri) was B.C. 935; of Tibni's defeat and the beginning of Omri's sole reign B.C. 931, and of his death B.C. 919.—**2.** One of the sons of Becher the son of Benjamin (1 Chr. vii. 8).—**3.** A descendant of Pharez the son of Judah (1 Chr. ix. 4).—**4.** Son of Michael, and chief of the tribe of Issachar in the reign of David (1 Chr. xxvi. 18).

On, the son of Peleth, and one of the chiefs of the tribe of Reuben who took part with Korah, Dathan, and Abiram in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the conspiracy, nor is he alluded to when reference is made to the final catastrophe. There is a Rabbinical tradition to the effect that he was prevailed upon by his wife to withdraw from his accomplices.

On, a town of Lower Egypt, which is mentioned in the Bible under at least two names, BETH-SHEMESH (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name HA-RA, "the abode of the sun," and that above, corresponding to the common name AN, and perhaps also spoken of as *h-ha-heres*. The ancient Egyptian common name is written AN, or AN-T, and perhaps ANU; but the essential part of the word is AN, and probably no more was pronounced. There were two towns called AN: Heliopolis, distinguished as the northern, AN-MEHET; and Hermonthis, in Upper Egypt, as the southern, AN-RES. Heliopolis was situated on the east side of the Pelusiac branch of the Nile, just below the point of the Delta, and about twenty miles north-east of Memphis. It was before the Roman time the capital of the Heliopolite Nome, which was included in Lower Egypt. Now its site is above the point of the Delta, which is the junction of the Phatmetic, or Danielta branch and the Bolbitine, or Ro-etta, and about ten miles to the north-east of Cairo. In the earliest times it must have been subject to the 1st dynasty so long as their sole rule lasted, which was perhaps for no more than the reigns of Menes (B.C. cir. 2717) and Athothis: it doubtless next came under the government of the Memphites, of the 3rd (B.C. cir. 2640), 4th, and 6th dynasties: it then passed into the hands of the Diospolites of the 12th dynasty, and the Shepherds of the 15th. During the long period of anarchy that followed the rule of the 12th dynasty, when Lower Egypt was subject to the Shepherd kings, Heliopolis must have been under the government of the strangers. With the accession of the 18th dynasty, it was probably recovered by the Egyptians, and thenceforward held by them. The chief object of worship at Heliopolis was the sun, under the forms RA, the sun simply, whence the sacred name of the place, HA-RA, "the abode of the sun," and ATUM, the setting sun, or sun of the nether world. The temple of the sun, described by Strabo, is now only represented by the single beautiful obelisk, which is of red granite, 68 feet 2 inches high above the pedestal, and bears

a dedication, showing that it was sculptured in or after his 30th year (cir. 2050) by Sesertesen I., first king of the 12th dynasty (B.C. cir. 2080-2045). Heliopolis was anciently famous for its learning, and Eudoxus and Plato studied under its priests; but, from the extent of the mounds, it seems to have been always a small town. The first mention of this place in the Bible is in the history of Joseph, to whom we read Pharaoh gave "to wife Asenath the daughter of Poti-pherah, priest of On" (Gen. xli. 45, comp. ver. 50, and xlii. 20). According to the LXX. version, On was one of the cities built for Pharaoh by the oppressed Israelites, for it mentions three "strong cities" instead of the two "treasure cities" of the Heb., adding On to Pithom and Raameses. Heliopolis lay at no great distance from the land of Goshen and from Raameses, and probably Pithom also. Isaiah has been supposed to speak of On when he prophesies that one of the five cities in Egypt that should speak the language of Canaan, should be called *h-ha-heres*, which may mean the City of the Sun, whether we take "*heres*" to be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time, from its nearness to the town of Onias. Jeremiah speaks of On under the name Beth-shemesh, "the house of the sun" (xliii. 13). Perhaps it was on account of the many false gods of Heliopolis, that, in Ezekiel (xxx. 17), On is written Aven, by a change in the punctuation, and so made to signify "vanity," and especially the vanity of idolatry. After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition, however, points it out as a place where our Lord and the Virgin came, when Joseph brought them into Egypt.

O'nam. 1. One of the sons of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40).—**2.** The son of Jerahmeel by his wife Atarah (1 Chr. ii. 26, 28).

O'nan. The second son of Judah by the Canaanitess, "the daughter of Shua" (Gen. xxxviii. 4; 1 Chr. ii. 3). "What he did was evil in the eyes of Jehovah, and He slew him also," as He had slain his elder brother (Gen. xxxviii. 9). His death took place before the family of Jacob went down into Egypt (Gen. xlii. 12; Num. xxvi. 19).

Onesimus is the name of the servant or slave in whose behalf Paul wrote the Epistle to Philemon. He was a native, or certainly an inhabitant of Colossae, since Paul in writing to the Church there speaks of him (Col. iv. 9) as "one of you." Slaves were numerous in Phrygia, and the name itself of Phrygian was almost synonymous with that of slave. Onesimus was one of this unfortunate class of persons, as is evident both from the manifest implication in Phil. 16, and from the general tenor of the epistle. The man escaped from his master and fled to Rome, where in the midst of its vast population he could hope to be concealed, and to baffle the efforts which were so often made in such cases for retaking the fugitive. Whether Onesimus had any other motive for the flight than the natural love of liberty, we have not the means of deciding. It has been very generally supposed that he had committed some offence, as theft or embezzlement, and feared the punishment of his guilt. Though it may be doubted whether Onesimus heard the gospel for the first time at Rome, it is beyond question

that he was led to embrace the gospel there through the apostle's instrumentality. The language in ver. 10 of the letter is explicit on this point. After his conversion, the most happy and friendly relations sprung up between the teacher and the disciple. The situation of the apostle as a captive and an indefatigable labourer for the promotion of the gospel (Acts xviii. 30, 31) must have made him keenly alive to the sympathies of Christian friendship and dependent upon others for various services of a personal nature, important to his efficiency as a minister of the word. Onesimus appears to have supplied this twofold want in an eminent degree. Whether Paul desired his presence as a personal attendant or as a minister of the gospel, is not certain from ver. 13 of the Epistle.

Onesiphorus is named twice only in the N. T., viz., 2 Tim. i. 16-18, and iv. 19. In the former passage Paul mentions him in terms of grateful love, as having a noble courage and generosity in his behalf, amid his trials as a prisoner at Rome, when others from whom he expected better things had deserted him (2 Tim. iv. 16); and in the latter passage he singles out "the household of Onesiphorus" as worthy of a special greeting. It has been made a question whether this friend of the apostle was still living when the letter to Timothy was written, because in both instances Paul speaks of "the household" (in 2 Tim. i. 16) and not separately of Onesiphorus himself. The probability is that other members of the family were also active Christians; and as Paul wished to remember them at the same time, he grouped them together (2 Tim. iv. 19), and thus delicately recognised the common merit, as a sort of family distinction. It is evident from 2 Tim. i. 18, that Onesiphorus had his home at Ephesus; though if we restrict the salutation near the close of the Epistle (iv. 19) to his family, he himself may possibly have been with Paul at Rome when the latter wrote to Timothy.

Oni'a'rae, a name introduced into the Greek and Syriac texts of 1 Macc. xii. 20 by a very old corruption. The true reading is given in the margin of the A. V.

Oni'as, the name of five high priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion.

—1. The son and successor of Jaddua, who entered on the office about the time of the death of Alexander the Great, c. B.C. 330-309, or, according to Eusebius, 300. According to Josephus he was father of Simon the Just.—2. The son of Simon the Just. He was a minor at the time of his father's death (c. B.C. 290), and the high-priesthood was occupied in succession by his uncles Eleazar and Matusseh to his exclusion. He entered on the office at last c. B.C. 240, and his conduct threatened to precipitate the rupture with Egypt, which afterwards opened the way for Syrian oppression. Onias retained the high-priesthood till his death, c. B.C. 226, when he was succeeded by his son Simon II.—3. The son of Simon II., who succeeded his father in the high-priesthood, c. B.C. 198. Seleucus Philopator was informed by Simon, governor of the Temple, of the riches contained in the sacred treasury, and he made an attempt to seize them by force. At the prayer of Onias, according to the tradition (2 Macc. iii.), the sacrilege was averted; but the high-priest was obliged to appeal to the king himself for support against the machinations of Simon. Not long afterwards Seleucus died (B.C. 175),

and Onias found himself supplanted in the favour of Antiochus Epiphanes by his brother Jason, who received the high-priesthood from the king. Jason, in turn, was displaced by his youngest brother Menelaus, who procured the murder of Onias (c. B.C. 171).—4. The youngest brother of Onias III., who bore the same name, which he afterwards exchanged for Menelaus.—5. The son of Onias III., who sought a refuge in Egypt from the sedition and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of "the sons of Tobias," gained by the interference of Antiochus Epiphanes. Onias, receiving the protection of Ptol. Philometor, endeavoured to give a unity to the Hellenistic Jews. With this object he founded the Temple at Leontopolis.

Oni'as, the City of, the Region of Onias, the city in which stood the temple built by Onias, and the region of the Jewish settlements in Egypt. Ptolemy mentions the city as the capital of the Heliopolite nome. In the spurious letters given by Josephus in the account of the foundation of the temple of Onias, it is made to have been at Leontopolis in the Heliopolite nome, and called a strong place of Bubastis. Leontopolis was not in the Heliopolite nome, but in Ptolemy's time was the capital of the Leontopolite, and the mention of it is altogether a blunder. There is probably also a confusion as to the city Bubastis. The site of the city of Onias is to be looked for in some one of those to the northward of Heliopolis which are called Tel-el-Yahood, "the Mound of the Jews," or Tel-el-Yahooddeyeh, "the Jewish Mound." Sir Gardner Wilkinson thinks that there is little doubt that it is one which stands in the cultivated land near Shibbeen, to the northward of Heliopolis, in a direction a little to the east, at a distance of twelve miles. From the account of Josephus, and the name given to one of them, "the Camp of the Jews," these settlements appear to have been of a half-military nature. The easternmost part of Lower Egypt, be it remembered, was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. Probably the Jewish settlements were established for the same purpose.

Onions (Heb. *betsallim*). There is no doubt as to the meaning of the Hebrew word, which occurs only in Num. xi. 5, as one of the good things of Egypt of which the Israelites regretted the loss. Onions have been from time immemorial a favourite article of food amongst the Egyptians. The onions of Egypt are much milder in flavour and less pungent than those of this country.

Ono. One of the towns of Benjamin. It does not appear in the catalogues of the Book of Joshua, but is first found in 1 Chr. viii. 12, where Shamed or Shamer is said to have built Ono and Lod with their "daughter villages." A plain was attached to the town, and bore its name—*Bisath-Ono*, "the plain of Ono" (Neh. vi. 2), perhaps identical with the "valley of craftsmen" (Neh. xi. 36). By Eusebius and Jerome it is not named. The village of *Kefr Ana*, almost due N. of *Lydda*, is suggested by Van de Velde as identical with Ono. Against the identification however are, the difference in the names—the modern one containing the *Am*;—and the distance from Lydda. Winer remarks that *Beit Unia* is more suitable as far as its orthography is concerned; but on the other hand *Beit Unia* is much too far distant from *Ludd* to

meet the requirements of the passages quoted above.

* **Onus.** The form in which the name *ONO* appears in 1 Esd. v. 22.

Onycha (Heb. *shechleth*) according to many of the old versions denotes the operculum of some species of *Strombus*, a genus of gasteropodous Mollusca. The Hebrew word occurs only in Ex. xxx. 34, as one of the ingredients of the sacred perfume. In Eccles. xxiv. 15, Wisdom is compared to the pleasant odour yielded by "galbanum, onyx and sweat storax." There can be little doubt that the *onyx* of Dioscorides (ii. 10), and the *onyx* of Pliny (xxiii. 10), are identical with the operculum of a *Strombus*, perhaps *S. lentiginosus*. The *Unguis odoratus*, or *Blatta byzantina*,—for under both these terms apparently the devil claw is alluded to in old English writers on *Materia Medica*—has by some been supposed no longer to exist. Dr. Lister laments its loss, believing it to have been a good medicine "from its strong aromatic smell." Bochart believes some kind of bdellium is intended.

Onyx (Heb. *shôham*). The A. V. uniformly renders the Hebrew *shôham* by "onyx;" the Vulgate too is consistent with itself, the *sardonix* (Job xxviii. 16) being merely a variety of the *onyx*; but the testimonies of ancient interpreters generally are diverse and ambiguous. There is nothing in the contexts of the several passages (Gen. ii. 12; Ex. xxviii. 9, 20; 1 Chr. xxix. 2; Ez. xxviii. 13) where the Hebrew term occurs to help us to determine its signification. Josephus expressly states that the shoulder-stones of the high-priest were formed of two large sardonixes, an *onyx* being, in his description, the second stone in the fourth row of the breastplate. Some writers believe that the "beryl" is intended. Other interpretations of *shôham* have been proposed, but all are mere conjectures. The balance of authority is, we think, in favour of some variety of the *onyx*. As to the "onyx" of Eccles. xxiv. 15, see *ONYCHA*.

Ophel. A part of ancient Jerusalem. The name is derived by the lexicographers from a root of similar sound, which has the force of a swelling or tumour. It does not come forward till a late period of Old Test. history. In 2 Chr. xxvii. 3, Jotham is said to have built much "on the wall of Ophel." Manasseh, amongst his other defensive works, "compassed about Ophel" (*Ibid.* xxxiii. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (Neh. iii. 26) and the "great tower that lieth out" (ver. 27). Lastly, the former of these two passages, and Neh. xi. 21, shew that Ophel was the residence of the Levites. In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms. But in his account of the last days of Jerusalem he mentions it four times as *Ophla*. From his references it appears that Ophel was outside the south wall of the Temple, and that it lay between the central valley of the city, which debouches above the spring of Siloam, on the one hand, and the east portico of the Temple on the other. Ophel, then, was the swelling declivity by which the Mount of the Temple slopes off on its southern side into the Valley of Hinnom—a long narrowish rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropoëon) and the Kidron, or Valley of Jehoshaphat. Halfway down it on its

eastern face is the "Fount of the Virgin," so called, and at its foot the lower outlet of the same spring—the Pool of Siloam. How much of this declivity was covered with the houses of the Levites, or with the suburb which would naturally gather round them, and where the "great tower" stood we have not at present the means of ascertaining.

O'phir. 1. The eleventh in order of the sons of Joktan, coming immediately after Sheba (Gen. x. 29; 1 Chr. i. 23). So many important names in the genealogical table in the 10th chapter of Genesis—such as Sidon, Canaan, Assur, Aram (Syria), Mizraim (the two Egypts, Upper and Lower), Sheba, Caphtorim, and Philistim (the Philistines)—represent the name of some city, country, or people, that it is reasonable to infer that the same is the case with all the names in the table. But there is one marked peculiarity in the sons of Joktan, which is common to them with the Canaanites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 29, 30) that the dwelling of the sons of Joktan was "from Mesha, as thou goest unto Sephar a mountain of the east." The peculiar wording of these geographical limits forbids the supposition that Mesha and Sephar belonged to very distant countries, or were comparatively unknown; and as many of the sons of Joktan are by common consent admitted to represent settlements in Arabia, it is an obvious inference that *all* the settlements corresponding to the names of the other sons are to be sought for in the same peninsula alone. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussion concerning the place Ophir mentioned in the book of Kings, that the author of the 10th chapter of Genesis regarded Ophir the son of Joktan as corresponding to some city, region, or tribe in Arabia. **Etymology.**—There is, seemingly, no sufficient reason to doubt that the word Ophir is Semitic. Gosenius suggests that it means a "fruitful region." Baron von Wrede made a small vocabulary of Hinyaritic words in the vernacular tongue, and amongst these he gives *ofir* as signifying *red*. Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate.—2. A seaport or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from Ezion-geber, near Elath, on that branch of the Red Sea which is now called the Gulf of Akabah. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as an expression for fine gold (Ps. xlv. 10; Job xxviii. 16; Is. xlii. 12; 1 Chr. xxix. 4); and in one passage (Job xxii. 24) the word "Ophir" by itself is used for gold of Ophir, and for gold generally. In addition to gold, the vessels brought from Ophir almug-wood and precious stones. The precise geographical situation of Ophir has long been a subject of doubt and discussion. Calmet regarded it as in Armenia; Sir Walter Raleigh thought it was one of the Malucca Islands; and Arias Montanus found it in Peru. The three opinions which have found supporters in our own time were formerly represented, amongst other writers, by Huet, by Bruce, and by the historian Robertson, who placed Ophir in Africa; by Vitringa and Reland, who placed it in India; and by Michaelis, Niebuhr the traveller, Gosselin, and Vincent, who placed it in Arabia. Of other distinguished geographical writers, Bochart admitted two Ophirs, one in Arabia and one in

India, *i. e.* at Ceylon; while D'Anville, equally admitting two, placed one in Arabia and one in Africa. Sir J. Emerson Tennant adopts the opinion, sanctioned by Josephus, that Malacca was Ophir. Otherwise the two countries which have divided the opinions of the learned have been India and Arabia. In favour of Arabia, there are these considerations:—1st. The 10th chapter of Genesis ver. 29, contains what is equivalent to an intimation of the author's opinion, that Ophir was in Arabia. 2ndly. Three places in Arabia may be pointed out, the names of which agree sufficiently with the word Ophir: viz., Aghar, now Zafar or Saphar, which was the metropolis of the Sabaeans; Doffir, a city mentioned by Niebuhr the traveller, as a considerable town of Yemen; and Zafar or Zafari, now Dofar, a city on the southern coast of Arabia. 3rdly. In antiquity, Arabia was represented as a country producing gold by four writers at least. 4thly. Eupolemus, a Greek historian, who lived before the Christian aera, expressly states, that Ophir was an island with gold mines in the Erythraean Sea. 5thly. On the supposition that, notwithstanding all the ancient authorities on the subject, gold really never existed either in Arabia, or in any island along its coasts, Ophir was an Arabian emporium, into which gold was brought as an article of commerce, and was exported into Judaea. While such is a general view of the arguments for Arabia, the following considerations are urged in behalf of India. 1st. Sofir is the Coptic word for India; and Sophir, or Saphira is the word used for the place of Ophir by the Septuagint translators, and likewise by Josephus. And Josephus positively states that it was a part of India, though he places it in the Golden Chersonese, which was the Malay peninsula. 2ndly. All the three imports from Ophir, gold, precious stones, and almug wood, are essentially Indian. 3rdly. Assuming that the ivory, peacocks, and apes, which were brought to Ezion-geber once in three years by the navy of Tarshish in conjunction with the navy of Hiram (1 K. x. 22), were brought from Ophir, they also collectively point to India rather than Arabia. 4thly. Two places in India may be specified, agreeing to a certain extent in name with Ophir; one at the mouths of the Indus, where Indian writers placed a people named the Abhira, and the other, the *Soumāra* of Ptolemy, where the town of Goa is now situated. Lastly, the following pleas have been urged in behalf of Africa. 1st. Of the three countries, Africa, Arabia, and India, Africa is the only one which can be seriously regarded as containing districts which have supplied gold in any great quantity. 2ndly. On the western coast of Africa, near Mozambique, there is a port called by the Arabians Sofala, which, as the liquids *l* and *r* are easily interchanged, was probably the Ophir of the ancients. 3rdly. On the supposition that the passage, 1 K. x. 22, applies to Ophir, Sofala has still stronger claims in preference to India. Peacocks, indeed, would not have been brought from it; but the peacock is too delicate a bird for a long voyage in small vessels, and the word *tukkiyim*, probably signified "parrots." At the same time, ivory and apes might have been supplied in abundance from the district of which Sofala was the emporium. 4thly. On the same supposition respecting 1 K. x. 22, it can, according to the traveller Bruce, be proved by the laws of the monsoons in the Indian Ocean, that Ophir was at Sofala; inasmuch as the voyage to Sofala from

CON. D. B.

Ezion-geber would have been performed exactly in three years; it could not have been accomplished in less time, and it would not have required more. From the above statement the suspicion will naturally suggest itself that no positive conclusion can be arrived at on the subject. And this seems to be true, in this sense, that the Bible in all its direct notices of Ophir as a place does not supply sufficient data for an independent opinion on this disputed point. At the same time, it is an inference in the highest degree probable, that the author of the 10th chapter of Genesis regarded Ophir as in Arabia; and, in the absence of conclusive proof that he was mistaken, it seems most reasonable to acquiesce in his opinion. To illustrate this view of the question it is desirable to examine closely all the passages in the historical books which mention Ophir by name. These are only five in number: three in the Books of Kings (1 K. ix. 26-29, x. 11, xxii. 48), and two in the Books of Chronicles (2 Chr. viii. 18, ix. 10). The latter were probably copied from the former. In addition to these passages, the following verse in the Book of Kings has very frequently been referred to Ophir: "For the king (*i. e.* Solomon) had at sea a navy of Tarshish with the navy of Hiram: once in three years came the navy of Tarshish bringing gold and silver, ivory, and apes, and peacocks" (1 K. x. 22). But there is not sufficient evidence to show that the fleet mentioned in this verse was identical with the fleet mentioned in 1 K. ix. 26-29, and 1 K. x. 11, as bringing gold, almug-trees, and precious stones from Ophir. If the three passages of the Book of Kings are carefully examined, it will be seen that all the information given respecting Ophir is, that it was a place or region, accessible by sea from Ezion-geber on the Red Sea, from which imports of gold, almug-trees, and precious stones were brought back by the Tyrian and Hebrew sailors. Under these circumstances it is well to revert to the 10th chapter of Genesis. It is reasonably certain that the author of that chapter regarded Ophir as the name of some city, region, or tribe in Arabia. And it is almost equally certain that the Ophir of Genesis is the Ophir of the Book of Kings. Hence the *burden of proof* lies on any one who denies Ophir to have been in Arabia. But all that can be advanced against Arabia falls very short of such proof. In weighing the evidence on this point, the assumption that ivory, peacocks, and apes were imported from Ophir must be dismissed from consideration. In one view of the subject, and accepting the statement in 2 Chr. ix. 21, they might have connexion with Tarshish; but they have a very slight bearing on the position of Ophir. Hence it is not here necessary to discuss the law of monsoons in the Indian Ocean. Moreover, the resemblance of names of places in India and Africa to Ophir, cannot reasonably be insisted on; for there is an equally great resemblance in the names of some places in Arabia. It remains to notice those objections which are based on the assertion that sandal-wood (assumed to be the same as almug-wood), precious stones, and gold, are not productions of Arabia. And the following observations tend to show that such objections are not conclusive. 1st. In the Periplus attributed to Arrian, sandal-wood is mentioned as one of the imports into Omana, an emporium on the Persian Gulf; and it is thus proved, if any proof is requisite, that a sea-port would not necessarily be in India, because sandal-wood was obtained

from it. But independently of this circumstance, the reasons advanced in favour of almug-wood being the same as sandal-wood, though admissible as a conjecture, seem too weak to justify the founding any argument on them. It was not till last century that, for the first time, the suggestion was made that almug-wood was the same as sandal-wood. This suggestion came from Celsius, the Swedish botanist, in his *Hierobotanicon*; who at the same time recounted thirteen meanings proposed by others. Since the time of Celsius, the meaning of "sandal-wood" has been defended by Sanscrit etymologies. Böhlen proposed, as a derivation for *almuggin*, the Arabic article *al*, and *micaatā*, from simple *mica*, a name for red sandal-wood. Lassen, adopting the form *algunmin*, says that if the plural ending is taken from it, there remains *valgu*, as one of the Sanscrit names for sandal-wood, which in the language of the Deccan is *valgum*. Perhaps, however, these etymologies cannot lay claim to much value until it is made probable, independently, that almug-wood is sandal-wood. 2ndly. As to precious stones, they take up such little room, and can be so easily concealed, if necessary, and conveyed from place to place, that there is no difficulty in supposing they came from Ophir, simply as from an emporium, even admitting that there were no precious stones in Arabia. 3rdly. As to gold, far too great stress seems to have been laid on the negative fact that no gold nor trace of gold-mines has been discovered in Arabia. Negative evidence of this kind, on which Ritter has placed so much reliance, is by no means conclusive. Sir Roderick Murchison and Sir Charles Lyell concur in stating that, although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there. Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers who have been already adduced as witnesses for the former existence of gold in Arabia. If, however, negative evidence is allowed to outweigh on this subject the authority of Agatharchides, Artemidorus, Diodorus Siculus, Pliny, and, it may be added, Strabo, all of whom may possibly have been mistaken, there is still nothing to prevent Ophir having been an Arabian emporium for gold. The Periplus, attributed to Arrian, gives an account of several Arabian emporia. There do not, however, appear to be sufficient data for determining in favour of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon. Mr Forster relies on an Ofor or Ofir, in Sale and D'Anville's maps, as the name of a city and district in the mountains of Omân; but he does not quote any ancient writer or modern traveller as an authority for the existence of such an Ofir. Niebuhr the traveller says that Ophir was probably the principal port of the kingdom of the Sabaeans, that it was situated between Aden and Dabar (or Zafar), and that perhaps even it was Cane. Gosselin, on the other hand, thinks it was Doffir, the city of Yemen already adverted to. Dean Vincent agrees with Gosselin in confining Ophir to Sabaea. On the whole, however, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name. In conclusion it may be observed that objections against

Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba (Ps. lxxii. 15; Ez. xxvii. 22). Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case the assertion that Arabia did not produce gold falls to the ground; or the merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews. Exactly similar remarks may apply to Ophir.

Oph'ni. A town of Benjamin, mentioned in Josh. xviii. 24 only, apparently in the north-eastern portion of the tribe. It is doubtless the Gophna of Josephus, a place which at the time of Vespasian's invasion was apparently so important as to be second only to Jerusalem (*B. J.* iii. 3, §5). It was probably the Gufnith, Gufia, or Beth-gufnith of the Talmud (Schwarz, 126), which still survives in the modern *Jifna* or *Jufna*, $2\frac{1}{2}$ miles north-west of Bethel.

Oph'rah. The name of two places in the central part of Palestine.—1. In the tribe of Benjamin (Josh. xviii. 23). It appears to be mentioned again (1 Sam. xiii. 17) in describing the routes taken by the spoilers who issued from the Philistine camp at Michmash. Jerome places it 5 miles east of Bethel. Dr. Robinson suggests its identity with *et-Taiyibeh*, a small village on the crown of a conical and very conspicuous hill, 4 miles E.N.E. of *Beitin* (Bethel). In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification.—2. More fully OPHRAH OF THE AJJ-EZRISES, the native place of Gideon (Judg. vi. 11); the scene of his exploits against Isah (ver. 24); his residence after his accession to power (ix. 5), and the place of his burial in the family sepulchre (viii. 32). The indications in the narrative of the position of Ophrah are but slight. It was probably in Manasseh (vi. 15), and not far distant from Shechem (ix. 1, 5). Van de Velde suggests a site called *Erfai*, a mile south of *Akrabeh*, about 8 miles from *Nabulus*, and Schwarz "the village Erfai, north of Samir," by which he probably intends Arabeh. The former of them has the disadvantage of being altogether out of the territory of Manasseh. Of the latter, nothing either for or against can be said.

Oph'rah. The son of Meonothai (1 Chr. iv. 14).

Orator. 1. The A. V. rendering in Is. iii. 3, for what is literally "skilful in whisper, or incantation."—2. The title applied to Tertullus, who appeared as the advocate or *patronus* of the Jewish accusers of St. Paul before Felix, Acts xxiv. 1.

Orchard. [GARDEN.]

O'reb. The "raven" or "crow," the companion of Zeeb, the "wolf." One of the chieftains of the Midianite host which invaded Israel, and was defeated and driven back by Gideon. The title given to them (A. V. "princes") distinguishes them from Zebah and Zalmunna, the other two chieftains, who are called "kings," and were evidently superior in rank to O'reb and Zeeb. They were killed not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying hordé at the fords of the Jordan. This was the second Act of this great Tragedy. It is but slightly touched upon in the narrative of Judges,

but the terms in which Isaiah refers to it (x. 26) are such as to imply that it was a truly awful slaughter. He places it in the same rank with the two most tremendous disasters recorded in the whole of the history of Israel—the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib (comp. Ps. lxxxiii.). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26).

Oreb, i. e. Mount Horeb (2 Esd. ii. 33).

Oreb, the Rock. The "raven's crag," the spot, E. of Jordan, at which the Midianite chieftain Oreb, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom. It is mentioned in Judg. vii. 25; Is. x. 26. Perhaps the place called 'Orbo, which in the *Beresith Rabbah* is stated to have been in the neighbourhood of Bethshean, may have some connexion with it.

Oren. One of the sons of Jeremiah: the first-born of Hezron (1 Chr. ii. 25).

Organ (Gen. iv. 21, Job xxi. 12, xxx. 31, Ps. cl. 4). The Hebrew word *'agab* or *'uggab*, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates. In Gen. iv. 21 it appears to be a general term for all wind-instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and organ. Our translators adopted their rendering, "organ," from the Vulgate, which has uniformly *organum*, that is, the double or multiple pipe. Joel Brill adopts the opinion of those who identify it with the Pandean pipes, or syrinx, an instrument of unquestionably ancient origin, and common in the East. Russell describes those he met with in Aleppo.

Orion. That the constellation known to the Hebrews by the name *cesil* is the same as that which the Greeks called *Orion*, and the Arabs "the giant," there seems little reason to doubt, though the ancient versions vary in their renderings (Job ix. 9, xxxviii. 31; Am. v. 8). The "giant" of Oriental astronomy was Nimrod, the mighty hunter, who was fabled to have been bound in the sky for his impiety. The two dogs and the hare, which are among the constellations in the neighbourhood of Orion, made his train complete. There is possibly an allusion to this belief in "the bands of *cesil*" (Job xxxviii. 31). Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Hebrew *cesil* with the Arabic *sohail*, by which was understood either Sirius or Canopus.

Ornaments, Personal. The number, variety, and weight of the ornaments ordinarily worn upon the person form one of the characteristic features of Oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, earrings of very great size, anklets, armlets, bracelets of the most varied character, richly ornamented necklaces, and chains of various kinds. There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. In the Old Testament, Isaiah (iii. 18-23) supplies us with a detailed description of the articles with which the luxurious women of his day were decorated, and the picture is filled up by incidental notices in other places. The notices which occur in the early books of the Bible, imply the weight and abundance of the orna-

ments worn at that period. Eliezer decorated Rebekah with "a golden *nose-ring* of half a shekel weight, and two bracelets for her hands of ten shekels weight of gold" (Gen. xxiv. 22); and he afterwards added "*trinkets* of silver and *trinkets* of gold" (verse 53). Earrings were worn by Jacob's wives, apparently as charms, for they are mentioned in connexion with idols:—"They gave unto Jacob all the strange gods, which were in their hand, and their earrings which were in their ears" (Gen. xxxv. 4). The ornaments worn by the patriarch Judah were a "*signet*," which was suspended by a string round the neck, and a "*staff*" (Gen. xxxviii. 18): the staff itself was probably ornamented. The first notice of the ring occurs in reference to Joseph: when he was made ruler of Egypt, Pharaoh took off his *signet*-ring from his hand and put it upon Joseph's hand, and put a gold chain about his neck" (Gen. xli. 42), the latter being probably a "simple gold chain in imitation of string, to which a stone scarabæus, set in the same precious metal, was appended" (Wilkinson, ii. 339). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. iii. 22. The profusion of these ornaments was such as to supply sufficient gold for making the sacred utensils for the tabernacle, while the laver of brass was constructed out of the brazen mirrors which the women carried about with them (Ex. xxxviii. 8). The Midianites appear to have been as prodigal as the Egyptians in the use of ornaments (Num. xxxi. 50, 52; Judg. viii. 26). The poetical portions of the O. T. contain numerous references to the ornaments worn by the Israelites in the time of their highest prosperity. The appearance of the bride is thus described in the book of the Canticles:—"Thy cheeks are comely with *beads*, thy neck with *perforated* (*pearls*); we will make thee *beads* of gold with studs of silver" (i. 10, 11). Her neck rising tall and stately "like the tower of David builded for an armoury," was decorated with various ornaments hanging like the "thousand bucklers, all shields of mighty men, on the walls of the armoury" (iv. 4): her hair falling gracefully over her neck is described figuratively as a "chain" (iv. 9): and "the *roundings*" (not as in the A. V. "the joints") of her thighs are likened to the *pendant* of an earring, which tapers gradually downwards (vii. 1). So again we read of the bridegroom:—"his eyes are . . . fitly set," as though they were gems filling the sockets of rings (v. 12): "his hands (are as) gold rings set with the beryl," i. e. the fingers when curved are like gold rings, and the nails dyed with henna resemble gems. Lastly, the yearning after close affection is expressed thus:—"Set me as a seal upon thine heart, as a seal upon thine arm." In reference to the terms used in the Proverbs we need only explain that the "ornament" of the A. V. in i. 9, iv. 9, is more specifically a *wreath* or *garland*; the "chains" of i. 9, the *drops* of which the necklace was formed; the "jewel of gold in a swine's snout" of xi. 22, a *nose-ring*; the "jewel" of xx. 15, a *trinket*, and the "ornament" of xxv. 12, an *ear-pendant*. The passage of Isaiah (iii. 18-23), to which we have already referred, may be rendered as follows:—(18) "In that day the Lord will take away the bravery of their *anklets* and their *lace coaps*, and their *necklaces*; (19) the *ear-pendants*, and the *bracelets*, and the *light veils*; (20) the *turbans*, and the *step-chains*, and the *girdles*, and the *scot-bottles*, and

the amulets; (21) the rings and nose-rings; (22) the state-dresses and the cloaks, and the shawls, and the purses; (23) the mirrors, and the fine linen shirts, and the turbans, and the light dresses."

Or'nan. The form in which the name of the Jebusite king, who in the older record of the Book of Samuel is called Araunah, Aranyah, Ha-avannah, or Ilanah, is given in Chronicles (1 Chr. xxi. 15, 18, 20-25, 28; 2 Chr. iii. 1).

Or'pah. A Moabite woman, wife of Chilion son of Naomi, and thereby sister-in-law to RUTH. On the death of their husbands Orpah accompanied her sister-in-law and her mother-in-law on the road to Bethlehem. But here her resolution failed her. "Orpah kissed her mother-in-law," and went back "to her people and to her gods" (Ruth i. 4, 14).

Orthosias. Tryphon, when besieged by Antiochus Sidetes in Dora, fled by ship to Orthosias (1 Macc. xv. 37). Orthosia is described by Pliny (v. 17) as north of Tripolis, and south of the river Eleutherus, near which it was situated (Strabo xvi. p. 753). It was the northern boundary of Phoenice, and distant 1130 stadia from the Orontes (id. p. 760). Shaw identifies the Eleutherus with the modern Nahr el-Bâid, on the north bank of which, corresponding to the description of Strabo, he found "ruins of a considerable city, whose adjacent district pays yearly to the Dashaws of Tripoly a tax of fifty dollars by the name of *Or-tosa*." On the other hand, Mr. Porter, who identifies the Eleutherus with the modern Nahr el-Kebir, describes the ruins of Orthosia as on the south bank of the Nahr el-Bârid, "the cold river," thus agreeing with the accounts of Ptolemy and Pliny.

Osa'ias. A corruption of JESHAIAH (1 Esd. viii. 48).

Ose'a. HOSHEA king of Israel (2 Esd. xiii. 40).

Ose'as. The prophet Hosea (2 Esd. i. 39).

Osho'a. The original name of Joshua the son of Nun (Num. xiii. 8), which on some occasion not stated received from Moses (ver. 16) the addition of the great name of Jehovah.

Ospray (Heb. *ozniyyâh*: ἁλῖαετος: *haliaetus*). The Hebrew word occurs only in Lev. xi. 13, and Deut. xiv. 12, as the name of some unclean bird which the law of Moses disallowed as food to the Israelites. The old versions and many commentators are in favour of this interpretation. There is, however, some difficulty in identifying the *haliaetus* of Aristotle and Pliny, on account of some statements these writers make with respect to the habits of this bird. The general description they give would suit either the ospray (*Pandion haliaetus*)

Pandion haliaetus.

OSTRICH

or the white-tailed eagle (*Haliaeetus albicollis*). But Pliny's description (x. 3) points to the ospray. The ospray often plunges entirely under the water in pursuit of fish. It belongs to the family *Falconidae*, order *Raptatores*. It has a wide geographical range, and is occasionally seen in Egypt.

Ossifrage (Heb. *peres*: γρύψ: *gryps*). There is much to be said in favour of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and in the parallel passage of Deut. xiv. 12. If much weight is to be allowed to etymology, the *peres* of the Hebrew Scriptures may well be represented by the ossifrage, or bone-breaker; for *peres* in Hebrew means "the breaker." And the ossifrage (*Gypaetus barbatus*)

Gypaetus barbatus.

is well deserving of his name. The *Lammergeyer*, or bearded vulture, as it is sometimes called, is one of the largest of the birds of prey. It is not uncommon in the East. The English word ossifrage has been applied to some of the *Falconidae*; but the *ossifraga* of the Latins evidently points to the *Lammergeyer*, one of the *Vulturidae*.

Ostrich. There can be no doubt that the Hebrew words *bath haya'anâh*, *yâ'en*, and *rânân*, denote this bird of the desert.—1. *Bath haya'anâh* occurs in Lev. xi. 16, Deut. xiv. 15, in the list of unclean birds; and in other passages of Scripture. The A. V. erroneously renders the Hebrew expression, which signifies either "daughter of greediness" or "daughter of shouting," by "owl," or, as in the margin, by "daughter of owl." In Job xxx. 29, Is. xxxiv. 13, and xliii. 20, the margin of the A. V. correctly reads "ostriches." Bochart considers that *bath haya'anâh* denotes the female ostrich only, and that *tachmâs*, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. The loud crying of the ostrich seems to be referred to in Mic. i. 8.—2. *Yâ'en* occurs only in the plural number, *ye'enân*,

in Lam. iv. 3, where the context shows that the ostrich is intended.—3. *Rānān*. The plural form *rendānīm* alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (13-18) that ostriches are intended by the word. The A. V. renders *rendānīm* by "peacocks," a translation which has not found favour with commentators; as "peacocks," for which there is a different Hebrew name, were probably not known to the people of Arabia or Syria before the time of Solomon. The "ostrich" of the A. V. in Job xxxix. 13 is the representative of the Hebrew *nōtseh*, "feathers." The following short account of the nidification of the ostrich (*Struthio camelus*) will perhaps elucidate those passages of Scripture which ascribe cruelty to this bird in neglecting her eggs or young. Ostriches are polygamous: the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found within the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during the night. But in those countries

which have not a tropical sun ostriches frequently incubate during the day, the male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller *carnivora* are occasionally found dead near the nest, having been killed by the ostrich in defence of the eggs or young. The habit of the ostrich leaving its eggs to be matured by the sun's heat is usually appealed to in order to confirm the Scriptural account, "she leaveth her eggs to the earth;" but this is probably the case only with the tropical birds. And even if the Hebrews were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the eggs, when they are covered a foot deep or more in sand? We believe the true explanation of this passage is to be found in the fact that the ostrich deposits some of her eggs not in the nest, but around it; these lie about on the surface of the sand, to all appearance forsaken; they are, however, designed for the nourishment of the young birds. And this remark will hold good in the passage of Job which speaks of the ostrich being without understanding. It is a general belief amongst the Arabs that the ostrich is a very stupid bird: indeed they have a proverb, "Stupid as an ostrich." But it by no means deserves such a character, as travellers have frequently testified. "So wary is the bird," says Mr. Tristram, "and so open are the vast plains over which it roams, that no ambuscades or artifices can be employed, and the vulgar resource of dogged perseverance is the only mode of pursuit." The ostrich is the largest of all known birds, and perhaps the swiftest of all cursorial animals. The feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the west coast of Africa. The ostrich belongs to the family *Struthionidae*, order *Cursores*.

Oth'ni. Son of Shemaiah, the firstborn of Obed-edom (1 Chr. xxvi. 7).

Othniel. Son of Kenaz, and younger brother of Caleb, Josh. xv. 17; Judg. i. 13, iii. 9; 1 Chr. iv. 13. But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Kenezites (Num. xxxii. 12, &c.), or sons of Kenaz. If Jephunneh was Caleb's father, then probably he was father of Othniel also. The first mention of Othniel is on occasion of the taking of Kirjath-Sepher, or Debir, as it was afterwards called. Debir was included in the mountainous territory near Hebron, within the border of Judah, assigned to Caleb the Kenezite (Josh. xiv. 12-14); and in order to stimulate the valour of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize. The next mention of him is in Judg. iii. 9, where he appears as the first judge of Israel after the death of Joshua, and their deliverer from the oppression of Chushan-Rishathaim. This with his genealogy, 1 Chr. iv. 13, 14, which assigns him a son, Hathuth, is all that we know of Othniel. But two questions of some interest arise concerning him; the one his exact relationship to Caleb, the other the time and duration of his judgeship.—(1) As regards his relationship to Caleb, the doubt arises from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz, was the brother of Caleb. The most natural rendering makes Othniel to be Caleb's brother. And this is favoured by the probability that Kenaz was not Othniel's father, but the father and head of the tribe.—(2) And this leads to the second question suggested above, viz. the time of Othniel's judgeship. Supposing Caleb to be about the same age as Joshua, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years (85+25=110). And if we take Africanus's allowance of 30 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chushan-Rishathaim's dominion, and 40 years of rest under Othniel's judgeship, and suppose Othniel to have been 40 years old at his marriage, we obtain (40+25+30+8+40=) 143 years as Othniel's age at his death. This we are quite sure cannot be right. Nor does any escape from the difficulty very readily offer itself. If we judge only by ordinary probabilities, we shall sup-

pose Othniel to have survived Joshua not more than 20, or at the outside, 30 years.

Othoni'as. MATTANIAH in Ezer. x. 27 (1 Esd. ix. 28).

Oven. The Eastern oven is of two kinds—fixed and portable. The former is found only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew term *tannûr*. It consists of a large jar made of clay, about three feet high, and widening towards the bottom, with a hole for the extraction of the ashes. Each household possessed such an article (Ex. viii. 3); and it was only in times of extreme dearth

Egyptian Oven

that the same oven sufficed for several families (Lev. xxvi. 26). It was heated with dry twigs and grass (Matt. vi. 30); and the loaves were placed both inside and outside of it.

Owl, the representative in the A. V. of the Hebrew words both *kay'a'ânâh*, *yanshûph*, *côs*, *kippôz*, and *kîlîth*. 1. *Buth kay'a'ânâh*. [OSTRICH].—2. *Yanshûph*, or *yanshûph*, occurs in Lev. xi. 17, Deut. xiv. 16, as the name of some unclean bird, and in Is. xxxiv. 11, in the description of desolate Edom, "the *yanshûph* and the raven shall dwell in it." The A. V. translates *yanshûph* by "owl" or "great owl." The Chaldee and Syriac are in favour of some kind of owl; and perhaps the etymology of

Ibis religiosa.

the word points to a nocturnal bird. The LXX. and Vulg. read *Ibis (ibis)*, i. e. the *Ibis religiosa*, the sacred bird of Egypt. On the whole the evidence is inconclusive, though it is in favour of the *Ibis religiosa*, and probably the other Egyptian species (*I. falcinellus*) may be included under the

term.—3. *Côs*, the name of an unclean bird (Lev. xi. 17; Deut. xiv. 16); it occurs again in Ps. cii. 6. There is good reason for believing that the A. V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases are in favour of some species of "owl" as the proper translation of *Côs*; Bochart is inclined to think that we should understand the pelican. But the ancient versions are against this theory. The passage in Ps. cii. 6 points decidedly to some kind of owl. The owl we figure is the *Otus ascalaphus*, the Egyptian

Otus ascalaphus.

and Asiatic representative of our great horned owl (*Bubo maximus*).—4. *Kippôz* occurs only in Is. xxxiv. 15: "There (*i. e.* in Edom) the *kippôz* shall make her nest, and lay and hatch and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulg. give "hedgehog." Various conjectures have been made with respect to the bird which ought to represent the Hebrew word. We cannot think with Bochart that a darting serpent is intended, for the whole context (Is. xxxiv. 15) seems to point to some *bird*. We are content to believe that *kippôz* may denote some species of owl, and to retain the reading of the A. V. till other evidence be forthcoming. The woodcut represents the *Athene*

Athene meridionalis.

maridionalis, the commonest owl in Palestine.—5. *Nitth*. The A. V. renders this word by "screech owl" in the text of Is. xxx. 14, and by "night-monster" in the margin. According to the Rabbins the *Nitth* was a nocturnal spectre in the form of a beautiful woman that carried off children at night and destroyed them. With the *Nitth* may be compared the *ghule* of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. If, however, some animal be denoted by the Hebrew term, the screech-owl (*Strix flammea*) may well be supposed to represent it, for this bird is found in the Bible lands (see *Ibis*, i. 26, 46), and is, as is well known, a frequent inhabitant of ruined places.

Ox, an ancestor of Judith (Jud. vii. 1).

Ox, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. We propose in this article to give a general review of what relates to the ox tribe (*Bovidae*), so far as the subject has a Biblical interest. It will be convenient to consider (1) the ox in an economic point of view, and (2) its natural history.—(1.) There was no animal in the rural economy of the Israelites, or indeed in that of the ancient Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose patient labours depended all the ordinary operations of farming. Oxen were used for ploughing (Deut. xxii. 10; 1 Sam. xiv. 14, &c.); for treading out corn (Deut. xxv. 4; Hos. x. 11, &c.); for draught purposes, when they were generally yoked in pairs (Num. vii. 3; 1 Sam. vi. 7, &c.); as beasts of burden (1 Chr. xii. 40); their flesh was eaten (Deut. xiv. 4; 1 K. i. 9, &c.); they were used in the sacrifices; they supplied milk, butter, &c. (Deut. xxxii. 14; Is. vii. 22; 2 Sam. xvii. 29). Connected with the importance of oxen in the rural economy of the Jews is the strict code of laws which was mercifully enacted by God for their protection and preservation. The ox that threshed the corn was by no means to be muzzled; he was to enjoy rest on the Sabbath as well as his master (Ex. xxiii. 12; Deut. v. 14). The law which prohibited the slaughter of any clean animal, excepting, as "an offering unto the Lord before the tabernacle," during the time that the Israelites abode in the wilderness (Lev. xvii. 1-6), no doubt contributed to the preservation of their oxen and sheep. It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed, though as a general rule it is probable that they fed in the plains or on the hills of Palestine. The cattle that grazed at large in the open country would no doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence the force of the Psalmist's complaint of his enemies (Ps. xxii. 13).—(2.) The monuments of Egypt exhibit representations of a long-horned breed of oxen, a short-horned, a polled, and what appears to be a variety of the zebu (*Bos Indicus*, Lin.). Some have identified this latter with the *Bos Dante* (the *Bos elegans et parvus Africanus* of Belon). The Abyssinian breed is depicted on the monuments at Thebes drawing a *plaustrum* or car. The drawings on Egyptian monuments show that the cattle of ancient Egypt were fine handsome animals: doubtless these may be taken as a sample of the cattle of Palestine in ancient times. There are now fine cattle in

Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herds of cattle," says Schubert, "are seldom to be seen; the bullock of the neighbourhood of Jerusalem is small and insignificant; beef and veal are but rare dainties." The buffalo (*Bubalus Bubalus*) is not uncommon in Palestine; the Arabs call it *jâmâs*. The A. V. gives "wild ox" in Deut. xiv. 5, and "wild bull" in Is. li. 20, as the representatives of the Hebrew word *teb* or *tô*. The most important ancient versions point to the oryx (*Oryx leucoryx*) as the animal denoted by the Hebrew words. Col. H. Smith suggests that the antelope he calls the Nubian Oryx (*Oryx Tio*), may be the animal indicated.

Ox-Goad. [**GOAD**.]

O'zem. 1. The sixth son of Jesse, the next eldest above David (1 Chr. ii. 15).—2. Son of Jerahmeel (1 Chr. ii. 25).

Ozi'as. 1. The son of Micha of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jud. vi. 15, vii. 23, viii. 10, 28, 35). 2. Uzzi, one of the ancestors of Ezra (2 Esd. ii. 2).—3. UZZIAH, King of Judah (Matt. i. 8, 9).

O'ziel, an ancestor of Judith (Jud. viii. 1).

Oz'ni. One of the sons of Gad (Num. xxvi. 16), and founder of the family of the

Oz'nites, Num. xxvi. 16.

Ozora. "The sons of Machnadebai," in Ezr. x. 40, is corrupted into "the sons of Ozora" (1 Esd. ix. 34).

Pa'arai. In the list of 2 Sam. xxiii. 35, "Pa'arai the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "Naarai the son of Ezbai," and this in Kennicott's opinion is the true reading.

Pa'dan. Padan-Aram (Gen. xlviii. 7).

Pa'dan-Aram. By this name, more properly *Paddan-Aram*, which signifies "the table-land of Aram," according to Fürst and Gesenius, the Hebrews designated the tract of country which they otherwise called Aram-naharaim, "Aram of the two rivers," the Greek Mesopotamia (Gen. xxiv. 10), and "the field (A. V. 'country') of Aram" (Hos. xii. 13). The term was perhaps more especially applied to that portion which bordered on the Euphrates, to distinguish it from the mountainous districts in the N. and N.E. of Mesopotamia. If the derivation from Ar. *fakla*, to plough, be correct, *Paddan-Aram* is the arable land of Syria; "either an upland vale in the hills, or a fertile district immediately at their feet" (Stanley, *S. & P.* p. 129, note). *Paddan*, the ploughed land, would thus correspond with the Lat. *arvum*, and is analogous to Eng. *field*, the *felled* land, from which the trees have been cleared. *Padan-Aram* plays an important part in the early history of the Hebrews. The family of their founder had settled there, and were long looked upon as the aristocracy of the race, with whom alone the legitimate descendants of Abraham might intermarry, and thus preserve the purity of their blood. It is elsewhere called PADAN simply (Gen. xlviii. 7).

Pa'don. The ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 44; Neh. vii. 47).

Pagiel. The son of Oorn, and chief of the tribe of Asher at the time of the Exodus (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

Pahath-Moab. Head of one of the chief houses of the tribe of Judah. Of the individual, or the occasion of his receiving so singular a name, nothing is known certainly. But as we read in 1 Chr. iv. 22, of a family of Shilonites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name. It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-Moab had among their number "children of Jeab," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 54, iv. 14, we find the house of Jeab. However, as regards the name Pahath-Moab, this early and obscure connexion of the families of Shelah the son of Judah with Moab seems to supply a not improbable origin for the name itself, and to throw some glimmering upon the association of the children of Joshua and Jeab with the sons of Pahath-Moab. That this family was of high rank in the tribe of Judah we learn from their appearing *fourth* in order in the two lists, Ezr. ii. 6; Neh. vii. 11, and from their chief having signed *second*, among the lay princes, in Neh. x. 14. It was also the most numerous (2818) of all the families specified, except the Benjamite house of Seneah (Neh. vii. 38).

Paint [as a cosmetic]. The use of cosmetic dyes has prevailed in all ages in Eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 342) and in Assyria (Layard's *Nineveh*, ii. 328); and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezebel "put her eyes in painting" (2 K. ix. 30, margin); Jeremiah says of the harlot city, "Though thou rentest thy eyes with painting" (Jer. iv. 30); and Ezekiel again makes it a characteristic of a harlot (Ez. xlii. 40). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (*Travels*, ii. 140): "A girl, closing one of her eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a bodkin which had been immersed in the soot, and extracting it again, the particles before adhering to it remained within, and were presently ranged round the organ." The eyes were thus literally "put in paint," and were "rent" open in the process. A broad line was also drawn round the eye, as represented in the accompanying cut,

"Eye ornamented with Kohl, as represented in ancient paintings." (Lane, p. 37, new ed.)

The effect was an apparent enlargement of the eye; and the expression in Jer. iv. 30 has been by some understood in this sense. The term used for the application of the dye was *kākhā*, "to smear," and Rabbinical writers described the paint itself under a cognate term. These words still survive in *kohl*,

the modern Oriental name for the powder used. The Bible gives no indication of the substance out of which the dye was formed. The old versions (the LXX., Chaldee, Syriac, &c.) agree in pronouncing the dye to have been produced from antimony. Antimony is still used for the purpose in Arabia and in Persia, but in Egypt the *kohl* is a soot produced by burning either a kind of frankincense or the shells of almonds. The dye-stuff was moistened with oil, and kept in a small jar, which we may infer to have been made of horn, from the proper name, Keren-happuch, "horn for paint" (Job xlii. 14). Whether the custom of staining the hands and feet, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. The plant, *henna*, which is used for that purpose, was certainly known (Cant. i. 14; A. V. "camphire"), and the expressions in Cant. v. 14 may possibly refer to the custom.

Pal. [PAU.]

Palace. There are few tasks more difficult or puzzling than the attempt to restore an ancient building of which we possess nothing but two verbal descriptions; and these difficulties are very much enhanced when one account is written in a language like Hebrew, the scientific terms in which are, from our ignorance, capable of the widest latitude of interpretation; and the other, though written in a language of which we have a more definite knowledge, was composed by a person who never could have seen the buildings he was describing. The site of the Palace of Solomon was almost certainly in the city itself, on the brow opposite to the Temple, and overlooking it and the whole city of David. It is impossible, of course, to be at all certain what was either the form or the exact disposition of such a palace, but, as we have the dimensions of the three principal buildings given in the book of Kings, and confirmed by Josephus, we may, by taking these as a scale, ascertain pretty nearly that the building covered somewhere about 150,000 or 160,000 square feet. Whether it was a square of 400 feet each way, or an oblong of about 550 feet by 300, as represented in the annexed diagram, must always be more or less a matter of conjecture. The form here adopted seems to suit better not only the exigencies of the site, but the known disposition of the parts. The principal building situated within the Palace was, as in all Eastern palaces, the great hall of state and audience, here called the "House of the Forest of Lebanon." Its dimensions were 100 cubits, or 150 feet long, by half that, or 75 feet in width. According to the Bible (1 K. vii. 2) it had "four rows of cedar pillars with cedar beams upon the pillars;" but it is added in the next verse that "it was covered with cedar above the beams that lay on 45 pillars, 15 in a row." This would be easily explicable if the description stopped there, and so Josephus took it. He evidently considered the hall, as he afterwards described the Stoa basilica of the Temple, as consisting of four rows of columns, three standing free, but the fourth built into the outer wall (*Ant.* xi. 5); and his expression that the ceiling of the palace hall was in the Corinthian manner (*Ant.* vii. 5, §2) does not mean that it was of that order, which was not then invented, but after the fashion of what was called in his day a Corinthian oecus, viz. a hall with a clerestory. If we, like Josephus, are contented with these indications, the section of the hall was

certainly as shown in fig. A (p. 666). But the Bible goes on to say (ver. 4) that "there were windows in three rows, and light was against light in three ranks," and in the next verse it repeats, "and light was against light in three ranks."

The difficulty by saying it was lighted by windows in three divisions, which might be taken as an extremely probable description if the Bible were not

so very specific regarding it; and we must therefore adopt some such arrangement as that shown in fig. B. On the whole it appears probable that this is the one nearest the truth, as it admits of a clerestory, to which Josephus evidently refers, and shows the three rows of columns which the Bible description requires. Besides the clerestory there was probably a range of openings under the cornice of the walls, and then a range of open doorways, which would thus make the three openings required by the Bible description. Another difficulty in attempting to restore this hall arises from the number of pillars being uneven ("15 in a row"); and if we adopt the last theory (fig. B), we have a row of columns in the centre both ways. The probability is that it was closed, as shown in the plan, by a wall at one end, which would give 15 spaces to the 15 pillars, and so provide a central space in the longer dimension of the hall in which the throne might have been placed. If the first theory be adopted, the throne may have stood either at the end, or in the centre of the longer side; but, judging from what we know of the arrangement of Eastern palaces, we may be almost certain that the latter is the correct position. Next in importance to the building just described is the hall or porch of judgment (ver. 7), which Josephus distinctly tells us (*Ant.*

facing the judgment-seat; a second from the courtyard of the Palace, by which the councillors and officers of state might come in; and a third from the Palace, reserved for the king and his household, as shown in the plan. The third edifice is merely called "the Porch." Its dimensions were 50 by 30 cubits, or 75 feet by 45. Josephus does not describe its architecture; and we are unable to understand the

Fig. 1. Diagram Plan of Solomon's Palace.

opposite to the centre of the longer side of the great hall. Its dimensions were 50 cubits, or 75 feet square (Josephus says 30 in one direction at least), and its disposition can easily be understood by comparing the descriptions we have with the remains of the Assyrian and Persian examples. It must have been supported by four pillars in the centre, and had three entrances: the principal opening from the street and

description contained in the Bible, owing apparently to our ignorance of the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of business of the palace, and the reception-room—the Guesten Hall—where the king received ordinary visitors, and sat, except on great state

occasions, to transact the business of the kingdom. Behind this, we are told, was the inner court, adorned with gardens and fountains, and surrounded by cloisters for shade; and besides this were other courts for the residence of the attendants and guards, and in Solomon's case, for the three hundred women of his harem: all of which are shown in the plan with more clearness than can be conveyed by a verbal description. Apart from this palace, but attached, as Josephus tells us, to the Hall of Judgment, was the palace of Pharaoh's daughter—too proud and important a personage to be grouped with the ladies of the harem, and requiring a residence of her own. There is still

another building mentioned by Josephus, as a *mos* or temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court. It could not have been a temple in the ordinary acceptation of the term, as the Jews had only one temple, and that was situated on the other side of the valley; but it may have been an altar covered by a baldachino. If the site and disposition of the Palace were as above indicated, it would require two great portals: one leading from the city to the great court, shown at M; the other to the Temple and the king's

Fig. 2. Diagram Sections of the House of Cedars of Lebanon.

garden, at N. This last was probably situated where the stairs then were which led up to the City of David, and where the bridge afterwards joined the Temple to the city and palace. The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which before they were made were nearly wholly inexplicable. We are told, for instance, that the walls of the halls of the palace were wainscotted with three tiers of stone, apparently varicoloured marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of leafage and flowers. Above this the walls were plastered and ornamented with coloured arabesques. At Nineveh the walls were, like these, wainscotted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band; the real difference being that the Assyrians revelled in sculptural representations of men and animals. These modes of decoration were forbidden to the Jews by the second commandment. Some difference may also be due to the fact that the soft alabaster, though admirably suited to bassi-relievi, was not suited for sharp deeply-cut foliage sculpture, like that described by Josephus. It is probable, however, that a considerable amount of colour was used in the decoration of these palaces (Jer. xxii. 14). It may also be added that in the East all buildings, with scarcely an exception, are adorned with colour internally, generally the three primitive colours used in all their intensity, but so balanced as to produce the most harmonious results.

Palal, the son of Uzai, who assisted in restoring the walls of Jerusalem in the time of Nehemiah (Neh. iii. 25).

Palestina and **Palestine**. These two forms occur in the A. V. but four times in all, always in poetical passages: the first in Ex. xv. 14, and Is. liv. 29, 31; the second, Joel iii. 4. In each case

the Hebrew is *Polesheth*, a word found, besides the above, only in Ps. lx. 8, lxxxiii. 7, lxxxvii. 4, and cviii. 9, in all which our translators have rendered it by "Philistia" or "Philistines." Palestine, in the Authorized Version, really means nothing but Philistia. The original Hebrew word *Polesheth*, to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbours; nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high road from Egypt to Phœnicia and the richer regions north of it, the Philistine plain became sooner known to the western world than the country further inland, and was called by them Syria Palestina—Philistene Syria. From thence it was gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it becomes the usual appellation for the whole country of the Jews, both west and east of Jordan. The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of THE HOLY LAND, embracing those points which have not been treated under the separate headings of cities or tribes. This description will most conveniently divide itself into three sections:—I. The Names applied to the country of Israel in the Bible and elsewhere. II. The Land: its situation, aspect, climate, physical characteristics, in connexion with its history; its structure, botany, and natural history. III. The History of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here.

I. **THE NAMES.**—PALESTINE, then, is designated in the Bible by more than one name:—1. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as Ps. cv. 11),

it is spoken of as "Canaan," or more frequently "the Land of Canaan," meaning thereby the country west of the Jordan, as opposed to "the Land of Gilead" on the east. Other designations, during the same early period, are "the land of the Hebrews" (Gen. xl. 15 only—a natural phrase in the mouth of Joseph); "the land of the Hittites" (Josh. i. 4—a remarkable expression, occurring here only in the Bible). The name *Tu-neir* (i. e. Holy Land), which is found in the inscriptions of Rameses II. and Thothmes III., is believed by M. Brugsch to refer to Palestine; but this is contested by M. de Rougé. 2. During the Monarchy the name usually, though not frequently, employed, is "land of Israel" (1 Sam. xiii. 19; 2 K. v. 2, 4, &c.). It is Ezekiel's favourite expression. The pious and loyal aspirations of Hosea find vent in the expression, "land of Jehovah" (Hos. ix. 3). In Zechariah it is "the Holy land" (Zech. ii. 12); and in Daniel "the glorious land" (Dan. xi. 41). In Amos (ii. 10) alone it is "the land of the Amorite." Occasionally it appears to be mentioned simply as "The Land:" as in Ruth i. 1; Jer. xxii. 27; 1 Macc. xiv. 4; Luke iv. 25, and perhaps even xxiii. 44. 3. Between the Captivity and the time of our Lord the name "Judæa" had extended itself from the southern portion to the whole of the country, even that beyond Jordan (Matt. xix. 1; Mark x. 1). In the book of Judith it is applied to the portion between the plain of Esdraelon and Samaria (xi. 19), as it is in Luke xxiii. 5; though it is also used in the stricter sense of Judæa proper (John iv. 3, vii. 1). In this narrower sense it is employed throughout 1 Macc. (see especially ix. 50, x. 30, 38, xi. 34). 4. The Roman division of the country hardly coincided with the Biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. 5. Soon after the Christian era we find the name *Palaestina* in possession of the country. Ptolemy (A.D. 161) thus applies it. 6. Josephus usually employs the ancient name "Canaan" in reference to the events of the earlier history, but when speaking of the country in reference to his own time styles it Judæa. The Talmudists and other Jewish writers use the title of the "Land of Israel." 7. The name most frequently used throughout the middle ages, and down to our own time, is *Terra Sancta*—the Holy Land.

II. THE LAND.—The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is but a strip of country about the size of Wales, less than 140 miles in length, and barely 40 in average breadth, on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand, and the enormous trench of the Jordan valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the north it is shut in by the high ranges of Lebanon and anti-Lebanon, and by the chasm of the Litány. On the south it is no less enclosed by the arid and inhospitable deserts of the upper part of the peninsula of Sinai. 1. Its position on the Map of the World—as the world was when the Holy Land first made its appearance in history—is a remarkable one. (1.) It is on the very outpost—on the extreme western edge of the East. On the shore of the Mediterranean it stands, as if it had advanced as far as possible, towards the West, separated there-

from by that which, when the time arrived, proved to be no barrier, but the readiest medium of communication—the wide waters of the "Great Sea." Thus it was open to all the gradual influences of the rising communities of the West, while it was saved from the retrogression and decrepitude which have ultimately been the doom of all purely Eastern States whose connexions were limited to the East only. (2.) There was however one channel, and but one, by which it could reach and be reached by the great Oriental empires. The only road by which the two great rivals of the ancient world could approach one another—by which alone Egypt could get to Assyria, and Assyria to Egypt—lay along the broad flat strip of coast which formed the maritime portion of the Holy Land, and thence by the Plain of the Lebanon to the Euphrates. (3.) After this the Holy Land became (like the Netherlands in Europe) the convenient arena on which in successive ages the hostile powers who contended for the empire of the East, fought their battles. 2. It is essentially a mountainous country. Not that it contains independent mountain chains, as in Greece for example, but that every part of the highland is in greater or less undulation. But it is not only a mountainous country. The mass of hills which occupies the centre of the country is bordered or framed on both sides, east and west, by a broad belt of lowland, sunk deep below its own level. The slopes or cliffs which form, as it were, the retaining walls of this depression, are furrowed and cleft by the torrent beds which discharge the waters of the hills, and form the means of communication between the upper and lower level. On the west this lowland interposes between the mountains and the sea, and is the Plain of Philistia and of Sharon. On the east it is the broad bottom of the Jordan valley, deep down in which rushes the one river of Palestine to its grave in the Dead Sea. 3. Such is the first general impression of the physiognomy of the Holy Land. It is a physiognomy compounded of the three main features already named—the plains, the highland hills, and the torrent beds. About halfway up the coast the maritime plain is suddenly interrupted by a long ridge thrown out from the central mass, rising considerably above the general level, and terminating in a bold promontory on the very edge of the Mediterranean. This ridge is Mount Carmel. On its upper side, the plain, as if to compensate for its temporary displacement, invades the centre of the country and forms an undulating hollow right across it from the Mediterranean to the Jordan valley. This central lowland, which divides with its broad depression the mountains of Ephraim from the mountains of Galilee, is the plain of Esdraelon or Jezreel, the great battle-field of Palestine. North of Carmel the lowland resumes its position by the sea-side till it is again interrupted and finally put an end to by the northern mountains which push their way out to the sea, ending in the white promontory of the *Ras Nakhâra*. Above this is the ancient Phœnicia. 4. The country thus roughly portrayed, and which, as before stated, is less than 140 miles in length, and not more than 40 in average breadth, is to all intents and purposes the whole Land of Israel. The northern portion is Galilee; the centre, Samaria; the south, Judæa. 5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous ancient empires of Egypt and

Map of Palestine, with section of the country from Jaffa to the mountains of Moab .

Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. There are numerous eminences in the highlands which command the view of both frontiers at the same time—the eastern mountains of Gilead with the Jordan at their feet on the one hand, on the other the Western Sea. Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough from many a point nearer the centre. It is startling to find that from the top of the hills of Neby Samwil, Bethel, Tabor, Gerizim, or Safed, the eye can embrace at one glance, and almost without turning the head, such opposite points as the Lake of Galilee and the Bay of Akka, the farthest mountains of the Hauran and the long ridge of Carmel, the ravine of the Jabbok, or the green windings of Jordan, and the sand-hills of Jaffa. 6. The highland district, thus surrounded and intersected by its broad lowland plains, preserves from north to south a remarkably even and horizontal profile. Its average height may be taken as 1500 to 1800 feet above the Mediterranean. It can hardly be denominated a plateau, yet so evenly is the general level preserved, and so thickly do the hills stand behind and between one another, that, when seen from the coast or the western part of the maritime plain, it has quite the appearance of a wall. This general monotony of profile is, however, accentuated at intervals by certain centres of elevation. Between these elevated points runs the watershed of the country, sending off on either hand—to the Jordan valley on the east and the Mediterranean on the west—the long tortuous arms of its many torrent beds. 7. The valleys on the two sides of the watershed differ considerably in character. Those on the east are extremely steep and rugged. This is the case during the whole length of the southern and middle portions of the country. It is only when the junction between the Plain of Esdraelon and the Jordan Valley is reached, that the slopes become gradual and the ground fit for the manoeuvres of anything but detached bodies of foot soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim, from the Jordan Valley, must have climbed one or other of them. 8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and therefore the fall less, while at the same time the distance to be traversed is much greater. Here again the valleys are the only means of communication between the lowland and the highland. From Jaffa and the central part of the plain there are two of these roads “going up to Jerusalem”: the one to the right by *Ramleh* and the *Wady Aly*; the other to the left by Lydda, and thence by the Bethhorons, or the *Wady Suleiman*, and Gibeon. The former of these is modern, but the latter is the scene of many a famous incident in the ancient history. 9. Further south, the communications between the mountains of Judah and the lowland of Philistia are hitherto comparatively unexplored. They were doubtless the scene of many a foray and repulse during the lifetime of Samson and the struggles of the Danites, but there is no record of their having been used for the passage of any important force either in ancient or modern times. North of Jaffa the passes are few. These western

valleys, though easier than those on the eastern side, are of such a nature as to present great difficulties to the passage of any large force encumbered by baggage. In fact these mountain passes really formed the security of Israel. The armies of Egypt and Assyria, as they traced and retraced their path between Pelusium and Carchemish, must have looked at the long wall of heights which closed in the broad level roadway they were pursuing, as belonging to a country with which they had no concern. It was to them a natural mountain fastness, the approach to which was beset with difficulties, while its bare and soilless hills were hardly worth the trouble of conquering, in comparison with the rich green plains of the Euphrates and the Nile, or even with the boundless cornfield through which they were marching. In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then the battlefield of the country, which had originally been Esdraelon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. 10. When the highlands of the country are more closely examined, a considerable difference will be found to exist in the natural condition and appearance of their different portions. The south, as being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dryness (*Negeb*). This was THE SOUTH country. As the traveller advances north of this tract there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or uninviting in its aspect, than a great part of the highlands of Judah and Benjamin during the largest portion of the year. The spring covers even those bald grey rocks with verdure and colour, and fills the ravines with torrents of rushing water; but in summer and autumn the look of the country from Hebron up to Bethel is very dreary and desolate. Rounded hills of moderate height fill up the view on every side, their coarse grey stone continually discovering itself through the thin coating of soil. The valleys of denudation which divide these monotonous hills are also planted with figs or olives, but oftener cultivated with corn or *dourra*, the long reedlike stalks of which remain on the stony ground till the next seed-time, and give a singularly dry and slovenly look to the fields. The general absence of fences in the valleys does not render them less desolate to an English eye; and where a fence is now and then encountered, it is either a stone wall trodden down and dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. Even the grey villages—always on the top or near the top of the hills—do but add to the dreariness of the scene by the forlorn look which their flat roofs and absence of windows present to a European eye, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax. To the west and north-west of the highlands, where the sea-breezes are felt, there is considerably more vegetation. 11. Hitherto we have spoken of the central and northern portions of Judea. Its eastern portion—a tract some 9 or 10 miles in width by about 35 in length—which intervenes between the centre and the abrupt descent to the Dead Sea, is far more

wild and desolate, and that not for a portion of the year only, but throughout it. This must have been always what it is now—an uninhabited desert, because uninhabitable. 12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns, characteristic of all limestone districts, but here existing in astonishing numbers. Every hill and ravine is pierced with them, some very large and of curious formation—perhaps partly natural, partly artificial—others mere grottos. Many of them are connected with most important and interesting events of the ancient history of the country. Especially is this true of the district now under consideration. 13. The bareness and dryness which prevail more or less in Judaea are owing partly to the absence of wood, partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. 14. But to this discouraging aspect there are happily some important exceptions. The valley of *Urdâs*, south of Bethlehem, contains springs which in abundance and excellence rival even those of *Nabhus*; the huge “Pools of Solomon” are enough to supply a district for many miles round them; and the cultivation now going on in that neighbourhood shows what might be done with a soil which requires only irrigation and a moderate amount of labour to evoke a boundless produce. 15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the teeming population indicated in the Bible, the condition and aspect of the country must have been very different. Of this there are not wanting sure evidences. There is no country in which the ruined towns bear so large a proportion to those still existing. Hardly a hill-top of the many within sight that is not covered with vestiges of some fortress or city. But, besides this, forests appear to have stood in many parts of Judaea until the repeated invasions and sieges caused their fall; and all this vegetation must have reacted on the moisture of the climate, and, by preserving the water in many a ravine and natural reservoir where now it is rapidly dried by the fierce sun of the early summer, must have influenced materially the look and the resources of the country. 16. Advancing northwards from Judaea the country becomes gradually more open and pleasant. Plains of good soil occur between the hills, at first small, but afterwards comparatively large. The hills assume here a more varied aspect than in the southern districts, springs are more abundant and more permanent, until at last, when the district of *Jebel Nablûs* is reached—the ancient Mount Ephraim—the traveller encounters an atmosphere and an amount of vegetation and water which, if not so transcendently lovely as the representations of enthusiastic travellers would make it, is yet greatly superior to anything he has met with in Judaea, and even sufficient to recall much of the scenery of the West. 17. Perhaps the springs are the only objects which in themselves, and apart from their associations, really strike an English traveller with astonishment and admiration. Such glorious fountains as those of *Ain-jalûd* or the *Kas el-Mukâtta*, where a great body of the clearest water wells silently but swiftly out from deep blue recesses worn in the foot of a low cliff of limestone rock, and at once forms a considerable stream—are very rarely to be met with out of irregular, rocky, mountainous countries, and being such unusual sights can hardly be looked on

by the traveller without surprise and emotion. But, added to this their natural impressiveness, there is the consideration of the prominent part which so many of these springs have played in the history. 18. The valleys which lead down from the upper level in this district to the valley of the Jordan, are less precipitous, because the level from which they start in their descent is lower, while that of the Jordan valley is higher; and they have lost that savage character which distinguishes the naked clefts of the Wadys *Suweinit* and *Kelt*, of the *Ain-jidy* or *Zureirah*, and have become wider and shallower. Fine streams run through many of these valleys. The mountains, though bare of wood and but partially cultivated, have none of that arid, worn look which renders those east of Hebron so repulsive. 19. Hardly less rich is the extensive region which lies north-west of the city of *Nablûs*, between it and Carmel, in which the mountains gradually break down into the Plain of Shaion. 20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a landscape. It is this which makes the wooded sides of Carmel and the parklike scenery of the adjacent slopes and plains so remarkable. 21. No sooner, however, is the Plain of Esdraelon passed, than a considerable improvement is perceptible. The low hills which spread down from the mountains of Galilee, and form the barrier between the plains of Akka and Esdraelon, are covered with timber, of moderate size, it is true, but of thick vigorous growth, and pleasant to the eye. Eastward of these hills rises the round mass of Tabor, dark with its copes of oak, and set off by contrast with the bare slopes of *Jebel ed-Dukky* (the so-called “Little Hermon”) and the white hills of Nazareth. North of Tabor and Nazareth is the plain of *el-Buttanf*, an upland tract hitherto very imperfectly described, but apparently of a similar nature to Esdraelon, though much more elevated. Beyond this the amount of natural growth increases at every step, until towards the north the country becomes what even in the West would be considered as well timbered. 22. The notices of this romantic district in the Bible are but scanty; in fact till the date of the New Testament, when it had acquired the name of Galilee, it may be said, for all purposes of history, to be hardly mentioned. In the great Roman conquest, or rather destruction, of Galilee, which preceded the fall of Jerusalem, the contest penetrated but a short distance into the interior. 23. From the present appearance of this district we may, with some allowances, perhaps gain an idea of what the more southern portions of the central highlands were during the earlier periods in the history. There is little material difference in the natural conditions of the two regions. It seems fair to believe that the hills of Shechem, Bethel, and Hebron, when Abram first wandered over them, were not very inferior to those of the *Belad Besharah* or the *Belad el-Buttanf*. 24. The causes of the present bareness of the face of the country are two, which indeed can hardly be separated. The first is the destruction of the timber in that long series of sieges and invasions which began with the invasion of Shishak (B.C. circa 970) and has not yet come to an end. The second is the decay of the

terraces necessary to retain the soil on the steep slopes of the round hills. 25. Few things are a more constant source of surprise to the stranger in the Holy Land than the manner in which the hill tops are, throughout, selected for habitation. A town in a valley is a rare exception. On the other hand scarce a single eminence of the multitude always in sight but is crowned with its city or village, inhabited or in ruins, often so placed as if not accessibility but inaccessibility had been the object of its builders. And indeed such was their object. These groups of naked forlorn structures piled irregularly one over the other on the curve of the hill-top, are the lineal descendants, if indeed they do not sometimes contain the actual remains, of the "fenced cities, great and walled up to heaven," which are so frequently mentioned in the records of the Israelite conquest. 26. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country. Wherever strength of arm and fleetness of foot availed, there those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plains, where the horses and chariots of the Canaanites and Philistines had space to manoeuvre, that they failed in dislodging the aborigines. Thus in this case the ordinary conditions of conquest were reversed—the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland colouring. 27. But the hills were occupied by other edifices besides the "fenced cities." The tiny white domes which stand perched here and there on the summits of the eminences, and mark the holy ground in which some Mahometan saint is resting—these are the successors of the "high places" or sanctuaries so constantly denounced by the prophets, and which were set up "on every high hill and under every green tree" (Jer. ii. 20; Ez. vi. 13). 28. From the mountainous structure of the Holy Land and the extraordinary variations in the level of its different districts, arises a further peculiarity most interesting and most characteristic—namely, the extensive views of the country which can be obtained from various commanding points. The number of *panoramas* which present themselves to the traveller in Palestine is truly remarkable. To speak of the west of Jordan only, for east of it all is at present more or less unknown—the prospects from the height of *Beni naim*, near Hebron, from the Mount of Olives, from Neby Samwil, from Bethel, from Gerizim or Ebal, from Jenin, Carmel, Tabor, Safed, the Castle of Banias, the *Kubbet en Nasr* above Damascus—are known to many travellers. Their peculiar charm resides in their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases the feet must be standing on the same ground, and the eyes resting on the same spots which have been stood upon and gazed at by the most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. These views are a feature in which Palestine is perhaps approached by no other country, certainly by no

country whose history is at all equal in importance to the world. 29. A few words must be said in general description of the maritime lowland, which intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions. This region, only slightly elevated above the level of the Mediterranean, extends without interruption from *el-Arish*, south of Gaza, to Mount Carmel. It naturally divides itself into two portions, each of about half its length—the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines—Philistia, or, as the Hebrews called it, the *Shefelah* or Lowland. The upper half is the Sharon or Saron of the Old and New Testaments, the "Forest country" of Josephus and the LXX. Viewed from the sea this maritime region appears as a long low coast of white or cream-coloured sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places, such as *Jaffa* and *Um khaldit*, almost aspire to the dignity of headlands. 30. Such is its appearance from without. But from within, when traversed, or over-looked from some point on those blue hills, the prospect is very different. The Philistine Plain is on an average fifteen or sixteen miles in width from the coast to the first beginning of the belt of hills, which forms the gradual approach to the highland of the mountains of Judah. The Plain is in many parts almost a dead level, in others gently undulating in long waves; here and there low mounds or hillocks, each crowned with its village, and more rarely still a hill overtopping the rest, like *Tell es-Safieh* or *Ajlûn*, the seat of some fortress of Jewish or Crusading times. The larger towns, as Gaza and Ashdod, which stand near the shore, are surrounded with huge groves of olive, sycamore, and palm, as in the days of King David (1 Chr. xxvii. 28). The whole plain appears to consist of brown loamy soil, light, but rich, and almost without a stone. It is to this absence of stone that the disappearance of its ancient towns and villages is to be traced. It is now, as it was when the Philistines possessed it, one enormous cornfield; an ocean of wheat covers the wide expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind—no break or hedge; hardly even a single olive-tree. Its fertility is marvellous; for the prodigious crops which it raises are produced, and probably have been produced almost year by year for the last 40 centuries, without any of the appliances which we find necessary for success. 31. The Plain of Sharon is much narrower than Philistia. It is about ten miles wide from the sea to the foot of the mountains, which are here of a more abrupt character than those of Philistia, and without the intermediate hilly region there occurring. At the same time it is more undulating and irregular than the former, and crossed by streams from the central hills, some of them of considerable size, and containing water during the whole year. The soil is extremely rich, varying from bright red to deep black, and producing enormous crops of weeds or grain, as the case may be. 32. The tract of white sand already mentioned as forming the shore line of the whole coast, is gradually encroaching on this magnificent region. In the south it has buried Askelon, and in the north between Caesarea and Jaffa the dunes are said to be as much as three miles wide and 300 feet high. It is probable that the Jews never permanently occupied more

than a small portion of this rich and favoured region. Its principal towns were, it is true, allotted to the different tribes (Josh. xv. 45-47; xvi. 3, Gezer; xvii. 11, Dor, &c.); but this was in anticipation of the intended conquest (xiii. 3-6) 33. In the Roman times this region was considered the pride of the country, and some of the most important cities of the province stood in it—Caesarea, Antipatris, Diospolis. The one ancient port of the Jews, the "beautiful" city of Joppa, occupied a position central between the Shefelah and Sharon. Roads led from these various cities to each other, to Jerusalem, Neapolis, and Sebaste in the interior, and to Ptolemais and Gaza on the north and south. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the west; and that traffic and the constant movement of troops backwards and forwards must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. 34. The characteristics already described are hardly peculiar to Palestine. Her hilly surface and general height, her rocky ground and thin soil, her torrent beds wide and dry for the greater part of the year, even her belt of maritime lowland—these she shares with other lands, though it would perhaps be difficult to find them united elsewhere. But there is one feature, as yet only alluded to, in which she stands alone. This feature is the Jordan—the one river of the country. 35. Properly to comprehend this, we must cast our eyes for a few moments north and south, outside the narrow limits of the Holy Land. From north to south—from Antioch to Akaba at the tip of the eastern horn of the Red Sea, Syria is cleft by a deep and narrow trench running parallel with the coast of the Mediterranean, and dividing, as if by a fosse or ditch, the central range of maritime highlands from those further east. At two points only in its length is the trench interrupted:—by the range of Lebanon and Hermon, and by the high ground south of the Dead Sea. Of the three compartments thus formed, the northern is the valley of the Orontes; the southern is the Wady el-Arabah; while the central one is the valley of the Jordan, the Arabah of the Hebrews, the Aulôn of the Greeks, and the *Ghôr* of the Arabs. The central of its three divisions is the only one with which we have at present to do. The river is elsewhere described in detail; but it and the valley through which it rushes down its extraordinary descent—must be here briefly characterized. 36. To speak first of the Valley. It begins with the river at its remotest springs of Hasbeiya on the N.W. side of Hermon, and accompanies it to the lower end of the Dead Sea, a length of about 150 miles. During the whole of this distance its course is straight, and its direction nearly due north and south. The springs of Hasbeiya are 1700 feet above the level of the Mediterranean, and the northern end of the Dead Sea is 1317 feet below it, so that between these two points the valley falls with more or less regularity through a height of more than 3000 feet. But though the river disappears at this point, the valley still continues its descent below the waters of the Dead Sea till it reaches a further depth of 1308 feet. So that the bottom of this extraordinary crevasse is actually more than 2600 feet below the surface of the ocean. 37. In width the valley varies. In its upper and shallower portion, as between Banias and the lake of Hâleh, it is about

five miles across. Between the Hâleh and the Sea of Galilee, as far as we have any information, it contracts, and becomes more of an ordinary ravine or glen. It is in its third and lower portion that the valley assumes its more definite and regular character. During the greater part of this portion, it is about seven miles wide from the one wall to the other. The eastern mountains preserve their straight line of direction, and their massive horizontal wall-like aspect, during almost the whole distance. The western mountains are more irregular in height, their slopes less vertical. North of Jericho they recede in a kind of wide amphitheatre, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. 38. Buried as it is between such lofty ranges, and shielded from every breeze, the climate of the Jordan valley is extremely hot and relaxing. Its enervating influence is shown by the inhabitants of Jericho. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not say; but in post-biblical times there is no doubt on the point. The palms of Jericho, and of Abila (opposite Jericho on the other side of the river), and the extensive balsam and rose gardens of the former place, are spoken of by Josephus, who calls the whole district a "divine spot." 39. All the irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the *Ghôr*, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. Alike useless for irrigation and navigation, it is in fact, what its Arabic name signifies, nothing but a "great watering place." 40. But though the Jordan is so unlike a river in the Western sense of the term, it is far less so than the other streams of the Holy Land. It is at least perennial, while, with few exceptions, they are mere winter torrents, rushing and foaming during the continuance of the rain, and quickly drying up after the commencement of summer. For fully half the year, these "rivers" or "brooks," are often mere dry lanes of hot white or grey stones. 41. How far the Valley of the Jordan was employed by the ancient inhabitants of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. The ancient notices of this route are very scanty. (1.) From 2 Chr. xxviii. 15, we find that the captives taken from Judah by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of Jericho. It would seem, however, to have been the usual road from the north to Jerusalem (comp. Luke xvii. 11 with xix. 1). (2.) Pompey brought his army and siege-train from Damascus to Jerusalem (B.C. 40), past Scythopolis and Pella, to Jericho. (3.) Vespasian marched from Emmaus, on the edge of the plain of Sharon, not far east of Ramleh, past Neapolis (*Nablus*), down to Koreae, and thence to Jericho. (4.) Antoninus Martyr (cir. A.D. 600), and possibly Willibald (A.D. 722) followed this route to Jerusalem. (5.) Baldwin I. is said to have journeyed from Jericho to Tiberias with a caravan of pilgrims. (6.) In our own times the whole length of the valley has been traversed by De Berton, and by Dr. Anderson, but apparently by few if any other travellers. 42. Monotonous and uninviting as much of the Holy Land will appear from the above description

to English readers, accustomed to the constant verdure, the succession of flowers, lasting almost throughout the year, the ample streams and the varied surface of our own country—we must remember that its aspect to the Israelites after that weary march of forty years through the desert, and even by the side of the brightest recollections of Egypt that they could conjure up, must have been very different. They entered the country at the time of the Passover, when it was arrayed in the full glory and freshness of its brief springtide, before the scorching sun of summer had had time to wither its flowers and embrown its verdure. Taking all these circumstances into account, and allowing for the bold metaphors of oriental speech, it is impossible not to feel that those wayworn travellers could have chosen no fitter words to express what their new country was to them than those which they so often employ in the accounts of the conquest—"a land flowing with milk and honey, the glory of all lands." 43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, the "rain of heaven" must have been a most grateful novelty in its two seasons, the former and the latter—the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. 44. The contrast with Egypt would tell also in another way. In place of the huge ever-flowing river whose only variation was from low to high, and from high to low again, they were to find themselves in a land of constant and considerable undulation, where the water, either of gushing spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously husbanded and skilfully conducted to find its own way through field or garden. 45. It will be seen that, beneath the apparent monotony, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the torrid desert on the south. There is also the variety which is inevitably produced by the presence of the sea—"the eternal freshness and liveliness of ocean." 46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands is more than implied in the habitual forms of expression, "going up" to Judah, Jerusalem, Hebron; "going down" to Jericho, Capernaum, Lydda, Caesarea, Gaza, and Egypt. More than this, the difference is marked unmistakably in the topographical terms which so abound in, and are so peculiar to, this literature. "The mountain of Judah," "the mountain of Israel," "the mountain of Naphtali," are the names by which the three great divisions of the highlands are designated. On the other hand, the great lowland districts have each their peculiar name. 47. The differences in climate are no less often mentioned. The Psalmists, Prophets, and historical Books, are full of allusions to the fierce heat of the midday sun and the dryness of summer; no less than to the various accompaniments of winter. Even the sharp alternations between the heat of the days and the coldness of the nights, which strike every traveller in Palestine, are mentioned. 48. In

Cox. D. B.

the preceding description allusion has been made to many of the characteristic features of the Holy Land. But it is impossible to close this account without mentioning a defect which is even more characteristic—its lack of monuments and personal relics of the nation who possessed it for so many centuries, and gave it its claim to our veneration and affection. When compared with other nations of equal antiquity—Egypt, Greece, Assyria—the contrast is truly remarkable. In Egypt and Greece, and also in Assyria, as far as our knowledge at present extends, we find a series of buildings, reaching down from the most remote and mysterious antiquity, a chain, of which hardly a link is wanting, and which records the progress of the people in civilisation, art, and religion, as certainly as the buildings of the mediæval architects do that of the various nations of modern Europe. But in Palestine it is not too much to say that there does not exist a single edifice, or part of an edifice, of which we can be sure that it is of a date anterior to the Christian era. And as with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, an ornament or a piece of armour, of Israelite make, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. The buildings already mentioned as being Jewish in character, though carried out with foreign details, are the following:—The tombs of the Kings and of the Judges: the buildings known as the tombs of Absalom, Zechariah, St. James, and Jehoshaphat; the monolith at Siloam; the ruined synagogues at Meiron and Kefr Birim. But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are, the enclosure round the sacred cave at Hebron; and portions of the western, southern, and eastern walls of the *Haram* at Jerusalem, with the vaulted passage below the *Aksa*. M. Renan has named two circumstances which must have had a great effect in suppressing art or architecture amongst the ancient Israelites, while their very existence proves that the people had no genius in that direction. These are (1) the prohibition of sculptured representations of living creatures, and (2) the command not to build a temple anywhere but at Jerusalem.—THE GEOLOGY.—Of the geological structure of Palestine it has been said with truth that our information is but imperfect and indistinct, and that much time must elapse, and many a cherished hypothesis be sacrificed, before a satisfactory explanation can be arrived at of its more remarkable phenomena. 1. The main sources of our knowledge are (1) the observations contained in the *Travels* of Russegger, an Austrian geologist and mining engineer who visited this amongst other countries of the East in 1836-8; (2) the Report of H. J. Anderson, M.D., an American geologist, who accompanied Captain Lynch in his exploration of the Jordan and the Dead Sea; and (3) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1836. None of these contain anything approaching a complete investigation, either as to extent or to detail of observations. 2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (Jurassic

2 X

and cretaceous); the southern offshoot of the chain of Lebanon; elevated considerably above the sea level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone, stretching in every direction except west, far beyond the limits of the Holy Land. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its centre division to a truly remarkable depth (2625 ft.) below the sea level. This crevasse, which contains the principal water-course of the country, is also the most exceptional feature of its geology. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic force having stopped short at that point in the operation, without intruding any volcanic rocks into the fissure. Or it may have been excavated by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson; but further examination is necessary before a positive opinion can be pronounced. 3. The Limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Hermon, is a tolerably solid stone, varying in colour from white to reddish brown, with very few fossils, inclining to crystalline structure, and abounding in caverns. Its general surface has been formed into gently rounded hills, separated by narrow valleys of denudation occasionally spreading into small plains. 4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country. 5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone). It is not stratified. 6. The lower stratum is in two divisions or series of beds—the upper, dusky in colour, contorted and cavernous like that just described, but more ferruginous—the lower one dark grey, compact and solid, and characterised by abundant fossils of *cidaris*, an extinct echinus, the spines of which are the well-known “olives” of the convents. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling outlines, everything here is rugged, pointed, and abrupt. 7. After the limestone had received the general form which its surface still retains, but at a time far anterior to any historic period, it was pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overflowed the stratified beds, and now appears, in the form of basalt or trap. 8. On the west of Jordan these volcanic rocks have been hitherto found only north of the mountains of Samaria. They are first encountered on the south-western side of the Plain of Esdraelon. There seem to have been two centres of eruption: one, and that the most ancient, at or about the *Kurn Hattin* (the traditional Mount of Beatitudes), whence the stream flowed over the declivities of the limestone towards the lake. The other—the more recent—was more to the north, in the neighbourhood of Safed. 9. The volcanic action which in prehistoric times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. The rocks between Jerusalem and Jericho show many an evidence of these convulsions. Two earthquakes only are recorded as having affected Jeru-

salem itself—that in the reign of Uzziah, and that at the time of the crucifixion, when “the rocks were rent and the rocky tombs torn open” (Matt. xxvii. 51). 10. But in addition to earthquakes, the hot salt and fetid springs which are found at Tiberias, Callirhoe, and other spots along the valley of the Jordan, and round the basins of its lakes, and the rock-salt, nitre, and sulphur of the Dead Sea are all evidences of volcanic or plutonic action. 11. In the Jordan Valley the basalt is frequently encountered. Here, as before, it is deposited on the limestone, which forms the substratum of the whole country. On the western side of the lower Jordan and Dead Sea no volcanic formations have been found. 12. It is on the east of the Jordan that the most extensive and remarkable developments of igneous rocks are found. Over a large portion of the surface from Damascus to the latitude of the south of the Dead Sea, and even beyond that, they occur in the greatest abundance all over the surface. The limestone, however, still underlies the whole. 13. The tertiary and alluvial beds remain to be noticed. These are chiefly remarkable in the neighbourhood of the Jordan, as forming the floor of the valley, and as existing along the course, and accumulated at the mouths, of the torrents which deliver their tributary streams into the river, and into the still deeper caldron of the Dead Sea. 14. The floor of the Jordan Valley is described by Dr. Anderson as exhibiting throughout more or less distinctly the traces of two independent terraces. The upper one is much the broader of the two. It extends back to the face of the limestone mountains which form the walls of the valley on east and west. Below this, varying in depth from 50 to 150 feet, is the second terrace, which reaches to the channel of the Jordan, and, in Dr. Anderson's opinion, has been excavated by the river itself before it had shrunk to its present limits, when it filled the whole space between the eastern and western faces of the upper terrace. The inner side of both upper and lower terraces is furrowed out into conical knolls, by the torrents of the rains descending to the lower level. All along the channel of the river are found mounds and low cliffs of conglomerates, and breccias of various ages, and more various composition. 15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than by the course of the river. The marls, gypsites, and conglomerates continue along the base of the western cliff as far as the Wady Sebbeh, where they attain their greatest development. South of this they form a sterile waste of brilliant white marl and bitter salt flakes ploughed by the rain-torrents from the heights into pinnacles and obelisks. At the south-eastern corner of the sea, sandstones begin to display themselves in great profusion, and extend northward beyond Wady Zurka Main. 16. The rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdraelon, Gennesareth, and other similar plains, will complete our sketch of the geology. The former of these districts is a region of from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months. The soil is a light loamy sand, red in some places, and deep black in others. 17. The plain of Gennesareth is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. 18. The

plain of Esdraelon lies between two ranges of highland, with a third (the hills separating it from the plain of Akka), at its north-west end. The soil of this plain is also volcanic, though not so purely so as that of Gennesareth. 19. Bitumen or asphaltum, called by the Arabs *el hummar* (the 'slime' of Gen. xi. 3), is only met with in the valley of Jordan. At Hasbeiya, the most remote of the sources of the river, it is obtained from pits or wells which are sunk through a mass of bituminous earth to a depth of about 180 feet. It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water. 20. Sulphur is found on the W. and S. and S.E. portions of the shore of the Dead Sea. Nitre is rare. Rock-salt abounds in large masses. The salt mound of *Kashm Usdum* at the southern end of the Dead Sea is an enormous pile, 5 miles long by $2\frac{1}{2}$ broad, and some hundred feet in height. — THE BOTANY. — The Botany of Syria and Palestine differs but little from that of Asia Minor, which is one of the most rich and varied on the globe. What differences it presents are due to a slight admixture of Persian forms on the eastern frontier, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the low torrid depression of the Jordan and Dead Sea. On the other hand, Palestine forms the southern and eastern limit of the Asia Minor flora, and contains a multitude of trees, shrubs, and herbs that advance no further south and east. Owing, however, to the geographical position and the mountainous character of Asia Minor and Syria, the main features of their flora are essentially Mediterranean-European, and not Asiatic. As elsewhere throughout the Mediterranean regions, Syria and Palestine were evidently once thickly covered with forests, which on the lower hills and plains have been either entirely removed, or else reduced to the condition of brushwood and copse; but which still abound on the mountains, and along certain parts of the sea-coast. The flora of Syria, so far as it is known, may be roughly classed under three principal Botanical regions, corresponding with the physical characters of the country. These are (1), the western or sea-board half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Coele-Syria, Galilee, Samaria, and Judea. (2) The desert or eastern half, which includes the east flanks of the Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea valley. (3) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3400 feet, and of the Anti-Lebanon above 4000 feet. These Botanical regions present no definite boundary line. I. *Western Syria and Palestine.* — The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterise it by the mention of a few. Amongst trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the *Pinus maritima* and *P. Halepensis* (Aleppo Pine). The most prevalent oak is the *Quercus pseudo-coccifera*. It is called holly by many travellers, and *Quercus ilex* by others, both very different trees. *Q. pseudo-coccifera* is perhaps the commonest plant in all Syria and Palestine, covering as a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of the Lebanon, or where, as

in the case of the famous oak of Mamre, it is allowed to attain its full size. The only other oaks that are common are the *Q. infectoria* (a gall oak), and *Q. Aegilops*. The *Q. infectoria* is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and on the Lebanon. *Q. Aegilops* again is the Valonia oak; a low, very stout-trunked sturdy tree, common in Galilee, and especially on Tabor and Carmel. This, Dr. Hooker is inclined to believe, is the oak of Bashan. The trees of the genus *Pistacia* rank next in abundance to the Oak, and of these there are three species in Syria, two wild and most abundant, but the third, *P. vera*, which yields the well-known pistachio nut, very rare. The Carob or Locust-tree, *Ceratonia Siliqua*, ranks perhaps next in abundance to the foregoing trees. The oriental Plane is far from uncommon, and though generally cultivated, it is to all appearance wild in the valleys of the Lebanon and Anti-Lebanon. The Sycamore-fig is common in the neighbourhood of towns, and attains a large size; its wood is much used, especially in Egypt, where the mummy-cases were formerly made of it. Poplars, especially the aspen and white poplar, are extremely common by streams. The Walnut is more common in Syria than in Palestine. Of large native shrubs or small trees almost universally spread over the district are, *Arbutus Andrachne*, which is common in the hilly country from Hebron northward; *Crataegus Aronia*, which grows equally in dry rocky exposures, as on the Mount of Olives, and in cool mountain valleys. Cypress are common about villages. *Zizyphus Spina-Christi*, Christ's Thorn — often called jujube — the Nubb of the Arabs, is most common on dry open plains, as that of Jericho. The *Palurus aculeatus*, also called Christ's Thorn, resembles it a good deal, but is much less common; it abounds in the Anti-Lebanon. *Styrax officinalis*, which used to yield the famous Storax, abounds in all parts of the country where hilly. *Tamarisk* is common, but seldom attains a large size. *Oleander* claims a separate notice, from its great beauty and abundance; lining the banks of the streams and lakes in gravelly places, and bearing a profusion of blossoms. Other still smaller but familiar shrubs are *Phyllagrea*, *Rhamnus alaternus*, and others of that genus. *Rhus Coriaria*, several leguminous shrubs, as *Anagyris foetida*, *Calycotome* and *Genista*; *Cotoneaster*, the common bramble, dog-rose, and hawthorn, *Elaeagnus*, wild olive, *Lycium Europaeum*, *Vitex agnus-castus*, sweet bay (*Laurus nobilis*), *Ephedra*, *Clematis*, Gum-Cistus, and the caper plant. Of planted trees and large shrubs, the first in importance is the Vine, which is most abundantly cultivated all over the country, and produces, as in the time of the Canaanites, enormous bunches of grapes. This is especially the case in the southern districts, those of Eschol being still particularly famous. Next to the vine, or even in some respects its superior in importance, ranks the Olive, which nowhere grows in greater luxuriance and abundance than in Palestine, where the olive orchards form a prominent feature throughout the landscape, and have done so from time immemorial. It is perhaps most skillfully and carefully cultivated in the neighbourhood of Hebron. The Fig forms another most important crop in Syria and Palestine, and one which is apparently greatly increasing in extent. The early figs, which ripen about June, are reckoned especially good. The summer figs again ripen in August, and a third crop appears

still later when the leaves are shed; these are occasionally gathered as late as January. The quince, apple, almond, walnut, peach, and apricot, are all most abundant field or orchard crops. The pomegranate grows everywhere as a bush; but, like the orange, *Elaeagnus*, and other less common plants, is more often seen in gardens than in fields. The Banana is only found near the Mediterranean. Dates are not frequent; they are most common at Caiffa and Jaffa, where the fruit ripens. Of the well-known palm-grove of Jericho no tree is standing. The *Opuntia*, or Prickly Pear, is most abundant throughout Syria. It is in general use for hedging, and its well-known fruit is extensively eaten by all classes. Of dye-stuffs the *Carthamus* (Safflower) and Indigo are both cultivated; and of textiles, Flax, Hemp, and Cotton. The Carob, or St. John's Bread (*Ceratonia Siliqua*), has already been mentioned amongst the conspicuous trees. The Cistus or Rock-rose is the shrub from which Gum-Labdanum was collected in the islands of Caudia and Cyprus. With regard to the rich and varied herbaceous vegetation of West Syria and Palestine, it is difficult to afford any idea of its nature to the English non-botanical reader. The plants contained in this botanical region probably number not less than 2000 or 2500, of which perhaps 500 are British wild flowers. The most abundant natural families of plants in West Syria and Palestine are—(1) *Leguminosae*, (2) *Compositae*, (3) *Labiatae*, (4) *Cruciferae*; after which come (5) *Umbelliferae*, (6) *Caryophyllae*, (7) *Boraginaceae*, (8) *Scrophularinaceae*, (9) *Gramineae*, and (10) *Liliaceae*.—(1.) *Leguminosae* abound in all situations, especially the genera *Trifolium*, *Trigonellu*, *Medicago*, *Lotus*, *Vicia*, and *Orobis*, in the richer soils, and *Astragalus* in enormous profusion in the drier and more barren districts. Of the shrubby *Leguminosae* there are a few species of *Genista*, *Cytisus*, *Ononis*, *Retama*, *Anagyris*, *Calycotome*, *Coronilla*, and *Acacia*. One species, the *Ceratonia*, is arboreal.—(2.) *Compositae*.—No family of plants more strikes the observer than the *Compositae*, from the vast abundance of thistles and centauries and other spring plants of the same tribe, which swarm alike over the richest plains and most stony hills, often towering high above all other herbaceous vegetation. We can only mention the genera *Centaurea*, *Echinops*, *Onopordum*, *Cirsium*, *Cynara*, and *Carduus*, as being eminently conspicuous for their numbers or size.—(3.) *Labiatae* form a prominent feature everywhere, and one all the more obtrusive from the fragrance of many of the genera.—(4.) Of *Cruciferae* here is little to remark. Among the most noticeable are the gigantic mustard, which does not differ from the common mustard, *Sinapis nigra*, save in size, and the *Anastatica hierochuntica*, or rose of Jericho.—(5.) *Umbelliferae* present little to remark on save the abundance of fennels and *Bupleurums*. The grey and spiny *Eryngium*, so abundant on all the arid hills, belongs to this order.—(6.) *Caryophyllae* also are not a very conspicuous order, though so numerous that the abundance of pinks, *Silene* and *Saponaria*, is a marked feature to the eye of the botanist.—(7.) The *Boraginaceae* are for the most part annual weeds.—(8.) Of *Scrophularinaceae* the principal genera are *Scrophularia*, *Veronica*, *Linaria*, and *Verbascum* (Mulleins).—(9.) *Grasses*, though very numerous in species, seldom afford a sward as in moister and colder regions.—(10.) *Liliaceae*.—The variety and beauty of this

order in Syria is perhaps nowhere exceeded, and especially of the bulb-bearing genera, as tulips, fritillaries, squills, gageas, &c.—Ferns are extremely scarce, owing to the dryness of the climate, and most of the species belong to the Lebanon flora. One of the most memorable plants of this region, and indeed in the whole world, is the celebrated Papyrus of the ancients (*Papyrus antiquorum*), which is said once to have grown on the banks of the lower Nile, but which is nowhere found now in Africa north of the tropics. Of other Cryptogamic plants little is known. *Cucurbitaceae*, though not included under any of the above heads, are a very frequent order in Syria. Of plants that contribute largely to that showy character for which the herbage of Palestine is famous, may be mentioned *Adonis*, *Ranunculus Asiaticus*, and others; *Anemone coronaria*, poppies, *Glaucium*, *Matthiola*, *Malcolmia*, *Alyssum*, *Biscutella*, *Helianthemum*, *Cistus*, the caper plant, many pinks, *Silene*, *Saponaria*, and *Gypsophila*; various *Phloxes*, mallows, *Lavatera*, *Hypericum*; many geraniums, *Erodiums*, and *Leguminosae*, and *Labiatae* far too numerous to individualize; *Scabiosa*, *Cephalaria*, *chysanthemums*, *Pyrethrum*, *Inulas*, *Achilleas*, *Calendulas*, *Centauraeas*, *Tragopogons*, *Scorzoneras*, and *Crepis*; many noble *Campanulas*, cyclamens, *Convolvuli*, *Anchusas*, *Onomas*, and *Echiums*, *Acanthus*, *Verbascums* (most conspicuously), *Veronicas*, *Celsias*, *Hyoscyamus*; many *Arums* in autumn, orchids and *Ophrys* in spring; *Narcissus*, *Tazetta*, irises, *Pancratiums*, *Sternbergia*, *Gladiolus*; many beautiful crocuses and colchicums, squills, *Tulipa oculis-solis*, *Gageas*, fritillaries, *Alliums*, Star of Bethlehem, *Muscari*, white lily, *Hyacinthus orientalis*, *Bellevallias*, and *Asphoditi*.—II. *Botany of Eastern Syria and Palestine*.—We must confine our notice to the valley of the Jordan, that of the Dead Sea, and the country about Damascus. Nowhere can a better locality be found for showing the contrast between the vegetation of the eastern and western districts of Syria than in the neighbourhood of Jerusalem. To the west and south of that city the valleys are full of the dwarf oak, two kinds of *Pistacia*, besides *Smilax*, *Arbutus*, rose, Aleppo Pine, *Rhamnus*, *Phyllirea*, bramble, and *Crataegus Aronia*. For the first few miles eastward the olive groves continue, and here and there a carob and lentisk or sycamore occurs, but beyond Bethany these are scarcely seen. On descending 1000 feet below the level of the sea to the valley of the Jordan, the sub-tropical and desert vegetation of Arabia and West Asia is encountered in full force. Many plants wholly foreign to the western district suddenly appear, and the flora is that of the whole dry country as far east as the Panjab. The commonest plant is the *Zizyphus Spina-Christi*, or *nukh* of the Arabs, forming bushes or small trees. Scarcely less abundant, and as large, is the *Balanites Aegyptiaca*, whose fruit yields the oil called *zuk* by the Arabs, which is reputed to possess healing properties, and which may possibly be alluded to as Balm of Gilead. Tamarisks are most abundant. *Acacia Farnesiana* is very abundant, and celebrated for the delicious fragrance of its yellow flowers. *Capparis spinosa*, the common caper plant, flourishes everywhere in the Jordan valley. *Athagi mawrorum* is extremely common; as is the prickly *Solanum Sodomaeum*, with purple flowers and globular yellow fruits, commonly known as the Dead Sea apple. On the banks of the Jordan itself the arborescent and shrubby

vegetation chiefly consists of *Populus Euphratica*, tamarisk, *Osyris alba*, *Periploca*, *Acacia vera*, *Prosopis Stephaniana*, *Arundo Donax*, *Lythrum*, and *Capparis spinosa*. As the ground becomes saline, *Atriplex Halimifolia* and large *Staticeae* (sea-pinks) appear in vast abundance. Other very tropical plants of this region are *Zygophyllum coccineum*, *Boerhavia*, *Indigofera*; several *Astragali*, *Cassias*, *Gymnocarpum*, and *Nitaria*. At the same time thoroughly European forms are common, especially in wet places; as dock, mint, *Veronica*, *Anagallis*, and *Sium*. One remote and little visited spot in this region is particularly celebrated for the tropical character of its vegetation. This is the small valley of Engedi (Ain-jidi). It is here that the *Salvadora Persica*, supposed by some to be the mustard-tree of Scripture, grows. The shores immediately around the Dead Sea present abundance of vegetation, though almost wholly of a saline character.—III. *Flora of the Middle and Upper Mountain Regions of Syria*.—The oak forms the prevalent arboreal vegetation of this region below 5000 feet. The *Quercus pedunculata* and *infectoria* is not seen much above 3000 feet, nor the *Valonia* oak at so great an elevation; but above these heights some magnificent species occur. At the same elevations junipers become common, but the species have not been satisfactorily made out. But the most remarkable plant of the upper region is certainly the cedar. Lastly, the flora of the upper temperate and alpine Syrian mountains demands some notice. As before remarked, no part of the Lebanon presents a vegetation at all similar, or even analogous, to that of the Alps of Europe, India, or North America. At the elevation of 4000 feet on the Lebanon many plants of the middle and northern latitudes of Europe commence, amongst which the most conspicuous are hawthorn, dwarf elder, dog-rose, ivy, butcher's broom, a variety of the berberry, honeysuckle, maple, and jasmine. A little higher, at 5700 ft., occur *Cotoneaster*, *Rhododendron ponticum*, primrose, *Daphne Oleoides*, several other roses, *Poterium*, *Juniperus communis*, foetidissima (or *exelsa*), and cedar. Still higher, at 7-10,000 ft., there is no shrubby vegetation, properly so called. At the elevation of 8-9000 ft. the beautiful silvery *Vicia cinascens* forms large tufts of pale blue, where scarcely anything else will grow. The most boreal forms, which are confined to the clefts of rocks, or the vicinity of patches of snow above 9000 ft., are *Draba*, *Arenaria*, one small *Potentilla*, a *Festuca*, an *Arabis* like *alpina*, and the *Oxyria reifformis*, the only decidedly Arctic type in the whole country. No doubt Cryptogamic plants are sufficiently numerous in this region, but none have been collected except ferns, amongst which are *Cystopteris fragilis*, *Polypodium vulgare*, *Nephrodium pallidum*, and *Polystichum angulare*.—ZOOLOGY.—It will be sufficient in this article to give a general survey of the fauna of Palestine, as the reader will find more particular information in the several articles which treat of the various animals under their respective names.—*Mammalia*.—The *Chiroptera* (bats) are probably represented in Palestine by the species which are known to occur in Egypt and Syria, but we want precise information on this point. Of the *Insectivora* we find hedgehogs (*Erinaceus Europaeus*) and moles (*Talpa vulgaris*, *T. caeca* (?)); doubtless the family of *Soricidae* (Shrews) is also represented, but we lack information. Of the *Carnivora* are still seen in the

Lebanon, the Syrian bear (*Ursus Syriacus*), and the panther (*Leopardus varius*). Jackals and foxes are common; the hyena and wolf are also occasionally observed; the badger (*Meles taxus*) is also said to occur in Palestine; the lion is no longer a resident in Palestine or Syria. A species of squirrel (*Sciurus Syriacus*), which the Arabs term *Orkidaun*, "the leaper," has been noticed on the lower and middle parts of Lebanon; two kinds of hare, *Lepus Syriacus*, and *L. Aegyptius*; rats and mice, which are said to abound; the jerboa (*Dipus Aegyptius*); the porcupine (*Hystrix cristata*); the short-tailed field-mouse (*Arvicola agrestis*), may be considered as the representatives of the *Rodentia*. Of the *Pachydermata*, the wild boar (*Sus scrofa*), which is frequently met with on Tabor and little Hermon, appears to be the only living wild example. The Syrian hyrax is now but rarely seen. There does not appear to be at present any wild ox in Palestine. Dr. Thomson states that wild goats (*Iber*?) are still (see 1 Sam. xxiv. 2) frequently seen in the rocks of Engedi. The gazelle (*Gazella dorcas*) occurs not infrequently, in the Holy Land, and is the antelope of the country. The Arabs hunt the gazelles with greyhound and falcon; the fallow-deer (*Dama vulgaris*) is said to be not infrequently observed. Of domestic animals we need only mention the Arabian or one-humped camel, asses, and mules, and horses, all of which are in general use. The buffalo (*Bubalus bubalis*) is common. The ox of the country is small and unsightly in the neighbourhood of Jerusalem, but in the richer pastures the cattle, though small, are not unsightly; the common sheep of Palestine is the broad-tail (*Ovis laticaudatus*), with its varieties; goats are extremely common everywhere.—*Aves*.—Palestine abounds in numerous kinds of birds. Vultures, eagles, falcons, kites, owls of different kinds, represent the *Raptorial* order. Of the smaller birds may be mentioned, amongst others, the *Mergus Persicus*, the *Upupa Epops*, the *Sitta Syriaca* or Dalmatian nuthatch, several kinds of *Silvidae*, the *Cinnyris osea*, or Palestine sunbird, the *Ixos xanthopygos*, Palestine nightingale, the *Amyrtus Tristramii*, or glossy starling, discovered by Mr. Tristram in the gorge of the Kedron; the sly and wary *Crateropus chalybeus*, in the open wooded district near Jericho; the jay of Palestine (*Garrulus melanocephalus*); kingfishers (*Ceryle rudis*, and perhaps *Alcedo ispida*) abound about the lake of Tiberias and in the streams above the Huleh; the raven, and carrion crow; the *Pastor roseus*, or locust-bird; the common cuckoo; several kinds of doves; sandgrouse (*Pterocles*), partridges, francolins, quails, the great bustard, storks, both the black and white kinds, seen often in flocks of some hundreds; herons, curlews, pelicans, sea-swallows (*Sterna*), gulls, &c. &c.—*Reptilia*.—Several kinds of lizards (*Sauria*) occur. The *Lacerta stellio*, Lin., is very common in ruined walls. The *Waran el hard* (*Psammisaurus scincus*) is very common in the deserts. The common Greek tortoise (*Testudo Graeca*) Dr. Wilson observed at the sources of the Jordan; fresh-water tortoises (probably *Emus Caspica*) are found abundantly in the upper part of the country in the streams of Esdraelon and of the higher Jordan valley, and in the lakes. The chameleon (*Chamaeleo vulgaris*) is common; the crocodile does not occur in Palestine; the *Monitor Niloticus* has doubtless been confounded with it. In the south of Palestine especially reptiles of

various kinds abound; besides those already mentioned, a large *Acanthodactylus* frequents old buildings; a large species of *Uromastix*, at least two species of *Gecko* (*Tarentola*), a *Gongylus* (*ocellatus*?), several other *Acanthodactylus* and *Seps tridactylus* have been observed. Of *Ophidiæ*, there is more than one species of *Echidna*; a *Naia*, several *Tropidonoti*, a *Coronella*, a *Coluber* (*trivirgatus*?) occur; and on the southern frontier of the land the desert form *Cerastes Hasselquistii* has been observed. Of the *Batrachia* we have little information beyond that supplied by Kitto, viz. that frogs (*Rana esculenta*) abound in the marshy pools of Palestine; that they are of a large size, but are not eaten by the inhabitants. The tree-frog (*Hyla*) and toad (*Bufo*) are also very common.—*Pisces*.—The principal kinds which are caught off the shores of the Mediterranean are supplied by the families *Sparidae*, *Percidae*, *Scomberidae*, *Raiidae*, and *Pleuronectidae*. The Sea of Galilee has been always celebrated for its fish. Burckhardt says the most common species are the binny (*Cyprinus lepidotus*), and a fish called *Mesht*, which he describes as being a foot long and 5 inches broad, with a flat body like the sole. The Binny is a species of barbel; it is the *Barbus Binni* of Cuv. and Valenci., the *Mesht* is undoubtedly a species of *Chromis*, one of the *Labridæ*, and is perhaps identical with the *C. Niloticus*. Concerning the other divisions of the animal kingdom we have little information. *Molluscs* are numerous. The land shells may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus *Clausilia*, and of opaque *Bulimi* and *Pupæ* predominating. On the coast and in the plains the common shells of the East Mediterranean basin abound, e. g. *Helix Pisana*, *H. Syriaca*, &c. In the south, in the hill country of Judea, occurs a very interesting group, chiefly confined to the genus *Helix*, three subdivisions of which may be typified by *H. Boissieri*, *H. Seetzeni*, *H. tuberculosa*, recalling by their thick, calcareous, lustreless coating, the prevalent types of Egypt, Arabia, and Sahara. In the valley of the Jordan the prevailing group is a subdivision of the genus *Bulimus*, rounded, semipellucid, and lustrous, very numerous in species, which are for the most part peculiar to the district. These may be typified by *B. Jordani* and *B. Alepensis*. Of the *Crustacea* we know scarcely anything. The *Lepidoptera* of Palestine are as numerous and varied as might have been expected in a land of flowers. All the common butterflies of southern Europe, or nearly allied congeners, are plentiful in the cultivated plains and on the hill-sides. Bees are common. At least three species of scorpions have been distinguished. Spiders are common. Locusts occasionally visit Palestine and do minute damage. Ants are numerous. Of the *Annelida* we have no information; while of the whole sub-kingdoms of *Coelenterata* and *Protozoa* we are completely ignorant. It has been remarked that in its physical character Palestine presents on a small scale an epitome of the natural features of all regions, mountainous and desert, northern and tropical, maritime and inland, pastoral, arable, and volcanic. This fact, which has rendered the allusions in the Scriptures so varied as to afford familiar illustrations to the people of every climate, has had its natural effect on the zoology of the country. In no other district, not even on the southern slopes

of the Himalaya, are the typical fauna of so many distinct regions and zones brought into such close juxtaposition.—THE CLIMATE. 1. *Temperature*.—At Jerusalem January is the coldest month, and July and August the hottest, though June and September are nearly as warm. In the first-named month the average temperature is 49°·1 Fahr., and greatest cold 28°; in July and August the average is 78°·4; with greatest heat 92° in the shade and 143° in the sun. The extreme range in a single year was 52°; the mean annual temperature 65°·6. Though varying so much during the different seasons, the climate is on the whole pretty uniform from year to year. The isothermal line of mean annual temperature of Jerusalem passes through California and Florida (to the north of Mobile). It also passes through Gibraltar, and near Madeira and the Bermudas. The heat, though extreme during the four midsummer months, is much alleviated by a sea-breeze from the N.W., which blows with great regularity from 10 A.M. till 10 P.M. During January and February snow often falls to the depth of a foot or more, though it may not make its appearance for several years together. Thin ice is occasionally found on pools or sheets of water, but this is of rare occurrence. 2. *Rain*. The result of Dr. Barclay's observations is to show that the greatest fall of rain at Jerusalem in a single year was 85 inches, and the smallest 44, the mean being 61·6 inches. These figures will be best appreciated by recollecting that the average rain-fall of London during the whole year is only 25 inches, and that in the wettest parts of the country, such as Cumberland and Devon, it rarely exceeds 60 inches. As in the time of our Saviour (Luke xii. 54), the rains come chiefly from the S. or S.W. They commence at the end of October or beginning of November, and continue with greater or less constancy till the end of February or middle of March, and occasionally, though rarely, till the end of April. Between April and November there is, with the rarest exceptions, an uninterrupted succession of fine weather, and skies without a cloud. During the summer the dews are very heavy, and often saturate the traveller's tent as if a shower had passed over it. The nights, especially towards sunrise, are very cold, and thick fogs or mists are common all over the country. Thunder-storms of great violence are frequent during the winter months. 3. So much for the climate of Jerusalem. In the lowland districts, on the other hand, the heat is much greater and more oppressive, owing to the quantity of vapour in the atmosphere, the absence of any breeze, the sandy nature of the soil, and the manner in which the heat is confined and reflected by the enclosing heights; perhaps also to the internal heat of the earth, due to the depth below the sea level of the greater part of the Jordan valley, and the remains of volcanic agency, which we have already shown to be still in existence in this very depressed region. The harvest in the Ghor is fully a month in advance of that on the highlands, and the fields of wheat are still green on the latter when the grain is being threshed in the former. 4. The climate of the maritime lowland exhibits many of the characteristics of that of the Jordan valley, but, being much more elevated, and exposed on its western side to the sea-breeze, is not so oppressively hot. This district retains much tropical vegetation. Here also the harvest is in advance of that of the mountainous districts. In the

winter months however the climate of these regions is very similar to that of the south of France or the maritime districts of the north of Italy.

Palu. The second son of Reuben, father of Eliah (Ex. vi. 14; Num. xvi. 5, 8; 1 Chr. v. 3) and founder of the family of

Paluites, the (Num. xxvi. 5).

Palmer-worm (Heb. *gázám*), occurs Joel i. 4, ii. 25; Am. iv. 9. Bochart has endeavoured to show that *gázám* denotes some species of locust. We prefer to follow the LXX. and Vulg., which are consistent with each other in the rendering of the Hebrew word in the three passages where it is found. The *καμνὴ* of Aristotle evidently denotes a caterpillar. The *Eruca* of the Vulg. is the *καμνὴ* of the Greeks. The Chaldee and Syriac understand some locust larva by the Hebrew word. Tychsen identifies the *gázám* with the *Gryllus cristatus*, Lin., a South African species.

Palm-tree (Heb. *támar*). Under this generic term many species are botanically included; but we have here only to do with the Date-palm, the *Phoenix Dactylifera* of Linnaeus. It grew very abundantly in many parts of the Levant. While this tree was abundant generally in the Levant, it was regarded by the ancients as peculiarly characteristic of Palestine and the neighbouring regions. The following places may be enumerated from the Bible as having some connexion with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot. (1.) At ELIM, one of the stations of the Israelites between Egypt and Sinai, it is expressly stated that there were "twelve wells (fountains) of water, and three-score and ten palm-trees" (Ex. xv. 27; Num. xxxiii. 9). (2.) Next, it should be observed that ELATH (Deut. ii. 8; 1 K. ix. 26; 2 K. xiv. 22, xvi. 6; 2 Chr. viii. 17, xxvi. 2) is another plural form of the same word, and may likewise mean "the palm-trees." (3.) No place in Scripture is so closely associated with the subject before us as JERICHO. Its rich palm-groves are connected with two very different periods,—with that of Moses (Deut. xxxiv. 3; Judg. i. 16) and Joshua on the one hand, and that of the Evangelists on the other. What the extent of these palm-groves may have been in the desolate period of Jericho we cannot tell; but they were renowned in the time of the Gospels and Josephus. The Jewish historian mentions the luxuriance of these trees again and again. (4.) The name of HAZEON-TAMAR, "the felling of the palm-tree," is clear in its derivation. This place is mentioned in the history both of Abraham (Gen. xiv. 7) and of Jehoshaphat (2 Chr. xx. 2). (5.) Another place having the same element in its name, and doubtless the same characteristic in its scenery, was BAAL-TAMAR (Judg. xx. 33). (6.) We must next mention the TAMAR, "the palm," which is set before us in the vision of Ezekiel (xlvi. 19, xlviii. 28). (7.) There is little doubt that Solomon's TADMOR, afterwards the famous Palmyra, on another desert frontier far to the N.E. of Tamar, is primarily the same word. (8.) Nor again are the places of the N. T. without their associations with this characteristic tree of Palestine. BETHANY means "the house of dates;" and thus we are reminded that the palm grew in the neighbourhood of the Mount of Olives. This helps our realisation of Our Saviour's entry into Jerusalem, when the people "took branches of palm-trees and went forth to meet Him" (John xii. 13; comp. Neh. viii. 15).

(9.) The word *Phoenix*, which occurs twice in the N. T. (Acts xi. 19, xv. 3) is in all probability derived from the Greek word for a palm. (10.) Lastly, *Phoenix* in the island of Crete, the harbour which St. Paul was prevented by the storm from reaching (Acts xxvii. 12), has doubtless the same derivation. From the passages where there is a literal reference to the palm-tree, we may pass to the emblematical uses of it in Scripture. Under this head may be classed the following:—(1.) The striking appearance of the tree, its uprightness and beauty, would naturally suggest the giving of its name occasionally to women (Gen. xxxviii. 6; 2 Sam. xiii. 1, xiv. 27). (2.) We have notices of the employment of this form in decorative art, both in the real temple of Solomon and in the visionary temple of Ezekiel. This work seems to have been in relief. It was a natural and doubtless customary kind of ornamentation in Eastern architecture. (3.) With a tree so abundant in Judaea, and so marked in its growth and appearance, as the palm, it seems rather remarkable that it does not appear more frequently in the imagery of the O. T.

Palm-Tree. (*Phoenix Dactylifera*.)

There is, however, in the Psalms (xcii. 12) the familiar comparison, "The righteous shall flourish like the palm-tree," which suggests a world of illustration, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, or the height at which the foliage grows, as far as possible from earth and as near as possible to heaven. Perhaps no point is more worthy of mention, if we wish to pursue the comparison, than the elasticity of the fibre of the palm, and its determined growth upwards, even when loaded with weights. (4.) The passage in Rev. vii. 9, where the glorified of all nations are described as "clothed with white robes and palms in their hands," might seem to us a purely classical image. But palm-branches were used by Jews in token of victory and peace (1 Macc. xiii. 51; 2 Macc. x. 7, xiv. 4). As to the industrial

and domestic uses of the palm, it is well known that they are very numerous: but there is no clear allusion to them in the Bible. That the ancient Orientals, however, made use of wine and honey obtained from the Palm-tree is evident from Herodotus, Strabo, and Pliny. It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxi. 5 the margin has "dates.") There may also in Cant. vii. 8, "I will go up to the palm-tree, I will take hold of the boughs thereof," be a reference to climbing for the fruit. So in ii. 3 and elsewhere (e.g. Ps. i. 3) the fruit of the palm may be intended: but this cannot be proved. It is curious that this tree, once so abundant in Judaea, is now comparatively rare, except in the Philistine plain, and in the old Phoenicia about *Beirut*.

Palsy. The palsy meets us in the N. T. only, and in features too familiar to need special remark. The words "grievously tormented" (Matt. viii. 6), may refer to paralysis agitans, or even St. Vitus' dance, in both of which the patient, being never still for a moment save when asleep, might well be so described. The woman's case who was "bowed together" by "a spirit of infirmity," may probably have been paralytic (Luke xii. 11).

Pal'ti. The Benjamite spy; son of Raphu (Num. xiii. 9).

Pal'tiel. The son of Azzan and prince of the tribe of Issachar (Num. xxiv. 26).

Pal'tite, the. Helez "the Palnite" is named in 2 Sam. xxii. 26 among David's mighty men.

Pamphylia, one of the coast-regions in the south of Asia Minor, having CILICIA on the east, and LYCIA on the west. In St. Paul's time it was not only a regular province, but the Emperor Claudius had united Lycia with it, and probably also a good part of Pisidia. It was in Pamphylia that St. Paul first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to PERGA (Acts xiii. 13). We may conclude, from Acts ii. 10, that there were many Jews in the province; and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, ATTALIA. Many years afterwards St. Paul sailed near the coast (Acts xxvii. 5).

Pan. Of the six words so rendered in A. V.; two, *machābath* and *masrēth*, seem to imply a shallow pan or plate, such as is used by Bedouins and Syrians for baking or dressing rapidly their cakes of meal, such as were used in legal oblations: the others, especially *str*, a deeper vessel or caldron for boiling meat, placed during the process on three stones.

Pannag, an article of commerce exported from Palestine to Tyre (Ez. xxvii. 17), the nature of which is a pure matter of conjecture, as the term occurs nowhere else. A comparison of the passage in Ezekiel with Gen. xliii. 11, leads to the supposition that pannag represents some of the spices grown in Palestine. The LXX., in rendering it *καρία*, favours this opinion. Hitzig observes that a similar term occurs in Sanscrit (*pannaga*) for an aromatic plant. The Syriac version, on the other hand, understands by it "millet."

Paper. [WRITING.]

Paphos, a town at the west end of CYPRUS, connected by a road with SALAMIS at the east end. Paul and Barnabas travelled, on their first missionary expedition, "through the isle," from the latter place to the former (Acts xiii. 6). The great

characteristic of Paphos was the worship of Aphrodite or Venus, who was here fabled to have risen from the sea. Her temple, however, was at "Old Paphos," now called *Kuklia*. The harbour and the chief town were at "New Paphos," at some little distance. The place is still called *Baffa*.

Papyrus. [REED.]

Parable (Heb. *māshāl*: *παράβολή*: *parabola*). The distinction between the Parable and one cognate form of teaching has been discussed under FABLE. Something remains to be said (1) as to the word, (2) as to the Parables of the Gospels, (3) as to the laws of their interpretation. I. The word *Parable*, in Gr. *Parabolē* (*παράβολή*), does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. In Hellenistic Greek, however, it acquired a wider meaning, co-extensive with that of the Hebrew *māshāl*, for which the LXX. writers with hardly an exception, make it the equivalent. That word (= *similitude*) had a large range of application, and was applied sometimes to the shortest proverbs (1 Sam. x. 12, xxiv. 13; 2 Chr. vii. 20), sometimes to dark prophetic utterances (Num. xxiii. 7, 18, xxiv. 3; Ez. xx. 49), sometimes to enigmatic maxims (Ps. lxxviii. 2; Prov. i. 6), or metaphors expanded into a narrative (Ez. xii. 22). In the N. T. itself the word is used with a like latitude. II. The Parable differs from the Mythus in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory, in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own character and costume. The allegory is self-interpreting. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the Proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. They appear frequently in the Gemara and Midrash, and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries. Later Jewish writers have seen in this employment of parables a condescension to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction. It may be questioned, however, whether this represents the use made of them by the Rabbis of Our Lord's time. The language of the Son of Sirach confines them to the scribe who devotes himself to study. The parable was made the instrument for teaching the young disciple to discern the treasures of wisdom of which the "accursed" multitude were ignorant. The teaching of Our Lord at the commencement of His ministry was, in every way, the opposite of this. The Sermon on the Mount may be taken as the type of the "words of Grace" which He spake, "not as the scribes." So for some months He taught in the synagogues and on the sea-shore of Galilee, as He had before taught in

Jerusalem, and as yet without a parable. But then there comes a change. The direct teaching was met with scorn, unbelief, hardness, and He seems for a time to abandon it for that which took the form of parables. The question of the disciples (Matt. xiii. 10) implies that they were astonished. Their master was speaking to the multitude in the parables and dark sayings which the Rabbis reserved for their chosen disciples. Here for them were two grounds of wonder. Here, for us, is the key to the explanation which He gave, that He had chosen this form of teaching because the people were spiritually blind and deaf (Matt. xiii. 13), and in order that they might remain so (Mark iv. 12). Two interpretations have been given of these words. (1.) Spiritual truths, it has been said, are in themselves hard and uninviting. Men needed to be won to them by that which was more attractive. (2.) Others again have seen in this use of parables something of a penal character. To the inner circle of the chosen it is given to know the mysteries of the kingdom of God. To those who are without, all these things are done in parables.—Neither view is wholly satisfactory. Each contains a partial truth. The worth of parables, as instruments of teaching, lies in their being at once a test of character, and in their presenting each form of character with that which, as a penalty or blessing, is adapted to it. They withdraw the light from those who love darkness. They protect the truth which they enshrine from the mockery of the scoffer. They leave something even with the careless which may be interpreted and understood afterwards. They reveal, on the other hand, the seekers after truth. These ask the meaning of the parable, and will not rest till the teacher has explained it. In this way the parable did its work, found out the fit hearers and led them on. In the parables which remain it is possible to trace something like an order. (A.) There is the group which have for their subject the laws of the Divine Kingdom. Under this head we have—1. The Sower (Matt. xiii.; Mark iv.; Luke viii.). 2. The Wheat and the Tares (Matt. xiii.). 3. The Mustard-Seed (Matt. xiii.; Mark iv.). 4. The Seed cast into the Ground (Mark iv.). 5. The Leaven (Matt. xiii.). 6. The Hid Treasure (Matt. xiii.). 7. The Pearl of Great Price (Matt. xiii.). 8. The Net cast into the Sea (Matt. xiii.). (B.) When the next parables meet us they are of a different type and occupy a different position. They are drawn from the life of men rather than from the world of nature. They are such as these—9. The Two Debtors (Luke vii.). 10. The Merciless Servant (Matt. xviii.). 11. The Good Samaritan (Luke x.). 12. The Friend at Midnight (Luke xi.). 13. The Rich Fool (Luke xii.). 14. The Wedding Feast (Luke xii.). 15. The Fig-Tree (Luke xii.). 16. The Great Supper (Luke xiv.). 17. The Lost Sheep (Matt. xviii.; Luke xv.). 18. The Lost Piece of Money (Luke xv.). 19. The Prodigal Son (Luke xv.). 20. The Unjust Steward (Luke xvi.). 21. The Rich Man and Lazarus (Luke xvi.). 22. The Unjust Judge (Luke xviii.). 23. The Pharisee and the Publican (Luke xviii.). 24. The Labourers in the Vineyard (Matt. xx.). (C.) Towards the close of Our Lord's ministry, the parables are again theocratic, but the phase of the Divine Kingdom, on which they chiefly dwell, is that of its final consummation. To this class we may refer—25. The Pounds (Luke xix.). 26. The Two Sons (Matt. xxi.). 27. The Vineyard let out

to Husbandmen (Matt. xxi.; Mark xii.; Luke xx.). 28. The Marriage-Feast (Matt. xxi.). 29. The Wise and Foolish Virgins (Matt. xxv.). 30. The Talents (Matt. xxv.). 31. The Sheep and the Goats (Matt. xxv.). It is characteristic of the several Gospels that the greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the kingdom. Those of the second are found for the most part in St. Luke. III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom, that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of Our Lord's teaching. It must be remembered that in the great patterns of interpretation which He himself has given us, there is more than this. Not only the sower and the seed and the several soils have their counterparts in the spiritual life, but the birds of the air, the thorns, the scorching heat, have each of them a significance. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to over-ride or encroach upon the lessons taught by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred, and by which they are to be measured.

Paradise (Heb. *Pardēs*). Questions as to the nature and locality of Paradise as identical with the garden of Gen. ii. and iii. have been already discussed under EDEN. It remains to trace the history of the word and the associations connected with it, as it appears in the later books of the O. T. and in the language of Christ and His Apostles. The word itself, though it appears in the above form in Song of Sol. iv. 13, Eccles. ii. 5, Neh. ii. 8, may be classed, with hardly a doubt, as of Aryan rather than of Semitic origin. It first appears in Greek as coming straight from Persia. Greek lexicographers classify it as a Persian word. Modern philologists accept the same conclusion with hardly a dissentient voice. In Xenophon the word occurs frequently, and we get vivid pictures of the scene which it implied. A wide open park, enclosed against injury, yet with its natural beauty unspoiled, with stately forest trees, many of them bearing fruit, watered by clear streams, on whose banks roved large herds of antelopes or sheep—this was the scenery which connected itself in the mind of the Greek traveller with the word *παρδεις*, and for which his own language supplied no precise equivalent. Through the writings of Xenophon, and through the general admixture of Orientalisms in the later Greek after the conquests of Alexander the word gained a recognized place, and the LXX. writers chose it for a new use which gave it a

higher worth and secured for it a more perennial life. They used the same word whenever there was any allusion, however remote, to the fair region which had been the first blissful home of man. It was natural, however, that this higher meaning should become the exclusive one, and be associated with new thoughts. Paradise, with no other word to qualify it, was the bright region which man had lost, which was guarded by the flaming sword. Soon a new hope sprang up. There was a paradise still into which man might hope to enter. It is a matter of some interest to ascertain with what associations the word was connected in the minds of the Jews of Palestine and other countries at the time of our Lord's teaching, what sense therefore we may attach to it in the writings of the N. T. In this as in other instances we may distinguish three modes of thought, each with marked characteristics, yet often blended together in different proportions, and melting one into the other by hardly perceptible degrees. Each has its counterpart in the teaching of Christian theologians. The language of the N. T. stands apart from and above all. (1.) To the Idealist school of Alexandria, of which Philo is the representative, paradise was nothing more than a symbol and an allegory. Spiritual perfection was the only paradise. The trees that grew in it were the thoughts of the spiritual man. (2.) The Rabbinic schools of Palestine presented a phase of thought the very opposite of that of the Alexandrian writer. They had their descriptions, definite and detailed, a complete topography of the unseen world. It was far off in the distant East, further than the foot of man had trod. It was a region of the world of the dead, of Sheol, in the heart of the earth. Gehenna was on one side, with its flames and torments. Paradise on the other, the intermediate home of the blessed. Or, again, paradise was neither on the earth, nor within it, but above it, in the third heaven, or in some higher orb. Or there were two paradises, the upper and the lower—one in heaven, for those who had attained the heights of holiness—one in earth, for those who had lived but decently, and the heavenly paradise was sixty times as large as the whole lower earth. (3.) Out of the discussions and theories of the Rabbis, there grew a broad popular belief, fixed in the hearts of men, accepted without discussion, blending with their best hopes. Their prayer for the dying or the dead was that his soul might rest in paradise, in the garden of Eden. The belief of the Essenes, as reported by Josephus, may be accepted as a fair representation of the thoughts of those who, like them, were not trained in the Rabbinical schools, living in a simple and more child-like faith. To them accordingly paradise was a far-off land, a region where there was no scorching heat, no consuming cold, where the soft west-wind from the ocean blew for evermore. It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N. T. connects itself. The old word is kept, and is raised to a new dignity or power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in His intercourse with His own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or the best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life.

For them, accordingly, the kingdom of Heaven, the kingdom of God, are the words most dwelt on. With the thief dying on the cross the case was different. We can assume nothing in the robber-outlaw but the most rudimentary forms of popular belief. The answer to his prayer gave him what he needed most, the assurance of immediate rest and peace. The word Paradise spoke to him, as to other Jews, of repose, shelter, joy—the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross. There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and therefore almost of necessity symbolic (2 Cor. xii. 8). (4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow, as has been noticed, in the footsteps of the Jewish schools. The word enters largely, as might be expected, into the apocryphal literature of the early Church. Where the true Gospels are most reticent, the mythical are most exuberant. (5.) The later history of the word presents some facts of interest. Accepting in this, as in other instances, the mythical elements of Eastern Christianity, the creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the languages spoken by them. In the West it passes through some strange transformations, and descends to baser uses. The *narthex*, or *atrium*, in which were assembled those who, not being *fideles* in full communion, were not admitted into the interior of the building, was known as the "Paradise" of the church. Paradise becomes in some Italian dialects *Paraviso*, and this passes into the French *parais*, denoting the western porch of a church, or the open space in front of it.

Pa'ran, one of the cities in the territory allotted to Benjamin, named only in the lists of the conquest (Josh. xviii. 23). In the *Onomasticon* ("Aphra") it is specified by Jerome only, as five miles east of Bethel. No traces of the name have yet been found in that position; but the name *Fārah* exists further to the S.E. attached to the *Wady Fārah*, one of the southern branches of the great *Wady Suwaynit*, and to a site of ruins at the junction of the same with the main valley.

Pa'ran, El-Pa'ran. 1. It is shown under KADESH that the name Paran corresponds probably in general outline with the desert *Et-Tūh*. Speaking generally, the wilderness of Sinai (Num. x. 12, xii. 16), in which the ministrations of Taberah and Hazereth, if the latter be identical with *Hādherā*, are probably included towards its N.E. limit, may be said to lie S. of the *Et-Tūh* range, the wilderness of Paran N. of it, and the one to end where the other begins. That of Paran is a stretch of chalky formation, the chalk being covered with coarse gravel, mixed with black flint and drifting sand. Between the wilderness of Paran and that of Zin no strict demarcation exists in the narrative, nor do the natural features of the region, so far as yet ascertained, yield a well-defined boundary. The name of Paran seems, as in the story of Ishmael, to have predominated towards the western extremity

of the northern desert frontier of *Et-Tih*, and in Num. xxiv. 4 the wilderness of Zin, not Paran, is spoken of as the southern border of the land or of the tribe of Judah (Josh. xv. 3). Was there, then, a Paran proper, or definite spot to which the name was applied? From Deut. i. 1 it should seem there must have been. This is confirmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region; and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Hadad the Edomite must then have lain to the N.W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except *Serbat* of the whole Sinaitic group, to be "*the Mount of God*," so close to the *Wady Feiran* that the similarity of name, supported by the recently expressed opinion of eminent geographers, may be taken as establishing substantial identity.—2. "Mount" Paran occurs only in two poetic passages (Deut. xxxiii. 2; Hab. iii. 3), in one of which Sinai and Ser appear as local accessories, in the other, Teman and (ver. 7) Cushan and Midian. It is not unlikely that if the *Wady Feiran* be the Paran proper, the name "Mount" Paran may have been either assigned to the special member (the north-western) of the Sinaitic mountain-group which lies adjacent to that wady, or to the whole Sinaitic cluster. That special member is the five-peaked ridge of *Serbat*.

Parbar. A word occurring in Hebrew and A. V. only in 1 Chr. xxvi. 18. From this passage, and also from the context, it would seem that Parbar was some place on the west side of the Temple enclosure, the same side with the causeway and the gate *Shallecheth*. The latter was close to the causeway, and we know from its remains that the causeway was at the extreme north of the western wall. Parbar therefore must have been south of *Shallecheth*. As to the meaning of the name, the *lubbis* generally agree in translating it "the outside place;" while modern authorities take it as equivalent to the *paradrin* in 2 K. xxiii. 11 (A. V. "suburbs"). Accepting this interpretation, there is no difficulty in identifying the Parbar with the suburb mentioned by Josephus in describing Herod's Temple, as lying in the deep valley which separated the west wall of the Temple from the city opposite it; in other words, the southern end of the Tyropoeon. Parbar is possibly an ancient Jebusite name.

Parchment. [Writing.]

Parlour. A word in English usage meaning the common room of the family, and hence probably in A. V. denoting the king's audience-chamber, so used in reference to Eglon (Judg. iii. 20-25).

Parmaash'ta. One of the ten sons of Haman slain by the Jews in Shushan (Esth. ix. 9).

Par'menas. One of the seven deacons, "men of honest report, full of the Holy Ghost and wisdom" (Acts vi. 5). There is a tradition that he suffered martyrdom at Philippi in the reign of Trajan.

Par'nach, father or ancestor of Elizaphan prince of the tribe of Zebulun (Num. xxiv. 25).

Pa'roah. The descendants of Parosh, in number 2172, returned from Babylon with Zerubbabel (Ezr.

ii. 3; Neh. vii. 8). Another detachment of 150 males, with Zechariah at their head, accompanied Ezra (Ezr. vii. 3). Seven of the family had married foreign wives (Ezr. x. 25). They assisted in the building of the wall of Jerusalem (Neh. iii. 25), and signed the covenant with Nehemiah (Neh. x. 14). In the last-quoted passage the name Parosh is clearly that of a family, and not of an individual.

Parshandatha, the eldest of Haman's ten sons who were slain by the Jews in Shushan (Esth. ix. 7).

Parthians occurs only in Acts ii. 9, where it designates Jews settled in Parthia. Parthia Proper was the region stretching along the southern flank of the mountains which separate the great Persian desert from the desert of Kharezm. It lay south of Hyrcania, east of Media, and north of Sagartia. The ancient Parthians are called a "Scythic" race, and probably belonged to the great Turanian family. Various stories are told of their origin. Really nothing is known of them till about the time of Darius Hystaspis, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. Herodotus speaks of them as contained in the 16th satrapy of Darius. In the final struggle between the Greeks and Persians they remained faithful to the latter, serving at Arbela; but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country. In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for some while was counted among the territories of the Seleucidae. About B.C. 256, however, they ventured upon a revolt, and under Arsaces they succeeded in establishing their independence. Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasmanian desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivalling Rome—the only existing power which had tried its strength against Rome and not been worsted in the encounter. The Parthian dominion lasted for nearly five centuries, commencing in the third century before, and terminating in the third century after, our era. It has already been stated that the Parthians were a Turanian race. Their success is to be regarded as the subversion of a tolerably advanced civilisation by a comparative barbarism—the substitution of Tatar coarseness for Arian polish and refinement.

Partridge (Heb. *kôrê*) occurs only 1 Sam. xxvi. 20, and in Jer. xvii. 11. The translation of *Kôrê* by "partridge" is supported by many of the old versions. The "hunting this bird upon the mountains" (1 Sam. xxvi. 20) entirely agrees with the habits of two well-known species of partridge, viz. *Cuculus saxatilis* (the Greek partridge) and *Ammoperdix Heyii*. It will be seen by the marginal reading that the passage in Jeremiah may bear the following interpretation:—As the *Kôrê* "gathereth young which she hath not brought forth." It has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent. It is perhaps almost needless to remark that this is a mere fable, in which, however, the ancient Orientals may have believed. The explanation of the rendering of the text of the A. V. is obvi-

ously as follows:—Partridges were often “hunted” in ancient times as they are at present, either by hawking or by being driven from place to place till they become fatigued, when they are knocked down by the clubs or *zervattys* of the Arabs. Thus, nests were no doubt constantly disturbed, and many destroyed: as, therefore, is a partridge which is driven from her eggs, so is he that enricheth himself by unjust means—“he shall leave them in the midst of his days.” The expression in Eccles. xi. 30, “like as a partridge taken (and kept) in a cage,” clearly refers, as Shaw has observed, to “a decoy partridge.” Our common partridge (*Pedica cinerea*), as well as the Barbary (*C. pectorosa*) and red-leg (*C. rufa*), do not occur in Palestine.

Cuculus saxatilis.

Paruah, the father of Jehoshaphat, Solomon's commissariat officer in Issachar (1 K. iv. 17).

Parva'im, the name of an unknown place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6). We may notice the conjectures of Knobel that it is an abbreviated form of Sepharvaim, and of Wilford, that it is derived from the Sanscrit *pārva*, “eastern,” and is a general term for the East.

Pasach, son of Japhiet of the tribe of Asher (1 Chr. vi. 33).

Pas-dam'mim. The form under which in 1 Chr. xi. 13 the name appears, which in 1 Sam. xvii. 1 is given more at length as *EPHES-DAMMIM*. The lexicographers do not decide which is the earlier or correcter of the two. A ruined site bearing the name of *Damán* or *Chérbet Damoun*, lies near the road from Jerusalem to *Beit Jibrin*, about three miles E. of *Shuweikeh* (Socho). This Van de Velde proposes to identify with Pas-dammim.

Paseah. 1. Son of Eshton, in an obscure fragment of the genealogies of Judah (1 Chr. iv. 12).—2. The “sons of Paseah” were among the Nethinim who returned with Zerubbabel (Ezr. ii. 49).

Pashur. 1. Name of one of the families of priests of the chief house of Malchijah (Jer. xxi. 1, xxxviii. 1; 1 Chr. ix. 12, xxiv. 9; Neh. xi. 12). In the time of Nehemiah this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38; Neh. vii. 41, x. 3). The individual from whom the family was named was probably Pashur the son of Malchiah, who in the reign of Zedekiah was one of the chief princes of the court (Jer. xxxviii. 1). He was sent, with others, by Zedekiah to Jeremiah at the time when Nebuchadnezzar was preparing his attack upon Jerusalem (Jer. xxi.). Again somewhat later, Pashur joined

with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor (Jer. xxxviii.). Nothing more is known of him.—

2. Another person of this name, also a priest, and “chief governor of the house of the Lord,” is mentioned in Jer. xx. 1. He is described as “the son of Immer” (1 Chr. xxiv. 14), probably the same as Amariah (Neh. x. 3, xii. 2, &c.). In the reign of Jehoiakim he showed himself as hostile to Jeremiah as his namesake the son of Malchiah did afterwards, and put him in the stocks by the gate of Benjamin. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to Magor-missabib (*Terror on every side*), and that he and all his house should be carried captives to Babylon and there die (Jer. xx. 1-6).—3. Father of Gedaliah (Jer. xxxviii. 1).

Passage. Used in plur. (Jer. xxii. 20), probably to denote the mountain region of Abarim, on the east side of Jordan. It also denotes a river-ford or a mountain gorge or pass.

Passover, the first of the three great annual Festivals of the Israelites, celebrated in the month Nisan, from the 14th to the 21st. The following are the principal passages in the Pentateuch relating to the Passover:—Ex. xii. 1-51, xiii. 3-10, xxiii. 14-19, xxxiv. 18-26; Lev. xxiii. 4-14; Num. ix. 1-14; xxviii. 16-25; Deut. xvi. 1-6.—1. INSTITUTION AND FIRST CELEBRATION OF THE PASSOVER.—When the chosen people were about to be brought out of Egypt, the word of the Lord came to Moses and Aaron, commanding them to instruct all the congregation of Israel to prepare for their departure by a solemn religious ordinance. On the tenth day of the month Abib, the head of each family was to select from the flock either a lamb or a kid, a male of the first year, without blemish. If his family was too small to eat the whole of the lamb, he was permitted to invite his nearest neighbour to join the party. On the fourteenth day of the month, he was to kill his lamb while the sun was setting. He was then to take the blood in a basin, and with a sprig of hyssop to sprinkle it on the two side-posts and the lintel of the door of the house. The lamb was then thoroughly roasted, whole. It was expressly forbidden that it should be boiled, or that a bone of it should be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No male who was uncircumcised was to join the company. Each one was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. He was to eat in haste, and it would seem that he was to stand during the meal. The number of the party was to be calculated as nearly as possible, so that all the flesh of the lamb might be eaten; but if any portion of it happened to remain, it was to be burned in the morning. No moiety of it was to be carried out of the house. The legislator was further directed to inform the people of God's purpose to smite the first-born of the Egyptians, to declare that the Passover was to be to them an ordinance for ever, to give them directions respecting the order and duration of the festival in future times, and to enjoin upon them to teach their children its meaning, from generation to generation. When the message was delivered to the people they bowed their heads in worship. The lambs were selected, on the fourteenth they were slain, and the blood sprinkled, and in the following evening, after the fifteenth day of the month had commenced, the

first paschal meal was eaten. At midnight the first-born of the Egyptians were smitten. The king and his people were now urgent that the Israelites should start immediately, and readily bestowed on them supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxiii. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provisions, which was not yet leavened.—II. OBSERVANCE OF THE PASSOVER IN LATER TIMES.—1. In the twelfth and thirteenth chapters of Exodus there are not only distinct references to the observance of the festival in future ages (*e.g.* xii. 2, 14, 17, 24-27, 42, xiii. 2, 5, 8-10), but there are several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed. In the later notices of the festival in the books of the law there are particulars added which appear as modifications of the original institution (Lev. xxiii. 10-14; Num. xxviii. 16-25; Deut. xvi. 1-6). Hence it is not without reason that the Jewish writers have laid great stress on the distinction between "the Egyptian Passover" and "the perpetual Passover." 2. The following was the general order of the observances of the Passover in later times according to the direct evidence of Scripture:—On the 14th of Nisan every trace of leaven was put away from the houses, and on the same day every male Israelite not labouring under any bodily infirmity or ceremonial impurity, was commanded to appear before the Lord at the national sanctuary with an offering of money in proportion to his means (Ex. xxiii. 15; Deut. xvi. 16, 17). Devout women sometimes attended, as is proved by the instances of Hannah and Mary (1 Sam. i. 7; Luke ii. 41, 42). As the sun was setting, the lambs were slain, and the fat and blood given to the priests (2 Chr. xxxv. 5, 6). The lamb was then roasted whole, and eaten with unleavened bread and bitter herbs; no portion of it was to be left until the morning. The same night, after the 15th of Nisan had commenced, the fat was burned by the priest and the blood sprinkled on the altar (2 Chr. xxx. 16, xxxv. 11). On the 15th, the night being passed, there was a holy convocation, and during that day no work might be done, except the preparation of necessary food (Ex. xii. 16). On this and the six following days an offering in addition to the daily sacrifice was made of two young bullocks, a ram, and seven lambs of the first year, with meat-offerings, for a burnt-offering, and a goat for a sin-offering (Num. xxviii. 19-23).³ On the 16th of the month, "the morrow after the sabbath" (*i.e.* after the day of holy convocation), the first sheaf of harvest was offered and waved by the priest before the Lord, and a male lamb was offered as a burnt sacrifice with a meat and drink offering. Nothing necessarily distinguished the four following days of the festival, except the additional burnt and sin offerings, and the restraint from some kinds of labour. On the seventh day, the 21st of Nisan, there was a holy convocation, and the day appears to have been one of peculiar solemnity. As at all the festivals, cheerfulness was to prevail during the whole week, and all care was to be laid aside (Deut. xvii. 7). 3. (a.) *The Paschal Lamb*.—After the first Passover in Egypt there is no trace of the lamb having been selected before it was wanted. In later times, we are certain that it was sometimes not provided before the 14th of the month (Luke xii. 7-9; Mark xiv. 12-16). The

law formally allowed the alternative of a kid (Ex. xii. 5), but a lamb was preferred, and was probably nearly always chosen. It was to be faultless and a male, in accordance with the established estimate of animal perfection (see Mal. i. 14). Either the head of the family, or any other person who was not ceremonially unclean (2 Chr. xxx. 17), took it into the court of the Temple on his shoulders. The Mishna gives a particular account of the arrangement which was made in the court of the Temple. As the paschal lamb could be legally slain, and the blood and fat offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be offered by the Jews after the destruction of Jerusalem. The spring festival of the modern Jews strictly consists only of the feast of unleavened bread. (b.) *The Unleavened Bread*.—There is no reason to doubt that the unleavened bread eaten in the Passover and that used on other religious occasions were of the same nature. It might be made of wheat, spelt, barley, oats, or rye, but not of rice or millet. It appears to have been usually made of the finest wheat flour. It was probably formed into dry, thin biscuits, not unlike those used by the modern Jews. (c.) *The Bitter Herbs and the Sauce*.—According to the Mishna the bitter herbs (Ex. xii. 8) might be endive, chicory, wild lettuce, or nettles. These plants were important articles of food to the ancient Egyptians. The sauce into which the herbs, the bread, and the meat were dipped as they were eaten (John xii. 26; Matt. xxvi. 23) is not mentioned in the Pentateuch. According to Bartenora it consisted of only vinegar and water; but others describe it as a mixture of vinegar, figs, dates, almonds, and spice. (d.) *The Four Cups of Wine*.—There is no mention of wine in connexion with the Passover in the Pentateuch; but the Mishna strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite. Two of them appear to be distinctly mentioned Luke xii. 17, 20. "The cup of blessing" (1 Cor. x. 16) was probably the latter one of these, and is generally considered to have been the third of the series, after which a grace was said; though a comparison of Luke xii. 20 (where it is called "the cup after supper") with Ps. x. 7, and the designation "*cup of the Hallel*," might rather suggest that it was the fourth and last cup. (e.) *The Hallel*.—The service of praise sung at the Passover is not mentioned in the Law. The name is contracted from *Hallelujah*. It consisted of the series of Psalms from cxiii. to cxviii. The first portion, comprising Ps. cxiii. and cxiv., was sung in the early part of the meal, and the second part after the fourth cup of wine. This is supposed to have been the "hymn" sung by our Lord and His Apostles (Matt. xxvi. 30; Mark xiv. 26). (f.) *Modes and Order of the Paschal Meal*.—Adopting as much from Jewish tradition as is not inconsistent or improbable, the following appears to have been the usual custom:—All work, except that belonging to a few trades connected with daily life, was suspended for some hours before the evening of the 14th Nisan. It was not lawful to eat any ordinary food after mid-day. No male was admitted to the table unless he was circumcised, even if he was of the seed of Israel (Ex. xii. 48). Neither, according to the letter of the law, was any one of either sex admitted who was ceremonially unclean (Num. ix. 6); but this rule was on special occasions liberally applied. The Rabbins expressly

state that women were permitted, though not commanded, to partake; but the Karaites, in more recent times, excluded all but full-grown men. It was customary for the number of a party to be not less than ten. When the meal was prepared, the family was placed round the table, the paterfamilias taking a place of honour, probably somewhat raised above the rest. There is no reason to doubt that the ancient Hebrews sat as they were accustomed to do at their ordinary meals. Our Lord and His Apostles conformed to the usual custom of their time, and reclined (Luke xiii. 14, &c.). When the party was arranged the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special one on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either with or without the sauce. The unleavened bread was handed round next, and afterwards the lamb was placed on the table in front of the head of the family. Before the lamb was eaten the second cup of wine was filled, and the son, in accordance with Ex. xii. 26, asked his father the meaning of the feast. In reply, an account was given of the sufferings of the Israelites in Egypt, and of their deliverance, with a particular explanation of Deut. xxvi. 5, and the first part of the Hallel (Ps. cxiii. cxiv.) was sung. This being gone through, the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterwards the fourth. The second part of the Hallel (Ps. cxv. to cxviii.) was then sung. A fifth wine-cup appears to have been occasionally produced, but perhaps only in later times. What was termed the greater Hallel (Ps. cxx. to cxxviii.) was sung on such occasions. The Israelites who lived in the country appear to have been accommodated at the feast by the inhabitants of Jerusalem in their houses, so far as there was room for them (Luke xxii. 10-12; Matt. xxvi. 18). Those who could not be received into the city encamped without the walls in tents, as the pilgrims now do at Mecca. (g.) *The first Sheaf of Harvest.*—The offering of the Omer, or sheaf, is mentioned nowhere in the law except Lev. xxiii. 10-14. It is there commanded that when the Israelites reached the land of promise, they should bring, on the 16th of the month, "the morrow after the sabbath" (i. e. the day of holy convocation), the first sheaf of the harvest to the priest, to be waved by him before the Lord. The sheaf was of barley, as being the grain which was first ripe (2 K. iv. 42). (h.) *The Chagigah.* The daily sacrifices are enumerated in the Pentateuch only in Num. xviii. 19-23, but reference is made to them Lev. xxiii. 8. Besides these public offerings, there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud *Chagigah*, i. e. "festivity." It was a voluntary peace-offering made by private individuals. The victim might be taken either from the flock or the herd. It might be either male or female, but it must be without blemish. The offerer laid his hand upon its head, and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was burned by the priest. The breast was given to the priest as a wave-offering, and the right shoulder as a heave-offering (Lev. iii. 1-5, vii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the day following;

but if any portion was left till the third day it was burned (Lev. vii. 16-18). The eating of the *Chagigah* was an occasion of social festivity connected with the festivals, and especially with the Passover. (i.) *Release of Prisoners.*—It is a question whether the release of a prisoner at the Passover (Matt. xvii. 15; Mark xv. 7; Luke xxiii. 17; John xviii. 39) was a custom of Roman origin resembling what took place at the lectisternium (Liv. v. 13), and, in later times, on the birthday of an emperor; or whether it was an old Hebrew usage belonging to the festival, which Pilate allowed the Jews to retain. (k.) *The Second, or Little Passover.*—When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with a dead body. Being thus prevented from obeying the Divine command, they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (Num. ix. 11). The Talmudists called this the *Little Passover*. (l.) *Observances of the Passover recorded in Scripture.*—Of these, seven are of chief historical importance:—1. The first Passover in Egypt (Ex. xii.). 2. The first kept in the desert (Num. ix.). 3. That celebrated by Joshua at Gilgal (Josh. v.). 4. That which Hezekiah observed on the occasion of his restoring the national worship (2 Chr. xxx.). This Passover was not held till the second month, the proper time for the Little Passover. 5. The Passover of Josiah in the eighteenth year of his reign (2 Chr. xxxv.). 6. That celebrated by Ezra after the return from Babylon (Ezr. vi.). 7. The last Passover of our Lord's life.—III. *THE LAST SUPPER.*—1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist was the paschal supper according to the law, is a question of great difficulty. No point in the Gospel history has been more disputed. If we had nothing to guide us but the three first Gospels, no doubt of the kind could well be raised, though the narratives may not be free from difficulties in themselves; but, on the other hand, if we had no information but that which is to be gathered from St. John's Gospel, we could not hesitate to infer that the evening of the supper was that of the 13th of Nisan, the day preceding that of the paschal meal. If we admit, in accordance with the first view of these passages, that the last supper was on the 13th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten. He lay in the grave on the 15th (which was a "high day" or double sabbath, because the weekly sabbath coincided with the day of holy convocation), and the Sunday of the resurrection was the 16th. It is not surprising that some modern critics should have given up as hopeless the task of reconciling this difficulty. 2. The reconciliations which have been attempted fall under three principal heads:—i. Those which regard the supper at which our Lord washed the feet of His disciples (John xiii.), as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptical narratives. ii. Those in which it is endeavoured to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the

‘true paschal supper. iii. Those in which the most obvious view of the three first narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law. (i.) The first method has the advantage of furnishing the most ready way of accounting for St. John’s silence on the institution of the Holy Communion; but any explanation founded on the supposition of two meals appears to be rendered untenable by the context. (ii.) The current of opinion in modern times has set in favour of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the 13th, and that our Lord was crucified on the 14th. Those who thus hold that the supper was eaten on the 13th day of the month have devised various ways of accounting for the circumstance, of which the following are the most important:— (a.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined towards them, used to eat the Passover one day before the rest, and that our Lord approved of their practice. (b.) It has been conjectured that the great body of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the 14th, but what commonly passed as the 13th. (c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the 15th instead of the 14th, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly sabbath) coming together. (d.) Grotius thought that the meal was a *πᾶσχα μνησθευτικόν* (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a *πᾶσχα ὁσισμῶν*. (e.) A view which has been received with favour far more generally than either of the preceding is, that the Last Supper was instituted by Christ for the occasion, in order that He might Himself suffer on the proper evening on which the paschal lamb was slain. Erasmus and others have called it an “anticipatory Passover;” but if this view is to stand, it seems better, in a formal treatment of the subject, not to call it a Passover at all. (iii.) They who take the facts as they appear to lie on the surface of the synoptical narratives start from a simpler point. They have to show that the passages in St. John may be fairly interpreted in such a manner as not to interfere with their own conclusion. (a.) John xiii. 1, 2. Does *πρὸ τῆς ἑσπέρης* limit the time only of the proposition in the first verse, or is the limitation to be carried on to verse 2, so as to refer to the supper? In the latter case the natural conclusion is, that the meal was one eaten before the paschal supper. Others take *πᾶσχα* to mean the seven days of unleavened bread as not including the eating of the lamb, and justify this limitation by St. Luke xlii. 1; but not a few of those who take this side of the main question regard the first verse as complete in itself. On the whole, Neander himself admits that nothing can safely be inferred from John xlii. 1, 2, in favour of the supper having taken place on the 13th. (b.) John xlii. 29. It is urged that the things of which they had “need against the feast,” might have been the provisions for the Chagigah, perhaps with what else was required for the seven days of unleavened bread. The usual day for sacrificing the Chagigah was the 15th,

which was then commencing. But there is another difficulty in the disciples thinking it likely either that purchases could be made, or that alms could be given to the poor, on a day of holy convocation. It is highly probable that the letter of the law in regard to trading was habitually relaxed in the case of what was required for religious rites or for burials. (c.) John xviii. 28. The Jews refused to enter the praetorium lest they should be defiled, and so disqualified from eating the Passover. Neander and others deny that this passage can possibly refer to anything but the paschal supper. But it is alleged that the words may either be taken in a general sense as meaning “that they might go on keeping the passover,” or that *τὸ πᾶσχα* may be understood specifically to denote the Chagigah. (d.) John xix. 14. “The preparation of the Passover” at first sight would seem as if it must be the preparation for the Passover on the 14th, a time set apart for making ready for the paschal week, and for the paschal supper in particular. It is naturally so understood by those who advocate the notion that the last supper was eaten on the 13th. But they who take the opposite view affirm that, though there was a regular “preparation” for the Sabbath, there is no mention of any “preparation” for the festivals. It seems to be essentially connected with the Sabbath itself (John xix. 31). The phrase in John xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. If these arguments are admitted, the day of the preparation mentioned in the Gospels might have fallen on the day of holy convocation, the 15th of Nisan. (e.) John xix. 31. “That Sabbath day was a high day.” It is assumed by those who fix the supper on the 13th that the term was applied, owing to the 15th being “a double sabbath,” from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being that on which the Omer was offered, and from which were reckoned the fifty days to Pentecost. (f.) The difficulty of supposing that our Lord’s apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged. If many of the rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them make the difficulty equally great whether we suppose the trial to have taken place on the 14th or the 15th. In others there are exceptions permitted which seem to go far to meet the case before us. But we have better proof than either the Mishna or the Gemara can afford that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the “great day of the feast,” sending out officers to take our Lord, and rebuking them for not bringing Him (John vii. 32-45). St. Peter also was seized during the Passover (Acts xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (Matt. xvi. 5). On the whole, notwithstanding

the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable licence was allowed in regard to them, as we have already observed. 3. There is a strange story preserved in the Gemara (*Sanhedrin*, vi. 2), that our Lord having vainly endeavoured during forty days to find an advocate, was sentenced, and, on the 14th of Nisan, stoned, and afterwards hanged. As we know that the difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth anything in the way of evidence. Not much use can be made in the controversy of the testimonies of the Fathers; but few of them attempted to consider the question critically. 4. It must be admitted that the narrative of St. John, as far as the mere succession of events is concerned, bears consistent testimony in favour of the last supper having been eaten on the evening before the Passover. That testimony, however, does not appear to be so distinct, and so incapable of a second interpretation, as that of the synoptical Gospels, in favour of the meal having been the paschal supper itself, at the legal time (see especially Matt. xxvi. 17; Mark xiv. 1, 12; Luke xxii. 7).—IV. MEANING OF THE PASSOVER.—1. Each of the three great festivals contained a reference to the annual course of nature. Two at least of them—the first and the last—also commemorated events in the history of the chosen people. It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. That part of its ceremonies which has a direct agricultural reference—the offering of the Omer—holds a very subordinate place. 2. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from the condition of bondmen under a foreign tyrant to that of a free people owing allegiance to no one but Jehovah. The prophet in a later age spoke of the event as a *creation* and a *redemption* of the nation. God declares Himself to be “the creator of Israel.” The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birthday feast. It was the yearly memorial of the dedication of the people to Him who had saved their first-born from the destroyer, in order that they might be made holy to Himself. 3. (a.) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calov, Carpzov) have denied that it was a sacrifice in the proper sense of the word. But most of their contemporaries (Cudworth, Bochart, Vitringa), and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly ascribed to it. It was offered in the holy place (Deut. xvi. 5, 6); the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 16, xxxv. 11). The language of Ex. xii. 27, xxiii. 18, Num. ix. 7, Deut. xvi. 2, 5, together with 1 Cor. v. 7, would seem to decide the question beyond the reach of doubt. As the original institution of the Passover

in Egypt preceded the establishment of the priesthood and the regulation of the service of the tabernacle, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law. The head of the family slew the lamb in his own house, not in the holy place; the blood was sprinkled on the doorway, not on the altar. But when the law was perfected, certain particulars were altered in order to assimilate the Passover to the accustomed order of religious service. It has been conjectured that the imposition of the hands of the priest was one of these particulars, though it is not recorded (Kurtz). But whether this was the case or not, the other changes which have been stated seem to be abundantly sufficient for the argument. It can hardly be doubted that the paschal lamb was regarded as the great annual peace-offering of the family, a thank-offering for the existence and preservation of the nation (Ex. xiii. 14-16), the typical sacrifice of the elected and reconciled children of the promise. A question, perhaps not a wise one, has been raised regarding the purpose of the sprinkling of the blood on the lintels and door-posts. Some have considered that it was meant as a mark to guide the destroying angel. Others suppose that it was merely a sign to confirm the faith of the Israelites in their safety and deliverance. Surely neither of these views can stand alone. The sprinkling must have been an act of faith and obedience which God accepted with favour. That it also denoted the purification of the children of Israel from the abominations of the Egyptians, and so had the accustomed significance of the sprinkling of blood under the law (Heb. ix. 22), is evidently in entire consistency with this view. No satisfactory reason has been assigned for the command to choose the lamb four days before the paschal supper. That the lamb was to be roasted and not boiled, has been supposed to commemorate the haste of the departure of the Israelites. Kurtz conjectures that the lamb was to be roasted with fire, the purifying element, because the meat was thus left pure, without the mixture even of the water which would have entered into it in boiling. It is not difficult to determine the reason of the command, “not a bone of him shall be broken.” The lamb was to be a symbol of unity; the unity of the family, the unity of the nation, the unity of God with His people whom He had taken into covenant with Himself. (b.) The unleavened bread ranks next in importance to the paschal lamb. The notion has been very generally held, or taken for granted, both by Christian and Jewish writers of all ages, that it was intended to remind the Israelites of the unleavened cakes which they were obliged to eat in their hasty flight (Ex. xii. 24, 39); but there is not the least intimation to this effect in the sacred narrative. It has been considered by some that the unleavened bread and the bitter herbs alike owe their meaning to their being regarded as unpalatable food; but this seems to be wholly inconsistent with the pervading joyous nature of the festival. On the whole we are warranted in concluding that unleavened bread had a peculiar sacrificial character, according to the Law. It seems more reasonable to accept St. Paul's reference to the subject (1 Cor. v. 6-8) as furnishing the true meaning of the symbol. Fermentation is decomposition, a dissolution of unity. The pure dry biscuit would be an apt emblem of unchanged duration, and, in its freedom from foreign mixture, of purity

also. (c.) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured (Ex. i. 14). But it has been remarked by Abenezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten. (d.) The offering of the Omer, though it is obviously that part of the festival which is immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation. Again, the consecration of the first-fruits, the first-born of the soil, is an easy type of the consecration of the first-born of the Israelites. 4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Hence we are so often reminded of it, more or less distinctly, in the ritual and language of the Church. Its outline, considered in reference to the great deliverance of the Israelites which it commemorated, and many of its minute details, have been appropriated as current expressions of the truths which God has revealed to us in the fulness of time in sending His Son upon earth. It is not surprising that ecclesiastical writers should have pushed the comparison too far, and exercised their fancy in the application of triting or accidental particulars either to the facts of our Lord's life or to truths connected with it. But, keeping within the limits of sober interpretation indicated by Scripture itself, the application is singularly full and edifying. The crowning application of the paschal rites to the truths of which they were the shadowy promises appears to be that which is afforded by the fact that our Lord's death occurred during the festival. According to the Divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the law. It does not seem needful that, in order to give point to this coincidence, we should (as some have done) draw from it an *a priori* argument in favour of our Lord's crucifixion having taken place on the 14th of Nisan. It is enough to know that our own Holy Week and Easter stand as the anniversary of the same great facts as were foreshown in those events of which the yearly Passover was a commemoration. As compared with the other festivals, the Passover was remarkably distinguished by a single victim essentially its own, sacrificed in a very peculiar manner. In this respect, as well as in the place it held in the ecclesiastical year, it had a formal dignity and character of its own. It was the representative festival of the year, and in this unique position it stood in a certain relation to circumcision as the second sacrament of the Hebrew Church (Ex. xii. 44).

Patara, a Lycian city of some considerable note. It was situated on the south-western shore of Lycia, not far from the left bank of the river Xanthus. The coast here is very mountainous and bold. Immediately opposite is the island of Rhodes. Patara was practically the seaport of the city of Xanthus, which was ten miles distant. These notices of its position and maritime importance introduce us to the single mention of the place in the Bible (Acts xi. 1, 2).

CON. D. B.

Pathos, PETHAHIAH the Levite (1 Esdr. ix. 23; comp. Esr. x. 23).

Path'ros, gent. noun PATHRUSIM, a part of Egypt, and a Mizraite tribe. That Pathros was in Egypt admits of no question: we have to attempt to decide its position more nearly. In the list of the Mizraites, the Pathrusim occur after the Naphthuhim, and before the Casluhim; the latter being followed by the notice of the Philistines, and by the Caphtorim (Gen. x. 13, 14; 1 Chr. i. 12). Pathros is mentioned in the prophecies of Isaiah (xi. 11), Jeremiah (xliv. 1, 15), and Ezekiel (xxix. 14, xxx. 13-18). From the place of the Pathrusim in the list of the Mizraites, they might be supposed to have settled in Lower Egypt, or the more northern part of Upper Egypt. It seems, if the order be geographical, as there is reason to suppose, that it is to be inferred that the Pathrusim were seated in Lower Egypt, or not much above it, unless there be any transposition. If the original order were Pathrusim, Caphtorim, Casluhim, then the first might have settled in the highest part of Upper Egypt, and the other two below them. The occurrences in Jeremiah seem to favour the idea that Pathros was part of Lower Egypt, or the whole of that region. The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favour the idea that it was part of or all Upper Egypt. Pathros has been connected with the Pathyrite nome, the Phatunite of Pliny (*H. N.* v. 9, §47), in which Thebes was situate. This identification may be as old as the LXX. The discovery of the Egyptian name of the town after which the nome was called puts the inquiry on a safer basis. It is written HA-HAT-HER, "The Abode of Hather," the Egyptian Venus. It may perhaps have sometimes been written P-HA-IAT-HER, in which case the P-H and T-H would have coalesced in the Hebrew form, as did T-H in Caphtor. On the evidence here brought forward, it seems reasonable to consider Pathros to be part of Upper Egypt, and to trace its name in that of the Pathyrite nome. But this is only a very conjectural identification, which future discoveries may overthrow.

Path'rusim. [PATHROS.]

Patmos (Rev. i. 9). Two recent and copious accounts, one by a German, the other by a French traveller, furnish us with very full information regarding Patmos. The aspect of the island is peculiarly rugged and bare. And such a scene of banishment for St. John in the reign of Domitian is quite in harmony with what we read of the custom of the period. Patmos is divided into two nearly equal parts, a northern and a southern, by a very narrow isthmus, where, on the east side, are the harbour and the town. On the hill to the south, crowning a commanding height, is the celebrated monastery, which bears the name of "John the Divine." Halfway up the ascent is the cave or grotto where tradition says that St. John received the Revelation. We have only to add that Patmos is one of the Sporades, and is in that part of the Aegean which is called the Icarian Sea. It must have been conspicuous on the right when St. Paul was sailing (Acts xx. 15, xxi. 1) from SAMOS to COS.

Patriarchs. The name *Patriarch* (πατριάρχης) is applied in the N. T. to Abraham (Heb. vii. 4), to the sons of Jacob (Acts vii. 8, 9), and to David (Acts ii. 29); and is apparently intended to be equivalent to the phrase, the "head" or "prince of a

tribe," so often found in the O. T. It is used in this sense by the LXX. In 1 Chr. xxiv. 31, xxvii. 22; 2 Chr. xxiii. 20, xxvi. 12. In common usage the title of patriarch is assigned especially to those whose lives are recorded in Scripture previous to the time of Moses. The patriarchal times are naturally divided into the ante-diluvian and post-diluvian periods. 1. In the former the Scripture record contains little except the list of the line from Seth, through Enos, Cainan, Mahalaleel, Jared, Enoch, Methuselah, and Lamech, to Noah; with the ages of each at their periods of generation and at their deaths. To some extent parallel to this, is given the line of Cain; Enoch, Irad, Mehujael, Methusael, Lamech, and the sons of Lamech, Jabal, Jubal, and Tubal-Cain. To the latter line are attributed the first signs of material civilization, the building of cities, the division of classes, and the knowledge of mechanical arts; while the only moral record of their history obscurely speaks of violence and bloodshed. One of the main questions raised as to the ante-diluvian period turns on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 365 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 969 (Methuselah). This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a clan or family, and his age its duration, appears to be a mere evasion of difficulty. It must either be accepted, as a plain statement of fact, or regarded as purely fabulous, like the legendary assignment of immense ages to the early Indian or Babylonian or Egyptian kings. In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. The constant attribution in all legends of great age to primeval men is at least as likely to be a distortion of fact, as a mere invention of fancy. If the Divine origin of Scripture be believed, its authority must be accepted in this, as in other cases; and the list of the ages of the patriarchs be held to be (what it certainly claims to be) a statement of real fact. 2. It is in the post-diluvian periods that more is gathered as to the nature of the patriarchal history. It is at first general in its scope. The "Covenant" given to Noah is one, free from all condition, and fraught with natural blessings, extending to all alike. But the history soon narrows itself to that of a single tribe or family, and afterwards touches the general history of the ancient world and its empires, only so far as it bears upon this. It is in this last stage that the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of wealth. In Scripture this authority is consecrated by an ultimate reference to God, as the God of the patriarch, the Father (that is) both of him and his children. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of history, and of the institutions recorded. The type of character formed

under this dispensation, is one imperfect in intellectual and spiritual growth, because not yet tried by the subtler temptations, or forced to contemplate the deeper questions of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centering in Him, yet allowing, under its unquestioned sacredness, a familiarity and freedom of intercourse with Him, which is strongly contrasted with the stern and awful character of the Mosiac dispensation. To contemplate it from a Christian point of view is like looking back on the unconscious freedom and innocence of childhood, with that deeper insight and strength of character which are gained by the experience of manhood. We see in it the germs of the future, of the future revelation of God, and the future trials and development of man. It is on this fact that the typical interpretation of its history depends. In the post-diluvian history of the chosen family, is seen the distinction of the true believers, possessors of a special covenant, special revelation, and special privileges, from the world without. In it is therefore shadowed out the history of the Jewish Nation and Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

Pat'rosæ. A Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 14). Like many other names mentioned in Rom. xvi., this was borne by at least one member of the emperor's household (Suet. *Galba*, 20; Martial, *Ep.* ii. 32, 3).

Patroclus, the father of Nicanor, the famous adversary of Judas Maccabæus (2 Macc. viii. 9).

Paul, but in 1 Chr. i. 50, **PAI**, the capital of Hagar, king of Edom (Gen. xxxvi. 39). Its position is unknown.

Paul, the Apostle of Jesus Christ to the Gentiles.—*Original Authorities.*—Nearly all the original materials for the Life of St. Paul are contained in the Acts of the Apostles, and in the Pauline Epistles. Out of a comparison of these authorities the biographer of St. Paul has to construct his account of the really important period of the Apostle's life. The early traditions of the Church appear to have left almost untouched the space of time for which we possess those sacred and abundant sources of knowledge; and they aim only at supplying a few particulars in the biography beyond the points at which the narrative of the Acts begins and terminates. We shall assume the Acts of the Apostles to be a genuine and authentic work of St. Luke, the companion of St. Paul, and shall speak of the Epistles at the places which we believe them to occupy in the history.—*Prominent points in the Life.*—Foremost of all is his *Conversion*. This was the main root of his whole life, outward and inward. Next after this, we may specify his *Labours at Antioch*. From these we pass to the *First Missionary Journey*, in the eastern part of Asia Minor. *The Visit to Jerusalem* was a critical point, both in the history of the Church and of the Apostle. *The introduction of the Gospel into Europe*, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul's mission. A third great missionary journey, chiefly characterized by a long stay at *Ephesus*, is further interesting from its connexion with four leading Epistles. This was immediately

followed by the apprehension of St. Paul at Jerusalem, and his imprisonment at Caesarea. And the last event of which we have a full narrative is the *Voyage to Rome*.—*Saul of Tarsus, before his Conversion*.—Up to the time of his going forth as an avowed preacher of Christ to the *Gentiles*, the Apostle was known by the name of Saul. This was the Jewish name which he received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city. Of his parents we know nothing, except that his father was of the tribe of Benjamin (Phil. iii. 5), and a Pharisee (Acts xxiii. 6), that he had acquired by some means the Roman franchise ("I was free born," Acts xxii. 28), and that he was settled in Tarsus. "I am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city" (Acts xxi. 39). At Tarsus he must have learnt to use the Greek language with freedom and mastery in both speaking and writing. At Tarsus also he learnt that trade of "tentmaker" (Acts xvii. 3), at which he afterwards occasionally wrought with his own hands. There was a goat's-hair cloth called *Cilician*, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this haircloth. When St. Paul makes his defence before his countrymen at Jerusalem (Acts xxii.), he tells them that though born in Tarsus, he had been "brought up" in Jerusalem. He must, therefore, have been yet a boy, when he was removed, in all probability for the sake of his education, to the Holy City of his fathers. We may imagine him arriving there, perhaps at some age between 10 and 15, already a Hellenist, speaking Greek and familiar with the Greek version of the Scriptures, possessing, besides the knowledge of his trade, the elements of Gentile learning,—to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learnt, he says, "at the feet of Gamaliel." He who was to resist so stoutly the usurpations of the law, had for his teacher one of the most eminent of all the doctors of the law. Saul was yet "a young man" (Acts vii. 58), when the Church experienced that sudden expansion which was connected with the ordaining of the Seven appointed to serve tables, and with the special power and inspiration of Stephen. Amongst those who disputed with Stephen were some "of them of Cilicia." We naturally think of Saul as having been one of these, when we find him afterwards keeping the clothes of those suborned witnesses who, according to the law (Deut. xvii. 7), were the first to cast stones at Stephen. "Saul," says the sacred writer, significantly, "was consenting unto his death."—*Saul's Conversion*.—The persecutor was to be converted. Having undertaken to follow up the believers "unto strange cities," Saul naturally turned his thoughts to Damascus. What befell him as he journeyed thither, is related in detail three times in the Acts, first by the historian in his own person, then in the two addresses made by St. Paul at Jerusalem and before Agrippa. These three narratives are not repetitions of one another: there are differences between them which some critics choose to consider irreconcilable. Of the three narratives, that of the historian himself must claim to be the most purely historical: St. Paul's subsequent accounts were likely to be affected by the purpose for which he introduced them. St. Luke's statement is to be read in Acts ix. 3-19, where, however, the words "It is hard for thee to

kick against the pricks," included in the Vulgate and English version, ought to be omitted. The sudden light from heaven; the voice of Jesus speaking with authority to His persecutor; Saul struck to the ground, blinded, overcome; the three days' suspense; the coming of Ananias as a messenger of the Lord; and Saul's baptism;—these were the leading features, in the eyes of the historian, of the great event, and in these we must look for the chief significance of the conversion. For we must not forget that, whatever we hold as to the external nature of the phenomena we are considering, the whole transaction was essentially, in any case, a *spiritual* communication. That the Lord Jesus manifested Himself as a Living Person to the man Saul, and spoke to him so that His very words could be understood, is the substantial fact declared to us. The purport of the three narratives is that an actual conversation took place between Saul and the Lord Jesus. It is remarkable that in none of them is Saul said to have *seen* Jesus. *How* it was that Saul "saw" and "heard" we are quite unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar, is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone. The only mention in the Epistles of St. Paul of the outward phenomena attending his conversion is that in 1 Cor. xv. 8, "Last of all He was seen of me also." But there is one important passage in which he speaks distinctly of his conversion itself. In the Epistle to the Galatians (i. 15, 16) St. Paul has these words: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to reveal His Son in me, that I might preach Him among the heathen . . ." What words could express more exactly than these the spiritual experience which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son of God is clearly the main point in the narrative. It would be groundless to assume that the new convictions of that midday immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then *converted*, or turned round. For a while, no doubt, his inward state was one of awe and expectation. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of one whom he had, perhaps, intended to persecute. The fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," but a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however; and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged, and his sight is restored. After the recovery of his sight, Saul received the washing away of his sins in baptism. He then broke his three days' fast, and was strengthened. He was at once received into the fellowship of the disciples, and begun without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring him to be the Son of

God. The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigour, for "many days," up to the time when imminent danger drove him from Damascus. From the Epistle to the Galatians (i. 17, 18) we learn that the many days were at least a good part of "three years," and that Saul, not thinking it necessary to procure authority to preach from the Apostles that were before him, went after his conversion into Arabia, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia—to what district Saul went, how long he stayed, or for what purpose he went there. Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the Apostle in his 2nd Epistle to the Corinthians. According to the former, the *Jews* lay in wait for Saul, intending to kill him, and watched the gates of the city that he might not escape from them. Knowing this, the disciples took him by night and let him down in a basket from the wall. According to St. Paul (2 Cor. xi. 32) it was the ethnarch under Aretas the king who watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed to join himself to the disciples; but they were all afraid of him, and believed not that he was a disciple." *Barnabas* became his sponsor to the Apostles and Church at Jerusalem, assuring them—from some personal knowledge, we must presume—of the facts of Saul's conversion and subsequent behaviour at Damascus. Barnabas's introduction removed the fears of the Apostles, and Paul "was with them coming in and going out at Jerusalem." His Hellenistical education made him, like Stephen, a successful disputant against the "Grecians;" and it is not strange that the former persecutor was singled out from the other believers as the object of a murderous hostility. He was therefore again urged to flee; and by way of Caesarea betook himself to his native city Tarsus. In the Epistle to the Galatians St. Paul adds certain particulars. He tells us that his motive for going up to Jerusalem rather than anywhere else was that he might see Peter; that he abode with him fifteen days; that the only Apostles he saw were Peter and James the Lord's brother; and that afterwards he came into the regions of Syria and Cilicia, remaining unknown by face, though well-known for his conversion, to the Churches in Judaea which were in Christ.—*St. Paul at Antioch.*—While Saul was at Tarsus, a movement was going on at Antioch, which raised that city to an importance second only to that of Jerusalem itself in the early history of the Church. In the life of the Apostle of the Gentiles Antioch claims a most conspicuous place. It was there that the Preaching of the Gospel to the Gentiles first took root, and from thence that it was afterwards propagated. There came to Antioch, when the persecution which arose about Stephen scattered upon their different routes the disciples who had been assembled at Jerusalem, men of Cyprus and Cyrene, eager to tell all who would hear them the good news concerning the Lord Jesus. A great number believed; and when this was reported at Jerusalem, Barnabas was sent on a special mission to Antioch. As the work grew under his hands, and "much people was added unto the Lord," Barnabas felt the need of help, and went

himself to Tarsus to seek Saul. Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul's energy and devotedness, and skill in disputation. He had been drawn to him by the bond of a most brotherly affection. He therefore longed for him as a helper, and succeeded in bringing him to Antioch. There they laboured together unremittingly for "a whole year," mixing with the constant assemblies of the believers, and "teaching much people." All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas. In the mean time, according to the usual method of the Divine government, facts were silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch. An opportunity soon occurred, of which Barnabas and Saul joyfully availed themselves, for proving the affection of these new disciples towards their brethren at Jerusalem. There came "prophets" from Jerusalem to Antioch: "and there stood up one of them, named Agabus, and signified by the Spirit that there should be great dearth throughout all the world." It is obvious that the fulfilment followed closely upon the intimation of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was conveyed to the elders of that Church by the hands of Barnabas and Saul. It could not have been necessary for the mere safe conduct of the contribution that Barnabas and Saul should go in person to Jerusalem. We are bound to see in the relations between the Mother-Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed Mark, sister's son to Barnabas. The work of prophesying and teaching was resumed. Antioch was in constant communication with Cilicia, with Cyprus, with all the neighbouring countries. The question must have forced itself upon hundreds of the "Christians" at Antioch, "What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, *for the world?*" The Gospel is not for Judaea alone: here are we called by it at Antioch. Is it meant to stop here?" The Church was pregnant with a great movement, and the time of her delivery was at hand. Something of direct expectation seems to be implied in what is said of the leaders of the Church at Antioch, that they were "ministering to the Lord, and fasting," when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work whereunto I have called them." Everything was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.—*The first Missionary Journey.*—Much must have been hid from Barnabas and Saul as to the issues of the journey on which they embarked. But one thing was clear to them, that *they were sent forth to speak the word of God.* The first characteristic feature of St. Paul's teaching was the absolute conviction that he was only the bearer of a Heavenly message. The writer of the

Acts proceeds upon the same assumption. He tells us that as soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God." The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. They trod the old path till they should be drawn out of it. But when they had gone through the island, from Salamis to Paphos, they were called upon to explain their doctrine to an eminent Gentile, Sergius Paulus, the proconsul. A Jew, named Barjesus, or Elymas, a *magus* and false prophet, had attached himself to the governor, and had no doubt interested his mind, for he was an intelligent man, with what he had told him of the history and hopes of the Jews. [Elymas.] Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them and sent for them. The impostor, instinctively hating the Apostles, and seeing his influence over the proconsul in danger of perishing, did what he could to withstand them. Then Saul, "who is also called Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. The blindness immediately falls upon him; and the proconsul, moved by the scene and persuaded by the teaching of the Apostle, becomes a believer. This point is made a special crisis in the history of the Apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader could resist the temptation of supposing that there must be some connexion between Saul's new name and that of his distinguished Roman convert. But on reflection it does not seem probable that St. Paul would either have wished, or have consented, to change his own name for that of a distinguished convert. There is no reason, therefore, why Saul should not have borne from infancy the other name of Paul. In that case he would be Saul amongst his own countrymen, Paulus amongst the Gentiles. The conversion of Sergius Paulus may be said, perhaps, to mark the beginning of the work amongst the Gentiles; otherwise, it was not in Cyprus that any change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From Paphos "Paul and his company" set sail for the mainland, and arrived at Perga in Pamphylia. Here the heart of their companion John failed him, and he returned to Jerusalem. From Perga they travelled on to a place, obscure in secular history, but most memorable in the history of the kingdom of Christ,—Antioch in Pisidia. Here "they went into the synagogue on the sabbath-day, and sat down." Small as the place was, it contained its colony of Jews, and with them proselytes who worshipped the God of the Jews. What took place here in the synagogue and in the city, is interesting to us not only on account of its bearing on the history, but also because it represents more or less exactly what afterwards occurred in many other places. The Apostles of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. They and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word of exhortation which might be in them to the people. Paul stood up, and beckoning

with his hand, he spoke.—The speech is given in Acts xiii. 16-41.—The discourse produced a strong impression; and the hearers (not "the Gentiles"), requested the Apostles to repeat their message on the next sabbath. During the week so much interest was excited by the teaching of the Apostles, that on the sabbath day "almost the whole city came together, to hear the Word of God." It was this concern of the Gentiles which appears to have first alienated the minds of the Jews from what they had heard. They were filled with envy. The eagerness of the Gentiles to hear may have confirmed their instinctive apprehensions. The Jewish envy once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke. The new opposition brought out new action on the part of the Apostles. Rejected by the Jews, they became bold and outspoken, and turned from them to the Gentiles. Henceforth, Paul and Barnabas knew it to be their commission,—not the less to present their message to Jews first; but in the absence of an adequate Jewish medium to deal directly with the Gentiles. But this expansion of the Gospel work brought with it new difficulties and dangers. At Antioch now, as in every city afterwards, the unbelieving Jews used their influence with their own adherents amongst the Gentiles, and especially the women of the higher class, to persuade the authorities or the populace to persecute the Apostles, and to drive them from the place. With their own spirits raised, and amidst much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the occurrences at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they had to deal with uncivilized heathens. At Lystra the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The same truth was to be conveyed to the inhabitants of Jerusalem, and to the heathens of Lycaonia. The act was received naturally by these pagans. They took the Apostles for gods, calling Barnabas, who was of the more imposing presence, Zeus (Jupiter), and Paul, who was the chief speaker, Hermes (Mercurius). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the recording of an address, in which we see a type of what the Apostles would say to an ignorant pagan audience. Although the people of Lystra had been so ready to worship Paul and Barnabas, the repulse of their idolatrous instincts appears to have provoked them, and they allowed themselves to be persuaded into hostility by Jews who came from Antioch and Iconium, so that they attacked Paul with stones, and thought they had killed him. He recovered, however, as the disciples were standing round him, and went again into the city. The next day he left it with Barnabas, and went to Derbe, and thence they returned once more to Lystra, and so to Iconium and Antioch. In order to establish the Churches after their departure, they solemnly appointed "elders" in every city. Then they came down to the coast, and from Attalia they sailed home to Antioch in Syria, where they related the successes which had been granted to them, and especially the opening of the door of faith to the Gentiles." And so the First Missionary Journey ended.—*The Council at Jerusalem.* (Acts xv. Ga-

latians ii.)—Upon that missionary journey follows most naturally the next important scene which the historian sets before us,—the council held at Jerusalem to determine the relations of Gentile believers to the Law of Moses. In following this portion of the history, we encounter two of the greater questions which the biographer of St. Paul has to consider. One of these is historical, What were the relations between the Apostle Paul and the Twelve? The other is critical, How is Galatians ii. to be connected with the narrative of the Acts? The relations of St. Paul and the Twelve will best be set forth in the narrative. But we must explain here why we accept St. Paul's statements in the Galatian Epistle as additional to the history in Acts xv. The first impression of any reader would be a supposition that the two writers might be referring to the same event. The one would at least bring the other to his mind. On looking more closely into both, the second impression upon the reader's mind may possibly be that of a certain incompatibility between the two. Another view will remain, that St. Paul refers to a visit not recorded in the Acts at all. This is a perfectly legitimate hypothesis; and it is recommended by the vigorous sense of Paley. But where are we to place the visit? The only possible place for it is some short time before the visit of ch. xv. But it can scarcely be denied, that the language of ch. xv. decidedly implies that the visit there recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in preaching the Gospel amongst the Gentiles. We suppose the reader, therefore, to recur to his first impression. He will then have to ask himself, "Granting the considerable differences, are there after all any plain contradictions between the two narratives, taken to refer to the same occurrences?" The answer must be, "There are no plain contradictions." We proceed then to combine the two narratives. Whilst Paul and Barnabas were staying at Antioch, "certain men from Judaea" came there and taught the brethren that it was necessary for the Gentile converts to be circumcised. This doctrine was vigorously opposed by the two Apostles, and it was determined that the question should be referred to the Apostles and elders at Jerusalem. Paul and Barnabas themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up "by revelation." On their way to Jerusalem, they announced to the brethren in Phoenicia and Samaria the conversion of the Gentiles; and the news was received with great joy (Acts xv. 4). St. Paul adds that he communicated his views "privately to them which were of reputation," through anxiety as to the success of his work (Gal. ii. 2). The Apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisees thought fit to maintain the same doctrine which had caused the disturbance at Antioch. In either place, St. Paul would not give way to such teaching for a single hour (Gal. ii. 5). It became necessary, therefore, that a formal decision should be come to upon the question. The Apostles and elders came together, and there was much disputing. Arguments would be used on both sides; but when the persons of highest authority spoke, they appealed to what was stronger than arguments,—the course of *facts*, through which the will of God had been manifestly shown. After they had done, St. James, with incomparable simplicity and

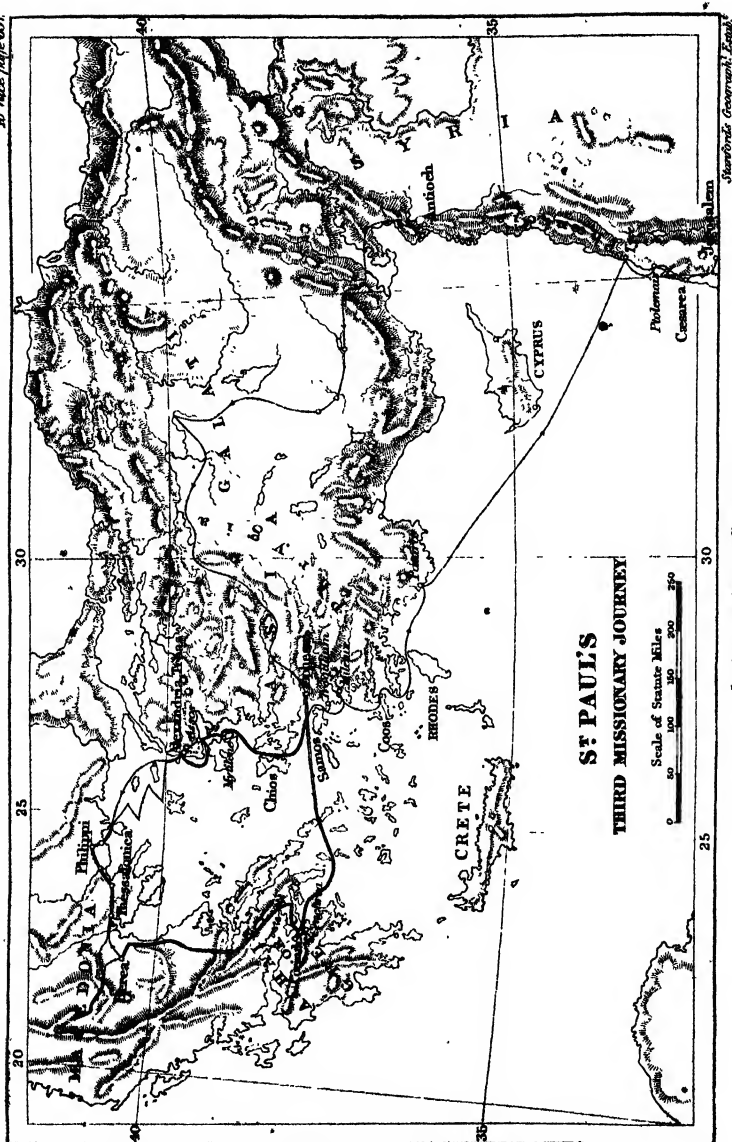

wisdom, binds up the testimony of recent facts with the testimony of ancient prophecy, and gives a practical judgment upon the question. The judgment was a decisive one. The injunction that the Gentiles should abstain from pollutions of idols and from fornication explained itself. The abstinence from things strangled and from blood is desired as a concession to the customs of the Jews, who were to be found in every city, and for whom it was still right, when they had believed in Jesus Christ, to observe the Law. St. Paul had completely gained his point. The older Apostles, James, Cephas, and John, perceiving the grace which had been given him (his effectual Apostleship), gave to him and Barnabas the right hand of fellowship. At this point it is very important to observe precisely what was the matter at stake between the contending parties. The case stood thus: Circumcision and the ordinances of the Law were witnesses of a separation of the chosen race from other nations. The Jews were proud of that separation. But the Gospel of the Son of Man proclaimed that the time had come in which the separation was to be done away, and God's goodwill manifested to all nations alike. It spoke of a union with God, through trust, which gave hope of a righteousness that the Law had been powerless to produce. Therefore to insist upon Gentiles being circumcised would have been to deny the Gospel of Christ. If there was to be simply an enlarging of the separated nation by the receiving of individuals into it, then the other nations of the world remained as much on the outside of God's covenant as ever. Then there was no Gospel to mankind; no justification given to men. The loss, in such a case, would have been as much to the Jew as to the Gentile.* St. Paul felt this the most strongly; but St. Peter also saw that if the Jewish believers were thrown back on the Jewish Law, and gave up the free and absolute grace of God, the Law became a mere burden, just as heavy to the Jew as it would be to the Gentile. The only hope for the Jew was in a Saviour who *must be* the Saviour of mankind. It implied therefore no difference of belief when it was agreed that Paul and Barnabas should go to the heathen, while James and Cephas and John undertook to be the Apostles of the Circumcision. The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. It is usual to connect with this period of the history that rebuke of St. Peter which St. Paul records in Gal. ii. 11-14. The connexion of subject makes it convenient to record the incident in this place, although it is possible that it took place before the meeting at Jerusalem, and perhaps most probable that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xvii. 22, 23).—*Second Missionary Journey.*—The most resolute courage, indeed, was required for the work to which St. Paul was now publicly pledged. He would not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his comrade in the faith and in past perils, Barnabas (Acts xv. 35-40). Silas, or Silvanus, becomes now a chief companion of the Apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they find Timotheus, who had become a disciple on the former visit

of the Apostle. Him St. Paul took and circumcised. Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom secured to the Gentiles. Yet at this very time our Apostle had the wisdom and largeness of heart to consult the feelings of the Jews by circumcising Timothy. St. Luke now steps rapidly over a considerable space of the Apostle's life and labours. "They went throughout Phrygia and the region of Galatia" (xvi. 6). At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people (Gal. iv. 13-15). It is not easy to decide as to the meaning of the words "through infirmity of the flesh." Undoubtedly their grammatical sense implies that "weakness of the flesh"—an illness—was the occasion of St. Paul's preaching in Galatia. On the other hand, the form and order of the words are not what we should have expected if the Apostle meant to say this; and Professor Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was *in weakness of the flesh* that he preached to the Galatians. In either case St. Paul must be referring to a more than ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. St. Paul at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia he intended to visit the western coast; but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the north-east into Bithynia; but again the Spirit of Jesus "suffered them not." So they passed by Mysia, and came down to Troas. St. Paul saw in a vision a man of Macedonia, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a heavenly intimation; the help wanted by the Macedonians was believed to be the preaching of the Gospel. It is at this point that the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that St. Luke, to whatever country he belonged, became a companion of St. Paul at Troas. The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then landed on the continent at Neapolis, and from thence journeyed to Philippi. Philippi was no inapt representative of the western world. A Greek city, it had received a body of Roman settlers, and was politically a Colonia. There were a few Jews, if , at Philippi; and when the Sabbath came round, the Apostolic company joined their countrymen at the place by the river-side where prayer was wont to be made. The narrative in this part is very graphic (xvi. 13). The first convert in Macedonia was but an Asiatic woman who already worshipped the God of the Jews; but she was a very earnest believer, and besought the Apostle and his friends to honour her by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 40). But a proof was given before long that

the preachers of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state, beset Paul and his company. Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." The girl's masters saw that now the hope of their gains was gone. Paul and Silas were dragged before the magistrates, the multitude clamouring loudly against them, upon the vague charge of "troubling the city," and introducing observances which were unlawful for Romans. If the magistrates had desired to act justly they might have doubted how they ought to deal with the charge. But the praetors or duumviri of Philippi were very unworthy representatives of the Roman magistracy. They yielded without inquiry to the clamour of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. This cruel wrong was to be the occasion of a signal appearance of the God of righteousness and deliverance. The narrative tells of the earthquake, the jailor's terror, his conversion, and baptism (xvi. 26-34). In the morning the magistrates, either having heard of what had happened, or having repented of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to the prison that the men might be let go. But St. Paul denounced plainly their unlawful acts, informing them moreover that those whom they had beaten and imprisoned without trial were Roman citizens. The magistrates, in great alarm, saw the necessity of humbling themselves. They came and begged them to leave the city. Paul and Silas consented to do so, and, after paying a visit to the brethren in the house of Lydia, they departed. Leaving St. Luke, and perhaps Timothy for a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollonia, and stopped again at Thessalonica. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three Sabbaths proclaimed Jesus to be the Christ, as he would have done in a city of Judaea. Again, as in Pisidian Antioch, the envy of the Jews was excited. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates. In this case the magistrates seem to have acted wisely and justly, in taking security of Jason and the rest, and letting them go. After these signs of danger the brethren immediately sent away Paul and Silas by night. The Epistles to the Thessalonians were written very soon after the Apostle's visit, and contain more particulars of his work in founding that Church than we find in any other Epistle. The whole of these letters ought to be read for the information they thus supply. When Paul and Silas left Thessalonica they came to Berea. Here they found the Jews more noble than those at Thessalonica had been. Accordingly they gained many converts, both Jews and Greeks; but the Jews of Thessalonica, hearing of it, sent emissaries to stir up the people, and it was thought best that St. Paul should himself leave the city, whilst Silas and Timothy remained behind. Some of "the brethren" went with St. Paul as far as Athens, where they

left him, carrying back a request to Silas and Timothy that they would speedily join him. There he witnessed the most profuse idolatry side by side with the most pretentious philosophy. Either of these would have been enough to stimulate his spirit. To idolaters and philosophers he felt equally urged to proclaim his Master and the Living God. So he went to his own countrymen and the proselytes in the synagogue and declared to them that the Messiah had come; but he also spoke, like another Socrates, with people in the market, and with the followers of the two great schools of philosophy, Epicureans and Stoics, naming to all Jesus and the Resurrection. The philosophers encountered him with a mixture of curiosity and contempt. But any one with a novelty was welcome to those who "spent their time in nothing else but either to hear or to tell some new thing." They brought him therefore to the Areopagus, that he might make a formal exposition of his doctrine to an assembled audience. Here the Apostle delivered that wonderful discourse, reported in Acts xvii. 22-31, which seems as fresh and instructive for the intellect of the 19th century as it was for the intellect of the first. In this we have the Pauline Gospel as it addressed itself to the speculative mind of the cultivated Greeks. St. Paul, it is well understood, did not begin with calling the Athenians "too superstitious." "I perceive you," he said, "to be eminently religious." He had observed an altar inscribed "To the unknown God." It meant, no doubt, "To some unknown God." "I come," he said, "as the messenger of that unknown God." And then he proceeds to speak of God in terms which were not altogether new to Grecian ears. The Apostle gained but few converts at Athens, and he soon took his departure and came to Corinth. Athens still retained its old intellectual predominance: but Corinth was the political and commercial capital of Greece. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connexion with two persons who became distinguished as believers in Christ, Aquila and Priscilla. Labouring thus on the six days, the Apostle went to the synagogue on the Sabbath, and there by expounding the Scriptures sought to win both Jews and proselytes to the belief that Jesus was the Christ. He was testifying with unusual effort and anxiety, when Silas and Timothy came from Macedonia and joined him. We are left in some uncertainty as to what the movements of Silas and Timothy had been, since they were with Paul at Berea. From the statements in the Acts (xvii. 15, 16) compared with those in 1 Thes. (iii. 1, 2), Paley reasonably argues that Silas and Timothy had come to Athens, but had soon been despatched thence, Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of the writing of the First Epistle to the Thessalonians. This is the first extant example of that work by which the Apostle Paul has served the Church of all ages in as eminent a degree as he laboured at the founding of it in his lifetime. It is notorious that the order of the Epistles in the book of the N. T. is not their real, or chronological order. The two Epistles to the Thessalonians belong—and these alone—to the present Missionary Journey. The Epistles to the Galatians, Romans, and Corinthians, were written

during the next journey. Those to Philemon, the Colossians, the Ephesians, and the Philippians, belong to the captivity at Rome. With regard to the Pastoral Epistles, there are considerable difficulties, which require to be discussed separately. Two general remarks relating to St. Paul's Letters may find a place here. (1.) There is no reason to assume that the extant Letters are all that the Apostle wrote. (2.) We must be on our guard against concluding too much from the contents and style of any Epistle, as to the fixed bent of the Apostle's whole mind at the time when it was written. The First Epistle to the Thessalonians was probably written soon after his arrival at Corinth, and before he turned from the Jews to the Gentiles. It was drawn from St. Paul by the arrival of Silas and Timothy. The largest portion of it consists of an impassioned recalling of the facts and feelings of the time when the Apostle was personally with them. What interval of time separated the Second Letter to the Thessalonians from the First, we have no means of judging, except that the later one was certainly written before St. Paul's departure from Corinth. We return now to the Apostle's preaching at Corinth. When Silas and Timotheus came, he was testifying to the Jews with great earnestness, but with little success. So "when they opposed themselves and blasphemed, he shook out his raiment," and said to them, in words of warning taken from their own prophets (Ezek. xxxiii. 4): "Your blood be upon your own heads; I am clean, and henceforth will go to the Gentiles." The Apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During St. Paul's stay, we find the proconsular office held by Gallio, a brother of the philosopher Seneca. Before him the Apostle was summoned by his Jewish enemies, who hoped to bring the Roman authority to bear upon him as an innovator in religion. But Gallio perceived at once, before Paul could "open his mouth" to defend himself, that the movement was due to Jewish prejudice, and refused to go into the question. "If it be a question of words and names and of your law," he said to the Jews, speaking with the tolerance of a Roman magistrate, "look ye to it; for I will be no judge of such matters." Then a singular scene occurred. The Corinthian spectators, either favouring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who had brought the charge, and bent him before the judgment-seat. Gallio left these religious quarrels to settle themselves. The Apostle, therefore, was not allowed to be "hurt," and remained some time longer at Corinth unmolested. Having been the instrument of accomplishing this work, St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair at Cenchreae, in fulfilment of a vow (Acts xviii. 18). He may have followed in this instance, for some reason not explained to us, a custom of his countrymen. When he sailed from the Isthmus, Aquila and Priscilla went with him as far as Ephesus. Paul paid a visit to the synagogue at Ephesus, but would not stay. Leaving Ephesus, he sailed to Caesarea, and from thence went up to Jerusalem and "saluted the Church." It is argued, from considerations founded on the suspension of navigation during the winter months, that the

London..John Murray, Albemarle St.

Stanford's Geograph. Estab.

festival was probably the Pentecost. From Jerusalem, almost immediately, the Apostle went down to Antioch, thus returning to the same place from which he had started with Silas.—*Third Missionary Journey, including the stay at Ephesus* (Acts xviii. 23–xxi. 17).—We may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and covenant of the Jews? To vindicate the *freedom*, as regarded the Jewish law, of believers in Christ; but to do this, for the very sake of maintaining the *unity of the Church*,—was to be the earnest labour of the Apostle for some years. The great Epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the “Judaizing” question exercised at this time the Apostle’s mind. St. Paul “spent some time” at Antioch, and during this stay, as we are inclined to believe, his collision with St. Peter (Gal. ii. 11–14), of which we have spoken above, took place. When he left Antioch, he “went over all the country of Galatia and Phrygia in order, strengthening all the disciples,” and giving orders concerning the collection for the saints (1 Cor. xvi. 1). It is probable that the *Epistle to the Galatians* was written soon after this visit. This Letter was, in all probability, sent from Ephesus. This was the goal of the Apostle’s journeyings through Asia Minor. He came down upon Ephesus from the upper districts of Phrygia. With reference to the spread of the Church Catholic, Ephesus occupied the central position of all. This was the meeting place of Jew, of Greek, of Roman, and of Oriental. A new element in the preparation of the world for the kingdom of Christ presents itself at the beginning of the Apostle’s work at Ephesus. He finds there certain disciples,—about twelve in number,—of whom he is led to inquire, “Did ye receive the Holy Ghost when ye believed? They answered, No, we did not even hear of there being a Holy Ghost. Unto what then, asked Paul, were ye baptized? And they said, Unto John’s baptism. Then said Paul, John baptized with the baptism of repentance, saying to the people that they should believe on him who was coming after him, that is, on Jesus. Hearing this, they were baptized into the name of the Lord Jesus, and when Paul had laid his hands upon them, the Holy Ghost came upon them, and they began to speak with tongues and to prophesy” (Acts xix. 1–7).—It is obvious to compare this incident with the Apostolic act of Peter and John in Samaria, and to see in it an assertion of the full Apostolic dignity of Paul. But besides this bearing of it, we see in it indications which suggest more than they distinctly express, as to the spiritual movements of that age. These twelve disciples are mentioned immediately after Apollos, who also had been at Ephesus just before St. Paul’s arrival, and who had taught diligently concerning Jesus, knowing only the baptism of John. What the exact belief of Apollos and these twelve “disciples” was concerning the character and work of Jesus, we have no means of knowing. The Apostle now entered upon his usual work. He went into the synagogue, and for three months he spoke openly, disputing and persuading concerning “the kingdom of God.” At the end of this time the obstinacy and opposition of some of the Jews led him to give up frequenting the synagogue, and he established the believers as a separate society, meeting “in the school of Tyran-

nus.” This continued for two years. During this time many things occurred, of which the historian of the Acts chooses two examples, the triumph over magical arts, and the great disturbance raised by the silversmiths who made shrines for Artemis; and amongst which we are to note further the writing of the First Epistle to the Corinthians. Whilst St. Paul was at Ephesus his communications with the Church in Achaia were not altogether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from several allusions in the 2nd Epistle to the Corinthians (2 Cor. xii. 14, xiii. 1). The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If that was the *third*, he must have paid a *second* during the time of his residence at Ephesus. The *prima facie* sense of 2 Cor. ii. 1, xii. 21, xiii. 2, implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that *prima facie* sense. Whether the 1st Epistle to the Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that Epistle, to a “battle with wild beasts” fought at Ephesus (1 Cor. xv. 32), which it is usual to understand figuratively, and which is by many connected with that tumult. But this connexion is arbitrary, and without much reason. And as it would seem from Acts xx. 1 St. Paul departed immediately after the tumult, it is probable that the Epistle was written before, though not long before, the raising of this disturbance. There were two external inducements for writing this Epistle. (1.) St. Paul had received information from members of Chloe’s household (i. 11) concerning the state of the Church at Corinth. (2.) That Church had written him a letter, of which the bearers were Stephanas and Fortunatus and Achaicus, to ask his judgment upon various points which were submitted to him (vii. 1, xvi. 17). For a detailed description of the Epistles the reader is referred to the special articles upon each. But it belongs to the history of St. Paul to notice the personal characteristics which appear in them. We must not omit to observe therefore, in this Epistle, how loyally the Apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the Power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the loose morality, the disregard of decency and order, the false belief about the Resurrection, by recalling their thoughts to the Person of Christ and to the Spirit of God as the Breath of a common life to the whole body. We observe also here, more than elsewhere, the *tact*, universally recognized and admired, with which the Apostle discusses the practical problems brought before him. What St. Paul here tells us of his own doings and movements refers chiefly to the nature of his preaching at Corinth (i. ii.); to the hardships and dangers of the apostolic life (iv. 9–13); to his cherished custom of working for his own living (ix.); to the direct revelations he had received (xi. 23, xv. 8); and to his present plans (xvi.). He bids the Corinthians raise a collection for the Church at Jeru-

saem by laying by something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall tarry at Ephesus till Pentecost, and then set out on a journey towards Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanas and his companions, and commands them to the respect of the Church. Having de-patched this Epistle he stayed on at Ephesus, where "a great door and effectual was opened to him, and there were many adversaries." We have now no information as to his work there, until that tumult occurred which is described in Acts xix 24-41. St. Paul is only personally concerned in this tumult in so far as it proves the deep impression which his teaching had made at Ephesus, and the daily danger in which he lived. He had been anxious to depart from Ephesus, and this interruption of the work which had kept him there determined him to stay no longer. He set out therefore for Macedonia, and proceeded first to Troas (2 Cor. ii. 12), where he might have preached the Gospel with good hope of success. But a restless anxiety to obtain tidings concerning the Church at Corinth urged him on, and he advanced into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him a letter which reveals to us what manner of man St. Paul was when the fountains of his heart were stirred to their inmost depths. Every reader may perceive that, on passing from the First Epistle to the Second, the scene is almost entirely changed. In the *First*, the faults and difficulties of the Corinthian Church are before us. The Apostle writes of these, with spirit indeed and emotion, as he always does, but without passion or disturbance. In the *Second*, he writes as one whose personal relations with those whom he addresses have undergone a most painful shock. What had occasioned this excitement? We have seen that Timothy had been sent from Ephesus to Macedonia and Corinth. He had rejoined St. Paul when he wrote this Second Epistle, for he is associated with him in the salutation (2 Cor. i. 1). We have no account, either in the Acts or in the Epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, conveyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which threw (let us suppose) the case of the incestuous person (1 Cor. v. 1-5) into the shade. This was a deliberate and sustained attack upon the Apostolic authority and personal integrity of the Apostle of the Gentiles. When some such attack was made openly upon the Apostle, the Church had not immediately called the offender to account; the better spirit of the believers being cowed, apparently, by the confidence and assumed authority of the assailants of St. Paul. A report of this melancholy state of things was brought to the Apostle by Timothy or by others. He immediately sent off Titus to Corinth, with a letter containing the sharpest rebukes, *using* the authority which had been denied, and threatening to enforce it speedily by his personal presence (ii. 2, 3, vii. 8). As soon as the letter was gone, he began to repent of having written it. We can well believe him when he speaks of what he had suffered:—"Out of much affliction and anguish of heart I wrote to you with

many tears" (ii. 4); "I had no rest in my spirit" (ii. 13); "Our flesh had no rest, but we were troubled on every side; without were fightings, within were fears" (vii. 5). It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16); he would wait till he heard news which might make his visit a happy instead of a painful one (ii. 1). When he had reached Macedonia, Titus, as we have seen, met him with such reassuring tidings. The offender had been rebuked by the Church, and had made submission (ii. 6, 7); the old spirit of love and reverence towards St. Paul had been awakened, and had poured itself forth in warm expressions of shame and grief and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. But even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth. The particular nature of this Epistle, as an appeal to facts in favour of his own Apostolic authority, leads to the mention of many interesting features of St. Paul's life. His summary, in xi. 23-28, of the hardships and dangers through which he had gone, proves to us how little the history in the Acts is to be regarded as a complete account of what he did and suffered. The daily burden of "the care of all the churches" seems to imply a wide and constant range of communication. The mention of "visions and revelations of the Lord," and of the "thorn (or rather *stake*) in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. But he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being puffed up by them. A stake in the flesh (*σκόλοψ τῆ σαρκί*) was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have prevailed of this *σκόλοψ* have a certain historical significance. (1) Roman Catholic divines have inclined to understand by it strong *sensual temptation*. (2) Luther and his followers take it to mean temptations to *unbelief*. But neither of these would be "infirmities" in which St. Paul could "glory." (3) It is almost the unanimous opinion of modern divines—and the authority of the ancient fathers on the whole is in favour of it—that the *σκόλοψ* represents some vexatious *bodily infirmity*. After writing this Epistle, St. Paul travelled through Macedonia, perhaps to the borders of Illyricum (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. The narrative in the Acts tells us that "when he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one—the writing of another great Epistle, addressed to the Church at Rome. That this was written at this time from Corinth appears from passages in the Epistle itself, and has never been doubted. The

letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, *because he is the Apostle of the Gentiles*. Of this office, to speak in common language, St. Paul was proud. All the labours and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonoured. He represents himself grandly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (xv. 16). And he then proceeds to speak with pride of the extent and independence of his Apostolic labours. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles: but we find that he speaks to them as to persons deeply interested in Jewish questions. Before his departure from Coriuth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and within a limited time. With this view he was intending to go by sea to Syria. But he was made aware of some plot of the Jews for his destruction, to be carried out through this voyage; and he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the bearers, no doubt, of the collections made in all the Churches for the poor at Jerusalem. These were sent on by sea, and probably the money with them, to Troas, where they were to await St. Paul. He, accompanied by St. Luke, went northwards through Macedonia. The style of an eyewitness again becomes manifest. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul was discoursing earnestly and at length with the brethren. He was to depart the next morning, and midnight found them listening to his earnest speech. A youth named Eutychus was sitting in the window, and was gradually overpowered by sleep, so that at last he fell into the street or court from the third story, and was taken up dead. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "Be not disturbed, his life is in him." His friends then appear to have taken charge of him, whilst Paul went up again, first presided at the breaking of bread, afterwards took a meal, and continued conversing until daybreak, and so departed. Whilst the vessel which conveyed the rest of the party sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again. Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at Miletus. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to him there. This meeting is made the occasion for recording another characteristic and *representative* address of St. Paul (Acts xx. 18-35). This spoken address to the elders of the Ephesian Church may be ranked with the Epistles, and throws the same kind of light upon St. Paul's Apostolic relations to the Churches. The course of the voyage from Miletus was by Coos and Rhodes to Patara, and from Patara in another vessel past Cyprus to Tyre. Here Paul and his company spent seven days. From Tyre they sailed to Ptolemais, where they spent one day, and from Ptolemais proceeded,

apparently by land, to Caesarea. In this place was settled Philip the Evangelist, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repented, no doubt, the warnings already heard. They now "tarried many days" at Caesarea. During this interval the prophet Agabus (Acts xi. 28) came down from Jerusalem, and crowned the previous intimations of danger with a prediction expressively delivered. At this stage a final effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Caesarea, and by his travelling companions. After a while, they went up to Jerusalem, and were gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.—*St. Paul's Imprisonment: Jerusalem and Caesarea.*—He who was thus conducted into Jerusalem by a company of anxious friends had become by this time a man of considerable fame amongst his countrymen. He was widely known as one who had taught with pre-eminent boldness that a way into God's favour was opened to the Gentiles, and that this way did not lie through the door of the Jewish Law. He had moreover actually founded numerous and important communities, composed of Jews and Gentiles together, which stood simply on the name of Jesus Christ, apart from circumcision and the observance of the Law. He had thus roused against himself the bitter enmity of that unfathomable Jewish pride which was almost as strong in some of those who had professed the faith of Jesus, as in their unconverted brethren. He was now approaching a crisis in the long struggle, and the shadow of it had been made to rest upon his mind throughout his journey to Jerusalem. He came "ready to die for the name of the Lord Jesus," but he came expressly to prove himself a faithful Jew, and this purpose emerges at every point of the history. St. Luke does not mention the contributions brought by Paul and his companions for the poor at Jerusalem. As on former occasions, the believers at Jerusalem could not but glorify God for what they heard; but they had been alarmed by the prevalent feeling concerning St. Paul. In order to dispel this impression they ask him to do publicly an act of homage to the Law and its observances. They had four men who were under the Nazarite vow. The completion of this vow involved (Num. vi. 12-21) a considerable expense for the offerings to be presented in the Temple; and it was a meritorious act to provide these offerings for the poorer Nazirites. St. Paul was requested to put himself under the vow with those other four, and to supply the cost of their offerings. He at once accepted the proposal. It appears that the whole process undertaken by St. Paul required seven days to complete it. Towards the end of this time certain Jews from "Asia," who had come up for the Pentecostal feast, and who had a personal knowledge both of Paul himself and of his companion Trophimus, a Gentile from Ephesus, saw Paul in the Temple. They immediately set upon him, and stirred up the people against him, crying out, "Men of Israel, help: this is the man that teacheth all men everywhere against the people, and the law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised

however, a great commotion: Paul was dragged out of the Temple, of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tidings were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult. Paul was rescued from the violence of the multitude by the Roman officer, who made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused utterances, and the "chief captain" seems to have imagined that the Apostle might perhaps be a certain Egyptian pretender who had recently stirred up a considerable rising of the people. The account in the Acts (xxi. 34-40) tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a discourse which is related at length. This discourse was spoken in Hebrew; that is, in the native dialect of the country, and was on that account listened to with the more attention. It is described by St. Paul himself, in his opening words, as his "defence," addressed to his brethren and fathers. It is in this light that it ought to be regarded. Until the hated word of a mission to the Gentiles, had been spoken, the Jews had listened to the speaker. "Away with such a fellow from the earth," the multitude now shouted: "it is not fit that he should live." The Roman commander, seeing the tumult that arose, might well conclude that St. Paul had committed some heinous offence; and carrying him off, he gave orders that he should be forced by scourging to confess his crime. Ag in the Apostle took advantage of his Roman citizenship to protect himself from such an outrage. The Roman officer was bound to protect a citizen, and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles. The chief captain set him free from bonds, but on the next day called together the chief priests and the Sanhedrim, and brought Paul as a prisoner before them. We need not suppose that this was a regular legal proceeding: it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convoke the Sanhedrim; on the other hand he would not give up a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. St. Paul appears to have been put upon his defence, and with the peculiar habit, mentioned elsewhere also (Acts xiii. 9), of looking steadily when about to speak, he began to say, "Men and brethren, I have lived in all good conscience (or, I have lived a conscientiously loyal life) unto God, until this day." Here the high-priest Ananias commanded them that stood by him to smite him on the mouth. With a fearless indignation, Paul exclaimed, "God shall smite thee, thou whited wall: for sittest thou to judge me after the law, and commandest me to be smitten contrary to the law?" The bystanders said, "Reverest thou God's High-Priest?" Paul answered, "I knew not, brethren, that he was the High-

Priest; for it is written, Thou shalt not speak evil of the ruler of thy people." How was it possible for him not to know that he who spoke was the High-Priest? The least objectionable solutions seem to be, that for some reason or other,—either because his sight was not good, or because he was looking another way,—he did not know whose voice it was that ordered him to be smitten; and that he wished to correct the impression which he saw was made upon some of the audience by his threatening protest, and therefore took advantage of the fact that he really did not know the speaker to be the High-Priest, to explain the deference he felt to be due to the person holding that office. The next incident which St. Luke records seems to some, who cannot think of the Apostle as remaining still a Jew, to cast a shadow upon his rectitude. He perceived, we are told, that the council was divided into two parties, the Sadducees and Pharisees, and therefore he cried out, "Men and brethren, I am a Pharisee, the son of a Pharisee; concerning the hope and resurrection of the dead I am called in question."—Those who impugn the authenticity of the Acts point triumphantly to this scene as an utterly impossible one: others consider that the Apostle is to be blamed for using a disingenuous artifice. But it is not so clear that St. Paul was using an artifice at all, at least for his own interest, in identifying himself as he did with the professions of the Pharisees. The creed of the Pharisee as distinguished from that of the Sadducee, was unquestionably the creed of St. Paul. His belief in Jesus seemed to him to supply the ground and fulfilment of that creed. He wished to lead his brother Pharisees into a deeper and more living apprehension of their own faith. The immediate consequence of the dissension which occurred in the assembly was that Paul was like to be torn in pieces, and was carried off by the Roman soldiers. On the next day a conspiracy was formed, which the historian relates with a singular fulness of details. More than forty of the Jews bound themselves under a curse neither to eat nor to drink until they had killed Paul. The plot was discovered, and St. Paul was hurried away from Jerusalem. The chief captain, Claudius Lysias, determined to send him to Caesarea, to Felix the governor, or procurator, of Judaea. He therefore put him in charge of a strong guard of soldiers, who took him by night as far as Antipatris. From thence a smaller detachment conveyed him to Caesarea, where they delivered up their prisoner into the hands of the governor. Felix asked of what province the prisoner was: and being told that he was of Cilicia, he promised to give him a hearing when his accusers should come. In the mean time he ordered him to be guarded. — *Imprisonment at Caesarea.*—St. Paul was henceforth, to the end of the period embraced in the Acts, if not to the end of his life, in Roman custody. This custody was in fact a protection to him, without which he would have fallen a victim to the animosity of the Jews. He seems to have been treated throughout with humanity and consideration. The governor before whom he was now to be tried, according to Tacitus and Josephus, was a mean and dissolute tyrant. The orator or counsel retained by the Jews and brought down by Ananias and the elders, when they arrived in the course of five days at Caesarea, begins the proceedings of the trial professionally by complimenting the governor. The charge he goes on to set forth against Paul shows

precisely the light in which he was regarded by the fanatical Jews. St. Paul met the charge in his usual manner. He was glad that his judge had been for some years governor of a Jewish province; "because it is in thy power to ascertain that, not more than twelve days since, I came up to Jerusalem to worship." The emphasis is upon his coming up to worship. He denied positively the charges of stirring up strife and of profaning the Temple. Again he gave prominence to the hope of a resurrection, which he held, as he said, in common with his accusers. His loyalty to the faith of his fathers he had shown by coming up to Jerusalem expressly to bring alms for his nation, and offerings, and by undertaking the ceremonies of purification in the Temple. What fault then could any Jew possibly find in him?—The Apostle's answer was straightforward and complete. He had *not* violated the law of his fathers; he was still a true and loyal Israelite. Felix made an excuse for putting off the matter, and gave orders that the prisoner should be treated with indulgence, and that his friends should be allowed free access to him. After a while, he heard him again. St. Paul remained in custody until Felix left the province. The unprincipled governor had good reason to seek to ingratiate himself with the Jews; and to please them, he handed over Paul, as an untried prisoner, to his successor Festus. Upon his arrival in the province, Festus went up without delay from Caesarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to assassinate him by the way. But Festus would not comply with their request. He invited them to follow him on his speedy return to Caesarea, and a trial took place there, closely resembling that before Felix. "They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's appeal to Caesar. The appeal having been allowed, Festus reflected that he must send with the prisoner a report of "the crimes laid against him." He therefore took advantage of an opportunity which offered itself in a few days to seek some help in the matter. The Jewish prince Agrippa arrived with his sister Berenice on a visit to the new governor. To him Festus communicated his perplexity, together with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him speak. Paul therefore was to give an account of himself to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defence. In this discourse (Acts xxvi.), we have the second explanation from St. Paul himself of the manner in which he had been led, through his Conversion, to serve the Lord Jesus instead of persecuting His disciples; and the third narrative of the Conversion itself. When it was concluded Festus and the king, and their companions, consulted together, and came to the conclusion that the accused was guilty of nothing that deserved death or imprisonment. And Agrippa's final answer to the inquiry of Festus was, "This

man might have been set at liberty, if he had not appealed unto Caesar."—*The Voyage to Rome.*—No formal trial of St. Paul had yet taken place. After a while arrangements were made to carry "Paul and certain other prisoners," in the custody of a centurion named Julius into Italy; and amongst the company, whether by favour or from any other reason, we find the historian of the Acts. The narrative of this voyage is accordingly minute and circumstantial in a degree which has excited much attention. The nautical and geographical details of St. Luke's account have been submitted to an apparently thorough investigation by several competent critics, especially by Mr. Smith of Jordanhill, in an important treatise devoted to this subject, and by Mr. Howson. The result of this investigation has been, that several errors in the received version have been corrected, that the course of the voyage has been laid down to a very minute degree with great certainty, and that the account in the Acts is shown to be written by an accurate eye-witness, not himself a professional seaman, but well acquainted with nautical matters. We hasten lightly over this voyage, referring the reader to the works above mentioned, and to the articles in this Dictionary on the names of places and the nautical terms which occur in the narrative. The land on which the wreck took place was found to belong to Malta. The inhabitants of the island received the wet and exhausted voyagers with no ordinary kindness, and immediately lighted a fire to warm them. This particular kindness is recorded on account of a curious incident connected with it. The Apostle was helping to make the fire, and had gathered a bundle of sticks and laid them on the fire, when a viper came out of the heat and fastened on his hand. When the natives saw the creature hanging from his hand they believed him to be poisoned by the bite, and said amongst themselves, "No doubt this man is a murderer, whom, though he has escaped from the sea, yet Vengeance suffers not to live." But when they saw that no harm came of it they changed their minds and said that he was a god. This circumstance, as well as the honour in which he was held by Julius, would account for St. Paul being invited with some others to stay at the house of the chief man of the island, whose name was Publius. By him they were courteously entertained for three days. After a three months' stay in Malta the soldiers and their prisoners left in an Alexandrian ship for Italy. They touched at Syracuse, where they stayed three days, and at Rhegium, from which place they were carried with a fair wind to Puteoli, where they left their ship and the sea. At Puteoli they found "brethren," for it was an important place, and especially a chief port for the traffic between Alexandria and Rome; and by these brethren they were exhorted to stay a while with them. Permission seems to have been granted by the centurion; and whilst they were spending seven days at Puteoli news of the Apostle's arrival was sent on to Rome.—*St. Paul at Rome.*—On their arrival at Rome the centurion delivered up his prisoners into the proper custody, that of the praetorian prefect. Paul was at once treated with special consideration, and was allowed to dwell by himself with the soldier who guarded him. He was now therefore free "to preach the Gospel to them that were at Rome also;" and proceeded without delay to act upon his rule—"to the Jew first." He invited the chief persons amongst the Jews to

come to him, and explained to them that though he was brought to Rome to answer charges made against him by the Jews in Palestine, he had really done nothing disloyal to his nation or the Law; nor desired to be considered as hostile to his fellow-countrymen. The Roman Jews replied that they had received no tidings to his prejudice. The sect of which he had implied he was a member they knew to be everywhere spoken against; but they were willing to hear what he had to say. But, as of old, the reception of his message by the Jews was not favourable. He turned therefore again to the Gentiles, and for two years he dwelt in his own hired house. These are the last words of the Acts. But St. Paul's career is not abruptly closed. Before he himself fades out of our sight in the twilight of ecclesiastical tradition, we have letters written by himself, which contribute some particulars to his external biography, and give us a far more precious insight into his convictions and sympathies.—*Period of the Later Epistles.*—To that imprisonment to which St. Luke has introduced us—the imprisonment which lasted for such a tedious time, though tempered by much indulgence—belongs the noble group of Letters to Philemon, to the Colossians, to the Ephesians, and to the Philippians. The three former of these were written at one time and sent by the same messengers. Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four.—In this Epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (i. 25, ii. 24). Whether this hope was fulfilled or not, belongs to a question which now presents itself to us, and which has been the occasion of much controversy. According to the general opinion, the Apostle was liberated from his imprisonment and left Rome, soon after the writing of the letter to the Philippians, spent some time in visits to Greece, Asia Minor, and Spain, returned again as a prisoner to Rome, and was put to death there. In opposition to this view it is maintained by some, that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments adduced in favour of the common view are, (1) the hopes expressed by St. Paul of visiting Philippi (already named) and Colossae (Philemon 22); (2) a number of allusions in the Pastoral Epistles, and their general character; and (3) the testimony of ecclesiastical tradition. The decision must turn mainly upon the view taken of the Pastoral Epistles. The difficulties which have induced such critics as De Wette and Ewald to reject these Epistles, are not inconsiderable, and will force themselves upon the attention of the careful student of St. Paul. But they are overpowered by the much greater difficulties attending any hypothesis which assumes these Epistles to be spurious. We are obliged therefore to recognize the modifications of St. Paul's style, the developments in the history of the Church, and the movements of various persons, which have appeared suspicious in the Epistles to Timothy and Titus, as nevertheless historically true. And then without encroaching on the domain of conjecture, we draw the following conclusions:—(1.) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 3), "I besought thee to abide still at Ephesus, when I was

setting out for Macedonia." After being once at Ephesus, he was purposing to go there again (1 Tim. iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2.) He paid a visit to Crete, and left Titus to organize Churches there (Titus i. 5). He was intending to spend a winter at one of the places named Nicopolis (Tit. iii. 12). (3.) He travelled by Miletus (2 Tim. iv. 20), Troas (2 Tim. iv. 13), where he left a cloak or case, and some books, and Corinth (2 Tim. iv. 20). (4.) He is a prisoner at Rome, "suffering unto bonds as an evil-doer" (2 Tim. ii. 9), and expecting to be soon condemned to death (2 Tim. iv. 6). At this time he felt deserted and solitary, having only Luke of his old associates, to keep him company; and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (2 Tim. i. 15, iv. 10, 9-12). We conclude then, that after a wearing imprisonment of two years or more at Rome, St. Paul was set free, and spent some years in various journeyings eastwards and westwards. Towards the close of this time he pours out the warnings of his less vigorous but still brave and faithful spirit in the Letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. The Apostle appears now to have been treated, not as an honourable state prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second Letter to his "dearly beloved son" Timothy; and though he expresses a confident expectation of his speedy death, he yet thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord then stood by him and strengthened him," and gave him a favourable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel. This Epistle, surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was crucified there. Dionysius, bishop of Corinth (A.D. 170), says that Peter and Paul went to Italy and taught there together, and suffered martyrdom about the same time. Eusebius himself entirely adopts the tradition that St. Paul was beheaded under Nero at Rome.—*Chronology of St. Paul's Life.*—It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the N. T. history of the Apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed dates for determining the Pauline chronology—the death of Herod Agrippa, and the accession of Festus. Now it has been proved almost to certainty that Felix was recalled from Judaea and succeeded by Festus in the year 60. In the autumn, then, of A.D. 60 St. Paul left Caesarea. In the spring of 61

he arrived at Rome. There he lived two years, that is, till the spring of 63, with much freedom in his own hired house. After this we depend upon conjecture; but the Pastoral Epistles give us reasons for deferring the Apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go *backwards* from A.D. 60. St. Paul was two years at Caesarea (Acts xxiv. 27); therefore he arrived at Jerusalem on his last visit by the Pentecost of 58. Before this he had wintered at Corinth (Acts xx. 2, 3), having gone from Ephesus to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed 3 years at Ephesus (Acts xx. 31), he must have come thither in 54. Previously to this journey he had spent "some time" at Antioch (Acts xviii. 23), and our chronology becomes indeterminate. We can only add together the time of a hasty visit to Jerusalem, the travels of the great second missionary journey, which included 1½ year at Corinth, another indeterminate stay at Antioch, the important third visit to Jerusalem, another "long" residence at Antioch (Acts xiv. 28), the first missionary journey, again an indeterminate stay at Antioch (Acts xii. 25)—until we come to the second visit to Jerusalem, which nearly synchronised with the death of Herod Agrippa in A.D. 44. Within this interval of some 10 years the most important date to fix is that of the third visit to Jerusalem; and there is a great concurrence of the best authorities in placing this visit in either 50 or 51. St. Paul himself (Gal. ii. 1) places this visit "14 years after" either his conversion or the first visit. In the former case we have 37 or 38 for the date of the conversion. The conversion was followed by 3 years (Gal. i. 17) spent in Arabia and Damascus, and ending with the first visit to Jerusalem; and the space between the first visit (40 or 41) and the second (44 or 45) is filled up by an indeterminate time, presumably 2 or 3 years, at Tarsus (Acts ix. 30), and 1 year at Antioch (Acts xi. 26). The date of the martyrdom of Stephen can only be conjectured, and is very variously placed between A.D. 30 and the year of St. Paul's conversion. In the account of the death of Stephen St. Paul is called "a young man" (Acts vii. 58). It is not improbable therefore that he was born between A.D. 0 and A.D. 5, so that he might be past 60 years of age when he called himself "Paul the aged" in Philemon 9.

Pavement. [GABBATHA.]

Pavilion. 1. *Sôc*, properly an enclosed place, also rendered "tabernacle," "covert," and "den," once only "pavilion" (1's. xxvii. 5). 2. *Succoth*, usually "tabernacle" and "booth." 3. *Shaphrîr* and *Shaphrîr*, a word used once only in Jer. xliii. 10, to signify glory or splendour, and hence probably to be understood of the splendid covering of the royal throne.

Peacocks (Heb. *tuccityîm*). Amongst the natural products of the land of Tarshish which Solomon's fleet brought home to Jerusalem, mention is made of "peacocks;" for there can, we think, be no doubt at all that the A. V. is correct in thus rendering *tuccityîm*, which word occurs only in 1 K. x. 22, and 2 Chr. ix. 21; most of the old versions, with several of the Jewish Rabbis, being in favour of this translation. Some writers have, however, been dissatisfied with the rendering of "peacocks," and have proposed "parrots." Keil concludes that the "Aves Numidicae" (Guinea Fowls) are meant. There can be no doubt that

the Hebrew word is of foreign origin. Gesenius cites many authorities to prove that the *tuccit* is to be traced to the Tamil or Malabaric *togai*, "peacock," which opinion has been recently confirmed by Sir E. Tennent.

Pearl (Heb. *gâbîsh*). The Heb. word occurs, in this form, only in Job xxviii. 18, where the price of wisdom is contrasted with that of *râmôth* ("coral") and *gâbîsh*; and the same word, with the addition of the syllable *el*, is found in Ez. xiii. 11, 13, xxxviii. 22, with *abnê*, "stones," *i. e.* "stones of ice." The ancient versions contribute nothing by way of explanation. On the whole the balance of probability is in favour of "crystal," since *gâbîsh* denotes "ice." Pearls, however, are frequently mentioned in the N. T. (Matt. xiii. 45; 1 Tim. ii. 9; Rev. xvii. 4, xxi. 21). The *Unio margaritifera*, *Mytilus edulis*, *Ostrea edulis*, of our own country, occasionally furnish pearls; but "the pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (*Avicula margaritifera*), still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries.

Ped'ahel, the son of Ammihud, and prince of the tribe of Naphtali (Num. xxiv. 28).

Pedah'zur, father of Gamaliel, the chief of the tribe of Manasseh at the time of the Exodus (Num. i. 10, ii. 20, vii. 54, 59, x. 23).

Pedai'ah. 1. The father of Zebudah, mother of king Jehoiakim (2 K. xxii. 36).—2. The brother of Salathiel, or Shealtiel, and father of Zerubbabel, who is usually called the "son of Shealtiel," being, as Lord A. Hervey conjectures, in reality his uncle's successor and heir, in consequence of the failure of issue in the direct line (1 Chr. iii. 17-19).—3. Son of Paioah, that is, one of the family of that name, who assisted Nehemiah in repairing the walls of Jerusalem (Neh. iii. 25).—4. Apparently a priest; one of those who stood on the left hand of Ezra when he read the law to the people (Neh. viii. 4).—5. A Benjamite, ancestor of Sallu (Neh. xi. 7).—6. A Levite in the time of Nehemiah (Neh. xiii. 13).—7. The father of Joel, prince of the half tribe of Manasseh in the reign of David (1 Chr. xxvii. 20).

Pekah, son of Remaliah, originally a captain of Pekahiah king of Israel, murdered his master, seized the throne, and became the 18th sovereign of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah. Under his predecessors Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2 K. xv. 20), and by internal wars and conspiracies. Pekah seems steadily to have applied himself to the restoration of its power. For this purpose he sought for the support of a foreign alliance, and fixed his mind on the plunder of the sister kingdom of Judah. He must have made the treaty by which he proposed to share its spoil with Rezin king of Damascus, when Jotham was still on the throne of Jerusalem (2 K. xv. 37); but its execution was long delayed, probably in consequence of that prince's righteous and vigorous administration (2 Chr. xxvii.). When, however, his weak son Ahaz succeeded to the crown of David, the allies no longer hesitated, and formed the siege of Jerusalem. The history of the war is found in 2 K. xvi. and 2 Chr. xxviii. It is famous as the occasion of the great prophecies in Isaiah vii.-ix. Its

chief result was the capture of the Jewish port of Elath on the Red Sea; but the unnatural alliance of Damascus and Samaria was punished through the final overthrow of the ferocious confederates by Tiglath-pileser. The kingdom of Damascus was finally suppressed, and Rezin put to death, while Pekah was deprived of at least half his kingdom, including all the northern portion, and the whole district to the east of Jordan. Pekah himself, now fallen into the position of an Assyrian vassal, was of course compelled to abstain from further attacks on Judah. Whether his continued tyranny exhausted the patience of his subjects, or whether his weakness emboldened them to attack him, we do not know; but, from one or the other cause, Hoshea the son of Elah conspired against him, and put him to death. Pekah ascended the throne B.C. 757. He must have begun to war against Judah B.C. 740, and was killed B.C. 737.

Pekahiah, son and successor of Menahem, was the 17th king of the separate kingdom of Israel (B.C. 759-757). After a brief reign of scarcely two years a conspiracy was organized against him by Pekah, who, at the head of fifty Gileadites, attacked him in his palace, murdered him and his friends Argob and Arieah, and seized the throne.

Pekod', an appellative applied to the Chaldeans. It occurs only twice, viz. in Jer. i. 21, and Ez. xliii. 23. Authorities are undecided as to the meaning of the term. It is apparently connected with the root *pākād*, "to visit," and in its secondary senses "to punish," and "to appoint a ruler;" hence Pekod may be applied to Babylon in Jer. i. as significant of its impending punishment, as in the margin of the A. V. "visitation." But this sense will not suit the other passage, and hence Gesenius here assigns to it the meaning of "prefect." The LXX. treats it as the name of a district in Ezekiel, and as a verb in Jeremiah.

Pekai'ah. 1. A son of Elioenai, of the royal line of Judah (1 Chr. iii. 24).—2. One of the Levites who assisted Ezra in expounding the law (Neh. viii. 7). He afterwards sealed the covenant with Nehemiah (Neh. x. 10).

Pekai'ah, the son of Amzi, and ancestor of Adaiah (Neh. xi. 12).

Pekai'ah. 1. Son of Hananiah the son of Zerubbabel (1 Chr. iii. 21).—2. One of the captains of the marauding band of Simeonites, who in the reign of Hezekiah made an expedition to Mount Seir, and smote the Amalekites (1 Chr. iv. 42).—3. One of the heads of the people, and probably the name of a family, who sealed the covenant with Nehemiah (Neh. x. 22).—4. The son of Benaiah, and one of the princes of the people against whom Ezekiel was directed to utter the words of doom recorded in Ez. xi. 5-12.

Peleg, son of Eber, and brother of Joktan (Gen. x. 25, xi. 16). The only incident connected with his history is the statement that "in his days was the earth divided"—an event which was embodied in his name, Peleg meaning "division." This refers to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into southern Arabia, while the elder remained in Mesopotamia.

Pel'et. 1. A son of Jahdai in an obscure genealogy (1 Chr. ii. 47).—2. The son of Azmaveth, that is, either a native of the place of that name, or the son of one of David's heroes (1 Chr. xii. 3).

Pel'eth. 1. The father of On the Reubenite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1).—2. Son of Jonathan and a descendant of Jerahmeel (1 Chr. ii. 33).

Pel'ethites, mentioned only in the phrase rendered in the A. V. "the Cherethites and the Pel'ethites." These two collectives designate a force that was evidently David's body-guard. Their names have been supposed either to indicate their duties or to be gentile nouns. Gesenius renders them "executioners and ruiners." On the other hand, the LXX. and Vulg. retain their names untranslated; and the Syriac and Targ. Jon. translate them differently from the rendering above and from each other. The Egyptian monuments throw a fresh light upon this subject. From them we find that kings of the sixth and xth dynasties had in their service mercenaries of a nation called SHAYRETANA, which Ramesses III. conquered, under the name "SHAYRETANA of the Sea." The name SHAYRETANA, of which the first letter was also pronounced KH, is almost letter for letter the same as the Hebrew Cherethim; and since the SHAYRETANA were evidently cognate to the Philistines, their identity with the Cherethim cannot be doubted (comp. 1 Sam. xxx. 14; Ez. xxv. 16; Zeph. ii. 5). The Egyptian SHAYRETANA of the Sea are probably the Cretans. The Pelethites, who, as already remarked, are not mentioned except with the Cherethites, have not yet been similarly traced in Egyptian geography. The similarity, however, of the two names would favour the idea which is suggested by the mention together of the Cherethites and Pelethites, that the latter were of the Philistine stock as well as the former.

Peli'as. BEDEIAH (1 Esd. ix. 34; comp. Ezr. x. 35).

Pelican (Heb. *kāath*). Amongst the unclean birds mention is made of the *kāath* (Lev. xi. 18; Deut. xiv. 17). The suppliant psalmist compares his condition to "a *kāath* in the wilderness" (Ps. cii. 6). As a mark of the desolation that was to come upon Edom, it is said that "the *kāath* and the bittern should possess it" (Is. xxxiv. 11). The

Pelecanus onocrotalus.

same words are spoken of Nineveh (Zeph. ii. 14). In these two last places the A. V. has "cormorant" in the text and "pelican" in the margin. The best authorities are in favour of the pelican being the bird denoted by *kdath*. It is not quite clear what is the particular point in the nature or character of the pelican with which the psalmist compares his pitiable condition. We are inclined to believe that reference is made to its general aspect as it sits in apparent melancholy mood, with its bill resting on its breast. Oedmann's opinion that the *Pelecanus graculus*, the shag cormorant, and Bochart's, that the "bittern" is intended, are unsupported by any good evidence. The *P. onocrotalus* (common pelican) and the *P. crispus* are often observed in Palestine, Egypt, &c.

Pelonite, the. Two of David's mighty men, Helez and Ahijah, are called Pelonites (1 Chr. xi. 27, 36). From 1 Chr. xvii. 10, it appears that the former was of the tribe of Ephraim, and "Pelonite" would therefore be an appellation derived from his place of birth or residence. In the list of 2 Sam. xxiii. Helez is called (ver. 26) "the Palitite," that is, as Bertheau (on 1 Chr. xi.) conjectures, of Beth-Palet, or Beth-Phelet, in the south is Judah. But it seems probable that "Pelonite" of the correct reading. "Ahijah the Pelonite" appears in 2 Sam. xxii. 34 as "Eliam the son of Ahithophel the Gilonite," of which the former is a corruption.

Pen. [WRITING.]

Pen'iel, the name which Jacob gave to the place in which he had wrestled with God: "He called the name of the place 'Face of El,' for I have seen Elohim face to face" (Gen. xxxii. 30). In xxxii. 31, and the other passages in which the name occurs, its form is changed to PENEEL. On this change the lexicographers throw no light. It is perhaps not impossible that Peneel was the original form of the name.

Penin'nah, one of the two wives of Elkanah (1 Sam. i. 2).

Penny, Pennyworth. In the A. V., in several passages of the N. T., "penny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek *δυναρίον*, the name of the Roman *denarius* (Matt. xx. 2, xxi. 19; Mark vi. 37, xii. 15; Luke xx. 24; John vi. 7; Rev. vi. 6). The denarius was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century.

Pentateuch, the. The Greek name given to the five books commonly called the Five Books of Moses. The present Jews usually call the whole by the name of *Torah*, i. e. "the Law," or *Torath Mosheh*, "the Law of Moses." The Rabbinical title is "the five-fifths of the Law." The division of the whole work into five parts has by some writers been supposed to be original. Others, with more probability, think that the division was made by the Greek translators; for the titles of the several books are not of Hebrew but of Greek origin. The Hebrew names are merely taken from the first words of each book, and in the first instance only designated particular sections and not whole books. The MSS. of the Pentateuch form a single roll or volume, and are divided not into books, but into the larger and smaller sections called *Parshiyoth* and *Sedarim*. For the several names and contents of the Five Books we refer to the articles on each Book, where questions affecting

CON. D. II.

their integrity and genuineness are also discussed. The unity of the work in its existing form is now generally recognized. It is not a mere collection of loose fragments carelessly put together at different times, but bears evident traces of design and purpose in its composition. The question has been raised, whether the Book of Joshua does not, properly speaking, constitute an integral portion of this work. All that seems probable is, that the Book of Joshua received a final revision at the hands of Ezra, or some earlier prophet, at the same time with the books of the Law. At different times suspicions have been entertained that the Pentateuch as we now have it is not the Pentateuch of the earliest age, and that the work must have undergone various modifications and additions before it assumed its present shape. So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. Jerome, there can be little doubt, had seen the difficulty of supposing the Pentateuch to be altogether, in its present form, the work of Moses. Aben Ezra (†1167), in his *Comm.* on Deut. i. 1, threw out some doubts as to the Mosaic authorship of certain passages, such as Gen. xii. 6, Deut. iii. 10, 11, xxxi. 9. For centuries, however, the Pentateuch was generally received in the Church without question as written by Moses. The age of criticism had not yet come. The first signs of its approach were seen in the 17th century. Spinoza (*Tract. Theol.-Polit.* c. 8, 9, published in 1679) set himself boldly to controvert the received authorship of the Pentateuch. But it was not till the middle of the last century that the question as to the authorship of the Pentateuch was handled with anything like a discerning criticism. In the year 1753 there appeared at Brussels a work entitled "Conjectures sur les Mémoires originaux, dont il paroît que Moïse s'est servi pour composer le Livre de Genèse." It was written in his 69th year by Astruc, Doctor and Professor of Medicine in the Royal College at Paris, and Court Physician to Louis XIV. His critical eye had observed that throughout the Book of Genesis, and as far as the 6th chapter of Exodus, traces were to be found of two original documents, each characterised by a distinct use of the names of God; the one by the name Elohim, and the other by the name Jehovah. Besides these two principal documents, he supposed Moses to have made use of ten others in the composition of the earlier part of his work. But this "documentary hypothesis," as it is called, was too conservative and too rational for some critics. Vater and A. T. Hartmann maintained that the Pentateuch consisted merely of a number of fragments loosely strung together without order or design. This has been called the "fragmentary hypothesis." Both of these have now been superseded by the "supplementary hypothesis," which has been adopted with various modifications by De Wette, Bleek, Stähelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, and others. They all alike recognize two documents in the Pentateuch. They suppose the narrative of the Elohist, the more ancient writer, to have been the foundation of the work, and that the Jehovist or later writer making use of this document, added to and commented upon it, sometimes transcribing portions of it intact, and sometimes incorporating the substance of it into his own work. But though thus agreeing in the main, they differ widely in the application of the theory

Thus, for instance, De Wette distinguishes between the Elohist and the Jehovist in the first four Books, and attributes Deuteronomy to a different writer altogether. Stähelin, on the other hand, declares for the identity of the Deuteronomist and the Jehovist; and supposes the last to have written in the reign of Saul, and the Elohist in the time of the Judges. Hupfeld finds, in Genesis at least, traces of three authors, an earlier and a later Elohist, as well as the Jehovist. Delitzsch agrees with the authors above mentioned in recognizing two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he entirely severs himself from them in maintaining that Deuteronomy is the work of Moses. Ewald distinguishes seven different authors in the great Book of Origins or Primitive History (comprising the Pentateuch and Joshua). On the other side, however, stands an array of names scarcely less distinguished for learning, who maintain not only that there is a unity of design in the Pentateuch—which is granted by many of those before mentioned—but who contend that this unity of design can only be explained on the supposition of a single author, and that this author could have been none other than Moses. This is the ground taken by Hengstenberg, Hävernick, Drechsler, Ranke, Welte, and Keil.—II. We ask in the next place what is the testimony of the Pentateuch itself with regard to its authorship? 1. We find on reference to Ex. xxiv. 3, 4, that "Moses came and told the people all the words of Jehovah and all the judgments," and that he subsequently "wrote down all the words of Jehovah." These were written on a roll called "the book of the covenant" (ver. 7), and "read in the audience of the people." These "words" and "judgments" were no doubt the Sinaitic legislation so far as it had as yet been given, and which constituted in fact the covenant between Jehovah and the people. Upon the renewal of this covenant after the idolatry of the Israelites, Moses was again commanded by Jehovah to "write these words" (xxiv. 27). "And," it is added, "he wrote upon the tables the words of the covenant, the ten commandments." Leaving Deuteronomy aside for the present, there are only two other passages in which mention is made of the writing of any part of the Law, and those are Ex. xvii. 14, where Moses is commanded to write the defeat of Amalek in a book (or rather in *the* book, one already in use for the purpose); and Num. xxxiii. 2, where we are informed that Moses wrote the journeyings of the children of Israel in the desert, and the various stations at which they encamped. It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other. But it may be said that we have an express testimony to the Mosaic authorship of the Law in Deut. xxxi. 9-12, where we are told that "Moses wrote this Law," and delivered it to the custody of the priests, with a command that it should be read before all the people at the end of every seven years, on the Feast of Tabernacles. In ver. 24 it is further said, that when he "had made an end of writing the words of this Law in a book till they were finished," he delivered it to the Levites to be placed in the side of the ark of the covenant of Jehovah, that it might be pre-

served as a witness against the people. Such a statement is no doubt decisive, but the question is, how far does it extend? Do the words "this Law" comprise all the Mosaic legislation as contained in the last four books of the Pentateuch, or must they be confined only to Deuteronomy? The last is apparently the only tenable view. So far the direct evidence from the Pentateuch itself is not sufficient to establish the Mosaic authorship of every portion of the Five Books. Certain parts of Exodus, Leviticus, and Numbers, and the whole of Deuteronomy to the end of chap. xxx., are all that are expressly said to have been written by Moses. Two questions are yet to be answered. Is there evidence that parts of the work were not written by Moses? Is there evidence that parts of the work are later than his time? 2. The next question we ask is this: Is there any evidence to show that he did not write portions of the work which goes by his name? We have already referred to the last chapter of Deuteronomy, which gives an account of his death. Is it probable that Moses wrote the words in Ex. xi. 3, or those in Num. xii. 3? On the other hand, are not such words of praise just what we might expect from the friend and disciple who pronounced his eulogium after his death (Deut. xxxiv. 10)? 3. But there is other evidence, to a critical eye not a whit less convincing, which points in the same direction. If, without any theory casting its shadow upon us, and without any fear of consequences before our eyes, we read thoughtfully only the Book of Genesis, we can hardly escape the conviction that it putakes of the nature of a compilation. It has indeed a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy us that as it stands it is the creation of a single mind. But it bears also manifest traces of having been based upon an earlier work; and that earlier work itself seems to have had embedded in it fragments of still more ancient documents. Before proceeding to prove this, it may not be unnecessary to state, in order to avoid misconception, that such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge; but whether he was taught it by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the inspiration of the work. The question may therefore be safely discussed on critical grounds alone. The language of chapter i. 1-ii. 3 is totally unlike that of the section which follows, ii. 4-iii. 23. This last is not only distinguished by a peculiar use of the Divine Names—for here and nowhere else in the whole Pentateuch, except Ex. ix. 30, have we the combination of the two, Jehovah Elohim—but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the Creation distinct from that contained in the first chapter. It may be said, indeed, that this account does not contradict the former, and might therefore have proceeded from the same pen. But, fully admitting that there is no contradiction, the representation is so different that it is far more natural to conclude that it was derived from some other, though not antagonistic source. To take another instance. Chapter xiv. is beyond all doubt an ancient monument—papyrus-roll it may have been, or inscription on stone,—which has been copied and transplanted in its original form into our present

Book of Genesis. Archaic it is in its whole character: distinct too, again, from the rest of the book in its use of the name of God. We believe, then, that at least these two portions of Genesis—chap. ii. 4—iii. 24, and chap. xiv.—are original documents, preserved, it may have been, like the genealogies, which are also a very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history. We come now to a more ample examination of the question as to the distinctive use of the Divine Names. Is it the fact, as Astruc was the first to surmise, that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi., does contain two original documents characterised by their separate use of the Divine Names and by other peculiarities of style? Of this there can be no reasonable doubt. We do find, not only scattered verses, but whole sections thus characterised. Throughout this portion of the Pentateuch the name Jehovah prevails in some sections, and Elohim in others. There are a few sections where both are employed indifferently; and there are, finally, sections of some length in which neither the one nor the other occurs. And we find moreover that in connexion with this use of the Divine Names there is also a distinctive and characteristic phraseology. The style and idiom of the Jehovah sections is not the same as the style and idiom of the Elohim sections. After Ex. vi. 2—vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17—19 and chap. xviii. Such a phenomenon as this cannot be without significance. If, as Hengstenberg and those who agree with him would persuade us, the use of the Divine Names is to be accounted for throughout by a reference to their etymology—if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to set forth God as the Redeemer—then it still cannot but appear remarkable that only up to a particular point do these names stamp separate sections of the narrative, whereas afterwards all such distinctive criterion fails. Still this phenomenon of the distinct use of the Divine names would scarcely of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch. But there is other evidence pointing the same way. We find, for instance, the same story told by the two writers, and their two accounts manifestly interwoven; and we find also certain favourite words and phrases which distinguish the one writer from the other. (1.) In proof of the first, it is sufficient to read the history of Noah. In order to make this more clear, we will separate the two documents, and arrange them in parallel columns:—

JEHOVAH.

Gen. vi. 5. And Jehovah saw that the wickedness of man was great in the earth, and that every imagination of the thoughts of his heart was only evil continually. And it repented Jehovah, &c.

7. And Jehovah said I will blot out man whom I have created from off the face of the ground.

ELOHIM.

Gen. vi. 12. And Elohim saw the earth, and behold it was corrupt; for all flesh had corrupted his way upon the earth.

13. And Elohim said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

JEHOVAH.

vii. 1. And Jehovah said to Noah....Thou shalt take to thee by sevens, male and his female, and of all cattle which is not clean, two, male and his female.

3. Also of fowl of the air by sevens, male and female, to preserve seed alive on the face of all the earth.

vii. 4. For in yet seven days I will send rain upon the earth forty days and forty nights, and I will blot out all the substance which I have made from off the face of the ground.

vii. 5. And Noah did according to all that Jehovah commanded him.

ELOHIM.

vi. 9. Noah a righteous man was perfect in his generation. With Elohim did Noah walk.

vi. 19. And of every living thing of all flesh, two of all shalt thou bring into the ark to preserve alive with thee: male and female shall they be.

20. Of fowl after their kind, and of cattle after their kind, of everything that creepeth on the ground after his kind, two of all shall come unto thee that thou mayest preserve (them) alive.

vi. 17. And I, behold I do bring the flood, waters upon the earth, to destroy all flesh wherein is the breath of life, from under heaven, all that is in the earth shall perish.

vi. 22. And Noah did according to all that Elohim commanded him; so did he.

Without carrying this parallelism further at length, we will merely indicate by references the traces of the two documents in the rest of the narrative of the Flood:—vii. 1, 6, on the Jehovah side, answer to vi. 18, vii. 11, on the Elohim side; vii. 7, 8, 9, 17, 23, to vii. 13, 14, 15, 16, 18, 21, 22; viii. 21, 22, to ix. 8, 9, 10, 11. (2.) But again we find that these duplicate narratives are characterized by peculiar modes of expression; and that, generally, the Elohist and Jehovist sections have their own distinct and individual colouring. There is therefore, it seems, good ground for concluding that, besides some smaller independent documents, traces may be discovered of two original historical works, which form the basis of the present Book of Genesis and of the earlier chapters of Exodus. Of these there can be no doubt that the Elohist is the earlier. The passage in Ex. vi. establishes this, as well as the matter and style of the document itself. Whether Moses himself was the author of either of these works is a different question. Both are probably in the main as old as his time; the Elohist certainly is, and perhaps older. 4. But we may now advance a step further. There are certain references of time and place which clearly prove the work, in its present form, is later than the time of Moses. When, for instance, it is said (Gen. xii. 6, comp. xiii. 7), "And the Canaanite was then in the land," the obvious meaning of such a remark seems to be that the state of things was different in the time of the writer; and the conclusion is that the words must have been written after the occupation of the land by the Israelites. The principal notices of time and place which have been alleged as bespeaking for the Pentateuch a later date are the following:—(a.) References of time. Ex. vi. 26, 27, need not be regarded as a later addition, for it obviously sums up the genealogical register given just before, and refers back to ver. 13. But it is more naturally reconcilable with some other authorship than that of Moses. Again, Ex. xvi. 33—36, though it must have been introduced after the rest of the book was written, may have been added by Moses himself, supposing him to have composed the rest of the book. Moses there directs Aaron to lay up the manna before Jehovah, and then we read: "As Jehovah commanded Moses, so

Aaron laid it up before the Testimony" (i. e. the Ark) "to be kept. And the children of Israel did eat manna forty years, until they came to a land inhabited; they did eat manna until they came unto the borders of the land of Canaan." Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear then that this passage was written not only after the Ark was made, but after the Israelites had entered the Promised Land. The difficulty is greater with a passage in the Book of Genesis. The genealogical table of Esau's family (chap. xxxvi.) can scarcely be regarded as a later interpolation. It does not interrupt the order and connexion of the book; on the contrary, it is a most essential part of its structure; it is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here we find the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel." No unprejudiced person can read the words, "before there reigned any king over the children of Israel," without feeling that when they were written, kings had already begun to reign over Israel. Either then we must admit that the Book of Genesis did not exist as a whole till the times of David and Solomon, or we must regard this particular verse as the interpolation of a later editor. Similar remarks may perhaps apply to Lev. xviii. 28. This undoubtedly assumes the occupation of the Land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). (b.) In several instances older *names of places* give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxiv. 1, occurs the name of the well-known city of Dan. In Genesis we can only fairly account for its appearance by supposing that the old name Laish originally stood in the MS., and that Dan was substituted for it on some later revision. In Josh. xiv. 15 (comp. xv. 13, 54) and Judg. i. 10 we are told that the original name of Hebron before the conquest of Canaan was Kirjath-Arba. In Gen. xxiii. 2 the older name occurs, and the explanation is added (evidently by some one who wrote later than the occupation of Canaan), "the same is Hebron." Another instance of a similar kind is the occurrence of Hormah in Num. xiv. 45, xxi. 1-3, compared with Judg. i. 17. So far, then, judging the work simply by what we find in it, there is abundant evidence to show that, though the main bulk of it is Mosiac, certain detached portions of it are of later growth. We are not obliged, because of the late date of these portions, to bring down the rest of the book to later times.—III. We are now to consider the evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition. This evidence is of three kinds: first, direct mention of the work as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence. 1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, and viii. 31, 34, xiii. 6 (in xxiv. 26), in all which places Moses is said to have written it. The Book of Judges does not speak of

the book of the Law. No direct mention of it occurs in the Books of Samuel. The first mention of the Law of Moses after the establishment of the monarchy is in David's charge to his son Solomon, on his deathbed (1 K. ii. 3). The allusion seems to be to parts of Deuteronomy, and therefore favours the Mosiac authorship of that book (comp. viii. 9, 53). In 2 K. xi. 12, "the testimony" is put into the hands of Joash at his coronation. This must have been a book containing either the whole of the Mosiac law, or at least the Book of Deuteronomy. In the Books of Chronicles far more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses"—a fact which may be accounted for partly by the priestly character of those books (comp. 1 Chr. xvi. 40, xxii. 12, 13; 2 Chr. xii. 1, xiv. 4, xv. 3, xvii. 9, xxv. 4, xxxi. 3, 4, 21, xxxiii. 8, xxxiv. 14, xxxv. 26). In Ezra and Nehemiah we have mention several times made of the Law of Moses, and here there can be no doubt that our present Pentateuch is meant; for we have no reason to suppose that any later revision of it took place. At this time, then, the existing Pentateuch was regarded as the work of Moses. The Books of Chronicles, though undoubtedly based upon ancient records, are probably in their present form as late as the time of Ezra. Hence it might be supposed that if the reference is to the present Pentateuch in Ezra, the present Pentateuch must also be referred to in Chronicles. But this does not follow. The Book of Ezra speaks of the Law as it existed in the time of the writer; the Books of Chronicles speak of it as it existed long before. Hence the author of the latter (who may have been Ezra), in making mention of the Law of Moses, refers of course to that recension of it which existed at the particular periods over which his history travels. In Dan. ix. 11, 13, the Law of Moses is mentioned; and here again a book differing in nothing from our present Pentateuch is probably meant. In the Prophets and in the Psalms, though there are many allusions to the Law, evidently as a written document, there are none as to its authorship. 2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing very materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered: such for instance as Ex. xii. 40; Dent. xxvii. 4. If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been earlier than the reign of Solomon, and indeed than that of Saul. History leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it *might* have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Hezekiah or Josiah. But the actual condition of the Samaritan Pentateuch is against any such supposition. It agrees so remarkably with the existing Hebrew Pentateuch, and that too in those passages which are manifestly interpolations and corrections as late as the time of Ezra, that we must look for some other period to which to refer the adoption of the Books of Moses by the Samaritans. This we find after the Babylonish Exile, at the time of the institution

of the rival worship on Gerizim. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion with which Nehemiah met their advances when he was rebuilding the walls of Jerusalem provoked their wrath. From this time forward they were declared and open enemies. A full discussion of this question would be out of place here. We incline to the view of Prideaux, that the Samaritan Pentateuch was in fact a transcript of Ezra's revised copy. The same view is virtually adopted by Gesenius. 3. We are now to consider evidence of a more indirect kind, which bears not so much on the Mosaic authorship as on the early existence of the work as a whole. This last circumstance, however, if satisfactorily made out, is, indirectly at least, an argument that Moses wrote the Pentateuch. Hengstenberg has tried to show that all the later books, by their allusions and quotations, presuppose the existence of the Books of the Law. He traces moreover the influence of the Law upon the whole life, civil and religious, of the nation after their settlement in the land of Canaan. Now, beyond all doubt, there are numerous most striking references, both in the Prophets and in the Books of Kings, to passages which are found in our present Pentateuch. It is established in the most convincing manner that the legal portions of the Pentateuch already existed in writing before the separation of the two kingdoms. Even as regards the historical portions, there are often in the later books almost verbal coincidences of expression, which render it more than probable that these also existed in writing. But now if, as appears from the examination of all the extant Jewish literature, the Pentateuch existed as a canonical book; if, moreover, it was a book so well known that its words had become household words among the people; and if the prophets could appeal to it as a recognized and well-known document—how comes it to pass that in the reign of Josiah, one of the latest kings, its existence as a canonical book seems to have been almost forgotten? Yet such was evidently the fact. How are we to explain this surprise and alarm in the mind of Josiah, betraying as it does such utter ignorance of the Book of the Law, and of the severity of its threatenings—except on the supposition that as a written document it had well nigh perished? This must have been the case, and it is not so extraordinary a fact perhaps as it appears at first sight. It is quite true that in the reign of Jehoshaphat pains had been taken to make the nation at large acquainted with the Law; but that was 300 years before, a period equal to that between the days of Luther and our own; and in such an interval great changes must have taken place. It is true that in the reign of Ahaz the prophet Isaiah directed the people to turn "to the Law and to the Testimony;" and Hezekiah, who succeeded Ahaz, had no doubt reigned in the spirit of the prophet's advice. But the next monarch was guilty of outrageous wickedness, and filled Jerusalem with idols. How great a desolation might one wicked prince effect, especially during a lengthened reign! To this we must add, that at no time, in all probability, were there many copies of the Law existing in writing. It was probably then the custom, as it still is in the East, to trust largely to the memory for its transmission. The ritual would easily be perpetuated by the mere force of observance, though

much of it doubtless became perverted, and some part of it perhaps obsolete, through the neglect of the priests. The command of Moses, which laid upon the king the obligation of making a copy of the Law for himself, had of course long been disregarded. Here and there perhaps only some prophet or righteous man possessed a copy of the sacred book. The bulk of the nation were without it. The oral transmission of the Law and the living witness of the prophets had superseded the written document, till at last it had become so scarce as to be almost unknown. On carefully weighing all the evidence hitherto adduced, we can hardly question, without a literary scepticism which would be most unreasonable, that the Pentateuch is to a very considerable extent as early as the time of Moses, though it may have undergone many later revisions and corrections, the last of these being certainly as late as the time of Ezra. But as regards any direct and unimpeachable testimony to the composition of the whole work by Moses we have it not. Only one book out of the five—that of Deuteronomy—claims in express terms to be from his hand. And yet, strange to say, this is the very book in which modern criticism refuses most peremptorily to admit the claim. It is of importance therefore to consider this question separately. All allow that the Book of the Covenant in Exodus, perhaps a great part of Leviticus and some part of Numbers, were written by Israel's greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses that it is quite impossible to believe that he is the author. But how then set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites sedulously to preserve it by the side of the ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the more colour of consistency to his work! But, besides the fact that Deuteronomy claims to have been written by Moses, there is other evidence which establishes the great antiquity of the book. 1. It is remarkable for its allusions to Egypt, which are just what would be expected supposing Moses to have been the author. In xx. 5 there is an allusion to Egyptian regulations in time of war; in xxv. 2 to the Egyptian bastinado; in xl. 10 to the Egyptian mode of irrigation. Again, among the curses threatened are the sicknesses of Egypt, xxviii. 60 (comp. vii. 15). According to xxviii. 68, Egypt is the type of all the oppressors of Israel. Lastly, references to the sojourning in Egypt are numerous (vi. 21-23; see also vii. 8, 18, xi. 3). The phraseology of the book, and the archaisms found in it, stamp it as of the same age with the rest of the Pentateuch. 2. A fondness for the use of figures is another peculiarity of Deuteronomy. See xxix. 17, 18, xxviii. 13, 44, i. 31, 44, viii. 5, xxviii. 29, 49. The results are most surprising when we compare Deuteronomy with the Book of the Covenant (Ex. xix.-xxiv.) on the one hand, and with Ps. xc. (which is said to be Mosaic) on the other. In addition to all these peculiarities which are arguments for the Mosaic authorship of the Book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt by a wrong interpretation of 2 K. xxii. and 2 Chr.

xxiv. to bring down Deuteronomy as low as the time of Manasseh fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy. Since, then, not only Jeremiah and Ezekiel, but Amos and Hosea, Isaiah and Micah, speak in the words of Deuteronomy, as well as in words borrowed from other portions of the Pentateuch, we see at once how untenable is the theory of those who, like Ewald, maintain that Deuteronomy was composed during the reign of Manasseh, or, as Vaihinger does, during that of Hezekiah. But, in truth, the Book speaks for itself. No imitator could have written in such a strain. We scarcely need the express testimony of the work to its own authorship. But, having it, we find all the internal evidence conspiring to show that it came from Moses. We therefore declare unhesitatingly for the Mosaic authorship of Deuteronomy. Briefly, then, to sum up the results of our inquiry. 1. The Book of Genesis rests chiefly on documents much earlier than the time of Moses, though it was probably brought to very nearly its present shape either by Moses himself, or by one of the elders who acted under him. 2. The Books of Exodus, Leviticus, and Numbers, are to a great extent Mosaic. Besides those portions which are expressly declared to have been written by him, other portions, and especially the legal sections, were, if not actually written, in all probability dictated by him. 3. Deuteronomy, excepting the concluding part, is entirely the work of Moses, as it professes to be. 4. It is not probable that this was written before the three preceding books, because the legislation in Exodus and Leviticus as being the more formal is manifestly the earlier, whilst Deuteronomy is the spiritual interpretation and application of the Law. But the letter is always before the spirit; the thing before its interpretation. 5. The first composition of the Pentateuch as a whole could not have taken place till after the Israelites entered Canaan. It is probable that Joshua, and the elders who were associated with him, would provide for its formal arrangement, custody, and transmission. 6. The whole work did not finally assume its present shape till its revision was undertaken by Ezra after the return from the Babylonish Captivity.

Pentecost (Ex. xxiii. 16), "the feast of harvest, the first fruits of thy labours;" (Ex. xxxiv. 22; Deut. xvi. 10) "the feast of weeks;" (Num. xxviii. 26, cf. Lev. xxiii. 17) "the day of first fruits." The second of the great festivals of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages relating to it are, Ex. xxiii. 16, Lev. xxiii. 15-22, Num. xxviii. 26-31, Deut. xvi. 9-12.—I. The time of the festival was calculated from the second day of the Passover, the 16th of Nisan. The Law prescribes that a reckoning should be kept from "the morrow after the Sabbath" (Lev. xxiii. 11, 15) to the morrow after the completion of the seventh week, which would of course be the fiftieth day (Lev. xxiii. 15, 16; Deut. xvi. 9). The fifty days formally included the period of grain-harvest, commencing with the offering of the first sheaf of the barley-harvest in the Passover, and ending with that of the two first loaves which were made from the wheat-harvest, at this festival.¹ It was the offering of these two loaves which was the distinguishing rite of the day of Pentecost. They were

to be leavened. Each loaf was to contain the tenth of an ephah (i.e. about $3\frac{1}{2}$ quarts) of the finest wheat-flour of the new crop (Lev. xxiii. 17). The flour was to be the produce of the land. The loaves, along with a peace-offering of two lambs of the first year, were to be waved before the Lord and given to the priests. At the same time a special sacrifice was to be made of seven lambs of the first year, one young bullock and two rams, as a burnt-offering (accompanied by the proper meat and drink offerings), and a kid for a sin-offering (Lev. xxiii. 18, 19). Besides these offerings, if we adopt the interpretation of the Rabbinical writers, it appears that an addition was made to the daily sacrifice of two bullocks, one ram, and seven lambs, as a burnt-offering (Num. xxviii. 27). At this, as well as the other festivals, a free-will offering was to be made by each person who came to the sanctuary, according to his circumstances (Deut. xvi. 10). It would seem that its festive character partook of a more free and hospitable liberality than that of the Passover, which was rather of the kind which belongs to the mere family gathering. In this respect, it resembled the Feast of Tabernacles. The Levite, the stranger, the fatherless, and the widow, were to be brought within its influence (Deut. xvi. 11, 14). The mention of the gleanings to be left in the fields at harvest for "the poor and the stranger," in connexion with Pentecost, may perhaps have a bearing on the liberality which belonged to the festival (Lev. xxiii. 22). At Pentecost (as at the Passover) the people were to be reminded of their bondage in Egypt, and they were especially admonished of their obligation to keep the divine law (Deut. xvi. 12).—II. Of the information to be gathered from Jewish writers respecting the observance of Pentecost, the following particulars appear to be the best worthy of notice. The flour for the loaves was sifted with peculiar care twelve times over. They were made either the day before, or, in the event of a Sabbath preceding the day of Pentecost, two days before the occasion. The two lambs for a peace-offering were to be waved by the priest, before they were slaughtered, along with the loaves, and afterwards the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest and the other to the ordinary priests who officiated. The bread was eaten that same night in the Temple, and no fragment of it was suffered to remain till the morning. Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Captivity, have prolonged it to two days.—III. Doubts have been cast on the common interpretation of Acts ii. 1, according to which the Holy Ghost was given to the Apostles on the day of Pentecost. Lightfoot contends that the passage means, *when the day of Pentecost had passed*. The question on what day of the week this Pentecost fell, must of course be determined by the mode in which the doubt is solved regarding the day on which the Last Supper was eaten. If it was the legal paschal supper, on the 14th of Nisan, and the Sabbath during which our Lord lay in the grave was the day of the omer, Pentecost must have followed on the Sabbath. But if the supper was eaten on the 13th, and He was crucified on the 14th, the Sunday of the Resurrection must have been the day of the omer, and Pentecost must have occurred on the first day of the week.—IV. There is no clear notice in the Scriptures of any historical sig-

PERGANOS.

To face p. 711.

nificance belonging to Pentecost. But most of the Jews of later times have regarded the day as the commemoration of the giving of the Law on Mount Sinai.—V. If the feast of Pentecost stood without an organic connexion with any other rites, we should have no certain warrant in the Old Testament for regarding it as more than the divinely appointed solemn thanksgiving for the yearly supply of the most useful sort of food. But it was, as we have seen, essentially linked on to the Passover, that festival which, above all others, expressed the fact of a race chosen and separated from other nations. It was not an insulated day. It stood as the culminating point of the Pentecostal season. If the offering of the omer was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two loaves was a thanksgiving for its completion, each rite was brought into a higher significance in consequence of the omer forming an integral part of the Passover.

Penuel. The usual, and possibly the original, form of the name of a place which first appears under the slightly different form of PENIEL (Gen. xxxii. 30, 31). From this narrative it is evident that it lay somewhere between the torrent Jabbok and Succoth (comp. xxxii. 22 with xxxiii. 17, and Judg. viii. 5, 8). Succoth has been identified with tolerable certainty at *Sakût*, but no trace has yet been found of Penuel.

Pe'or. A mountain in Moab, from whence, after having without effect ascended the lower or less sacred summits of Bamoth-Baal and Pisgah, the prophet Balaam was conducted by Balak for his final conjurations (Num. xxiii. 28 only). Peor—or more accurately, “the Peor”—was “facing Jeshimon.” The same thing is said of Pisgah. But unfortunately we are as yet ignorant of the position of all three, so that nothing can be inferred from this specification. In the *Onomasticon* (“Fogor;” “Bethphogor;” “Danaba”) it is stated to be above the town of L bias (the ancient Beth-aram, and opposite Jericho.—2. In four passages (Num. xxv. 18, twice; xxxi. 16; Josh. xii. 17) Peor occurs as a contraction for Baal-peor.

Per'azim, Mount. A name which occurs in Is. xxviii. 21 only,—unless the place which it designates be identical with the BAAL-PERAZIM mentioned as the scene of one of David's victories over the Philistines. The commentators almost unanimously take the reference to be to David's victories, above alluded to, at Baal Perazim, and Gibeon (Gesenius; Strachey), or to the former of these on the one hand, and Joshua's slaughter of the Canaanites at Gibeon and Beth-horon on the other (Eichhorn; Rosenmüller; Michaelis).

Per'eah. The son of Machir by his wife Maachah (1 Chr. vii. 16).

Per'ez. The “children of Perez,” or Pharez, the son of Judah, appear to have been a family of importance for many centuries (1 Chr. xxvii. 3; Neh. xi. 4, 6).

Per'ez-Uzza, 1 Chr. xiii. 11; and

Per'ez-Uzzah, 2 Sam. vi. 8. The title which David conferred on the threshing-floor of Nachon, or Cidon, in commemoration of the sudden death of Uzzah: “And David was wroth because Jehovah had broken this breach on Uzzah and he called the place ‘Uzzah's breaking’ unto this day.” The situation of the spot is not known.

Perfumes. The free use of perfumes was peculiarly grateful to the Orientals (Prov. xxvii. 9),

whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate. The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. The modes in which they applied them were various. Perfumes entered largely into the Temple service, in the two forms of incense and ointment (Ex. xxx. 22-38). Nor were they less used in private life: not only were they applied to the person, but to garments (Ps. xlv. 8; Cant. iv. 11), and to articles of furniture, such as beds (Prov. vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times (Dan. ii. 46). When a royal personage went abroad in his litter, attendants threw up “pillars of smoke” about his path (Cant. iii. 6). The use of perfumes was omitted in times of mourning, whence the allusion in Is. iii. 24.

Per'ga, an ancient and important city of Pamphylia (Acts xiii. 13), situated on the river Castius, at a distance of 60 stadia from its mouth, and celebrated in antiquity for the worship of Artemis (Diana), whose temple stood on a hill outside the town.

Per'gamos. A city of Mysia, about three miles to the N. of the river *Bakyr-tohai*, the Caicus of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a conical appearance when viewed from the plain. The local legends attached a sacred character to this place. Lysimachus, one of Alexander's successors, deposited there an enormous sum—no less than 9000 talents—in the care of an Asiatic eunuch named Phileterus. In the troublous times which followed the break up of the Macedonian conquests, this officer betrayed his trust, and succeeded in retaining the treasure and transmitting it at the end of twenty years to his nephew Eumenes, a petty dynast in the neighbourhood. Eumenes was succeeded by his cousin Attalus, the founder of the Attalic dynasty of Pergamene kings, who by allying himself with the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus and Perseus by a gift of all the territory which the former had possessed to the north of the Taurus range. The Attalic dynasty terminated B.C. 133, when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of *Asia propria*. The sumptuousness of the Attalic princes had raised Pergamos to the rank of the first city in Asia as regards splendour. It was a sort of union of a pagan cathedral city, an university town, and a royal residence, embellished during a succession of years by kings who all had a passion for expenditure and ample means of gratifying it. Under the Attalic kings, Pergamos became a city of temples, devoted to a sensuous worship; and being in its origin, according to pagan notions, a sacred place, might not unnaturally be viewed by Jews and Jewish Christians, as one “where was the throne of Satan” (Rev. ii. 13). After the extinction of its independence, the sacred character of Pergamos seems to have been put even more prominently forward. In the time of Martial, Aesculapius had acquired so much prominence that he is called *Pergameus deus*. From the circumstance of this notoriety of the Pergamene Aesculapius, from the title *Asclepius* being given to him, from the *serpent*

being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions "the throne of Satan" and "where Satan dwelleth," have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although undoubtedly the Aesculapius worship of Pergamos was the most famous, yet an inscription of the time of Marcus Antoninus distinctly puts Zeus, Athenè, Dionysus, and Asclepius in a co-ordinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore, that the expressions above quoted should be so interpreted as to isolate one of them from the rest. It may be added, that the charge against a portion of the Pergamene Church that some among them were of the school of Balaam, whose policy was to put a stumbling-block before the children of Israel, by inducing them to eat things sacrificed to idols and to commit fornication (Rev. ii. 14), is in both its particulars very inappropriate to the Aesculapian ritual. It points rather to the Dionysus and Aphroditè worship.

Per'ida. The children of Perida returned from Babylon with Zerubbabel (Neh. vii. 57).

Per'izzite, the, and Per'izzites. One of the nations inhabiting the Land of Promise before and at the time of its conquest by Israel. They are continually mentioned in the formula so frequently occurring to express the Promised Land (Gen. xv. 20; Ex. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. vii. 1, xx. 17; Josh. iii. 10, ix. 1, xxiv. 11; Judg. iii. 5; Ezr. ix. 1; Neh. ix. 8). They appear,

however, with somewhat greater distinctness on several occasions (Gen. xiii. 7, xxiv. 30; Judg. i. 4, 5; 2 Esdr. i. 21). The notice in the book of Judges locates them in the southern part of the Holy Land. Another independent and equally remarkable fragment of the history of the conquest seems to speak of them as occupying, with the Rephaim, or giants, the "forest country" on the western flanks of Mount Carmel (Josh. xvii. 15-18). The signification of the name is not by any means clear. It possibly meant rustics, dwellers in open, unwallled villages, which are denoted by a similar word.

Persep'olis is mentioned only in 2 Macc. ix. 2. It was the capital of Persia Proper, and the occasional residence of the Persian court from the time of Darius Hystaspis, who seems to have been its founder, to the invasion of Alexander. Its wanton destruction by that conqueror is well known. Persepolis has been regarded by many as identical with Pasargadae, the famous capital of Cyrus. But the positions are carefully distinguished by a number of ancient writers, and the ruins, which are identified beyond any reasonable doubt, show that the two places were more than 40 miles apart. Pasargadae was at *Murgaub*, where the tomb of Cyrus may still be seen; Persepolis was 42 miles to the south of this, near Istakher, on the site now called the *Chehl-Minar* or Forty Pillars. Here, on a platform hewn out of the solid rock, the sides of which face the four cardinal points, are the remains of two great palaces, built respectively by Darius Hystaspis and his son Xerxes, besides a number of other edifices, chiefly temples. They are of great extent and magnificence, covering an area of many acres.

Persepolis.

Per'seus, the eldest son of Philip V. and last king of Macedonia. After his father's death (B.C. 179) he continued the preparations for the renewal of the war with Rome, which was seen to be inevitable. In B.C. 168 he was defeated by L. Aemilius Paulus at Pydna, and shortly afterwards surrendered with his family to his conquerors. The defeat of Perseus put an end to the independence of Macedonia, and extended even to Syria the terror of the Roman name (1 Macc. viii. 5).

Per'sia was strictly the name of a tract of no very large dimensions on the Persian Gulf, which is still known as *Fars*, or *Farsistan*, a corruption

of the ancient appellation. This tract was bounded, on the west, by Susiana or Elam, on the north by Media, on the south by the Persian Gulf, and on the east by Carmania, the modern *Kerman*. Above this miserable region is a tract very far superior to it, consisting of rocky mountains—the continuation of Zagros, among which are found a good many fertile valleys and plains, especially towards the north, in the vicinity of Shiraz. Here is an important stream, the *Bendamir*, which flowing through the beautiful valley of *Mordasht*, and by the ruins of Persepolis, is then separated into numerous channels for the purpose of irrigation, and,

after fertilizing a large tract of country (the district of *Kurjan*), ends its course in the salt lake of *Bakhtigan*. Further north an arid country again succeeds, the outskirts of the Great Desert, which extends from Kerman to Mazenderan, and from Kashan to Lake Zerrah. The chief towns were Pasargadae, the ancient, and Persepolis, the later capital. While the district of *Fars* is the true original Persia, the name is more commonly applied, both in Scripture and by profane authors, to the entire tract which came by degrees to be included within the limits of the Persian Empire. This empire extended at one time from India on the east to Egypt and Thrace upon the west, and included, besides portions of Europe and Africa, the whole of Western Asia between the Black Sea, the Caucasus, the Caspian, and the Jaxartes upon the north, the Arabian desert, the Persian Gulf, and the Indian Ocean upon the south. The only passage in Scripture where Persia designates the tract which has been called above "Persia Proper" is Ez. xxxviii, 5. Elsewhere the Empire is intended.

Persians. The name of the people who inhabited the country called above "Persia Proper," and who thence conquered a mighty empire. There is reason to believe that the Persians were of the same race as the Medes, both being branches of the great Aryan stock.—1. *Character of the nation.*—The Persians were a people of lively and impressive minds, brave and impetuous in war, witty, passionate, for Orientals truthful, not without some spirit of generosity, and of more intellectual capacity than the generality of Asiatics. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline. Polygamy was commonly practised among them. They were fond of the pleasures of the table. In war they fought bravely, but without discipline.—2. *Religion.*—The religion which the Persians brought with them into Persia Proper seems to have been of a very simple character, differing from natural religion in little, except that it was deeply tainted with Dualism. Like the other Aryans, the Persians worshipped one Supreme God, whom they called *Aura-mazda* (Oromasdes)—a term signifying (as is believed) "the Great Giver of Life." The royal inscriptions rarely mentioned any other god. Occasionally, however, they indicate a slight and modified polytheism. Oromasdes is "the chief of the gods," so that there are other gods besides him; and the highest of these is evidently *Mithra*, who is sometimes invoked to protect the monarch, and is beyond a doubt identical with "the sun." Entirely separate from these—their active resister and antagonist—was *Ahriman* (Arimanius) "the Death-dealing"—the powerful, and (probably) self-existing Evil Spirit, from whom war, disease, frost, hail, poverty, sin, death, and all other evils, had their origin. The character of the original Persian worship was simple. They were not destitute of temples, as Herodotus asserts; but they had probably no altars, and certainly no images. Neither do they appear to have had any priests. From the first entrance of the Persians, as immigrants, into their new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater por-

tion of the region lying between Mesopotamia and India. The essence of this religion was worship of the elements—more especially, of the subtilties of all, fire. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival. There was a short struggle for pre-eminence, after which the rival systems came to terms.—3. *Language.*—The language of the ancient Persians was closely akin to the Sanskrit, or ancient language of India. Modern Persian is its degenerate representative, being, as it is, a motley idiom, largely impregnated with Arabic.—4. *Division into tribes, &c.*—Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic.—5. *History.*—In remote antiquity it would appear that the Persians dwelt in the region east of the Caspian, or possibly in a tract still nearer India. The first Faigard of the Vendidad seems to describe their wanderings in these countries, and shows the general line of their progress to have been from east to west, down the course of the Oxus, and then, along the southern shores of the Caspian Sea, to Rhages, and Media. It is impossible to determine the period of these movements; but there can be no doubt that they were anterior to B.C. 880, at which time the Assyrian kings seem for the first time to have come in contact with Aryan tribes east of Mount Zagros. It is uncertain whether they are to be identified with the *Dartus* or *Partau* of the Assyrian monuments. If so, we may say that from the middle of the 9th to the middle of the 8th century B.C. they occupied south-eastern Armenia, but by the end of the 8th century had removed into the country, which thenceforth went by their name. The leader of this last migration would seem to have been a certain Achaemenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achaemenidae, about B.C. 700. Very little is known of the history of Persia between this date and the revolt and accession of Cyrus the Great, near a century and a half later. Of the circumstances under which this revolt took place we have no certain knowledge. We must be content to know that after about seventy or eighty years of subjection, the Persians revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people. The probable date of the revolt is B.C. 558. Its success, by transferring to Persia the dominion previously in the possession of the Medes, placed her at the head of an empire, the bounds of which were the Halys upon the west, the Euxine upon the north, Babylon upon the south, and upon the east the salt desert of Iran. As usual in the East, this success led on to others. Cyrus defeated Croesus, and added the Lydian empire to his dominions. This conquest was followed closely by the submission of the Greek settlements on the Asiatic coast, and by the reduction of Caria, Caunus, and Lycia. The empire was soon afterwards extended greatly towards the north-east and east. Cyrus rapidly overran the flat countries beyond the Caspian, after which he seems to have pushed his conquests still further to the east, adding to his dominions the districts of Herat, Cabul, Candahar, Seistan, and Beloochistan, which were thenceforth included in the empire. In B.C. 539 or 538, Babylon was attacked, and after a stout defence fell before his

irresistible hands. This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race—like themselves, abhorers of idols—and professors of a religion in which to a great extent they could sympathize. This race Cyrus determined to restore to their own country; which he did by the remarkable edict recorded in the first chapter of Ezra (Ezr. i. 2-4). He was slain in an expedition against the Massagetae or the Derbices, after a reign of twenty-nine years. Under his son and successor, Cambyses III., the conquest of Egypt took place (B.C. 525). This prince appears to be the Ahasuerus of Ezra (iv. 6). In the absence of Cambyses with the army, a conspiracy was formed against him at court, and a Magian priest, Gomates (*Gaumata*) by name, professing to be Smerdis (*Bardiya*), the son of Cyrus, whom his brother, Cambyses, had put to death secretly, obtained quiet possession of the throne. Cambyses despairing of the recovery of his crown, ended his life by suicide. His reign had lasted seven years and five months. Gomates the Magian found himself thus, without a struggle, master of Persia (B.C. 522). His situation, however, was one of great danger and difficulty. There is reason to believe that he owed his elevation to his fellow-religionists, whose object in placing him upon the throne was to secure the triumph of Magianism over the Dualism of the Persians. He reversed the policy of Cyrus with respect to the Jews, and forbade by an edict the further building of the Temple (Ezr. iv. 17-22). Darius, the son of Hystaspes, headed a revolt against him, which in a short time was crowned with complete success. The reign of Gomates lasted seven months. The first efforts of Darius were directed to the re-establishment of the Oromadian religion in all its purity. Appealed to, in his second year, by the Jews, who wished to resume the construction of their Temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenues, whereby the Jews were able to complete the Temple as early as his sixth year (Ezr. vi. 1-15). During the first part of the reign of Darius the tranquillity of the empire was disturbed by numerous revolts. His courage and activity, however, seconded by the valour of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and the result was, that, after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. His talents as an administrator were, upon this, brought into play. On the whole he must be pronounced, next to Cyrus, the greatest of the Persian monarchs. The latter part of his reign was, however, clouded by reverses. The disaster of Mardonius at Mount Athos was followed shortly by the defeat of Datis at Marathon; and before any attempt could be made to avenge that blow, Egypt rose in revolt (B.C. 486), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was dissension; and when, after a reign of thirty-six years, the fourth Persian monarch died (B.C. 485), leaving his throne to a young prince of strong and ungoverned passions, it was evident that the empire had reached its highest point of greatness, and was already verging towards its decline. The first act of Xerxes was to reduce Egypt to subjection (B.C. 484), after which he began at once to make preparations for his invasion of Greece.

It is probable that he was the Ahasuerus of *Esther*. It is unnecessary to give an account of the well-known expedition against Greece, which ended so disastrously for the invaders. During the rest of the reign of Xerxes, and during part of that of his son and successor, Artaxerxes, Persia continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but at last, in B.C. 449, a peace was concluded between the two powers, who then continued on terms of amity for half a century. A conspiracy in the seraglio having carried off Xerxes (B.C. 465), Artaxerxes his son, called by the Greeks *Μακρόχειρ*, or "Long-Handed," succeeded him, after an interval of seven months, during which the conspirator Artabanus occupied the throne. This Artaxerxes, who reigned forty years, is beyond a doubt the king of that name who stood in such a friendly relation towards Ezra (Ezr. vii. 11-28) and Nehemiah (Neh. ii. 1-9, &c.). He is the last of the Persian kings who had any special connexion with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sogdianus, Darius Nothus, Artaxerxes Mnemon, Artaxerxes Ochus, and Darius Codomannus, who is probably the "Darius the Persian" of Nehemiah (xii. 22). These monarchs reigned from B.C. 424 to B.C. 330. The collapse of the empire under the attack of Alexander is well known, and requires no description here. On the division of Alexander's dominions among his generals Persia fell to the Seleucidae, under whom it continued till after the death of Antiochus Epiphanes, when the conquering Parthians advanced their frontier to the Euphrates, and the Persians became included among their subject-tribes (B.C. 164). Still their nationality was not obliterated. In A.D. 226, the Persians shook off the yoke of their oppressors, and once more became a nation.

Persia. A Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes.

Per'uda. The same as PERIDA (Ezr. ii. 55).

Pestilence. [PLAGUE.]

Peter. His original name was Simon, i. e. "heaver." He was the son of a man named Jonas (Matt. xvi. 17; John i. 43, xxi. 16), and was brought up in his father's occupation, a fisherman on the sea of Tiberias. He and his brother Andrew were partners of John and James, the sons of Zebedee, who had hired servants; and from various indications in the sacred narrative we are led to the conclusion that their social position brought them into contact with men of education. The Apostle did not live, as a mere labouring man, in a hut by the sea-side, but first at Bethsaida, and afterwards in a house at Capernaum, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus. It is not probable that he and his brother were wholly uneducated. The statement in Acts iv. 13, that "the council perceived they (i. e. Peter and John) were unlearned and ignorant men," is not incompatible with this assumption. The translation of the passage in the A. V. is rather exaggerated, the word rendered "unlearned" being nearly equivalent to "laymen," i. e. men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis. The language of the Apostles was of course the form of Aramaic

spoken in northern Palestine, a sort of *patois*, partly Hebrew, but more nearly allied to the Syriac. It is doubtful whether our Apostle was acquainted with Greek in early life. Within a few years after his call he seems to have conversed fluently in Greek with Cornelius. The style of both of Peter's Epistles indicates a considerable knowledge of Greek—it is pure and accurate, and in grammatical structure equal to that of Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that Peter employed an interpreter in the composition of his Epistles, if not in his ordinary intercourse with foreigners. It is on the whole probable that he had some rudimentary knowledge of Greek in early life, which may have been afterwards extended when the need was felt. That he was an affectionate husband, married in early life to a wife who accompanied him in his Apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria and by other early but less trustworthy writers, inform us that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Fathers is that he was an old man at the date of his death, A.D. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at the date of his call. That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of John the Baptist (John i. 35). They were in attendance upon him when they were first called to the service of Christ. From the circumstances of that call, which are recorded with graphic minuteness by John, we learn some important facts touching their state of mind and the personal character of our Apostle. This first call led to no immediate change in Peter's external position. He and his fellow-disciples looked henceforth upon our Lord as their teacher, but were not commanded to follow him as regular disciples. They returned to Capernaum, where they pursued their usual business, waiting for a further intimation of His will. The second call is recorded by the other three Evangelists; the narrative of Luke being apparently supplementary to the brief, and, so to speak, official accounts given by Matthew and Mark. It took place on the sea of Galilee near Capernaum—where the four disciples, Peter and Andrew, James and John, were fishing. Peter and Andrew were first called. Our Lord then entered Simon Peter's boat and addressed the multitude on the shore. Immediately after that call our Lord went to the house of Peter, where He wrought the miracle of healing on Peter's wife's mother, which produced a deep impression upon the people. Some time was passed afterwards in attendance upon our Lord's public ministrations in Galilee, Decapolis, Perea, and Judaea. The special designation of Peter and his eleven fellow-disciples took place some time afterwards, when they were set apart as our Lord's immediate attendants (see Matt. x. 2-4; Mark iii. 13-19, the most detailed account—Luke vi. 13). They appear then first to have received formally the name of Apostles, and from that time Simon bore publicly, and as it would seem all but exclusively, the name Peter, which had hitherto been used rather as a characteristic appellation than

as a proper name. From this time there can be no doubt that Peter held the first place among the Apostles, to whatever cause his precedence is to be attributed. The precedence did not depend upon priority of call, or it would have devolved upon his brother Andrew, or that other disciple who first followed Jesus. It seems scarcely probable that it depended upon seniority. The special designation by Christ alone accounts in a satisfactory way for the facts, that he is named first in every list of the Apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name. *Primus inter pares* Peter held no distinct office, and certainly never claimed any powers which did not equally belong to all his fellow Apostles. This great triumph of Peter, however, brought other points of his character into strong relief. The distinction which he then received, and it may be his consciousness of ability, energy, zeal, and absolute devotion to Christ's person, seem to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him the strongest reproof ever addressed to a disciple by our Lord. It is remarkable that on other occasions when Peter signified his faith and devotion, he displayed at the time, or immediately afterwards, a more than usual deficiency in spiritual discernment and consistency. Towards the close of our Lord's ministry Peter's characteristics become especially prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples, in reference to the second advent (Matt. xxiv. 3; Mark xiii. 3, who alone mentions these names; Luke xxi. 7). At the last supper Peter seems to have been particularly earnest in the request that the traitor might be pointed out. After the supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing His disciples' feet. Then too it was that he made those repeated protestations of unalterable fidelity, so soon to be falsified by his miserable fall. On the morning of the resurrection we have proof that Peter, though humbled, was not crushed by his fall. He and John were the first to visit the sepulchre; he was the first who entered it. We are told by Luke and by Paul that Christ appeared to him first among the Apostles. It is observable, however, that on that occasion he is called by his original name, Simon, not Peter: the higher designation was not restored until he had been publicly reinstated, so to speak, by his Master. That reinstatement took place at the sea of Galilee (John xxi.), an event of the very highest import. Slower than John to recognize their Lord, Peter was the first to reach Him: he brought the net to land. The thrice repeated question of Christ referring doubtless to the three protestations and denials, was thrice met by answers full of love and faith. He then received the formal commission to feed Christ's sheep, rather as one who had forfeited his place, and could not resume it without such an authorization. Then followed the prediction of his martyrdom, in which he was to find the fulfilment of his request to be permitted to follow the Lord. With this event closes the first part of Peter's history. Henceforth, he with his colleagues were to establish and govern the Church founded by their Lord, without the support of His presence. The first part of the Acts of the

Apostles is occupied by the record of transactions, in nearly all of which Peter stands forth as the recognized leader of the Apostles; it being, however, equally clear that he neither exercises nor claims any authority apart from them, much less over them. Peter is the most prominent person in the greatest event after the resurrection, when on the day of Pentecost the Church was first invested with the plenitude of gifts and powers. The first miracle after Pentecost was wrought by him (Acts iii.). This first miracle of healing was soon followed by the first miracle of judgment. Peter was the minister in that transaction. He is not specially named in connexion with the appointment of deacons, an important step in the organization of the Church; but when the Gospel was first preached beyond the precincts of Judea, he and John were at once sent by the Apostles to confirm the converts at Samaria. Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he was confronted with Simon Magus, the first teacher of heresy. About three years later (compare Acts ix. 26, and Gal. i. 17, 18) we have two accounts of the first meeting of Peter and Paul. This interview was followed by other events marking Peter's position—a general apostolical tour of visitation to the Churches hitherto established (Acts ix. 32), in the course of which two great miracles were wrought on Aeneas and Tabitha, and in connexion with which the most signal transaction after the day of Pentecost is recorded, the baptism of Cornelius. That was the crown and consummation of Peter's ministry. The establishment of a Church in great part of Gentile origin at Antioch, and the mission of Barnabas, between whose family and Peter there were the bonds of near intimacy, set the seal upon the work thus inaugurated by Peter. This transaction was soon followed by the imprisonment of our Apostle. His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. From that time we have no continuous history of him. It is quite clear that he retained his rank as the chief Apostle, equally so, that he neither exercised nor claimed any right to control their proceedings. He left Jerusalem, but it is not said where he went. Certainly not to Rome, where there are no traces of his presence before the last years of his life; he probably remained in Judea; six years later we find him once more at Jerusalem, when the Apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. His arguments, adopted and enforced by James, decided that question at once and for ever. It is a disputed point whether the meeting between Paul and Peter, of which we have an account in the Galatians (ii. 1-10) took place at this time. The great majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probable than any other which has been suggested. The only point of real importance was certainly determined before the Apostles separated, the work of converting the Gentiles being henceforth specially entrusted to Paul and Barnabas, while the charge of preaching to the circumcision was assigned to the elder Apostles; and more particularly to Peter (Gal. ii. 7-9). This arrangement cannot, however, have been an exclusive one.

Paul always addressed himself first to the Jews in every city: Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new Apostles resided in the same city. Such at least was the case at Antioch, where Peter went soon afterwards. There the painful collision took place between the two Apostles; the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. From this time until the date of his Epistles, we have no distinct notices in Scripture of Peter's abode or work. Peter was probably employed for the most part in building up, and completing the organization of Christian communities in Palestine and the adjoining districts. There is, however, strong reason to believe that he visited Corinth at an early period. The name of Peter as founder, or joint founder, is not associated with any local Church save those of Corinth, Antioch, or Rome, by early ecclesiastical tradition. That of Alexandria may have been established by Mark after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first Epistle, appears from Origen's own words to be a mere conjecture. From that Epistle, however, it is to be inferred that towards the end of his life, Peter either visited, or resided for some time at Babylon, which at that time, and for some hundreds of years afterwards, was a chief seat of Jewish culture. More important in its bearings upon later controversies is the question of Peter's connexion with Rome. It may be considered as a settled point that he did not visit Rome before the last year of his life. The evidence for his martyrdom there is complete, while there is a total absence of any contrary statement in the writings of the early Fathers. Clement of Rome, writing before the end of the first century, speaks of it, but does not mention the place, that being of course well-known to his readers. Ignatius, in the undoubtedly genuine Epistle to the Romans (ch. iv.), speaks of Peter in terms which imply a special connexion with their Church. In the second century, Dionysius of Corinth, in the Epistle to Soter, bishop of Rome (ap. Euseb. *H. E.* ii. 25), states, as a fact universally known and accounting for the intimate relations between Corinth and Rome, that Peter and Paul both taught in Italy, and suffered martyrdom about the same time. In short, the Churches most nearly connected with Rome, and those least affected by its influence, which was as yet but inconsiderable in the East, concur in the statement that Peter was a joint founder of that Church, and suffered death in that city. The time and manner of the Apostle's martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at, or about the same time with Paul, and in the Neronian persecution. All agree that he was crucified. Origen says that at his own request he was crucified with his head downwards. Thus closes the Apostle's life. Some additional facts, not perhaps unimportant, may be accepted on early testimony. His wife accompanied him in his wanderings. She is believed to have suffered martyrdom, and to have been supported in the hour of trial by her husband's exhortation. The Apostle is said to have employed interpreters. Of far more importance is the statement that Mark wrote his gospel under the teaching of Peter, or that he embodied in that gospel the substance of our Apostle's oral instructions.

tions. The fact is doubly important in its bearings upon the Gospel, and upon the character of our Apostle. The only written documents which Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has both in early times, and in our own, been a subject of earnest controversy.

—**FIRST EPISTLE.**—The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (iii. 1); known to Polycarp and frequently alluded to in his Epistle to the Philippians; recognized by Papias (ap. Euseb. *H. E.* iii. 39); repeatedly quoted by Irenaeus, Clement of Alexandria, Tertullian, and Origen; it was accepted without hesitation by the universal Church. The internal evidence is equally strong. It was addressed to the Churches of Asia Minor, which had for the most part been founded by Paul and his companions. Supposing it to have been written at Babylon, it is a probable conjecture that Silvanus, by whom it was transmitted to those Churches, had joined Peter after a tour of visitation, either in pursuance of instructions from Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the Apostle to write the Epistle. The assumption that Silvanus was employed in the composition of the Epistle is not borne out by the expression, "by Silvanus, I have written unto you," such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus would be consulted by Peter throughout, and that they would together read the Epistles of Paul, especially those addressed to the Churches in those districts. We have thus a not unsatisfactory solution of the difficulty arising from correspondences both of style and modes of thought in the writings of two Apostles who differed so widely in gifts and acquirements. The objects of the Epistle, as deduced from its contents, coincide with these assumptions. They were:—1. To comfort and strengthen the Christians in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system which they had already received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from Paul's authority to that of the elder Apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the Epistle, and is distinctly stated, ch. v. ver. 12. The harmony of such teaching with that of Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the Apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the Epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of Peter. He dwells more frequently than Paul upon the future manifestation of Christ, upon which he bases nearly all his exhortations to patience, self-control, and the discharge of all Christian duties. The Apostle's mind is full of one thought, the realization of Messianic hopes. In this he is the true representative of Israel, moved by those feelings which

were best calculated to enable him to do his work as the Apostle of the circumcision. But while Peter thus shows himself a genuine Israelite, his teaching is directly opposed to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the Law and Gospel, and puts the superiority of the latter on its true basis, that of spiritual development. The Apostle of the circumcision says not a word in this Epistle of the perpetual obligation, the dignity or even the bearings of the Mosaic Law. He is full of the Old Testament; his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual development in the Church of Christ.

—**SECOND EPISTLE.**—The Second Epistle of Peter presents questions of far greater difficulty than the former. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and the resemblance amounting to a studied imitation, between this Epistle and that of Jude, seems scarcely reconcilable with the position of Peter. Doubts as to its genuineness were entertained by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the Canon until the year 393, at the Council of Hippo. The contents of the Epistle seem quite in accordance with its asserted origin.—We may now state briefly the answers to the objections above stated:—1. With regard to its recognition by the early Church, we observe that it was not likely to be quoted frequently; it was addressed to a portion of the Church not at that time much in intercourse with the rest of Christendom: the documents of the primitive Church are far too scanty to give weight to the argument from omission. Although it cannot be proved to have been referred to by any author earlier than Origen, yet passages from Clement of Rome, Irenaeus, Justin Martyr, Theophilus of Antioch and Irenaeus, suggest an acquaintance with this Epistle. It is also distinctly stated by Eusebius and by Photius that Clement of Alexandria wrote a commentary on all the disputed Epistles, in which this was certainly included. Didymus refers to it very frequently in his great work on the Trinity. It was certainly included in the collection of Catholic Epistles known to Eusebius and Origen. The historical evidence is certainly inconclusive, but not such as to require or to warrant the rejection of the Epistle. The silence of the Fathers is accounted for more easily than its admission into the Canon after the question as to its genuineness had been raised. 2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the Apostle employed a different person as his amanuensis. If we admit that some time intervened between the composition of the two works, that in writing the first the Apostle was aided by Silvanus, and in the second by another, perhaps by Mark, that the circumstances of the Churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of a possible decay of faculties, the differences may be regarded as insufficient to justify more than hesitation in admitting

its genuineness. The resemblance to the Epistle of Jude may be admitted without affecting our judgment unfavourably. 3. The doubts as to its genuineness appear to have originated with the critics of Alexandria, where, however, the Epistle itself was formally recognised at a very early period. The opinions of modern commentators may be summed up under three heads. Many reject the Epistle altogether as spurious. A few consider that the first and last chapters were written by Peter or under his dictation, but that the second chapter was interpolated. But a majority of names may be quoted in support of the genuineness and authenticity of this Epistle.

Some Apocryphal writings of very early date obtained currency in the Church as containing the substance of the Apostle's teaching. The Preaching or Doctrine of Peter, probably identical with a work called the Preaching of Paul, or of Paul and Peter, quoted by Lactantius, may have contained some traces of the Apostle's teaching. Another work, called the Revelation of Peter, was held in much esteem for centuries.

[**Cephas** occurs in the following passages: John i. 42; 1 Cor. i. 12; iii. 22, ix. 5, xv. 5; Gal. ii. 9, i. 18, ii. 10, 14. Cephas is the Chaldee word *Cepha*, itself a corruption of, or derivation from, the Hebrew *Ceph*, "a rock," a rare word, found only in Job xxx. 6, and Jer. iv. 29. It must have been the word actually pronounced by our Lord in Matt. xvi. 18, and on subsequent occasions when the Apostle was addressed by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians.]

Pethah'ah. 1. A priest, over the 19th course in the reign of David (1 Chr. xxiv. 16).—2. A Levite in the time of Ezra, who had married a foreign wife (Ezr. x. 23). He is probably the same who is mentioned in Neh. ix. 5.—3. The son of Meshezabeel and descendant of Zerah (Neh. xi. 24).

Pethor, a town of Mesopotamia where Balaam resided (Num. xxii. 5; Deut. xxii. 4). Its position is wholly unknown.

Peth'uel. The father of the prophet Joel (Joel i. 1).

Peulthai. Properly "Peullethai;" the eighth son of Obed-edom (1 Chr. xxvi. 5).

Pha'ath Mo'ab, 1 Esd. v. 11 = **PAIATH MOAB**.

Phacar'eth = **POCHERETH** of Zebai (1 Esd. v. 34).

Phai'sur. **PASHUR**, the priestly family (1 Esdr. ix. 22).

Phaldai'us = **PEDIAIAH** 4 (1 Esdr. ix. 44).

Phale'as = **PADON** (1 Esdr. v. 29).

Pha'lec. **PELEG** the son of Eber (Luke iii. 35).

Phal'tu. **Palu** the son of Reuben is so called in the A. V. of Gen. xlii. 9.

Phal'ti. The son of Laish of Gallim, to whom Saul gave Michal in marriage after his mad jealousy had driven David forth as an outlaw (1 Sam. xxv. 44). In 2 Sam. iii. 15 he is called **PHALTIEL**. With the exception of this brief mention of his name, and the touching little episode in 2 Sam. iii. 16, nothing more is heard of Phalti.

Phal'tiel. The same as **PHALTU** (2 Sam. iii. 15).

Phan'uel. The father of Anna, the prophetess of the tribe of Aser (Luke ii. 36).

Pharacim. The "sons of Pharacim" were among the servants of the Temple who returned with Zerobabel, according to the list in 1 Esdr. v. 31.

Pha'raoh, the common title of the native kings of Egypt in the Bible, corresponding to P-RA or PH-RA, "the Sun," of the hieroglyphics. As several kings are only mentioned by the title "Pharaoh" in the Bible, it is important to endeavour to discriminate them. We shall therefore here state what is known respecting them in order.—1. *The Pharaoh of Abraham*.—The Scripture narrative does not afford us any clear indications for the identification of the Pharaoh of Abraham. At the time at which the patriarch went into Egypt, according to Hales's as well as Ussher's chronology, it is generally held that the country, or at least Lower Egypt, was ruled by the Shepherd kings, of whom the first and most powerful line was the xvth dynasty, the undoubted territories of which would be first entered by one coming from the east. The date at which Abraham visited Egypt was about B.C. 2081, which would accord with the time of Salatis, the head of the xvth dynasty, according to our reckoning.—2. *The Pharaoh of Joseph*.—The chief points for the identification of the line to which this Pharaoh belonged, are that he was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit; that he seems to have desired to gain complete power over the Egyptians; and that he favoured strangers. These particulars certainly appear to lend support to the idea that he was an Egyptianized foreigner rather than an Egyptian. Baron Bunsen supposed that he was Sesertesen I., the head of the xliith dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from the statement of Herodotus, that Sesotris, a name reasonably traceable to Sesertesen, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamity recorded does not approach Joseph's famine in character, and the age is almost certainly too remote. If, discarding the idea that Joseph's Pharaoh was an Egyptian, we turn to the old view that he was one of the Shepherd Kings, a view almost inevitable if we infer that he ruled during the Shepherd-period, we are struck with the fitness of all the circumstances of the Biblical narrative. It is stated by Eusebius that the Pharaoh to whom Jacob came was the Shepherd Apophis. Apophis belonged to the xvth dynasty, which was certainly of Shepherds, and the most powerful foreign line, for it seems clear that there was at least one if not two more. This dynasty, according to our view of Egyptian chronology, ruled for either 284 years (Africanus), or 259 years 10 months (Josephus), from about B.C. 2080. If Hales's chronology, which we would slightly modify, be correct, the government of Joseph fell under this dynasty, commencing about B.C. 1876, which would be during the reign of the last but one or perhaps the last king of the dynasty, was possibly in the time of Apophis, who ended the line according to Africanus. It is to be remarked that this dynasty is said to have been of Phoenicians. This king appears to have reigned from Joseph's appointment (or, perhaps, somewhat earlier) until Jacob's death, a period of at least twenty-six years, from B.C. cir. 1876 to 1850, and to have been the fifth or sixth king of the xvth dynasty.—3. *The Pharaoh of the Oppression*.—The first persecutor of the Israelites may be distinguished as the Pharaoh of the Oppression, from the second, the Pharaoh of the Exodus,

especially as he commenced, and probably long carried on, the persecution. The general view is that he was an Egyptian. He has been generally supposed to have been a king of the xviii or xix dynasty: we believe that he was of a line earlier than either. The chief points in the evidence in favour of the former opinion are the name of the city Raameses, whence it has been argued that one of the oppressors was a king Raameses, and the probable change of line. The first king of this name known was head of the xix dynasty, or last king of the xviii. Manetho says the Israelites left Egypt in the reign of Menptah, who was great-grandson of the first Raameses, and son and successor of the second. The view that this Pharaoh was of the beginning or middle of the xviii dynasty seems at first sight extremely probable, especially if it be supposed that the Pharaoh of Joseph was a Shepherd king. If we assign him to the age before the xviii dynasty, which our view of Hebrew chronology would probably oblige us to do, we have still to determine whether he were a shepherd or an Egyptian. If a Shepherd, he must have been of the xv or the xvii dynasty. The reign of this king probably commenced a little before the birth of Moses, which we place B.C. 1732, and seems to have lasted upwards of forty years, perhaps much more.—4. *The Pharaoh of the Exodus*.—What is known of the Pharaoh of the Exodus is rather biographical than historical. It does not add much to our means of identifying the line of the oppressors excepting by the indications of race his character affords. His character finds its parallel among the Assyrians rather than the Egyptians. Respecting the time of this king we can only say that he was reigning for about a year or more before the Exodus, which we place B.C. 1652.—5. *Pharaoh, father-in-law of Merod*.—In the genealogies of the tribe of Judah, mention is made of the daughter of a Pharaoh, married to an Israelite; “Bithiah the daughter of Pharaoh, which Merod took” (1 Chr. iv. 18). This marriage may tend to aid us in determining the age of the sojourn in Egypt. It is perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a Shepherd king would have done so, before the oppression.—6. *Pharaoh, father-in-law of Hadad the Edomite*.—For the identification of this Pharaoh we have chronological indications, and the name of his wife Tahpenes (1 K. xi. 18-20). The history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that towards the latter part of the xix dynasty the high-priests of Amen, the god of Thebes, gained great power, and at last supplanted the Raameses family, at least in Upper Egypt. At the same time a line of Tanite kings, Manetho's xxi dynasty, seems to have ruled in Lower Egypt. It may be reasonably supposed that the Pharaoh or Pharaohs spoken of in the Bible as ruling in the time of David and Solomon were Tanites, as Tanis was nearest to the Israelite territory. According to Africanus, the list of the xxi dynasty is as follows:—Smeudes, 26 years; Psusennes, 46; Nephelcheres, 4; Amenothis, 9; Osochor, 6; Psinaches, 9; Psusennes, 14; but Eusebius gives the second king 41, and the last, 35 years, and his numbers make up the sum of 130 years, which Africanus and he agree in assigning to the dynasty. If we take the numbers of Eusebius, Osochor would probably be the Pharaoh to whom

Hadad fled, and Psusennes II. the father-in-law of Solomon; but the numbers of Africanus would substitute Psusennes I., and probably Psinaches.—7. *Pharaoh, father-in-law of Solomon*.—The mention that the queen was brought into the city of David, while Solomon's house, and the Temple, and the city-wall, were building, shows that the marriage took place not later than the eleventh year of the king, when the Temple was finished, having been commenced in the fourth year (1 K. vi. 1, 37, 38). It appears that the marriage must have taken place between about 24 and 11 years before Shishak's accession. It must be recollected that it seems certain that Solomon's father-in-law was not the Pharaoh who was reigning when Hadad left Egypt. Both Pharaohs cannot yet be identified in Manetho's list. This Pharaoh led an expedition into Palestine (1 K. ix. 16). The next kings of Egypt mentioned in the Bible are Shishak, probably Zerah, and So. The first and second of these were of the xxi dynasty, if the identification of Zerah with Userken be accepted, and the third was doubtless one of the two Shebeks of the xxv dynasty, which was of Ethiopians.—8. *Pharaoh, the opponent of Sennacherib*.—This Pharaoh (Is. xxxvi. 6) can only be the Sathos whom Herodotus mentions as the opponent of Sennacherib, and who may be reasonably supposed to be the Zet of Manetho, the last king of his xliii dynasty. Tirhakah, as an Ethiopian, whether then ruling in Egypt or not, is, like So, apparently not called Pharaoh.—9. *Pharaoh Necho*.—The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh Necho, who is also called Necho simply. His name is written Necho and Nechoh, and in hieroglyphics NEKU. This king was of the Saïte xxvii dynasty, of which Manetho makes him either the fifth ruler (Africanus) or the sixth (Eusebius). Herodotus calls him Nekôs, and assigns to him a reign of sixteen years, which is confirmed by the monuments. He seems to have been an enterprising king, as he is related to have attempted to complete the canal connecting the Red Sea with the Nile, and to have sent an expedition of Phœnicians to circumnavigate Africa, which was successfully accomplished. At the commencement of his reign (B.C. 610) he made war against the king of Assyria, and, being encountered on his way by Josiah, defeated and slew the king of Judah at Megiddo (2 K. xxiii. 29, 30; 2 Chr. xxxv. 20-24). Necho seems to have soon returned to Egypt: perhaps he was on his way thither when he deposed Jehoahaz. The army was probably posted at Carchemish, and was there defeated by Nebuchadnezzar in the fourth year of Necho (B.C. 607), that king not being, as it seems, then at its head (Jer. xli. 1, 2, 6, 10). This battle led to the loss of all the Asiatic dominions of Egypt (2 K. xxiv. 7).—10. *Pharaoh Hophra*.—The next king of Egypt mentioned in the Bible is Pharaoh Hophra, the second successor of Necho, from whom he was separated by the six years' reign of Psammetichus II. The name Hophra is in hieroglyphics WAH-(P)RA-HAT, and the last syllable is equally omitted by Herodotus, who writes Apries, and by Manetho, who writes Uaphris. He came to the throne about B.C. 589, and ruled nineteen years. Herodotus makes him son of Psammetichus II., whom he calls Psammis, and great-grandson of Psammetichus I. In the Bible it is related that Zedekiah, the last king of Judah, was aided by a Pharaoh against Nebuchadnezzar, in fulfillment of a treaty, and this

an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, B.C. 590, and was captured in his eleventh year, B.C. 588. It was evidently continuously invested for a length of time before it was taken, so that it is most probable that Pharaoh's expedition took place during 590 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but it must be remembered that the siege may be supposed to have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and also that Hophra may have come to the throne as early as B.C. 590. The Egyptian army returned without effecting its purpose (Jer. xxvii. 5-8; Ez. xvii. 11-18; comp. 2 K. xxv. 1-4). No subsequent Pharaoh is mentioned in Scripture, but there are predictions doubtless referring to the misfortunes of later princes until the second Persian conquest, when the prophecy "there shall be no more a prince of the land of Egypt" (Ex. xxx. 13) was fulfilled.

Pharaoh's Daughter; Pharaoh, the Daughter of. Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.—1. The preserver of Moses, daughter of the Pharaoh who first oppressed the Israelites (Ex. ii. 5-10). She appears from her conduct towards Moses to have been heiress to the throne. Artapanus, or Artabanus, a historian of uncertain date, calls this princess Merrihis, and her father, the oppressor, Palmanothos, and relates that she was married to Chenephres, who ruled in the country about Memphis. The tradition is apparently of little value.—2. Bithiah, wife of Mered an Israelite, daughter of a Pharaoh of an uncertain age, probably of about the time of the Exodus (1 Chr. iv. 18).—3. A wife of Solomon, most probably daughter of a king of the xixth dynasty (1 K. iii. 1, vii. 8, ix. 24). [See PHARAOH, 7].

Pharaoh, the Wife of. The wife of one Pharaoh, the king who received Hadad the Edomite, is mentioned in Scripture. She is called "queen," and her name, Tahpenes, is given. Her husband was most probably of the xixth dynasty. [TAHPENES; PHARAOH, 6.]

Pharatho'ni, properly PHARATHON. One of the cities of Judaea fortified by Bacchides during his contests with Jonathan Maccabaeus (1 Macc. ix. 50). It doubtless represents an ancient Pirathon, though hardly that of the Judges.

Pha'res, PHAREZ or PEREZ, the son of Judah (Matt. i. 3; Luke iii. 33).

Pha'res. 1. (PEREZ, 1 Chr. xvii. 3; PHARES, Matt. i. 3; Luke iii. 33; 1 Esd. v. 5), twin son, with Zarah, or Zerach, of Judah and Tamar his daughter-in-law. The circumstances of his birth are detailed in Gen. xxxviii. Pharez seems to have kept the right of primogeniture over his brother, as, in the genealogical lists, his name comes first. The house also which he founded was far more numerous and illustrious than that of the Zarahites. Its remarkable fertility is alluded to in Ruth iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah." Of Pharez's personal history or character nothing is known. After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son, and moreover, from two of his sons sprang two new chief houses, those of the Hezronites and Hamulites. From Hezron's second son Ram, or Aram, sprang David and the kings of Judah, and eventually Jesus

Christ. In the reign of David the house of Pharez seems to have been eminently distinguished. A considerable number of his mighty men seem, from their patronymic or gentile names, to have been of the same house; and the royal house itself was the head of the family.—2. = PAROSH (1 Esdr. viii. 36; comp. Ezr. viii. 3).

Phar'ira = PERIDA or PERUDA (1 Esdr. v. 33).

Pharisees, a religious party or school amongst the Jews at the time of Christ, so called from *Perishin*, the Aramaic form of the Hebrew word *Perishim*, "separated." The name does not occur either in the Old Testament or in the Apocrypha; but it is usually considered that the Pharisees were essentially the same with the Assideans mentioned in the 1st Book of Maccabees ii. 42, vii. 13-17, and in the 2nd Book xiv. 6.—**Authorities.**—The sources of information respecting the Pharisees are mainly threefold. 1st. The writings of Josephus, who was himself a Pharisee (*Vit.* 2), and who in each of his great works professes to give a direct account of their opinions (*B. J.* ii. 8, §2-14; *Ant.* xviii. 1, §2, and compare xvii. 10, §5-6, xvii. 2, §4, xviii. 16, §2, and *Vit.* 38). The value of Josephus's accounts would be much greater, if he had not accommodated them, more or less, to Greek ideas. 2ndly. The New Testament, including St. Paul's Epistles, in addition to the Gospels and Acts of the Apostles. 3rdly. The first portion of the Talmud called the Mishna, or "second law." This is by far the most important source of information respecting the Pharisees; and it may safely be asserted that it is nearly impossible to have adequate conceptions respecting them, without consulting that work. It is a digest of the Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the 2nd century. He succeeded his father Simon as patriarch of Tiberias, and held that office at least thirty years. The precise date of his death is disputed; some placing it in a year somewhat antecedent to 194, A.D., while others place it as late as 220 A.D., when he would have been about 81 years old. There is no reasonable doubt, that although it may include a few passages of a later date, the Mishna was composed, as a whole, in the 2nd century, and represents the traditions which were current amongst the Pharisees at the time of Christ. Referring to the Mishna for details, it is proposed in this article to give a general view of the peculiarities of the Pharisees; afterwards to notice their opinions on a future life and on free-will; and finally, to make some remarks on the proselytizing spirit attributed to them at the time of Christ.—I. The fundamental principle of the Pharisees common to them with all orthodox modern Jews is, that by the side of the written law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and to explain the written law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth. The classical passage in the Mishna on this subject is the following:—"Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue" (*Pirke Abbot*, i.),

It is not to be supposed that all the traditions which bound the Pharisees were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written law to support them, and in addition to interpretations received from Moses, which were either implied in the written law or to be elicited from it by reasoning, there were three other classes of traditions. 1st. Opinions on disputed points, which were the result of a majority of votes. 2dly. Decrees made by prophets and wise men in different ages. These carried prohibitions farther than the written law or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution. 3dly. Legal decisions of proper ecclesiastical authorities on disputed questions. Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would have a tendency to quench the fervour and the freshness of a spiritual religion. They varied in character, and instances may be given of three different classes:—1st, of those which, admitting certain principles, were points reasonable to define; 2dly, of points defined which were superfluously particularised; and 3dly, of points defined where the discussion of them at all was superstitious and puerile. In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the Pharisees formed a kind of society. A member was called a *châbêr*, and those among the middle and lower classes who were not members were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, that he would remain true to the laws of the association. Perhaps some of the most characteristic laws of the Pharisees related to what was clean (*tâhôr*) and unclean (*tâmê*). Whether their origin was symbolical, sanitary, religious, fanciful, or conventional, it was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisaical regulations concerning what was clean and what was unclean; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Levitical law, every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. xix. 20). On principles precisely similar to those of the Levitical laws (Lev. xx. 25, xxii. 4-7), it was possible to incur these awful religious penalties either by *eating* or by *touching* what was unclean in the Pharisaical sense. In reference to *eating*, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called *Cholîn*, which is specially devoted to the slaughtering of fowls and cattle for domestic use. One point in its very first section is by itself vitally distinctive. This point is, "that *any thing* slaughtered by a heathen should be deemed unfit to be

COM. D. B.

eaten, like the carcass of an animal that had died of itself, and like such carcass should pollute the person who carried it." In reference likewise to *touching* what is unclean, the Mishna abounds with prohibitions and distinctions no less minute. It is proper to add that it would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceding the Reformation. Josephus compared the Pharisees to the sect of the Stoics. He says that they lived frugally, in no respect giving in to luxury, but that they followed the leadership of reason in what it had selected and transmitted as a good (*Ant.* xviii. 1, § 3). Although there would be hypocrites among them, it would be unreasonable to charge all the Pharisees as a body with hypocrisy, in the sense wherein we at the present day use the word. They must be regarded as having been some of the most intense formalists whom the world has ever seen. It was alleged against them, on the highest spiritual authority, that they "made the word of God of none effect by their traditions." This would be true in the largest sense, from the purest form of religion in the Old Testament being almost incompatible with such endless forms (*Mic.* vi. 8); but it was true in another sense, from some of the traditions being decidedly at variance with genuine religion. An analogy has been pointed out by Geiger between the Pharisees and our own Puritans; and in some points there are undoubted features of similarity, beginning even with their names. Both were innovators, both of them had republican tendencies, and even in their zeal for religious education there was some resemblance. But here comparison ceases. In the most essential points of religion they were not only not alike, but they were directly antagonistic. — II. In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers, that whatever interpretation his ambiguous language might possibly admit, he obviously would have produced the impression on Greeks that the Pharisees believed in the transmigration of souls. Thus his statement respecting them is, "They say that every soul is imperishable, but that the soul of good men only passes over (or transmigrates) into another body, while the soul of bad men is chastised by eternal punishment" (*B. J.* ii. 8, § 14). And there are two passages in the Gospels which might countenance this idea: one in Matt. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different colour is given to Herod's thoughts in the corresponding passage, Luke ix. 7-9); and another in John ix. 2, where the question is put to Jesus whether the blind man himself had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early Christians. This is most in accordance with St. Paul's statement to the chief priests and council (*Acts* xxiii. 6); and it is likewise almost implied in Christ's teaching, which does not insist on the doctrine of a future life as anything new (*Matt.* xxii. 30; *Mark* xii. 25; *Luke* xx. 34-36). On this head the Mishna is an illustration of the ideas in the Gospels, as distinguished from any mere transmigration of souls; and the peculiar

phrase, "the world to come," frequently occurs in it.—III. In reference to the opinions of the Pharisees concerning the freedom of the will, a difficulty arises from the very prominent position which they occupy in the accounts of Josephus, whereas nothing vitally essential to the peculiar doctrines of the Pharisees, seems to depend on those opinions, and some of his expressions are Greek, rather than Hebrew. "There were three sects of the Jews," he says, "which had different conceptions respecting human affairs, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things, and not all things, are the work of fate; but that some things are in our own power to be and not to be. But the Essenes declare that Fate rules all things, and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away Fate, holding that it is a thing of nought, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderateness" (comp. xviii. 1, § 3, and *D. J.* ii. 8, § 14). In reference to this point, the opinion of Graetz (*Geschichte der Juden*, iii. 509) seems not improbable, that the real difference between the Pharisees and Sadducees was at first practical and political. [SADDUCEES.]—IV. In reference to the spirit of proselytism among the Pharisees, there is indisputable authority for the statement that it prevailed to a very great extent at the time of Christ (*Matt.* xxiii. 15); and attention is now called to it on account of its probable importance in having paved the way for the early diffusion of Christianity. Jews at the time of Christ had become scattered over the fairest portions of the civilized world. On the day of Pentecost, Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an Oriental hyperbole (comp. *John* xxi. 25), there must have been some foundation for it in fact. Now it is not unlikely, though it cannot be proved from Josephus (*Ant.* xx. 2, § 3), that missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees. But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting new views to a congregation (*Acts* xvii. 2; *Luke* iv. 16). Under such auspices the proselytizing spirit of the Pharisees inevitably stimulated a thirst for inquiry, and accustomed the Jews to theological controversies. Thus there existed precedents and favouring circumstances for efforts to make proselytes, when the greatest of all missionaries, a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, confronted the elaborate ritual-system of the written and oral law by a pure spiritual religion: and thus obtained the co-operation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavouring to unite all mankind by the brotherhood of a common Christianity.

Phar'osh. Elsewhere PAROSH (*Ezr.* viii. 3).

Phar'par. The second of the "two rivers of Damascus"—Abana and Pharpar—alluded to by Naaman (2 *K.* v. 12). The two principal streams in the district of Damascus are the *Barada* and the

Awaj:—in fact, there are no others worthy of the name of "river." There are good grounds for identifying the *Barada* with the Abana, and there seems therefore to be no alternative but to consider the *Awaj* as being the Pharpar. It takes its rise on the S.E. slopes of Hermon, some 5 or 6 miles from *Beit Jenn*, close to a village called *Arny*, the name of which it bears during the first part of its course. It then runs S.E. by *Kefr Hawwar* and *Sasa*, but soon recovering itself by a turn northwards, ultimately ends in the *Bahret Hijneh*, the most southerly of the three lakes or swamps of Damascus, nearly due east of, and about 40 miles from, the point at which it started.

Phar'sites, the. The descendants of Pharez, the son of Judah (*Num.* xxvi. 20).

Phase'ah. PASEAH 2 (*Neh.* vii. 51).

Phase'lis. A town on the coast of Asia Minor, on the confines of Lycia and Pamphylia, and consequently ascribed by the ancient writers sometimes to one and sometimes to the other. Its commerce was considerable in the sixth century B.C., for in the reign of Amasis it was one of a number of Greek towns which carried on trade somewhat in the manner of the Hanseatic confederacy in the middle ages. In later times Phaselis was distinguished as a resort of the Pamphylian and Cilician pirates. Phaselis itself stood on a rock of 50 or 100 feet elevation above the sea, and was joined to the main by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the eastern side of this were a closed port and a roadstead, and on the western a larger artificial harbour, formed by a mole run out into the sea. The remains of this may still be traced to a considerable extent below the surface of the water. For a time the Phaselites confined their relations with the Pamphylians to the purposes just mentioned; but they subsequently joined the piratical league, and suffered in consequence the loss of their independence and their town lands in the war which was waged by the Roman consul Publius Servilius Isauricus in the years 77-75 B.C. It is in the interval between the growth of the Cilician piracy and the Servilian expedition that the incidents related in the First Book of Maccabees occurred (1 *Macc.* xv. 23).

Phas'iron, the name of the head of an Arab tribe, "the children of Phasiron" (1 *Macc.* ix. 66), defeated by Jonathan.

Phas'saron. PASHUR (1 *Esd.* v. 25).

Ph'e'be. [PHOEBE.]

Pheni'ce. I. See PHOENICE, PHOENICIA. II. (*Acts* xxvii. 12), more properly PHOENIX. Phenice in *Acts* xxvii. 12 is the name of a haven in Crete on the south coast, and the name was doubtless derived from the Greek word for the palm-tree, which Theophrastus says was indigenous in the island. Both Ptolemy and Strabo mention a town Phoenix; while Ptolemy alone mentions a haven, of a similar name. Mr James Smith places Phenice at the modern *Lutro*. **Pher'esites,** 1 *Esd.* viii. 69; = PERIZZITES; comp. *Ezr.* ix. 1.

Ph'er'ezite, Ph'er'esites (*Jud.* v. 16; 2 *Esd.* i. 21), Peizzites, Perizzites.

Ph'i'chol, chief captain of the army of Abimelech, king of the Philistines of Gerar in the days of both Abraham (*Gen.* xxi. 22, 32) and Isaac (*xvii.* 26) Josephus mentions him on the second occasion only. On the other hand the LXX. introduce Ahuzzatz Abimelech's other companion, on the first also.

Ph'iladelp'ha. A town on the confines of Lydia

and Phrygia Catacecaumene, built by Attalus II., king of Pergamus. It was situated on the lower slopes of Tmolus, on the southern side of the valley of the *Ain-é-ghül Sou*, a river which is probably the Cogamus of antiquity, and falls into the *Wadis-ichas* (the Hermus) in the neighbourhood of *Sart-Kalesi* (Sardis), about 25 miles to the west of the site of Philadelphia. This latter is still represented by a town called *Allah-shehr* (city of God). Its elevation is 952 feet above the sea. The region around is highly volcanic, and geologically speaking belongs to the district of Phrygia Catacecaumene, on the western edge of which it lies. The original population of Philadelphia seems to have been Macedonian, and the national character to have been retained even in the time of Pliny. There was, however, as appears from Rev. iii. 9, a synagogue of Hellenizing Jews there, as well as a Christian Church. The locality continued to be subject to constant earthquakes, which in the time of Strabo rendered even the town-walls of Philadelphia unsafe. The expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (Rev. iii. 8).

Philarches. This word occurs as a proper name in A. V. in 2 Macc. viii. 32, where it is really the name of an office, "the commander of the cavalry."

Philemon, the name of the Christian to whom Paul addressed his Epistle in behalf of Onesimus. He was a native probably of Colossae, or at all events lived in that city when the Apostle wrote to him; first, because Onesimus was a Colossian (Col. iv. 9); and secondly, because Archippus was a Colossian (Col. iv. 17), whom Paul associates with Philemon at the beginning of his letter (Philem. 1, 2). It is related that Philemon became bishop of Colossae, and died as a martyr under Nero. It is evident from the letter to him that Philemon was a man of property and influence, since he is represented as the head of a numerous household, and as exercising an expensive liberality towards his friends and the poor in general. He was indebted to the Apostle Paul as the medium of his personal participation in the Gospel. It is not certain under what circumstances they became known to each other. It is evident that on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the epistle to him, is one of the noblest which the sacred record makes known to us.

Philemon, the Epistle of Paul to, is one of the letters (the others are Ephesians, Colossians, Philippians) which the Apostle wrote during his first captivity at Rome. The time when Paul wrote may be fixed with much precision. The Apostle at the close of the letter expresses a hope of his speedy liberation. Presuming, therefore, that he had good reasons for such an expectation, and that he was not disappointed in the result, we may conclude that this letter was written by him about the year A.D. 63, or early in A.D. 64. Nothing is wanting to confirm the genuineness of the epistle. The external testimony is unimpeachable. The Canon of Muratori enumerates this as one of Paul's epistles. Tertullian mentions it, and says that Marcion admitted it into his collection. Origen and Eusebius include it among the universally acknowledged writings of the early Christian times. Nor does the epistle itself offer anything to conflict with this decision. Baur would divest it of its historical character, and make it the personified illustration from some

later writer, of the idea that Christianity unites and equalises in a higher sense those whom outward circumstances have separated. He does not impugn the external evidence. But, not to leave his theory wholly unsupported, he suggests some linguistic objections to Paul's authorship of the letter, which must be pronounced unfounded and frivolous. Our knowledge respecting the occasion and object of the letter we must derive from declarations or inferences furnished by the letter itself. Paul, so intimately connected with the master and the servant, was anxious naturally to effect a reconciliation between them. Paul used his influence with Onesimus (in ver. 12) to induce him to return to Colossae, and place himself again at the disposal of his master. On his departure, Paul put into his hand this letter as evidence that Onesimus was a true and approved disciple of Christ, and entitled as such to be received not as a servant, but above a servant, as a brother in the faith, as the representative and equal in that respect of the Apostle himself, and worthy of the same consideration and love. He intercedes for him as his own child, promises reparation if he had done any wrong, demands for him not only a remission of all penalties, but the reception of sympathy, affection, Christian brotherhood. Such was the purpose and such the argument of the Epistle. The result of the appeal cannot be doubted. It may be assumed from the character of Philemon that the Apostle's intercession for Onesimus was not unavailing. Surely no fitting response to his pleadings for Onesimus could involve less than a cessation of everything oppressive and harsh in his civil condition, as far as it depended on Philemon to mitigate or neutralise the evils of a legalised system of bondage, as well as a cessation of everything which violated his rights as a Christian. How much further than this an impartial explanation of the epistle obliges us or authorises us to go, has not yet been settled by any very general consent of interpreters. The Epistle to Philemon has one peculiar feature—its *aesthetical character* it may be termed—which distinguishes it from all the other epistles. The writer had peculiar difficulties to overcome; but Paul, it is confessed, has shown a degree of self-denial and a tact in dealing with them, which in being equal to the occasion could hardly be greater.

Philetus was possibly a disciple of Hymenaeus, with whom he is associated in 2 Tim. ii. 17, and who is named without him in an earlier Epistle (1 Tim. i. 20). Waterland condenses in a few lines the substance of many dissertations which have been written concerning their opinions, and the sentence which was inflicted upon at least one of them. "They appear to have been persons who believed the Scriptures of the O. T., but misinterpreted them, allegorising away the doctrine of the Resurrection, and resolving it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the Apostolical age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered." The names of Philetus and Hymenaeus occur separately among those of Caesar's household whose relics have been found in the Colubaria at Rome.

Philip. 1. The father of Alexander the Great (1 Macc. i. 1; vi. 2), king of Macedonia, B.C. 359-336.—2. A Phrygian, left by Antiochus Epiph., as governor at Jerusalem (c. B.C. 170), where he

behaved with great cruelty (2 Macc. v. 22, vi. 11, viii. 8). He is commonly identified with—3. The foster-brother (2 Macc. ix. 29) of Antiochus Epiph., whom the king upon his death-bed appointed regent of Syria and guardian of his son Antiochus V., to the exclusion of Lysias (B.C. 164, 1 Macc. vi. 14, 15, 55).—4. Philip V., king of Macedonia, B.C. 220-179. His wide and successful endeavours to strengthen and enlarge the Macedonian dominion brought him into conflict with the Romans, when they were engaged in the critical war with Carthage. In 1 Macc. viii. 5, the defeat of Philip at Cynosephalæ (B.C. 197) is coupled with that of Perseus as one of the noblest triumphs of the Romans.

Philip the Apostle. The Gospels contain comparatively scanty notices of this disciple. He is mentioned as being of Bethsaida, the city of Andrew and Peter (John i. 44), and apparently was among the Galilean peasants of that district who flocked to hear the preaching of the Baptist. The manner in which St. John speaks of him, the repetition by him of the selfsame words with which Andrew had brought to Peter the good news that the Christ had at last appeared, all indicate a previous friendship with the sons of Jona and of Zebedee, and a consequent participation in their Messianic hopes. The close union of the two in John vi. and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus *found* him (John i. 43) implies a previous seeking. To him first in the whole circle of the disciples were spoken the words so full of meaning, "Follow me" (Ibid.). As soon as he has learnt to know his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to Nathanael, probably on his arrival in Cana (comp. John xxi. 2), as though they had not seldom communed together, of the intimations of a better time, of a divine kingdom, which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed in whom there was no guile." In the lists of the twelve Apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Matt. x. 3; Mark iii. 18; Luke vi. 14); and the facts recorded by St. John give the reason of this priority. Philip apparently was among the first company of disciples who were with the Lord at the commencement of His ministry, at the marriage of Cana, on His first appearance as a prophet in Jerusalem (John ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Matt. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John, with his characteristic fulness of personal reminiscences, records a few significant utterances (John vi. 5-9, xii. 20-22, xiv. 8). No other fact connected with the name of Philip is recorded in the Gospels. The close relation in which we have seen him standing to the sons of Zebedee and Nathanael might lead us to think of him as one of the two unnamed disciples in the list of fishermen on the Sea of Tiberias who meet us in John xxi. He is among the company of disciples at Jerusalem after the Ascension (Acts i. 13), and on the day of

Pentecost. After this all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctioned the marriage of his daughters instead of binding them to vows of chastity, and is included in the list of those who had borne witness of Christ in their lives, but had not died what was commonly looked on as a martyr's death. Polycrates, bishop of Ephesus, speaks of him as having fallen asleep in the Phrygian Hierapolis, as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration, who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the Apostle and the Evangelist. The apocryphal 'Acta Philippi' are utterly wild and fantastic.

Philip the Evangelist. The first mention of this name occurs in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion of partiality. Whether the office to which he was thus appointed gave him the position and the title of a Deacon of the Church, or was special and extraordinary in its character, must remain uncertain. The after-history of Philip warrants the belief, in any case, that his office was not simply that of the later Diaconate. It is no great presumption to think of him as contributing hardly less than Stephen to the great increase of disciples which followed on this fresh organisation, as sharing in that wider, more expansive teaching which shows itself for the first time in the oration of the proto-martyr, and in which he was the forerunner of St. Paul. The persecution of which Saul was the leader must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. It is noticeable that the city of Samaria is the first scene of his activity (Acts viii.). He is the precursor of St. Paul in his work, as Stephen had been in his teaching. It falls to his lot, rather than to that of an Apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. The scene which brings Philip and Simon the Sorcerer into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresiarch than to that of the Evangelist. This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to Gaza on the way to Egypt. A chait passes by in which there is a man of another race, whose complexion or whose dress showed him to be a native of Ethiopia. The history that follows is interesting as one of the few records in the N. T. of the process of individual conversion, and one which we may believe St. Luke obtained, during his residence at Caesarea, from the Evangelist himself. A brief sentence tells us that Philip continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coastline, came to Caesarea. Here for a long period, not less than eighteen or nineteen years, we lose sight of him. The last glimpse of him in the N. T. is in the account of St. Paul's journey to Jerusalem. It is to his house, as to one well known to

them, that St. Paul and his companions turn for shelter. He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (Acts xxi. 8, 9). He is visited by the prophets and elders of Jerusalem. One tradition places the scene of his death at Hierapolis in Phrygia. According to another, he died Bishop of Tralles. The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome.

Philip Herod I., II. [HEROD.]

Philippi. A city of Macedonia, about nine miles from the sea, to the N.W. of the island of Thasos, which is twelve miles distant from its port Neapolis, the modern *Kavalla*. It is situated in a plain between the ranges of Pangæus and Haemus. St. Paul, when, on his first visit to Macedonia in company with Silas, he embarked at Troas, made a straight run to Samothrace, and from thence to Neapolis, which he reached on the second day (Acts xvi. 11). This was built on a rocky promontory, on the western side of which is a roadstead, furnishing a safe refuge from the Etesian winds. The town is cut off from the interior by a steep line of hills, anciently called Symbolum, connected towards the N.E. with the western extremity of Haemus, and towards the S.W., less continuously, with the eastern extremity of Pangæus. A steep track, following the course of an ancient paved road, leads over Symbolum to Philippi; the solitary pass being about 1600 feet above the sea-level. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient city, and in the immediate neighbourhood of the one first reached is the modern Turkish village *Bereketli*. This is the nearest village to the ancient ruins, which are not at the present time inhabited at all. The Philippi which St. Paul visited was a Roman colony founded by Augustus, and the remains which strew the ground are no doubt derived from that city. The establishment of Philip of Macedonia was probably not exactly on the same site. Philip, when he acquired possession of the site, found there a town named *Datus* or *Datum*, which was in all probability in its origin a factory of the Phœnicians, who were the first that worked the gold-mines in the mountains here, as in the neighbouring Thasos. The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility. The position too was on the main road from Rome to Asia, the Via Egnatia, which from Thessalonica to Constantinople followed the same course as the existing post-road. The ruins of Philippi are very extensive, but present no striking feature except two gateways, which are considered to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium—for it does not clearly appear which—are also visible in the direction of the hills on the N.E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found.

Philippians, Epistle to the. 1. The canonical authority, Pauline authorship and integrity of this Epistle were unanimously acknowledged up to the end of the 18th century. Marcion (A.D. 140) in the earliest known Canon held common ground with the Church touching the authority of this Epistle: it appears in the Muratorian Fragment; among the

"acknowledged" books in Eusebius; in the lists of the Council of Laodicea, A.D. 365, and the Synod of Hippo, 393; and in all subsequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippian Christians who had contributed to the collections for St. Paul's support at Rome, who had been eye and ear-witnesses of the return of Epaphroditus and the first reading of St. Paul's Epistle, may have been still alive at Philippi when Polycarp wrote (A.D. 107) his letter to them, in which (ch. 2, 3) he refers to St. Paul's Epistle as a well-known distinction belonging to the Philippian Church. It is quoted as St. Paul's by Irenæus, Clement of Alexandria, and Tertullian. A quotation from it (Phil. ii. 6) is found in the Epistle of the Churches of Lyons and Vienne, A.D. 177. The testimonies of later writers are innumerable. But F. C. Baur, followed by Schwegler, has argued from the phraseology of the Epistle and other internal marks, that it is the work not of St. Paul, but of some Gnostic forger in the 2nd century. 2. *Where written.*—The constant tradition that this Epistle was written at Rome by St. Paul in his captivity, was impugned first by Oeder (1731), who, disregarding the fact that the Apostle was in prison (i. 7, 13, 14) when he wrote, imagined that he was at Corinth; and then by Paulus (1799), Schulz (1829), Böttger (1837) and Rilliet (1841), in whose opinion the Epistle was written during the Apostle's confinement at Caesarea (Acts xxiv. 23); but the references to the "palace" (praetorium, i. 13), and to "Caesar's household," iv. 22, seem to point to Rome rather than to Caesarea. 3. *When written.*—Assuming then that the Epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it may be shown from a single fact that it could not have been written long before the end of the two years. The distress of the Philippians on account of Epaphroditus' sickness was known at Rome when the Epistle was written; St. Luke was absent from Rome; and lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In A.D. 62 the infamous Tigellinus succeeded Burrus the upright Praetorian prefect in the charge of St. Paul's person; and the marriage of Poppæa brought his imperial judge under an influence which, if exerted, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 63, we may date the Epistle to the Philippians early in that year. 4. *The writer's acquaintance with the Philippians.*—St. Paul's connexion with Philippi was of a peculiar character, which gave rise to the writing of this Epistle. St. Paul entered its walls, A.D. 52 (Acts xvi. 12), accompanied by Silas, who had been with him since he started from Antioch, and by Timothy and Luke, whom he had afterwards attached to himself; the former at Derbe, the latter quite recently at Troas. There, at a greater distance from Jerusalem than any Apostle had yet penetrated, the long-restrained energy of St. Paul was again employed in laying the foundation of a Christian Church. Philippi was endeared to St. Paul, not only by the hospitality of Lydia, the deep sympathy of the converts, and the remarkable miracle which set a seal on his preaching, but also by the successful exercise of his missionary activity after a long suspense, and by the happy consequences of

his undaunted endurance of ignominies, which remained in his memory (Phil. i. 30) after the long interval of eleven years. Leaving Timothy and Luke to watch over the infant Church, Paul and Silas went to Thessalonica (1st Thess. ii. 2), whither they were followed by the alms of the Philippians (Phil. iv. 16), and thence southwards. The next six years of his life are a blank in our records. At the end of that period he is found again (Acts xx. 6) at Philippi.—After the lapse of five years, spent chiefly at Corinth and Ephesus, St. Paul, escaping from the incensed worshippers of the Ephesian Diana, passed through Macedonia, A.D. 57, on his way to Greece, accompanied by the Ephesians Ty-chicus and Trophimus, and probably visited Philippi for the second time, and was there joined by Timothy. He wrote at Philippi his second Epistle to the Corinthians. On returning from Greece (Acts xx. 4), he again found a refuge among his faithful Philippians, where he spent some days at Easter, A.D. 58, with St. Luke, who accompanied him when he sailed from Neapolis. Once more, in his Roman captivity (A.D. 62) their care of him revived again. They sent Epaphroditus, bearing their alms for the Apostle's support, and ready also to tender his personal service (Phil. ii. 25). 5. *Scope and contents of the Epistle.*—St. Paul's aim in writing is plainly this: while acknowledging the alms of the Philippians and the personal services of their messenger, to give them some information respecting his own condition, and some advice respecting theirs. After the inscription (i. 1-2) in which Timothy as the second father of the Church is joined with Paul, he sets forth his own condition (i. 3-26), his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27-ii. 18) he exhorts them to those particular virtues which he would rejoice to see them practising at the present time. He hopes soon to hear a good report of them (ii. 19-30), either by sending Timothy, or by going himself to them, as he now sends Epaphroditus whose diligent service is highly commended. Reverting (iii. 1-21) to the tone of joy which runs through the preceding descriptions and exhortations—as in i. 4, 18, 25, ii. 2, 16, 17, 18, 28—he bids them take heed that their joy be *in the Lord*, and warns them, as he had often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was towards a vain confidence in mere earthly things; in contrast to this, he exhorts them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the Resurrection-day constantly before their minds. Again (iv. 1-9), adverting to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must approve itself to the moral sense of all men. Lastly (iv. 10-23), he thanks them for the contribution sent by Epaphroditus for his support, and concludes with salutations and a benediction. 6. *Effect of the Epistle.*—We have no account of the reception of this Epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and with Lydia and Parmenas was martyred in their city, nothing is recorded of them for the next forty-four years. Now, though we cannot trace the im-

mediate effect of St. Paul's Epistle on the Philippians, yet no one can doubt that it contributed to form the character of their Church, as it was in the time of Polycarp. It is evident from Polycarp's Epistle that the Church, by the grace of God and the guidance of the Apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching (Polyc. i., iii., ix., xi.). 7. *The Church at Rome.*—The state of the Church at Rome should be considered before entering on the study of the Epistle to the Philippians. Something is to be learned of its condition about A.D. 58 from the Epistle to the Romans, about A.D. 61 from Acts xviii. St. Paul's presence in Rome, the freedom of speech allowed to him, and the personal freedom of his fellow-labourers were the means of infusing fresh missionary activity into the Church (Phil. i. 12-14). It was in the work of Christ that Epaphroditus was worn out (ii. 30). 8. *Characteristic features of the Epistle.*—Strangely full of joy and thanksgiving amidst adversity, like the Apostle's midnight hymn from the depth of his Philippian dungeon, this Epistle went forth from his prison at Rome. In most other epistles he writes with a sustained effort to instruct, or with sorrow, or with indignation; he is striving to supply imperfect, or to correct erroneous teaching, to put down scandalous impurity, or to heal schism in the Church which he addresses. But in this Epistle, though he knew the Philippians intimately, and was not blind to the faults and tendencies to fault of some of them, yet he mentions no evil so characteristic of the whole Church as to call for general censure on his part, or amendment on theirs. Of all his Epistles to Churches, none has so little of an official character as this. The Epistle to the Philippians is found in all the principal uncial manuscripts, viz. in A, B, C, D, E, F, G, J, K. In C, however, the verses preceding i. 22, and those following iii. 5, are wanting.

Philistia (Heb. *Poleseth*). The word thus translated (in Ps. lx. 8, lxxvii. 4, cviii. 9) is in the original identical with that elsewhere rendered PALESTINE.

Philistines. The origin of the Philistines is nowhere expressly stated in the Bible; but as the prophets describe them as "the Philistines from Caphtor" (Am. ix. 7), and "the remnant of the maritime district of Caphtor" (Jer. xlvii. 4), it is *prima facie* probable that they were the "Caphtorims which came out of Caphtor" who expelled the Avim from their territory and occupied it in their place (Deut. ii. 23), and that these again were the Caphtorim mentioned in the Mosaic genealogical table among the descendants of Mizraim (Gen. x. 14). But in establishing this conclusion certain difficulties present themselves: in the first place, it is observable that in Gen. x. 14 the Philistines are connected with the Casluhim rather than the Caphtorim. The clause seems to have an appropriate meaning in its present position: it looks like an interpolation into the original document with the view of explaining when and where the name Philistine was first applied to the people whose proper appellation was Caphtorim. But a second and more serious difficulty arises out of the language of the Philistines; for while the Caphtorim were Hamitic, the Philistine language is held to have been Semitic. The difficulty arising out of the question of lan-

guage may be met by assuming either that the Caphtorim adopted the language of the conquered Avim, or that they diverged from the Hamitic stock at a period when the distinctive features of Hamitism and Shemitism were yet in embryo. A third objection to their Egyptian origin is raised from the application of the term "uncircumcised" to them (1 Sam. xvii. 26; 2 Sam. i. 20), whereas the Egyptians were circumcised (Herod. ii. 36). But this objection is answered by Jer. ix. 25, 26, where the same term is in some sense applied to the Egyptians, however it may be reconciled with the statement of Herodotus. The next question that arises relates to the early movements of the Philistines. It has been very generally assumed of late years that Caphtor represents Crete, and that the Philistines migrated from that island, either directly or through Egypt, into Palestine. This hypothesis presupposes the Shemitic origin of the Philistines. Moreover, the name Caphtor can only be identified with the Egyptian Coptos. But the Cretan origin of the Philistines has been deduced, not so much from the name Caphtor, as from that of the Cherethites. This name in its Hebrew form bears a close resemblance to Cete, and is rendered Cretans in the LXX. But the mere coincidence of the names cannot pass for much without some corroborative testimony. Without therefore asserting that migrations may not have taken place from Crete to Philistia, we hold that the evidence adduced to prove that they did is insufficient. The last point to be decided in connexion with the early history of the Philistines is the time when they settled in the land of Canaan. If we were to restrict ourselves to the statements of the Bible, we should conclude that this took place before the time of Abraham: for they are noticed in his day as a pastoral tribe in the neighbourhood of Gerar (Gen. xxi. 32, 34, xxvi. 1, 8). The interval that elapsed between Abraham and the exodus seems sufficient to allow for the alteration that took place in the position of the Philistines, and their transformation from a pastoral tribe to a settled and powerful nation. But such a view has not met with acceptance among modern critics, partly because it leaves the migrations of the Philistines wholly unconnected with any known historical event, and partly because it does not serve to explain the great increase of their power in the time of the Judges. To meet these two requirements a double migration on the part of the Philistines, or of the two branches of that nation, has been suggested. The view adopted by Movers is, that the Philistines were carried westward from Palestine into Lower Egypt by the stream of the Hyksos movement at a period subsequent to Abraham; from Egypt they passed to Crete, and returned to Palestine in the early period of the Judges. This is inconsistent with the notices in Joshua. Ewald, in the second edition of his *Geschichte* propounds the hypothesis of a double immigration from Crete, the first of which took place in the anti-patriarchal period, as a consequence either of the Canaanitish settlement or of the Hyksos movement, the second in the time of the Judges. We cannot regard the above views in any other light than as speculations, built up on very slight data, and unsatisfactory, inasmuch as they fail to reconcile the statements of Scripture. One point can, we think, be satisfactorily shown, viz., that the hypothesis of a second immigration is not needed in order to account for the growth of the Philistine

power. Their geographical position and their relations to neighbouring nations will account for it. Between the times of Abraham and Joshua, the Philistines had changed their quarters, and had advanced northwards into the Shephelah or plain of Philistia. This plain has been in all ages remarkable for the extreme richness of its soil; its fields of standing corn, its vineyards and olive-yards, are incidentally mentioned in Scripture (Judg. xv. 5), and in time of famine the land of the Philistines was the hope of Palestine (2 K. viii. 2). It was also adapted to the growth of military power; for while the plain itself permitted the use of war-chariots, which were the chief arm of offence, the occasional elevations which rise out of it offered secure sites for towns and strongholds. It was, moreover, a commercial country; from its position it must have been at all times the great thoroughfare between Phœnicia and Syria in the north, and Egypt and Arabia in the south. The Philistines probably possessed a navy; for they had ports attached to Gaza and Ashkelon; the LXX. speaks of their ships in its version of Is. xi. 14; and they are represented as attacking the Egyptians out of ships. They had at an early period attained proficiency in the arts of peace. Their wealth was abundant (Judg. xvi. 5, 18), and they appear in all respects to have been a prosperous people. Possessed of such elements of power, the Philistines had attained in the time of the Judges an important position among eastern nations. About B.C. 1209 we find them engaged in successful war with the Sidonians (Justin, xviii. 3). About the same period, but whether before or after is uncertain, they were engaged in a naval war with Ramesses III. of Egypt, in conjunction with other Mediterranean nations. And now to recur to the Biblical narrative:—The territory of the Philistines, having been once occupied by the Canaanites, formed a portion of the promised land, and was assigned to the tribe of Judah (Josh. xv. 2, 12, 45-47). No portion, however, of it was conquered in the lifetime of Joshua (Josh. xiii. 2), and even after his death no permanent conquest was effected (Judg. iii. 3), though, on the authority of a somewhat doubtful passage, we are informed that the three cities of Gaza, Ashkelon, and Ekron were taken (Judg. i. 18). The Philistines, at all events, soon recovered these, and commenced an aggressive policy against the Israelites, by which they gained a complete ascendancy over them. Individual heroes were raised up from time to time whose achievements might well kindle patriotism, such as Shamgar the son of Anath (Judg. iii. 31), and still more Samson (Judg. xiii.-xvi.); but neither of these men succeeded in permanently throwing off the yoke. Under Eli there was an organised but unsuccessful resistance to the encroachments of the Philistines, who were met at Aphek (1 Sam. iv. 1). The production of the ark on this occasion demonstrates the greatness of the emergency, and its loss marked the lowest depth of Israel's degradation. The next action took place under Samuel's leadership, and the tide of success turned in Israel's favour. The Israelites now attributed their past weakness to their want of unity, and they desired a king, with the special object of leading them against the foe (1 Sam. viii. 20). As soon as Saul was prepared to throw off the yoke, he occupied with his army a position at Michmash, commanding the defiles leading to the Jordan valley, and his heroic son Jonathan

gave the signal for a rising by overthrowing the pillar which the Philistines had placed there. The challenge was accepted; the Philistines invaded the central district with an immense force, and, having dislodged Saul from Michmash, occupied it themselves, and sent forth predatory bands into the surrounding country. The Israelites shortly after took up a position on the other side of the ravine at Geba, and, availing themselves of the confusion consequent upon Jonathan's daring feat, inflicted a tremendous slaughter upon the enemy (1 Sam. xiii. xiv.). No attempt was made by the Philistines to regain their supremacy for about twenty-five years, and the scene of the next contest shows the altered strength of the two parties: it was no longer in the central country, but in a ravine leading down to the Philistine plain, the valley of Elah, the position of which is about 14 miles S.W. of Jerusalem: on this occasion the prowess of young David secured success to Israel, and the foe was pursued to the gates of Gath and Ekron (1 Sam. xvii.). The power of the Philistines was, however, still intact on their own territory. The border warfare was continued. The scene of the next conflict was far to the north, in the valley of Esdraelon. The battle on this occasion proved disastrous to the Israelites: Saul himself perished, and the Philistines penetrated across the Jordan, and occupied the forsaken cities (1 Sam. xxxi. 1-7). On the appointment of David to be king over the united tribes, the Philistines attempted to counterbalance the advantage by an attack on the person of the king: they therefore penetrated into the valley of Rephaim, S.W. of Jerusalem, and even pushed forward an advanced post as far as Bethlehem (1 Chr. xi. 16). David twice attacked them at the former spot, and on each occasion with signal success, in the first case capturing their images, in the second pursuing them "from Geba until thou come to Gazer" (2 Sam. v. 17-25; 1 Chr. xiv. 8-16). Henceforth the Israelites appear as the aggressors: about seven years after the defeat at Rephaim, David, who had now consolidated his power, attacked them on their own soil, and took Gath with its dependencies (1 Chr. xviii. 1), and thus (according to one interpretation of the obscure expression "Metheg-ammah" in 2 Sam. viii. 1) "he took the arm-bridle out of the hand of the Philistines;" or (according to another) "he took the bridle of the metropolis out of the hand of the Philistines"—meaning in either case that their ascendancy was utterly broken. The whole of Philistia was included in Solomon's empire. The division of the empire at Solomon's death was favourable to the Philistine cause: Rehoboam secured himself against them by fortifying Gath and other cities bordering on the plain (2 Chr. xi. 8): the Israelite monarchs were either not so prudent or not so powerful, for they allowed the Philistines to get hold of Gibeon (1 K. xv. 27, xvi. 15). Judah meanwhile had lost the tribute (2 Chr. xvii. 11). The increasing weakness of the Jewish monarchy under the attacks of Hazael led to the recovery of Gath, which was afterwards dismantled and probably destroyed by Uzziah (2 Chr. xxvi. 6; 2 K. xii. 17). We have reason to suppose that the Philistines were kept in subjection until the time of Ahaz (2 Chr. xxviii. 18). A few years later the Philistines, in conjunction with the Syrians and Assyrians, and perhaps as the subject-allies of the latter, carried on a series of attacks on the kingdom of Israel (Is. ix. 11, 12).

Hezekiah formed an alliance with the Egyptians, as a counterpoise to the Assyrians, and the possession of Philistia became henceforth the turning-point of the struggle between the two great empires of the East. The Assyrians under Tartan, the general of Sargon, made an expedition against Egypt, and took Ashdod, as the key of that country (Is. xx. 1, 4, 5). Under Sennacherib Philistia was again the scene of important operations. The Assyrian supremacy was restored by Esar-haddon, and it seems probable that the Assyrians retained their hold on Ashdod until its capture, after a long siege, by Psammeticus. It was about this time that Philistia was traversed by a vast Scythian horde on their way to Egypt. The Egyptian ascendancy was not as yet re-established, for we find the next king, Neco, compelled to besiege Gaza on his return from the battle of Megiddo. After the death of Neco, the contest was renewed between the Egyptians and the Chaldeans under Nebuchadnezzar, and the result was specially disastrous to the Philistines. The "old hatred" that the Philistines bore to the Jews was exhibited in acts of hostility at the time of the Babylonian captivity (Ez. xxv. 15-17): but on the return this was somewhat abated, for some of the Jews married Philistine women, to the great scandal of their rulers (Neh. xiii. 23, 24). From this time the history of Philistia is absorbed in the struggles of the neighbouring kingdoms. The latest notices of the Philistines as a nation, occur in 1 Macc. iii.-v. With regard to the institutions of the Philistines our information is very scanty. The five chief cities had, as early as the days of Joshua, constituted themselves into a confederacy, restricted, however, in all probability, to matters of offence and defence. Each was under the government of a prince whose official title was *seren* (Josh. xiii. 3; Judg. iii. 3, &c.), and occasionally *sâr* (1 Sam. xviii. 30, xix. 6). Each town possessed its own territory. The Philistines appear to have been deeply imbued with superstition: they carried their idols with them on their campaigns (2 Sam. v. 21), and proclaimed their victories in their presence (1 Sam. xxxi. 9). The gods whom they chiefly worshipped were Dagon (Judg. xvi. 23; 1 Sam. v. 3-5; 1 Chr. x. 10; 1 Macc. x. 83); Ashteroth (1 Sam. xxxi. 10; Herod. i. 105); Baal-zebub (2 K. i. 2-6); and Decerto, who was honoured at Ashkelon (Diod. Sic. ii. 4), though unnoticed in the Bible. Priests and diviners (1 Sam. vi. 2) were attached to the various seats of worship.

Philologus. A Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 15). Pseudo-Hippolytus makes him one of the 70 disciples, and bishop of Sinope.

Philosophy. It is the object of the following article to give some account (I.) of that development of thought among the Jews which answered to the philosophy of the West: (II.) of the recognition of the preparatory (propædæutic) office of Greek philosophy in relation to Christianity; (III.) of the systematic progress of Greek philosophy as forming a complete whole; and (IV.) of the contact of Christianity with philosophy.—I. THE PHILOSOPHIC DISCIPLINE OF THE JEWS.—Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of Western growth. In the East the search after wisdom has always been connected with practice. The history of the Jews offers no exception to this remark: there is no Jewish

philosophy properly so called. Yet on the other hand speculation and action meet in truth; and perhaps the most obvious lesson of the Old Testament lies in the gradual construction of a divine philosophy by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fulness of time, prepared many to welcome the Christ—the Truth. The philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the cosmical relations of man were traced out gradually in relation to God. The philosophy of the Jews is thus essentially a moral philosophy, resting on a definite connexion with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here assumed at the outset. The fundamental ideas of the Divine government found expression in words as well as in life. The Psalms, which, among the other infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. One man among all is distinguished among the Jews as “the wise man.” The description which is given of his writings serves as a commentary on the national view of philosophy (1 K. iv. 30-33). The lesson of practical duty, the full utterance of “a large heart” (Ibid. 29), the careful study of God’s creatures: this is the sum of wisdom. Yet in fact the very practical aim of this philosophy leads to the revelation of the most sublime truth. Wisdom was gradually felt to be a Person, throned by God, and holding converse with men (Prov. vii.). She was seen to stand in open enmity with “the strange woman,” who sought to draw them aside by sensuous attractions; and thus a new step was made towards the central doctrine of Christianity—the Incarnation of the Word. Two books of the Bible, Job and Ecclesiastes, of which the latter at any rate belongs to the period of the close of the kingdom, approach more nearly than any others to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the evils which afflict “the perfect and upright;” the other with the vanity of all the pursuits and pleasures of earth. The method of inquiry is in both cases abrupt and irregular. The Captivity necessarily exercised a profound influence upon Jewish thought. The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ezekiel (chap. i.), gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest *Kabbala* (i. e. Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, “the chariot” (*Merkabah*, Ez. i.) and “the Creation” (*Pereshith*, Gen. i.), found a wide development before the Christian

era. The first dealt with the manifestation of God in Himself; the second with His manifestation in Nature; and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On the one side it was open to the Persian doctrine of emanation, on the other to the Christian doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the seventh or eighth century. At present the original sources for the teaching of the Kabbala are the *Sepher Jetzirah*, or Book of Creation, and the *Sepher Hazohar*, or Book of Splendour. The contact of the Jews with Persia thus gave rise to a traditional mysticism. Their contact with Greece was marked by the rise of distinct sects. In the third century B.C. the great doctor Antigonos of Socho bears a Greek name, and popular belief pointed to him as the teacher of Sadoc and Boethus, the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The Sadducees appear as the supporters of human freedom in its widest scope; the Pharisees of a religious Stoicism. At a later time the cycle of doctrine was completed, when by a natural reaction the Essenes established a mystic Asceticism. The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterwards [WISDOM OF SOLOMON], both in Palestine [ECCLESIASTICUS] and in Egypt; but the doctrine of the Word is of greater speculative interest. The first use of the term Word (*Memra*), based upon the common formula of the prophets, is in the Targum of Onkelos (first cent. B.C.), in which “the Word of God” is commonly substituted for God in His immediate, personal relations with man; and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant: at Alexandria it appears as the spiritual connexion which opens the way to revelation. The preface to St. John’s Gospel includes the element of truth in both.—II. THE PATRISTIC RECOGNITION OF THE PROPAEDEUTIC OFFICE OF GREEK PHILOSOPHY.—The Divine discipline of the Jews was in nature essentially moral. The lessons which it was designed to teach were embodied in the family and the nation. Yet this was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. Even in time this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in the Ionian colonies of Asia. The teaching of the last prophet nearly synchronised with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. Philosophy failed as a religious teacher practically (Rom. i. 21, 22), but it bore noble witness to an inward law (Rom. ii. 14, 15). In its purest and grandest forms it was “a schoolmaster to bring man to Christ.” This function of ancient philosophy is distinctly recognised by many of the greatest of the

fathers. But the same writers in other places sought to explain the partial harmony of Philosophy and Revelation by an original connexion of the two. The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their catholic antagonists. This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient Philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of Truth, and sometimes by a "bold venture" claiming the heritage of Faith.—

III. THE DEVELOPMENT OF GREEK PHILOSOPHY.—The various attempts which have been made to derive Western Philosophy from Eastern sources have signally failed. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas which were originally introduced from the East; but this indirect influence does not affect the real originality of the great Greek teachers. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of simple Reason, or, if Faith asserts its prerogative, the distinction is sharply marked. Of the various classifications of the Greek schools which have been proposed the simplest and truest seems to be that which divides the history of Philosophy into three great periods, the first reaching to the era of the Sophists, the next to the death of Aristotle, the third to the Christian era. In the first period the world objectively is the great centre of inquiry: in the second, the "ideas" of things, truth, and being; in the third, the chief interest of philosophy falls back upon the practical conduct of life. After the Christian era philosophy ceased to have any true vitality in Greece, but it made fresh efforts to meet the changed conditions of life at Alexandria and Rome.

1. *The pre-Socratic Schools.*—The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. What is the one permanent element which underlies the changing forms of things?—this was the primary inquiry to which the *Ionic* school endeavoured to find an answer. THALES (cir. B.C. 610-625) pointed to moisture (water) as the one source and supporter of life. ANAXIMENES (cir. B.C. 520-480) substituted air for water. At a much later date (cir. B.C. 450) DIOGENES of Apollonia represented this elementary "air" as endowed with intelligence. The atomic theory of DEMOCRITUS (cir. B.C. 460-357) offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school. In place of one definite element ANAXIMANDER (B.C. 610-547) suggested the unlimited as the adequate origin of all special existences. And somewhat more than a century later ANAXAGORAS summed up the result of such a line of speculation: "All things were together; then mind came and disposed them in order." Thus we are left face to face with an ultimate dualism. The *Eleatic* school started from an opposite point of view. XENOPHANES (cir. B.C. 530-50) "looked up to the whole heaven and said that the One is God." "Thales saw gods in all things: Xenophanes saw all things in God" (Thirlwall, *Hist. of Gr.* ii, 138). PARMENIDES of Elea (B.C. 500) substituted abstract "being" for "God"

in the system of Xenophanes, and distinguished with precision the functions of sense and reason. ZENO of Elea (cir. B.C. 450) developed with logical ingenuity the contradictions involved in our perceptions of things, and thus formally prepared the way for scepticism. The teaching of HERACLITUS (B.C. 500) offers a complete contrast to that of the Eleatics. So far from contrasting the existent and the phenomenal, he boldly identified being with change. Rest and continuance is death. That which is is the instantaneous balance of contending powers. The philosophy of PYTHAGORAS (cir. B.C. 840-510) is subordinate in interest to his social and political theories, though it supplies a link in the course of speculation: others had laboured to trace a unity in the world in the presence of one underlying element or in the idea of a whole; he sought to combine the separate harmony of parts with total unity. Numerical unity includes the finite and the infinite; and in the relations of number there is a perfect symmetry, as all springing out of the fundamental unit. Thus numbers seemed to Pythagoras to be not only "patterns" of things, but causes of their being. 2. *The Socratic Schools.*—In the second period of Greek philosophy the scene and subject were both changed. A philosophy of ideas, using the term in its widest sense, succeeded a philosophy of nature. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. The famous sentence in which Aristotle characterises the teaching of SOCRATES (B.C. 468-399) places his scientific position in the clearest light. There are two things, he says, which we may rightly attribute to Socrates, inductive reasoning, and general definition. By the first he endeavoured to discover the permanent element which underlies the changing forms of appearances and the varieties of opinion: by the second he fixed the truth which he had thus gained. But, besides this, Socrates rendered another service to truth. Ethics occupied in his investigations the primary place which had hitherto been held by Physics. The great aim of his induction was to establish the sovereignty of Virtue. He affirmed the existence of a universal law of right and wrong. He connected philosophy with action, both in detail and in general. On the one side he upheld the supremacy of Conscience, on the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultoriness. As a result of this, the most conflicting opinions were maintained by some of his professed followers who carried out isolated fragments of his teaching to extreme conclusions. The truths which they distorted were embodied at a later time in more reasonable forms. PLATO alone (B.C. 430-347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his philosophy was as many-sided as that of his master. Plato possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary: a matchless destructive dialectic, and a creative imagination. His famous doctrines of Ideas and Recollection are a solution by imagination of a logical difficulty. The "myths" of Plato play a most important part in his system. They answer in the philosopher to Faith in the Christian. The great difference between Plato and ARISTOTLE (B.C. 384-322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is

not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and he used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm and final judgment. It follows necessarily that the Platonic doctrine of ideas was emphatically rejected by Aristotle, who gave, however, the final development to the original conception of Socrates. With Socrates "ideas" (general definitions) were mere abstractions; with Plato they had an absolute existence; with Aristotle they had no existence separate from things in which they were realised, though the form which answers to the Platonic idea, was held to be the essence of the thing itself. There is one feature common in essence to the systems of Plato and Aristotle which has not yet been noticed. In both, Ethics is a part of Politics. 3. *The post-Socratic Schools.*—After Aristotle, Philosophy took a new direction. Speculation became mainly personal. EPICURUS (B.C. 352-270) defined the object of Philosophy to be the attainment of a happy life. The pursuit of truth for its own sake he regarded as superfluous. He rejected dialectics as a useless study, and accepted the senses, in the widest acceptance of the term, as the criterion of truth. Physics he subordinated entirely to Ethics. But he differed widely from the Cyrenaics in his view of happiness. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, but often in absolute tranquillity. The gods, who were assumed to be supremely happy and eternal, were absolutely free from the distractions and emotions consequent on any care for the world or man. All things were supposed to come into being by chance, and so pass away. The individual was left master of his own life. While Epicurus asserted in this manner the claims of one part of man's nature in the conduct of life, ZENO OF CITIUM (cir. B.C. 280), with equal partiality, advocated a purely spiritual (intellectual) morality. The opposition between the two was complete. The infinite, chance-formed worlds of the one stand over against the one harmonious world of the other. On the one side are Gods regardless of material things, on the other a Being permeating and vivifying all creation. This difference necessarily found its chief expression in Ethics. For when the Stoics taught that there were only two principles of things, Matter, and God, Fate, Reason, it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to nature. All external things were indifferent. Reason was the absolute sovereign of man. In one point the Epicureans and Stoics were agreed. They both regarded the happiness and culture of the individual as the highest good. Meanwhile in the New Academy Platonism degenerated into scepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of "common sense," and maintained that the senses give a direct knowledge of the object. CARNEADES (B.C. 213-129) combated these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Scepticism remained as the last issue of speculation. But though the Greek philosophers

fell short of their highest aim, it needs no words to show the work which they did as pioneers of a universal Church. Step by step great questions were proposed—Fate, Providence—Conscience, Law—the State, the Man—and answers were given, which are the more instructive because they are generally one-sided. The complete course of Philosophy was run before the Christian era, but there were yet two mixed systems afterwards which offered some novel features. At Alexandria Platonism was united with various elements of Eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was vivified by the spirit of the old republic, and exhibited the extreme Western type of Philosophy. Of the first nothing can be said here. But the Roman Stoicism calls for brief notice from its supposed connexion with Christian morality (SENECA, † A.D. 65; EPICETUS, † cir. A.D. 115; M. AURELIUS ANTONINUS, 121-180). The superficial coincidences of Stoicism with the N.T. are certainly numerous. Coincidences of thought, and even of language, might easily be multiplied. But beneath this external resemblance of Stoicism to Christianity the later Stoics were fundamentally opposed to it. For good and for evil they were the Pharisees of the Gentile world. Their worship was a sublime egotism. The Stoicism of M. Aurelius gives many of the moral precepts of the Gospel, but without their foundation, which can find no place in his system. The real elements of greatness in M. Aurelius are many, and truly Roman; but the study of his *Meditations* by the side of the N.T. can leave little doubt that he could not have helped to give a national standing-place to a Catholic Church.—IV. CHRISTIANITY IN CONTACT WITH ANCIENT PHILOSOPHY.—The only direct trace of the contact of Christianity with Western Philosophy in the N.T. is in the account of St. Paul's visit to Athens (Acts xvii. 18), and there is nothing in the apostolic writings to show that it exercised any important influence upon the early Church (comp. 1 Cor. i. 22-4). But it was otherwise with Eastern speculation, which penetrated more deeply through the mass of the people. The "philosophy" against which the Colossians were warned (Col. ii. 8) seems undoubtedly to have been of Eastern origin, containing elements similar to those which were afterwards embodied in various shapes of Gnosticism, as a selfish asceticism, and a superstitious reverence for angels (Col. ii. 16-23); and in the Epistles to Timothy, addressed to Ephesus, in which city St. Paul anticipated the rise of false teaching (Acts. xx. 30), two distinct forms of error may be traced in addition to Judaism, due more or less to the same influence. The writings of the sub-apostolic age, with the exception of the famous anecdote of Justin Martyr (*Dial.* 2-4), throw little light upon the relations of Christianity and Philosophy. One book, however, has been preserved in various shapes, which, though still unaccountably neglected in Church histories, contains a vivid delineation of the speculative struggle which Christianity had to maintain with Judaism and Heathenism. The Clementine *Homilies* and *Recognitions* are a kind of Philosophy of Religion, and in subtlety and richness of thought yield to no early Christian writings. At the close of the second century, when the Church of Alexandria came into marked intellectual pre-eminence, the mutual influence of Christianity and Neo-Platonism opened a new field of speculation, or rather the two systems were presented in

forms designed to meet the acknowledged wants of the time. Neo-Platonism was, in fact, an attempt to seize the spirit of Christianity apart from its historic basis and human elements. The want which the Alexandrine Fathers endeavoured to satisfy is in a great measure the want of our own time. If Christianity be Truth, it must have points of special connexion with all nations and all periods. Christian Philosophy may be in one sense a contradiction in terms, for Christianity confessedly derives its first principles from revelation, and not from simple reason; but there is no less a true Philosophy of Christianity, which aims to show how completely these meet the instincts and aspirations of all ages. The exposition of such a Philosophy would be the work of a modern Origen.

Phinees. 1. The son of Eleazar son of Aaron (1 Esdr. v. 5; viii. 2, 29; 2 Esdr. i. 26; Ecclus. xlv. 23; 1 Macc. ii. 26).—2. Phinehas the son of Eli, 2 Esdr. i. 2a.—3. A Priest or Levite of the time of Ezra, father of Eleazar (1 Esdr. viii. 63).—4. 1 Esdr. v. 31. [PASEAH, 2.]

Phinehas. Son of Eleazar and grandson of Aaron (Ex. vi. 25). His mother is recorded as one of the daughters of Putiel. Phinehas is memorable for having while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, appeased the divine wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family for ever (10-13). He was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxxi. 6). Many years later he also headed the party who were despatched from Shiloh to remonstrate against the Altar which the trans-Jordanic tribes were reported to have built near Jordan (Josh. xxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name—Gibeath-Pinehas. Here his father was buried (Josh. xxiv. 33). During the life of Phinehas he appears to have been the chief of the great family of the Korahites or Korhites who guarded the entrances to the sacred tent and the whole of the sacred camp (1 Chr. ix. 20). After Eleazar's death he became high priest—the 3rd of the series. In this capacity he is introduced as giving the oracle to the nation during the whole struggle with the Benjamites on the matter of Gibeah (Judg. xx. 28). The verse which closes the Book of Joshua is ascribed to Phinehas, as the description of the death of Moses at the end of Deuteronomy is to Joshua. The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at *Auertah*, four miles S.E. of *Nabulus*.—2. Second son of Eli (1 Sam. i. 3, ii. 34, iv. 4, 11, 17, 19, xiv. 3). Phinehas was killed with his brother by the Philistines when the ark was captured. He is introduced, apparently by mistake, in the genealogy of Ezra in 2 Esdr. i. 2a.—3. A Levite of Ezra's time (Ezr. viii. 33), unless the meaning be that Eleazar was of the family of the great Phinehas.

Ph'ison. The Greek form of the name PISON (Ecclus. xxiv. 25).

Philegon. A Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus makes him one of the seventy disciples, and bishop of Marathon.

Phoebe, the first, and one of the most important, of the Christian persons the detailed mention

of whom fills nearly all the last chapter of the Epistle to the Romans. What is said of her (Rom. xvi. 1, 2) is worthy of especial notice, because of its bearing on the question of the deaconesses of the Apostolic Church.

Phoen'ice, Phoenicia, a tract of country, of which Tyre and Sidon were the principal cities, to the north of Palestine, along the coast of the Mediterranean Sea; bounded by that sea on the west, and by the mountain range of Lebanon on the east. The name was not the one by which its native inhabitants called it, but was given to it by the Greeks. The native name of Phoenicia was *Kenaan* (Canaan) or *Kuâ*, signifying lowland, so named in contrast to the adjoining *Aram*, i. e. highland; the Hebrew name of Syria. The length of coast to which the name of Phoenicia was applied varied at different times, and may be regarded under different aspects before and after the loss of its independence. 1. What may be termed Phoenicia Proper was a narrow undulating plain, extending from the pass of *Rûs el-Beyâd* or *Abyad*, the "Promontorium *Albus*" of the ancients, about six miles south of Tyre, to the *Nahr el-Auly*, the ancient *Bostromus*, two miles north of Sidon. The plain is only 28 miles in length. Its average breadth is about a mile; but near Sidon, the mountains retreat to a distance of two miles, and near Tyre to a distance of five miles. 2. A still longer district, which afterwards became fairly entitled to the name of Phoenicia, extended up the coast to a point marked by the island of *Aradus*, and by *Antaradus* towards the north; the southern boundary remaining the same as in Phoenicia Proper. Phoenicia, thus defined, is estimated to have been about 120 miles in length; while its breadth, between Lebanon and the sea, never exceeded 20 miles, and was generally much less. Scarcely 16 geographical miles farther north than Sidon was *Berytus*; with a roadstead so well suited for the purposes of modern navigation that, under the modern name of *Beirut*, it has eclipsed both Sidon and Tyre as an emporium for Syria. Still farther north was *Byblus*, the *Gabal* of the Bible (Ez. xxvii. 9), inhabited by seamen and calkers. It still retains in Arabic the kindred name of *Jebel*. Then came *Tripolis* (now *Turâbulus*), said to have been founded by colonists from Tyre, Sidon, and Aradus, with three distinct towns. And lastly, towards the extreme point north was Aradus itself, the *Arvad* of Gen. x. 18, and Ez. xxvii. 8; situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phoenicia Proper is well watered by various streams from the adjoining hills. The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and the neighbouring range of the Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building. In reference to the period when the Phoenicians had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phoenicia. In the Old Testament, the word Phoenicia does not occur, as might be expected from its being a Greek name. In the Apocrypha, it is not defined, though spoken of as being, with Coele-Syria, under one military commander (2 Macc. iii. 5, 8, viii. 8, x. 11; 3 Macc. iii. 15). In the New Testament, the word occurs only in three passages, Acts xi. 19, xv. 3, xxi. 2; and not one of these affords a clue as to how far the writer deemed Phoenicia to extend.

Phœnic'ians. The name of the race who in earliest recorded history inhabited Phœnicia, and who were the great maritime and commercial people of the ancient world. Without dwelling on matters which belong more strictly to the articles TYRE and SIDON, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phœnicians, which may tend to throw light on Biblical history and literature. — I. The Phœnician language belonged to that family of languages which, by a name not altogether free from objection, but now generally adopted, is called "Shemitic." Under this name are included three distinct branches:—1st, Arabic, to which belongs Aethiopian as an offshoot of the Southern Arabic or Himyaritic. 2ndly, Aramaic, the vernacular language of Palestine at the time of Christ. 3rdly, Hebrew, in which by far the greatest part of the Old Testament was composed. Now one of the most interesting points to the Biblical student connected with Phœnician, is, that it does not belong to either of the two first branches, but to the third; and that it is in fact so closely allied to Hebrew, that Phœnician and Hebrew, though different dialects, may practically be regarded as the same language. This may be shown in the following way:—1st. Testimony is borne to the kinship of the two languages by Augustine and Jerome, in whose time Phœnician or Carthaginian was still a living language. 2ndly. These statements are fully confirmed by a passage of Carthaginian preserved in the *Poenulus* of Plautus, act v. scene 1, and accompanied by a Latin translation as part of the play. 3rdly. The close kinship of the two languages is, moreover, strikingly confirmed by very many Phœnician and Carthaginian names of places and persons, which, destitute of meaning in Greek and Latin, through which languages they have become widely known, and having sometimes in those languages occasioned false etymologies, become really significant in Hebrew. 4thly. The same conclusion arises from the examination of Phœnician inscriptions, preserved to the present day: all of which can be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds:—1st, on gems and seals; 2ndly, on coins of the Phœnicians and of their colonies; 3rdly, on stone. — II. Concerning the original race to which the Phœnicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterwards there is no record of their origin. According to Herodotus (vii. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea; and in this there would be nothing in the slightest degree improbable, as they spoke a language cognate to that of the Arabians, who inhabited the east coast of that sea; and both Hebrew and Arabic, as well as Aramaic, are seemingly derived from some one Shemitic language now lost. Still neither the truth nor the falsehood of the tradition can now be proved. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, viz. that the Phœnicians were of the same race as the Canaanites. This remarkable fact, which, taken in connexion with the language of the Phœnicians, leads to some interesting results, is rendered probable by the following circumstances:—1st. The native name of Phœnicia was Canaan, a name

signifying "lowland." This was well given to the narrow strip of plain between the Lebanon and the Mediterranean Sea, in contrast to the elevated mountain-range adjoining. 2ndly. This is further confirmed through the name in Africa whereby the Carthaginian Phœnicians called themselves, as attested by Augustine, who states that the peasants in his part of Africa, if asked of what race they were, would answer, in Punic or Phœnician, "Canaanites." 3rdly. The conclusion thus suggested is strongly supported by the tradition that the names of persons and places in the land of Canaan—not only when the Israelites invaded it, but likewise previously, when "there were yet but a few of them," and Abraham is said to have visited it—were Phœnician or Hebrew: such, for example, as Abimelek, "Father of the king" (Gen. xx. 2); Melchizedek, "King of righteousness" (xiv. 18); Kirjath-sepher, "city of the book" (Josh. xv. 15). — III. In regard to Phœnician trade, as connected with the Israelites, the following points are worthy of notice. 1. Up to the time of David, not one of the twelve tribes seems to have possessed a single harbour on the sea-coast; it was impossible therefore that they could become a commercial people. But from the time that David had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Elath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea, owing to its currents, winds, and rocks, is dangerous even to modern sailors, and as the Phœnicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in Solomon to permit the Phœnicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. The results seem to have been strikingly successful. 2. After the division into two kingdoms, the curtain falls on any commercial relation between the Israelites and Phœnicians until a relation is brought to notice, by no means brotherly, as in the fleets which navigated the Red Sea, nor friendly, as between buyers and sellers, but humiliating and exasperating, as between the buyers and the bought. The relation is meant which existed between the two nations when Israelites were sold as slaves by Phœnicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves (1 Macc. iii. 41; 2 Macc. v. 14). Now this practice is alluded to in a threatening manner against the Phœnicians by the prophets (Joel iii. 4, and Am. i. 9, 10), about 800 years before Christ. The circumstances which led to this state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phœnicians. The attempt of Jehoshaphat to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah and established its independence; so that if the Phœnicians wished to despatch trading vessels from Ezion-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances the Phœnicians seem, not only to have purchased and to have sold again, as slaves, and probably in some instances to have kidnapped inhabitants of Judah, but even to have

sold them to their enemies the Edomites. 3. The only other notice in the Old Testament of trade between the Phoenicians and the Israelites is in the account given by the prophet Ezekiel of the trade of Tyre (xxvii. 17). While this account supplies valuable information respecting the various commercial dealings of the most illustrious of Phoenician cities, it likewise makes direct mention of the exports to it from Palestine. It is suggested by Heeren in his *Historical Researches*, ii. 117, that the fact of Palestine being, as it were, the granary of Phoenicia, explains in the clearest manner the lasting peace that prevailed between the two countries. — IV. The religion of the Phoenicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistical personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets—the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. These planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers, influencing the human will, and controlling human destinies. It will be proper here to point out certain effects which the circumstance of their being worshipped in Phoenicia produced upon the Hebrews. 1. In the first place, their worship was a constant temptation to Polytheism and idolatry. It can scarcely be doubted that the Phoenicians, as a great commercial people, were more generally intelligent, and as we should now say civilised, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile and, apparently, more enlightened than themselves, but who nevertheless, either in a philosophical or in a popular form, admitted a system of Polytheism, an influence would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent His attributes, as unsocial and morose. 2. The Phoenician religion was likewise in other respects deleterious to the inhabitants of Palestine, being in some points essentially demoralising. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phoenician god. Again, parts of the Phoenician religion, especially the worship of Astarte, tended to encourage dissoluteness in the relations of the sexes, and even to sanctify impurities of the most abominable description. — V. The most important intellectual invention of man, that of letters, was universally asserted by the Greeks and Romans to have been communicated by the Phoenicians to the Greeks (Her. v. 57, 58; Lucan, *Phars.* iii. 220, 221). This belief, however, was not universal; and Pliny the Elder expresses his own opinion that they were of Assyrian origin, while he relates the opinion of Gellius that they were invented by the Egyptians, and of others that they were invented by the Syrians. The names of the letters in the Hebrew alphabet are in accordance with the belief that the Phoenicians communicated the knowledge of letters to the Greeks. Moreover, as to writing,

the ancient Hebrew letters, substantially the same as Phoenician, agree closely with ancient Greek letters. As to the mode in which letters were invented, some clue is afforded by some of the early Hebrew and the Phoenician characters, which evidently aimed, although very rudely, like the drawing of very young children, to represent the object which the name of the letter signified. [WARRING.] In conclusion, it may not be unimportant to observe that, although so many letters of the Greek alphabet have a meaning in Hebrew or Phoenician, yet their Greek names are not in the Hebrew or Phoenician, but in the Aramaic form; and although this fact by itself is not sufficient to support an elaborate theory on the subject, it seems in favour, as far as it goes, of the conjecture that when the Greeks originally received the knowledge of letters, the names by which the several letters were taught to them were Aramaic. Still this must not be regarded in any way as proving that the alphabet was invented by those who spoke the Aramaic language. This is a wholly distinct question, and far more obscure.

Phor'os = PAROSH (1 Esdr. v. 9, ix. 26).

Phrygia. Perhaps there is no geographical term in the New Testament which is less capable of an exact definition. In fact there was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather ethnological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. Accordingly, in two of the three places where it is used, it is mentioned in a manner not intended to be precise (Acts xvi. 6, xviii. 23). By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times.

Phud = PHUT (Jud. ii. 23; comp. Ez. xxvii. 10)

Phu'rah, Gideon's servant, probably his armour-bearer (comp. 1 Sam. xiv. 1), who accompanied him in his midnight visit to the camp of the Midianites (Judg. vii. 10, 11).

Phu'rim, Esth. xi. 1. [PURIM.]

Phut, **Put**, the third name in the list of the sons of Ham (Gen. x. 6; 1 Chr. i. 8), elsewhere applied to an African country or people. In the list it follows Cush and Mizraim, and precedes Canaan. We cannot place the tract of Phut out of Africa, and it would thus seem that it was almost parallel to that of the Mizraïtes, as it could not be further to the north; this position would well agree with Libya. The few mentions of Phut in the Bible clearly indicate a country or people of Africa, and, it must be added, probably not far from Egypt (Is. lvi. 19; Nah. iii. 9; Jer. xlvi. 9; Ez. xxvii. 10, xxx. 5, xxxviii. 5). From these passages we cannot infer anything as to the exact position of this country or people; unless indeed in Nahum, Cush and Phut, Mizraim and Lubim, are respectively connected, which might indicate a position south of Egypt. In the ancient Egyptian inscriptions we find two names that may be compared to the Biblical Phut. The tribes or peoples called the Nine Bows, IX PETU or IX NA-PETU, might partly or wholly represent Phut. Their situation is doubtful, and they are never found in a geographical list. The second name is that of Nubia. TO-PET, "the region of the Bow," also called TO-MERU-PET, "the region, the island of the Bow," whence we conjecture the name of Meroë to come.

In the geographical lists the latter form occurs in that of a people, ANU-MERU-PET. The Coptic *niphataut* must also be compared with Phut. The first syllable being the article, the word nearly resembles the Hebrew name. It is applied to the western part of Lower Egypt beyond the Delta; and Champollion conjectures it to mean the Libyan part of Egypt, so called by the Greeks. To take a broad view of the question, all the names which we have mentioned may be reasonably connected with the Hebrew Phut; and it may be supposed that the Naphtulim were Mizraites in the territory of Phut, perhaps intermixed with peoples of the latter stock. It is, however, reasonable to suppose that the PET of the ancient Egyptians, as a geographical designation, corresponds to the Phut of the Bible, which would therefore denote Nubia or the Nubians, the former, if we are strictly to follow the Egyptian usage.

Phu'vah, one of the sons of Issachar (Gen. xli. 13), and founder of the family of the PUNITES.

Phygel'ius (2 Tim. i. 15), a Christian connected with those in Asia of whom St. Paul speaks as turned away from himself. It is open to question whether their repudiation of the Apostle was joined with a declension from the faith, and whether the open display of the feeling of Asia took place—at least so far as Phygelius and Hermogenes were concerned—at Rome. Phygelius may have forsaken (see 2 Tim. iv. 16) the Apostle at some critical time when his support was expected; or he may have been a leader of some party of nominal Christians at Rome, such as the Apostle describes at an earlier period (Phil. i. 15, 16) opposing him there.

Phylactery. [FRONTLETS.]

Pi-bes'eth, a town of Lower Egypt, mentioned but once in the Bible (Ez. xxx. 17). In hieroglyphics its name is written BAHEST, BAST, and HA-BAHEST. The Coptic forms are *Bast*, with the article *Pi* prefixed, *Poubaste*, *Poubast*, &c., and the Greek *Βούβαστis*, *Βούβαστρος*. Bubastis was situate on the west bank of the Pelusiac or Bubastite branch of the Nile, in the Bubastite nome, about 40 miles from the central part of Memphis. Herodotus speaks of its site as having been raised by those who dug the canals for Sesostris, and afterwards by the labour of criminals under Sabacüs the Ethiopian, or rather the Ethiopian dominion. He mentions the temple of the goddess Bubastis as well worthy of description, being more beautiful than any other known to him. The temple is entirely ruined, but the names of Rameses II. of the xixth dynasty, Userken I. (Osorchon I.) of the xxiii, and Nekt-har-heb (Nectanebo I.), of the xxxth, have been found here, as well as that of the eponymous goddess BAST. There are also remains of the ancient houses of the town, and, "amidst the houses on the N.W. side are the thick walls of a fort which protected the temple below" (Notes by Sir G. Wilkinson in Rawlinson's *Herodotus*, vol. ii. pp. 219, plan, and 102). Bubastis thus had a fort, besides being strong from its height. The goddess BAST, who was here the chief object of worship was the same as PESHT, the goddess of fire. Both names accompany a lion-headed figure, and the cat was sacred to them. Herodotus considers the goddess Bubastis to be the same as Artemis (ii. 137).

Picture. In two of the three passages in which "picture" is used in A. V. it denotes idolatrous representations, either independent images, or more

usually stones "portrayed," i. e. sculptured in low relief, or engraved and coloured (Ez. xxiii. 14; Layard, *Nin. & Bab.* ii. 306, 308). Movable pictures, in the modern sense, were doubtless unknown to the Jews. The "pictures of silver" of Prov. xiv. 11, were probably wall-surfaces or cornices with carvings.

Piece of Gold. The A. V., in rendering the elliptical expression "six thousand of gold," in a passage respecting Naaman, relating that he "took with him ten talents of silver, and six thousand of gold, and ten changes of raiment" (2 K. v. 5), supplies "pieces" as the word understood. The rendering "pieces of gold" is very doubtful; and "shekels of gold," as designating the value of the whole quantity, not individual pieces, is preferable.

Piece of Silver. The passages in the O. T. and those in the N. T. in which the A. V. uses this term must be separately considered. I. In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, if we except one case to be afterwards noticed. The phrase is always "a thousand" or the like "of silver" (Gen. xx. 16, xxxvii. 28, xlv. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew. There are other passages in which the A. V. supplies the word "shekels" instead of "pieces" (Deut. xxi. 19, 29; Judg. xvii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. The shekel, be it remembered, was the common weight for money, and therefore most likely to be understood in an elliptical phrase. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in the Psalms (lxviii. 30, Heb. 31). The word *rats*, which occurs nowhere else, if it preserve its radical meaning, must signify a piece broken off, or a fragment; there is no reason to suppose that a coin is meant.—II. In the N. T. two words are rendered by the phrase "piece of silver," drachma, *δραχμή*, and *ἀργύριον*. (1.) The first (Luke xv. 8, 9) should be represented by drachma. It was a Greek silver coin, equivalent, at the time of St. Luke, to the Roman denarius. (2.) The second word is very properly thus rendered. It occurs in the account of the betrayal of our Lord for "thirty pieces of silver" (Matt. xxvi. 15, xxvii. 3, 5, 6, 9). It is difficult to ascertain what coins are here intended. If the most common silver pieces be meant, they would be denarii. The parallel passage in Zechariah (xi. 12, 13) must, however, be taken into consideration, where, if our view be correct, shekels must be understood. It is more probable that the thirty pieces of silver were tetradrachms than that they were denarii.

Piety. This word occurs but once in the A. V.: "Let them learn first to show piety at home," better, "towards their own household" (1 Tim. v. 4). The choice of this word here instead of the more usual equivalents of "godliness," "reverence," and the like, was probably determined by the special sense of *pietas*, as "erga parentes."

Pigeon. [TURTLE-DOVE.]

Pi-hahiroth, a place before or at which the Israelites encamped, at the close of the third march from Rameses, when they went out of Egypt (Ez. xiv. 2, 9; Num. xxiii. 7, 8). The name is probably that of a natural locality. Jablonsky proposed the Coptic *pi-achi-rot*, "the place where sedge grows;" and this or a similar name the late

M. Fresnel recognised in the modern *Ghuoeybet-el-booe*, "the bed of reeds."

Pilate, Pontius. The name indicates that he was connected, by descent or adoption, with the gens of the Pontii, first conspicuous in Roman history in the person of C. Pontius Telesinus, the great Samnite general. He was the sixth Roman procurator of Judaea, and under him our Lord worked, suffered, and died, as we learn, not only from the obvious Scriptural authorities, but from Tacitus (*Ann.* xv. 44). He was appointed A.D. 25-6, in the twelfth year of Tiberius. One of his first acts was to remove the head-quarters of the army from Caesarea to Jerusalem. The soldiers of course took with them their standards, bearing the image of the emperor, into the Holy City. No previous governor had ventured on such an outrage. The people poured down in crowds to Caesarea, where the procurator was then residing, and besought him to remove the images. After five days of discussion he gave the signal to some concealed soldiers to surround the petitioners, and put them to death unless they ceased to trouble him; but this only strengthened their determination, and they declared themselves ready rather to submit to death than forego their resistance to an idolatrous innovation. Pilate then yielded, and the standards were by his orders brought down to Caesarea. On two other occasions he nearly drove the Jews to insurrection. To these specimens of his administration, which rest on the testimony of profane authors, we must add the slaughter of certain Galileans, which was told to our Lord as a piece of news (*Luke* xiii. 1), and on which He founded some remarks on the connexion between sin and calamity. It must have occurred at some feast at Jerusalem in the outer court of the Temple. It was the custom for the procurators to reside at Jerusalem during the great feasts, to preserve order, and accordingly, at the time of our Lord's last passover, Pilate was occupying his official residence in Herod's palace; and to the gates of this palace Jesus, condemned on the charge of blasphemy, was brought early in the morning by the chief priests and officers of the Sanhedrim, who were unable to enter the residence of a Gentile, lest they should be defiled, and unfit to eat the passover (*John* xviii. 28). Pilate therefore came out to learn their purpose, and demanded the nature of the charge. At first they seem to have expected that he would have carried out their wishes without further inquiry, and therefore merely described our Lord as a disturber of the public peace; but as a Roman procurator had too much respect for justice, or at least understood his business too well to consent to such a condemnation, they were obliged to devise a new charge, and therefore interpreted our Lord's claims in a political sense, accusing him of assuming the royal title, perverting the nation, and forbidding the payment of tribute to Rome (*Luke* xxiii. 3; an account plainly presupposed in *John* xviii. 33). It is plain that from this moment Pilate was distracted between two conflicting feelings: a fear of offending the Jews, and a conscious conviction that Jesus was innocent. Moreover, this last feeling was strengthened by his own hatred of the Jews, whose religious scruples had caused him frequent trouble, and by a growing respect for the calm dignity and meekness of the sufferer. First he examined our Lord privately, and asked Him whether He was a king? At the close of the interview he came out to the Jews and

declared the prisoner innocent. To this they replied that His teaching had stirred up all the people from Galilee to Jerusalem. The mention of Galilee suggested to Pilate a new way of escaping from his dilemma, by sending on the case to Herod Antipas; but Herod, though propitiated by this act of courtesy, declined to enter into the matter. So Pilate was compelled to come to a decision; and first having assembled the chief priests and also the people, he announced to them that the accused had done nothing worthy of death; but at the same time, in hopes of pacifying the Sanhedrim, he proposed to scourge Him before he released Him. But as the accusers were resolved to have His blood, they rejected this concession, and therefore Pilate had recourse to a fresh expedient. It was the custom for the Roman governor to grant every year, in honour of the passover, pardon to one condemned criminal. Pilate therefore offered the people their choice between two, the murderer Barabbas, and the prophet whom a few days before they had hailed as the Messiah. To receive their decision he ascended the *βήμα*, a portable tribunal which was carried about with a Roman magistrate to be placed wherever he might direct. As soon as Pilate had taken his seat he received a mysterious message from his wife, who had "suffered many things in a dream," which impelled her to entreat her husband not to condemn the Just One. But he had no longer any choice in the matter, for the rabble, instigated of course by the priests, chose Barabbas for pardon, and clamoured for the death of Jesus; insurrection seemed imminent, and Pilate reluctantly yielded. But, before issuing the fatal order, he washed his hands before the multitude, as a sign that he was innocent of the crime, in imitation probably of the ceremony enjoined in *Deut.* xxi. As it produced no effect, Pilate ordered his soldiers to inflict the scourging preparatory to execution; but the sight of unjust suffering so patiently borne seems again to have troubled his conscience, and prompted a new effort in favour of the victim. But the priests only renewed their clamours for His death, and, fearing that the political charge of treason might be considered insufficient, returned to their first accusation of blasphemy, and quoting the law of Moses (*Lev.* xxiv. 16), which punished blasphemy with stoning, declared that He must die "because He made himself the Son of God." But this title augmented Pilate's superstitious fears, already aroused by his wife's dream (*John* xix. 7); he feared that Jesus might be one of the heroes or demigods of his own mythology; he took Him again into the palace, and inquired anxiously into His descent ("Whence art thou?") and His claims. The result of this interview was one last effort to save Jesus by a fresh appeal to the multitude; but now arose the formidable cry, "If thou let this man go, thou art not Caesar's friend;" and Pilate, to whom political success was as the breath of life, again ascended the tribunal, and finally pronounced the desired condemnation. So ended Pilate's share in the greatest crime which has been committed since the world began. We learn from Josephus that his anxiety to avoid giving offence to Caesar did not save him from political disaster. The Samaritans were unquiet and rebellious. Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now president of Syria, and he sent Pilate to Rome to answer their accusations before the emperor

When he reached it he found Tiberius dead, and Caius (Caligula) on the throne, A.D. 36. Eusebius adds that soon afterwards, "wearied with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is that he was banished to Vienna Allobrogum (Vienne on the Rhone), where a singular monument—a pyramid on a quadrangular base, 52 feet high—is called Pontius Pilate's tomb. Another is that he sought to hide his sorrows on the mountain by the lake of Lucerne, now called Mount Pilatus; and there, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit. We learn from Justin Martyr, Tertullian, Eusebius, and others, that Pilate made an official report to Tiberius of our Lord's trial and condemnation; and in a homily ascribed to Chrysostom, though marked as spurious by his Benedictine editors (*Hom. viii. in Pasch. vol. viii. p. 968, D*), certain *ὑπομνήματα* (*Acta*, or *Commentarii Pilati*) are spoken of as well-known documents in common circulation. The *Acta Pilati* now extant in Greek, and two Latin epistles from him to the emperor, are certainly spurious.

Pildash, one of the eight sons of Nahor, Abraham's brother, by his wife and niece, Milcah (Gen. xxii. 22).

Pil'eha, the name of one of the chief of the people, probably a family, who signed the covenant with Nehemiah (Neh. x. 24).

Pillar. The notion of a pillar is of a shaft or isolated pile, either supporting or not supporting a roof. Pillars form an important feature in Oriental architecture, partly perhaps, as a reminiscence of the tent with its supporting poles, and partly also from the use of flat roofs, in consequence of which the chambers were either narrower or divided into portions by columns. The general practice in Oriental buildings of supporting flat roofs by pillars, or of covering open spaces by awnings stretched from pillars, led to an extensive use of them in construction. At Nineveh the pillars were probably of wood, and it is very likely that the same construction prevailed in the "house of the forest of Lebanon," with its hall and porch of pillars (1 K. vii. 2, 6). The "chapiters" of the two pillars Jachin and Boaz resembled the tall capitals of the Persepolitan columns. But perhaps the earliest application of the pillar was the votive or monumental. This in early times consisted of nothing but a single stone or pile of stones (Gen. xxviii. 18, xxxi. 46, &c.). The stone Ezel (1 Sam. xx. 19) was probably a terminal stone or a waymark. The "place" set up by Saul (1 Sam. xv. 12) is explained by St. Jerome to be a trophy. The word used is the same as that for Absalom's pillar. So also Jacob set up a pillar over Rachel's grave (Gen. xxxv. 20). The monolithic tombs and obelisks of Petra are instances of similar usage. But the word *Matstsebah*, "pillar," is more often rendered "statue" or "image" (e.g. Deut. vii. 5, xii. 3, xvi. 22; Lev. xxvi. 1; &c.). [IDOL.] Lastly, the figurative use of the term "pillar," in reference to the cloud and fire accompanying the Israelites on their march, or as in Cant. iii. 6, and Rev. x. 1, is plainly derived from the notion of an isolated column not supporting a roof.

Pillar, Plain of the, or rather "oak of the pillar"—that being the real signification of the Hebrew word *elón*. A tree which stood near Shechem, and at which the men of Shechem and the

house of Millo assembled, to crown Abimelech son of Gideon (Judg. ix. 6). There is nothing said by which its position can be ascertained. It possibly derived its name of *Mutsab* from a stone or pillar set up under it. [MEONENIM.] The terms in which Joshua speaks of this very stone (Josh. xxiv. 27) almost seem to overstep the bounds of mere imagery.

Pilled (Gen. xxx. 37, 38): **PEELED** (Is. xlviii. 2; Ez. xxix. 18). The verb "to pill" appears in old Eng. as identical in meaning with "to peel = to strip," and in this sense is used in the above passages from Gen. Of the next stage in its meaning as = plunder, we have traces in the words "pillage," "pilfer." If the difference between the two forms be more than accidental, it would seem as if in the English of the 17th century "peel" was used for the latter signification.

Pil'tai, the representative of the priestly house of Mondiah, or Maadiah, in the time of Joiakim the son of Jeshua (Neh. xii. 17).

Pine-tree. 1. Heb. *Tûhâr* (Is. xli. 19, lx. 13). What tree is intended is not certain. Gesenius inclines to think the oak, as implying duration. It has been variously explained to be the Indian plane, the larch, and the elm; but the rendering "pine" seems least probable of any.—2. *Shemen* (Neh. viii. 15) is probably the wild olive.

Pinnacle (only in Matt. iv. 5, and Luke iv. 9) It is plain, 1. that *τὸ πτερύγιον* is not a pinnacle, but the pinnacle. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnacle was the golden spikes erected on the roof to prevent birds from settling there. Lightfoot suggests the porch or vestibule, which projected like shoulders on each side of the Temple. Perhaps *τὸ πτεπ.* means the battlement ordered by law to be added to every roof.

Pinon, one of the "dukes" of Edom; that is, head or founder of a tribe of that nation (Gen. xxxvi. 41; 1 Chr. i. 52). Eusebius and Jerome call it Punon, and identify it with Phæno. No name answering to Pinon appears to have been yet discovered in Arabic literature, or amongst the existing tribes.

Pipe (Heb. *chálil*). The Hebrew word so rendered is derived from a root signifying "to bore, perforate," and is represented with sufficient correctness by the English "pipe" or "flute," as in the margin of 1 K. i. 40. It is one of the simplest, and therefore probably one of the oldest, of musical instruments; and in consequence of its simplicity of form there is reason to suppose that the "pipe" of the Hebrews did not differ materially from that of the ancient Egyptians and Greeks. It is associated with the tabret (*tôph*) as an instrument of a peaceful and social character. The pipe and tabret were used at the banquets of the Hebrews (Is. v. 12), and their bridal processions (Mishna, *Baba metsia*, vi. 1), and accompanied the simpler religious services, when the young prophets, returning from the high-place, caught their inspiration from the harmony (1 Sam. x. 5); or the pilgrims, on their way to the great festivals of their ritual, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is. xxx. 29). The sound of the pipe was apparently a soft wailing note, which made it appropriate to be used in mourning and at funerals (Matt. ix. 23), and in the

lament of the prophet over the destruction of Moab (Jer. xlviii. 36). It was even used in the Temple choir, as appears from Ps. lxxxvii. 7, where "the players on instruments" are properly "pipers." Twelve days in the year, according to the Mishna, the pipes sounded before the altar. They were of reed, and not of copper or bronze, because the former gave a softer sound. Of these there were not less than two nor more than twelve. In later times the funeral and deathbed were never without the professional pipers or flute-players (Matt. ix. 23), a custom which still exists. In the social and festive life of the Egyptians the pipe played as prominent a part as among the Hebrews. In the different combinations of instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former being played both by men and women, the latter exclusively by women. Any of the instruments above described would have been called by the Hebrews by the general term *chálil*, and it is not improbable that they might have deigned their knowledge of them from Egypt. The single pipe is said to have been the invention of the Egyptians alone, who attribute it to Osiris. Bartenora identifies the *chálil* with the French *chalmieu*, which is the German *schalmie*, and our *shawm* or *shalm*, of which the clarinet is a modern improvement.

P'ra, 1 Esd. v. 19. Apparently a repetition of the name CAPHIRA.

P'ram. The Amorite king of Jarmuth at the time of Joshua's conquest of Canaan (Josh. x. 3, 27).

P'irathon, "in the land of Ephraim in the mount of the Amalekites;" a place named nowhere but in Judg. xii. 15. It is mentioned by the accurate old traveller hap-Parchi as lying about two hours west of Shechem, and called *Fer'ata*. It was reserved for Dr. Robinson to rediscover it on an eminence about a mile and a half south of the road from *Jaffa* by *Hableh* to *Nablús*.

Pirath'onite, the native of, or dweller in, PIRATHON. Two such are named in the Bible. 1. Abdon ben-Hillel (Judg. xii. 13, 15).—2. From the same place came "Benaiah the Pirathonite of the children of Ephraim" (1 Chr. xxvii. 14).

Pis'gah. An ancient topographical name which is found, in the Pentateuch and Joshua only, in two connexions. 1. The top, or head, of the Pisgah, Num. xxi. 20, xxiii. 14; Deut. iii. 27, xxxiv. 1. 2. Ashdod hap-Pisgah, perhaps the springs, or roots, of the Pisgah, Deut. iii. 17, iv. 49; Josh. xii. 3, xiii. 20. The latter has already been noticed under its own head. Of the former but little can be said. "The Pisgah" must have been a mountain range or district, the same as, or a part of that called the mountains of Abarim (comp. Deut. xxxii. 49 with xxxiv. 1). It lay on the east of Jordan, contiguous to the field of Moab, and immediately opposite Jericho. The field of Zophim was situated on it, and its highest point or summit—its "head"—was the Mount Nebo. If it was a proper name we can only conjecture that it denoted the whole or part of the range of the highlands on the east of the lower Jordan. No traces of the name Pisgah have been met with in later times on the east of Jordan, but in the Arabic garb of *Ras el-Fekkah* (almost identical with the Hebrew Rosh hap-pisgah) it is attached to a well-known headland on the north-western end of the Dead Sea, a mass or mountain bounded on the south by the *Wady en-Nar*, and on the north by the *Wady Sidr*, and

on the northern part of which is situated the great Mussulman sanctuary of *Nebg Músa* (Moses).

Pisid'ia was a district in Asia Minor, N. of Pamphylia, and reached to, and was partly included in, Phrygia. Thus ANTIOCH IN PISIDIA was sometimes called a Phrygian town. St. Paul passed through Pisidia twice, with Barnabas, on the first missionary journey *æe.* both in going from PERGA to ICONIUM (Acts xiii. 13, 14, 51), and in returning (xiv. 21, 24, 25; compare 2 Tim. iii. 11). It is probable also that he traversed the northern part of the district, with Silas and Timotheus, on the second missionary journey (xvi. 6): but the word Pisidia does not occur except in reference to the former journey.

Pi'son. [EDEN.]

Pis'pah. An Asherite, son of Jether, or Ithran (1 Chr. vii. 38).

Pit. In the A. V. this word appears with a figurative as well as a literal meaning. 1. *Shébi*, in Num. xvi. 30, 33; Job xvii. 16. Here the word is one which is used only of the hollow, shadowy world, the dwelling of the dead, and as such it has been treated of under HELL. 2. *Shachath*. Here the sinking of the pit is the primary thought. It is dug into the earth (Ps. ix. 16, cxix. 85). It thus became a type of sorrow and confusion (Job xxxiii. 18, 24, 28, 30). 3. *Bór*. In this word, as in the cognate *Bêr*, the special thought is that of a pit or well dug for water. The process of desynonymising which goes on in all languages, seems to have confined the former to the state of the well or cistern, dug into the rock, but no longer filled with water. In the phrase "they that go down to the *pit*," it becomes even more constantly than the synonyms already noticed, the representative of the world of the dead (Ezek. xxxi. 14, 16, xxxii. 18, 24; Ps. xxviii. 1, xliiii. 7). There may have been two reasons for this transfer. 1. The wide deep excavation became the place of burial (Ezek. xxxii. 24). 2. The *pit*, however, in this sense, was never simply equivalent to burial-place. There is always implied in it a thought of scorn and condemnation (Zech. ix. 11; Is. li. 14; Jer. xxxviii. 6, 9). It is not strange that with the associations of material horror clustering round, it should have involved more of the idea of a place of punishment for the haughty or unjust, than did the *sheol* or the grave. In Ilev. ix. 1, 2, and elsewhere, the pit of the abyss is as a dungeon.

Pitch. The three Hebrew words all represent the same object, viz. mineral pitch or asphalt, in its different aspects: *zepheth* (the *zift* of the modern Arabs) in its liquid state; *chémâr*, in its solid state, from its red colour; and *copher*, in reference to its use in overlaying wood-work (Gen. vi. 14). Asphalt is an opaque, inflammable substance, which bubbles up from subterranean fountains in a liquid state, and hardens by exposure to the air, but readily melts under the influence of heat. In the latter state it is very tenacious, and was used as a cement in lieu of mortar in Babylonia (Gen. xi. 3), as well as for coating the outsides of vessels (Gen. vi. 14), and particularly for making the papyrus boats of the Egyptians water-tight (Ex. ii. 3). The Babylonians obtained their chief supply from the springs of Is (the modern *Hit*), which are still in existence. The Jews and Arabians got theirs in large quantities from the Dead Sea, which hence received its classical name of *Lacus Asphaltites*.

Pitcher. The word "pitcher" is used in A. V. to denote the water-jars or pitchers with one or two

* handles, used chiefly by women for carrying water, as in the story of Rebecca (Gen. xiv. 15-20; but see Mark xiv. 13; Luke xxii. 10). This practice has been, and is still usual both in the East and elsewhere. The vessels used for the purpose are generally carried on the head or the shoulder. The Bedouin women commonly use skin-bottles. Such was the "bottle" carried by Hagar (Gen. xxi. 14). The same word is used of the pitchers employed by Gideon's 300 men (Judg. vii. 16).

Pithom, one of the store-cities built by the Israelites for the first oppressor, the Pharaoh "which knew not Joseph" (Ex. i. 11). It is probable that Pithom lay in the most eastern part of Lower Egypt. Herodotus mentions a town called Patumus, which seems to be the same as the Thoum or Thou of the *Itinerary* of Antoninus, probably the military station Thohu of the *Notitia*. Whether or not Patumus be the Pithom of Scripture, there can be little doubt that the name is identical.

Pithon. One of the four sons of Mivah, the son of Mephibosheth (1 Chr. viii. 35, ix. 41).

Plague, the. The disease now called the Plague, which has ravaged Egypt and neighbouring countries in modern times, is supposed to have prevailed there in former ages. Manetho, the Egyptian historian, speaks of "a very great plague" in the reign of Semempses, the seventh king of the first dynasty, B.C. cir. 2500. The difficulty of determining the character of the pestilences of ancient and mediæval times, even when carefully described, warns us not to conclude that every such mention refers to the Plague. The Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. The Plague when most severe usually appears first on the northern coast of Egypt, having previously broken out in Turkey or North Africa west of Egypt. It ascends the river to Cairo, rarely going much further. The mortality is often enormous, and Mr. Lane remarks of the plague of 1835:—"It destroyed not less than eighty thousand persons in Cairo, that is, one-third of the population; and far more, I believe, than two hundred thousand in all Egypt." The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. Several Hebrew words are translated "pestilence" or "plague;" but not one of these words can be considered as designating by its signification the Plague. Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words. Those pestilences which were sent as special judgments, and were either supernaturally rapid in their effects, or in addition directed against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond nature, nor directed against individuals (Lev. xxvi. 25; Deut. xxviii. 21). In neither of these passages does it seem certain that the Plague is specified. The notices in the prophets present the same difficulty; for they do not seem to afford sufficiently positive evidence that the Plague was known in those times. Hæzekiah's disease has been thought to have been the Plague, and its fatal nature, as well as the

mention of a boil, makes this not improbable. On the other hand, there is no mention of a pestilence among his people at the time. There does not seem, therefore, to be any distinct notice of the Plague in the Bible.

Plagues, the Ten. I. *The Plague*.—Although it is distinctly stated that the plagues prevailed throughout Egypt, yet the descriptions seem principally to apply to that part of Egypt which lay nearest to Goshen, and more especially to "the field of Zoan," or the tract about that city. We must look especially to Lower Egypt for our illustrations, while bearing in mind the evident prevalence of the plagues throughout the land.—II. *The Occasion* on which the plagues were sent is described in Ex. iii.-xii.—III. *The Plagues*.—1. *The Plague of Blood*.—When Moses and Aaron came before Pharaoh, a miracle was required of them. Then Aaron's rod became "a serpent" (A. V.), or rather "a crocodile." Its being changed into an animal revered by all the Egyptians, or by some of them, would have been an especial warning to Pharaoh. The Egyptian magicians called by the king produced what seemed to be the same wonder, yet Aaron's rod swallowed up the others (vii. 3-12). This passage, taken alone, would appear to indicate that the magicians succeeded in working wonders, but, if it is compared with the others which relate their opposition on the occasions of the first three plagues, a contrary inference seems more reasonable. A comparison with other passages strengthens us in the inference that the magicians succeeded merely by juggling. Not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river stank. The Egyptians could not drink of it, and digged around it for water. This plague was doubly humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. Those who have endeavoured to explain this plague by natural causes, have referred to the changes of colour to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the middle ages; the last two occasioned by small fungi of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most clear, nor why it killed the fish and made the water unfit to be drunk.—2. *The Plague of Frogs*.—When seven days had passed after the first plague, the river and all the open waters of Egypt brought forth countless frogs, which not only covered the land, but filled the houses, even in their driest parts and vessels, for the ovens and kneading-troughs are specified. The magicians again had a seeming success in their opposition. This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals. The frog was sacred to the goddess HEKT, who is represented with the head of this reptile.—3. *The Plague of Lice*.—The account of the third plague is not preceded by the mention of any warning to Pharaoh. We read that Aaron was commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "lice" in man and beast. The magicians again attempted opposition; but, failing, confessed that the wonder was of God (viii. 16-19). There is much difficulty as to the animals meant. The LXX. has *σκηλῆες*, and the Vulg. *scintipè*.

mosquitos. The narrative does not enable us to decide which is the more probable of the two renderings. In this case the plague does not seem to be especially directed against the superstitions of the Egyptians.—4. *The Plague of Flies*.—In the case of the fourth plague, as in that of the first, Moses was commanded to meet Pharaoh in the morning as he came forth to the water, and to threaten him with a judgment if he still refused to give the Israelites leave to go and worship. He was to be punished by what the A. V. renders “swarms [of flies],” “a swarm [of flies],” or, in the margin, “a mixture [of noisome beasts].” The proper meaning of the word *‘arôb* is a question of extreme difficulty. The explanation of Josephus, and almost all the Hebrew commentators, is that it means “a mixture,” and here designates a mixture of wild animals. It is almost certain, from two passages (Ex. viii. 29, 31; Hebrew, 25, 27), that a single creature is intended. Oedmann proposes the *blatta orientalis*, a kind of beetle, instead of a dog-fly. Yet our experience does not bear out the idea that any kind of beetle is injurious to man in Egypt. If we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common fly, which in the present day is probably the most troublesome insect in Egypt.—5. *The Plague of the Murrain of Beasts*.—Pharaoh was next warned that, if he did not let the people go, there should be on the day following “a very grievous murrain,” upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. This plague would have been a heavy punishment to the Egyptians as falling upon their sacred animals of two of the kinds specified, the oxen and the sheep; but it would have been most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an unfrequent visitation in Egypt, and is supposed to precede the Plague.—6. *The Plague of Boils*.—The next judgment appears to have been preceded by no warning, excepting indeed that, when Moses publicly sent it abroad in Egypt, Pharaoh might no doubt have repented at the last moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to “sprinkle it toward the heaven in the sight of Pharaoh.” It was to become “small dust” throughout Egypt, and “be a boil breaking forth [with] blains upon man, and upon beast.” This plague may be supposed to have been either an infection of boils, or a pestilence like the Plague of modern times, which is an extremely severe kind of typhus fever, accompanied by swellings. The former is, however, the more likely explanation.—7. *The Plague of Hail*.—The account of the seventh plague is preceded by a warning, which Moses was commanded to deliver to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. Man and beast were smitten, and the herbs and every tree broken, save in the land of Goshen. The ruin caused by the hail was evidently far greater than that effected by any of the earlier plagues. Hail is now extremely rare, but not unknown, in Egypt, and it is interesting that the narrative seems to imply that it sometimes falls there.—8. *The Plague of Locusts*.—Pharaoh was now threatened with a plague of locusts, to begin the next day, by which everything the ~~had~~ had left was to be devoured. This was to exceed any like visitations that had happened in the

time of the king's ancestors. “And the locusts went up over all the land of Egypt, and rested in all the cons of Egypt: very grievous [were they]; before them there were no such locusts as they, neither after them shall be such. For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left: and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt.” This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by those who have been in Egypt in a part of the country where a flight of locusts has alighted. In this case the plague was greater than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts.—9. *The Plague of Darkness*.—After the plague of locusts we read at once of a fresh judgment. “There was a thick darkness in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings.” It has been illustrated by reference to the Samoom and the hot wind of the Khamaseen. The former is a sandstorm which occurs in the desert, seldom lasting more than a quarter of an hour or twenty minutes, but for the time often causing the darkness of twilight, and affecting man and beast. The hot wind of the Khamaseen usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the Samoom, though far less powerful and far less distressing in its effects. It is not known to cause actual darkness. The plague may have been an extremely severe sandstorm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severest storms are always very brief.—10. *The Death of the Firstborn*.—Before the tenth plague Moses went to warn Pharaoh. “And Moses said, Thus saith the LORD, About midnight will I go out into the midst of Egypt: and all the firstborn in the land of Egypt shall die, from the firstborn of Pharaoh that sitteth upon his throne, even unto the firstborn of the maidservant that [is] behind the mill; and all the firstborn of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more.” The clearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singling out of the firstborn, puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The history of the ten plagues strictly ends with the death of the firstborn. Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins. The gradual increase in severity of the plagues is perhaps the best key to their meaning. They seem to have been sent as warnings to the oppressor, to afford him a means of seeing God's will, and an opportunity of repenting

before Egypt was ruined. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most signal judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor.

Plains. This one term does duty in the Authorised Version for no less than seven distinct Hebrew words.—1. *Āḥēl*. This word perhaps answers more nearly to our word "meadow" than any other. It occurs in the names of ABEL-MAIM, ABEL-MEHOLOH, ABEL-SHITTIM, and is rendered "plain" in Judg. xi. 33, "plain of vineyards."—2. *Bik'āh*. Fortunately we are able to identify the most remarkable of the *Bik'āhs* of the Bible, and thus to ascertain the force of the term. The great Plain or Valley of Coele-Syria, the "hollow land" of the Greeks, which separates the two ranges of Lebanon and Antilebanon, is the most remarkable of them all. It is called in the Bible the *Bik'āth Aven* (Am. i. 5), and also probably the *Bik'āth Lebanon* (Josh. xi. 17, xii. 7) and *Bik'āth-Mizpeh* (xi. 8), and is still known throughout Syria by its old name, as *el-Bekā'a*, or *Ard el-Bekā'a*. Out of Palestine we find denoted by the word *Bik'āh* "the plain of the land of Shinar" (Gen. xi. 2), the "plain of Mesopotamia" (Ez. iii. 22, 23, viii. 4, xxvii. 1, 2), and the "plain in the province of Dura" (Dan. iii. 1).—3. *Ilac-Ciccār*. This, though applied to a plain, has not the force of flatness or extent, but rather seems to be derived from a root signifying roundness. In its topographical sense it is confined to the Jordan valley (Gen. xiii. 10, 11, 12, xix. 17, 25-29; Deut. xxiv. 3; 2 Sam. xviii. 23; 1 K. vii. 46; 2 Chr. iv. 17; Neh. iii. 22, xii. 28).—4. *Ham-Mishōr*. This is by the lexicographers explained as meaning "straightforward," "plain," as if from the root *yāshar*, to be just or upright; but this seems far-fetched, and it is more probable that in this case, as in the case of the preceding, we have an archaic term existing from a prehistoric date. It occurs in the Bible in the following passages:—Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. ix. 23, 25; 2 Chr. xxvi. 10; Jer. xlviii. 8, 21. In each of these, with one exception, it is used for the district in the neighbourhood of Heshbon and Dibon—the *Belka* of the modern Arabs, their most noted pasture-ground. And therefore it is puzzling to find it used in one passage (1 K. ix. 23, 25) apparently with the mere general sense of low land, or rather flat land, in which chariots could be manoeuvred—as opposed to uneven mountainous ground. Perhaps the word was used by the Syrians of Damascus without any knowledge of its strict signification.—5. *Ha-Arābāh*. This again had an absolutely definite meaning, being restricted to the valley of the Jordan, and to its continuation south of the Dead Sea. [ARABIAH; PALESTINE.]—6. *Ha-Shefēlāh*, the invariable designation of the depressed, flat or gently undulating region which intervened between the highlands of Judah and the Mediterranean, and was commonly in possession of the Philistines.—7. *Ēlōn*. Our translators have uniformly rendered this word "plain," doubtless following the Vulgate, which in about half the passages has *convallis*. But this is not the verdict of the majority or the most trustworthy of the ancient versions. They regard the word as meaning an "oak" or "grove of oaks," a rendering supported by all, or nearly all, the commentators and lexicographers of the present day.

The passages in which the word occurs erroneously translated "plain," are as follows:—Plain of Moreh (Gen. xii. 6; Deut. xi. 30), Plain of Mamre (Gen. xiii. 18, xiv. 13; xviii. 1), Plain of Zaanaim (Judg. iv. 11), Plain of the Pillar (Judg. ix. 6), Plain of Meonenim (Is. 37), Plain of Tabor (1 Sam. x. 3).—8. The Plain of Esdraelon, which to the modern traveller in the Holy Land forms the third of its three most remarkable depressions, is designated in the original by neither of the above terms, but by *'ēmek*, an appellative noun frequently employed in the Bible for the smaller valleys of the country—"the valley of Jezreel."

Plaster. The mode of making plaster-cement has been described above. [MORTAR.] Plaster is mentioned thrice in Scripture: 1. (Lev. xiv. 42, 48). 2. The words of the law were ordered to be engraved on Mount Ebal on stones which had been previously coated with plaster (Deut. xxvii. 2, 4; Josh. viii. 32). The process here mentioned was probably of a similar kind to that adopted in Egypt for receiving bas-reliefs. The wall was first made smooth, and its interstices, if necessary, filled up with plaster. When the figures had been drawn, and the stone adjacent cut away so as to leave them in relief, a coat of lime whitewash was laid on, and followed by one of varnish after the painting of the figures was complete. 3. It was probably a similar coating of cement, on which the fatal letters were traced by the mystic hand "on the plaster of the wall" of Belshazzar's palace at Babylon (Dan. v. 5).

Pledge. [LOAN.]

Pleiades. The Heb. word (*Ānāh*) so rendered occurs in Job ix. 9, xxxviii. 31, and Am. v. 8. In the last passage our A. V. has "the seven stars," although the Geneva version translates the word "Pleiades" as in the other cases. In Job the LXX. has Πλειάδες, the order of the Hebrew words having been altered, while in Amos there is no trace of the original, and it is difficult to imagine what the translators had before them. The Vulgate in each passage has a different rendering: *Ulyades* in Job ix. 9, *Pleiades* in Job xxxviii. 31, and *Arc-turus* in Am. v. 8. The Jewish commentators are no less at variance. R. David Kimchi in his Lexicon says: "R. Jonah wrote that it was a collection of stars called in Arabic *Al Thuraiyā*." That *Al Thuraiyā* and the Pleiades are the same is proved by the words of Aben Ragel. "*Al Thuraiyā* is the mansion of the moon, in the sign Taurus, and it is called the celestial hen with her chickens." With this Hyde compares the Fr. *putsinrière*, and Eng. *Hen and chickens*, which are old names for the same stars. The opinion of Aben Ezra has been frequently misrepresented. He held that *Ānāh* was a single large star, *Aldebaran* the brightest of the Hyades, while *Cestī* [A. V. "Orion"] was *Antares*, the heart of Scorpio. On the whole, though it is impossible to arrive at any certain conclusion, it appears that our translators were perfectly justified in rendering *Ānāh* by "Pleiades." *Hēa* or *Hoa*, the third god of the Assyrian triad, was known among the stars by the name of Kimmut, which Rawlinson compares with the Heb. *Cimāh*, and identifies with the constellation Draco.

Plough. [AGRICULTURE.]

Pocher'eth. The children of Pochereth of Zelahim were among the children of Solomon's servants who returned with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).

Poetry, Hebrew. The attributes which are

common to all poetry, and which the poetry of the Hebrews possesses in a higher degree perhaps than the literature of any other people, it is unnecessary here to describe. But the points of contrast are so numerous, and the peculiarities which distinguish Hebrew poetry so remarkable, that these alone require a full and careful consideration. It is a phenomenon which is universally observed in the literatures of all nations, that the earliest form in which the thoughts and feelings of a people find utterance is the poetic. Prose is an aftergrowth, the vehicle of less spontaneous, because more formal, expression. And so it is in the literature of the Hebrews. Of the three kinds of poetry which are illustrated by the Hebrew literature, the *lyric* occupies the foremost place. The Shemitic nations have nothing approaching to an *epic* poem, and in proportion to this defect the lyric element prevailed more greatly, commencing in the pre-Mosaic times, flourishing in rude vigour during the earlier periods of the Judges, the heroic age of the Hebrews, growing with the nation's growth and strengthening with its strength, till it reached its highest excellence in David, the warrior-poet, and from thenceforth began slowly to decline. *Gnomic* poetry is the product of a more advanced age. It arises from the desire felt by the poet to express the results of the accumulated experiences of life in a form of beauty and permanence. Its thoughtful character requires for its development a time of peacefulness and leisure; for it gives expression, not like the lyric to the sudden and impassioned feelings of the moment, but to calm and philosophic reflection. Being less spontaneous in its origin, its form is of necessity more artificial. The period during which it flourished among the Hebrews corresponds to its domestic and settled character. We meet with it at intervals up to the time of the Captivity, and, as it is chiefly characteristic of the age of the monarchy, Ewald has appropriately designated this era the "artificial period" of Hebrew poetry. From the end of the 8th century B.C. the decline of the nation was rapid, and with its glory departed the chief glories of its literature. After the Captivity we have nothing but the poems which formed part of the liturgical services of the Temple. Whether *dramatic* poetry, properly so called, ever existed among the Hebrews, is, to say the least, extremely doubtful. In the opinion of some writers the Song of Songs, in its external form, is a rude drama, designed for a simple stage. But the evidence for this view is extremely slight.—I. *Lyrical Poetry*.—The literature of the Hebrews abounds with illustrations of all forms of lyrical poetry, in its most manifold and wide-embracing compass, from such short ejaculations as the songs of the two Lamelchs and Pss. xv., cxvii., and others, to the longer chants of victory and thanksgiving, like the songs of Deborah and David (Judg. v., Ps. xviii.). The names by which the various kinds of songs were known among the Hebrews will supply some illustration of this. 1. *Shir*, a song in general, adapted for the voice alone. 2. *Mizmôr*, a psalm, or song to be sung with any instrumental accompaniment. 3. *Neginah*, is probably a melody expressly adapted for stringed instruments. 4. *Maschil*, probably denotes a lyrical song requiring nice musical skill. [MASCIL.] 5. *Motam*, a term of extremely doubtful meaning. [MOTAM.] 6. *Shiggayôn* (Ps. vii. 1), a wild, irregular, dithyrambic song, as the word appears to denote; or,

according to some, a song to be sung with variations. But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniments. Of these we notice:—1. *Tahillâh*, a hymn of praise. The plural *tahillim* is the title of the Book of Psalms in Hebrew. The 145th Psalm is entitled "David's (Psalm) of praise." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and the Psalms xviii. and lxxviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services. Next to the hymn of praise may be noticed, 2. *Kînâh*, the lament or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the calamities of the land (2 Sam. i. 19-27, iii. 33, 34, xviii. 33). 3. *Shir yedidôth*, a love song (Ps. xiv. 1), in its external form at least. Other kinds of poetry there are which occupy the middle ground between the lyric and gnomic, being lyric in form and spirit, but gnomic in subject. These may be classed as 4. *Mashâl*, properly a similitude, and then a parable, or sententious saying, couched in poetic language. Such are the songs of Balaam (Num. xxiii. 7, 18; xxiv. 3, 15, 20, 21, 23), which are eminently lyrical in character; the mocking ballad in Num. xxi. 27-30, which has been conjectured to be a fragment of an old Amorite war-song; and the apologue of Jotham (Judg. ix. 7-20), both which last are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of Babylon (Is. xiv. 4-27). *Chiddâh*, an enigma (like the riddle of Samson, Judg. xiv. 14), or "dark saying," as the A. V. has it in Ps. xlix. 5, lxxviii. 2. Lastly, to this class belong *me'itsâh*, a mocking, ironical poem (Hab. ii. 6). 5. *Tephillâh*, prayer, is the title of Pss. xvii., lxxvii., xc., cii., cxli., and Hab. iii. All these are strictly lyrical compositions, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied.—II. *Gnomic Poetry*.—The second grand division of Hebrew poetry is occupied by a class of poems which are peculiarly Shemitic, and which represent the nearest approaches made by the people of that race to anything like philosophic thought. Reasoning there is none: we have only results, and those rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet's own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. It has been already remarked that gnomic poetry, as a whole, requires for its development a period of national tranquillity. Its germs are the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. The sayer of sententious sayings was to the Hebrews the wise man, the philosopher. Of the earlier isolated proverbs but few examples remain.—III. *Dramatic Poetry*.—It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama proper are discernible, and what inferences may be

made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gestures with the change of person and subject. Something of this kind may possibly have existed among the Hebrews; but there is no evidence that it did exist, nor any grounds for making even a probable conjecture with regard to it. But the mere fact of the existence of these rude exhibitions among the Arabs and Egyptians of the present day is of no weight when the question to be decided is, whether the Song of Songs was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could assume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion, is the latter. The latest work on the subject is that of M. Renan (*Le Cantique des Cantiques*), who has given a spirited translation of the poem, and arranged it in acts and scenes, according to his own theory of the manner in which it was intended to be represented. He divides the whole into 16 cantos, which form five acts and an epilogue. But M. Renan, who is compelled, in accordance with his own theory of the mission of the Shemitic races, to admit that no trace of anything approaching to the regular drama is found among them, does not regard the Song of Songs as a drama in the same sense as the products of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, to designate any composition conducted in dialogue and corresponding to an action. He conjectures that it is a *libretto* intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. We must look for a parallel to it in the middle ages, when, besides the mystery plays, there were scenic representations sufficiently developed. The groundwork of this hypothesis is taken away by M. Renan's own admission that dramatic representations are alien to the spirit of the Shemitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eclogue or pastoral dialogue. It is scarcely necessary after this to discuss the question whether the Book of Job is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly and really as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumphant confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerful of all tragedies; but that it is a dramatic poem, intended to be represented upon a stage, or capable of being so represented, may be confidently denied. One characteristic of Hebrew poetry, not indeed peculiar to it, but shared by it in common with the literature of other nations, is its intensely national and local colouring. The writers were Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine;

which they have immortalised in their poetic figures, and even while uttering the sublimest and most universal truths never forgetting their own nationality in its narrowest and intensest form. Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalisations of the Indian philosophic poetry. In Hebrew, as in other languages, there is a peculiarity about the diction used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflexions, which distinguish it from the contemporary prose or historical style. It is universally observed that archaic forms and usages of words linger in the poetry of a language after they have fallen out of ordinary use. But the form of Hebrew poetry is its distinguishing characteristic, and what this form is, has been a vexed question for many ages. The Therapeutae, as described by Philo, sang hymns and psalms of thanksgiving to God, in divers measures and strains; and these were either new or ancient ones composed by the old poets, who had left behind them measures and melodies of trimeter verses. According to Josephus, the Song of Moses at the Red Sea (Ex. xv.) was composed in the hexameter measure; and again, the song in Deut. xxxii. is described as a hexameter poem. The Psalms of David were in various metres, some trimeters and some pentameters. Eusebius characterises the great Song of Moses and the 118th (119th) Psalm as metrical compositions in what the Greeks call the heroic metre. They are said to be hexameters of sixteen syllables. The other verse compositions of the Hebrews are said to be in trimeters.* Jerome says that the Book of Job, from iii. 3 to xlii. 6, is in hexameters, with dactyls and spondees. The conclusion seems inevitable that these terms are employed simply to denote a general external resemblance. There are, says Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (145th). In the first two, one letter corresponds to each clause or versicle, which is written in trimeter iambs. The others are in tetrameter iambs, like the song in Deuteronomy. In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145) a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of Sapphic metre; for three clauses which are connected together and begin with one letter (*i. e.* in the first clause) close with a period in heroic measure (*Heroici comma*). The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter iambs. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance. Joseph Scaliger was one of the first to point out the fallacy of Jerome's statement with regard to the metres of the Psalter and the Lamentations, and to assert that these books contained no verse bound by metrical laws, but that their language was merely prose, animated by a poetic spirit. Gerhard Vossius says, that in Job and the Proverbs there is rhythm but no metre; that is, regard is had to the number of syllables but not to their quantity. But, in spite of the opinions pronounced by these high authorities, there were still many who believed in the existence

of a Hebrew metre, and in the possibility of recovering it. The theories proposed for this purpose were various, and the enumeration of them forms a curious chapter in the history of opinion. The opinions of Lowth, with regard to Hebrew metre, are summed up by Jebb (*Sacr. Lit.* p. 16) as follows: "He begins by asserting, that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, couched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but admits of no investigation by human art or industry; he states, after Abraham, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges, that the artificial conformation of the sentences, is the sole indication of metre in these poems; he barely maintains the *credibility* of attention having been paid to numbers or feet in their compositions; and, at the same time, he confesses the utter impossibility of determining, whether Hebrew poetry was modulated by the ear alone, or according to any definite and settled rules of prosody." On the subject of the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (*Sacr. Lit.* p. 20), "is universal poetry: the poetry of all languages, and of all peoples: the collocation of words (whatever may have been the sound, for of this we are quite ignorant) is primarily directed to secure the best possible announcement and discrimination of the sense: let, then, a translator only be literal, and, so far as the genius of his language will permit, let him preserve the original order of the words, and he will infallibly put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been originally metre, . . . the poetry could not have been, as it unquestionably and emphatically is, a poetry, not of sounds, or of words, but of things." Rabbi Azariah de Rossi appears to have anticipated Bishop Lowth in his theory of parallelism: at any rate his treatise contains the germ which Lowth developed, and may be considered the technical basis of his system. But Lowth's system of parallelism was more completely anticipated by Schoettgen in a treatise, of the existence of which the bishop does not appear to have been aware. It is found in his *Horus Hebræacæ*, vol. i. pp. 1249-1263, diss. vi., "de Exergasia Sacra." This *exergasia* he defines to be, the conjunction of entire sentences signifying the same thing: so that *exergasia* bears the same relation to sentences that synonymy does to words. But whatever may have been achieved by his predecessors, there can be no question that the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject, more marked than any that had preceded it. Of his system it will be necessary to give a somewhat detailed account; for whatever may have been done since his time, and whatever modifications of his arrangement may have been introduced, all subsequent writers have confessed their obligations to the two works abovementioned, and have drawn their inspiration from them. Starting with the alphabetical poems as the basis of his investigation, because that in them the verses or stanzas were more distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, "of

verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythm;" and that this harmony does not arise from rhyme, but from what he denominates parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic. 1. Parallel lines *synonymous* correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are only two of the many given by Lowth:—

"O-Jehovah, in-thy-strength the-king shall-rejoice,
And-in-thy-salvation how-greatly shall-he-exult!
The-desire-of-his-heart thou-hast-granted unto-him;
And-the-request-of-his-lips thou-hast-not denied."
Ps. xxi. 1, 2.

"For the-moth shall-consume-them like-a-garment;
And-the-worm shall-eat-them like wool:
But-my-righteousness shall-endure for-ever;
And-my-salvation to-the-age-of-ages."—Is. li. 7, 8.

To this first division of Lowth's Jebb objects that the name *synonymous* is inappropriate, for the second clause, with few exceptions, "*diversifies* the preceding clause, and generally so as to rise above it, forming a sort of climax in the sense." He suggests as a more appropriate name for parallelism of this kind, *cognate parallelism* (*Sacr. Lit.* p. 38). 2. Lowth's second division is *antithetic parallelism*; when two lines correspond with each other by an opposition of terms and sentiments; when the second is contrasted with the first, sometimes in expressions, sometimes in sense only, so that the degrees of antithesis are various. As for example—

"A wise son rejoiceth his father;
But a foolish son is the grief of his mother."
Prov. x. 1.

"The memory of the just is a blessing;
But the name of the wicked shall rot." Prov. x. 7.

The gnomic poetry of the Hebrews abounds with illustrations of antithetic parallelism. 3. *Synthetic or constructive parallelism*, where the parallel "consists only in the similar form of construction; in which word does not answer to word, and sentence to sentence, as equivalent or opposite; but there is a correspondence and equality between different propositions, in respect of the shape and turn of the whole sentence, and of the constructive parts—such as noun answering to noun, verb to verb, member to member, negative to negative, interrogative to interrogative." One of the examples of constructive parallels given by Lowth is Is. i. 5, 6:—

"The Lord Jehovah hath opened mine ear,
And I was not rebellious;
Neither did I withdraw myself backward—
I gave my back to the smiters,
And my cheeks to them that plucked off the hair;
My face I hid not from shame and spitting."

Jebb gives as an illustration Ps. xix. 7-10. 4. To the three kinds of parallelism above described Jebb adds a fourth, which seems rather to be an unnecessary refinement upon than distinct from the others. He denominates it *inverted parallelism*, in which he says, "there are stanzas so constructed that, whatever be the number of lines, the first line shall be parallel with the last; the second with the penultimate; and so throughout in an order that looks inward, or, to borrow a military phrase, from flanks to centre" (*Sacr. Lit.* p. 53). Thus—

"My son, if thine heart be wise,
My heart also shall rejoice;
Yea, my reins shall rejoice
When thy lips speak right things."

Prov. xxiii. 15, 16

'Unto Thee do I lift up mine eyes, O Thou that dwellest in the heavens;
Behold as the eyes of servants to the hand of their masters;
As the eyes of a maiden to the hands of her mistress,
Even so look our eyes to Jehovah our God, until he have mercy upon us."—Ps. cxlii. 1, 2.

A few words may now be added with respect to the classification proposed by De Wette, in which more regard was had to the rhythm. The four kinds of parallelism are.—1. That which consists in an equal number of words in each member, as in Gen. iv. 23. Under this head are many minor divisions. 2. Unequal parallelism, in which the number of words in the members is not the same. 3. Out of the parallelism which is unequal in consequence of the composite character of one member, another is developed, so that both members are composite (Ps. xxxi. 11). 4. Rhythmical parallelism, which lies merely in the external form of the diction. De Wette also held that there were in Hebrew poetry the beginnings of a composite rhythmical structure like our strophes. Thus in Ps. xlii., xliii., a refrain marks the conclusion of a larger rhythmical period. It is impossible here to do more than refer to the essay of Koester on the strophes, or the parallelism of verses in Hebrew poetry; in which he endeavours to show that the verses are subject to the same laws of symmetry as the verse members; and that consequently Hebrew poetry is essentially strophical in character. Ewald's treatise requires more careful consideration; but it must be read itself, and it is impossible here to give a fair idea of it. It remains now only to notice the rules of Hebrew poetry as laid down by the Jewish grammarians, to which reference was made in remarking upon the system of R. Azariah. They have the merit of being extremely simple, and are to be found at length, illustrated by many examples, in Mason and Bernard's *Heb. Gram.* vol. ii. pt. 57, and accompanied by an interesting account of modern Hebrew versification. The rules are briefly these:—1. That a sentence may be divided into members, some of which contain *two*, *three*, or even *four* words, and are accordingly termed *Binary*, *Ternary*, and *Quaternary* members respectively. 2. The sentences are composed either of *Binary*, *Ternary*, or *Quaternary* members entirely, or of these different members intermixed. 3. That in two consecutive members it is an elegance to express the same idea in different words. 4. That a word expressed in either of these parallel members is often not expressed in the alternate member. 5. That a word without an accent, being joined to another word by *Mukkiph*, is generally (though not always) reckoned with that second word as one. In conclusion, after reviewing the various theories which have been framed with regard to the structure of Hebrew poetry, it must be confessed that beyond the discovery of very broad general laws, little has been done towards elaborating a satisfactory system.

Poison. Two Hebrew words are thus rendered in the A. V., but they are so general as to throw little light upon the knowledge and practice of poisons among the Hebrews. 1. The first of these, *chémáh*, from a root signifying, "to be hot." It in all cases denotes animal poison, and not vegetable or mineral. The only allusion to its application is in Job vi. 4, where reference seems to be made to the custom of anointing arrows with the venom of a snake, a practice the origin of which is of very remote antiquity. 2. *Rósh*, if a poison at all, denotes a vegetable poison primarily, and is only

twice (Deut. xxxii. 33; Job xx. 16) used of the venom of a serpent. In other passages where it occurs, it is translated "gall" in the A. V., except in Hos. x. 4, where it is rendered "hemlock." Beyond the fact that, whether poisonous or not, it was a plant of bitter taste, nothing can be inferred. Gesenius, on the ground that the word in Hebrew also signifies "head," rejects the hemlock, colocynth, and dardel of other writers, and proposes the "poppy" instead; from the "heads" in which its seeds are contained. "Water of *rósh*" is then "opium," but it must be admitted that there appears in none of the above passages to be any allusion to the characteristic effects of opium. There is a clear case of suicide by poison related in 2 Macc. x. 13, where Ptolemy Macron is said to have destroyed himself by this means. It has been suggested, indeed, that the *pharmakela* of Gal. v. 20 (A. V. "witchcraft"), signifies poisoning, but it more probably refers to the concoction of magical potions and love philtres.

Pollux. [CASTOR AND POLLUX.]

Polygamy. [MARRIAGE.]

Pomegranate by universal consent is acknowledged to denote the Heb. *rimmón*, a word which occurs frequently in the O. T., and is used to designate either the pomegranate-tree or its fruit. The pomegranate was doubtless early cultivated in Egypt: hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognised on the Egyptian sculptures. Mention is made of "an orchard of pomegranates" in Cant. iv. 13. Carved figures of the pomegranate adorned the tops of the pillars in Solomon's Temple (1 K. vii. 18, 20, &c.); and worked representations of this fruit, in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. xxviii. 33, 34). Russell (*Nat. Hist. of Aleppo*, i. 85, 2nd ed.) states "that the pomegranate" (*runnân* in Arabic, the same word as the Heb.) "is common in all the gardens." The pomegranate-tree (*Punica granatum*) derives its name from the Latin *punium granatum*, "grained apple." The Romans gave it the

Punica granatum

name of *Punica*, as the tree was introduced from Carthage; it belongs to the natural order *Myrtaceae*, being, however, rather a bush than a tree.

Pommels, only in 2 Chr. iv. 12, 13. In 1 K. vii. 41, "bowls." The word signifies convex projections belonging to the capitals of pillars.

Pond. The ponds of Egypt (Ex. vii. 19, viii. 5) were doubtless water left by the inundation of the Nile. Ponds for fish are mentioned in Is. xix. 10.

Pontius Pilate. [PILATE.]

Pontus, a large district in the north of Asia Minor, extending along the coast of the Pontus Euxinus, from which circumstance the name was derived. It is three times mentioned in the N. T. (Acts ii. 9, 10, xviii. 2; 1 Pet. i. 1). All these passages agree in showing that there were many Jewish residents in the district. As to the annals of Pontus, the one brilliant passage of its history is the life of the great Mithridates. Under Nero the whole region was made a Roman province, bearing the name of Pontus.

Pool. 1. *Agám*, see POND. 2. *Berécáh* in pl. once only, pools (Ps. lxxiv. 6). 3. The usual word is *Berécáh*, closely connected with the Arabic *Birkeh*, a reservoir for water. These pools, like the tanks of India, are in many parts of Palestine and Syria the only resource for water during the dry season, and the failure of them involves drought and calamity (Is. xlii. 15). Of the various pools mentioned in Scripture, perhaps the most celebrated are the pools of Solomon near Bethlehem, called by the Arabs *el-Burak*, from which an aqueduct was carried which still supplies Jerusalem with water (Eccl. ii. 6; Ecclus. xxiv. 30, 31).

Poor. The general kindly spirit of the law towards the poor is sufficiently shown by such passages as Deut. xv. 7, for the reason that (ver. 11), "the poor shall never cease out of the land." Among the special enactments in their favour the following must be mentioned. 1. The right of gleaning (Lev. xix. 9, 10; Deut. xxiv. 19, 21). 2. From the produce of the land in sabbatical years, the poor and the stranger were to have their portion (Ex. xxiii. 11; Lev. xxv. 6). 3. Re-entry upon land in the jubilee year, with the limitation as to town homes (Lev. xxv. 25-30). 4. Prohibition of usury, and of retention of pledges (Lev. xxv. 35, 37; Ex. xxii. 25-27, &c.). 5. Permanent bondage forbidden, and manumission of Hebrew bondsmen or bondswomen enjoined in the sabbatical and jubilee years (Deut. xv. 12-15; Lev. xxv. 39-42, 47-54). 6. Portions from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxvi. 12, 13). 7. The poor to partake in entertainments at the feasts of Weeks and Tabernacles (Deut. xvi. 11, 14; see Neh. viii. 10). 8. Daily payment of wages (Lev. xix. 13). On the law of gleaning the Rabbinical writers founded a variety of definitions and refinements. Principles similar to those laid down by Moses are inculcated in N. T., as Luke iii. 11, xiv. 13; Acts vi. 1; Gal. ii. 10; James ii. 15. In later times mendicancy, which does not appear to have been contemplated by Moses, became frequent.

Poplar (Heb. *libneh*), the rendering of the above-named Hebrew word, which occurs only in Gen. xxx. 37; and Hos. iv. 13. Several authorities, Celsius amongst the number, are in favour of the rendering of the A. V., and think the "white poplar" (*Populus alba*) is the tree denoted; others understand the "storax tree" (*Styrax officinale*, Linn.). Both poplars and styrax or storax trees are

common in Palestine, and either would suit the passages where the Heb. term occurs. Storax is mentioned in Ecclus. xxiv. 15, together with other aromatic substances. The *Styrax officinale* is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-coloured. This white appearance agrees with the etymology of the Heb. *libneh*.

Styrax officinale.

Po'ratha. One of the ten sons of Haman slain by the Jews in Shushan the palace (Esth. ix. 8).

Porch. 1. *Ülam* or *ülám* (1 Chr. xxviii. 11). 2. *Misderón ülan* (Judg. iii. 23), strictly a vestibule, was probably a sort of verandah chamber in the works of Solomon, open in front and at the sides, but capable of being enclosed with awnings or curtains. *Misderón* was perhaps a corridor or colonnade connecting the principal rooms of the house. The porch (Matt. xxvi. 71), may have been the passage from the street into the first court of the house, in which, in Eastern houses is the *mastábah* or stone-bench, for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business. Josephus describes the porticoes or cloisters which surrounded the Temple of Solomon, and also the royal portico.

Porcius Festus. [FESTUS.]

Porter. This word when used in the A. V. does not bear its modern signification of a carrier of burdens, but denotes in every case a gate-keeper, from the Latin *portarius*, the man who attended to the *porta*.

Posido'nus, an envoy sent by Nicanor to Judas (2 Macc. xiv. 19).

Possession. [DEMONIACS.]

Post. I. 1. *Äyil*, a word indefinitely rendered by LXX. and Vulg. Probably, as Gesenius argues, the door-case of a door, including the lintel and side-posts. *Älm* to this is *älám* (Ex. xl. 16, &c.), probably a portico. 2. *Ammäh*, usually "cubit,"

once only "post" (Is. vi. 4). 3. *Medeah*, from a root signifying to shine, i. e. implying motion (on a centre). 4. *Saph*, usually "threshold." The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).—II. *Ráts*, A. V. "post" (Esth. iii. 13), elsewhere "runner," and also "guard."

Pot. The term "pot" is applicable to so many sorts of vessels, that it can scarcely be restricted to any one in particular. 1. *Asbo* (2 K. iv. 2), an earthen jar, deep and narrow, without handles, probably like the Roman and Egyptian amphora, inserted in a stand of wood or stone. 2. *Cheres*, an earthen vessel for stewing or seething (Ez. iv. 9; Lev. vi. 28). 3. *Dád*, a vessel for culinary purposes, perhaps of smaller size (1 Sam. ii. 14). 4. *Sir* is combined with other words to denote special uses (Ex. xvi. 3; Ps. lx. 3; Prov. xxvii. 21). The "pots" set before the Rechabites (Jer. xxxv. 5), were probably bulging jars or bowls. The water-pots of Cana appear to have been large amphorae, such as are in use at the present day in Syria. These were of stone or hard earthenware. The water-pot of the Samaritan woman may have been a leathern bucket, such as Bedouin women use.

Pot'iphar, an Egyptian pr. n., also written **POTIPHERAH**. That these are but two forms of one name is shown by the ancient Egyptian equivalent, **PET-P-RA**, which may have been pronounced, at least in Lower Egypt, **PET-PH-RA**. It signifies "Belonging to the Sun." Potiphar is described as "an officer of Pharaoh, chief of the executioners, an Egyptian" (Gen. xxxix. 1; comp. xxxvii. 36). The word we render "officer," as in the A. V., is literally "eunuch;" but it is also used for an officer of the court, and this is almost certainly the meaning here. He is called an Egyptian, though his master was probably a Shepherd-king of the xvth dynasty. He appears to have been a wealthy man (xxxix. 4-6). The view we have of Potiphar's household is exactly in accordance with the representations on the monuments. When Joseph was accused, his master contented himself with casting

him into prison (19, 20). After this we hear no more of Potiphar.

Potipherah, an Egyptian pr. n., also written **POTIPHERAH**, corresponding to the **PET-P-RA**, "Belonging to the Sun," of the hieroglyphics. Potipherah was priest or prince of On, and his daughter Asenath was given Joseph to wife by Pharaoh (xli. 45, 50, xlii. 20).

Potsherd, also in A. V. "sherd," a broken piece of earthenware (Prov. xxvi. 23).

Potter's-field, **the**. A piece of ground which, according to the statement of St. Matthew (xxvii. 7), was purchased by the priests with the thirty pieces of silver rejected by Judas, and converted into a burial-place for Jews not belonging to the city. St. Matthew adducing this (ver. 9) as a fulfilment of an ancient prediction. What that prediction was, and who made it, is not, however, at all clear. St. Matthew names Jeremiah: but there is no passage in the Book of Jeremiah, as we possess it, resembling that which he gives; and that in Zechariah (xi. 12) which is usually supposed to be alluded to, has only a very imperfect likeness to it. Three explanations suggest themselves:—1. That the Evangelist unintentionally substituted the name of Jeremiah for that of Zechariah, at the same time altering the passage to suit his immediate object. 2. That this portion of the Book of Zechariah was in the time of St. Matthew attributed to Jeremiah. 3. That the reference is to some passage of Jeremiah which has been lost from its place in his book, and exists only in the Evangelist. Some support is afforded to this view by the fact that potters and the localities occupied by them are twice alluded to by Jeremiah. Its partial correspondence with Zech. xi. 12, 13, is no argument against its having at one time formed a part of the prophecy of Jeremiah: for it is well known to every student of the Bible that similar correspondences are continually found in the prophets. See, for instance, Jer. xlviii. 45, comp. with Num. xxi. 27, 28, xiv. 17; Jer. xlix. 27, comp. with Am. i. 4.

Egyptian Pottery (Wilkinson).

Pottery. The art of pottery is one of the most common and most ancient of all manufactures. It is abundantly evident, both that the Hebrews used earthenware vessels in the wilderness, and that the potters' trade was afterwards carried on in Palestine. They had themselves been concerned in the potters' trade in Egypt (Ps. lxxxi. 6), and the wall-paintings minutely illustrate the Egyptian process. The clay, when dug, was trodden by men's feet so as to form a paste (Is. xli. 25; Wisd. xv. 7); then placed by the potter on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but it seems likely that it was adopted from Egypt (Is. xlv. 9; Jer. xviii. 3). The vessel was then smoothed and coated with a glaze, and finally burnt in a furnace.

There was at Jerusalem a royal establishment of potters (1 Chr. iv. 23), from whose employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14).

Pound. 1. A weight. See **WEIGHTS AND MEASURES**.—2. A money of account, mentioned in the parable of the Ten Pounds (Luke xix. 12-27), as the talent is in the parable of the Talents (Matt. xxv. 14-30). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent.

Praetorium. The headquarters of the Roman military governor, wherever he happened to be. In time of peace some one of the best buildings of the

city which was the residence of the proconsul or praetor was selected for this purpose. Thus Verres appropriated the palace of King Hiero at Syracuse; at Caesarea that of Herod the Great was occupied by Felix (Acts xxiii. 35); and at Jerusalem the new palace erected by the same prince was the residence of Pilate. This last was situated on the western, or more elevated, hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the *παρεμβολή*, or fortified barrack. It was the dominant position on the Western hill, and—at any rate on one side, probably the Eastern—was mounted by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 seqq.). From the level below the barrack, a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the valley of Tyropeon (separating the Western from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple cloister just above this entrance, i. e. the N.W. corner, stood the old citadel of the Temple hill, the *Βάσις*, or *Bypsis*, which Herod rebuilt and called by the name *Antonia*, after his friend and patron the triumvir. After the Roman power was established in Judaea, a Roman guard was always maintained in the *Antonia*, the commander of which for the time being seems to be the official termed *στρατηγὸς τοῦ ἱεροῦ* in the Gospels and Acts. The guard in the *Antonia* was probably relieved regularly from the cohort quartered in the *παρεμβολή*. The Praetorian camp at Rome, to which St. Paul refers (Phil. i. 13), was erected by the Emperor Tiberius, acting under the advice of Sejanus. Before that time the guards were billeted in different parts of the city. It stood outside the walls, at some distance short of the fourth milestone, and near either to the Salasian or the Nomentane road. From the first, buildings must have sprung up near it for sutlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, “within the rules” of the Praetorium (Acts xviii. 30), although still under the custody of a soldier.

Prayer. The object of this article will be to touch briefly on (1) the doctrine of Scripture as to the nature and efficacy of prayer; (2) its directions as to time, place, and manner of prayer; (3) its types and examples of prayer. (1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which depends on the nature of God. It places it clearly before us, and emphasizes most strongly those doctrines on which the difficulty turns. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, is both implied and expressed in the plainest terms. Thus, as usual in the case of such mysteries, the two apparently opposite truths are emphasized, be-

cause they are needful to man's conception of his relation to God; their reconciliation is not, perhaps cannot be, fully revealed. For, in fact, it is involved in that inscrutable mystery which attends on the conception of any free action of man as necessary for the working out of the general laws of God's unchangeable will. At the same time it is clearly implied that such a reconciliation exists, and that all the apparently isolated and independent exertions of man's spirit in prayer are in some way perfectly subordinated to the One supreme will of God, so as to form a part of His scheme of Providence. It is also implied that the key to the mystery lies in the fact of man's spiritual unity with God in Christ, and of the consequent gift of the Holy Spirit. So also is it said of the spiritual influence of the Holy Ghost on each individual mind, that while “we know not what to pray for,” the indwelling “Spirit makes intercession for the saints, according to the will of God” (Rom. viii. 26, 27). Here, as probably in all other cases, the action of the Holy Spirit on the soul is to free agents, what the laws of nature are to things inanimate, and is the power which harmonises free individual action with the universal will of God. (2.) There are no directions as to prayer given in the Mosaic law: the duty is rather taken for granted, as an adjunct to sacrifice, than enforced or elaborated. It is hardly conceivable that, even from the beginning, public prayer did not follow every public sacrifice. Such a practice is alluded to as common in Luke i. 10; and in one instance, at the offering of the first-fruits, it was ordained in a striking form (Deut. xxvi. 12-15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue. But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (see Luke xviii. 10; Acts iii. 1); and those who were absent were wont to “open their windows towards Jerusalem,” and pray “towards” the place of God's Presence (1 K. vii. 46-49; Dan. vi. 10; Ps. v. 7, xxvii. 2, cxxviii. 2). The regular hours of prayer seem to have been three (see Ps. lv. 17; Dan. vi. 10), “the evening,” that is, the ninth hour (Acts iii. 1, x. 3), the hour of the evening sacrifice (Dan. ix. 21); the “morning,” that is, the third hour (Acts ii. 15), that of the morning sacrifice; and the sixth hour, or “noonday.” Grace before meat would seem to have been a common practice (see Matt. xv. 36; Acts xxvii. 35). The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Matt. vi. 5; Mark xi. 25; Luke xviii. 11); unless the prayer were offered with especial solemnity, and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; comp. 2 Chr. vi. 13; Ezr. ix. 5; Ps. xcv. 6; Dan. vi. 10); or prostration (Josh. vii. 6; 1 K. xviii. 42; Neh. viii. 6). (3.) The only Form of Prayer given for perpetual use in the O. T. is the one in Deut. xxvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this may perhaps be added the threefold blessing of Num. vi. 24-26, couched as it is in a precatory form; and the short prayer of Moses (Num. x. 35, 36) at the moving and resting of the cloud, the former of which was the germ of the 68th Psalm. But of the prayers recorded in the O. T., the two most remarkable are

those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and of Joshua the high-priest, and his colleagues, after the captivity (Neh. ix. 5-38). It is clear that both are likely to have exercised a strong liturgical influence. It appears from the question of the disciples in Luke xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning. All Christian prayer is, of course, based on the Lord's Prayer; but its spirit is also guided by that of His prayer in Gethsemane, and of the prayer recorded by St. John (ch. xvii.), the beginning of His great work of intercession. The influence of these prayers is more distinctly traced in the prayers contained in the Epistles (see Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 3-11; Col. i. 9-15; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer probably in the first instance took much of its form and style from the prayers of the synagogues. In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of His dispensation to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life. In the Mosaic period they assume a more solemn tone and a national bearing; chiefly that of direct intercession for the chosen people. More rarely are they for individuals. A special class are those which precede and refer to the exercise of miraculous power. In the New Testament they have a more directly spiritual bearing. It would seem the intention of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects.

Presents. [GIFTS.]

President. *Sârac*, or *Sârêcâ*, only used Dan. vi., the Chaldean equivalent for Hebrew *Shôlêr*, probably from *Sara*, Zend, a "head."

Priest (Heb. *côhên*). It is unfortunate that there is nothing like a *consensus* of interpreters as to the etymology of this word. Its root-meaning, uncertain as far as Hebrew itself is concerned, is referred by Gesenius to the idea of prophecy. The *côhên* delivers a divine message, stands as a mediator between God and man, represents each to the other. This meaning, however, belongs to the Arabic, not to the Hebrew form, and Ewald connects the latter with the verb *hâcîn*, to array, put in order. According to Naalschütz, the primary meaning of the word = minister, and he thus accounts for the wider application of the name. Bähr connects it with an Arabic root, = to draw near. Of these etymologies, the last has the merit of answering most closely to the received usage of the word. In some remarkable passages it takes a wider range. It is applied to the priests of other nations or religions, to Melchizedek (Gen. xiv. 18), Potipharah (Gen. xli. 45), Jethro (Ex. ii. 16), to those who discharged priestly functions in Israel before the appointment of Aaron and his sons (Ex. xix. 22). A case of greater difficulty presents itself in 2 Sam. viii. 18, where the sons of David are described as "priests." The received explanation is, that the word is used here in what is assumed to be its earlier and wider meaning, as equivalent to rulers. Ewald sees in it an actual suspension of the usual law in favour of members of the royal house. De Wette and Gesenius, in like manner,

look on it as a revival of the old household priest-hoods. A conjecture midway between these two extremes is perhaps permissible. David and his sons may have been admitted, not to distinctively priestly acts, such as burning incense (Num. xvi. 40; 2 Chr. xxvi. 18), but to an honorary, titular priesthood.—*Origén*.—The idea of a priesthood connects itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare not approach it. They crave for the intervention of some one of whom they can think as likely to be more acceptable than themselves. He must offer up their prayers, thanksgivings, sacrifices. He becomes their representative in "things pertaining unto God." He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Once, and once only, does the word *côhên* meet us as belonging to a ritual earlier than the time of Abraham. Melchizedek is "the priest of the most high God" (Gen. xiv. 18). In the worship of the patriarchs themselves, the chief of the family, as such, acted as the priest. The office descended with the birthright, and might apparently be transferred with it. In Egypt the Israelites came into contact with a priesthood of another kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On—a priest, as we may infer from her name, of the goddess Neith—(Gen. xli. 45), the special favour which he showed to the priestly caste in the years of famine (Gen. xlvii. 26), the training of Moses in the palace of the Pharaohs, probably in the colleges and temples of the priests (Acts vii. 22)—all this must have impressed the constitution, the dress, the outward form of life upon the minds of the lawgiver and his contemporaries. There is scarcely any room for doubt that a connexion of some kind existed between the Egyptian priesthood and that of Israel. The latter was not indeed an outgrowth or imitation of the former. The symbolism of the one was cosmic, "of the earth, earthy," that of the other, chiefly, if not altogether, ethical and spiritual. At the time of the Exodus there was as yet no priestly caste. The continuance of solemn sacrifices (Ex. v. 1, 3) implied, of course, a priesthood of some kind, and priests appear as a recognized body before the promulgation of the Law on Sinai (Ex. xix. 22). There are signs that the priests of the older ritual were already dealt with as belonging to an obsolescent system. Though they were known as those that "come near" to the Lord (Ex. xix. 22), yet they are not permitted to approach the Divine Presence on Sinai. It is noticeable also that at this transition-stage, when the old order was passing away, and the new was not yet established, there is the proclamation of the truth, wider and higher than both, that the whole people was to be "a kingdom of priests" (Ex. xix. 6). The idea of the life of the nation was, that it was to be as a priest and a prophet to the rest of mankind.—*Consecration*.—The functions of the HIGH-PRIEST, the position and history of the LEVITES as the consecrated tribe, have been discussed fully under those heads. It remains to notice the characteristic facts connected with "the priests, the sons of Aaron," as standing between the tr.

Solemn as was the subsequent dedication of the LEVITES, that of the priests involved a yet higher consecration. A special word (*kaddash*) was appropriated to it. The ceremony is described in Ex. xxix., Lev. viii. The whole of this mysterious ritual was to be repeated for seven days, during which the priests remained within the Tabernacle, separated from the people, and not till then was the consecration perfect. The consecrated character thus imparted did not need renewing. It was a perpetual inheritance transmitted from father to son through all the centuries that followed.—*Dress*.—The “sons of Aaron” thus dedicated were to wear during their ministrations a special apparel—at other times apparently they wore the common dress of the people. The material was linen, but that word included probably, as in the case of the Egyptian priests, the byssus, and the cotton stuffs of that country (Ex. xxviii. 42; comp. COTTON). Linen drawers from the loins to the thighs were “to cover their nakedness.” Over the drawers was worn the *cethbenth*, or close-fitting cassock, also of fine linen, white, but with a diamond or chess-board pattern on it. This came nearly to the feet, and was to be worn in its garment shape (comp. John xix. 23). The white cassock was gathered round the body with a girdle of needlework, into which, as in the more gorgeous belt of the high-priest, blue, purple, and scarlet, were intermingled with white, and worked in the form of flowers (Ex. xxviii. 39, 40, xxxix. 2; Ezek. xlv. 17-19).

Dress of Egyptian High-Priest.

Upon their heads they were to wear caps or bonnets in the form of a cup-shaped flower, also of fine linen. They had besides other “clothes of service,” which were probably simpler, but are not described (Ex. xxxi. 10; Ez. xlii. 14). In all their acts of ministration they were to be bare-footed. In the earlier liturgical costume the ephod is mentioned as belonging to the high-priest only (Ex. xxviii. 6-12, xxxix. 2-5).—*Regulations*.—The idea of a consecrated life, which was thus asserted at the outset, was curbed through a multitude of details. Each probably had a symbolic meaning of its own. Before they entered the tabernacle they were to wash their hands and their feet (Ex. xxx. 17-21, xl. 30-32). During the time of their ministration they were to drink no wine or strong drink (Lev. x. 9;

Ez. xlv. 21). Their function was to be more to them than the ties of friendship or of blood, and, except in the case of the nearest relationships (six degrees are specified, Lev. xxi. 1-5; Ez. xlv. 25), they were to make no mourning for the dead. They were not to shave their heads. They were to go through their ministrations with the serenity of a reverential awe, not with the orgiastic wildness which led the priests of Baal in their despair to make cuttings in their flesh (Lev. xix. 28; 1 K. xviii. 28), and carried those of whom Atya was a type to a more terrible mutilation (Deut. xxiii. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be one who, as the representative of other men, was to be physically as well as liturgically perfect. The marriages of the sons of Aaron were hedged round with special rules. There is indeed no evidence for what has sometimes been asserted, that either the high-priest or the other sons of Aaron were limited in their choice to the women of their own tribe, and we have some distinct instances to the contrary. It is probable, however, that the priestly families frequently intermarried, and it is certain that they were forbidden to marry an unchaste woman, or one who had been divorced, or the widow of any but a priest (Lev. xxi. 7, 14; Ezek. xlv. 22). The prohibition of marriage with one of an alien race was assumed, though not enacted in the law. The age at which the sons of Aaron might enter upon their duties was not defined by the law, as that of the Levites was. The boy Aristobulus at the age of seventeen ministered in the Temple in his pontifical robes, the admired of all observers, and thus stirred the treacherous jealousy of Herod to remove so dangerous a rival (Joseph. Ant. xv. 3, §3). This may have been exceptional, but the language of the rabbis indicates that the special consecration of the priest's life began with the opening years of manhood.—*Functions*.—The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles, as those which the prophet-priest Ezekiel sees in his vision of the Temple of the future. They, assisting the high-priest, were to watch over the fire on the altar of burnt-offerings, and to keep it burning evermore both by day and night (Lev. vi. 12; 2 Chr. xlii. 11), to feed the golden lamp outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices, each accompanied with a meat-offering and a drink-offering, at the door of the tabernacle (Ex. xxix. 38-44). These were the fixed, invariable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent, or rejoicing Israelite. The worshipper might come at any time. Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. They were to teach the children of Israel the statutes of the Lord (Lev. x. 11; Deut. xxxiii. 10; 2 Chr. xv. 3; Ezek. xlv. 23, 24). The “priest's lips” (in the language of the last prophet looking back upon the ideal of the order) were to “keep knowledge” (Mal. ii. 7). Through the whole history, with the exception of the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on

Int. The three great festivals of the year were, however, their seasons of busiest employment. Other acts of the priests of Israel, significant as they were, were less distinctively sacerdotal. They were to bless the people at every solemn meeting (Num. vi. 22-27). During the journeys in the wilderness it belonged to them to cover the ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (Num. iv. 5-15). As the people started on each day's march they were to blow "an alarm" with long silver trumpets (Num. x. 1-8). Other instruments of music might be used by the more highly-trained Levites and the schools of the prophets, but the trumpets belonged only to the priests. The presence of the priests on the field of battle (1 Chr. xii. 23, 27; 2 Chr. xx. 21, 22) led, in the later periods of Jewish history, to the special appointment at such times of a war-priest. Other functions were hinted at in Deuteronomy which might have given them greater influence as the educators and civilizers of the people. They were to act (whether individually or collectively does not distinctly appear) as a court of appeal in the more difficult controversies in criminal or civil cases (Deut. xvii. 8-13). It must remain doubtful, however, how far this order kept its ground during the storms and changes that followed. — **Maintenance.** — Functions such as these were clearly incompatible with the common activities of men. On these grounds therefore a distinct provision was made for them. This consisted—(1) of one-tenth of the tithes which the people paid to the Levites, one per cent. *i. e.* on the whole produce of the country (Num. xviii. 26-28). (2) Of a special tithe every third year (Deut. xiv. 28, xxvi. 12). (3) Of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xviii. 14-19). (4) Of the redemption-money paid in like manner for men or things specially dedicated to the Lord (Lev. xxvii.). (5) Of spoil, captives, cattle, and the like, taken in war (Num. xxi. 25-47). (6) Of the shew-bread, the flesh of the burnt-offerings, peace-offerings, trespass-offerings (Num. xviii. 8-14; Lev. vi. 26, 29, vii. 6-10), and, in particular, the heave-shoulder and the wave-breast (Lev. x. 12-15). (7) Of an undefined amount of the first-fruits of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xxvi. 1-10). Of some of these, as "most holy," none but the priests were to partake (Lev. vi. 29). It was lawful for their sons and daughters (Lev. x. 14), and even in some cases for their home-born slaves, to eat of others (Lev. xxii. 11). The stranger and the hired servant were in all cases excluded (Lev. xxii. 10). (8) On their settlement in Canaan the priestly families had thirteen cities assigned them, with "suburbs" or pasture-grounds for their flocks (Josh. xxi. 13-19). These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper-priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. The standard of a priest's income, even in the earliest days after the settlement in Canaan, was miserably low (Judg. xvii. 10). — **Classification and Statistics.** — The earliest historical trace of any division of the priesthood, and corresponding cycle of services, belongs to the time of David. Jewish tradition indeed recognizes an earlier division, even during the life of Aaron, into eight

houses, augmented during the period of the Shiloh-worship to sixteen, the two families of Eleazar and Ithamar standing in both cases on an equality. To the reign of David belonged the division of the priesthood into the four-and-twenty "courses" or orders (1 Chr. xxiv. 1-19; 2 Chr. xxiii. 8; Luke i. 5), each of which was to serve in rotation for one week, while the further assignment of special services during the week was determined by lot (Luke i. 9). Each course appears to have commenced its work on the Sabbath, the outgoing priests taking the morning sacrifice, and leaving that of the evening to their successors (2 Chr. xxiii. 8). In this division, however, the two great priestly houses did not stand on an equality. The descendants of Ithamar were found to have fewer representatives than those of Eleazar, and sixteen courses accordingly were assigned to the latter, eight only to the former (1 Chr. xxiv. 4). The division thus instituted was confirmed by Solomon, and continued to be recognized as the typical number of the priesthood. On the return from the Captivity there were found but four courses out of the twenty-four, each containing, in round numbers, about a thousand (Ezr. ii. 36-39). Out of these, however, to revive at least the idea of the old organization, the four-and-twenty courses were reconstituted, bearing the same names as before, and so continued till the destruction of Jerusalem. If we may accept the numbers given by Jewish writers as at all trustworthy, the proportion of the priesthood to the population of Palestine, during the last century of their existence as an order, must have been far greater than that of the clergy has ever been in any Christian nation. Over and above those that were scattered in the country and took their turn, there were not fewer than 24,000 stationed permanently at Jerusalem, and 12,000 at Jericho. It was almost inevitable that the great mass of the order, under such circumstances, should sink in character and reputation. The Rabbinic classification of the priesthood, though belonging to a somewhat later date, reflects the contempt into which the order had fallen. There were—(1) the heads of the twenty-four courses, known sometimes as ἀρχιερεῖς; (2) the large number of reputable officiating but inferior priests; (3) the *plebeii*, or (to use the extreme formula of Rabbinic scorn) the "priests of the people of the earth," ignorant and unlettered; (4) those that, through physical disqualifications or other causes, were non-efficient members of the order, though entitled to receive their tithes. — **History.** — The new priesthood did not establish itself without a struggle. The rebellion of Korah, at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new. Prominent as was the part taken by the priests in the daily march of the host of Israel (Num. x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (Josh. vi. 12-16), the history of Micah shows that within that century there was a strong tendency to relapse into the system of a household instead of an hereditary priesthood (Judg. xvii.). The frequent invasions and conquests during the period of the Judges must have interfered with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influ-

ance of the priesthood must have been kept in the background. For a time the prerogative of the line of Aaron was in abeyance. The capture of the Ark, the removal of the Tabernacle from Shiloh, threw everything into confusion, and Samuel, a Levite, but not within the priestly family, sacrifices, and "comes near" to the Lord: his training under Eli, his Nazarite life, his prophetic office, being regarded apparently as a special consecration. Though Shiloh had become a deserted sanctuary, Nob (1 Sam. xxi. 1) was made for a time the centre of national worship, and the symbolic ritual of Israel was thus kept from being forgotten. The reign of Saul was, however, a time of suffering for them. He had manifested a disposition to usurp the priest's office (1 Sam. xiii. 9). The massacre of the priests at Nob showed how insecure their lives were against any unguarded or savage impulse. They could but wait in silence for the coming of a deliverer in David. When the death of Saul set them free they came in large numbers to the camp of David, prepared apparently not only to testify their allegiance, but also to support him, armed for battle, against all rivals (1 Chr. xii. 27). They were summoned from their cities to the great restoration of the worship of Israel, when the Ark was brought up to the new capital of the kingdom (1 Chr. xv. 4). For a time, however, the older order of sacrifices was carried on by the priests in the tabernacle on the high-place at Gibeon (1 Chr. xvi. 37-39, xxi. 29; 2 Chr. i. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incidental to this separation of the two orders, and to unite in one great Temple priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise. The reigns of these two kings were naturally the culminating period of the glory of the Jewish priesthood. The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system which has been described above gave them for every week of service in the Temple twenty-three weeks in which they had no appointed work. To what employment could they turn? (1) The more devout and thoughtful found, probably, in the schools of the prophets that which satisfied them. They became teaching priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. (2) Some perhaps served in the king's army. (3) A few chosen ones might enter more deeply into the divine life, and so receive, like Zechariah, Jeremiah, Ezekiel, a special call to the office of a prophet. (4) We can hardly escape the conclusion that many did their work in the Temple of Jehovah with a divided allegiance, and acted at other times as priests of the high-places. Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as ever the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, lvi. 10-12). The prophetic order, instead of acting as a check, became sharers in the corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). The discipline of the Captivity, however, was not without its fruits. A large proportion of the priests had either perished or were content to remain in the land of their exile, but those who did return were active in the work of restoration. No great changes affected the outward position of the priests under the Persian go-

vernment. Both the Persian government and Alexander had respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ezr. vi. 8, 9, vii. 24). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Ecclus. i. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which, under the priestly Maccabees, they were the chief defenders of their country's freedom. Some, indeed, at that crisis, were found among the apostates. The majority, however, were true-hearted. It will be interesting to bring together the few facts that indicate their position in the N. T. period of their history. The division into four-and-twenty courses is still maintained (Luke i. 5), and the heads of these courses, together with those who have held the high-priesthood (the office no longer lasting for life), are "chief priests" by courtesy, and take their place in the Sanhedrim. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant. The priestly order, like the nation, was divided between contending sects. The influence of Hyrcanus, himself in the latter part of his life a Sadducee, had probably made the tenets of that party popular among the wealthier and more powerful members; and the chief priests of the Gospels and the Acts, the whole ἀρχιερατικὸν γένος (Acts iv. 1, 6, v. 17), were apparently consistent Sadducees. The great multitude, on the other hand, who received that testimony (Acts vi. 7) must have been free from, or must have overcome, Sadducean prejudices. In the scenes of the last tragedy of Jewish history the order passes away, without honour, "dying as a fool dieth." The high-priesthood is given to the lowest and vilest of the adherents of the frenzied Zealots. Other priests appear as deserting to the enemy. The destruction of Jerusalem deprived the order at one blow of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. The influence of the Rabbis increased with the fall of the priesthood. The language of the N. T. writers in relation to the priesthood ought not to be passed over. They recognize in Christ, the first-born, the king, the Anointed, the representative of the true primeval priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a deflection. But there is no trace of an order in the new Christian society, bearing the name and exercising functions like those of the priests of the older Covenant. The idea which pervades the teaching of the Epistles is that of an universal priesthood. It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church.

Prince, Princesses. The only special uses of the word "prince" are—1. "Princes of provinces" (1 K. xx. 14), who were probably local governors or magistrates. 2. The "princes" mentioned in Dan. vi. 1 (see Esth. i. 1) were the predecessors of the satraps of Darius Hystaspis.

Prin'ca (2 Tim. iv. 19). [PRIBOILIA.]

Priscilla. To what has been said elsewhere under the head of **AQUILA** the following may be added. The name is *Prisca* in 2 Tim. iv. 19, and (according to the true reading) in Rom. xvi. 3, and also (according to some of the best MSS.) in 1 Cor. xvi. 19. Such variation in a Roman name is by no means unusual. We find that the name of the wife is placed before that of the husband in Rom. xvi. 3, 2 Tim. iv. 19, and (according to some of the best MSS.) in Acts xviii. 26. It is only in Acts xviii. 2, and 1 Cor. xvi. 19, that Aquila has unequivocally the first place. Hence we should be disposed to conclude that Priscilla was the more energetic character of the two. Yet we observe that the husband and the wife are always mentioned together. In fact we may say that Priscilla is the example of what the married woman may do for the general service of the Church, in conjunction with home duties, as **PHOEBE** is the type of the unmarried servant of the Church, or deaconess.

Prison. For imprisonment as a punishment, see **PUNISHMENTS**. In Egypt it is plain both that special places were used as prisons, and that they were under the custody of a military officer (Gen. xl. 3, xlii. 17). During the wandering in the desert we read on two occasions of confinement "in ward" (Lev. xxiv. 12; Num. xv. 34); but as imprisonment was not directed by the law, so we hear of none till the time of the kings, when the prison appears as an appendage to the palace, or a special part of it (1 K. xxii. 27). Later still it is distinctly described as being in the king's house (Jer. xxxii. 2, xxxvii. 21; Neh. iii. 25). This was the case also at Babylon (2 K. xxv. 27). But private houses were sometimes used as places of confinement (Jer. xxxvii. 15). Public prisons other than these, though in use by the Canaanitish nations (Judg. xvi. 21, 25), were unknown in Judaea previous to the Captivity. Under the Herods we hear again of royal prisons attached to the palace, or in royal fortresses (Luke iii. 20; Acts xii. 4, 10). By the Romans Antonia was used as a prison at Jerusalem (Acts xxiii. 10), and at Caesarea the praetorium of Herod (ib. 35).

Prochorus, one of the seven deacons, being the third on the list, and named next after Stephen and Philip (Acts vi. 5).

Proconsul. The Greek *ἀνθύπατος*, for which this is the true equivalent, is rendered uniformly "deputy" in the A. V. of Acts xiii. 7, 8, 12, xix. 38; and the derived verb *ἀνθυπατεύω* in Acts xviii. 12, is translated "to be deputy." At the division of the Roman provinces by Augustus, in the year B.C. 27, into Senatorial and Imperial, the emperor assigned to the senate such portions of territory as were peaceable, and could be held without force of arms (Suet. Oct. 47; Strabo, xvii. p. 840; Dio Cass. liii. 12), an arrangement which remained with frequent alterations till the 3rd century. Over these senatorial provinces the senate appointed by lot yearly an officer, who was called "proconsul" (Dio Cass. liii. 13), and who exercised purely civil functions. The provinces were in consequence called "proconsular." Among the senatorial provinces in the first arrangement by Augustus, were Cyprus, Achaia, and Asia within the Halys and Taurus (Strabo, xvii. p. 840). Achaia became an imperial province in the second year of Tiberius, A.D. 16, and was governed by a procurator (Tac. Ann. i. 76), but was restored to the Senate by Claudius (Suet. Claud. 25), and therefore Gallio, before whom St. Paul was brought, C.C.N. D. B.

is rightly termed "proconsul" in Acts xviii. 12. Cyprus also, after the battle of Actium, was first made an imperial province (Dio Cass. liii. 12), but five years afterwards (B.C. 22) it was given to the senate.

Procurator. The Greek *πρωτοῦ*, rendered "governor" in the A. V., is applied in the N. T. to the officer who presided over the imperial province of Judaea. It is used of Pontius Pilate (Matt. xxvii.), of Felix (Acts xxiii. xxiv.), and of Festus (Acts xxvi. 30). In all these cases the Vulgate equivalent is *praeses*. The office of procurator is mentioned in Luke iii. 1. It is explained, under the head of **PROCONSUL**, that after the battle of Actium (B.C. 27) the provinces of the Roman empire were divided by Augustus into two portions, giving some to the senate, and reserving to himself the rest. The imperial provinces were administered by legates, called *legati Augusti pro praetore*, sometimes with the addition of *consulari potestate*, and sometimes *legati consulares*, or *legati* or *consulares* alone. These officers were also called *praesides*. No quaestor came into the emperor's provinces, but the property and revenues of the imperial treasury were administered by the *Rationales*, *Procuratores* and *Actores* of the emperor, who were chosen from among his freedmen, or from among the knights (Tac. Hist. v. 9; Dio Cass. liii. 15). These procurators were sent both to the imperial and to the senatorial provinces (Dio Cass. liii. 15). Sometimes a province was governed by a procurator with the functions of a praeses. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judaea stood to Syria. The head-quarters of the procurator were at Caesarea (Acts xxiii. 23), where he had a judgment-seat (Acts xxv. 6) in the audience chamber (Acts xxv. 23), and was assisted by a council (Acts xxv. 12) whom he consulted in cases of difficulty. In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius Pilate as a political offender (Matt. xxvii. 2, 11), and the accusation is heard by the procurator, who is seated on the judgment-seat (Matt. xxvii. 19). Felix heard St. Paul's accusation and defence from the judgment-seat at Caesarea (Acts xxiv.); and St. Paul calls him "judge" (Acts xxiv. 10), as if this term described his chief functions. The procurator is again alluded to in his judicial capacity in 1 Pet. ii. 14. He was attended by a cohort as body-guard (Matt. xxvii. 27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod, in which was the *praetorium*, or "judgment-hall," as it is rendered in the A. V. (Matt. xxvii. 27; Mark xv. 16; comp. Acts xxiii. 35).

Prophet. I. THE NAME.—The ordinary Hebrew word for prophet is *nabî*, derived from the verb *nabâ*, connected by Gesenius with *nab'â*, "to bubble forth," like a fountain. If this etymology is correct, the substantive would signify either a person who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence (cf. Ps. xiv. 1), or simply one who pours forth words. Bunsen and Davidson suppose *Nabî* to signify the man to whom announcements are made by God, i. e. inspired. But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God. Two other Hebrew words are used to designate a prophet, *Rôph*, and *Chôph*,

both signifying *one who sees*. They are rendered in the A. V. by "seer." The three words seem to be contrasted with each other in 1 Chron. xxix. 29. *Rôeh* is a title almost appropriated to Samuel. It was superseded in general use by the word *Nâbi*. *Chôzeh* is rarely found except in the Books of the Chronicles. Whether there is any difference in the usage of these three words, and, if any, what that difference is, has been much debated. On the whole it would seem that the same persons are designated by the three words *Nâbi*, *Rôeh*, *Chôzeh*. The word *Nâbi* is uniformly translated in the LXX. by *προφήτης*, and in the A. V. by "prophet." In classical Greek, *προφήτης* signifies *one who speaks for another*, specially *one who speaks for a god* and so interprets his will to man. Hence its essential meaning is "an interpreter." The use of the word *προφήτης* in its modern sense is post-classical, and is derived from the LXX. From the mediæval use of the word *προφητεία*, *prophecy* passed into the English language in the sense of *prediction*, and this sense it has retained as its popular meaning. The larger sense of *interpretation* has not, however, been lost. In fact the English word prophet, like the word inspiration, has always been used in a larger and in a closer sense. The different meanings, or shades of meaning, in which the abstract noun is employed in Scripture, have been drawn out by Locke as follows:—"Prophecy comprehends three things: prediction; singing by the dictate of the Spirit; and understanding and explaining the mysterious, hidden sense of Scripture, by an immediate illumination and motion of the Spirit" (*Paraphrase* of 1 Cor. xii. note, p. 121, Lond. 1742). Etymologically, however, it is certain that neither prescience nor prediction are implied by the term used in the Hebrew, Greek, or English language.—II. PROPHETICAL ORDER.—The sacerdotal order was originally the instrument by which the members of the Jewish Theocracy were taught and governed in things spiritual. Teaching by act and teaching by word were alike their task. But during the time of the Judges, the priesthood sank into a state of degeneracy, and the people were no longer affected by the acted lessons of the ceremonial service. They required less enigmatic warnings and exhortations. Under these circumstances a new moral power was evoked—the Prophetic Order. Samuel, himself a Levite, of the family of Kohath (1 Chr. vi. 28), and almost certainly a priest, was the instrument used at once for effecting a reform in the sacerdotal order (1 Chr. ix. 22), and for giving to the prophets a position of importance which they had never before held. Nevertheless, it is not to be supposed that Samuel created the prophetic order as a new thing before unknown. The germs both of the prophetic and of the regal order are found in the Law as given to the Israelites by Moses (Deut. xiii. 1, xviii. 20, xvii. 18), but they were not yet developed, because there was not yet the demand for them. Samuel took measures to make his work of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or Colleges of Prophets. One we find in his lifetime at Ramah (1 Sam. xix. 19, 20); others afterwards at Bethel (2 K. ii. 3), Jericho (2 K. ii. 5), Gilgal (2 K. iv. 38), and elsewhere (2 K. vi. 1). Their constitution and object were similar to those of Theological Colleges. Into them were gathered promising students, and here they were trained for the office which they were after-

wards destined to fulfil. So successful were these institutions, that from the time of Samuel to the closing of the Canon of the Old Testament, there seems never to have been wanting a due supply of men to keep up the line of official prophets. Their chief subject of study was, no doubt, the Law and its interpretation; oral, as distinct from symbolical, teaching being henceforward tacitly transferred from the priestly to the prophetic order. Subsidiary subjects of instruction were music and sacred poetry, both of which had been connected with prophecy from the time of Moses (Ex. xv. 20) and the Judges (Judg. iv. 4, v. 1).—III. THE PROPHETIC GIFT.—We have been speaking of the *Prophetic Order*. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. The sixteen prophets whose books are in the Canon have therefore that place of honour, because they were endowed with the *prophetic gift* as well as ordinarily (so far as we know) belonging to the *prophetic order*. What then are the characteristics of the sixteen prophets, thus called and commissioned, and entrusted with the messages of God to His people? (1.) They were the national poets of Judæa. (2.) They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, of Jonah, of Haggai, is direct or indirect history. (3.) They were preachers of patriotism; their patriotism being founded on the religious motive. (4.) They were preachers of morals and of spiritual religion. The system of morals put forward by the prophets is not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, vehemence of diction. (5.) They were extraordinary, but yet authorized, exponents of the Law. (6.) They held a pastoral or quasi-pastoral office. (7.) They were a political power in the state. (8.) But the prophets were something more than national poets and annalists, preachers of patriotism, moral teachers, exponents of the Law, pastors, and politicians. We have not yet touched upon their most essential characteristic, which is, that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord Jesus Christ, and the redemption effected by Him. There are two chief ways of exhibiting this fact: one is suitable when discoursing with Christians, the other when arguing with unbelievers. To the Christian it is enough to show that the truth of the New Testament and the truthfulness of its authors, and of the Lord Himself, are bound up with the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions. The fulfilment of a single prophecy does not prove the prophetic power of the prophet, but the fulfilment of a long series of prophecies by a series or number of events does in itself constitute a proof that the prophecies were intended to predict the events, and, consequently, that predictive power resided in the prophet or prophets. Now the Messianic picture drawn by the prophets as a body contains at least as many traits as these:—That salvation should come through the family of Abraham, Isaac, Jacob, Judah, David; that at the time of the final absorption of the Jewish power, Shiloh (the tranquilliser),

should gather the nations under his rule: that there should be a great Prophet, typified by Moses; a King descended from David; a Priest for ever, typified by Melchisedek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all: that Messiah the Prince should be cut off, but not for himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. We may say that we have here a series of prophecies which are so applicable to the person and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. • And if they were designed to apply to Him, prophetic prediction is proved. Objections have been urged:—1. *Vagueness*.—It has been said that the prophecies are too darkly and vaguely worded to be proved predictive by the events which they are alleged to foretell. But to this might be answered.—1. That God never forces men to believe, but that there is such an union of definiteness and vagueness in the prophecies as to enable those who are willing to discover the truth, while the wilfully blind are not forcibly constrained to see it. 2. That, had the prophecies been couched in the form of direct declarations, their fulfilment would have thereby been rendered impossible, or, at least, capable of frustration. 3. That the effect of prophecy would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. 4. That the Messiah of Revelation could not be so clearly portrayed in his varied character as God and Man, as Prophet, Priest, and King, if he had been the mere “teacher.” 5. That the state of the Prophets, at the time of receiving the Divine revelation, was such as necessarily to make their predictions fragmentary, figurative, and abstracted from the relations of time. 6. That some portions of the prophecies were intended to be of double application, and some portions to be understood only on their fulfilment (cf. John xiv. 29; Ez. xxxvi. 33). —2. *Obscurity of a part or parts of a prophecy otherwise clear*.—The objection drawn from “the unintelligibility of one part of the prophecy, as invalidating the proof of foresight arising from the evident completion of those parts which are understood” is akin to that drawn from the vagueness of the whole of it.—3. *Application of the several prophecies to a more immediate subject*.—It has been the task of many Biblical critics to examine the different passages which are alleged to be predictions of Christ, and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. Let it be granted that it may be proved of all the predictions of the Messiah—it certainly may be proved of many—that they primarily apply to some historical and present fact: in that case a certain law, under which God vouchsafes his prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. Whether it can be proved by an investigation of Holy Scripture, that this relation between Divine announcements for the future and certain present events does so exist as to constitute a law, and whether, if the law is proved to exist, it is of universal, or only of partial application, we do not pause to determine. But it is manifest that the

existence of a primary sense cannot exclude the possibility of a secondary sense.—4. *Miraculous character*.—There is no question that if miracles are, either physically or morally, impossible, then prediction is impossible.—IV. THE PROPHETIC STATE.—We learn from Holy Scripture that it was by the agency of the Spirit of God that the prophets received the Divine communication (Num. xi. 17, 25, 29; 1 Sam. x. 6, xix. 20; 2 Pet. i. 21; Jer. xxiii. 16; Ez. xiii. 2, 3). The prophet held an intermediate position in communication between God and man. God communicated with him by His Spirit, and he, having received this communication, was “the spokesman” of God to man (cf. Ex. vii. 1, and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly declared to us. They are, however, indicated. In Num. xii. 6-8 we have an exhaustive division of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation, “I will speak mouth to mouth, apparently, and the similitude of the Lord shall he behold.” 2. Vision. 3. Dream. According to the theory of Philo and the Alexandrian school, the prophet was in a state of entire unconsciousness at the time that he was under the influence of Divine inspiration. This theory identifies Jewish prophecy in all essential points with the heathen *μαντική*, or divination, as distinct from *προφητεία*, or interpretation. According to the belief of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the enunciation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great unanimity. It does not seem possible to draw any very precise distinction between the prophetic “dream” and the prophetic “vision.” In the case of Abraham (Gen. xv. 1) and of Daniel (Dan. vii. 1), they seem to melt into each other. In both, the external senses are at rest, reflection is quiescent, and intuition energizes. The action of the ordinary faculties is suspended in the one case by natural, in the other by supernatural or extraordinary causes. The prophetic trance must be acknowledged as a Scriptural account of the state in which the prophets and other inspired persons, sometimes, at least, received Divine revelations. It would seem to have been of the following nature. (1.) The bodily senses were closed to external objects as in deep sleep. (2.) The reflective and discursive faculty was still and inactive. (3.) The spiritual faculty was awakened to the highest state of energy. Hence it is that revelations in trances are described by the prophets as “seen” or “heard” by them, for the spiritual faculty energizes by immediate perception on the part of the inward sense, not by inference and thought. Hence it is, too, that the prophets’ visions are unconnected and fragmentary, inasmuch as they are not the subject of the reflective but of the perceptive faculty. Hence, too, the imagery with which the prophetic writings are coloured, and the dramatic cast in which they are moulded. But though it must be allowed that Scripture language seems to point out the state of dream and of trance, or ecstasy, as a condition in which the human instrument received the Divine communications, it does not follow that all the prophetic

revelations were thus made. The greater part of the Divine communications we may suppose to have been thus made to the prophets in their waking and ordinary state, while the visions were exhibited to them either in the state of sleep, or in the state of ecstasy. Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the "spokesmen" of God (Ex. vii. 1), the "mouth" by which His words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle, enlarging the understanding of the prophet so as to grasp the whole of the Divine counsels which he was gazing into, or which he was the instrument of enunciating.—V. INTERPRETATION OF PREDICTIVE PROPHECY.—We have only space for a few rules, deduced from the account which we have given of the nature of prophecy. They are, (1.) Interpose distances of time according as history may show them to be necessary with respect to the past, or inference may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2.) Distinguish the *form* from the *idea*. (3.) Distinguish in like manner figure from what is represented by it. (4.) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5.) In respect to things past, interpret by the apparent meaning, checked by reference to events: in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the examples of visions explained in the Old Testament. (7.) Interpret according to the principle which may be deduced from the examples of prophecies interpreted in the New Testament.—VI. USE OF PROPHECY.—Predictive prophecy is at once a part and an evidence of revelation: at the time that it is delivered, and until its fulfilment, a part; after it has been fulfilled, an evidence. St. Peter (Ep. 2. i. 19) describes it as "a light shining in a dark place," or "a taper glimmering where there is nothing to reflect its rays," that is, throwing some light, but only a feeble light as compared with what is shed from the Gospel history. But after fulfilment, St. Peter says, "the word of prophecy" becomes "more sure" than it was before; that is, it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith. As an evidence, fulfilled prophecy is as satisfactory as anything can be, for who can know the future except the Ruler who disposes future events; and from whom can come prediction except from Him who knows the future?—VII. DEVELOPMENT OF MESSIANIC PROPHECY.—Prediction, in the shape of promise and threatening, begins with the Book of Genesis. Immediately upon the Fall, hopes of recovery and salvation are held out, but the manner in which this salvation is to be effected is left altogether indefinite. All that is at first declared is that it shall come through a child of woman (Gen. iii. 15). By degrees the area is limited: it is to come through the family of Shem (Gen. ix. 26), through the family of Abraham (Gen. xii. 3) of Isaac (Gen. xxi. 18), of Jacob (Gen.

xxviii. 14), of Judah (Gen. xlix. 10). Balaam seems to say that it will be wrought by a warlike Israelitish King (Num. xxiv. 17); Jacob, by a peaceful Ruler of the earth (Gen. xlix. 10); Moses, by a Prophet like himself, *i. e.* a revealer of a new religious dispensation (Deut. xviii. 15). Nathan's announcement (2 Sam. vii. 16) determines further that the salvation is to come through the house of David, and through a descendant of David who shall be himself a king. This promise is developed by David himself in the Messianic Psalms. Pss. xviii. and lxi. are founded on the promise communicated by Nathan, and do not go beyond the announcement made by Nathan. The same may be said of Ps. lxxxix. which was composed by a later writer. Pss. ii. and cx. rest upon the same promise as their foundation, but add new features to it. The Son of David is to be the Son of God (ii. 7), the anointed of the Lord (ii. 2), not only the King of Zion (ii. 6, cx. 1), but the inheritor and lord of the whole earth (ii. 8, cx. 6), and besides this, a Priest for ever after the order of Melchisedek (cx. 4). At the same time he is, as typified by his progenitor, to be full of suffering and affliction (Pss. xxii., lxxi., cii., cix.); brought down to the grave, yet raised to life without seeing corruption (Ps. xvi.). In Ps. xlv., lxxii., the sons of Korah and Solomon describe his peaceful reign. Between Solomon and Hezekiah intervened some 200 years, during which the voice of prophecy was silent. The Messianic conception entertained at this time by the Jews might have been that of a King of the royal house of David who would arise, and gather under his peaceful sceptre his own people and strangers. Sufficient allusion to his prophetic and priestly offices had been made to create thoughtful consideration, but as yet there was no clear delineation of him in these characters. It was reserved for the Prophets to bring out these features more distinctly. In this great period of prophetism there is no longer any chronological development of Messianic Prophecy, as in the earlier period previous to Solomon. Each prophet adds a feature, one more, another less clearly: combine the features, and we have the portrait; but it does not grow gradually and perceptibly under the hands of the several artists. Its *culminating* point is found in the prophecy contained in Is. lii. 13-15, and liii.—VIII. PROPHETS OF THE NEW TESTAMENT.—So far as their predictive powers are concerned, the Old Testament prophets find their New Testament counterpart in the writer of the Apocalypse; but in their general character, as specially illumined revealers of God's will, their counterpart will rather be found, first in the Great Prophet of the Church, and his forerunner John the Baptist, and next in all those persons who were endowed with the extraordinary gifts of the Spirit in the Apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discerners of spirits, the teachers and workers of miracles (1 Cor. xii. 10, 28). That predictive powers did occasionally exist in the N. T. prophets is proved by the case of Agabus (Acts xi. 28), but this was not their characteristic. The prophets of the N. T. were supernaturally-illumined expounders and preachers.

Proselytes. The Hebrew word thus translated is in the A. V. commonly rendered "stranger" (Gen. xv. 13; Ex. ii. 22, Is. v. 17, &c.). In the N. T. the A. V. has taken the word in a more restricted meaning, and translated it accordingly

(Matt. xxiii. 15; Acts ii. 10, vi. 5). The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from its very nature, requires to be dealt with historically. It is proposed to consider the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself: viz. (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downwards.—I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighbouring races. The case of the Shechemites, however (Gen. xxxiv.), presents a more distinct instance. The sons of Jacob then, as afterwards, require circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the pre-Mosaic period.—II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of men of other races. The "mixed multitude" of Ex. xii. 38 implies the presence of proselytes more or less complete. It is recognised in the earliest rules for the celebration of the Passover (Ex. xii. 19). The laws clearly point to the position of a convert. Among the proselytes of this period the KENITES were probably the most conspicuous (Judg. i. 16). The presence of the class was recognised in the solemn declaration of blessings and curses from Ebal and Gerizim (Josh. viii. 33). The period after the conquest of Canaan was not favourable to the admission of proselytes. The people had no strong faith, no commanding position. The Gibeonites (Josh. ix.) furnish the only instance of a conversion, and their condition is rather that of slaves compelled to conform than of free proselytes.—III. With the monarchy, and the consequent fame and influence of the people, there was more to attract stragglers from the neighbouring nations, and we meet accordingly with many names which suggest the presence of men of another race conforming to the faith of Israel. The CHERETHITES and PELETHITES consisted probably of foreigners who had been attracted to the service of David, and were content for it to adopt the religion of their master. A convert of another kind, the type, as it has been thought, of the later proselytes of the gate is found in Naaman the Syrian (2 K. v. 15, 18) recognising Jehovah as his God, yet not binding himself to any rigorous observance of the Law. The position of the proselytes during this period appears to have undergone considerable changes. On the one hand men rose to power and fortune. It might well be a sign of the times in the later days of the monarchy that they became "very high," the "head" and not the "tail" of the people (Deut. xxviii. 43, 44). The picture had, however, another side. They were treated by David and Solomon as a subject-class, brought under a system of compulsory labour from which others were exempted (1 Chr. xxii. 2; 2 Chr. ii. 17, 18). The statistics of this period, taken probably for that purpose, give their number (probably, *i. e.* the number of adult working males) at 153,600 (ib.). As some compensation for their sufferings they became the special objects of the care and sympathy

of the prophets.—IV. The proselytism of the period after the captivity assumed a different character. It was for the most part the conformity, not of a subject race, but of willing adherents. Even as early as the return from Babylon we have traces of those who were drawn to a faith which they recognised as holier than their own. With the conquests of Alexander, the wars between Egypt and Syria, the struggle under the Maccabees, the expansion of the Roman empire, the Jews became more widely known and their power to proselytize increased. The influence was sometimes obtained well, and exercised for good. In most of the great cities of the empire, there were men who had been rescued from idolatry and its attendant debasements, and brought under the power of a higher moral law. The converts who were thus attracted, joined, with varying strictness, in the worship of the Jews. In Palestine itself the influence was often stronger and better. Even Roman centurions learnt to love the conquered nation, built synagogues for them (Luke vii. 5), fasted and prayed, and gave alms, after the pattern of the strictest Jews (Acts x. 2, 30), and became preachers of the new faith to the soldiers under them (ib. v. 7). Such men, drawn by what was best in Judaism, were naturally among the readiest receivers of the new truth which rose out of it, and became, in many cases, the nucleus of a Gentile Church. Proselytism had, however, its darker side. The Jews of Palestine were eager to spread their faith by the same weapons as those with which they had defended it. The Idumeans had the alternative offered them by John Hyrcanus of death, exile, or circumcision (Joseph. *Ant.* xiii. 9, §3). The Ituraeans were converted in the same way by Aristobulus (ib. xiii. 11, §3). Where force was not in their power, they obtained their ends by the most unscrupulous fraud. Those who were most active in proselytizing were precisely those from whose teaching all that was most true and living had departed. The vices of the Jew were engrafted on the vices of the heathen. The position of such proselytes was indeed every way pitiable. At Rome, and in other large cities, they became the butts of popular scurrility. At a later time, they were bound to make a public profession of their conversion, and to pay a special tax. Among the Jews themselves their case was not much better. For the most part the convert gained but little honour even from those who gloried in having brought him over to their sect and party. The popular Jewish feeling about them was like the popular Christian feeling about a converted Jew. The better Rabbis did their best to guard against these evils. Anxious to exclude all unworthy converts, they grouped them, according to their motives, with a somewhat quaint classification. (1.) Love-proselytes, where they were drawn by the hope of gaining the beloved one. (2.) Man-for-Woman, or Woman-for-Man proselytes, where the husband followed the religion of the wife, or conversely. (3.) Esther-proselytes, where conformity was assumed to escape danger, as in the original Purim (Esth. viii. 17). (4.) King's-table-proselytes, who were led by the hope of court favour and promotion, like the converts under David and Solomon. (5.) Lion-proselytes, where the conversion originated in a superstitious dread of a divine judgment, as with the Samaritans of 2 K. xvii. 26. None of these were regarded as fit for admission within the covenant.—V. The teachers who carried on the

Rabbinical succession consoled themselves, as they saw the new order waxing and their own glory waning, by developing the decaying system with an almost microscopic minuteness. The precepts of the Talmud may indicate the practices and opinions of the Jews from the 2nd to the 5th century. The points of interest which present themselves for inquiry are, (1.) The Classification of Proselytes. (2.) The ceremonies of their admission. The division which has been in part anticipated, was recognised by the Talmudic Rabbis, but received its full expansion at the hands of Maimonides. The term Proselytes of the Gate, was derived from the frequently occurring description in the Law, "the stranger that is within thy gates." To them were referred the greater part of the precepts of the Law as to the "stranger." Converts of this class were not bound by circumcision and the other special laws of the Mosaic code. It was enough for them to observe the seven precepts of Noah. The proselyte was not to claim the privileges of an Israelite, might not redeem his first-born, or pay the half-shekel. He was forbidden to study the Law under pain of death. The later Rabbis, when Jerusalem had passed into other hands, held that it was unlawful for him to reside within the holy city. In return they allowed him to offer whole burnt-offerings for the priest to sacrifice, and to contribute money to the Corban of the Temple. They held out to him the hope of a place in the paradise of the world to come. They insisted that the profession of his faith should be made solemnly in the presence of three witnesses. All this seems so full and precise, that we cannot wonder that it has led many writers to look on it as representing a reality. It remains doubtful, however, whether it was ever more than a paper scheme of what ought to be, disguising itself as having actually been. In contrast with these were the Proselytes of Righteousness, known also as Proselytes of the Covenant, perfect Israelites. Here also we must receive what we find with the same limitation as before. All seems at first clear and definite enough. The proselyte was first catechised as to his motives. If these were satisfactory, he was first instructed as to the Divine protection of the Jewish people, and then circumcised. Often the proselyte took a new name. All this, however, was not enough. The convert was still a "stranger." His children would be counted as bastards, *i. e.* aliens. Baptism was required to complete his admission. When the wound was healed, he was stripped of all his clothes, in the presence of the three witnesses who had acted as his teachers, and who now acted as his sponsors, the "fathers" of the proselyte, and led into the tank or pool. As he stood there, up to his neck in water, they repeated the great commandments of the Law. These he promised and vowed to keep, and then, with an accompanying benediction, he plunged under the water. The baptism was followed, as long as the Temple stood, by the offering or Corban. For women-proselytes, there were only baptism and the Corban, or, in later times, baptism by itself. It is obvious that this account suggests many questions of grave interest. Was this ritual observed as early as the commencement of the first century? If so, was the baptism of John, or that of the Christian Church in any way derived from, or connected with the baptism of proselytes? If not, was the latter in any way borrowed from the former? It will be enough to sum up the conclusions which seem fairly

to be drawn from them. (1.) There is no direct evidence of the practice being in use before the destruction of Jerusalem. (2.) The negative argument drawn from the silence of the O. T., of the Apocrypha, of Philo, and of Josephus, is almost decisive against the belief that there was in their time a baptism of proselytes, with as much importance attached to it as we find in the Talmudists. (3.) It remains probable, however, that there was a baptism in use at a period considerably earlier than that for which we have direct evidence. The symbol was in itself natural and fit. (4.) The history of the N. T. itself suggests the existence of such a custom. A sign is seldom chosen unless it already has a meaning for those to whom it is addressed. The fitness of the sign in this case would be in proportion to the associations already connected with it. (5.) It is, however, not improbable that there may have been a reflex action in this matter, from the Christian upon the Jewish Church. The Rabbis saw the new society in proportion as the Gentile element in it became predominant, throwing off circumcision, relying on baptism only. There was everything to lead them to give a fresh prominence to what had been before subordinate. Two facts of some interest remain to be noticed. (1.) It formed part of the Rabbinic hopes of the kingdom of the Messiah that then there should be no more proselytes. (2.) Partly, perhaps, as connected with this feeling, partly in consequence of the ill-repute into which the word had fallen, there is, throughout the N. T. a sedulous avoidance of it.

Proverbs, Book of. 1. *Title.*—The title of this book in Hebrew is, as usual, taken from the first word, *mishlê*, or, more fully, *mishlê Shlômôh*, and is in this case appropriate to the contents. By this name it is commonly known.

significance of the Hebrew title may here be appropriately discussed. *Māshāl*, rendered in the A. V. by-word, "parable," "proverb," expresses all and even more than is conveyed by these its English representatives. It is derived from a root, *māshal*, "to be like," and the primary idea involved in it is that of likeness, comparison. Probably all proverbial sayings were at first of the nature of similes, but the term *māshāl* soon acquired a more extended significance. It was applied to denote such short, pointed sayings as do not involve a comparison directly, but still convey their meaning by the help of a figure, as in 1 Sam. x. 12, Ez. xii. 22, 23, xvii. 2, 3. From this stage of its application it passed to that of sententious maxims generally, as in Prov. i. 1, x. 1, xxv. 1, xxvi. 7, 9, Eccl. xii. 9, Job xiii. 12, many of which, however, still involve a comparison (Prov. xxv. 3, 11, 12, 13, 14, &c., xxvi. 1, 2, 3, &c.). Such comparisons are either expressed, or the things compared are placed side by side, and the comparison left for the hearer or reader to supply. Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence, but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs: others are found in Job xxvii., xxix. But the Book of Proverbs, according to the introductory verses which describe its character, contains, besides several varieties of the *māshāl*, sententious sayings of other kinds, mentioned in i. 6. The first of these is the *chidāh*, rendered in the A. V. "dark saying," "dark speech," "hard question," "riddle," and once (Hab. ii. 6) "proverb." The word ap-

pears to denote a knotty, intricate saying, the solution of which demanded experience and skill. In addition to the *chiddah* was the *miltsidh* (Prov. i. 6, A. V. "the interpretation," marg. "an eloquent speech"). It is probably a dark enigmatical saying, which might assume the character of sarcasm and irony, though these were not essential to it.—2. *Canonicity of the book and its place in the Canon*.—The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. It occurs in all the Jewish lists of canonical books, and is reckoned among what are called the "writings" (*Cethabim*) or Hagiographa, which form the third great division of the Hebrew Scriptures. Their order in the Talmud is thus given: Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Songs, Lamentations, Daniel, Esther, Ezra (including Nehemiah), and Chronicles. In the German MSS. of the Hebrew O. T. the Proverbs are placed between the Psalms and Job, while in the Spanish MSS., which follow the Masorah, the order is, Psalms, Job, Proverbs. But our present arrangement existed in the time of Jerome. The Proverbs are frequently quoted or alluded to in the New Testament, and the canonicity of the Book thereby confirmed.—3. *Authorship and date*.—The superscriptions which are affixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and that the majority of the proverbs contained in the book were uttered or collected by Solomon. According to Bartolocci, quoted by Carpzov, the Jews ascribe the composition of the Song of Songs to Solomon's youth, the Proverbs to his mature manhood, and the Ecclesiastes to his old age. But in the *Seder Olam Rabba* they are all assigned to the end of his life. There is nothing unreasonable in the supposition that many, or most of the proverbs in the first twenty-nine chapters may have originated with Solomon. Whether they were left by him in their present form is a distinct question, and may now be considered. Before doing so, however, it will be necessary to examine the different parts into which the book is naturally divided. Speaking roughly, it consists of three main divisions, with two appendices. 1. Chaps. i.-ix. form a connected *mashal*, in which Wisdom is praised and the youth exhorted to devote themselves to her. This portion is preceded by an introduction and title describing the character and general aim of the book. 2. Chaps. x. 1-xxiv., with the title, "the Proverbs of Solomon," consist of three parts:—x. 1-xxii. 16, a collection of single proverbs, and detached sentences out of the region of moral teaching and worldly prudence; xxii. 17-xxiv. 21, a more connected *mashal*, with an introduction, xxii. 17-22, which contains precepts of righteousness and prudence; xxiv. 23-34, with the inscription, "these also belong to the wise," a collection of unconnected maxims, which serve as an appendix to the preceding. Then follows the third division, xxv.-xxix., which, according to the superscription, professes to be a collection of Solomon's proverbs, consisting of single sentences, which the men of the court of Hezekiah

copied out. The first appendix, ch. xxx., "the words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxxi., is divided into two parts, "the words of king Lemuel" (1-6), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter. At first sight it is evident that there is a marked difference between the collections of single maxims and the longer didactic pieces, which both come under the general head *mashal*. The collection of Solomon's proverbs made by the men of Hezekiah (xxv.-xxix.) belongs to the former class of detached sentences, and in this respect corresponds with those in the second main division (x. 1-xxii. 16). The expression in xxv. 1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may not unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. Upon one point most modern critics are agreed, that the germ of the book in its present shape is the portion x. 1-xxii. 16, to which is prefixed the title, "the Proverbs of Solomon." At what time it was put into the form in which we have it, cannot be exactly determined. Ewald suggests as a probable date about two centuries after Solomon. The collector gathered many of that king's genuine sayings, but must have mixed with them many by other authors and from other times, earlier and later. It seems clear that he must have lived before the time of Hezekiah, from the expression in xxv. 1, to which reference has already been made. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of antithetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally three or four, but seldom five words in each. Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of favourite and peculiar words and phrases. With regard to the other collections, opinions differ widely both as to their date and authorship. Ewald places next in order chaps. xxv.-xxix., the superscription to which fixes their date about the end of the 8th century B.C. "These also are the proverbs of Solomon, which the men of Hezekiah copied out," or compiled. The memory of these learned men of Hezekiah's court is perpetuated in Jewish tradition. In the Talmud they are called the *sf'ah*, "society" or "academy" of Hezekiah, and it is there said, "Hezekiah and his academy wrote Isaiah, Proverbs, Song of Songs, Ecclesiastes." Many of the proverbs in this collection are mere repetitions, with slight variations, of some which occur in the previous section. We may infer from this, that the compilers of this section made use of the same sources from which the earlier collection was derived. The question now arises, in this as in the former section; were all these proverbs Solomon's? Jahn says Yes; Bertholdt, No; for xxv. 2-7 could not have been by Solomon or any king, but by a man who had lived for a long time at a court. In xxvii. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 censures the very errors which stained the reign of Solomon, and the effect of which deprived his son and successor of the ten tribes; xxvii. 23-27 must have been written by a sage who led a nomadic life,

The peculiarities of this section distinguish it from the older proverbs in x.-xxii. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvi. 12, xxix. 20 (comp. xxii 29), the manner of comparing two things by simply placing them side by side and connecting them with the simple copula "and," as in xxv. 3, 20, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members. The character of the proverbs is clearly distinct. Their construction is looser and weaker, and there is no longer that sententious brevity which gives weight and point to the proverbs in the preceding section. Ewald thinks that in the contents of this portion of the book there are traceable the marks of a later date. He assigns it to the end of the 8th century B.C. All that we know about the section xxv.-xxix., is that in the time of Hezekiah, that is, in the last quarter of the 8th century B.C. it was supposed to contain what tradition had handed down as the proverbs of Solomon, and that the majority of the proverbs were believed to be his there seems no good reason to doubt. The date of the sections i.-ix., xxi. 17-xxv. 1, has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favourite words and constructions, and that that period was a late one he concludes from the traces which are manifest of a degeneracy from the purity of the Hebrew. It is a remarkable fact, and one which is deeply instructive as showing the extreme difficulty of arguing from internal evidence, that the same details lead Ewald and Hitzig to precisely opposite conclusions; the former placing the date of i.-ix. in the first half of the 7th century, while the latter regards it as the oldest portion of the book, and assigns it to the 9th century. After a careful consideration of all their arguments, it must be confessed that they are by no means conclusive, and that we must ask for further evidence before pronouncing so positively as they have done upon a point so doubtful and obscure. In one respect they are agreed, namely, with regard to the unity of the section. Ewald finds in these chapters a certain development which shows that they must be regarded as a whole and the work of one author. The poet intended them as a general introduction to the Proverbs of Solomon, to recommend wisdom in general. But, as Bertheau remarks, there appears nowhere throughout this section to be any reference to what follows, which must have been the case had it been intended for an introduction. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverb. The single proverb is seldom met with, and is rather the exception, while the characteristics of this collection are connected descriptions, continuous elucidations of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x. 1-xxii. 16; and another distinction is the usage of Elohîm in ii. 5, 17, iii. 4, which does not occur in x. 1-xxii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact

that certain paragraphs are distinguished from those with which they are placed, nor merely by their contents, but by their external form; nor to argue from this that they are therefore the work of different authors. There is more force in the appeal to the difference in the formation of sentences and the whole manner of the language as indicating diversity of authorship. With regard to the date as well as the authorship of this section it is impossible to pronounce with certainty. In its present form it did not exist till probably some long time after the proverbs which it contains were composed. At whatever time it may have reached its present shape there appears no sufficient reason to conclude that Solomon may not have uttered many or most of the proverbs which are here collected. We now pass on to another section, xxii. 17-xxiv., which contains a collection of proverbs marked by certain peculiarities. These are, 1. The structure of the verses, which is not so regular as in the preceding section, x. 1-xxii. 16. 2. A sentence is seldom completed in one verse, but most frequently in two; three verses are often closely connected (xxiii. 1-3, 6-8, 19-21); and sometimes as many as five (xxiv. 30-34). 3. The form of address, "my son," which is so frequent in the first nine chapters, occurs also here in xxiii. 19, 26, xxiv. 13; and the appeal to the hearer is often made in the second person. Ewald regards this section as a kind of appendix to the earliest collection of the proverbs of Solomon, added not long after the introduction in the first nine chapters, though not by the same author. He thinks it probable that the compiler of this section added also the collection of proverbs which was made by the learned men of the court of Hezekiah, to which he wrote the superscription in xxv. 1. This theory of course only affects the date of the section in its present form. When the proverbs were written there is nothing to determine. Bertheau maintains that they in great part proceeded from one poet. The concluding chapters (xxx., xxxi.) are in every way distinct from the rest and from each other. The former, according to the superscription, contains "the words of Agur the son of Jakeh." Who was Agur, and who was Jakeh, are questions which have been often asked, and never satisfactorily answered. All that can be said of him is that he is an unknown Hebrew sage, the son of an equally unknown Jakeh, and that he lived after the time of Hezekiah. Ewald attributes to him the authorship of xxx. 1-xxxi. 9, and places him not earlier than the end of the 7th or beginning of the 6th cent. B.C. All this is mere conjecture. Whoever he was he appears to have had for his pupils Ithiel and Ucal, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's. Chap. xxxi. 1-9 contains "the words of king Lemuel, the prophecy that his mother taught him." Lemuel, like Agur, is unknown. The last section of all, xxxi. 10-31, is an alphabetical acrostic in praise of a virtuous woman. Its artificial form stamps it as the production of a late period of Hebrew literature, perhaps about the 7th century B.C. The colouring and language point to a different author from the previous section, xxx. 1-xxxi. 9. To conclude, it appears, from a consideration of the whole question of the manner in which the Book of Proverbs arrived at its present shape, that the nucleus of the whole was the collection of Solomon's proverbs in x. 1-xxii. 16; that to this was added the further collection made by the learned men of

the court of Hezekiah, xxv.-xxix.; that these two were put together and united with xxii. 17-xxiv., and that to this as a whole the introduction i.-ix. was affixed, but that whether it was compiled by the same writer who added xxii. 16-xxiv. cannot be determined. Nor is it possible to assert that this same compiler may not have added the concluding chapters of the book to his previous collection. With regard to the date at which the several portions of the book were collected and put in their present shape, the conclusions of various critics are uncertain and contradictory.

Province. It is not intended here to do more than indicate the points of contact which this word presents with Biblical history and literature. (1.) In the O. T. it appears in connexion with the wars between Ahab and Benhadad (1 K. xx. 14, 15, 19). The victory of the former is gained chiefly "by the young men of the princes of the provinces," i. e. probably, of the chiefs of tribes in the Gilead country. (2.) More commonly the word is used of the divisions of the Chaldaean (Dan. ii. 49, iii. 1, 30) and the Persian kingdoms (Ezr. ii. 1; Neh. vii. 6; Esth. i. 1, 22, ii. 3, &c.). The facts as to the administration of the Persian provinces which come within our view in these passages are chiefly these:—Each province has its own governor, who communicates more or less regularly with the central authority for instructions (Ezr. iv. and v.). Each province has its own system of finance, subject to the king's direction (Herod. iii. 89). The total number of the provinces is given at 127 (Esth. i. 1, viii. 9). Through the whole extent of the kingdom there is carried something like a postal system. The word is used, it must be remembered, of the smaller sections of a satrapy rather than of the satrapy itself. (3.) In the N. T. we are brought into contact with the administration of the provinces of the Roman empire. The classification given by Strabo (xvii. p. 840) of provinces supposed to need military control, and therefore placed under the immediate government of the Cæsar, and those still belonging theoretically to the republic, and administered by the senate; and of the latter again into proconsular and prætorian, is recognised, more or less distinctly, in the Gospels and the Acts. [PROCONSUL; PROCURATOR.] The *δπαρχοί* of Acts xvi. 22 ("magistrates," A. V.), on the other hand, were the *duumviri*, or prætors of a Roman colony. The right of any Roman citizen to appeal from a provincial governor to the emperor meets us as asserted by St. Paul (Acts xxv. 11). In the council of Acts xiv. 12 we recognise the assessors who were appointed to take part in the judicial functions of the governor.

Psalms, Book of. 1. *The Collection as a Whole.*—It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is *Tehillim*, "Praises." But in the actual superscriptions of the psalms the word *Tehillah* is applied only to one, Ps. cxlv., which is indeed emphatically a praise-hymn. The LXX. entitled them *Ψαλμοί*, or "Psalms." The Christian Church obviously received the Psalter from the Jews not only as a constituent portion of the sacred volume of Holy Scripture, but also as the liturgical hymn-book which the Jewish Church had regularly used in the Temple. The number of separate psalms contained in it is, by the concordant testimony of all ancient authorities, one hundred and fifty; the avowedly "supernumerary" psalm which appears at the end of the Greek and Syriac

Psalters being manifestly apocryphal. In the details, however, of the numbering, both the Greek and Syriac Psalters differ from the Hebrew. Of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred.—2. *Component Parts of the Collection.*—Ancient tradition and internal evidence concur in parting the Psalter into five great divisions or books. The ancient Jewish tradition is preserved to us by the abundant testimonies of the Christian Fathers. It suggests itself at once that these Books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined. Thus, there is a remarkable difference between the several Books in their use of the divine names Jehovah and Elohim, to designate Almighty God. In Book I. (i.-xli.) the former name prevails: it is found 272 times, while Elohim occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of Elohim when inflected with a possessive suffix.) On the other hand, in Book II. (xlii.-lxxii.), Elohim is found more than five times as often as Jehovah. In Book III. (lxxiii.-lxxxix.), the preponderance of Elohim in the earlier is balanced by that of Jehovah in the later psalms of the Book. In Book IV. (xc.-cvi.) the name Jehovah is exclusively employed; and so also, virtually, in Book V. (cvii.-cl.), Elohim being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were all collected and arranged at once, contend that the collector distributed the psalms according to the divine names which they severally exhibited. We find the several groups of psalms which form the respective five Books distinguished, in great measure, by their superscriptions from each other. Book I. is exclusively Davidic. Book II. falls, by the superscriptions of its psalms, into two distinct subdivisions, a Levitic and a Davidic. In Book III. the psalms are all ascribed, explicitly or virtually, to the various Levite singers, except only Ps. lxxxvi., which bears the name of David. In Books IV., V., we have, in all, seventeen psalms marked with David's name. In reasoning from the phenomena of the superscriptions, we have to meet the preliminary enquiry which has been raised, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed portion of the Hebrew text of Scripture; that they are in analogy with other biblical super- or subscriptions, Davidic or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription; ib. xxiii. 1; Is. xxxviii. 9; Hab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatical character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the untrustworthy subscriptions of the N. T. epistles; as also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. We are convinced that they are, when rightly interpreted, fully trustworthy, and that every separate objection that has been made to the correctness of any one of them can be fairly met. Let us now then trace the bearing of the superscriptions upon the date and method of compilation of the several Books. Book I. is, by the superscriptions, entirely Davidic; nor do we find in it a trace of any but David's authorship.

We may well believe that the compilation of the Book was also David's work. Book II. appears by the date of its latest psalm, Ps. xlii., to have been compiled in the reign of King Hezekiah. It would naturally comprise, 1st, several or most of the Levitical psalms anterior to that date; and 2ndly, the remainder of the psalms of David previously uncompiled. To these latter the collector, after properly appending the single psalm of Solomon, has affixed the notice that "the prayers of David the son of Jesse are ended" (Ps. lxxii. 20); evidently implying, at least on the *primâ facie* view, that no more compositions of the royal psalmist remained. How then do we find, in the later Books III., IV., V., further psalms yet marked with David's name? The name David is used to denote, in other parts of Scripture, after the original David's death, the then head of the Davidic family; and so, in prophecy, the Messiah of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 3; Jer. xxx. 9; Ez. xxiv. 23, 24). And thus then we may explain the meaning of the later Davidic superscriptions in the Psalter. The psalms to which they belong were written by Hezekiah, by Josiah, by Zerubbabel, or others of David's posterity. The above explanation removes all serious difficulty respecting the history of the later Books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh: it was probably compiled in the reign of Josiah. Book IV. contains the remainder of the psalms up to the date of the Captivity; Book V. the Psalms of the Return. There is nothing to distinguish these two Books from each other in respect of outward decoration or arrangement, and they may have been compiled together in the days of Nehemiah. It would manifestly be impossible, in the compass of an article like the present, to exhibit in detail the divergent views which have been taken of the dates of particular psalms. There is, however, one matter which must not be altogether passed over in silence: the assignment of various psalms, by a large number of critics, to the age of the Maccabees. The three named by De Wette as bearing, apparently, a Maccabean impress, are Pss. xlii., lx., lxxiv.; and in fact these, together with Ps. lxxix., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccabean date. Whence then arise the early places in the Psalter which these occupy? But even in the case of these, the internal evidence, when more narrowly examined, proves to be in favour of an earlier date.—3. *Connexion of the Psalms with the Israelitish history.*—The psalms grew, essentially and gradually, out of the personal and national career of David and of Israel. That of Moses, Ps. xc., which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness; and it is well that the Psalter should contain at least one memorial of those forty years of toil. It is, however, with David that Israelitish psalmody may be said virtually to commence. Previous mastery over his harp had probably already prepared the way for his future strains, when the anointing oil of Samuel descended upon him, and he began to drink in special measure, from that day forward, of the Spirit of the Lord. It was then that, victorious at home over the mysterious melan-

choly of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babes and sucklings God had ordained strength because of His enemies (Ps. viii.). His next psalms are of a different character; his persecutions at the hands of Saul had commenced. When David's reign has begun, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. There are none to which the period of his reign at Hebron can lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in Pss. xxiv.—xxix., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Even of those psalms which cannot be referred to any definite occasion, several reflect the general historical circumstances of the times. Thus Ps. ix. is a thanksgiving for the deliverance of the land of Israel from its former heathen oppressors. Ps. x. is a prayer for the deliverance of the Church from the high-handed oppression exercised from within. The succeeding psalms dwell on the same theme, the virtual internal heathenism by which the Church of God was weighed down. So that there remain very few, e. g. Pss. xv.—xvii., xix., xxxi. (with its choral appendix xxxiii.), xxxvii., of which some historical account may not be given. A season of repose near the close of his reign induced David to compose his grand personal thanksgiving for the deliverances of his whole life, Ps. xviii.; the date of which is approximately determined by the place at which it is inserted in the history (2 Sam. xxii.). It was probably at this period that he finally arranged for the sanctuary-service that collection of his psalms which now constitutes the First Book of the Psalter. The course of David's reign was not, however, as yet complete. The solemn assembly convened by him for the dedication of the materials of the future Temple (1 Chr. xviii., xxix.) would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal hymns Ps. lxxv.—lxxvii., lxxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Ps. lxxix. suit best with the renewed distress occasioned by the sedition of Adonijah. Ps. lxxxi., to which Ps. lxx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Ps. lxxii. For a time the single psalm of Solomon remained the only addition to those of David. If, however, religious psalmody were to revive, somewhat might be not unreasonably anticipated from the great assembly of King Aza (2 Chr. xv.); and Ps. l. suits so exactly with the circumstances of that occasion, that it may well be assigned to it. The great prophetic ode Ps. xlv. connects itself most readily with the splendours of Jehoshaphat's reign. And after that psalmody had thus definitely revived, there would be no reason why it should not thenceforward manifest itself in seasons of anxiety, as well as of festivity and thanksgiving. Hence Ps. xlix. Yet the psalms of this period flow but sparingly. Pss. xlii.—xlv., lxxiv., are best assigned to the reign of Ahab. The reign of Hezekiah is naturally rich in psalmody. Pss. xlii., lxxiii., lxxv., lxxvi., connect themselves with

the resistance to the supremacy of the Assyrians and the divine destruction of their host. We are now brought to a series of psalms of peculiar interest, springing out of the political and religious history of the separated ten tribes. In date of actual composition they commence before the times of Hezekiah. The earliest is probably Ps. lxxx., a supplication for the Israelitish people at the time of the Syrian oppression. All these psalms (lxxx.-lxxxiii.) are referred by their superscriptions to the Levite singers, and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation. The captivity of Manasseh himself proved to be but temporary; but the sentence which his sins had provoked upon Judah and Jerusalem still remained to be executed, and precluded the hope that God's salvation could be revealed till after such an outpouring of His judgments as the nation never yet had known. Labour and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to be manifested must be for posterity alone. The psalms of Book IV. bear generally the impress of this feeling. We pass to Book V. Ps. cvii. is the opening psalm of the return, sung probably at the first Feast of Tabernacles (Ezr. iii.). The ensuing Davidic psalms may well be ascribed to Zerubbabel. We here pass over the questions connected with Ps. cxix.; but a directly historical character belongs to Ps. cxx.-cxxxiv., styled in our A. V. "Songs of Degrees." Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem, and the title may well signify "Songs of goings up upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards while engaged in their respective duties. Of somewhat earlier date, it may be, are Ps. cxxxvii. and the ensuing Davidic psalms. Of these, Ps. cxxxix. is a psalm of the new birth of Israel, from the womb of the Babylonish captivity, to a life of righteousness; Ps. cxl.-cxliii. may be a picture of the trials to which the unrestored exiles were still exposed in the realms of the Gentiles. Henceforward, as we approach the close of the Psalter, its strains rise in cheerfulness; and it fittingly terminates with Ps. cxlvii.-cl., which were probably sung on the occasion of the thanksgiving procession of Neh. xii., after the rebuilding of the walls of Jerusalem had been completed.—4. *Moral Characteristics of the Psalms.*—Foremost among these meets us, undoubtedly, the universal recourse to communion with God. Connected with this is the faith by which the psalmist everywhere lives in God rather than in himself. It is of the essence of such faith that his view of the perfections of God should be true and vivid. The Psalter describes God as He is: it glows with testimonies to His power and providence, His love and faithfulness, His holiness and righteousness. The Psalms not only set forth the perfections of God: they proclaim also the duty of worshipping Him by the acknowledgment and adoration of His perfections. They encourage all outward rites and means of worship. Among these they recognise the ordinance of sacrifice as an expression of the worshipper's consecration of himself to God's service. But not the less do they repudiate the outward rite when separated from that which it was designed to express. Similar depth is observable in the view taken by the psalmists of human sin. In regard to the law, the psalmist,

while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (Ps. xix.). The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (Ps. xxxii., xxxiv., li.). This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (Ps. xxxvii., &c.).—5. *Prophetic Character of the Psalms.*—The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates, in Holy Scripture, in the life of the incarnate Son of God upon earth. It only remains to show that the Psalms themselves definitely anticipated this culmination. Now there are in the Psalter at least three psalms of which the interest evidently centres in a person distinct from the speaker, and which, since they cannot without violence to the language be interpreted of any but the Messiah, may be termed directly and exclusively Messianic. We refer to Ps. ii., xlv., cx.; to which may perhaps be added Ps. lxxii. It would be strange if these few psalms stood, in their prophetic significance, absolutely alone among the rest: the more so, inasmuch as Ps. ii. forms part of the preface to the First Book of the Psalter, and would, as such, be entirely out of place, did not its general theme virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the impossibility of viewing the psalms generally, notwithstanding the historical drapery in which they are outwardly clothed, as simply the past devotions of the historical David or the historical Israel. All these psalms which are of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitic psalms are uniformly national. It thus follows that it was only those psalmists who were types of Christ by external office and lineage as well as by inward piety, that were charged by the Holy Spirit to set forth beforehand, in Christ's own name and person, the sufferings that awaited him and the glory that should follow. The national hymns of Israel are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself.

Psalttery. The psalttery was a stringed instrument of music to accompany the voice. The Hebrew *nebel*, or *nebel*, is so rendered in the A. V. in all passages where it occurs, except in Is. v. 12, xiv. 11, xxii. 24 marg.; Am. v. 23, vi. 5, where it is translated *viol*. The ancient viol was a six-stringed guitar. In the Prayer Book version of the Psalms, the Hebrew word is rendered "lute." This instrument resembled the guitar, but was superior in tone, being larger, and having a convex back, somewhat like the vertical section of a gourd, or more nearly resembling that of a pear. These three instruments, the psalttery or sautry, the viol, and the lute, are frequently associated in the old English poets, and were clearly instruments resembling each other, though still different. The Greek *ψαλτήριον*, from which our word is derived, denotes an instrument played with the fingers instead of a plectrum or quill, the verb *ψάλλειν* being used of twanging the bow-string. But it

only occurs in the LXX. as the rendering of the Heb. *nebel* or *nebel* in Neh. xii. 27, and Is. v. 12, and in all the passages of the Psalms, except Ps. lxxi. 22, and Ps. lxxxi. 2, while in Am. v. 23, vi. 5 the general term *ὄργανον* is employed. In all other cases *νύβλα* represents *nebel* or *nebel*. These various renderings are sufficient to show that at the time the translation of the LXX. was made, there was no certain identification of the Hebrew instrument with any known to the translators. The rendering *νύβλα* commends itself on account of the similarity of the Greek word with the Hebrew. Josephus appears to have regarded them as equivalent, and his is the only direct evidence upon the point. He tells us that the difference between the *κινύρα* (Heb. *cinnôr*) and the *νύβλα* was, that the former had ten strings and was played with the plectrum, the latter had twelve notes and was played with the hand. We have strong presumptive evidence that *nabla* and *nebel* are the same; and that the *nabla* and *psalterion* are identical appears from the Glossary of Philoxenus. Of the Psalter among the Greeks there appear to have been two kinds. Both Isidorus and Cassiodorus describe the psalter as triangular in shape, like the Greek Δ , with the sounding-board above the strings, which were struck downwards. It is impossible to say positively with what instrument the *nebel* of the Hebrew exactly corresponded. It was probably of various kinds, as Kimchi says in his note on Is. xlii. 24, differing from each other both with regard to the position of the pegs and the number of the strings. The *nebel 'âšôr* (Ps. xxxiii. 2, xcii. 3 [4], xciv. 9) appears to have been an instrument of the psaltery kind which had ten strings, and was of a trapezium shape, according to some accounts. From the fact that *nebel* in Hebrew also signifies a wine-bottle or skin, it has been conjectured that the term when applied to a musical instrument denotes a kind of bagpipe. The psalteries of David were made of cypress (2 Sam. vi. 5), those of Solomon of algum or almug-trees (2 Chr. ix. 11). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Dura, we again meet with the psaltery (Dan. iii. 5, 10, 15; *psalterion*). The Chaldees word appears to be merely a modification of the Greek *ψαλτήριον*.

Ptolemaeus and Ptolemeus.—1. "The son of Dorymenes" (1 Macc. iii. 38; 2 Macc. iv. 45; comp. Polyb. v. 61), a courtier who possessed great influence with Antiochus Epiph. He was induced by a bribe to support the cause of Menelaus (2 Macc. iv. 45-50). Ptolemy took part in the great expedition which Lysias organized against Judas (1 Macc. iii. 38).—**2.** The son of Agescarchus, a Megalopolitan, surnamed Maccon (2 Macc. x. 12), who was governor of Cyprus during the minority of Ptol. Philometor. He afterwards deserted the Egyptian service to join Antiochus Epiph. He stood high in the favour of Antiochus, and received from him the government of Phœnicia and Coele-Syria (2 Macc. viii. 8, x. 11, 12). On the accession of Ant. Eupator, his conciliatory policy towards the Jews brought him into suspicion at court. He was deprived of his government, and in consequence of this disgrace he poisoned himself c. B.C. 164 (2 Macc. x. 13).—**3.** The son of Abubus, who married the daughter of Simon the Maccabee. He was a man of great wealth, and being invested with the government of the district of Jericho, formed the design of usurping the sovereignty of Judaea. With

this view he treacherously murdered Simon and two of his sons (1 Macc. xvi. 11-16); but Johannes Hyrcanus received timely intimation of his design, and escaped. Hyrcanus afterwards besieged him in his stronghold of Dôk, but in consequence of the occurrence of the Sabbatical year, he was enabled to make his escape to Zeno Cotylas, prince of Philadelphia.—**4.** A citizen of Jerusalem, father of Lysimachus, the Greek translator of Esther (Esth. xlii.).

Ptolemaeus I. Soter, known as the son of Lagus, a Macedonian of low rank, was generally supposed to have been an illegitimate son of Philip. He distinguished himself greatly during the campaigns of Alexander; at whose death, foreseeing the necessary subdivision of the empire, he secured for himself the government of Egypt, where he proceeded at once to lay the foundations of a kingdom (B.C. 323). He abdicated in favour of his youngest son Ptol. II. Philadelphus, two years before his death, which took place in B.C. 283. Ptol. Soter is described very briefly in Daniel (xi. 5) as one of those who should receive part of the empire of Alexander when it was "divided toward the four winds of heaven."

Ptolemaeus II. Philadelphus, the youngest son of Ptol. I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "*But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptol. Philadelphus] came [as bride] to the king of the north [Antiochus II.], to make an agreement*" (Dan. xi. 6). In other respects, however, this reign was a critical epoch for the development of Judaism, as it was for the intellectual history of the ancient world. The liberal encouragement which Ptolemy bestowed on literature and science gave birth to a new school of writers and thinkers. The critical faculty was called forth in place of the creative, and learning in some sense supplied the place of original speculation. It was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. It is enough now to observe the greatness of the consequences involved in the union of Greek language with Jewish thought. From this time the Jew was familiarized with the great types of Western literature, and in some degree aimed at imitating them. An elder Philo celebrated Jerusalem in a long hexameter poem. Another epic poem, "on the Jews," was written by Theodotus. The work of ARISTOBULUS on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out.

Ptolemaeus III. Evergetes was the eldest son of Ptol. Philad. and brother of Berenice the wife of Antiochus II. The repudiation and murder of his sister furnished him with an occasion for invading Syria (c. B.C. 246). He "*stood up, a branch out of her stock [sprung from the same parents] in his [father's] estate; and set himself at [the head of] his army, and came against the fortresses of the king of the north [Antiochus], and dealt against*

them and prevailed" (Dan. xi. 7). He extended his conquests as far as Antioch, and then eastwards to Babylon, but was recalled to Egypt by tidings of seditions which had broken out there. His success was brilliant and complete. "*He carried captive into Egypt the gods [of the conquered nations] with their molten images, and with their precious vessels of silver and gold*" (Dan. xi. 8). This capture of sacred trophies earned for the king the name *Euergetes*—"Benefactor"—recorded in the inscriptions which he set up at Adule in memory of his achievements (Cosmas Ind. ap. Clint. *F. H.* 382 n). After his return to Egypt (cir. B.C. 243) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to himself. He first collected a fleet which was almost totally destroyed by a storm; and then, as if by some judicial infatuation, "*he came against the realm of the king of the south, and [being defeated] returned to his own land [to Antioch]*" (Dan. xi. 9; Justin, xxvii. 2). After this Ptolemy "*desisted some years from [attacking] the king of the north*" (Dan. xi. 8). The remainder of the reign of Ptolemy seems to have been spent chiefly in developing the resources of the empire.

Ptolemaeus IV. Philopator. After the death of Ptol. Euergetes the line of the Ptolemies rapidly degenerated. Ptol. Philopator, his eldest son, who succeeded him, was to the last degree sensual, effeminate, and debased. But externally his kingdom retained its power and splendour; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (B.C. 217) in the Book of Daniel gives a vivid description of his character. "*The sons of Seleucus [Seleucus Ceraunus and Antiochus the Great] were stirred up, and assembled a multitude of great forces; and one of them [Antiochus] came and overflowed and passed through [even to Pelusium: Polyb. v. 62]; and he returned [from Seleucia, to which he had retired during a faithless truce: Polyb. v. 66]; and they [Antiochus and Ptolemy] were stirred up [in war] even to his [Antiochus'] fortress. And the king of the south [Ptol. Philopator] was moved with choler, and came forth and fought with him [at Raphia]; and he set forth a great multitude; and the multitude was given into his hand [to lead to battle]; and the multitude raised itself [proudly for the conflict], and his heart was lifted up, and he cast down ten thousands (cf. Polyb. v. 86); but he was not vigorous*" [to reap the fruits of his victory] (Dan. xi. 10-12; cf. 3 Macc. i. 1-5). After this decisive success Ptol. Philopator visited the neighbouring cities of Syria, and among others Jerusalem. After offering sacrifices of thanksgiving in the Temple he attempted to enter the sanctuary. A sudden paralysis hindered his design; but when he returned to Alexandria he determined to inflict on the Alexandrine Jews the vengeance for his disappointment. He died B.C. 205, and was succeeded by his only child, Ptol. V. Epiphanes, who was at the time only four or five years old.

Ptolemaeus V. Epiphanes. The reign of Ptol. Epiphanes was a critical epoch in the history of the Jews. The rivalry between the Syrian and Egyptian parties, which had for some time divided the people, came to an open rupture in the struggles which marked his minority. In the strong language of Daniel, "*The robbers of the people exalted*

themselves to establish the vision" (Dan. xi. 14). The accession of Ptolemy and the confusion of a disputed regency furnished a favourable opportunity for foreign invasion. "*Many stood up against the king of the south*" under Antiochus the Great and Philip III. of Macedonia, who formed a league for the dismemberment of his kingdom. "*So the king of the north [Antiochus] came, and east up a mount, and took the most fenced city [Sidon], and the arms of the south did not withstand*" [at Paneas, B.C. 198] (Dan. xi. 14, 15). The Romans interfered, and in order to retain the provinces of Coele-Syria, Phoenicia, and Judaea, Antiochus "*gave him [Ptolemy, his daughter Cleopatra] a young maiden*" [as his betrothed wife] (Dan. xi. 17). But in the end his policy only partially succeeded. After the marriage of Ptolemy and Cleopatra was consummated (B.C. 193), Cleopatra did "*not stand on his side*," but supported her husband in maintaining the alliance with Rome. The disputed provinces, however, remained in the possession of Antiochus; and Ptolemy was poisoned at the time when he was preparing an expedition to recover them from Seleucus, the unworthy successor of Antiochus, B.C. 181.

Ptolemaeus VI. Philometor. On the death of Ptol. Epiphanes, his wife Cleopatra held the regency for her young son, Ptol. Philometor, and preserved peace with Syria till she died, B.C. 173. The government then fell into unworthy hands, and an attempt was made to recover Syria (comp. 2 Macc. iv. 21). Antiochus Epiphanes seems to have made the claim a pretext for invading Egypt. The generals of Ptolemy were defeated near Pelusium, probably at the close of B.C. 171 (1 Macc. i. 16 ff.); and in the next year Antiochus, having secured the person of the young king, reduced almost the whole of Egypt (comp. 2 Macc. v. 1). Meanwhile Ptol. Euergetes II., the younger brother of Ptol. Philometor, assumed the supreme power at Alexandria; and Antiochus, under the pretext of recovering the crown for Philometor, besieged Alexandria in B.C. 169. By this time, however, his selfish designs were apparent: the brothers were reconciled, and Antiochus was obliged to acquiesce for the time in the arrangement which they made. But while doing so he prepared for another invasion of Egypt, and was already approaching Alexandria, when he was met by the Roman embassy led by C. Popilius Laenas, who, in the name of the Roman senate, insisted on his immediate retreat (B.C. 168), a command which the late victory at Pydna made it impossible to disobey. These campaigns, which are intimately connected with the visits of Antiochus to Jerusalem in B.C. 170, 168, are briefly described in Dan. xi. 25-30. After the discomfiture of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Cyrene, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of Antiochus Eupator he seems to have supported Philip against the regent Lysias (Comp. 2 Macc. ix. 29). After the murder of Eupator by Demetrius I., Philometor espoused the cause of Alexander Balas, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter Cleopatra in marriage (B.C. 150:

1 Macc. x. 51-58). But, according to 1 Macc. xi. 1, 10, &c., the alliance was not made in good faith, but only as a means towards securing possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Ptolemy (comp. 1 Macc. xi. 10), which caused him to transfer his support to Demetrius II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (1 Macc. xi. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Ptolemy and Demetrius, and shortly afterwards put to death in Arabia. But Ptolemy did not long enjoy his success. He fell from his horse in the battle, and died within a few days (1 Macc. xi. 18), B.C. 145. Ptolemaeus Philometor is the last king of Egypt who is noticed in Sacred history, and his reign was marked also by the erection of the Temple at Leontopolis. The coincidence is worthy of notice, for the consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. Henceforth the nation was again divided. The date of this event cannot indeed be exactly determined. It may perhaps be placed after the conclusion of the last war with Ptol. Physcon (c. B.C. 154). In Palestine the erection of this second Temple was not condemned so strongly as might have been expected. A question indeed was raised in later times whether the service was not idolatrous; but the Mishna, embodying without doubt the old decisions, determines the point more favourably. The Jewish colony in Egypt, of which Leontopolis was the immediate religious centre, was formed of various elements and at different times. The settlements which were made under the Greek sovereigns, though the most important, were by no means the first. In the later times of the kingdom of Judah many "trusted in Egypt," and took refuge there (Jer. xliii. 6, 7). This colony, formed against the command of God, was devoted to complete destruction (Jer. xlv. 27), but when the connexion was once formed, it is probable that the Persians, acting on the same policy as the Ptolemies, encouraged the settlement of Jews in Egypt to keep in check the native population. After the Return the spirit of commerce must have contributed to increase the number of emigrants; but the history of the Egyptian Jews is involved in the same deep obscurity as that of the Jews of Palestine till the invasion of Alexander. The founding of Alexandria opened a new era in the history of the Jews. Alexander, according to the policy of all great conquerors, incorporated the conquered in his armies. Ptolemy Soter increased the colony of the Jews in Egypt both by force and by policy; and their numbers in the next reign may be estimated by the statement that Ptol. Philadelphus gave freedom to 120,000. They retained their privileges under the Romans.

Ptolemaïs. This article is merely supplementary to that on ACOCHO. The name is in fact an interpolation in the history of the place. The city which was called Acocho in the earliest Jewish annals, and which is again the *Akko* or *St. Jean d'Acre* of crusading and modern times, was named Ptolemais in the Macedonian and Roman periods. In the former of these periods it was the most important town upon the coast (1 Macc. v. 15, 55, x. 1, 58, 60, xii. 48). In the N. T. Ptolemais is a marked point in St. Paul's travels both by land and sea. It is specifically men-

tioned in Acts xxi. 7, as containing a Christian community, visited for one day by St. Paul.

Pu'a, properly *Puvvah*. PHUYAH the son of Issachar (Num. xxvi. 23).

Pu'ah. 1. The father of Tola, a man of the tribe of Issachar, and Judge of Israel after Abimelech (Judg. x. 1).—2. The son of Issachar (1 Chr. vii. 1), elsewhere called PHUYAH and PUA.—3. One of the two midwives to whom Pharaoh gave instructions to kill the Hebrew male children at their birth (Ex. i. 15). In the A. V. they are called "Hebrew midwives," a rendering which is not required by the original. We may translate Ex. i. 18 in this way, "And the king of Egypt said to the women who acted as midwives to the Hebrew women." The two, Shiphray and Puah, are supposed to have been the chief and representatives of their profession.

Publican. The word thus translated belongs only, in the N. T., to the three Synoptic Gospels. The class designated by the Greek word were employed as collectors of the Roman revenue. The Roman senate had found it convenient, at a period as early as, if not earlier than, the second Punic war, to farm the *vectigalia* (direct taxes) and the *portoria* (customs) to capitalists who undertook to pay a given sum into the treasury (*in publican*), and so received the name of *publicani*. Contracts of this kind fell naturally into the hands of the *equites*, as the richest class of Romans. Not unfrequently they went beyond the means of any individual capitalist, and a joint-stock company (*societas*) was formed, with one of the partners, or an agent appointed by them, acting as managing director (*magister*). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the *submagistri*, living in the provinces. Under them, in like manner, were the *portitores*, the actual custom-house officers, who examined each bale of goods exported or imported, assessed its value more or less arbitrarily, wrote out the ticket, and enforced payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The word *τελωναι*, which etymologically might have been used of the *publicani* properly so called, was used popularly, and in the N. T. exclusively, of the *portitores*. The *publicani* were thus an important section of the equestrian order. The system was, however, essentially a vicious one. The *publicani* were banded together to support each other's interest, and at once resented and defied all interference. They demanded severe laws, and put every such law into execution. Their agents, the *portitores*, were encouraged in the most vexatious or fraudulent exactions, and a remedy was all but impossible. If this was the case with the directors of the company, we may imagine how it stood with the underlings. They overcharged whenever they had an opportunity (Luke iii. 13). They brought false charges of smuggling in the hope of extorting hush-money (Luke xix. 8). They detained and opened letters on mere suspicion. It was the basest of all livelihoods. All this was enough to bring the class into ill-favour everywhere. In Judaea and Galilee there were special circumstances of aggravation. The employment brought out all the besetting vices of the Jewish character. The strong feeling of many Jews as to the absolute unlawfulness of paying tribute at all

made matters worse. The Scribes who discussed the question (Matt. xxii. 15), for the most part answered it in the negative. In addition to their other faults, accordingly, the Publicans of the N. T. were regarded as traitors and apostates, defiled by their frequent intercourse with the heathen, willing tools of the oppressor. The class thus practically excommunicated furnished some of the earliest disciples both of the Baptist and of Our Lord. The position of Zacchaeus as an ἀρχιτελώνης (Luke xix. 2), implies a gradation of some kind among the persons thus employed. Possibly the balsam trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the *sub-magistri* in immediate communication with the Bureau at Rome.

Publius. The chief man—probably the governor—of Melita, who received and lodged St. Paul and his companions on the occasion of their being shipwrecked off that island (Acts xxviii. 7). Publius possessed property in Melita: the distinctive title given to him is “the first of the island:” and two inscriptions, one in Greek, the other in Latin, have been found at Cetta Vecchia, in which that apparently official title occurs. Publius may perhaps have been the delegate of the Roman praetor of Sicily to whose jurisdiction Melita or Malta belonged.

Pudens, a Christian friend of Timothy at Rome (2 Tim. iv. 21). Papebroch, the Bollandist editor, while printing the legendary histories, distinguishes between two saints of this name, both Roman seintors; one the host of St. Peter and friend of St. Paul, martyred under Nero; the other, the grandson of the former, living about A.D. 150. Earlier writers are disposed to believe in the existence of one Pudens only. About the end of the 16th century it was observed that Martial, the Spanish poet, who went to Rome A.D. 66, or earlier, in his 23rd year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens and Claudia, as husband and wife (*Epig.* iv. 13). Modern researches among the Columbaria at Rome appropriated to members of the Imperial household have brought to light an inscription in which the name of Pudens occurs as that of a servant of Tiberius or Claudius. On the whole, although the identity of St. Paul's Pudens with any legendary or heathen namesake is not absolutely proved, yet it is difficult to believe that these facts add nothing to our knowledge of the friend of Paul and Timothy.

Puhites, the. According to 1 Chr. ii. 53, the “Puhites” or “Puthites” belonged to the families of Kirjath-jearim.

Pul, a country or nation once mentioned, if the Masoretic text be here correct, in the Bible (Is. lvi. 19). The name is the same as that of Pul, king of Assyria. It is spoken of with distant nations: “the nations [to] Tarshish, Pul, and Lud, that draw the bow, [to] Tubal, and Javan, [to] the isles afar off.” If a Mizraite Lud be intended, Pul may be African. It has accordingly been compared by Bochart and J. D. Michaelis with the island Philae. The common LXX. reading suggests that the Heb. had originally Phut (Put) in this place.

Pul was an Assyrian king, and is the first of those monarchs mentioned in Scripture. He made an expedition against Menahem, king of Israel, about B.C. 770. Menahem appears to have inherited a kingdom which was already included among the dependencies of Assyria. Under the Assyrian system the monarchs of tributary kingdoms, on ascending

the throne, applied for “confirmation in their kingdoms” to the Lord Paramount, and only became established on receiving it. We may gather from 2 K. xv. 19, 20, that Menahem neglected to make any such application to his liege lord, Pul—a neglect which would have been regarded as a plain act of rebellion. Possibly, he was guilty of more overt and flagrant hostility. “Menahem smote Tiphshah” (2 K. xv. 16), we are told. However this may have been, it is evident that Pul looked upon Menahem as a rebel. He consequently marched an army into Palestine for the purpose of punishing his revolt. The Assyrian monuments have a king, whose name is read very doubtfully as *Vul-lush* or *Ira-lush*, at about the period when Pul must have reigned. His probable date is B.C. 800-750, while Pul, as we have seen, ruled over Assyria in B.C. 770. The Hebrew name Pul is undoubtedly curtailed: for no Assyrian name consists of a single element. If we take the “Phalos” or “Phaloch” of the Septuagint as probably nearer to the original type, we have a form not very different from *Vul-lush* or *Ira-lush*. *Vul-lush* reigned at Calah (*Nimrud*), from about B.C. 800 to B.C. 750. He states that he made an expedition into Syria, wherein* he took Damascus; and that he received tribute from the Medes, Armenians, Phoenicians, Samaritans, Damascus, Philistines, and Edomites. He also tells us that he invaded Babylonia and received the submission of the Chaldeans. He was probably the last Assyrian monarch of his race. The list of Assyrian monumental kings, which is traceable without a break and in a direct line to him from his seventh ancestor, here comes to a stand.

Pulse (Heb. *zér’ôim*, and *zér’ônim*), occurs only in the A. V. in Dan. i. 12, 16, as the translation of the above plural nouns, the literal meaning of which is “seeds” of any kind. Probably the term denotes uncooked grain of any kind, whether barley, wheat, millet, vetches, &c.

Punishments. The earliest theory of punishment current among mankind is doubtless the one of simple retaliation, “blood for blood.” Viewed historically, the first case of punishment for crime mentioned in Scripture, next to the Fall itself, is that of Cain the first murderer. That death was regarded as the fitting punishment for murder appears plain from the remark of Lamech (Gen. iv. 24). In the post-diluvian code, if we may so call it, retribution by the hand of man, even in the case of an offending animal, for blood shed, is clearly laid down (Gen. ix. 5, 6). Passing onwards to Mosaic times, we find the sentence of capital punishment, in the case of murder, plainly laid down in the law. The murderer was to be put to death, even if he should have taken refuge at God's altar or in a refuge city, and the same principle was to be carried out even in the case of an animal (Ex. xxi. 12, 14, 28, 36; Lev. xxiv. 17, 21; Num. xxxv. 31; Deut. xix. 11, 12; and see 1 K. ii. 28, 34). 1. The following offences also are mentioned in the Law as liable to the punishment of death:—1. Striking, or even reviling, a parent (Ex. xxi. 15, 17). 2. Blasphemy (Lev. xxiv. 14, 16, 23). 3. Sabbath-breaking (Num. xv. 32-36; Ex. xxxi. 14, xxxv. 2). 4. Witchcraft, and false pretension to prophecy (Ex. xxii. 18; Lev. xx. 27; Deut. xiii. 5, xviii. 20). 5. Adultery (Lev. xx. 10; Deut. xxii. 22). 6. Unchastity (Deut. xxii. 21, 23; Lev. xxi. 9). 7. Rape (Deut. xxii. 25). 8. Incestuous and unnatural connexions (Lev. xx. 11, 14, 16; Ex. xxii.

19). 9. Man-stealing (Ex. xxi. 16; Deut. xxiv. 7). 10. Idolatry, actual or virtual, in any shape (Lev. xx. 2; Deut. xxi. 6, 10, 15, xvii. 2-7: see Josh. vii. and xxii. 20, and Num. xxv. 8). 11. False witness in certain cases (Deut. xix. 16, 19). II. But there is a large number of offences, some of them included in this list, which are named in the Law as involving the penalty of "cutting off from the people." On the meaning of this expression some controversy has arisen. There are altogether thirty-six or thirty-seven cases in the Pentateuch in which this formula is used, which may be thus classified: a. Breach of Morals. b. Breach of Covenant. c. Breach of Ritual. 1. Wilful sin in genera. (Num. xv. 30, 31). *15 cases of incestuous or unclean connexion (Lev. xviii. 29, and xx. 9-21). 2. *†Uncircumcision (Gen. xvii. 14; Ex. iv. 24). Neglect of Passover (Num. ix. 13). *Sabbath-breaking (Ex. xxxi. 14). Neglect of Atonement-day (Lev. xxiii. 29). †Work done on that day (Lev. xxiii. 30). *†Children offered to Molech (Lev. xx. 3). *†Witchcraft (Lev. xx. 6). Anointing a stranger with holy oil (Ex. xxx. 33). 3. Eating leavened bread during Passover (Ex. xii. 15, 19). Eating fat of sacrifices (Lev. vii. 25). Eating blood (Lev. vii. 27, xvii. 14). *Eating sacrifice in an unclean condition (Lev. vii. 20, 21, xxii. 3, 4, 9). Offering too late (Lev. xix. 8). Making holy ointment for private use (Ex. xxx. 32, 33). Making perfume for private use (Ex. xxx. 38). Neglect of purification in general (Num. xix. 13, 20). Not bringing offering after slaying a beast for food (Lev. xii. 9). Not slaying the animal at the tabernacle-door (Lev. xvii. 4). *†Touching holy things illegally (Num. iv. 15, 18, 20: and see 2 Sam. vi. 7; 2 Chr. xxvi. 21). In the foregoing list, which, it will be seen, is classified according to the view supposed to be taken by the Law of the principle of condemnation, the cases marked with * are (a) those which are expressly threatened or actually visited with death, as well as with cutting off. In those (b) marked † the hand of God is expressly named as the instrument of execution. The question to be determined is, whether the phrase "cut off" be likely to mean death in all cases, and to avoid that conclusion Le Clerc, Michaelis, and others, have suggested that in some of them, the ceremonial ones, it was intended to be commuted for banishment or privation of civil rights. Rabbinical writers explained "cutting off" to mean excommunication, and laid down three degrees of severity as belonging to it. But most commentators agree, that, in accordance with the *primæ facie* meaning of Heb. x. 28, the sentence of "cutting off" must be understood to be death-punishment of some sort. We may perhaps conclude that the primary meaning of "cutting off" is a sentence of death to be executed in some cases without remission, but in others voidable: (1.) by immediate atonement on the offender's part; (2.) by direct interposition of the Almighty, i. e. a sentence of death always "recorded," but not always executed. III. Punishments in themselves are twofold, Capital and Secondary. (a.) Of the former kind, the following only are prescribed by the Law. (1.) *Stoning*, which was the ordinary mode of execution (Ex. xvn. 4; Luke xx. 6; John x. 31; Acts xiv. 5). In the case of idolatry, and it may be presumed in other cases also, the witnesses, of whom there were to be at least two, were required to cast the first stone (Deut. xiii. 9, Acts vii. 58). The Rabbinical writers add, that the first

stone was cast by one of them on the chest of the convict, and if this failed to cause death, the bystanders proceeded to complete the sentence. (2.) *Hanging* is mentioned as a distinct punishment (Num. xxv. 4; 2 Sam. xxi. 6, 9). (3.) *Burning*, in pre-Mosaic times, was the punishment for unchastity (Gen. xxxviii. 24). Under the Law it is ordered in the case of a priest's daughter (Lev. xxi. 9). (4.) *Death by the sword or spear* is named in the Law (Ex. xix. 13, xxxii. 27; Num. xxv. 7); but it occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xix. 1; 2 Chr. xxi. 4, &c.). (5.) *Strangling* is said by the Rabbins to have been regarded as the most common but least severe of the capital punishments, and to have been performed by immersing the convict in clay or mud, and then strangling him by a cloth twisted round the neck. (b.) Besides these ordinary capital punishments, we read of others, either of foreign introduction or of an irregular kind. Among the former, (1.) *CRUCIFIXION* is treated elsewhere. (2.) *Drowning*, though not ordered under the Law, was practised at Rome, and is said by St. Jerome to have been in use among the Jews. (3.) *Sawing asunder* or crushing beneath iron instruments (2 Sam. xii. 31, and perhaps Prov. xx. 26; Heb. xi. 37). (4.) *Pounding in a mortar, or beating to death*, is alluded to in Prov. xxvii. 22, but not as a legal punishment, and cases are described (2 Macc. vi. 28, 30). (5.) *Precipitation*, attempted in the case of our Lord at Nazareth, and carried out in that of captives from the Edomites, and of St. James, who is said to have been cast from "the pinnacle" of the Temple. Criminals executed by law were buried outside the city-gates, and heaps of stones were flung upon their graves (Josh. vii. 25, 26; 2 Sam. xviii. 17; Jer. xxii. 19). (c.) Of secondary punishments among the Jews the original principles were, (1.) *retaliation*, "eye for eye," &c. (Ex. xxi. 24, 25). (2.) *Compensation*, identical (restitution), or analogous; payment for loss of time or of power (Ex. xxi. 18-36; Lev. xxiv. 18-21; Deut. xix. 21). *Slander* against a wife's honour was to be compensated to her parents by a fine of 100 shekels, and the traducer himself to be punished with stripes (Deut. xxii. 18, 19). (3.) *Stripes*, whose number was not to exceed forty (Deut. xxv. 3); whence the Jews took care not to exceed thirty-nine (2 Cor. xi. 24). (4.) *Scourging* with thorns is mentioned Judg. viii. 16. *The stocks* are mentioned Jer. xx. 2; *passing through fire*, 2 Sam. xii. 31; *mutilation*, Judg. i. 6; 2 Macc. vii. 4; and see 2 Sam. iv. 12; *plucking out hair*, Is. l. 6; in later times, *imprisonment*, and *confiscation* or *exile*, Ezr. vii. 26; Jer. xxxvii. 15, xxxviii. 6; Acts iv. 3, v. 18, xli. 4. Of punishments inflicted by other nations we have the following notices:—In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (Gen. xl. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xlv. 9, 33). In Egypt, and also in Babylon, the chief of the executioners, *Rab-Tabbachim*, was a great officer of state (Gen. xxxvii. 36; Dan. ii. 14), &c. Putting out the eyes of captives, and other cruelties, as flaying alive, burning, tearing out the tongue, &c., were practised by Assyrian and Babylonian conquerors. The execution of Haman and the story of Daniel are pictures of summary Oriental procedure. With the Romans, stripes and the stocks were in use, and imprisonment, with a

chain attached to a soldier. There were also the *liberae custodiae* in private houses. *Exposure to wild beasts* appears to be mentioned by St. Paul (1 Cor. xv. 32; 2 Tim. iv. 17), but not with any precision.

Punites, the. The descendants of Pua, or Puvali, the son of Issachar (Num. xxvi. 23).

Pun'on. One of the halting-places of the Israelite host during the last portion of the Wandering (Num. xxxiii. 42, 43). By Eusebius and Jerome it is identified with Pinon, the seat of the Edomite tribe of that name, and, further, with Phaeno, which contained the copper-mines so notorious at that period, and was situated between Petra and Zoar.

Purification. The term "purification," in its legal and technical sense, is applied to the ritual observances whereby an Israelite was formally absolved from the taint of uncleanness, whether evidenced by any overt act or state, or whether connected with man's natural depravity. In the present article we are concerned solely with the former class, inasmuch as in this alone were the ritual observances of a special character. The essence of purification, indeed, in all cases, consisted in the use of water, whether by way of ablution or aspersion; but in the *majora delicta* of legal uncleanness, sacrifices of various kinds were added, and the ceremonies throughout bore an expiatory character. Simple ablution of the person was required after sexual intercourse (Lev. xv. 18; 2 Sam. xi. 4): ablution of the clothes, after touching the carcase of an unclean beast, or eating or carrying the carcase of a clean beast that had died a natural death (Lev. xi. 25, 40): ablution both of the person and of the defiled garments in cases of *gonorrhea dormientium* (Lev. xv. 16, 17)—the ceremony in each of the above instances to take place on the day on which the uncleanness was contracted. A higher degree of uncleanness resulted from prolonged *gonorrhea* in males, and menstruation in women. Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree (Lev. xv. 5-11, 21-24). In cases of childbirth the sacrifice was increased to a lamb of the first year with a pigeon or turtle-dove (Lev. xii. 6). The uncleanness already specified were comparatively of a mild character: the more severe were connected with death, which, viewed as the penalty of sin, was in the highest degree contaminating. To this head we refer the two cases of (1.) touching a corpse, or a grave (Num. xix. 16), or even killing a man in war (Num. xxxi. 19); and (2.) leprosy, which was regarded by the Hebrews as nothing less than a living death. The ceremonies of purification in the first of these two cases are detailed in Num. xix. The purification of the leper was a yet more formal proceeding, and indicated the highest pitch of uncleanness. The rites are described in Lev. xiv. 4-32. The two stages of the proceedings indicated, the first, which took place outside the camp, the re-admission of the leper to the community of men; the second, before the sanctuary, his re-admission to communion with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 23, 24), symbolized the re-dedication of the leper to the service of Jehovah. The ceremonies to be observed in the purification of a house or a garment infected with leprosy, were

CON. D. B.

identical with the first stage of the proceedings used for the leper (Lev. xiv. 53-55). The necessity of purification was extended in the post-Babylonian period to a variety of unauthorized cases. Cups and pots, brazen vessels and couches, were washed as a matter of ritual observance (Mark vii. 4). The washing of the hands before meals was conducted in a formal manner (Mark vii. 8), and minute regulations are laid down on this subject in a treatise of the Mishna, entitled *Yadaim*. What may have been the specific causes of uncleanness in those who came up to purify themselves before the Passover (John xi. 55), or in those who had taken upon themselves the Nazirite's vow (Acts xxi. 24, 26), we are not informed; in either case it may have been contact with a corpse, though in the latter it would rather appear to have been a general purification preparatory to the accomplishment of the vow. In conclusion it may be observed, that the distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jew. But with all other nations simple ablution sufficed: no sacrifices were demanded. The Jew alone was taught by the use of expiatory offerings to discern to its full extent the connexion between the outward sign and the inward fount of impurity.

Purim, the annual festival instituted to commemorate the preservation of the Jews in Persia from the massacre with which they were threatened through the machinations of Haman (Esth. ix.). It was probably called Purim by the Jews in irony. Their great enemy Haman appears to have been very superstitious, and much given to casting lots (Esth. iii. 7). They gave the name Purim, or Lots, to the commemorative festival, because he had thrown lots to ascertain what day would be auspicious for him to carry into effect the bloody decree which the king had issued at his instance (Esth. ix. 24). The festival lasted two days, and was regularly observed on the 14th and 15th of Adar; but if the 14th happened to fall on the Sabbath, or on the second or fourth day of the week, the commencement of the festival was deferred till the next day. The traditions of the Jews, and their modern usage respecting it, are curious. A preliminary fast was appointed, called "the fast of Esther," to be observed on the 13th of Adar, in memory of the fast which Esther and her maids observed (Esth. iv. 16). If the 13th was a Sabbath, the fast was put back to the fifth day of the week. According to modern custom, as soon as the stars begin to appear, when the 14th of the month has commenced, candles are lighted up in token of rejoicing, and the people assemble in the synagogue. After a short prayer and thanksgiving, the reading of the Book of Esther commences. The book is written in a peculiar manner, on a roll called "the Roll" (*Megillah*). The reader translates the text, as he goes on, into the vernacular tongue of the place, and makes comments on particular passages. He reads in a histrionic manner, suiting his tones and gestures to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of the ungodly perish." When the *Megillah* is read through, the whole congregation exclaim, "Cursed be Haman; blessed be Mordecai; cursed be Zorash (the wife of Haman); blessed be Esther; cursed be all idolaters; blessed be all Israelites, and blessed be Harbonah who hanged Haman." The

volume is then solemnly rolled up. In the morning service in the synagogue, on the 14th, after the prayers, the passage is read from the Law (Ex. xvii. 8-16) which relates the destruction of the Amalekites, the people of Agag (1 Sam. xv. 8), the supposed ancestor of Haman (Esth. iii. 1). The Megillah is then read again in the same manner. The 14th of Adar, as the very day of the deliverance of the Jews, is more solemnly kept than the 13th; but when the service in the synagogue is over, all give themselves up to merry-making. On the 15th the rejoicing is continued. When the month Adar used to be doubled, in the Jewish leap-year, the festival was repeated on the 14th and 15th of the second Adar. Ewald, in support of his theory that there was in patriarchal times a religious festival at every new and full moon, conjectures that Purim was originally the full moon feast of Adar, as the Passover was that of Nisan, and Tabernacles that of Tisri. It was suggested first by Kepler that the *ἑορτὴ τῶν Ἰουδαίων* of John v. 1, was the feast of Purim. The question is a difficult one. It seems to be generally allowed that the opinion of most of the Fathers that the feast was Pentecost, and that of Cocceius that it was Tabernacles, are precluded by the general course of the narrative, and especially by John iv. 35, compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover. The principal objections to Purim are, (a) that it was not necessary to go up to Jerusalem to keep the festival; (b) that it is not very likely that our Lord would have made a point of paying especial honour to a festival which appears to have had but a very small religious element in it, and which seems rather to have been the means of keeping alive a feeling of national revenge and hatred. On the whole, the only real objection to the Passover seems to be the want of the article before *ἑορτὴ*. It must be admitted that the difficulty is no small one, though it does not seem to be sufficient to outweigh the grave objections which lie against the feast of Purim.

Purse. The Hebrews, when on a journey, were provided with a bag (variously termed *ois*, *tsérôr*, and *chûrit*), in which they carried their money (Gen. xlii. 35; Prov. i. 14, vii. 20; Is. xlii. 6), and, if they were merchants, also their weights (Deut. xxv. 13; Mic. vi. 11). This bag is described in the N. T. by the terms *βαλάντιον* (Luke x. 4, xii. 33, xxii. 35, 36), and *γλωσσόκομον* (John xii. 6, xiii. 29). The girdle also served as a purse (Matt. x. 9; Mark vi. 8). Ladies wore ornamental purses (Is. iii. 23).

Put (1 Chr. i. 8; Nah. iii. 9). [PHUT.]

Puteoli, the great landing-place of travellers to Italy from the Levant, and the harbour to which the Alexandrian corn-ships brought their cargoes (Acts xxvii. 13). Puteoli was at that period a place of very great importance. We cannot elucidate this better than by saying that the celebrated bay which is now "the bay of Naples," and in early times was "the bay of Cumæ," was then called "Sinus Puteolanus." The city was at the north-eastern angle of the bay. The earlier name of Puteoli, when the lower part of Italy was Greek, was Dicæarchia. The word Puteoli was a true Roman name, and arose from the strong mineral springs which are characteristic of the place. In the 5th century Puteoli was ravaged both by Alaric

and Genseric, and it never afterwards recovered its former eminence. It is now a fourth-rate Italian town, still retaining the name of *Pozzuoli*. The remains of Puteoli are considerable.

Putiel. One of the daughters of Putiel was wife of Eleazar the son of Aaron, and mother of Phinehas (Ex. vi. 25).

Pygarg (Heb. *dishôn*: *πύγαργος*: *pygargus*) occurs only (Deut. xiv. 5) in the list of clean animals as the rendering of the Heb. *dishôn*, the name apparently of some species of antelope, though it is by no means easy to identify it. The Greek *πύγαργος* denotes an animal with a "white rump," and is used by Herodotus (iv. 192) as the name of some Libyan deer or antelope. It is usual to identify the *pygarg* of the Greek and Latin writers with the *addax* of North Africa, Nubia, &c. (*Addax nasomaculatus*); but we cannot regard this point as satisfactorily settled. We are inclined to consider the *πύγαργος*, or *pygargus*, as a generic name to denote any of the white-rumped antelopes of North Africa, Syria, &c. Whether, however, the LXX. and Vulg. are correct in their interpretation of *dishôn* is another question.

Quails (Heb. *sêlâv*, *sêlâiv*). That the Hebrew word (Ex. xvi. 13; Num. xi. 31, 32) is correctly rendered "quails," is, we think, beyond doubt. Ludolf has endeavoured to show that the *sêlâv* were locusts. Rudbeck has argued in favour of the *sêlâv* meaning "flying-fish," some species of the genus *Eucetus*. Ehrenberg, from having observed a number of "flying-fish" lying dead on the shore near Elim, believed that *this* was the food of the Israelites in the wilderness, and named the fish "Trigla Israelitarum." Hermann von der Hardt supposed that the locust bird (*Pastor Rosens*) was intended; and recently Mr. Forster has advanced an opinion that "red geese" of the genus *Casarca* are to be understood by the Hebrew term. Some writers, while they hold that the original word denotes "quails," are of opinion that a species of Sand-grouse (*Pterocles alchata*), frequent in the Bible lands, is also included under the term. It is clear, however, that the *sêlâv* of the

Quercus vulgaris.

Pentateuch and the 105th Ps. denotes the common "quail" (*Coturnix dactylisonans*), and no other bird. The Hebrew word *sélāv* is undoubtedly identical with the Arabic *salwā*, a "quail." The expression "as it were two cubits (high) upon the face of the earth" (Num. xi. 31) is explained by the LXX., by the Vulg., and by Josephus, to refer to the height at which the quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, viz. "ten homers," in the space of a night and two days, there is every reason for believing that the "homers" here spoken of do not denote strictly the measure of that name, but simply "a heap:" this is the explanation given by Onkelos and the Arabic versions of Saadias and Erpenius, in Num. xi. 31. The Israelites would have had little difficulty in capturing large quantities of these birds, as they are known to arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in nets only, but by the hand. They "spread the quails round about the camp;" this was for the purpose of drying them. The Egyptians similarly prepared these birds. The expression "quails from the sea" (Num. xi. 31) must not be restricted to denote that the birds came from the sea as their starting-point, but it must be taken to show the direction from which they were coming. The quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northwards. It is interesting to note the time specified, "it was at even" that they began to arrive; and they no doubt continued to come all the night. Many observers have recorded that the quail migrates by night. The quail (*Coturnix dactylisonans*), the only species of the genus known to migrate, has a very wide geographical range.

Quartus, a Christian of Corinth (Rom. xvi. 23). There is the usual tradition that he was one of the Seventy disciples; and it is also said that he ultimately became bishop of Berytus.

Quaternion, a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Acts xii. 4).

Queen. This word is sometimes used in the O. T. to indicate a queen-regnant, and a queen-consort; but it is more properly applied to the queen-mother, since in an Oriental household, it is not the wife but the mother of the master who exercises the highest authority. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy. The extent of the influence of the queen-mother is well illustrated by the narrative of the interview of Solomon and Bathsheba, as given in 1 K. ii. 19 ff. The term is applied to Maachah, Asa's mother, who was deposed from her dignity in consequence of her idolatry (1 K. xv. 13; 2 Chr. xv. 16); to Jezebel as contrasted with Joram (2 K. x. 13, "the children of the king, and the children of the queen"); and to the mother of Jehoiachin or Jeconiah (Jer. xiii. 18; compare 2 K. xxiv. 12; Jer. xxix. 2).

Queen of Heaven. In Jer. vii. 18, xiv. 17, 18, 19, 25, the Heb. *mēleceth hashshāmāyim* is thus rendered in the A. V. In the margin is given "frame or workmanship of heaven." Kimchi says "workmanship of heaven," i. e. the stars; and some interpret 'the queen of heaven,' i. e. a great star which is in the heavens." Rashi is in favour

of the latter; and the Targum renders throughout "the star of heaven." Kircher is in favour of some constellation, the Pleiades or Hyades. It is generally believed that the "queen of heaven" is the moon, worshipped as Ashtaroth or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. The Babylonian Venus was also styled "the queen of heaven." Mr. Layard identifies Hera, "the second deity mentioned by Diodorus, with Astarte, Mylitta, or Venus," and with the "queen of heaven," frequently mentioned in the sacred volumes. . . . The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Beltis, because she was the female form of the great divinity, or Baal." With the cakes (*cavvāntim*) which were offered in her honour, with incense and libations, Selden compares the *πύρρα* (A. V. "bran") of Ep. of Jer. 43.

Quicksands, the, more properly THE SYRTIS (Acts xxvii. 17), the broad and deep bight on the North African coast between Carthage and Cyrene. The name is derived from *Sert*, an Arabic word for a desert. For two reasons this region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly on account of the shallows and the uncertain currents of water in the bay. There were properly two Syrtes: the eastern or larger, now called the *Gulf of Sidra*; and the western or smaller, now the *Gulf of Gabes*. It is the former to which our attention is directed in this passage of the Acts.

Quintus Memmius, 2 Macc. xi. 34. [See MANLIUS T.]

Quiver. Two distinct Hebrew terms are represented by this word in the A. V. (1.) *Théli*. This occurs only in Gen. xxvii. 3. It is derived from a root which has the force of hanging. The passage itself affords no clue to its meaning. It may therefore signify either a quiver or a suspended weapon—for instance, such a sword as in our own language was formerly called a "hanger." (2.) *Ashpāh*. The root of this word is uncertain. It is connected with arrows only in Lam. iii. 13. Its other occurrences are Job xxxix. 23, Is. xlii. 6, and

Assyrian Chariot with Quiver.

Jer. v. 16. In each of these the LXX. translate it by "quiver," with two exceptions, Job xxxix. 23, and Ps. cxvii. 5. As to the thing itself, there is nothing in the Bible to indicate either its form or material, or in what way it was carried.

R

Ra'amah, a son of Cush, and father of Sheba and Dedan (Gen. x. 7). The tribe of Raamah became afterwards renowned as traders (Ez. xxvii. 22). Of the settlement of Raamah on the shores of the Persian Gulf there are several indications. Traces of Dedan are very faint; but Raamah seems to be recovered in the *'Peryd'* of Ptol. vi. 7, and *'Paryua'* of Steph. Byzant.

Raami'ah, one of the chiefs who returned with Zerubbabel (Neh. vii. 7). In Ezr. ii. 2 he is called *RELAIAH*.

Raam'ses, Ex. i. 10. [RAMESES.]

Rab'bah, the name of several ancient places both east and west of the Jordan. 1. A very strong place on the east of the Jordan, which when its name is first introduced in the sacred records was the chief city of the Ammonites. In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvii. 27; Jer. xlix. 2; Ez. xxi. 20) it is styled at length Rabbath of the Ammonites, or, children of Ammon; but elsewhere (Josh. xiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xx. 1; Jer. xlix. 3; Ez. xxv. 5; Amos i. 14) simply RABBAH. It appears in the sacred records as the single city of the Ammonites. When first named it is in the hands of the Ammonites, and is mentioned as containing the bed or sarcophagus of the giant Og (Deut. iii. 11). It was not included in the territory of the tribes east of Jordan; the border of Gad stops at "Aroer, which faces Rabbah" (Josh. xiii. 25). David's first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Abishai, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but the main force under Joab remained at Medeba (1 Chr. xix. 7). The following year the Ammonite war was resumed, and this time Rabbah was made the main point of attack (xi. 1). Joab took the command, and was followed by the whole of the army. The siege must have lasted nearly, if not quite, two years. The sallies of the Ammonites appear to have formed a main feature of the siege (2 Sam. xi. 17, &c.). At the end of that time Joab succeeded in capturing a portion of the place—the "city of waters," that is, the lower town, so called from its containing the perennial stream which rises in and still flows through it. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken; and the honour of this capture, Joab insists on reserving for the king. The waters of the lower city once in the hands of the besiegers, the fate of the citadel was certain. The provisions also were at last exhausted, and shortly after David's arrival the fortress was taken. We are not told whether the city was demolished, or whether David was satisfied with the slaughter of its inmates. In the time of Amos, two centuries and a half later, it had again a "wall" and "palaces," and was still the sanctuary of Molech—"the king" (Am. i. 14). So it was also at the date of the invasion

of Nebuchadnezzar (Jer. xlix. 2, 3), when its dependent towns are mentioned, and when it is named in such terms as imply that it was of equal importance with Jerusalem (Ez. xxi. 20). At Rabbah, no doubt Baalis, king of the Bene-Ammon (Jer. xl. 14), held such court as he could muster; and within its walls was plotted the attack of Ishmael, which cost Gedaliah his life, and drove Jeremiah into Egypt. In the period between the Old and New Testaments, Rabbath-Ammon appears to have been a place of much importance, and the scene of many contests. It lay on the road between Heshbon and Bosra, and was the last place at which a stock of water could be obtained for the journey across the desert, whereas it stood on the confines of the richer and more civilized country, it formed an important garrison station for repelling the incursions of the wild tribes of the desert. From Ptolemy Philadelphus (B.C. 285-247) it received the name of Philadelpheia. Its ancient name, though under a cloud, was still used: it is mentioned by Polybius under the hardly altered form of Rabbatamana. At the Christian era Philadelpheia formed the eastern limit of the region of Peraea. It was one of the cities of the Decapolis, and as far down as the 4th century was esteemed one of the most remarkable and strongest cities of the whole of Coele-Syria. Philadelpheia became the seat of a Christian bishop, and was one of the nineteen sees of "Palestina tertia," which were subordinate to Bostra. The church still remains "in excellent preservation," with its lofty steeple. *Ammân* lies about 22 miles from the Jordan, at the eastern apex of a triangle, of which Heshbon and *es-Salt* form respectively the southern and northern points. It is about 14 miles from the former, and 12 from the latter. It lies in a valley which is a branch, or perhaps the main course, of the *Wady Zerka*, usually identified with the Jabbok. The *Moiet-Ammân*, or water of Amman, a mere streamlet, rises within the basin which contains the ruins of the town. When the Moslems conquered Syria they found the city in ruins; and in ruins remarkable for their extent and desolation even for Syria, the "Land of ruins," it still remains. The public buildings are said to be Roman, in general character like those at *Jerash*, except the citadel, which is described as of large square stones put together without cement, and which is probably more ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive.—2. Although there is no trace of the fact in the Bible, there can be little doubt that the name of Rabbah was also attached in Biblical times to the chief city of Moab. Its Biblical name is *AK*, but we have the testimony of Eusebius that in the 4th century it possessed the special title of Rabbath Moab. This name was for a time displaced by Areopolis. *Rabba* lies on the highlands at the S.E. quarter of the Dead Sea, between *Kerak* and *Jibei Shihân*.—3. A city of Judah, named with Kirjath-jearim in Josh. xv. 60 only. No trace of its existence has yet been discovered.—4. In one passage (Josh. xi. 8) ZIDON is mentioned with the affix Rabbah—Zidon-rabbah. This is preserved in the margin of the A. V., though in the text it is translated "great Zidon."

Rab'bah of the Children of Ammon, and **R. of the Ammonites**. This is the full appellation of the place commonly given as RABBAH. It occurs only in Deut. i. 11, and Ez. xxi. 20.

Rab'bi, a title of respect given by the Jews to

Amman, from the East; showing the perennial stream and part of the citadel-hill From a sketch by Wm. Tipping, Esq

their doctors and teachers, and often addressed to our Lord (Matt. xxiii. 7, 8, xxvi. 25, 49; Mark ix. 5, xi. 21, xiv. 45; John i. 39, 50, iii. 2, 26, iv. 31, vi. 25, ix. 2, xi. 8). The meaning of the title is interpreted in express words by St. John, and by implication in St. Matthew, to mean Master, Teacher, John i. 39 (compare xi. 28, xiii. 13), and Matt. xxiii. 8. The same interpretation is given by St. John of the kindred title RABBONI (John xx. 16), which also occurs in Mark x. 51. The *i* which is added to these titles has been thought to be the pronominal affix "My;" but it is to be noted that St. John does not translate either of these by "My Master," but simply "Master," so that the *i* would seem to have lost any especial significance as a possessive pronoun intimating appropriation or endowment, and, like the "my" in titles of respect among ourselves, or in such terms as *Monsieur*, *Monsieur*, to be merely part of the formal address. The title Rabbi is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. Rabbi was considered a higher title than Rab, and Rabban higher than Rabbi.

Rab'ith, a town in the territory, perhaps on the boundary, of Issachar (Josh. xix. 20 only).

Rabbo'ni, John xx. 16. [RABBI.]

Rab-Mag is found only in Jer. xxxix. 3 and 13. In both places it is a title borne by Nergal-sharezer. It has already been shown that Nergal-sharezer is probably identical with the king called by the Greeks Nergliassar. [NERGAL-SHAREZER.] This king, as well as certain other important personages, is found to bear the title in the Babylonian inscriptions. It is written indeed with a somewhat different vocalisation, being read as *Rabu-Emga* by Sir H. Rawlinson. The signification is somewhat doubtful. *Rabu* is most certainly "great," or "chief;" but *Mag*, or *Emga*, is an obscure term.

It has been commonly identified with the word "Magus," but this identification is very uncertain. Sir H. Rawlinson inclines to translate *emga* by "priest."

Rab'saces. RABSHAKEH (Ecclus. xlviii. 18).

Rab'saris. 1. An officer of the king of Assyria sent up with Tartan and Rabshakeh against Jerusalem in the time of Hezekiah (2 K. xviii. 17).— 2. One of the princes of Nebuchadnezzar, who was present at the capture of Jerusalem, B.C. 588 (Jer. xxxix. 3, 13). Rabsaris is probably rather the name of an office than of an individual, the word signifying chief eunuch; in Dan. i. 3, Ashpenaz is called the master of the eunuchs (Rab-sarisim). It is not improbable that in Jeremiah xxxix. we have not only the title of the Rabsaris given, but his name also, either Sarsechim (ver. 3) or (ver. 13) Nebu-shashan (worshipper of Nebo, Is. xlv. 1).

Rab'shakeh (2 K. xviii. xix.; Is. xxxvi. xxxvii.: *Rabsaces*), one of the officers of the king of Assyria sent against Jerusalem in the reign of Hezekiah. Sennacherib, having taken other cities of Judah, was now besieging Lachish; and Hezekiah, terrified at his progress, and losing for a time his firm faith in God, sends to Lachish with an offer of submission and tribute. But Sennacherib, not content with this, sends a great host against Jerusalem under Tartan, Rabsaris, and Rabshakeh; not so much, apparently, with the object of immediately engaging in the siege of the city, as with the idea that, in its present disheartened state, the sight of an army, combined with the threats and specious promises of Rabshakeh, might induce a surrender at once. Many have imagined, from the familiarity of Rabshakeh with Hebrew, that he either was a Jewish deserter or an apostate captive of Israel. Being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, is encouraged by the words and predictions of Isaiah, Rabshakeh goes

back to the king of Assyria, who had now departed from Lachish. The English version takes Rabshakeh as the name of a person; it may, however, be questioned whether it be not rather the name of the office which he held at the court, that of chief cupbearer, and RAB-MAG possibly the chief priest.

Ra'ca, a term of reproach used by the Jews of our Saviour's age (Matt. v. 22). Critics are agreed in deriving it from the Chaldean term *ráká*, with the sense of "worthless."

Race. [GAMES.]

Ra'chab. RAHAB the harlot (Matt. i. 5).

Ra'chal, one of the places which David and his followers used to haunt during the period of his freebooting life. It is named in 1 Sam. xxx. 29 only.

Ra'chel, the younger of the daughters of Laban, the wife of Jacob, and mother of Joseph and Benjamin. The incidents of her life may be found in Gen. xxix.—xxxiii., xxxv. The story of Jacob and Rachel has always had a peculiar interest: there is that in it which appeals to some of the deepest feelings of the human heart. The beauty of Rachel, the deep love with which she was loved by Jacob from their first meeting by the well of Haran, when he showed to her the simple courtesies of the desert life, and kissed her and told her he was Rebekah's son; the long servitude with which he patiently served for her, in which the seven years "seemed to him but a few days, for the love he had to her;" their marriage at last; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xlviii. 7); these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel. Yet from what is related to us concerning her character there does not seem much to claim any high degree of admiration and esteem. The discontent and fateful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (Gen. xxx. 1, 2). She appears moreover to have shared all the duplicity and falsehood of her family. See, for instance, Rachel's stealing her father's images, and the ready dexterity and presence of mind with which she concealed her theft (Gen. xxxi.). From this incident we may also infer that she was not altogether free from the superstitions and idolatry which prevailed in the land whence Abraham had been called (Josh. xxiv. 2, 14).—**Rachel's tomb**.—"Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel's grave unto this day" (Gen. xxxv. 19, 20). The site of Rachel's tomb, "on the way to Bethlehem," "a little way to come to Ephrath," "in the border of Benjamin," has never been questioned. It is about two miles S. of Jerusalem, and one mile N. of Bethlehem.

Radda'i, one of David's brothers, fifth son of Jesse (1 Chr. ii. 14). Ewald conjectures that he is identical with REI, but this does not seem probable.

Raga. 1. A place named only in Jud. i. 5, 15; probably identical with RAGES.—2. One of the ancestors of our Lord, son of Phalec (Luke iii. 35). He is the same person with REU, son of Peleg.

Rages was an important city in north-eastern Media, where that country bordered upon Parthia.

It is not mentioned in the Hebrew Scriptures, but occurs frequently in the Book of Tobit (i. 14, v. 5, vi. 10 and 12, &c.), and twice in Judith (i. 5 and 15). Rages is a place mentioned by a great number of profane writers. It appears as Ragha in the Zendavesta, in Isidore, and in Stephen; as Raga in the inscriptions of Darius; Rhagae in Duriis of Samos, Strabo, and Arrian; and Rhagaea in Ptolemy. Properly speaking, Rages is a town, but the town gave name to a province which is sometimes called Rages or Rhagae, sometimes Rhagiana. It appears from the Zendavesta that here was one of the earliest settlements of the Aryans, who were mingled, in Rhagiana, with two other races, and were thus brought into contact with heretics. Isidore calls Rages "the greatest city in Media." In the troubles which followed the death of Alexander, Rages appears to have gone to decay, but it was soon after rebuilt by Seleucus I. (Nicator), who gave it the name of Europus. When the Parthians took it they called it Arsacia, after the Arsacae of the day; but it soon afterwards recovered its ancient appellation. That appellation it has ever since retained, with only a slight corruption, the ruins being still known by the name of *Rhey*. These ruins lie about five miles south-east of Teheran, and cover a space 4500 yards long by 3500 yards broad. The walls are well marked, and are of prodigious thickness. The modern Teheran, built out of its ruins, has now superseded *Rhey*.

Raguel, or **Reu'el**. 1. A prince-priest of Midian, the father of Zipporah according to Ex. ii. 21, and of Hobab according to Num. x. 29. As the father-in-law of Moses is named Jethro in Ex. iii. 1, and Hobab in Judg. iv. 11, and perhaps in Num. x. 29 (though the latter passage admits of another sense), the *prima facie* view would be that Raguel, Jethro, and Hobab were different names for the same individual. Such is probably the case with regard to the two first at all events, if not with the third. [HOBAB.] One of the names may represent an official title, but whether Jethro or Raguel is uncertain, both being appropriately significant. The identity of Jethro and Reuel is supported by the indiscriminate use of the names in the LXX. (Ex. ii. 16, 18). Another solution of the difficulty has been sought in the loose use of terms of relationship among the Hebrews.—2. Another transcription of the name REUEL, occurring in Tobit, where Raguel, a pious Jew of "Ecbatane, a city of Media," is father of Sami, the wife of Tobias (Tob. iii. 7, 17, &c.).

Ra'hab, or **Rachab**, a celebrated woman of Jericho, who received the spies sent by Joshua to spy out the land, hid them in her house from the pursuit of her countrymen, was saved with all her family when the Israelites sacked the city; and became the wife of Salmon, and the ancestress of the Messiah. Her history may be told in a few words. At the time of the arrival of the Israelites in Canaan she was a young unmarried woman, dwelling in a house of her own alone, though she had a father and mother, and brothers and sisters, living in Jericho. She was a "harlot," and probably combined the trade of lodging-keeper for wayfaring men. She seems also to have been engaged in the manufacture of linen and the art of dyeing, for which the Phoenicians were early famous; since we find the flat roof of her house covered with stalks of flax put there to dry, and a stock of scarlet or crimson line in her house. Her house was situated on the

wall, probably near the town gate, so as to be convenient for persons coming in and going out of the city. Rahab therefore had been well informed with regard to the events of the Exodus. She had heard of the passage through the Red Sea, of the utter destruction of Sihon and Og, and of the irresistible progress of the Israelitish host. The effect upon her mind had been what one would not have expected in a person of her way of life. It led her to a firm faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. When therefore the two spies sent by Joshua came to her house, they found themselves under the roof of one who, alone probably of the whole population, was friendly to their nation. Her reception of the spies, the artifices by which she concealed them from the king, their escape, and the saving of Rahab and her family at the capture of the city, in accordance with their promise, are all told in the narrative of Josh. ii. The narrator adds, "and she dwelleth in Israel unto this day," not necessarily implying that she was alive at the time he wrote, but that the family of strangers of which she was reckoned the head, continued to dwell among the children of Israel. As regards Rahab herself, we learn from Matt. i. 5, that she became the wife of Salmon the son of Naasson, and the mother of Boaz, Jesse's grandfather. The suspicion naturally arises that Salmon may have been one of the spies whose life she saved, and that gratitude for so great a benefit led in his case to a more tender passion, and obliterated the memory of any past disgrace attaching to her name. But, however this may be, it is certain, on the authority of St. Matthew, that Rahab became the mother of the line from which sprang David, and eventually Christ; for that the Raclab mentioned by St. Matthew is Rahab the harlot, is as certain as that David in the genealogy is the same person as David in the books of Samuel. The attempts that have been made to prove Raclab different from Rahab, in order to get out of the chronological difficulty, are singularly absurd. The character of Rahab has much and deep interest. Dismissing, as inconsistent with truth, the attempt to clear her character of stain by saying that she was only an innkeeper, and not a harlot, we may yet notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us, and moreover, that with a purer faith she seems to have entered upon a pure life. As a case of casuistry, her conduct in deceiving the king of Jericho's messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. With regard to the first, strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. With regard to her taking part against her own countrymen, it can only be justified, but is fully justified, by the circumstance that fidelity to her country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establish-

ment of that to which she wished to belong by a community of faith and hope. This view of Rahab's conduct is fully borne out by the references to her in the N. T. The author of the Epistle to the Hebrews tells us that "by faith the harlot Rahab perished not with them that believed not, when she had received the spies with peace" (Heb. xi. 31); and St. James fortifies his doctrine of justification by works, by asking, "Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?" (Jam. ii. 25.) And in like manner Clement of Rome says, "Rahab the harlot was saved for her faith and hospitality" (*ad Corinth. xii.*).

Rahab, a poetical name of Egypt (Ps. lxxxix. 10; Is. li. 9). The same word signifies "fierceness, insolence, pride;" if Hebrew, when applied to Egypt it would indicate the national character of the inhabitants. Gesenius thinks it was probably of Egyptian origin, but accommodated to Hebrew, although no likely equivalent has been found in Coptic, or, we may add, in ancient Egyptian. This word occurs in a passage in Job (xxvi. 12), where it is usually translated, as in the A. V., instead of being treated as a proper name. Rahab, as a name of Egypt, occurs once only without reference to the Exodus: this is in Ps. lxxxvii. 4. In Is. xxx. 7 the name is alluded to.

Raham. In the genealogy of the descendants of Caleb the son of Hezron (1 Chr. ii. 44), Raham is described as the son of Shema and father of Jorkom.

Rahel, the more accurate form of the familiar name elsewhere rendered RACHEL (Jer. xxxi. 15).

Rain. *Mâdar*, and also *geshem*, which, when it differs from the more common word *gâdâr*, signifies a more violent rain; it is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23). **EARLY RAIN**, the rains of the autumn, *yôreh* (Deut. xi. 14; Jer. v. 24); also *môreh* (Joel ii. 23). **LATTER RAIN**, the rain of spring, *malhôsh* (Prov. xvi. 15; Job xxix. 23; Jer. iii. 3; Hos. vi. 3; Joel ii. 23; Zech. x. 1). The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Joel ii. 23; Hos. vi. 3; James v. 7). Another word, of a more poetical character, is *rebibim*, translated in our version "showers" (Deut. xxxii. 2; Jer. iii. 3, xiv. 22; Mic. v. 7 (Heb. 6); Ps. lxxv. 10 (Heb. 11), lxxii. 6). The Hebrews have also the word *zerem*, expressing violent rain, storm, tempest, accompanied with hail—in Job xxiv. 8, the heavy rain which comes down on mountains; and *sagrîr*, which occurs only in Prov. xxvii. 15, continuous and heavy rain. In a country comprising so many varieties of elevation as Palestine, these must of necessity occur corresponding varieties of climate. For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar lest the work be interrupted by unseasonable storms. There are, however, very considerable, and perhaps more than compensating, disadvantages occasioned by this long absence of rain: the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the autumnal rains are eagerly looked for, to prepare the earth for the reception of the seed. These, the early rains, commence about the latter end of October or beginning of November, in Lebanon a month earlier: not suddenly but by degrees; the husbandman has thus the opportunity of sowing his

fields of wheat and barley. The rains come mostly from the west or south-west (Luke xii. 54), continuing for two or three days at a time, and falling chiefly during the night; the wind then shifts round to the north or east, and several days of fine weather succeed (Prov. xxv. 23). During the months of November and December the rains continue to fall heavily, but at intervals; afterwards they return, only at longer intervals, and are less heavy; but at no period during the winter do they entirely cease. January and February are the coldest months, and snow falls, sometimes to the depth of a foot or more, at Jerusalem, but it does not lie long; it is very seldom seen along the coast and in the low plains. Rain continues to fall more or less during the month of March; it is very rare in April, and even in Lebanon the showers that occur are generally light. In the valley of the Jordan the barley harvest begins as early as the middle of April, and the wheat a fortnight later; in Lebanon the grain is seldom ripe before the middle of June. [PALESTINE.] With respect to the distinction between the early and the latter rains, Robinson observes that there are not at the present day "any particular periods of rain or succession of showers, which might be regarded as distinct rainy seasons. The whole period from October to March now constitutes only one continued season of rain without any regularly intervening term of prolonged fine weather. Unless, therefore, there has been some change in the climate, the early and the latter rains for which the husbandman waited with longing, seem rather to have implied the first showers of autumn which revived the parched and thirsty soil, and prepared it for the seed; and the later showers of spring, which continued to refresh and forward both the ripening crops and the vernal products of the fields (James v. 7; Prov. xvi. 15)."

Rainbow. The token of the covenant which God made with Noah when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. The right interpretation of Gen. ix. 13 seems to be that God took the rainbow, which had hitherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise (Ecclus. xliii. 11). The figurative and symbolical use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In the wondrous vision shown to St. John in the Apocalypse (Rev. iv. 3), it is said that "there was a rainbow round about the throne, in sight like unto an emerald:" amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love.

Raisins. [VINE.]

Ra'kem. Among the descendants of Machir the son of

Manasseh, by his wife Mnachah, are mentioned Ulam and Rakem, who are apparently the sons of Sheresah (1 Chr. vii. 16).

Rak'kath, one of the fortified towns of Naphtali, named between HAMMATH and CHINNERETH (Josh. xix. 35).

Rak'kon, one of the towns in the inheritance of Dan (Josh. xix. 46), apparently not far distant from Joppa.

Ram. 1. Second son of Hezron, and father of Amminadab (1 Chr. ii. 9, 10).—2. The first-born of Jerahmeel (1 Chr. ii. 25, 27).—3. Elihu, the son of Barachel the Buzite, is described as "of the kindred of Ram" (Job xxxii. 2). Ewald identifies Ram with Aram, mentioned in Gen. xxii. 21 in connexion with Huz and Buz.

Ram. [SHEEP; SACRIFICES.]

Ram, Battering. This instrument of ancient siege operations is twice mentioned in the O. T. (Ez. iv. 2, xxi. 22 [27]); and as both references are to the battering-rams in use among the Assyrians and Babylonians, it will only be necessary to describe those which are known from the monuments to have been employed in their sieges. In attacking the walls of a fort or city, the first step appears to have been to form an inclined plane or bank of earth (comp. Ez. iv. 2, "cast a mound against it"), by which the besiegers could bring their battering-rams and other engines to the foot of the walls. "The battering-rams," says Mr. Layard, "were of several kinds. Some were joined to moveable towers which held warriors and armed men. The whole then formed one great temporary building, the top of which is represented in sculptures as on a level with the walls, and even turrets, of the besieged city. In some bas-reliefs the battering-ram is without wheels; it was then perhaps constructed upon the spot, and was not in-

Battering Ram.

tended to be moved. . . . The mode of working the rams cannot be determined from the Assyrian sculptures. It may be presumed, from the representations in the bas-reliefs, that they were partly suspended by a rope fastened to the outside of the machine, and that men directed and impelled them from within. . . . The artificial tower was usually occupied by two warriors: one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below; the other held up a shield for his companion's defence."

Ra'ma, Matt. ii. 18, referring to Jer. xxxi. 15. The original passage alludes to a massacre of Benjaminites or Ephraimites (comp. ver. 9, 18), at the Ramah in Benjamin or in Mount Ephraim. This is seized by the Evangelist and turned into a touching reference to the slaughter of the Innocents at Bethlehem, near to which was (and is) the sepulchre of Rachel.

Ra'mah. A word which in its simple or compound shape forms the name of several places in the Holy Land; one of those which, like Gibeah, Geba, Gibeon, or Mizpah, betrays the aspect of the country. As an appellative it is found only in one passage (Ez. xvi. 24-39), in which it occurs four times, each time rendered in the A. V. "high place." But in later Hebrew *rantha* is a recognised word for a hill.—1. One of the cities of the allotment of Benjamin (Josh. xviii. 25). Its place in the list is between Gibeon and Beeroth. There is a more precise specification of its position in the invaluable catalogue of the places north of Jerusalem which are enumerated by Isaiah as disturbed by the gradual approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively dislodges or alarms Geba, Ramah, and Gibeah of Saul. Each of these may be recognised with almost absolute certainty at the present day. Geba is *Jeba*, on the south brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is *er-Râm* (its name the exact equivalent of ha-Râmah) on the elevation which its ancient name implies. Its distance from the city is two hours, i. e. five English or six Roman miles. Its position is also in close agreement with the notices of the Bible (Judg. iv. 5, xix. 13; 1 K. xv. 17, 21, 22; 2 Chr. xvi. 1, 5, 6; Jer. xl. 1, &c.). Its proximity to Gibeah is implied in 1 Sam. xxii. 6; Hos. v. 8; Ezr. ii. 26; Neh. vii. 30: the last two of which passages show also that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the list, and may be a distinct place situated further west, nearer the plain. *Er-Râm* was not unknown to the mediæval travellers, by some of whom it is recognised as Ramah, but it was reserved for Dr. Robinson to make the identification certain and complete.—2. The home of Elkanah, Samuel's father (1 Sam. i. 19, ii. 11), the birthplace of Samuel himself, his home and official residence, the site of his altar (vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18), and finally his burial-place (xxv. 1, xxviii. 3). In the present instance it is a contracted form of RAMATHAIM-ZOPHIM. All that is directly said as to its situation is that it was in Mount Ephraim (1 Sam. i. 1), and this would naturally lead us to seek it in the neighbourhood of Shechem. But the whole tenor of the narrative of the public life of Samuel (in connexion with which alone this Ramah is mentioned) is so restricted to the region of the

tribe of Benjamin, and to the neighbourhood of Gibeah the residence of Saul, that it seems impossible not to look for Samuel's city in the same locality. On the other hand, the boundaries of Mount Ephraim are nowhere distinctly set forth. In the mouth of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The earliest attempt to identify it is in the *Onomasticon* of Eusebius, and was not so happy. His words are "Armathem Seipha: the city of Helkana and Samuel; it lies near Diospolis: thence came Joseph, in the Gospels said to be from Arimathæa." Diospolis is Lydda, the modern *Lüdd*, and the reference of Eusebius is no doubt to *Ramleh*, the well-known modern town two miles from *Lüdd*. But there is another tradition, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, which places the residence of Samuel on the lofty and remarkable eminence of *Nebî Samu'îl*, which rises four miles to the N.W. of Jerusalem, and which its height (greater than that of Jerusalem itself), its commanding position, and its peculiar shape, render the most conspicuous object in all the landscapes of that district, and make the names of Ramah and Zophim exceedingly appropriate to it. Since the days of Arculf the tradition appears to have been continuous. Here, then, we are inclined, in the present state of the evidence, to place the Ramah of Samuel. And there probably would never have been any resistance to the traditional identification if it had not been thought necessary to make the position of Ramah square with a passage with which it does not seem to the writer to have necessarily any connexion. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. ix., x.) was Samuel's own city Ramah. On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighbourhood of Bethlehem. (a) Gesenius suggests the *Jebel Furcidis*, four miles south-east of Bethlehem, the ancient Herodium, the "Frank mountain" of more modern times. (b) Dr. Robinson proposer *Sôba*, in the mountains six miles west of Jerusalem, as the possible representative of Zophim. (c) Van de Velde, following the lead of Wolcott, argues for *Rameh* (or *Ramet el-Khalîf*), a well-known site of ruins about two and a half miles north of Hebron. (d) Dr. Bonar adopts *er-Râm*, which he places a short distance north of Bethlehem, east of Rachel's sepulchre. Two suggestions in an opposite direction must be noticed:—(a) That of Ewald, who places Ramathaim-zophim at *Ram-allah*, a mile west of *el-Birch*, and nearly five north of *Nebî Samu'îl*. (b) That of Schwarz, who, starting from Gibeah-of-Saul as the home of Kish, fixes upon *Rameh* north of Samaria and west of *Sanur*, which he supposes also to be Ramoth or Jarmuth, the Levitical city of Issachar.—3. One of the nineteen fortified places of Naphtali (Josh. xix. 36) named between Adamah and Hazor. It would appear, if the order of the list may be accepted, to have been in the mountainous country N.W. of the Lake of Gennesareth. In this district a place bearing the name of *Rameh* has been discovered by Dr. Robinson. It lies on the main track between *Akha* and the north end of the Sea of Galilee, and about eight

miles E.S.E. of *Safed*.—4. One of the landmarks on the boundary (A. V. "coast") of Asher (Josh. xix. 29), apparently between Tyre and Zidon. Two places of the same name have been discovered in the district allotted to Asher; the one east of Tyre, and within about three miles of it, the other more than ten miles off, and south-east of the same city. If either of these places represent the Ramah in question, it certainly seems safer to identify it with that nearest to Tyre and the sea-coast.—5. By this name in 2 K. viii. 29 and 2 Chr. xxii. 6, only, is designated RAMOTH-GILEAD.—6. A place mentioned in the catalogue of those re-inhabited by the Benjamites after their return from the Captivity (Neh. xi. 33). It may be the Ramah of Benjamin (above, No. 1) or the Ramah of Samuel, but its position in the list (remote from Geba, Michmas, Bethel, ver. 31, comp. Ezr. ii. 26, 28) seems to remove it further west, to the neighbourhood of Lod, Hadid, and Ono. The situation of the modern *Ramleh* agrees very well with this, a town too important and too well placed not to have existed in the ancient times.

Ra'math-Le'hi. The name which purports to have been bestowed by Samson on the scene of his slaughter of the thousand Philistines with the jaw-bone (Judg. xv. 17). "He cast away the jaw-bone out of his hand, and called that place 'Ramath-lehi,'"—as if "heaving of the jaw-bone." But Gesenius has pointed out that as they at present stand the words are exactly parallel to Ramath-mizpeh and Ramath-negeb, and mean the "height of Lechi."

Ra'math-Miz'peh. A place mentioned, in Josh. xiii. 26 only, in the specification of the territory of Gad, apparently as one of its northern landmarks. There is no reason to doubt that it is the same place with that early sanctuary at which Jacob and Lavan set up their cairn of stones, and which received the names of MIZPEH, Galeed, and Jegar Sahadutha; and it seems very probable that all these are identical with Ramoth-Gilead, so notorious in the later history of the nation.

Ra'math of the South, more accurately Ramah of the South. One of the towns in the allotment of Simeon (Josh. xix. 8), apparent at its extreme south limit. It appears from this passage to have been another name for BAALATH-BEER. Van de Velde takes it as identical with Ramath-Lehi, which he finds at *Tell el-Lekiyeh*; but this appears to be too far south. It is in all probability the same place as SOUTH RAMOTH (1 Sam. xxx. 27).

Ramatha'im-Zo'phim. The full form of the name of the town in which Elkanah, the father of the prophet Samuel, resided. It is given in its complete shape in the Hebrew text and A. V. but once (1 Sam. i. 1). Elsewhere (i. 19, ii. 11, vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18, 19, 22, 23, xx. 1, xxi. 1, xxviii. 3) it occurs in the shorter form of Ramah. [RAMAH, 2.] Ramathaim, if interpreted as a Hebrew word, is dual—"the double eminence." This may point to a peculiarity in the shape or nature of the place, or may be an instance of the tendency, familiar to all students, which exists in language to force an archaic or foreign name into an intelligible form. Of the force of "Zophim" no probable explanation has been given. It was an ancient name on the east of Jordan (Num. xxiii. 14), and there, as here, was attached to an eminence. Even without the testimony of the LXX. there is no doubt, from the narrative

itself, that the Ramah of Samuel—where he lived, built an altar, died, and was buried—was the same place as the Ramah or Ramathaim-Zophim in which he was born. Of its position nothing, or next to nothing, can be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called NAIOTH (xix. 18, &c., xx. 1); and it had also in its neighbourhood a great well, known as the well of Has-Sechu (xix. 22). But unfortunately these scanty particulars throw no light on its situation. In the 4th century Ramathaim-Zophim was located near Diospolis (Lydda), probably at Ramleh; but that is quite untenable, and quickly disappeared in favour of another, probably older, certainly more probable tradition, which placed it on the lofty and remarkable hill four miles N.W. of Jerusalem, known to the early pilgrims and Crusaders as Saint Samuel and Mont Joye. It is now universally designated *Nebi Samuel*—the "Prophet Samuel." [RAMAH, No. 2.]

Ra'mathem. One of the three "governments" which were added to Judaea by king Demetrius Nicator, out of the country of Samaria (1 Macc. xi. 34). It no doubt derived its name from a town of the name of KAMATHAIM, probably that renowned as the birthplace of Samuel the Prophet, though this cannot be stated with certainty.

Ra'mathite, the. Shimei the Ramathite had charge of the royal vineyards of King David (1 Chr. xxvii. 27). The name implies that he was native of a place called Ramah, but there is no tradition or other clue by which the particular Ramah to which this worthy belonged can be identified.

Ra'meses, or Raam'ses, a city and district of Lower Egypt. There can be no reasonable doubt that the same city is designated by the Rameses and Raameses of the Heb. text, and that this was the chief place of the land of Rameses, all the passages referring to the same region. The first mention of Rameses is in the narrative of the settling by Joseph of his father and brethren in Egypt, where it is related that a possession was given them "in the land of Rameses" (Gen. xlvii. 11). This land of Rameses, either corresponds to the land of Goshen, or was a district of it, more probably the former, as appears from a comparison with a parallel passage (6). The name next occurs as that of one of the two store-cities built for the Pharaoh who first oppressed the children of Israel (Ex. i. 11). There can be no doubt that Raames is Rameses in the land of Goshen. In the narrative of the Exodus we read of Rameses as the starting-point of the journey (Ex. xii. 37; see also Num. xxxiii. 3, 5). If then we suppose Rameses or Raames to have been the chief town of the land of Rameses, either Goshen itself or a district of it, we have to endeavour to determine its situation. Lepsius supposes that Abou-Kesheyd is on the site of Rameses. His reasons are, that in the LXX. Heroöpolis is placed in the land of Rameses, in a passage where the Heb. only mentions "the land of Goshen" (Gen. xlvii. 28), and that there is a monolithic group of Abou-Kesheyd representing Tum, and Ra, and between them, Rameses II., who was probably there worshipped. The Biblical narrative of the position of Rameses, seems to point to the western part of the land of Goshen, since two full marches, and part at least of a third, brought the Israelites from this town to the Red Sea; and the narrative appears to indicate a route for the chief part directly towards

the sea. The one fact that Abou-Kesheyd is within about eight miles of the ancient head of the gulf, seems to us fatal to Lepsius's identification. There is good reason to suppose that many cities in Egypt bore this name.

Ramesse = RAMESSES (Jud. i. 9).

Ramiah. A layman of Israel, one of the sons of Parosh (Ezr. x. 25).

Ramoth. One of the four Levitical cities of Issachar according to the catalogue in 1 Chr. (vi. 73).

Ramoth. An Israelite layman, of the sons of Bani (Ezr. x. 29).

Ramoth Gil'ead, the "heights of Gilead." One of the great fastnesses on the east of Jordan, and the key to an important district, as is evident not only from the direct statement of 1 K. iv. 13, that it commanded the regions of Argob and of the towns of Jair, but also from the obstinacy with which it was attacked and defended by the Syrians and Jews in the reigns of Ahab, Ahaziah, and Joram. It seems probable that it was identical with Ramath Mizpeh (Josh. xiii. 26), which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban. It was the city of refuge for the tribe of Gad (Deut. iv. 43; Josh. xx. 8, xxi. 38). We next encounter it as the residence of one of Solomon's commissariat officers (1 K. iv. 13). In the second Syrian war Ramoth-Gilead played a conspicuous part. During the invasion related in 1 K. xv. 20, or some subsequent incursion, this important place had been seized by Benhadad I. from Omri. The incidents of Ahab's expedition are well known. During Ahaziah's short reign we hear nothing of it, it probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Joram time to renew the siege. He was more fortunate than Ahab. The town was taken by Israel, and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. ix. 14). Henceforward Ramoth-Gilead disappears from our view. Eusebius and Jerome specify the position of Ramoth as 15 miles from Philadelphia (*Amman*). In this case they are at variance with each other, Eusebius placing it west, and Jerome east of Philadelphia. The latter position is obviously untenable. The former is nearly that of the modern town of *es-Salt*, which Gesenius proposes to identify with Ramoth-Gilead. Ewald, indeed, proposes a site further north as more probable. He suggests *Reimun*, a few miles west of *Jerash*. The position assigned to it by Eusebius answers tolerably well for a site bearing the name of *Jel'ad*, exactly identical with the ancient Hebrew *Gilead*, which is mentioned by Seetzen as four or five miles north of *es-Salt*. And probably this situation is not very far from the truth.

Ramoth in Gil'ead, Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xii. 3. Elsewhere the shorter form, RAMOTH GILEAD, is used.

Rams' Horns. [CORNET; JUBILEE.]

Rams' Skins dyed red formed part of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5); of which they served as one of the inner coverings. There is no doubt that the A. V., following the LXX. and Vulgate, and the Jewish interpreters, is correct. The original words, it is true, admit of being rendered thus—"skins of red rams." The red ram is by Ham. Smith identified

with the Aoudal sheep (*Ammotragus Tragelaphus*).

Rapha. Son of Binea, among the descendants of Saul (1 Chr. viii. 37).

Raphael. "One of the seven holy angels which . . . go in and out before the glory of the Holy One" (Tob. xii. 15). According to another Jewish tradition, Raphael was one of the four angels which stood round the throne of God (Michael, Uriel, Gabriel, Raphael). In Tobit he appears as the guide and counsellor of Tobias.

Rapha'im. The name of an ancestor of Judith (Jud. viii. 1).

Raphon. A city of Gilead, under the walls of which Judas Maccabaeus defeated Timotheus (1 Macc. v. 37 only). It may have been identical with Raphana, which is mentioned by Pliny as one of the cities of the Decapolis, but with no specification of its position. In Kiepert's map accompanying Wetzstein's *Hauran*, &c. (1860), a place named *Er-Rafe* is marked. If *Er-Rafe* be Raphana we should expect to find large ruins.

Raphu. The father of Palti, the Benjamite spy (Num. xiii. 9).

Ras'ses, Children of. One of the nations whose country was ravaged by Holofernes in his approach to Judaea (Jud. ii. 23 only). The old Latin version reads *Thiras et Rasis*. Wolff restores the original Chaldee text of the passage as Thars and Rosos, and compares the latter name with Khosus, a place on the Gulf of Issus.

Rathumus. "Rathumus the story writer" of 1 Esd. ii. 16, 17, 25, 30, is the same as "REIMUM the chancellor" of Ezr. iv. 8, 9, 17, 23.

Raven, the well-known bird of that name which is mentioned in various passages in the Bible. There is no doubt that the Heb. *'oreb* is correctly translated. This bird was not allowed as food by the Mosaic law (Lev. xi. 15). The word *'oreb* is doubtless used in a generic sense, and includes other species of the genus *Cornus*, such as the crow (*C. corone*), and the hooded crow (*C. cornic*). The LXX. and Vulg. differ materially from the Hebrew and our Authorised Version in Gen. viii. 7, for whereas in the Hebrew we read "that the raven went forth to and fro [from the ark] until the waters were dried up," in the two old versions named above, together with the Syriac, the raven is represented as "not returning until the water was dried from off the earth." The subject of Elijah's sustenance at Cherith by means of ravens has given occasion to much fanciful speculation. It has been attempted to show that the *'orebim* ("ravens") were the people of Orbo, a small town near Cherith. Others have found in the ravens merely merchant; while Michaelis has attempted to show that Elijah merely plundered the ravens' nests of hares and other game! To the fact of the raven being a common bird in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may perhaps be traced the reason for its being selected by our Lord and the inspired writers as the especial object of God's providing care. The raven belongs to the order *Insectores*, family *Corvidae*.

Razis. "One of the elders of Jerusalem," who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 Macc. xiv. 37-46). In dying he is reported to have expressed his faith in a resurrection (ver. 46). This act of suicide, which was

wholly alien to the spirit of the Jewish law and people, has been the subject of considerable discussion.

Razor. Besides other usages, the practice of shaving the head after the completion of a vow, must have created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, viii. 7; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Ez. v. 1; Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors (see 2 Sam. xiv. 26). Like the Levites, the Egyptian priests were accustomed to shave their whole bodies.

Rea'ia. A Reubenite, son of Micah, and apparently prince of his tribe (1 Chr. v. 5). The name is identical with

Reaiah. 1. A descendant of Shubal, the son of Judah (1 Chr. iv. 2).—2. The children of Reaiah were a family of Nethinim who returned from Babylon with Zerubbabel (Ez. ii. 47; Neh. vii. 50).

Re'ba. One of the five kings of the Midianites slain by the children of Israel in their avenging expedition, when Balaam fell (Num. xxi. 8; Josh. xiii. 21).

Rebecca. The Greek form of the name REBEKAH (Rom. ix. 10 only).

Rebekah, daughter of Bethuel (Gen. xxii. 23) and sister of Laban, married to Isaac, her father's cousin. She is first presented to us in the account of the mission of Eliezer to Padan-aram (Gen. xxiv.), in which his interview with Rebekah, her consent and marriage are related. For nineteen years she was childless; then, after the prayers of Isaac and her journey to inquire of the Lord, Esau and Jacob were born, and while the younger was more particularly the companion and favourite of his mother (xv. 19-28) the elder became a grief of mind to her (xxvi. 35). When Isaac was driven by a famine into the lawless country of the Philistines, Rebekah's beauty became, as was apprehended, a source of danger to her husband. It was probably a considerable time afterwards when Rebekah suggested the deceit that was practised by Jacob on his blind father. She directed and aided him in carrying it out, foresaw the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). It has been conjectured that she died during Jacob's sojourn in Padan-aram. St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

Re'chab. 1. The father or ancestor of Jehonadab (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxxv. 6-19), identified by some writers with Hobab.—2. One of the two "captains of bands," whom Ishbosheth took into his service, and who conspired to murder him (2 Sam. iv. 2).—3. The father of Mulchiah, ruler of part of Beth-hacerem (Neh. iii. 14).

Rechabites. The tribe thus named appears before us in one memorable scene. Their history before and after it lies in some obscurity.—(I.) In 1 Chr. ii. 55, the house of Rechab is identified with a section of the Kenites, who came into Canaan with the Israelites and retained their nomadic habits, and the name of Hammath is mentioned as the patriarch of the whole tribe. It has been inferred from this passage that the descendants of Rechab belonged to a branch of the Kenites settled from the first at Jabez in Judah. But it is more pro-

bable that this passage refers to the locality occupied by the Rechabites after their return from the captivity. Of Rechab himself nothing is known.

He may have been the father, he may have been the remote ancestor of Jehonadab. The name may have pointed, as in the robber-chief of 2 Sam. iv. 2, to a conspicuous form of the wild Bedouin life, and Jehonadab, the son of the *Rider*, may have been, in part at least, for that reason, the companion and friend of the fierce captain of Israel who drives as with the fury of madness (2 K. ix. 20). Boulduc infers from 2 K. ii. 12, xiii. 14, that the two great prophets Elijah and Elisha were known, each of them in his time, as the chariot (*Receb*) of Israel. He infers from this that the special disciples of the prophets, who followed them in all their austerity, were known as the "sons of the chariot," *B'nei Kocob*, and that afterwards, when the original meaning had been lost sight of, this was taken as a patronymic, and referred to an unknown Rechab.—(II.) The personal history of JEHOHADAB has been dealt with elsewhere. He and his people had all along been worshippers of Jehovah, circumcised though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of Baal was accordingly not less offensive to them than to the Israelites. The luxury and licence of Phœnician cities threatened the destruction of the simplicity of their nomadic life (Amos ii. 7, 8, vi. 3-6). A protest was needed against both evils, and as in the case of Elijah, and of the Nazaretes of Amos ii. 11, it took the form of asceticism. There was to be a more rigid adherence than ever to the old Arab life. They were to drink no wine, nor build house, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xxxv. 6, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule. The Nabataeans and Wahabys supply us with a striking parallel.—(III.) The invasion of Judah by Nebuchadnezzar in B.C. 607, drove the Rechabites from their tents. Some inferences may be safely drawn from the facts of Jer. xxxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3) bears the same name. Their rigid Nazarete life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within its precincts. Here they are tempted and are proof against the temptation. The history of this trial ends with a special blessing: "Jonadab, the son of Rechab, shall not want a man to stand before me for ever" (ver. 19). The words "to stand before me," are essentially liturgical. The Rechabites were solemnly adopted into the families of Israel, and were recognised as incorporated into the tribe of Levi.—(IV.) It remains for us to see whether there are any traces of their after-history in the Biblical or later writers.

(1.) We have the singular heading of the Ps. lxxi. in the LXX. version, indicating that the "sons of Jonadab" shared the captivity of Israel. (2.) There is the significant mention of a son of Rechab in Neh. iii. 14, as co-operating with the priests, Levites, and princes in the restoration of the wall of Jerusalem. (3.) The mention of the house or Rechab in 1 Chr. ii. 55, though not without diffi-

culty, points, there can be little doubt, to the same conclusion. The Rechabites have become Scribes. They give themselves to a calling which, at the time of the return from Babylon was chiefly if not exclusively, in the hands of Levites. The close juxtaposition of the Rechabites with the descendants of David in 1 Chr. iii. 1, shows also in how honourable an esteem they were held at the time when that book was compiled. (4.) The account of the martyrdom of James the Just given by Hegesippus, brings the name of the Rechabites once more before us, and in a very strange connexion. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rechab, the son of Rechabim, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. We may accept Hegesippus as an additional witness to the existence of the Rechabites as a recognised body up to the destruction of Jerusalem, sharing in the ritual of the Temple. (5.) Some later notices are not without interest. Benjamin of Tudela in the 12th century mentions that near El Jubar (= Pumbeditha) he found Jews who were named Rechabites. They tilled the ground, kept flocks and herds, abstained from wine and flesh, and gave tithes to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. A later traveller, Dr. Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. xxv. living near Mecca. When he came near Senna he came in contact with a tribe, the Beni-Khaibr, who identified themselves with the sons of Jonadab. With one of them, Mousa, Wolff conversed. In a later journal he mentions a second interview with Mousa, describes them as keeping strictly to the old rule, calls them now by the name of the B'nê-Arhab, and says that B'nê Israel of the tribe of Dan live with them. It has been thought right to give these statements for what they are worth.

Re'chah. In 1 Chr. iv. 12, Beth-rapha, Paseah, and Tehinnah the father, or founder, of Ir-nahash, are said to have been "the men of Rechah."

Recorder. an officer of high rank in the Jewish state, exercising the functions, not simply of an annalist, but of chancellor or president of the privy council. In David's court the recorder appears among the high officers of his household (2 Sam. viii. 16, xx. 24; 1 Chr. xviii. 15). In Solomon's, he is coupled with the three secretaries, and is mentioned last, probably as being their president (1 K. iv. 3; comp. 2 K. xviii. 18, 37; 2 Chr. xxxiv. 8).

Red Sea. The sea known to us as the Red Sea was by the Israelites called "the sea" (Ex. xiv. 2, 9, 16, 21, 28; xv. 1, 4, 8, 10, 19; Josh. xxiv. 6, 7; and many other passages); and specially "the sea of *sûph*" (Ex. x. 19; xiii. 18; xv. 4, 22; xiii. 31; Num. xiv. 25; &c.). It is also perhaps written *sûphâh* in Num. xxi. 14, rendered "Red Sea" in A. V.; and in like manner, in Deut. i. 1, *sûph*. The LXX. always render it *ἡ ἐρυθρὰ θάλασσα* (except in Judg. xi. 16). Of the names of this sea (1.) *yām* signifies "the sea," or any sea. It is also applied to the Nile (exactly as the Arabic *bahr* is so applied) in Nah. iii. 8. (2.) *yām-sûph*. The meaning of *sûph*, and the reason of its being applied to this sea, have given rise to much learned controversy. Gesenius renders it *rush*, *reed*, *sea-weed*. It is mentioned in the O. T. almost always in connexion with the sea of the Exodus; it also occurs in

the narrative of the exposure of Moses (Ex. ii. 8), and in Is. xix. 6, where it is rendered "flag" in the A. V. It only occurs in one place besides those already referred to: in Jon. ii. 5 (A. V. "weeds"). The *sûph* of the sea, it seems quite certain, is a *sea-weed resembling wool*. Such sea-weed is thrown up abundantly on the shores of the Red Sea. But it may have been also applied to any substance resembling wool, produced by a *fluvial rush*, such as the papyrus, and hence by a synecdoche to such rush itself. (3.) *yôbr*, signifies "a river." It seems to apply to "a great river," or the like, and also to "an arm of the sea;" and perhaps to "a sea" absolutely; like the Arabic *bahr*. Gesenius says it is almost exclusively used of the Nile. From a comparison of all the passages in which it occurs there appears to be no reason for supposing that *yôbr* applies exclusively to the Nile. In the passages relating to the exposure of Moses it appears to apply to the ancient extension of the Red Sea towards Tanis (ZOAN, Avaris), or to be the ancient canal through which the water of the Nile passed to the "tongue of the Egyptian Sea." (4.) *ἡ ἐρυθρὰ θάλασσα*. The origin of this appellation has been the source of more speculation even than the obscure *sûph*; for it lies more within the range of general scholarship. The authors of theories concerning it may be divided into two schools. The first have ascribed it to some natural phenomenon; such as the singularly red appearance of the mountains of the western coast; the red colour of the water sometimes caused by the presence of zoophytes; the red coral of the sea; the red sea-weed; and the red streaks that have been seen in great numbers, &c. The second have endeavoured to find an etymological derivation. Of these the earliest (European) writers proposed a derivation from Edom, "red," by the Greeks translated literally. The Greeks and Romans tell us that the sea received its name from a great king, Erythras, who reigned in the adjacent country: the stories that have come down to us appear to be distortions of the tradition that Himyer was the name of apparently the chief family of Arabia Felix, the great South-Arabian kingdom, whence the Himyerites, and Homeritæ. Himyer appears to be derived from the Arabic "ahmar," *red*. We can scarcely doubt, on these etymological grounds, the connexion between the Phœnicians and the Himyerites, or that in this is the true origin of the appellation of the Red Sea. But when the ethnological side of the question is considered, the evidence is much strengthened. The South-Arabian kingdom was a Joktanite (or Shemite) nation mixed with a Cushite. The Red Sea, therefore, was most probably the Sea of the Red men. — *Ancient Limits.*—The most important change in the Red Sea has been the drying up of its northern extremity, "the tongue of the Egyptian Sea." The land about the head of the gulf has risen, and that near the Mediterranean become depressed. The head of the gulf has consequently retired gradually since the Christian era. Thus the prophecy of Isaiah has been fulfilled (xi. 15, xix. 5): the tongue of the Red Sea has dried up for a distance of at least 50 miles from its ancient head. An ancient canal conveyed the waters of the Nile to the Red Sea flowing through the Wâdi-t-Tumeylât, and irrigating with its system of water-channels a large extent of country. The drying up of the head of the gulf appears to have been one of the chief causes of the neglect and ruin of this canal. The country, for

the distance above indicated, is now a desert of gravelly sand, with wide patches about the old seabottom, of rank marsh land, now called the "Bitter Lakes." At the northern extremity of this salt waste is a small lake sometimes called the lake of Heroöpolis: the lake is now Birket et-Timäh, "the lake of the Crocodile," and is supposed to mark the ancient head of the gulf. The canal that connected this with the Nile was of Pharaonic origin. It was anciently known as the "Fossa Regum," and the "canal of Hero." The time at which the canal was extended, after the drying up of the head of the gulf, to the present head is uncertain, but it must have been late, and probably since the Mohammedan conquest. Traces of the ancient channel throughout its entire length to the vicinity of Bubastis, exist at intervals in the present day. The land north of the ancient head of the gulf is a plain of heavy sand, merging into marsh-land near the Mediterranean coast, and extending to Palestine. This region, including Wádi-t-Tumeylät, was probably the frontier land occupied in part by the Israelites, and open to the incursions of the wild tribes of the Arabian desert.—*Physical Description.*—In extreme length the Red Sea stretches from the Straits of Báb el-Mendebeh (or rather Rás Báb el-Mendebeh) in lat. 12° 40' N., to the modern head of the Gulf of Suez, lat. 30° N. Its greatest width may be stated roughly at about 200 geographical miles; this is about lat. 16° 30', but the navigable channel is here really narrower than in some other portions. From shore to shore, its narrowest part is at Rás Benás, lat. 24°, on the African coast, to Rás Berdeeh opposite, a little north of Yembo', the port of El-Medeeneh; and thence northwards to Rás Mohammad, the sea maintains about the same average width of 100 geographical miles. At Rás Mohammad, the Red Sea is split by the granitic peninsula of Sinai into two gulfs: the westernmost, or Gulf of Suez, is now about 130 geographical miles in length, with an average width of about 18, though it contracts to less than 10 miles: the easternmost, or Gulf of El-'Akabeh, is only about 90 miles long, from the Straits of Tirán, to the 'Akabeh, and of proportionate narrowness. In mid-channel, exclusive of the Gulf of Suez, there is generally a width of 100 miles clear, except the Daedalus reef. The bottom in deep soundings is in most places sand and stones, from Suez as far as Juddah; and thence to the straits it is commonly mud. The deepest sounding in the excellent Admiralty chart is 1054 fathoms, in lat. 22° 30'. Journeying southwards from Suez, on our left is the peninsula of Sinai: on the right, is the desert coast of Egypt, of limestone formation like the greater part of the Nile valley in Egypt, the cliffs on the sea-margin stretching landwards in a great rocky plateau, while more inland a chain of volcanic mountains (beginning about lat. 28° 4' and running south) rear their lofty peaks at intervals above the limestone, generally about 15 miles distant. This coast is especially interesting in a Biblical point of view, for here were some of the earliest monasteries of the Eastern Church, and in those secluded and barren mountains lived very early Christian hermits. South of the "Elba" chain, the country gradually sinks to a plain, until it rises to the highland of Geedán, lat. 15°, and thence to the straits extends a chain of low mountains. The greater part of the African coast of the Red Sea is sterile, sandy, and thinly peopled. The Gulf of El-'Akabeh (i.e. "of the Mountain-road")

is the termination of the long valley of the Ghór or 'Arabah that runs northwards to the Dead Sea. It is itself a narrow valley; the sides are lofty and precipitous mountains, of entire barrenness; the bottom is a river-like sea, running nearly straight for its whole length of about 90 miles. It has the appearance of a narrow deep ravine, extending nearly a hundred miles in a straight direction. The western shore is the peninsula of SINAI. The sea, from its dangers, and sterile shores, is entirely destitute of boats. The Arabian coast outside the Gulf of the 'Akabeh is skirted by the range of Arabian mountains, which in some few places approach the sea, but generally leave a belt of coast country, called Tihameh, on the Ghór, like the Shephalah of Palestine. This tract is generally a sandy parched plain, thinly inhabited; these characteristics being especially strong in the north. The mountains of the Hejáz consist of ridges running parallel towards the interior, and increasing in height as they recede. The distant ranges have a rugged pointed outline, and are granitic; nearer the sea many of the hills are fossiliferous lime-stone, while the bench hills consist of light-coloured sandstone, fronted by and containing large quantities of shells and masses of coral. The more remarkable mountains are Jebel 'Eyn-Unná, 6090 ft. high near the Straits; a little further south, and close to Mo'eyleh, are mountains rising from 6330 to 7700 ft. A little north of Yembo' is a remarkable group, the pyramidal mountains of Agatharchides; and beyond, about 25 miles distant rises J. Radwá. Further south, J. Subh is remarkable for its magnitude and elevation, which is greater than any other between Yembo' and Jiddah; and still further, but about 80 miles distant from the coast, J. Rás el-Kurá rises behind the Holy city, Mekkeh. The chain continues the whole length of the sea, terminating in the highlands of the Yemen. The coast-line itself, or Tihameh, north of Yembo', is of moderate elevation, varying from 50 to 100 feet, with no beach. To the southward [to Juddah] it is more sandy and less elevated. The coral of the Red Sea is remarkably abundant, and beautifully coloured and variegated. The earliest navigation of the Red Sea (passing by the pre-historical Phœnicians) is mentioned by Herodotus. "Sesostris (Rameses II.) was the first who, passing the Arabian Gulf in a fleet of long vessels, reduced under his authority the inhabitants of the coast bordering the Erythraean Sea." Three centuries later, Solomon's navy was built "in Eziongeber which is beside Elath, on the shore of the Red Sea (Yam Sôph), in the land of Edom" (1 K. ix. 26). It is possible that the sea has retired here as at Suez, and that Eziongeber is now dry land. Jehoshaphat also "made ships of Tharsish to go to Ophir for gold: but they went not, for the ships were broken at Eziongeber" (1 K. xxii. 48). The scene of this wreck has been supposed to be Edh-Dhabab. The fashion of the ancient ships of the Red Sea, or of the Phœnician ships of Solomon, is unknown. From Pliny we learn that the ships were of papyrus and like the boats of the Nile; and this statement was in some measure correct. More precise and curious is El-Makreezee's description, written in the first half of the 15th century, of the ships that sailed from Eydhál on the Egyptian coast to Juddah: "Their 'jelebehs,' which carry the pilgrims on the coast, have not a nail used in them, but their planks are sewed together with fibre, which is taken from the cocoanut-tree, and they

caulk them with the fibres of the wood of the date palm; then they 'pay' them with butter, or the oil of the palma Christi, or with the fat of the kish (squalus carcharias). . . . The sails of these jelebehs are of mats made of the dóm-palm." The fleets appear to have sailed about the autumnal equinox, and returned in December or the middle of January. The Red Sea, as it possessed for many centuries the most important sea-trade of the East, contained ports of celebrity. Of these, Elath and Eziongaber alone appear to be mentioned in the Bible. The Heroöpolite Gulf is of the chief interest: it was near to Goshen; it was the scene of the passage of the Red Sea; and it was the "tongue of the Egyptian Sea." It was also the seat of the Egyptian trade in this sea and to the Indian Ocean. Heroöpolis is doubtless the same as Hero, and its site is probably identified with the modern Abou-Kesheyd, at the head of the old gulf. Suez is a poor town, and has only an unsafe anchorage, with very shoal water. On the shore of the Heroöpolite gulf was also Arsinoë, founded by Ptolemy Philadelphus: its site has not been settled. Berenice, founded by the same, on the southern frontier of Egypt, rose to importance under the Ptolemies and the Romans: it is now of no note. On the western coast was also the anchorage of Myos Hormos, a little north of the modern town El-Kuseyr, which now forms the point of communication with the old route to Coptos. On the Arabian coast the principal ports are Mu'eyleh, Yembo' (the port of El Medeeneh), Juddah (the port of Mekkeh), and Mukhà, by us commonly written Mocha. The commerce of the Red Sea was, in very ancient times, unquestionably great. The earliest records tell of the ships of the Egyptians, the Phœnicians, and the Arabs. But the shoaling of the head of the gulf rendered the navigation, always dangerous, more difficult; it destroyed the former anchorages and made it necessary to carry merchandise across the desert to the Nile. This change appears to have been one of the main causes of the decay of the commerce of Egypt. Since the time of Mohammad the Red Sea trade has been insignificant.

Red Sea, Passage of. The passage of the Red Sea was the crisis of the Exodus. The points that arise are the place of the passage, the narrative, and the importance of the event in Biblical history. 1. It is usual to suppose that the most northern place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. This supposition depends upon the erroneous idea that in the time of Moses the gulf did not extend further to the northward than at present. An examination of the country north of Suez has shown, however, that the sea has receded many miles. The old bed is indicated by the Birket-et-Timsàh, or "Lake of the Crocodile," and the more southern Bitter Lakes, the northernmost part of the former probably corresponding to the head of the gulf at the time of the Exodus. It is necessary to endeavour to ascertain the route of the Israelites before we can attempt to discover where they crossed the sea. The point from which they started was Rameses, a place certainly in the Land of Goshen, which we identify with the Wádi-t-Tumeylât. After the mention that the people journeyed from Rameses to Succoth, and before that of their departure from Succoth, a passage occurs which appears to show the first direction of the journey, and not a change in the route (Ex. xiii. 17, 18). At the end of the second day's journey the camping-place was

at Etham "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6). Here the Wádi-t-Tumeylât was probably left, as it is cultivable and terminates in the desert. The first passage relating to the journey, after the mention of the encamping at Etham, is this, stating a command given to Moses: "Speak unto the children of Israel, that they turn [or 'return'] and encamp [or 'that they encamp again,' וַיִּחַן וַיִּשְׁכְּנוּ] before Pi-hahiroth, between Migdol and the sea, over against Baal-zephon" (Ex. xiv. 2). The rendering of the A. V., "that they turn and encamp," seems to us the most probable of those we have given. At the end of the third day's march, for each camping-place seems to mark the close of a day's journey, the Israelites encamped by the sea. The place of this last encampment, and that of the passage, on the supposition that our views as to the most probable route are correct, would be not very far from the Persepolitan monument. It is here necessary to mention the arguments for and against the common opinion that the Israelites passed near the present head of the gulf. Local tradition is in its favour, but it must be remembered that local tradition in Egypt and the neighbouring countries, judging from the evidence of history, is of very little value. The Muslims suppose Memphis to have been the city at which the Pharaoh of the Exodus resided before that event occurred. From opposite Memphis a broad valley leads to the Red Sea. It is in part called the Wádi-t-Teah, or "Valley of the Wandering." From it the traveller reaches the sea beneath the lofty Gebel-et-Tákah, which rises on the north and shuts off all escape in that direction, excepting by a narrow way along the sea-shore, which Pharaoh might have occupied. The sea here is broad and deep, as the narrative is generally held to imply. All the local features seem suited for a great event. The supposition that the Israelites took an upper route, now that of the Mekkeh caravan, along the desert to the north of the elevated tract between Cairo and Suez, must be mentioned, although it is less probable than that just noticed, and offers the same difficulties. We therefore think that the only opinion warranted by the narrative is that already stated, which supposes the passage of the sea to have taken place near the northernmost part of its ancient extension. The last camping-place was before Pi-hahiroth. It appears that Migdol was behind Pi-hahiroth, and, on the other hand, Baal-zephon and the sea. These neighbouring places have not been identified. From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are that the sea was divided by an east wind, whence we may reasonably infer that it was crossed from west to east, and that the whole Egyptian army perished, which shows that it must have been some miles broad. On the whole we may reasonably suppose about twelve miles as the smallest breadth of the sea. 2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. The strength of Pharaoh's army is not further specified than by the statement that "he took six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (Ex. xiv. 7). With this army, which, even if a small one, was mighty in comparison to the Israelite multitude,

encumbered with women, children, and cattle, Pharaoh overtook the people "encamping by the sea" (9). When the Israelites saw the oppressor's army they were terrified and murmured against Moses. Then Moses encouraged them, bidding them see how God would save them. It seems from the narrative that Moses did not know at this time how the people would be saved, and spoke only from a heart full of faith, for we read, "And THE LORD said unto Moses, Wherefore criest thou unto me? speak unto the children of Israel, that they go forward: but lift thou up thy rod, and stretch out thine hand over the sea, and divide it: and the children of Israel shall go on dry [ground] through the midst of the sea" (15, 16). That night the two armies, the fugitives and the pursuers, were encamped near together. Between them was the pillar of the cloud, darkness to the Egyptians and a light to the Israelites. Perhaps in the camp of Israel the sounds of the hostile camp might be heard on the one hand, and on the other, the roaring of the sea. But the pillar was a barrier and a sign of deliverance. The time was now come for the great decisive miracle of the Exodus. "And Moses stretched out his hand over the sea: and the LORD caused the sea to go [back] by a strong east wind all that night, and made the sea dry [land], and the waters were divided. And the children of Israel went through the midst of the sea upon the dry [ground]: and the waters [were] a wall unto them on their right hand, and on their left" (21, 22, comp. 29). The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier, as the former idea implies a seemingly-needless addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea, and was there miraculously troubled, so that the Egyptians sought to flee (23-25). Then was Moses commanded again to stretch out his hand, and the sea returned to its strength, and overwhelmed the Egyptians, of whom not one remained alive (26-28). In a later passage some particulars are mentioned which are not distinctly stated in the narrative in Exodus. The place is indeed a poetical one, but its meaning is clear, and we learn from it that at the time of the passage of the sea there was a storm of rain with thunder and lightning, perhaps accompanied by an earthquake (Ps. lxxvii. 15-20). 3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times. In them it is the chief fact of Jewish history. It may be inquired how it is that there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exodus according to different chronologers varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary full one hundred. If the lowest date of the beginning of the xviiiith dynasty be taken and the highest date of the Exodus, both which we consider the most

probable of those which have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wanting.

Reed. Under this name we propose noticing the following Hebrew words:—1. *Aymôn* occurs Job xl. 26 (A. V. xli. 2, "hook"), xl. 12 (A. V. xli. 20, "caldron"); Is. ix. 14 (A. V. "rush"). The *aymôn* is mentioned also as an Egyptian plant, in a sentence similar to the last, in Is. xix. 15; while from lviii. 5 we learn that it had a pendulous panicle. There can be no doubt that it denotes some aquatic reed-like plant, whether of the Nat. order *Cyperaceae* or that of *Gramineae*. Celsius has argued in favour of the *Arundo phragmitis*; we are inclined to adopt his opinion. The *Arundo phragmitis* (now the *Phragmites communis*), if it does not occur in Palestine and Egypt, is represented by a very closely allied species, viz. the *A. isiaea* of Delisle. The drooping panicle of this plant will answer well to the "bowing down the head" of which Isaiah speaks. 2. *Gôme*, translated "rush" and "bulrush" by the A. V., without doubt denotes the celebrated paper-reed of the ancients (*Papyrus antiquorum*), a plant of the Sedge family, *Cyperaceae*, which formerly was common in some parts of Egypt. The Hebrew word is found four times in the Bible (Ex. ii. 3; Is. xviii. 2, xxxv. 7; Job viii. 11). According to Bruce the modern Abyssinians use boats made of the papyrus reed. The papyrus reed is not now found in Egypt; it grows, however, in Syria. Dr. Hooker saw it on the banks of Lake Tiberias, a few miles north of the town. The papyrus plant (*Papyrus antiquorum*) has an angular stem from 3 to 6 feet high, though occa-

Papyrus antiquorum

sionally it grows to the height of 14 feet; it has no leaves; the flowers are in very small spikelets, which grow on the thread-like flowering branchlets which form a bushy crown to each stem. 3. *Arôth* is translated "paper-reed" in Is. xix. 7, the only passage where the pl. noun occurs; there is not the slightest authority for this rendering of the A. V. "*Aroth*," says Kimchi, "is the name to designate pot-herbs and green plants." It probably denotes the open grassy land on the banks of the Nile. 4. *Kâneh*, the generic name of a reed of any kind; it occurs in numerous passages of the O. T., and sometimes denotes the "stalk" of wheat (Gen. xli. 5, 22), or the "branches" of the candlestick (Ex. xxv. and xxxvii.); in Job xxxi. 22, *kâneh* denotes the bone of the arm between the elbow and the shoulder (*os humeri*). The word is variously rendered in the A. V. by "stalk," "branch," "bone," "calamus," "reed." Strand (*Flor. Palaest.* 28-30) gives the following names of the reed plants of Palestine:—*Saccharum officinale*, *Cyperus papyrus* (*Papyrus antiquorum*), *C. rotundus* and *C. esculentus*, and *Arundo scriptoria*; but no doubt the species are numerous. The *Arundo donax*, the *A. Aegypti-*

aca (?) of Bove is common on the banks of the Nile, and may perhaps be "the staff of the bruised reed" to which Sennacherib compared the power of Egypt (2 K. xviii. 21; Ez. xxix. 6, 7). The thick stem of this reed may have been used as walking-staves by the ancient Orientals; perhaps the measuring-reed was this plant; at present the dry culms of this huge grass are in much demand for fishing-rods, &c. Some kind of fragrant reed is denoted by the word *kâneh* (Is. xliii. 24; Ez. xxvii. 19; Cant. iv. 14), or more fully by *kâneh bôsem*, see Ex. xxx. 23, or by *kâneh hattôb*, Jer. vi. 20; which the A. V. renders "sweet cane," and "calamus." It was of foreign importation (Jer. vi. 20). Some writers have sought to identify the *kâneh bôsem* with the *Acorus calamus*, the "sweet sedge." Dr. Royle

Cox, D. B.

refers the *κάλανος ἀρωματικός* of Dioscorides to a species of *Andropogon*, which he calls *A. calamus aromaticus*, a plant of remarkable fragrance, and a native of Central India. Still there is no necessity to refer the *kâneh bôsem*, or *hattôb* to the *κάλανος ἀρωματικός* of Dioscorides; it may be represented by Dr. Royle's plant or by the *Andropogon Schoenanthus*, the lemon grass of India and Arabia.

Reelal'ah. One of the children of the province who went up with Zerubbabel (Ez. ii. 2). In Neh. vii. 7 he is called RAAMIAH, and in 1 Esd. v. 8 REPSAIAH.

Reel'ius. This name occupies the place of BIGVAI in Ezr. ii. 2 (1 Esd. v. 8).

Reesal'as. The same as REELATAH or RAAMIAH (1 Esd. v. 8).

Refiner. The refiner's art was essential to the working of the precious metals. It consisted in the separation of the dross from the pure ore, which was effected by reducing the metal to a fluid state by the application of heat, and by the aid of solvents, such as alkali (Is. i. 25) or lead (Jer. vi. 29), which, amalgamating with the dross, permitted the extraction of the unadulterated metal. The instruments required by the refiner were a crucible or furnace, and a bellows or blow-pipe. The workman sat at his work (Mal. iii. 3): he was thus better enabled to watch the process, and let the metal run off at the proper moment.

Refuge, Cities of. [CITIES OF REFUGE.]

Reg'em. A son of Jahdai (1 Chr. ii. 47).

Reg'em-mel'ech. The names of Sherezer and Regem-melech occur in an obscure passage of Zechariah (vii. 2). They were sent on behalf of some of the captivity to make inquiries at the Temple concerning fasting. On referring to Zech. vii. 5, the expression "the people of the land" seems to indicate that those who sent to the Temple were not the captive Jews in Babylon, but those who had returned to their own country; and this being the case it is probable that in ver. 2 "Bethel" is to be taken as the subject, "and Bethel, i. e. the inhabitants of Bethel, sent." From its connexion with Sherezer, the name Regem-melech (lit. "king's friend," comp. 1 Chr. xxvii. 33), was probably an Assyrian title of office.

Region-round-about, the (ἡ περιχωρος). In the Old Test. it is used by the LXX. as the equivalent of the singular Hebrew word *hac-Ciccar* (literally "the round"), which seems in its earliest occurrences to denote the circle or oasis of cultivation in which stood Sodom and Gomorrah and the rest of the five "cities of the Ciccar" (Gen. xiii. 10, 11, 12, xix. 17, 25, 28, 29; Deut. xxxiv. 3). In Matt. iii. 5 and Luke iii. 3 it denotes the populous and flourishing region which contained the towns of Jericho and its dependencies, in the Jordan valley, enclosed in the amphitheatre of the hills of *Quarantana*. It is also applied to the district of Gennesaret (Matt. xiv. 35; Mark vi. 55; Luke vi. 37, vii. 17).

Rehab'iah. The only son of Eliezer, the son of Moses (1 Chr. xiii. 17, xxiv. 21, xxv. 25).

Re'hob. 1. The father of Hadadezer king of Zobah, whom David smote at the Euphrates (2 Sam. viii. 3, 12).—2. A Levite, or family of Levites, who sealed the covenant with Nehemiah (Neh. x. 11).

Re'hob. 1. The northern limit of the exploration of the spies (Num. xiii. 21). It is specified as being "as men come unto Hamath," i. e. at the commencement of the territory of that name, by which

3 E

in the early books of the Bible the great valley of Lebanon, the *Bika'ah* of the prophets, and the *Bika'a* of the modern Arabs, seems to be roughly designated. This seems to fix the position of Rehob as not far from *Tell el-Kady* and *Banias*. No trace of the name of Rehob or Beth-rehob has yet been met with in this direction. Dr. Robinson proposes to identify it with *Hünin*. But this, though plausible, has no certain basis. Inasmuch, however, as Beth-rehob is distinctly stated to have been "far from Zidon" (Judg. xviii. 28), it must be a distinct place from—2. one of the towns allotted to Asher (Josh. xix. 28).—3. Asher contained another Rehob (Josh., xix. 30); but the situation of this, like the former, remains at present unknown.

Rehoboam, son of Solomon, by the Ammonite princess Naamah (1 K. xiv. 21, 31), and his successor (1 K. xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly cemented. The powerful Ephraim could never brook a position of inferiority. When Solomon's strong hand was withdrawn the crisis came. Rehoboam selected Shechem as the place of his coronation, probably as an act of concession to the Ephraimites, and perhaps in deference to the suggestions of those old and wise counsellors of his father, whose advice he afterwards unhappily rejected. The people demanded a remission of the severe burdens imposed by Solomon, and Rehoboam promised them an answer in three days, during which time he consulted first his father's counsellors, and then the young men "that were grown up with him, and which stood before him." Rejecting the advice of the elders to conciliate the people at the beginning of his reign, he returned as his reply the frantic bravado of his contemporaries. Thereupon rose the formidable song of insurrection, heard once before when the tribes quarrelled after David's return from the war with Absalom. Rehoboam sent Adoram or Adoniram (1 K. iv. 6; 2 Sam. xx. 24) to reduce the rebels to reason, but he was stoned to death by them; whereupon the king and his attendants fled to Jerusalem. So far all is plain, but there is a doubt as to the part which Jeroboam took in these transactions. According to 1 K. xii. 3 he was summoned by the Ephraimites from Egypt to be their spokesman at Rehoboam's coronation, and actually made the speech in which a remission of burdens was requested. But, in apparent contradiction to this, we read in ver. 20 of the same chapter that after the success of the insurrection and Rehoboam's flight, "when all Israel heard that Jeroboam was come again, they sent and called him unto the congregation and made him king." But there is reason to think that ver. 3 has been interpolated. On Rehoboam's return to Jerusalem he assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin, in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Shemaiah (1 K. xii. 24): still during Rehoboam's lifetime peaceful relations between Israel and Judah were never restored (2 Chr. xii. 15; 1 K. xiv. 30). Rehoboam now occupied himself in strengthening the territories which remained to him, by building a number of fortresses (2 Chr. xi. 6-10). The pure worship of God was maintained in Judah. But Rehoboam did not check the introduction of heathen abominations into his capital: the lascivious worship of *Ashtoreth* was allowed to exist by the side of the

true religion, "images" were set up, and the worst immoralities were tolerated (1 K. xiv. 22-24). These evils were punished and put down by the terrible calamity of an Egyptian invasion. In the 5th year of Rehoboam's reign the country was invaded by a host of Egyptians and other African nations under Shishak, numbering 1200 chariots, 60,000 cavalry, and a miscellaneous multitude of infantry. The line of fortresses which protected Jerusalem to the W. and S. was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the temple and palace, including his golden shields, 200 of the larger, and 300 of the smaller size (1 K. x. 16, 17). Shishak's success is commemorated by sculptures discovered by Champollion on the outside of the great temple at Karnak, where among a long list of captured towns and provinces occurs the name *Melchî Judah* (kingdom of Judah). After this great humiliation the moral condition of Judah seems to have improved (2 Chr. xii. 12), and the rest of Rehoboam's life to have been unmarked by any events of importance. He died B.C. 958, after a reign of 17 years, having ascended the throne B.C. 975 at the age of 41 (1 K. xiv. 21; 2 Chr. xii. 13). He had 18 wives, 60 concubines, 28 sons, and 60 daughters.

Rehoboth. The third of the series of wells dug by Isaac (Gen. xxvi. 22). The position of Geiar has not been definitely ascertained, but it seems to have lain a few miles to the S. of Gaza and nearly due E. of Beersheba. A *Wady Ruhaibeh*, containing the ruins of a town of the same name, with a large well, is crossed by the road from *Khan en-Nidlu* to Hebron, by which Palestine is entered on the South. It lies about 20 miles S.W. of *Bir es-Seba*, and more than that distance S. of the most probable situation of Geiar. It therefore seems unsafe without further proof to identify it with Rehoboth.

Rehoboth, the City. One of the four cities built by Asshur, or by Nimrod in Asshur, according as this difficult passage is translated (Gen. x. 11). Nothing certain is known of its position. The name of *Rahabeh* is still attached to two places in the region of the ancient Mesopotamia. They i.e., the one on the western and the other on the eastern bank of the Euphrates, a few miles below the confluence of the *Khabâr*. Both are said to contain extensive ancient remains. That on the eastern bank bears the affix of *malik* or royal, and this Bunsen (*Bibelwerk*) and Kalisch (*Genesis*, 261) propose as the representative of Rehoboth. Its distance from *Kalah-Sheryhat* and *Ninvid* (nearly 200 miles) is perhaps an obstacle to this identification. Sir H. Rawlinson suggests *Selemtiyah* in the immediate neighbourhood of *Kalah*.

Rehoboth by the River. The city of a certain Saul or Shaul, one of the early kings of the Elomites (Gen. xxxvi. 37; 1 Chr. i. 48). The affix, "the river," fixes the situation of Rehoboth as on the Euphrates. The name still remains attached to two spots on the Euphrates; the one, simply *Rahabeh*, on the right bank, eight miles below the junction of the *Khabâr*, and about three miles west of the river, the other four or five miles further down on the left bank. The latter is said to be called *Rahabeh-malik*, i.e. "royal," and is on this ground identified by the Jewish commentators with the city of Saul.

Rehum. 1. One of the "children of the pro-

vince" who went up from Babylon with Zerubbabel (Ezr. ii. 2).—2. "Rehum the chancellor" (Ezr. iv. 8, 9, 17, 23). He was perhaps a kind of lieutenant-governor of the province under the king of Persia, holding apparently the same office as Tatnai, who is described in Ezr. v. 6 as taking part in a similar transaction, and is there called "the governor on this side the river."—3. A Levite of the family of Bani, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 17).—4. One of the chief of the people, who signed the covenant with Nehemiah (Neh. x. 25).—5. A priestly family, or the head of a priestly house, who went up with Zerubbabel (Neh. xii. 3).

Re'i. A person mentioned (in 1 K. i. 8 only) as having remained firm to David's cause when Adonijah rebelled. Jerome states that he is the same with "Hiram the Zairite," i.e. Ira the Jarite. Ewald suggests that Re'i is identical with RADDAL.

Reins, i.e. kidneys, from the Latin *renes*. In the ancient system of physiology the kidneys were believed to be the seat of desire and longing, which accounts for their often being coupled with the heart (Ps. vii. 9, xxvi. 2; Jer. xi. 20, xvii. 10, &c.).

Rekem. 1. One of the five kings or chieftains of Midian slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21).—2. One of the four sons of Hebron, and father of Shammai (1 Chr. ii. 43, 44).

Rekem. One of the towns of the allotment of Benjamin (Josh. xviii. 27). No one has attempted to identify it with any existing site. But may there not be a trace of the name in *Ain Kartin*, the well-known spring west of Jerusalem?

Remali'ah. The father of Pekah, captain of Pekahiah king of Israel, who slew his master and usurped his throne (2 K. xv. 25-37, xvi. 1, 5; 2 Chr. xxviii. 6; Is. vii. 1-9, viii. 6).

Rem'eth. One of the towns of Issachar (Josh. xix. 21). It is probably (though not certainly) a distinct place from the RAMOTH of 1 Chr. vi. 73. A place bearing the name of *Rameh* is found on the west of the track from Samaria to *Jenin*, about 6 miles N. of the former and 9 S.W. of the latter. But it appears to be too far south to be within the territory of Issachar.

Remmon. A town in the allotment of Simeon (Josh. xix. 7); elsewhere accurately given in the A. V. as RIMMON.

Remmon-Methoar. A place which formed one of the landmarks of the eastern boundary of the territory of Zebulun (Josh. xix. 13 only). Methoar does not really form a part of the name; but should be translated (as in the margin of the A. V.)

"R. which reaches to Neah." This Rimmon does not appear to have been known to Eusebius and Jerome, but it is mentioned by the early traveller P'archi, who says that it is called Rumaneh, and stands an hour south of Sepphoris. If for south we read north, this is in close agreement with the statements of Dr. Robinson and Mr. Van de Velde, who place *Rummaneh* on the S. border of the Plain of Buttauf, 3 miles N.N.E. of *Seffurieh*. It is difficult, however, to see how this can have been on the eastern boundary of Zebulun.

Remphan (Acts vii. 43): and **Chiun** (Am. v. 26) have been supposed to be names of an idol worshipped by the Israelites in the wilderness, but seem to be the names of two idols. Much difficulty has been occasioned by this corresponding occurrence of two names so wholly different in

sound. The most reasonable opinion seemed to be that Chiun was a Hebrew or Semitic name, and Remphan an Egyptian equivalent substituted by the LXX. The former, rendered Saturn in the Syr., was compared with the Arab. and Pers. *kaisân*, "the planet Saturn." Egyptology has, however, shown that this is not the true explanation. Among the foreign divinities worshipped in Egypt, two, the god RENPU, perhaps pronounced REMPU, and the goddess KEN, occur together. Besides these divinities represented on the monuments of Egypt which have Egyptian forms or names, or both, others have foreign forms or names, or both. Of the latter, some appear to have been introduced at a very remote age. This is certainly the case with the principal divinity of Memphis, Ptah, the Egyptian Hephæstus. The foreign divinities that seem to be of later introduction are not found throughout the religious records, but only in single tablets, or are otherwise very rarely mentioned, and two out of their four names are immediately recognised to be non-Egyptian. They are KENPU, and the goddesses KEN, ANTA, and ASTARTA. The first and second of these have foreign forms; the third and fourth have Egyptian forms: there would therefore seem to be an especially foreign character about the former two.

RENPU, pronounced REMPU (?), is represented as an Asiatic, with the full beard and apparently the general type of face given on the monuments to most nations east of Egypt, and to the REBU or Libyans. This type is evidently that of the Shemites. His hair is bound with a fillet, which is ornamented in front with the head of an antelope. KEN is represented perfectly naked, holding in both hands corn, and standing upon a lion. She is also called KETESH. ANATA appears to be Anatia. ASTARTA is of course the Ashtoreth of Canaan. We have no clue to the exact time of the introduction of these divinities into Egypt, nor, except in one case, to any particular places of their worship. Their names occur as early as the period of the xviii and xix dynasties, and it is therefore not improbable that they were introduced by the Shepherds. As to RENPU and KEN we can only offer a conjecture. They occur together, and KEN is a form of the Syrian goddess, and also bears some relation to the Egyptian god of productiveness, KHEM. Their similarity to Baal and Ashtoreth seems strong. The naked goddess KEN would suggest such worship as that of the Babylonian Mylitta, but the thoroughly Shemite appearance of RENPU is rather in favour of an Arab source. The mention of CHIUN or REMPHAN as worshipped in the desert shows that this idolatry was, in part at least, that of foreigners, and no doubt of those settled in Lower Egypt. We can now endeavour to explain the passages in which Chiun and Remphan occur. The Masoretic text of Amos v. 26 reads thus:—"But ye bare the tent [or 'tabernacle'] of your king and Chiun your images, the star of your gods [or 'your god'], which ye made for yourselves." In the LXX. we find remarkable differences: it reads: *Καὶ ἀνελάβετε τὴν σκηνὴν τοῦ Μολῶχ, καὶ τὰ ἄστρον τοῦ θεοῦ ὑμῶν Ραϊφάν, τοὺς τύπους αὐτῶν οὓς ἐποίησατε ἑαυτοῖς*. The Vulg. agrees with the Masoretic text in the order of the clauses, though omitting Chiun or Remphan. A slight change in the Hebrew would enable us to read Molech (Malcam or Milcom) instead of "your king." Beyond this it is ex-

remely difficult to explain the differences. The substitution of Remphan or Rephan for Chiun has been explained by supposing that the LXX. read γ for ζ in the Hebrew. The tent or tabernacle of Moloch is supposed by Gesenius to have been an actual tent, and he compares the $\sigma\kappa\eta\eta\iota\ \iota\epsilon\rho\acute{\alpha}$ of the Carthaginians. But there is some difficulty in the idea that the Israelites carried about so large an object for the purpose of idolatry, and it seems more likely that it was a small model of a larger tent or shrine. The reading Molech appears preferable to "your king." It is perhaps worthy of note that there is reason for supposing that Molech was a name of the planet Saturn, and that this planet was evidently supposed by the ancient translators to be intended for Chiun and Remphan. The correspondence of Remphan or Raiphan to Chiun is extremely remarkable, and can, we think, only be accounted for by the supposition that the LXX. translator or translators of the prophet had Egyptian knowledge, and being thus acquainted with the ancient joint worship of Ken and Kenu, substituted the latter for the former, as they may have been unwilling to repeat the name of a foreign Venus. From the manner in which it is mentioned we may conjecture that the star of Remphan was of the same character as the tabernacle of Molech, an object connected with false worship rather than an image of a false god.

Rephael. Son of Shemaiah, the firstborn of Obad-edom (1 Chr. xxvi. 7).

Re'phah. A son of Ephraim, and ancestor of Joshua (1 Chr. vi. 25).

Repha'iah. 1. The sons of Rephaiah appear among the descendants of Zerubbabel in 1 Chr. iii. 21.—2. A Simeonite chieftain in the reign of Hezekiah (1 Chr. iv. 42).—3. Son of Tola, the son of Issachar (1 Chr. vii. 2).—4. Son of Binea, and descendant of Saul (1 Chr. ix. 43).—5. The son of Hur, and ruler of a portion of Jerusalem (Neh. iii. 9).

Reph'aim. [GIANTS]

Reph'aim, the Valley of, 2 Sam. v. 18, 22, xxiii. 13; 1 Chr. xi. 15, xiv. 9; Is. xvii. 5. Also in Josh. xv. 8, and xviii. 16, where it is translated in the A. V. "the valley of the giants." A spot which was the scene of some of David's most remarkable adventures. He twice encountered the Philistines there, and inflicted a destruction on them and on their idols so signal that it gave the place a new name. It was probably during the former of these two contests that the incident of the water of Bethlehem (2 Sam. xxiii. 13, &c.) occurred. The "hold" (ver. 14) in which David found himself, seems (though it is not clear) to have been the cave of Adullam. This narrative seems to imply that the valley of Rephaim was near Bethlehem. Josephus mentions it as "the valley which extends (from Jerusalem) to the city of Bethlehem." Since the latter part of the 16th cent. the name has been attached to the upland plain which stretches south of Jerusalem, and is crossed by the road to Bethlehem—the *el Bâk'ah* of the modern Arabs. But this, though appropriate enough as regards its proximity to Bethlehem, does not answer at all to the meaning of the Hebrew word *Eneke*, which appears always to designate an inclosed valley, never an open upland plain like that in question. A position N.W. of the city is adopted by Fürst, apparently on the ground of the terms of Josh. xv. 8 and xviii. 16. And Tobler, in his last investigations, conclusively

adopts the *Wady Dêr Jasîn*. The valley appears to derive its name from the ancient nation of the Rephaim. It may be a trace of an early settlement of theirs, possibly after they were driven from their original seats east of the Jordan by Chedorlaomer (Gen. xiv. 5).

Reph'idim. Ex. xvii. 1, 8; xix. 2. The name means "rests" or "stays;" the place lies in the march of the Israelites from Egypt to Sinai. Its site is unknown. Lepsius' view is that Mount *Serbâl* is the true Horeb, and that Rephidim is *Wady Feiran*. This would account for the expectation of finding water here, which, however, from some unexplained cause failed. In Ex. xvii. 6, "the rock in Horeb" is named as the source of the water miraculously supplied. On the other hand, the language used Ex. xix. 1, 2, seems precise, as regards the point that the journey from Rephidim to Sinai was a distinct stage. The name Horeb is by Robinson taken to mean an extended range or region, some part of which was near to Rephidim, which he places at *Wady esh Sheikh*, running from N.E. to S.W., on the W. side of *Gebel Fureia*, opposite the northern face of the modern Horeb. It joins the *Wady Feiran*. The exact spot of Robinson's Rephidim is a defile in the *esh Sheikh* visited and described by Burckhardt as at about five hours' distance from where it issues from the plain *Er Raheh*, narrowing between abrupt cliffs of blackened granite to about 40 feet in width. Here is also the traditional "Seat of Moses." The fertility and richness of the *Wady Feiran* account, as Stanley thinks, for the Amalekites' struggle to retain possession against those whom they viewed as intrusive aggressors. This view seems to meet the largest amount of possible conditions for a site of Sinai.

Res'en is mentioned only in Gen. x. 12, where it is said to have been one of the cities built by Asshur, and to have lain "between Nineveh and Calah." Many writers have been inclined to identify it with the Resina or Rhesana of the Byzantine authors, and of Ptolemy, which is most probably the modern *Ras-el-ain*. There are no grounds, however, for this identification, except the similarity of name. A far more probable conjecture was that of Bochart, who found Resen in the Larissa of Xenophon, which is most certainly the modern *Nimrud*. As, however, the *Nimrud* ruins seem really to represent CALAH, while those opposite Mosul are the remains of Nineveh, we must look for Resen in the tract lying between these two sites. Assyrian remains of some considerable extent are found in this situation, near the modern village of *Selamiyeh*, and it is perhaps the most probable conjecture that these represent the Resen of Genesis. The later Jews appear to have identified Resen with the *Kilah-Sherghut* ruins.

Reah'eph. A son of Ephraim and brother of Rephah (1 Chr. vii. 25).

Re'u. Son of Peleg, in the line of Abraham's ancestors (Gen. xi. 18, 19, 20, 21; 1 Chr. i. 25).

Reu'ben. Jacob's firstborn child (Gen. xxix. 32), the son of Leah, apparently not born till an unusual interval had elapsed after the marriage (31). The notices of the patriarch Reuben in the Book of Genesis and the early Jewish traditional literature are unusually frequent, and on the whole give a favourable view of his disposition. To him and him alone, the preservation of Joseph's life appears to have been due. His anguish at the disap-

pearance of his brother, and the frustration of his kindly artifice for delivering him (Gen. xxxvii. 22), his recollection of the minute details of the painful scene many years afterwards (xlii. 22), his offer to take the sole responsibility of the safety of the brother who had succeeded to Joseph's place in the family (xlii. 37), all testify to a warm and (for those rough times) a kindly nature. Of the repulsive crime which mars his history, and which turned the blessing of his dying father into a curse—his adulterous connexion with Bilhah—we know from the Scriptures only the fact (Gen. xxxv. 22). These traits, slight as they are, are those of an ardent, impetuous, unbalanced, but not ungenerous nature; not crafty and cruel, as were Simeon and Levi, but rather, to use the metaphor of the dying patriarch, boiling up like a vessel of water over the rapid wood-fire of the nomad tent, and as quickly subsiding into apathy when the fuel was withdrawn. At the time of the migration into Egypt Reuben's sons were four (Gen. xli. 9; 1 Chr. v. 3). From them sprang the chief families of the tribe (Num. xxvi. 5-11). The census at Mount Sinai (Num. i. 20, 21, ii. 11) shows that at the Exodus the numbers of the tribe were 46,500 men above twenty years of age, and fit for active warlike service. During the journey through the wilderness the position of Reuben was on the south side of the Tabernacle. The "camp" which went under his name was formed of his own tribe, that of Simeon and Gad. The Reubenites, like their relatives and neighbours on the journey, the Gadites, had maintained through the march to Canaan, the ancient calling of their forefathers. Their cattle accompanied them in their flight from Egypt (Ex. xii. 38). It followed naturally that when the nation arrived on the open downs east of the Jordan, the three tribes of Reuben, Gad, and the half of Manasseh, should prefer a request to their leader to be allowed to remain in a place so perfectly suited to their requirements. The part selected by Reuben had at that date the special name of "the Mishor," with reference possibly to its evenness. Under its modern name of the *Belka* it is still esteemed beyond all others by the Arab shepherders. Accordingly, when the Reubenites and their fellows approach Moses with their request, his main objection is that by what they propose they will discourage the hearts of the children of Israel from going over Jordan into the land which Jehovah had given them (Num. xxxii. 7). It is only on their undertaking to fulfil their part in the conquest of the western country, the land of Canaan proper, and thus satisfying him that their proposal was grounded in no selfish desire to escape a full share of the difficulties of the conquest, that Moses will consent to their proposal. From this time it seems as if a bar, not only the material one of distance, and of the intervening river and mountain-wall, but also of difference in feeling and habits, gradually grew up more substantially between the Eastern and Western tribes. The first act of the former after the completion of the conquest, and after they had taken part in the solemn ceremonial in the Valley between Ebal and Gerizim, shows how wide a gap already existed between their ideas and those of the Western tribes. The pile of stones which they erected on the western bank of the Jordan to mark their boundary was erected in accordance with the unalterable habits of Bedouin tribes both before and since. It was an act identical with that in which

Laban and Jacob engaged at parting, with that which is constantly performed by the Bedouins of the present day. But by the Israelites west of Jordan, who were fast relinquishing their nomad habits and feelings for those of more settled permanent life, this act was completely misunderstood, and was construed into an attempt to set up a rival altar to that of the Sacred Tent. No judge, no prophet, no hero of the tribe of Reuben is handed down to us. In the dire extremity of their brethren in the north under Deborah and Barak, they contented themselves with debating the news amongst the streams of the Mighor; the distant distress of his brethren could not move Reuben, he lingered among his sheepfolds and preferred the shepherd's pipe and the bleating of the flocks, to the clamour of the trumpet and the turmoil of battle. His individuality fades more rapidly than Gad's. No person, no incident, is recorded, to place Reuben before us in any distincter form than as a member of the community (if community it can be called) of "the Reubenites, the Gadites, and the half-tribe of Manasseh" (1 Chr. xii. 37). Thus remote from the central seat of the national government and of the national religion, it is not to be wondered at that Reuben relinquished the faith of Jehovah. The last historical notice which we possess of them, while it records this fact, records also as its natural consequence that the Reubenites and Gadites, and the half-tribe of Manasseh were carried off by Pul and Tiglath-Pileser.

Reu'el. 1. One of the sons of Esau, by his wife Basemath, sister of Ishmael (Gen. xxxvi. 4, 10, 13, 17; 1 Chr. i. 35, 37).—2. One of the names of Moses' father-in-law (Ex. ii. 18); the same which, through adherence to the LXX. form, is given in another passage of the A. V. RAGUEL.—3. Father of Eliasaph, the leader of the tribe of Gad, at the time of the census at Sinai (Num. ii. 14).—4. A Benjamite, ancestor of Elah (1 Chr. ix. 8).

Re'umah. The concubine of Nahor, Abraham's brother (Gen. xxii. 24).

Revelation of St. John. The following subjects in connexion with this book seem to have the chief claim for a place in this article:—A. CANONICAL AUTHORITY AND AUTHORSHIP. B. TIME AND PLACE OF WRITING. C. LANGUAGE. D. HISTORY OF INTERPRETATION. A. CANONICAL AUTHORITY AND AUTHORSHIP.—The question as to the canonical authority of the Revelation resolves itself into a question of authorship. Was St. John the Apostle and Evangelist the writer of the Revelation? This question was first mooted by Dionysius of Alexandria. The doubt which he modestly suggested has been confidently proclaimed in modern times by Luther, and widely diffused through his influence. But the general belief of the mass of Christians in all ages has been in favour of St. John's authority. The evidence adduced in support of that belief consists of (1) the assertions of the author, and (2) historical tradition. (1) The author's description of himself in the 1st and 22nd chapters is certainly equivalent to an assertion that he is the Apostle. (a) He names himself simply John, without prefix or addition. He is also described as (b) a servant of Christ, (c) *one* who had borne testimony as an eye-witness of the word of God and of the testimony of Christ—terms which were surely designed to identify him with the writer of the verses John xix. 35, i. 14, and 1 John i. 2. He is (d) in Patmos for the word of God and

the testimony of Jesus Christ. He is also (e) a fellow-sufferer with those whom he addresses, and (f) the authorised channel of the most direct and important communication that was ever made to the seven churches of Asia, of which churches John the Apostle was at that time the spiritual governor and teacher. Lastly (g) the writer was a fellow-servant of angels and a brother of prophets. All these marks are found united together in the Apostle John, and in him alone of all historical persons. A candid reader of the Revelation, if previously acquainted with St. John's other writings and life, must inevitably conclude that the writer intended to be identified with St. John. It is strange to see so able a critic as Lücke meeting this conclusion with the conjecture that some Asiatic disciple and namesake of the Apostle may have written the book in the course of some missionary labours or some time of sacred retirement in Patmos. Unless we are prepared to give up the veracity and divine origin of the whole book, and to treat the writer's account of himself as a mere fiction of a poet trying to cover his own insignificance with an honoured name, we must accept that description as a plain statement of fact, equally credible with the rest of the book, and in harmony with the simple, honest, truthful character which is stamped on the face of the whole narrative. Besides this direct assertion of St. John's authorship, there is also an implication of it running through the book. Generally, the instinct of single-minded, patient, faithful students has led them to recognise not merely the same Spirit as the source of this and other books of Holy Scripture, but also the same peculiarly-formed human instrument employed both in producing this book and the fourth Gospel, and in speaking the characteristic words and performing the characteristic actions recorded of St. John. (2) To come to the historical testimonies in favour of St. John's authorship. (a) Justin Martyr, circ. 150 A.D., says:—"A man among us whose name was John, one of the Apostles of Christ, in a revelation which was made to him, prophesied that the believers in our Christ shall live a thousand years in Jerusalem. (b) The author of the Muratorian Fragment, circ. 170 A.D., speaks of St. John as the writer of the Apocalypse. (c) Melito of Sardis, circ. 170 A.D., wrote a treatise on the Revelation of John. Eusebius (*H. E.* iv. 26) mentions this among the books of Melito which had come to his knowledge; and it may be presumed that he found no doubt as to St. John's authorship in the book of this ancient Asiatic bishop. (d) Theophilus, bishop of Antioch (circ. 180), in a controversy with Hermogenes, quotes passages out of the Revelation of John. (e) Irenaeus (circ. 195), apparently never having heard a suggestion of any other author than the Apostle, often quotes the Revelation as the work of John. The testimony of Irenaeus as to the authorship of Revelation is perhaps more important than that of any other writer. (f) Apollonius (circ. 200) of Ephesus (?), in controversy with the Montanists of Phrygia, quoted passages out of the Revelation of John, and narrated a miracle wrought by John at Ephesus. (g) Clement of Alexandria (circ. 200) quotes the book as the Revelation of John, and as the work of an Apostle. (h) Tertullian (A.D. 207), in at least one place, quotes by name "the Apostle John in the Apocalypse." (i) Hippolytus (circ. 230) is said, in the inscription on his statue at Rome, to have composed an apology for

the Apocalypse and Gospel of St. John the Apostle. (j) Origen (circ. 233), in his Commentary on St. John, quoted by Eusebius (*H. E.* vi. 25), says of the Apostle, "he wrote also the Revelation." The testimonies of later writers, in the third and fourth centuries, in favour of St. John's authorship of the Revelation, are equally distinct and far more numerous. All the foregoing writers, testifying that the book came from an Apostle, believed that it was a part of Holy Scripture. It is also quoted as having canonical authority by Papias, Cyprian, and in the Epistle from the churches of Lyons and Vienne, A.D. 177. It was admitted into the list of the Third Council of Carthage, A.D. 397. Such is the evidence in favour of St. John's authorship and of the canonical authority of this book. The following facts must be weighed on the other side. Marcion, who regarded all the Apostles except St. Paul as corrupters of the truth, rejected the Apocalypse and all other books of the N.T. which were not written by St. Paul. The Alogi, an obscure sect, circa 180 A.D., rejected the Revelation, saying it was the work, not of John, but of Cerinthus. But the testimony which is considered the most important of all in ancient times against the Revelation is contained in a fragment of Dionysius of Alexandria, circa 240 A.D., the most influential and perhaps the ablest bishop in that age. The principal points in it are these:—Dionysius testifies that some writers before him altogether repudiated the Revelation as a forgery of Cerinthus; many brethren, however, prized it very highly, and Dionysius would not venture to reject it, but received it in faith as containing things too deep and too sublime for his understanding. He would not say that John Mark was the writer, since it is not known that he was in Asia. He supposes it must be the work of some John who lived in Asia. To this extent, and no further, Dionysius is a witness against St. John's authorship. A weightier difficulty arises from the fact that the Revelation is one of the books which are absent from the ancient Peshito version. Eusebius is remarkably sparing in his quotations from the "Revelation of John," and the uncertainty of his opinion about it is best shown by his statement in that "it is likely that the Revelation was seen by the second John" (the Ephesian presbyter), if any one is unwilling to believe that it was seen by the Apostle." Jerome states that the Greek Churches felt, with respect to the Revelation, a similar doubt to that of the Latins respecting the Epistle to the Hebrews. B. TIME AND PLACE OF WRITING.—The date of the Revelation is given by the great majority of critics as A.D. 95-97. The weighty testimony of Irenaeus is almost sufficient to prevent any other conclusion. He says: "It (*i.e.* the Revelation) was seen no very long time ago, but almost in our own generation, at the close of Domitian's reign." Eusebius also records that, in the persecution under Domitian, John the Apostle and Evangelist was banished to the island Patmos for his testimony of the divine word. There is no mention in any writer of the first three centuries of any other time or place. Unsupported by any historical evidence, some commentators have put forth the conjecture that the Revelation was written as early as the time of Nero. This is simply their inference from the style and contents of the book. It has been inferred from i. 2, 9, 10, that the Revelation was written in Ephesus, immediately after the Apostle's return from Patmos. But the style

in which the messages to the seven Churches are delivered rather suggests the notion that the book was written in Patmos. C. LANGUAGE.—The doubt first suggested by Harenberg, whether the Revelation was written in Aramaic, has met with little or no reception. The silence of all ancient writers as to any Aramaic original is alone a sufficient answer to the suggestion. Lücke has also collected internal evidence to show that the original is the Greek of a Jewish Christian. Lücke has also examined in minute detail the peculiarities of language which obviously distinguish the Revelation from every other book of the New Testament. And in subsequent sections he urges with great force the difference between the Revelation on one side and the fourth Gospel and first Epistle on the other, in respect of their style and composition and the mental character and attainments of the writer of each. Hengstenberg, in a dissertation appended to his Commentary, maintains that they are by one writer. It may be admitted that the Revelation has many surprising grammatical peculiarities. But much of this is accounted for by the fact that it was probably written down, as it was seen, "in the Spirit," whilst the ideas, in all their novelty and vastness, filled the Apostle's mind, and rendered him less capable of attending to forms of speech.

D. INTERPRETATION.—A short account of the different directions in which attempts have been made to interpret the Revelation, is all that can be given in this place. The interval between the Apostolic age and that of Constantine has been called the Chilastic period of Apocalyptic interpretation. The visions of St. John were chiefly regarded as representations of general Christian truths, scarcely yet embodied in actual facts, for the most part to be exemplified or fulfilled in the reign of Antichrist, the coming of Christ, the millennium, and the day of judgment. The only extant systematic interpretations in this period, are the interpolated Commentary on the Revelation by the martyr Victorinus, cir. 270 A.D., and the disputed Treatise on Antichrist by Hippolytus. But the prevalent views of that age are to be gathered also from a passage in Justin Martyr, from the later books, especially the fifth, of Irenaeus, and from various scattered passages in Tertullian, Origen, and Methodius. The general anticipation of the last days of the world in Lactantius, vii. 14-25, has little direct reference to the Revelation. Immediately after the triumph of Constantine, the Christians, emancipated from oppression and persecution, and dominant and prosperous in their turn, began to lose their vivid expectation of our Lord's speedy Advent, and their spiritual conception of His kingdom, and to look upon the temporal supremacy of Christianity as a fulfilment of the promised reign of Christ on earth. The Roman empire become Christian was regarded no longer as the object of prophetic denunciation, but as the scene of a millennial development. This view, however, was soon met by the figurative interpretation of the millennium as the reign of Christ in the hearts of all true believers. As the barbarous and heretical invaders of the falling empire appeared, they were regarded by the suffering Christians as fulfilling the woes denounced in the Revelation. The chief commentaries belonging to this period are that which is ascribed to Tichonius, cir. 390 A.D.; Primasius, of Adrumetum in Africa, A.D. 550; Andreas of Crete, cir. 650 A.D.; Arethas of Cappa-

docia and Oecumenius of Thessaly in the 10th century; the *Explanatio Apoc.* in the works of Bede, A.D. 735; the *Expositio* of Berengaud; the Commentary of Haymo, A.D. 853; a short Treatise on the Seals by Anselm, bishop of Havelberg, A.D. 1145; the *Expositio* of Abbot Joachim of Calabria, A.D. 1200. The views to which the reputation of Abbot Joachim gave currency became the foundation of that great historical school of interpretation, which up to this time seems the most popular of all. Modern interpreters are generally placed in three great divisions. a. The Historical or Continucus expositors, in whose opinion the Revelation is a progressive history of the fortunes of the Church from the first century to the end of time. b. The Praeterist expositors, who are of opinion that the Revelation has been almost, or altogether, fulfilled in the time which has passed since it was written; that it refers principally to the triumph of Christianity over Judaism and Paganism, signalled in the downfall of Jerusalem and of Rome. c. The Futurist expositors, whose views show a strong reaction against some extravagances of the two preceding schools. They believe that the whole book, excepting perhaps the first three chapters, refers principally, if not exclusively, to events which are yet to come. Each of these three schemes is open to objection. In conclusion, it may be stated that two methods have been proposed by which the student of the Revelation may escape the incongruities and fallacies of the different interpretations, whilst he may derive edification from whatever truth they contain. It has been suggested that the book may be regarded as a prophetic poem, dealing in general and inexact descriptions, much of which may be set down as poetic imagery, mere embellishment. But such a view would be difficult to reconcile with the belief that the book is an inspired prophecy. A better suggestion is made, or rather is revived, by Dr. Arnold in his *Sermons On the Interpretation of Prophecy*: that we should bear in mind that predictions have a lower historical sense, as well as a higher spiritual sense; that there may be one or more than one typical, imperfect, historical fulfilment of a prophecy, in each of which the higher spiritual fulfilment is shadowed forth more or less distinctly.

Rezeph. One of the places which Sennacherib mentions, in his taunting message to Hezekiah, as having been destroyed by his predecessor (2 K. xix. 12; Is. xxxvii. 12). It is perhaps mentioned by Ptolemy (v. 15) under the name of *Ῥεζάφα*.

Rezia. An Asherite, of the sons of Ulla (1 Chr. vii. 39).

Rezin. 1. A king of Damascus, contemporary with Pekah in Israel, and with Jotham and Ahaz in Judaea. He attacked Jotham during the latter part of his reign (2 K. xv. 37); but his chief war was with Ahaz, whose territories he invaded, in company with Pekah (about B.C. 741). The combined army laid siege to Jerusalem, where Ahaz was, but "could not prevail against it" (Is. vii. 1; 2 K. xvi. 5). Rezin, however, "recovered Elath to Syria" (2 K. xvi. 6). Soon after this he was attacked, defeated, and slain by Tiglath-Pileser II., king of Assyria (2 K. xvi. 9; compare Tiglath-Pileser's own inscriptions, where the defeat of Rezin and the destruction of Damascus are distinctly mentioned).—2. One of the families of the Nethinim (Ezr. ii. 48; Neh. vii. 50).

Rezon. The son of Eliadah, a Syrian, who when

David defeated Hadadezer king of Zobah, put himself at the head of a band of freebooters and set up a petty kingdom at Damascus (1 K. xi. 23). Whether he was an officer of Hadadezer, who, foreseeing the destruction which David would inflict, prudently escaped with some followers; or whether he gathered his band of the remnant of those who survived the slaughter, does not appear. The latter is more probable. The settlement of Rezon at Damascus could not have been till some time after the disastrous battle in which the power of Hadadezer was broken, for we are told that David at the same time defeated the army of Damascus Syrians who came to the relief of Hadadezer, and put garrisons in Damascus. From his position at Damascus Rezon harassed the kingdom of Solomon during his whole reign. The name is Aramaic, and Ewald compares it with Rezin.

Rhegium. The mention of this Italian town which was situated on the Bruttian coast, just at the southern entrance of the straits of Messina) occurs quite incidentally (Acts xxviii. 13) in the account of St. Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. By a curious coincidence the figures on its coins are the very "twin brothers" which gave the name to St. Paul's ship. As to the history of the place, it was originally a Greek colony: it was miserably destroyed by Dionysius of Syracuse: from Augustus it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire. The modern *Reggio* is a town of 10,000 inhabitants. Its distance across the straits from Messina is only about six miles.

Rhesa, son of Zorobabel in the genealogy of Christ (Luke iii. 27). Lord A. Hervey has ingeniously conjectured that Rhesa is no person, but merely the title *Rosh*, i. e. "Prince," originally attached to the name of Zerubbabel.

Rhoda, the name of a maid who announced Peter's arrival at the door of Mary's house after his miraculous release from prison (Acts xii. 13).

Rhodes. The history of this island is so illustrious that it is interesting to see it connected, even in a small degree, with the life of St. Paul. He touched there on his return voyage to Syria from the third missionary journey (Acts xxi. 1). Rhodes is immediately opposite the high Carian and Lycian headlands at the S.W. extremity of the peninsula of Asia Minor. Its position has had much to do with its history. Its real eminence began (about 400 B.C.) with the founding of that city at the N.E. extremity of the island, which still continues to be the capital. After Alexander's death it entered on a glorious period, its material prosperity being largely developed, and its institutions deserving and obtaining general esteem. As we approach the time of the consolidation of the Roman power in the Levant, we have a notice of Jewish residents in Rhodes (1 Macc. xv. 23). The Romans, after the defeat of Antiochus, assigned, during some time, to Rhodes certain districts on the mainland. Its Byzantine history is again eminent. Under Constantine it was the metropolis of the "Province of the Islands." It was the last place where the Christians of the East held out against the advancing Saracens; and subsequently it was once more famous as the home and fortress of the Knights of St. John.

Rhodocus, a Jew who betrayed the plans of his countrymen to Antiochus Eupator (2 Macc. xiii. 21).

Rhod'us, 1 Macc. xv. 23. [RHODES.]

Riba', the father of Ittai the Benjamite of Gibeah (2 Sam. xxiii. 29; 1 Chr. xi. 31).

Rib'lah. 1. One of the landmarks on the eastern boundary of the land of Israel, as specified by Moses (Num. xxiv. 11). Its position is noted in this passage with much precision. It was immediately between Shepham and the sea of Cinnereth, and on the "east side of the spring." Unfortunately Shepham has not yet been identified, and which of the great fountains of northern Palestine is intended by "the spring" is uncertain. It seems hardly possible, without entirely disarranging the specification of the boundary, that the Riblah in question can be the same with the "Riblah in the land of Hamath," which is mentioned at a much later period of the history.—2. Riblah in the land of Hamath, a place on the great road between Palestine and Babylonia, at which the kings of Babylonia were accustomed to remain while directing the operations of their armies in Palestine and Phoenicia. Here Nebuchadnezzar waited while the sieges of Jerusalem and of Tyre were being conducted by his lieutenants (Jer. xxxix. 5, 6, lii. 9, 10, 26, 27; 2 K. xxv. 6, 20, 21). In like manner Pharaoh-Necho, after his victory over the Babylonians at Carchemish, returned to Riblah and summoned Jehoahaz from Jerusalem before him (2 K. xxiii. 33). This Riblah has no doubt been discovered, still retaining its ancient name, on the right (east) bank of the *el Asy* (Orontes), upon the great road which connects *Baalbek* and *Hums*, about 35 miles N.E. of the former and 20 miles S.W. of the latter place.

Riddle. The Hebrew word is derived from an Arabic root meaning "to bend off," "to twist," and is used for artifice (Dan. vii. 23), a proverb (Prov. i. 6), a song (Ps. xlix. 4, lxxviii. 2), an oracle (Num. xii. 8), a parable (Ez. xvii. 2), and in general any wise or intricate sentence (Ps. xciv. 4; Hab. ii. 6, &c.), as well as a riddle in our sense of the word (Judg. xiv. 12-19). The riddles which the queen of Sheba came to ask of Solomon (1 K. x. 1; 2 Chr. ix. 1) were rather "hard questions" referring to profound enquiries. Solomon is said, however, to have been very fond of the riddle proper. The word *alvryya* occurs only once in the N.T. (1 Cor. xiii. 12, "darkly;" comp. Num. xii. 8); but, in the wider meaning of the word, many instances of it occur in our Lord's discourses. We know that all ancient nations, and especially Orientals, have been fond of riddles. We find traces of the custom among the Arabs (Koran xiv. 35), and indeed several Arabic books of riddles exist; but these are rather emblems and devices than what we call riddles, although they are very ingenious. They were also known to the ancient Egyptians, and were especially used in banquets both by Greeks and Romans. Riddles were generally proposed in verse, like the celebrated riddle of Samson, which, however, was properly no riddle at all, because the Philistines did not possess the only clue on which the solution could depend. Junius distinguishes between the *greater* enigma, where the allegory or obscure intimation is continuous throughout the passage (as in Ez. xvii. 2); and the *lesser* enigma, where the difficulty is concentrated in the peculiar use of some one word. It only remains to notice the single instance of a riddle occurring in the N.T., viz. *the number of the beast*. This belongs to a class of riddles very common among Egyptian

mystics, the Gnostics, some of the Fathers, and the Jewish Cabbalists. The latter called it *Gematria* (i. e. *γερμετρια*), of which instances may be found in Carpov. The most exact analogies to the enigma on the name of the beast are to be found in the so-called Sibylline verses. It would be absurd to doubt that St. John (not greatly removed in time from the Christian forgers of the Sibylline verses) intended some *name* as an answer to the number 666. The true answer must be settled by the Apocalyptic commentators.

Rim'mon, a Benjamite of Beeroth, the father of Rechab and Baanah, the murderers of Ishbosheth (2 Sam. iv. 2, 5, 9).

Rim'mon, a deity worshipped by the Syrians of Damascus, where there was a temple or house of Rimmon (2 K. v. 18). Serarius refers the name to the Heb. *rimmon*, a pomegranate, a fruit sacred to Venus, who is thus the deity worshipped under this title. Ursinus explains Rimmon as the pomegranate, the emblem of the fertilising principle of nature, the personified *natura naturans*, a symbol of frequent occurrence in the old religions. But Selden rejects this derivation, and proposes instead that Rimmon is from the root *rām*, "to be high," and signifies "most high," like the Phœnician *Elioum*, and Heb. *'elyōn*. Movers regards Kimmon as the abbreviated form of Hadad-Rimmon, Hadad being the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadad-Rimmon would then be the sun-god of the late summer, who ripens the pomegranate and other fruits.

Rim'mon, a city of Zebulun belonging to the Merarite Levites (1 Chr. vi. 77). It is not impossible that DIMNAH (Josh. xxi. 35) may have been originally Rinnmon, as the D and R in Hebrew are notoriously easy to confound.

Rim'mon, a town in the southern portion of Judah (Josh. xv. 32), allotted to Simeon (Josh. xix. 7; 1 Chr. iv. 32). In each of the above lists the name succeeds that of AIN, also one of the cities of Judah and Simeon. In the catalogue of the places reoccupied by the Jews after the return from Babylon (Neh. xi. 29) the two are joined, and appear in the A.V. as EN-Rimmon. No trace of Rinnon has been yet discovered in the south of Palestine. True, it is mentioned in the *Onomasticon* of Eusebius and Jerome; but they place it 15 miles north of Jerusalem, obviously confounding it with the Rock Rimmon.

Rim'mon Pa'rez, the name of a march-station in the wilderness (Num. xxxiii. 19, 20). No place now known has been identified with it.

Rim'mon, the Rock, a cliff or inaccessible natural fastness, in which the six hundred Ben-

15). Such rings were worn not only by men, but by women (Is. iii. 21), and are enumerated among the articles presented by men and women for the service of the tabernacle (Ex. xxxv. 22). The signet-ring was worn on the right hand (Jer. xxii. 24). We may conclude, from Ex. xxviii. 11, that the rings contained a stone engraved with a device, or with the owner's name. The custom appears also to have prevailed among the Jews of the Apostolic age; for in James ii. 2, a rich man is described as not simply "with a gold ring," as in the A.V., but "golden-ringed."

Egyptian Rings.

Rin'nah, one of the sons of Shimon in an obscure genealogy of the descendants of Judah (1 Chr. iv. 20).

Ri'phath, the second son of Gomer, and the brother of Ashkenaz and Togarmah (Gen. x. 3). The Hebrew text in 1 Chr. i. 6 gives the form Diphath, but this arises out of a clerical error. The name itself has been variously identified with that of the Rhipæan mountains, the river Rhebas in Bithynia, the Rhibii, a people living eastward of the Caspian Sea, and the Rhipæans, the ancient name of the Paphlagonians. The weight of opinion is, however, in favour of the Rhipæan mountains, which are identified with the Carpathian range in the N.E. of Dacia.

Ris'sah, a march-station in the wilderness (Num. xxxiii. 21, 22). It has been considered identical with Rasi in the *Penting Itiner.*, 32 Roman miles from Ailah (Elah); but no site has been identified with it.

Rith'mah, a march-station in the wilderness (Num. xxxiii. 18, 19), probably N.E. of Hazeroth.

River. In the sense in which we employ the word, viz. for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. With the exception of the Jordan and the *Litany*, the streams of the Holy Land are either entirely dried up in the summer months, and converted into hot lanes of glaring stones, or else reduced to very small streamlets deeply sunk in a narrow bed, and concealed from view by a dense growth of shrubs. For the various aspects of the streams of the country which such conditions inevitably produced, the ancient Hebrews had very exact terms, which they employed habitually with much precision. 1. For the perennial

the name is still found attached to a village perched on the summit of a conical chalky hill, visible in all directions, and commanding the whole country.

Ring. The ring was regarded as an indispensable article of a Hebrew's attire, inasmuch as it contained his signet. It was hence the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. xli. 42), by Ahasuerus to Haman (Esth. iii. 10), by Antiochus to Philip (1 Macc. vi.

xxiv. 6; 2 Sam. x. 16, &c. &c.). It is never applied to the fleeting fugitive torrents of Palestine.

2. The term for these is *nachal*, for which our translators have used promiscuously, and sometimes almost alternately, "valley," "brook," and "river." No one of these words expresses the thing intended; but the term "brook" is peculiarly unhappy. Many of the wadis of Palestine are deep, abrupt chasms or rents in the solid rock of the

hills, and have a savage, gloomy aspect, far removed from that of an English brook. Unfortunately our language does not contain any single word which has both the meanings of the Hebrew *nachal* and its Arabic equivalent *wady*, which can be used at once for a dry valley and for the stream which occasionally flows through it. 3. *Yeôr*, a word of Egyptian origin, applied to the Nile only, and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connexion with that country. 4. *Fâdal*, from a root signifying tumult or fulness, occurs only six times, in four of which it is rendered "river," viz. Jer. xvii. 8; Dan. viii. 2, 3, 6. 5. *Poley*, used for the streams employed in artificial irrigation. 6. *Aphk*, a torrent, may signify any rush or body of water.

River of Egypt. Two Hebrew terms are thus rendered in the A.V. 1. *Nehar mitsrain* (Gen. xv. 18), "the river of Egypt," that is. the Nile, and here the Pelusiac or easternmost branch. 2. *Nachal mitsrain* (Num. xxiv. 5; Josh. xv. 4, 47; 1 K. viii. 65; 2 K. xxiv. 7; Is. xxvii. 12, in the last passage translated "the stream of Egypt"). It is the common opinion that this second term designates a desert stream on the border of Egypt, still occasionally flowing in the valley called Wâdi-l-'Areeh. The centre of the valley is occupied by the bed of this torrent, which only flows after rains, as is usual in the desert valleys. This stream is first mentioned as the point where the southern border of the Promised Land touched the Mediterranean, which formed its western border (Num. xxxiv. 3-6). In the later history we find Solomon's kingdom extending from the "entering in of Hamath unto the river of Egypt" (1 K. viii. 65), and Egypt limited in the same manner where the loss of the eastern provinces is mentioned (2 K. xxiv. 7). In certain parallel passages the Nile is distinctly specified instead of "the Nachal of Egypt" (Gen. xv. 18; comp. Josh. xiii. 2, 3). If, with the generality of critics, we think that the Nachal-Mizraim is the Wâdi-l-'Areeh, we must conclude that the name Shihor is also applied to the latter, although elsewhere designating the Nile, for we have seen that Nachal-Mizraim and Shihor are used interchangeably to designate a stream on the border of the Promised Land. The word Nachal may be cited on either side. Certainly in Hebrew it is rather used for a torrent or stream than for a river; but the name Nachal-Mizraim may come from a lost dialect, and the parallel Arabic word *wâdee*, though ordinarily used for valleys and their winter-torrents, as in the case of the Wâdi-l-'Areeh itself, has been employed by the Arabs in Spain for true rivers, the Guadalquivir, &c. It may, however, be suggested, that in Nachal-Mizraim we have the ancient form of the Neel-Misir of the Arabs, and that Nachal was adopted from its similarity of sound to the original of Νεῖλος.

Rizpah, concubine to king Saul, and mother of his two sons Armoni and Mephibosheth. Like many others of the prominent female characters of the Old Testament—Ruth, Rahab, Jezebel, &c.—Rizpah would seem to have been a foreigner, a Hivite, descended from one of the ancient worthies of that nation, Ajah or Aiah, son of Zibeon, whose name and fame are preserved in the Ishmaelite record of Gen. xxxvi. After the death of Saul and occupation of the country west of the Jordan by the Phi-

listines, Rizpah accompanied the other members of the royal family to their new residence at Mahanaim; and it is here that her name is first introduced to us as the subject of an accusation levelled at Abner by Ishbosheth (2 Sam. iii. 7). We hear nothing more of Rizpah till the tragic story which has made her one of the most familiar objects to young and old in the whole Bible (2 Sam. xxi. 8-11). Every one can appreciate the love and endurance with which the mother watched over the bodies of her two sons and her five relatives, to save them from an indignity peculiarly painful to the whole of the ancient world (see Ps. lxxix. 2). But it is questionable whether the ordinary conception of the scene is accurate. The seven victims were not, as the A.V. implies, "hung;" they were crucified. The seven crosses were planted in the rock on the top of the sacred hill of Gibeon. The victims were sacrificed at the beginning of barley harvest—the sacred and festal time of the Passover—and in the full blaze of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rizpah remained at the foot of the crosses on which the bodies of her sons were exposed: the *Mater dolorosa*, if the expression may be allowed, of the ancient dispensation.

Road. This word occurs but once in the Authorised Version of the Bible, viz. in 1 Sam. xxvii. 10, where it is used in the sense of "raid" or "inroad."

Robbery. Whether in the larger sense of plunder, or the more limited sense of theft, systematically organised, robbery has ever been one of the principal employments of the nomad tribes of the East. From the time of Ishmael to the present day the Bedouin has been a "wild man," and a robber by trade (Gen. xvi. 12). An instance of an enterprise of a truly Bedouin character, but distinguished by the exceptional features belonging to its principal actor, is seen in the night-foray of David (1 Sam. xxi. 6-12). Predatory inroads on a large scale are seen in the incursions of the Sabeans and Chaldaeans on the property of Job (Job i. 15, 17); the revenge coupled with plunder of Simeon and Levi (Gen. xxxiv. 28, 29); the reprisals of the Hebrews upon the Midianites (Num. xxxi. 32-54), and the frequent and often prolonged invasions of "spoilers" upon the Israelites (Judg. ii. 14, vi. 3, 4; 1 Sam. xi. xv.; 2 Sam. viii., x.; 2 K. v. 2; 1 Chr. v. 10, 18-22). Similar disorder in the country, complained of more than once by the prophets (Hos. iv. 2, vi. 9; Mic. ii. 8), continued more or less through Maccabean down to Roman times. In the later history also of the country the robbers, or sicarii, together with their leader, John of Gischala, played a conspicuous part. The Mosaic law on the subject of theft is contained in Ex. xxii. There seems no reason to suppose that the law underwent any alteration in Solomon's time. Man-stealing was punishable with death (Ex. xxi. 16; Deut. xxiv. 7). Invasion of right in land was strictly forbidden (Deut. xxvii. 17; Is. v. 8; Mic. ii. 2).

Robo'am, Eccus. xlvii. 23; Matt. i. 7. [REHOBOAM.]

Roe, Roebuck (Heb. *zâbî*, m.; *zâbiyyâh*, f.). There seems to be little or no doubt that the Heb. word, which occurs frequently in the O.T., denotes some species of antelope, probably the *Gazella dorcas*, a native of Egypt and North Africa, or the *G. Arabica* of Syria and Arabia, which appears to

be a variety only of the dorcas. The gazelle was allowed as food (Deut. xii. 15, 22, &c.); it is mentioned as very fleet of foot (2 Sam. ii. 18; 1 Chr. xii. 8); it was hunted (Is. xiii. 14; Prov. vi. 5); it was celebrated for its loveliness (Cant. ii. 9, 17, viii. 14). The gazelle is found in Egypt, Barbary, and Syria.

Gazelle Arabica.

Rogelim, the residence of Barzillai the Gileadite (2 Sam. xvii. 27, xix. 31) in the highlands east of the Jordan. Nothing is said to guide us to its situation.

Roh'gah, an Asherite, of the sons of Shamer (1 Chr. vii. 34).

Ro'imus. REHUM 1 (1 Esd. v. 8).

Roll. A book in ancient times consisted of a single long strip of paper or parchment, which was usually kept rolled up on a stick, and was unrolled when a person wished to read it. Hence arose the term *megillah*, from *gālal*, "to roll," strictly answering to the Latin *volumen*, whence comes our *volume*. The use of the term *megillah* implies, of course, the existence of a soft and pliant material, perhaps parchment. The roll was usually written on one side only, and hence the particular notice of one that was "written within and without" (Ez. ii. 10). The writing was arranged in columns. We may here add that the term in Is. viii. 1, rendered in the A. V. "roll," more correctly means *tablet*.

Romam'ti-es'er, one of the fourteen sons of Heman (1 Chr. xxv. 4, 31).

Roman Empire. The notices of Roman history which occur in the Bible are confined to the last century and a half of the commonwealth and the first century of the imperial monarchy. The first historic mention of Rome in the Bible is in 1 Macc. i. 10. About the year 161 B.C. Judas Maccabaeus heard of the Romans as the conquerors of Philip, Perseus, and Antiochus (1 Macc. viii. 5, 6). In order to strengthen himself against Demetrius king of Syria he sent ambassadors to Rome (viii. 17), and concluded a defensive alliance with the senate (viii. 22-32). This was renewed by Jonathan (xii. 1) and by Simon (xv. 17). In the year 65 B.C., when Syria was made a Roman province by Pompey, the Jews were still governed by one of the Asmonean princes. Aristobulus had lately driven his brother Hyrcanus from the chief priesthood, and was now in his turn attacked by Aretas, king of Arabia Petraea, the ally of Hyrcanus. Pompey's lieutenant, M. Aemilius Scaurus, inter-

fered in the contest B.C. 64, and the next year Pompey himself marched an army into Judaea and took Jerusalem. From this time the Jews were practically under the government of Rome. Hyrcanus retained the high-priesthood and a titular sovereignty, subject to the watchful control of his minister Antipater, an active partisan of the Roman interests. Finally, Antipater's son, Herod the Great, was made king by Antony's interest, B.C. 40, and confirmed in the kingdom by Augustus, B.C. 30. The Jews, however, were all this time tributaries of Rome, and their princes in reality were mere Roman procurators. On the banishment of Archelaus, A.D. 6, Judaea became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Caesarea. Such were the relations of the Jewish people to the Roman government at the time when the N. T. history begins. An ingenious illustration of this state of things has been drawn from the condition of British India. The Governor-General at Calcutta, the subordinate governors at Madras and Bombay, and the native princes, whose dominions have been at one time enlarged, at another incorporated with the British presidencies, find their respective counterparts in the governor of Syria at Antioch, the procurators of Judaea at Caesarea, and the members of Herod's family, whose dominions were alternately enlarged and suppressed by the Roman emperors. In illustration of the sacred narrative it may be well to give a general account, though necessarily a short and imperfect one, of the position of the emperor, the extent of the empire, and the administration of the provinces in the time of our Lord and His Apostles. 1. When Augustus became sole ruler of the Roman world he was in theory simply the first citizen of the republic, entrusted with temporary powers to settle the disorders of the state. The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus. Above all he was the Emperor (Imperator). This word, used originally to designate any one entrusted with the imperium or full military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Caesar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the state. The Empire was nominally elective, but practically it passed by adoption; and till Nero's time a sort of hereditary right seemed to be recognised.—II. *Extent of the Empire*.—Cicero's description of the Greek states and colonies as a "fringe on the skirts of barbarism," has been well applied to the Roman dominions before the conquests of Pompey and Caesar. The Roman Empire was still confined to a narrow strip encircling the Mediterranean Sea. Pompey added Asia Minor and Syria. Caesar added Gaul. The generals of Augustus overran the N.W. portion of Spain, and the country between the Alps and the Danube. The boundaries of the Empire were now, the Atlantic on the W., the Euphrates on the E., the deserts of Africa, the cataracts of the Nile, and the Arabian deserts on the S., the British Channel, the Rhine, the Danube, and the Black Sea on the N. The only subsequent conquests of importance were those of Britain by Claudius and of Dacia by Trajan. The only independent powers of importance were the Parthians on the E. and the Germans on the N. The population of the Empire in the time of

Augustus has been calculated at 85,000,000.—III. *The Provinces.*—The usual fate of a country conquered by Rome was to become a subject province, governed directly from Rome by officers sent out for that purpose. Sometimes, however, petty sovereigns were left in possession of a nominal independence on the borders, or within the natural limits, of the province. There were differences too in the political condition of cities within the provinces. Some were free cities, *i. e.* were governed by their own magistrates, and were exempted from occupation by a Roman garrison. Other cities were "Colonies," *i. e.* communities of Roman citizens transplanted, like garrisons of the imperial city, into a foreign land. Augustus divided the provinces into two classes: (1.) Imperial, (2.) Senatorial; retaining in his own hands, for obvious reasons, those provinces where the presence of a large military force was necessary, and committing the peaceful and unarmed provinces to the Senate. The Imperial provinces at first were—Gaul, Lusitania, Syria, Phoenicia, Cilicia, Cyprus, and Aegypt. The Senatorial provinces were Africa, Numidia, Asia, Achaia and Epirus, Dalmatia, Macedonia, Sicily, Ciete and Cyrene, Bithynia and Pontus, Sardinia, Baetica. Cyprus and Gallia Narbonensis were subsequently given up by Augustus, who in turn received Dalmatia from the Senate. Many other changes were made afterwards. The N. T. writers invariably designate the governors of Senatorial provinces by the correct title of ἀρχαῖροι, proconsuls (Acts xiii. 7, xviii. 12, xix. 38). For the governor of an Imperial province, properly styled "Legatus Caesaris," the word ἡγεμῶν (Governor) is used in the N. T. The provinces were heavily taxed for the benefit of Rome and her citizens. They are said to have been better governed under the Empire than under the Commonwealth, and those of the emperor better than those of the Senate. Two important changes were introduced under the Empire. The governors received a fixed pay, and the term of their command was prolonged. The condition of the Roman Empire at the time when Christianity appeared has often been dwelt upon, as affording obvious illustrations of St. Paul's expression that the "fulness of time had come" (Gal. iv. 4). The general peace within the limits of the Empire, the formation of military roads, the suppression of piracy, the march of the legions, the voyages of the corn fleets, the general increase of traffic, the spread of the Latin language in the West as Greek had already spread in the East, the external unity of the Empire, offered facilities hitherto unknown for the spread of a world-wide religion. The tendency too of a despotism like that of the Roman Empire to reduce all its subjects to a dead level, was a powerful instrument in breaking down the pride of privileged races and national religious, and familiarising men with the truth that "God hath made of one blood all nations on the face of the earth" (Acts xvii. 24, 26). But still more striking than this outward preparation for the diffusion of the Gospel was the appearance of a deep and wide-spread corruption which seemed to defy any human remedy. The chief prophetic notices of the Roman Empire are found in the Book of Daniel. According to some interpreters the Romans are intended in Deut. xxviii. 49-57.

Romans, Epistle to the. 1. The date of this Epistle is fixed with more absolute certainty and within narrower limits, than that of any other of

St. Paul's Epistles. The following considerations determine the time of writing. *First.* Certain names in the salutations point to Corinth, as the place from which the letter was sent. (1.) Phoebe, a deaconess of Cenchreae, one of the port towns of Corinth, is commended to the Romans (xvi. 1, 2). (2.) Gaius, in whose house St. Paul was lodged at the time (xvi. 23), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i. 14, though the name was very common. (3.) Erastus, here designated "the treasurer of the city" (xvi. 23, E. V. "chamberlain") is elsewhere mentioned in connexion with Corinth (2 Tim. iv. 20; see also Acts xix. 22). *Secondly.* Having thus determined the place of writing to be Corinth, we have no hesitation in fixing upon the visit recorded in Acts xx. 3, during the winter and spring following the Apostle's long residence at Ephesus, as the occasion on which the Epistle was written. For St. Paul, when he wrote the letter, was on the point of carrying the contributions of Macedonia and Achaia to Jerusalem (xv. 25-27), and a comparison with Acts xx. 22, xxiv. 17, and also 1 Cor. xvi. 4; 2 Cor. viii. 1, 2, ix. 1 ff., shows that he was so engaged at this period of his life. The Epistle then was written from Corinth during St. Paul's third missionary journey, on the occasion of the second of the two visits recorded in the Acts. On this occasion he remained three months in Greece (Acts xx. 3). It was in the winter or early spring of the year that the Epistle to the Romans was written. According to the most probable system of chronology, this would be the year A.D. 58. 2. The Epistle to the Romans is thus placed in *chronological connexion* with the Epistles to the Galatians and Corinthians, which appear to have been written within the twelve months preceding. They present a remarkable resemblance to each other in style and matter—a much greater resemblance than can be traced to any other of St. Paul's Epistles. 3. The *occasion* which prompted this Epistle, and the *circumstances* attending its writing, were as follows. St. Paul had long purposed visiting Rome, and still retained this purpose, wishing also to extend his journey to Spain (i. 9-13, xv. 22-29). For the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms of the Gentile Christians, and meanwhile he addressed this letter to the Romans, to supply the lack of his personal teaching. Phoebe, a deaconess of the neighbouring Church of Cenchreae, was on the point of starting for Rome (xvi. 1, 2), and probably conveyed the letter. The body of the Epistle was written at the Apostle's dictation by Tertius (xvi. 22); but perhaps we may infer from the abruptness of the final doxology, that it was added by the Apostle himself. 4. The *Origin of the Roman Church* is involved in obscurity. If it had been founded by St. Peter, according to a later tradition, the absence of any allusion to him both in this Epistle and in the letters written by St. Paul from Rome would admit of no explanation. It is equally clear that no other Apostle was the Founder. The statement in the Clementines that the first tidings of the Gospel reached Rome during the lifetime of our Lord, is evidently a fiction for the purposes of the romance. On the other hand, it is clear that the foundation of this Church dates very far back. It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (Acts ii. 10),

carried back the earliest tidings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of Stephen (Acts viii. 4, xi. 19). At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Judaism, as in the case of Apollos at Corinth (Acts xviii. 25), or the disciples at Ephesus (Acts xix. 1-3). As time advanced and better instructed teachers arrived, the clouds would gradually clear away, till at length the presence of the great Apostle himself at Rome, dispersed the mists of Judaism which still hung about the Roman Church.

5. A question next arises as to the *composition of the Roman Church*, at the time when St. Paul wrote. Did the Apostle address a Jewish or a Gentile community, or, if the two elements were combined, was one or other predominant so as to give a character to the whole Church? It is more probable that St. Paul addressed a mixed Church of Jews and Gentiles, the latter perhaps being the more numerous. There are certainly passages which imply the presence of a large number of Jewish converts to Christianity. If we analyse the list of names in the 16th chapter, and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (an assumption at least not improbable), we arrive at the same result. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supposing that the others, bearing Greek and Latin names, of whom we know nothing, were heathens. Nor does the existence of a large Jewish element in the Roman Church present any difficulty. The captives carried to Rome by Pompeius formed the nucleus of the Jewish population in the metropolis. Since that time they had largely increased. On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church must necessarily have been in great measure a Gentile Church; and the language of the Epistle bears out this supposition. These Gentile converts, however, were not for the most part native Romans. Strange as the paradox appears, nothing is more certain than that the Church of Rome was at this time a Greek and not a Latin Church. All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are with but few exceptions Greek. And we find that a very large proportion of the names in the salutations of this Epistle are Greek names. When we enquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutations again gives an approximate answer. These names belong for the most part to the middle and lower grades of society. Many of them are found in the *columbaria* of the freedmen and slaves of the early Roman emperors. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace—whether Jews or Greeks—the Gospel would first find a firm footing. To this last class allusion is made in Phil. iv. 22, “they that are of Caesar’s household.”

6. The heterogeneous composition of this Church explains the *general character of the Epistle to the Romans*. In an assemblage so various, we should expect to find not the exclusive predominance of a single form of error, but the coincidence of different

and opposing forms. It was therefore the business of the Christian Teacher to reconcile the opposing difficulties and to hold out a meeting point in the Gospel. This is exactly what St. Paul does in the Epistle to the Romans. Again, it does not appear that the letter was specially written to answer any doubts or settle any controversies then rife in the Roman Church. There were therefore no disturbing influences, such as arise out of personal relations, or peculiar circumstances, to derange a general and systematic exposition of the nature and working of the Gospel. Thus the Epistle to the Romans is more of a treatise than of a letter. In this respect it differs widely from the Epistles to the Corinthians and Galatians, which are full of personal and direct allusions. In one instance alone (xiii. 1) we seem to trace a special reference to the Church of the metropolis. 7. This explanation is in fact to be sought in its *relation to the contemporaneous Epistles*. The letter to the Romans closes the group of Epistles written during the second missionary journey. This group contains besides, as already mentioned, the letters to the Corinthians and Galatians, written probably within the few months preceding. In the Epistles to these two Churches we study the attitude of the Gospel towards the Gentile and Jewish world respectively. These letters are direct and special. The Epistle to the Romans is the summary of what St. Paul had written before, the result of his dealing with the two antagonistic forms of error, the gathering together of the fragmentary teaching in the Corinthian and Galatian letters. 8. Viewing this Epistle then rather in the light of a treatise than of a letter, we are enabled to explain certain *phenomena in the text*. In the received text a doxology stands at the close of the Epistle (xvi. 25-27). The preponderance of evidence is in favour of this position, but there is respectable authority for placing it at the end of ch. xiv. In some texts again it is found in both places, while others omit it entirely. The phenomena of the MSS. seem best explained by supposing that the letter was circulated at an early date (whether during the Apostle’s lifetime or not it is idle to inquire) in two forms, both with and without the two last chapters. 9. In describing the *purpose* of this Epistle we may start from St. Paul’s own words, which, standing at the beginning of the doctrinal portion, may be taken as giving a summary of the contents (i. 16, 17). Accordingly the Epistle has been described as comprising “the religious philosophy of the world’s history.” The atonement of Christ is the centre of religious history. The Epistle, from its general character, lends itself more readily to an *analysis* than is often the case with St. Paul’s Epistles. The following is a table of its contents:—Salutation (i. 1-7). The Apostle at the outset strikes the keynote of the Epistle in the expressions “called as an apostle,” “called as saints.” Divine grace is everything, human merit nothing.—I. Personal explanations. Purposed visit to Rome (i. 8-15).—II. Doctrinal (i. 16-xi. 36). The *general proposition*. The Gospel is the salvation of Jew and Gentile alike. This salvation comes by faith (i. 16, 17). (a) All alike were under *condemnation* before the Gospel. The heathen (i. 18-32). The Jew (ii. 1-29). Objections to this statement answered (iii. 1-8). And the position itself established from Scripture (iii. 9-20). (b) A *righteousness* (justification) is revealed under the Gospel, which being of faith, not of law, is

also universal (iii. 21-26). And boasting is thereby excluded (iii. 27-31). Of this justification by faith Abraham is an example (iv. 1-25). Thus then we are justified in Christ, in whom alone we glory (v. 1-11). And this acceptance in Christ is as universal as was the condemnation in Adam (v. 12-19). (c) The *moral consequences* of our deliverance. The law was given to multiply sin (v. 20, 21). When we died to the law we died to sin (vi. 1-14). The abolition of the law, however, is not a signal for moral license (vi. 15-23). On the contrary, as the law has passed away, so must sin, for sin and the law are correlative; at the same time this is no disparagement of the law, but rather a proof of human weakness (vii. 1-25). So henceforth in Christ we are free from sin, we have the Spirit, and look forward in hope, triumphing over our present afflictions (viii. 1-39). (d) The *rejection of the Jews* is a matter of deep sorrow (ix. 1-5). Yet we must remember—(i.) That the promise was not to the whole people, but only to a select seed (ix. 6-13). And the absolute purpose of God in so ordaining is not to be canvassed by man (ix. 14-19). (ii.) That the Jews did not seek justification aright, and so missed it. This justification was promised by *faith*, and is offered to all alike, the preaching to the Gentiles being implied therein. The character and results of the Gospel dispensation are foreshadowed in Scripture (x. 1-21). (iii.) That the rejection of the Jews is not final. This rejection has been the means of gathering in the Gentiles, and through the Gentiles they themselves will ultimately be brought to Christ (xi. 1-36).—III. Practical exhortations (xii. 1-xv. 13). (a) To holiness of life and to charity in general, the duty of obedience to rulers being inculcated by the way (xii. 1-xiii. 14). (b) And more particularly against giving offence to weaker brethren (xiv. 1-xv. 13).—IV. Personal matters. (a) The Apostle's motive in writing the letter, and his intention of visiting the Romans (xv. 14-33). (b) Greetings (xvi. 1-23). The letter ends with a benediction and doxology (xvi. 24-27). While this Epistle contains the fullest and most systematic exposition of the Apostle's teaching, it is at the same time a very striking expression of his character. Nowhere do his earnest and affectionate nature, and his tact and delicacy in handling unwelcome topics appear more strongly than when he is dealing with the rejection of his fellow-countrymen the Jews. 10. Internal evidence is so strongly in favour of the *genuineness* of the Epistle to the Romans that it has never been seriously questioned. But while the Epistle bears in itself the strongest proofs of its Pauline authorship, the external testimony in its favour is not inconsiderable. It is not the practice of the Apostolic fathers to cite the N. T. writers by name, but marked passages from the Romans are found embedded in the Epistles of Clement and Polycarp. It seems also to have been directly cited by the elder quoted in Irenaeus, and is alluded to by the writer of the Epistle to Diognetus, and by Justin Martyr. It has a place moreover in the Muratorian Canon and in the Syriac and Old Latin Versions. Nor have we the testimony of orthodox writers alone. The Epistle was commonly quoted as an authority by the heretics of the subapostolic age, by the Ophites, by Basilides, by Valentinus, by the Valentinians Heracleon and Ptolemaeus, and perhaps also by Tatian, besides being included in Marcion's Canon. In the latter part of the

second century the evidence in its favour is still fuller.

Rome, the famous capital of the ancient world, is situated on the Tiber at a distance of about 15 miles from its mouth. The "seven hills" (Rev. xvii. 9) which formed the nucleus of the ancient city stand on the left bank. A full account of the history and topography of the city is given elsewhere (*Dict. of Gr. and Rom. Geogr.* ii. 719). Here it will be considered only in its relation to Bible history. Rome is not mentioned in the Bible except in the books of Maccabees and in three books of the N. T., viz. the Acts, the Epistle to the Romans, and the 2nd Epistle to Timothy. The conquests of Pompey seem to have given rise to the first settlement of Jews at Rome. The Jewish king Aristobolus and his son formed part of Pompey's triumph, and many Jewish captives and emigrants were brought to Rome at that time. Many of these Jews were made freedmen. Julius Caesar showed them some kindness. They were favoured also by Augustus. Claudius "commanded all Jews to depart from Rome" (Acts xviii. 2), on account of tumults connected, possibly, with the preaching of Christianity at Rome. This banishment cannot have been of long duration, for we find Jews residing at Rome apparently in considerable numbers at the time of St. Paul's visit (Acts xxviii. 17). It is chiefly in connexion with St. Paul's history that Rome comes before us in the Bible. In illustration of that history it may be useful to give some account of Rome in the time of Nero, the "Caesar" to whom St. Paul appealed, and in whose reign he suffered martyrdom. 1. The city at that time must be imagined as a large and irregular mass of buildings unprotected by an outer wall. The visit of St. Paul lies between two famous epochs in the history of the city, viz. its restoration by Augustus and its restoration by Nero. The boast of Augustus is well known, that he had found the city of brick and left it of marble." The streets were generally narrow and winding, flanked by densely crowded lodging-houses (*insulae*) of enormous height. St. Paul's first visit to Rome took place before the Neronian conflagration, but even after the restoration of the city, which followed upon that event, many of the old evils continued. The population of the city has been variously estimated: at half a million, at two millions and upwards, and even at eight millions. Probably Gibbon's estimate of one million two hundred thousand is nearest to the truth. One half of the population consisted, in all probability, of slaves. The larger part of the remainder consisted of pauper citizens supported in idleness by the miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whose luxury and profligacy we hear so much in the heathen writers of the time. Such was the population which St. Paul would find at Rome at the time of his visit. 2. The localities in and about Rome especially connected with the life of St. Paul, are—(1.) The Appian way, by which he approached Rome (Acts xxviii. 15). (2.) "The palace," or "Caesar's court," (Phil. i. 13). This may mean either the great camp of the Praetorian guards which Tiberius established outside the walls on the N. E. of the city, or, as seems more probable, a barrack attached to the

ROME RESTORED

To face p. 799

Imperial residence on the Palatine. 3. The connexion of other localities at Rome with St. Paul's name rests only on traditions of more or less probability. We may mention especially—(1.) The Mamertine prison or Tullianum, built by Ancus Martius near the forum. It still exists beneath the church of *S. Giuseppe dei Falegnami*. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., esp. iv. 11. (2.) The chapel on the Ostian road which marks the spot where the two Apostles are said to have separated on their way to martyrdom. (3.) The supposed scene of St. Paul's martyrdom, viz. the church of St. Paolo alle tre fontane on the Ostian road. To these may be added (4.) The supposed scene of St. Peter's martyrdom, viz. the church of St. Pietro in Montorio, on the Janiculum. (5.) The chapel "Domine quo Vadis" on the Appian road, the scene of the beautiful legend of our Lord's appearance to St. Peter as he was escaping from martyrdom. (6.) The places where the bodies of the two Apostles, after having been deposited first in the catacombs, are supposed to have been finally buried—that of St. Paul by the Ostian road—that of St. Peter beneath the dome of the famous Basilica which bears his name. 4. We must add, as sites unquestionably connected with the Roman Christians of the Apostolic age—(1.) The gardens of Nero in the Vatican, not far from the spot where St. Peter's now stands. (2.) The Catacombs. These subterranean galleries, commonly from 8 to 10 feet in height, and from 4 to 6 in width, and extending for miles, especially in the neighbourhood of the old Appian and Nomentan ways, were unquestionably used as places of refuge, of worship, and of burial by the early Christians.

Roof. [HOUSE.]

Room. This word is employed in the A. V. of the New Testament as the equivalent of no less than eight distinct Greek terms. The only one of these, however, which need be noticed here is *πρωτοκλισία* (Matt. xxiii. 6; Mark xii. 39; Luke xiv. 7, 8, xx. 46), which signifies the highest place on the highest couch round the dinner or supper table—the "uppermost seat," as it is more accurately rendered in Luke xi. 43.

Rose (Heb. *chabatsseleth*) occurs twice only, viz. in Cant. ii. 1; Is. xxxv. 1. There is much difference of opinion as to what particular flower is here denoted. Tremellius and Diodati, with some of the Rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. Celsius has argued in favour of the Narcissus (*Polyanthus narcissus*). Gesenius has no doubt that the plant denoted is the "autumn crocus" (*Colchicum autumnale*). It appears to us more probable that the narcissus is intended than the crocus. The narcissus and the lily (*Lilium candidum*) would be in blossom together in the early spring, while the *Colchicum* is an autumn plant. Chateaubriand mentions the narcissus as growing in the plain of Sharon. Though the Rose is apparently not mentioned in the Hebrew Bible, it is referred to in Eccles. xiv. 14 (comp. also ch. i. 8; xxxix. 13; Wisd. ii. 8). Roses are greatly prized in the East, more especially for the sake of the rose-water, which is in much request. Dr. Hooker observed seven species of wild roses in Syria.

Rosh. In the genealogy of Gen. xlv. 21, Rosh is reckoned among the sons of Benjamin, but the name does not occur elsewhere, and it is extremely probable that "Khi and Rosh" is a corruption of "Ahiram" (comp. Num. xxvi. 38).

Rosh (Ex. xxxviii. 2, 3, xxxix. 1). The whole sentence thus rendered by the A. V. "Magog the chief prince of Meshech and Tubal," ought to run "Magog the prince of Rosh, Meshech, and Tubal." The meaning is that Magog is the head of the three great Scythian tribes, of which "Rosh" is thus the first. Gesenius considers it beyond doubt that by *Rosh* is intended the tribe on the north of the Taurus, so called from the neighbourhood of the *Rha*, or Volga, and that in this name and tribe we have the first trace of the RUSS or RUSSIAN nation. The name probably occurs again under the altered form of *Rasses*, in Judith ii. 23.

Rosin. Properly "naphtha," as it is both in the LXX, and Vulg., as well as the Peshito-Syriac. In the Song of the Three Children (23), the servants of the king of Babylon are said to have "ceased not to make the oven hot with *rosin*, pitch, tow, and small wood." Pliny mentions *naphtha* as a product of Babylonia, similar in appearance to liquid bitumen, and having a remarkable affinity to fire. To this natural product (known also as Persian *naphtha*, petroleum, rock oil, Rangoon tar, Burnese *naphtha*, &c., reference is made in the passage in question.

Rubies (Heb. *peniyim*; *peninim*). The inviolable rendering of the above-named Hebrew words, concerning the meaning of which there is much difference of opinion and great uncertainty (Job xxviii. 18; see also Prov. iii. 15, viii. 11, xxxi. 10) In Lam. iv. 7 it is said, "the Nazazites were purer than snow, they were whiter than milk, they were more ruddy in body than *peninim*." A Boote supposed "coral" to be intended. Bochart contends that the Hebrew term denotes pearls, and explains the "ruddiness" alluded to above, by supposing that the original word signifies merely "bright in colour," or "colour of a reddish tinge." On the whole, considering that the Hebrew word is always used in the plural, we are inclined to adopt Bochart's explanation, and understand pearls to be intended.

Rue occurs only in Luke xi. 42. The rue here spoken of is doubtless the common *Ruta graveolens*, a shrubby plant about 2 feet high, of strong medicinal virtues. It is a native of the Mediterranean coasts, and has been found by Hasselquist on Mount Tabor. The Talmud enumerates rue amongst kitchen-herbs, and regards it as free of tithes, as being a plant not cultivated in gardens. In our Lord's time, however, rue was doubtless a garden plant, and therefore tithable.

Rufus is mentioned in Mark xv. 21, along with Alexander, as a son of Simon the Cyrenian (Luke xxiii. 26). Again, in Rom. xvi. 13, the Apostle Paul salutes a Rufus whom he designates as "elect in the Lord." It is generally supposed that this Rufus was identical with the one to whom Mark refers. Yet we are to bear in mind that Rufus was not an uncommon name, and possibly, therefore, Mark and Paul may have had in view different individuals.

Ruhamah. The margin of our version renders it "having obtained mercy" (Hos. ii. 1). The name, if name it be, is like Lo-ruhamah, sym-bolical, and as that was given to the daughter of the prophet Hosea, to denote that God's mercy was turned away from Israel, so the name Ruhamah is

addressed to the daughters of the people to denote that they were still the objects of his love and tender compassion.

Rumah, mentioned once only (2 K. xiii. 36). It has been conjectured to be the same place as Arumah (Judg. ix. 41), which was apparently near Shechem. It is more probable that it is identical with Dumah (Josh. xv. 52).

Rush. [REED.]

Rust occurs as the translation of two different Greek words in Matt. vi. 19, 20, and in Jam. v. 3. In the former passage the word *βρωσις*, which is joined with "moth," has by some been understood to denote the larva of some moth injurious to corn, as the *Tinea granella*. It can scarcely be taken to signify "rust," for which there is another term *ids*, which is used by St. James to express rather the "tarnish" which overspreads silver than "rust," by which name we now understand "oxide of iron."

Ruth. A Moabitish woman, the wife, first, of Mahlon, secondly of Boaz, and by him mother of Obed, the ancestress of David and of Christ, and one of the four women who are named by St. Matthew in the genealogy of Christ. A severe famine in the land of Judah induced Elimelech, a native of Bethlehem Ephrathah, to emigrate into the land of Moab, with his wife Naomi, and his two sons, Mahlon and Chilion. At the end of ten years Naomi, now left a widow and childless, having heard that there was plenty again in Judah, resolved to return to Bethlehem, and her daughter-in-law, Ruth, returned with her. They arrived at Bethlehem just at the beginning of barley harvest, and Ruth, going out to glean, chanced to go into the field of Boaz, a wealthy man, and near kinsman of her father-in-law Elimelech. Upon learning who the stranger was, Boaz treated her with the utmost kindness and respect, and sent her home laden with corn which she had gleaned. Encouraged by this incident, Naomi instructed Ruth to claim at the hand of Boaz that he should perform the part of her husband's near kinsman, by purchasing the inheritance of Elimelech, and taking her to be his wife. Boaz married Ruth, amidst the blessings and congratulations of their neighbours. Their son, Obed, was the father of Jesse, who was the father of David.

Ruth, Book of. The main object of the writer is evidently to give an account of David's ancestors; and the book was avowedly composed long after the time of the heroine. (See Ruth i. 1, iv. 7, 17.) Its date and author are quite uncertain. It is probable that the books of Judges, Ruth, Samuel, and Kings originally formed but one work. The book of Ruth clearly forms part of those of Samuel, supplying as it does the essential point of David's genealogy and early family history, and is no less clearly connected with the book of Judges by its opening verse, and the epoch to which the whole book relates.

Eye (Heb. *cussemeth*) occurs in Ex. ix. 32; Is. xxviii. 25; in the latter the margin reads "spelt." In Ez. iv. 9 the text has "fitches" and the margin "rie." It is probable that by *Cussemeth* "spelt" is intended.

S

Sab'aoth, the Lord of, occurs in Rom. ix. 29; James v. 4, but is more familiar through its occurrence in the Sanctus of the Te Deum—"Holy,

SABBATH

Holy, Holy, Lord God of Sabaoth." Sabaoth is the Greek form of the Hebrew word *tseddôth*, "armies," and occurs in the oft-repeated formula which is translated in the Authorised Version of the Old Test. by "Lord of Hosts," "Lord God of hosts." In the mouth and the mind of an ancient Hebrew, *Jehovah-tseddôth* was the leader and commander of the armies of the nation, who "went forth with them" (Ps. xlv. 9), and led them to certain victory over the worshippers of Baal, Chemosh, Molech, Ashtaroth, and other false gods.

Sab'at. 1. The sons of Sabat are enumerated among the sons of Solomon's servants who returned with Zorobabel (1 Esd. v. 34).—2. The month SEBAT (1 Mac. xvi. 14).

Sabata'sa. SAMBETHAI (1 Esd. ix. 48; comp. Neh. viii. 7.).

Sab'atus. ZABAD (1 Esd. ix. 28; comp. Ezr. x. 27.).

Sab'ban. BINNUI 1 (1 Esd. viii. 63; comp. Ezr. viii. 33).

Sabbath (*shabbâth*, "a day of rest," from *shâbath*, "to cease to do," "to rest"). This is the obvious and undoubted etymology. The name Sabbath is applied to divers great festivals, but principally and usually to the seventh day of the week, the strict observance of which is enforced not merely in the general Mosaic code, but in the Decalogue itself. The first Scriptural notice of the weekly Sabbath, though it is not mentioned by name, is to be found in Gen. ii. 3, at the close of the record of the six days' creation. And hence it is frequently argued that the institution is as old as mankind, and is consequently of universal concern and obligation. We cannot, however, approach this question till we have examined the account of its enforcement upon the Israelites. It is in Ex. xvi. 23-29 that we find the first incontrovertible institution of the day, as one given to, and to be kept by, the children of Israel. Shortly afterwards it was re-enacted in the Fourth Commandment. Many of the Rabbis date its first institution from the incident recorded in Ex. xv. 25. This, however, seems to want foundation of any sort. We are not on sure ground till we come to the unmistakable institution in chap. xvi. in connexion with the gathering of manna. The words in this latter are not in themselves enough to indicate whether such institution was altogether a novelty, or whether it referred to a day the sanctity of which was already known to those to whom it was given. There is plausibility certainly in the opinion of Grotius, that the day was already known, and in some measure observed as holy, but that the rule of abstinence from work was first given then, and shortly afterwards more explicitly imposed in the Fourth Commandment. There it is distinctly set forth, and extended to the whole of an Israelite's household, his son and his daughter, his slaves, male and female, his ox and his ass, and the stranger within his gates. Penalties and provisions in other parts of the Law construed the abstinence from labour prescribed in the commandment. At a later period we find the Prophet Isaiah uttering solemn warnings against profaning, and promising large blessings on the due observance of the day (Is. lviii. 13, 14). In Jeremiah's time there seems to have been an habitual violation of it (Jer. xvii. 21-27). By Ezekiel (xx. 12-24) the profanation of the Sabbath is made foremost among the national sins of the Jews. From Nehemiah x. 31, we learn that

the people entered into a covenant to renew the observance of the Law, in which they pledged themselves neither to buy nor sell victuals on the Sabbath. The practice was then not infrequent, and Nehemiah tells us (xiii. 15-22) of the successful steps which he took for its stoppage. Henceforward there is no evidence of the Sabbath being neglected by the Jews, except such as (1 Macc. i. 11-15, 39-45) went into open apostasy. When we come to the N. T. we find the most marked stress laid on the Sabbath. In whatever ways the Jew might err respecting it, he had altogether ceased to neglect it. On the contrary, wherever he went its observance became the most visible badge of his nationality. Our Lord's mode of observing the Sabbath was one of the main features of His life, which His Pharisaic adversaries most eagerly watched and criticised. Before proceeding to any of the more curious questions connected with the Sabbath, such as that of its alleged pre-Mosaic origin and observance, it will be well to consider and determine what were its true idea and purpose in that Law of which beyond doubt it formed a leading feature, and among that people for whom, if for none else, we know that it was designed. And we shall do this with most advantage as it seems to us, by pursuing the inquiry in the following order:—I. By considering, with a view to their elimination, the Pharisaic and Rabbinical prohibitions. II. By taking a survey of the general Sabbatical periods of Hebrew time. III. By examining the actual enactments of Scripture respecting the seventh day, and the mode in which such observance was maintained by the best Israelites.—I. Nearly every one is aware that the Pharisaic and Rabbinical schools invented many prohibitions respecting the Sabbath of which we find nothing in the original institution.* Of these some may have been legitimate enforcements in detail of that institution, such as the Scribes and Pharisees "sitting in Moses' seat" (Matt. xxiii. 2, 3) had a right to impose. How a general law is to be carried out in particular cases, must often be determined for others by such as have authority to do so. To this class may belong the limitation of a Sabbath-day's journey. Many, however, of these prohibitions were fantastic and arbitrary, in the number of those "heavy burdens and grievous to be borne" which the later expounders of the Law "laid on men's shoulders" (comp. Matt. xii. 1-13; John v. 10). That this perversion of the Sabbath had become very general in our Saviour's time is apparent both from the recorded objections to acts of His on that day, and from His marked conduct on occasions to which those objections were sure to be urged. There is no reason, however, for thinking that the Pharisees had arrived at a sentence against pleasure of every sort on the sacred day. The duty of hospitality was remembered. It was usual for the rich to give a feast on that day; and our Lord's attendance at such a feast, and making it the occasion of putting forth His rules for the demeanour of guests, and for the right exercise of hospitality, show that the gathering of friends and social enjoyment were not deemed inconsistent with the true scope and spirit of the Sabbath. It was thought right that the meats, though cold, should be of the best and choicest, nor might the Sabbath be chosen for a fast. Such are the inferences to which we are brought by our Lord's words concerning, and works on, the sacred day. The declaration that "the Son of Man is Lord also of the Sabbath," must not be viewed as though our Lord held Himself

CON. D. B

free from the Law respecting it. It is to be taken in connexion with the preceding words, "the Sabbath was made for man," &c., from which it is an inference. If, then, our Lord, coming to fulfil and rightly interpret the Law, did thus protest against the Pharisaic and Rabbinical rules respecting the Sabbath, we are supplied by this protest with a large negative view of that ordinance. The acts condemned by the Pharisees were not violations of it.—II. The Sabbath was the keynote to a scale of Sabbatical observance—consisting of itself, the seventh month, the seventh year, and the year of Jubilee. As each seventh day was sacred, so was each seventh month, and each seventh year. *Of the observances of the seventh month, little needs be said. That month opened with the Feast of Trumpets, and contained the Day of Atonement and Feast of Tabernacles—the last named being the most joyful of Hebrew festivals. Its great centre was the Feast of Tabernacles or Ingathering, the year and the year's labour having then done their work and yielded their issues. The rules for the Sabbatical year are very precise. As labour was prohibited on the seventh day, so the land was to rest every seventh year. And as each forty-ninth year wound up seven of such weeks of years, so it either was itself, or it ushered in, what was called "the year of Jubilee." In Exodus xlii. 10, 11, we find the Sabbatical year placed in close connexion with the Sabbath-day, and the words in which the former is prescribed are analogous to those of the Fourth Commandment. This is immediately followed by a renewed proclamation of the law of the Sabbath. It is impossible to avoid perceiving that in these passages the two institutions are put on the same ground, and are represented as quite homogeneous. Their aim, as here exhibited, is eminently a beneficent one. To give rights to classes that would otherwise have been without such, to the bondman and bondmaid, nay, to the beast of the field, is viewed here as their main end. "The stranger," too, is comprehended in the benefit. The same beneficent aim is still more apparent in the fuller legislation respecting the Sabbatical year which we find in Lev. xxv. 2-7. One great aim of both institutions, the Sabbath-day and the Sabbatical year, clearly was to debar the Hebrew from the thought of absolute ownership of anything. The year of Jubilee must be regarded as completing this Sabbatical Scale, whether we consider it as really the forty-ninth year, the seventh of a week of Sabbatical years or the fiftieth, a question on which opinions are divided.—III. We must consider the actual enactments of Scripture respecting the seventh day. However homogeneous the different Sabbatical periods may be, the weekly Sabbath is the tonic or keynote. We commence our inquiry with the institution of it in the wilderness, in connexion with the gathering of manna (Ex. xvi. 23). The prohibition to gather the manna on the Sabbath is accompanied by one to bake or to seethe on that day. The Fourth Commandment gives us but the generality, "all manner of work," and we are left to seek elsewhere for the particular application of the general principle. That general principle in itself, however, obviously embraces an abstinence from worldly labour or occupation, and from the enforcing such on servants or dependents, or on the stranger. By him is most probably meant the partial proselyte. The naming him therefore in the commandment helps to interpret its whole principle, and testifies to its having been a beneficent

8 F.

privilege for all who came within it. It gave rights to the slave, to the despised stranger, even to the ox and the ass. This beneficent character of the Fourth Commandment is very apparent in the version of it which we find in Deuteronomy (Deut. v. 12-15). But although this be so, and though it be plain that to come within the scope of the commandment was to possess a franchise, to share in a privilege, yet does the original proclamation of it in Exodus place it on a ground which, closely connected no doubt with these others, is yet higher and more comprehensive. The Divine method of working and rest is there proposed to man as the model after which he is to work and to rest. Time then presents a perfect whole, is then well rounded and entire, when it is shaped into a week, modelled on the six days of creation and their following Sabbath. Six days' work and the seventh day's rest conform the life of man to the method of his Creator. In distributing his life thus, man may look up to God as his Archetype. It is most important to remember that the Fourth Commandment is not limited to a mere enactment respecting one day, but prescribes the due distribution of a week, and enforces the six days' work as much as the seventh day's rest. This higher ground of observance was felt to invest the Sabbath with a theological character, and rendered it the great witness for faith in a personal and creating God. In all this, however, we have but an assertion of the general principle of resting on the Sabbath, and must seek elsewhere for information as to the details wherewith that principle was to be brought out. We have already seen that the work forbidden is not to be confounded with action of every sort. The terms in the commandment show plainly enough the sort of work which is contemplated. They are *servile work, and business*. The Pentateuch presents us with but three applications of the general principle (Ex. xvi. 29, xxxv. 3; Num. xv. 32-36). The reference of Isaiah to the Sabbath gives us no details. Those in Jeremiah and Nehemiah show that carrying goods for sale, and buying such, were equally profanations of the day. There is no ground for supposing that to engage the enemy on the Sabbath was considered unlawful before the Captivity. At a subsequent period we know (1 Macc. ii. 34-38) that the scruple existed and was acted on with most calamitous effects. Yet the scruple, like many other scruples, proved a convenience, and under the Roman Empire the Jews procured exemption from military service by means of it. It was not, however, without its evils. In the siege of Jerusalem by Pompey, as well as in the final one by Titus, the Romans took advantage of it. So far therefore as we have yet gone, so far as the negative side of Sabbatical observance is concerned, it would seem that servile labour, whether that of slaves or of hired servants, and all worldly business on the part of masters, was suspended on the Sabbath, and the day was a common right to rest and be refreshed, possessed by all classes in the Hebrew community. It was thus, as we have urged, a beneficent institution. We must now quit the negative for the positive side of the institution. In the first place, we learn from the Pentateuch that the morning and evening sacrifice were both doubled on the Sabbath-day, and that the fresh shew-bread was then baked, and substituted on the Table for that of the previous week. And this at once leads to the observation that the negative rules, proscribing work, lighting of fires, &c., did not apply to the

rites of religion. It became a *dictum* that *there was no Sabbath in holy things*. Next, it is clear that individual offerings were not breaches of the Sabbath; and from this doubtless came the feasts of the rich on that day, which were sanctioned by our Saviour's attendance on one such. We have no ground for supposing that anything like the didactic institutions of the synagogue formed part of the original observance of the Sabbath. But from an early period if not, as is most probable, from the very institution, occupation with holy themes was regarded as an essential part of the observance of the Sabbath. It would seem to have been an habitual practice to repair to a prophet on that day, in order, it must be presumed, to listen to his teaching (2 K. iv. 23). Certain Psalms too, e. g. the 92nd, were composed for the Sabbath, and probably used in private as well as in the Tabernacle. At a later period we come upon precepts that on the Sabbath the mind should be uplifted to high and holy themes—to God, His character, His revelations of Himself, His mighty works. Still the thoughts with which the day was invested were ever thoughts, not of restriction, but of freedom and of joy. Such indeed would seem, from Neh. viii. 9-12, to have been essential to the notion of a *holy* day. We have more than once pointed out that pleasure, as such, was never considered by the Jews a breach of the Sabbath. We have seen, then, that, for whomsoever else the provision was intended, the chosen race were in possession of an ordinance, whereby neither a man's time nor his property could be considered absolutely his own, the seventh of each week being holy to God, and dedicated to rest after the pattern of God's rest, and giving equal rights to all. We have also seen that this provision was the tonic to a chord of Sabbatical observance, through which the same great principles of God's claim and society's, on every man's time and every man's property, were extended and developed. Of the Sabbatical year, indeed, and of the year of Jubilee, it may be questioned whether they were persistently observed. But no doubt exists that the weekly Sabbath was always partially, and in the Pharisaic and subsequent times very strictly, however mistakenly, observed. We have hitherto viewed the Sabbath merely as a Mosaic ordinance. It remains to ask whether, first, there be indications of its having been previously known and observed; and, secondly, whether it have an universal scope and authority over all men. The first and chief argument of those who maintain that the Sabbath was known before Moses, is the reference to it in Gen. ii. 2, 3. But the whole argument is very precarious. We have no materials for ascertaining, or even conjecturing, which was put forth first, the record of the Creation, or the Fourth Commandment. The next indication of a pre-Mosaic Sabbath has been found in Gen. iv. 3, where we read that "in process of time it came to pass that Cain brought of the fruit of the ground an offering unto the Lord." The words rendered *in process of time* mean literally "at the end of days," and it is contended that they designate a fixed period of days, probably the end of a week, the seventh or Sabbath-day. Again, the division of time into weeks seems recognised in Jacob's courtship of Rachel (Gen. xxix. 27, 28). Lastly, the opening of the Fourth Commandment, the injunction to *remember* the Sabbath-day, is appended to as proof that that day was already known. It is easy to see that all this is but a precarious found-

dition on which to build. It is not clear that the words in Gen. iv. 3 denote a fixed division of time of any sort. Those in Gen. xxix. obviously do, but carry us no farther than proving that the week was known and recognised by Jacob and Laban. The argument from the prevalence of the weekly division of time would require a greater approach to universality in such practice than the facts exhibit, to make it a cogent one. While the injunction in the Fourth Commandment to *remember* the Sabbath-day may refer only to its previous institution in connexion with the gathering of manna, or may be but the natural precept to *keep in mind* the rule about to be delivered, on the other hand, the perplexity of the Israelites respecting the double supply of manna on the sixth (Ex. xvi. 22) leads us to infer that the Sabbath for which such extra supply was designed was not then known to them. Moreover the language of Ezekiel (xx.) seems to designate it as an ordinance distinctively Hebrew and Mosaic. We cannot then, from the uncertain notices which we possess, infer more than that the weekly division of time was known to the Israelites and others before the Law of Moses. But to come to our second question, it by no means follows, that even if the Sabbath were no older than Moses, its scope and obligation are limited to Israel, and that itself belongs only to the obsolete enactments of the Levitical Law. That Law contains two elements, the code of a particular nation, and commandments of human and universal character. To which class belongs the Sabbath, viewed simply in itself, is a question which will soon come before us, and one which does not appear hard to settle. Meanwhile, we must inquire into the case as exhibited by Scripture. And here we are at once confronted with the fact that the command to keep the Sabbath forms part of the Decalogue. In some way, therefore, the Fourth Commandment has an authority over, and is to be obeyed by, Christians, though whether in the letter, or in some large spiritual sense and scope, is a question which still remains. The phenomena respecting the Sabbath presented by the New Testament are, 1st, the frequent reference to it in the four Gospels; and 2ndly, the silence of the Epistles, with the exception of one place (Col. ii. 16, 17), where its repeal would seem to be asserted, and perhaps one other (Heb. iv. 9). 1st. The references to it in the four Gospels are numerous enough. We have already seen the high position which it took in the minds of the Rabbis, and the strange code of prohibitions which they put forth in connexion with it. The consequence of this was, that no part of our Saviour's teaching and practice would seem to have been so eagerly and narrowly watched as that which related to the Sabbath. We have already seen the kind of prohibitions against which both His teaching and practice were directed; and His two pregnant declarations, "The Sabbath was made for man, not man for the Sabbath," and "My Father worketh hitherto, and I work," surely exhibit to us the Law of the Sabbath as human and universal. The former sets it forth as a privilege and a blessing. The latter wonderfully exalts the Sabbath by referring it to God as its archetype. 2ndly. The Epistles, it must be admitted, with the exception of one place, and perhaps another to which we have already referred, are silent on the subject of the Sabbath. No rules for its observance are ever given by the Apostles—its violation is never denounced by them, Sabbath-

breakers are never included in any list of offenders. Col. ii. 16, 17, seems a far stronger argument for the abolition of the Sabbath in the Christian dispensation than is furnished by Heb. iv. 9 for its continuance; and while the first day of the week is more than once referred to as one of religious observance, it is never identified with the Sabbath. When we turn to the monuments, which we possess of the early Church, we find ourselves on the whole carried in the same direction. Again, the observance of the Lord's Day as a Sabbath would have been wellnigh impossible to the majority of Christians in the first ages. When the early Fathers speak of the Lord's Day, they sometimes, perhaps, by comparing, connect it with the Sabbath; but we have never found a passage, previous to the conversion of Constantine, prohibitory of any work or occupation on the former, and any such, did it exist, would have been in a great measure nugatory, for the reasons just alleged. After Constantine things become different at once. His celebrated edict prohibitory of judicial proceedings on the Lord's Day was probably dictated by a wish to give the great Christian festival as much honour as was enjoyed by those of the heathen, rather than by any reference to the Sabbath or the Fourth Commandment; but it was followed by several which extended the prohibition to many other occupations, and to many forms of pleasure held innocent on ordinary days. But it was surely impossible to observe both the Lord's Day, as was done by Christians after Constantine, and to read the Fourth Commandment without connecting the two; and, seeing that such was to be the practice of the developed Church, we can understand how the silence of the N. T. Epistles, and even the strong words of St. Paul (Col. ii. 16, 17), do not impair the human and universal scope of the Fourth Commandment, exhibited so strongly in the very nature of the Law, and in the teaching respecting it of Him who came not to destroy the Law, but to fulfil. In the East, indeed, where the seventh day of the week was long kept as a festival, that would present itself to men's minds as the Sabbath, and the first day of the week would appear rather in its distinctively Christian character, and as of Apostolical and ecclesiastical origin, than in connexion with the Old Law. But in the West the seventh day was kept for the most part as a fast, and that for a reason merely Christian, viz. in commemoration of our Lord's lying in the sepulchre throughout that day. Its observance therefore would not obscure the aspect of the Lord's Day as that of hebdomadal rest and refreshment. Were we prepared to embrace an exposition which has been given of a remarkable passage already referred to (Heb. iv. 8-10), we should find it singularly illustrative of the view just suggested. In ver. 9 we have the words "there remaineth therefore a rest for the people of God." Now it is important that throughout the passage the word for rest is *κατάπαυσις*, and that in the words just quoted it is changed into *σαββατισμός*, which certainly means the keeping of rest, the act of sabbatizing rather than the objective rest itself. It has accordingly been suggested that those words are not the author's conclusion—which is to be found in the form of thesis in the declaration "we which have believed do enter into rest"—but a parenthesis to the effect that "to the people of God," the Christian community, there remaineth *there is left, a Sabbath-*

iring, the great change that has passed upon them and the mighty elevation to which they have been brought as on other matters, so as regards the Rest of God revealed to them, still leaving scope for and justifying the practice. The objections, however, to this exposition are many and great. It would not have been right, however, to have passed it over in this article without notice, as it relates to a passage of Scripture in which Sabbath and Sabbatical ideas are markedly brought forward. The word *Sabbath* seems sometimes to denote a *week* in the N. T.

Sabbath-day's Journey (Acts i. 12). On occasion of a violation of the commandment by certain of the people who went to look for manna on the seventh day, Moses enjoined every man to "abide in his place," and forbade any man to "go out of his place" on that day (Ex. xvi. 29). It seems natural to look on this as a mere enactment *pro re natâ*, and having no bearing on any state of affairs subsequent to the journey through the wilderness and the daily gathering of manna. Whether the earlier Hebrews did or did not regard it thus, it is not easy to say. In after times the precept in Ex. xvi. was undoubtedly viewed as a permanent law. But as some departure from a man's own place was unavoidable, it was thought necessary to determine the allowable amount, which was fixed at 2000 paces, or about six furlongs, from the wall of the city. The permitted distance seems to have been grounded on the space to be kept between the Ark and the people (Josh. iii. 4) in the wilderness, which tradition said was that between the Ark and the tents. We find the same distance given as the circumference outside the walls of the Levitical cities to be counted as their suburbs (Num. xxxv. 5). The *terminus à quo* was thus not a man's own house, but the wall of the city where he dwelt.

Sabbathe'us. SHABBETHAI the Levite (1 Esd. ix. 14; comp. Ezr. x. 15).

Sabbatical Year. As each seventh day and each seventh month were holy, so was each seventh year, by the Mosaic code. We first encounter this law in Ex. xxiii. 10, 11. The commandment is, to sow and reap for six years, and to let the land rest on the seventh, "that the poor of thy people may eat; and what they leave the beasts of the field shall eat." It is added, "In like manner thou shalt deal with thy vineyard and thy oliveyard." We next meet with the enactment in Lev. xxv. 2-7, and finally in Deut. xv., in which last place the new feature presents itself of the seventh year being one of release to debtors. When we combine these several notices, we find that every seventh year the land was to have rest to *enjoy her Sabbaths*. Neither tillage nor cultivation of any sort was to be practised. This singular institution has the aspect, at first sight, of total impracticability. This, however, wears off when we consider that in no year was the owner allowed to reap the whole harvest (Lev. xix. 9, xxiii. 22). Moreover, it is clear that the owners of land were to lay by corn in previous years for their own and their families' wants (Lev. xxv. 20-22). The release of debtors during the Sabbatical year must not be confounded with the release of slaves on the seventh year of their service. The spirit of this law is the same as that of the weekly Sabbath. Both have a benedictive tendency, limiting the rights and checking the sense of property; the one puts in God's claims on time, the other on the land. There may also

have been an eye to the benefit which would accrue to the land from lying fallow every seventh year, in a time when the rotation of crops was unknown. The Sabbatical year opened in the Sabbatical month; and the whole Law was to be read every such year, during the Feast of Tabernacles, to the assembled people. At the completion of a week of Sabbatical years, the Sabbatical scale received its completion in the year of Jubilee. The next question that presents itself regarding the Sabbatical year relates to the time when its observance became obligatory. It is more reasonable to suppose, with the best Jewish authorities, that the law became obligatory fourteen years after the first entrance into the Promised Land, the conquest of which took seven years, and the distribution seven more. A further question arises. At whatever period the obedience to this law ought to have commenced, was it in point of fact obeyed? In the threatenings contained in Lev. xxvi., judgments on the violation of the Sabbatical year are particularly contemplated (vers. 33, 34); and that it was greatly if not quite neglected appears from 2 Chr. xxxvi. 20, 21. Some of the Jewish commentators have inferred from this that their forefathers had neglected exactly seventy Sabbatical years. If such neglect was continuous, the law must have been disobeyed throughout a period of 490 years, *i. e.* through nearly the whole duration of the monarchy; and as there is nothing in the previous history leading to the inference that the people were more scrupulous then, we must look to the return from captivity for indications of the Sabbatical year being actually observed (1 Marc. vi. 49). Alexander the Great is said to have exempted the Jews from tribute during it.

Sabb'e'us, 1 Esd. ix. 32. [SHEMAIAH, 14.]

Sabe'ang. [SHEBA.]

Sa'bi [ZEBAIM.] 1 Esd. v. 34.

Sab'tah (Gen. x. 7), or **Sabta** (1 Chr. i. 9), the third in order of the sons of Cush. The statements of Pliny (vi. 32, §155, xii. 32), Ptolemy (vi. 7, p. 411), and Anon. Peripl. (27), respecting Sabbatha, Sabota, or Sobotale, metropolis of the Atramiatæ (probably the Chatramotitæ), seem to point to a trace of the tribe which descended from Sabtah, always supposing that this city Sabbatha was not a corruption or dialectic variation of Saba, Seba, or Sheba. Ptolemy places Sabbatha in 77° long, 16° 30' lat. It was an important city, containing no less than sixty temples. Gesenius, who sees in Cush only Ethiopia, "has no doubt that Sabtah should be compared with **Ṣāḫār**, **Ṣāḫd**, **Ṣāḫal**, on the shore of the Arabian Gulf, situated just where Arkiko is now." It only remains to add that Michaelis removes Sabtah to Ceuta opposite Gibraltar, called in Arabic Seltah; and that Bochart prefers to place Sabtah near the western shore of the Persian Gulf, with the *Sapthia* of Ptolemy, the name also of an island in that gulf.

Sab'techa, and **Sab'techah** (Gen. x. 7; 1 Chr. i. 9), the fifth in order of the sons of Cush, whose settlements would probably be near the Persian Gulf. He has not been identified satisfactorily. Bochart compares Sabtechah with the city of Samyadace of Steph. Byz.

Sa'car. 1. A Hararite, father of Ahiam (1 Chr. xi. 35).—2. The fourth son of Obed-edom (1 Chr. xxvi. 4).

Sackbut (Dan. iii. 5, 7, 10, 15), the rendering in the A. V. of the Chaldee *sabbēca*. If this musical instrument be the same as the Greek *σαμβύκη*

and Latin *sambuca*, the English translation is entirely wrong. The sackbut was a wind-instrument; the *sambuca* was played with strings. Mr. Chappell says (*Pop. Mus.* i. 35), "The sackbut was a bass trumpet with a slide, like the modern trombone." The *sambuca* was a triangular instrument with four or more strings played with the fingers.

Sackcloth, a coarse texture, of a dark colour, made of goats'-hair (Is. i. 3; Rev. vi. 12), and resembling the *cilicium* of the Romans. It was used (1.) for making sacks (Gen. xlii. 25; Lev. xi. 32; Josh. ix. 4); and (2.) for making the rough garments used by mourners, which were in extreme cases worn next the skin (1 K. xxi. 27; 2 K. vi. 30; Job xvi. 15; Is. xxxii. 11), and this even by females (Joel i. 8; 2 Macc. iii. 19), but at other times were worn over the coat (Jon. iii. 6) in lieu of the outer garment.

Sacrifice. The peculiar features of each kind of sacrifice are referred to under their respective heads; the object of this article will be:—I. To examine the historical development of sacrifice in the Old Testament. II. To sketch briefly the theory of sacrifice, as it is set forth both in the Old and New Testaments, with especial reference to the Atonement of Christ.—I. (A.) ORIGIN OF SACRIFICE.—In tracing the history of sacrifice, from its first beginning to its perfect development in the Mosaic ritual, we are at once met by the long-disputed question, as to the *origin of sacrifice*; whether it arose from a natural instinct of man, sanctioned and guided by God, or whether it was the subject of some distinct primeval revelation. Its universal prevalence, independent of, and often opposed to, man's natural reasonings on his relation to God, shows it to have been primeval, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or whether it was based on that sense of sin and lost communion with God which is stamped by His hand on the heart of man—is an historical question, perhaps insoluble. The great difficulty in the theory which refers it to a distinct command of God, is the total silence of Holy Scripture. Nor is the fact of the mysterious and supernatural character of the doctrine of Atonement, with which the sacrifices of the O. T. are expressly connected, any conclusive argument on this side of the question. All allow that the eucharistic and deprecatory ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, dependent, as it is, entirely on its typical nature, appears but gradually in Scripture. It is only in the N. T. (especially in the Epistle to the Hebrews) that its nature is clearly unfolded. It is to be noticed that, except in Gen. xv. 9, the method of patriarchal sacrifice is left free. The inference is at least probable, that when God sanctioned formally a natural rite, then, and not till then, did He define its method. The question, therefore, of the origin of sacrifice is best left in the silence with which Scripture surrounds it.—

(B.) ANTE-MOSAIC HISTORY OF SACRIFICE.—In examining the various sacrifices recorded in Scripture before the establishment of the Law, we find that the words specially denoting expiatory sacrifice are not applied to them. This fact does not at all show that they were not actually expiatory, but it justifies the inference that this idea was not then the prominent one in the doctrine of sacrifice. The sacrifice of Cain and Abel is called *minchah*, although in the case of the latter it was a bloody

sacrifice. In the case of both it would appear to have been eucharistic. The sacrifice of Noah after the Flood (Gen. viii. 20) is called burnt-offering (*'ôlah*). This sacrifice is expressly connected with the institution of the *Covenant* which follows in ix. 8-17. The sacrifice (*zebach*) of Jacob at Mizpah also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, therefore, the prominent idea seems to have been what is called the *federative*, the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by the victim, to the service of the Lord. The sacrifice of Isaac (Gen. xxii. 1-13) stands by itself. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham's part, and the willing dedication of himself on Isaac's, are in the foreground; the expiatory idea, if recognised at all, holds certainly a secondary position. In the burnt-offerings of Job for his children (Job i. 5) and for his three friends (xlii. 8), we for the first time find the expression of the desire of expiation for sin. The same is the case in the words of Moses to Pharaoh (Ex. x. 25). Here the main idea is at least deprecatory.—(C.) THE SACRIFICES OF THE MOSAIC PERIOD.—These are inaugurated by the offering of the PASSOVER and the sacrifice of Ex. xxiv. The Passover indeed is unique in its character; but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown. The sacrifice of Ex. xxiv., offered as a solemn inauguration of the Covenant of Sinai, has a similarly comprehensive character. The Law of Leviticus now unfolds distinctly the various forms of sacrifice:—(a.) *The burnt-offering*. SELF-DEDICATORY.—(b.) *The meat-offering* (*unbloody*); *the peace-offering* (*bloody*). EUCCHARISTIC.—(c.) *The sin-offering*; *the trespass-offering*. EXPIATORY.—To these may be added,—(d.) *The incense* offered after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High Priest), accompanying and making efficacious the prayer of the people. In the consecration of Aaron and his sons (Lev. viii.) we find these offered in what became ever afterwards the appointed order: first came the sin-offering, to prepare access to God; next, the burnt-offering, to mark their dedication to His service; and thirdly, the meat-offering of thanksgiving. Henceforth the sacrificial system was fixed in all its parts, until He should come whom it typified. It is to be noticed that the Law of Leviticus takes the rite of sacrifice for granted (see Lev. i. 2, ii. 1, &c.), and is directed chiefly to guide and limit its exercise. In consequence of the peculiarity of the Law, it has been argued that the whole system of sacrifice was only a condescension to the weakness of the people, borrowed, more or less, from the heathen nations, especially from Egypt, in order to guard against worse superstition and positive idolatry. Taken as an explanation of the theory of sacrifice, it is weak and superficial; but as giving a reason for the minuteness and elaboration of the Mosaic ceremonial, it may probably have some value.—(D.) POST-MOSAIC SACRIFICES.—It will not be necessary to pursue, in detail, the history of Post-Mosaic Sacrifice, for its main principles were now fixed for ever. The regular sacrifices in the Temple service were:—(a.) BURNT-OFFERING.

1. The daily burnt-offerings (Ex. xxix. 38-42). 2. The double burnt-offerings on the Sabbath (Num. xxviii. 9, 10). 3. The burnt-offerings at the great festivals (Num. xxviii. 11-xxix. 39).—(b.) MEAT-OFFERINGS. 1. The daily meat-offerings accompanying the daily burnt-offerings (Ex. xxix. 40, 41). 2. The shew-bread, renewed every Sabbath (Lev. xxiv. 5, 9). 3. The special meat-offerings at the Sabbath and the great festivals (Num. xxviii. xxix.). 4. The first-fruits, at the Passover (Lev. xxiii. 10-14), at Pentecost (xxiii. 17-20); the first-fruits of the dough and threshing-floor at the harvest-time (Num. xv. 20, 21; Deut. xxvi. 1-11).—(c.) SIN-OFFERINGS. 1. Sin-offering each new moon (Num. xxviii. 15). 2. Sin-offerings at the Passover, Pentecost, Feast of Trumpets, and Tabernacles (Num. xxviii. 22, 30, xxix. 5, 16, 19, 22, 25, 28, 31, 34, 38). 3. The offering of the two goats for the people, and of the bullock for the priest himself, on the Great Day of Atonement (Lev. xvi.).—(d.) INCENSE. 1. The morning and evening incense (Ex. xxx. 7, 8). 2. The incense on the Great Day of Atonement (Lev. xvi. 12). "Besides these public sacrifices, there were offerings of the people for themselves individually.—II. By the order of sacrifice in its perfect form (as in Lev. viii.) it is clear that the sin-offering occupies the most important place, the burnt-offering comes next, and the meat-offering or peace-offering last of all. The second could only be offered after the first had been accepted; the third was only a subsidiary part of the second. Yet, in actual order of time, it has been seen that the patriarchal sacrifices partook much more of the nature of the peace-offering and burnt-offering; and that, under the Law, by which was "the knowledge of sin" (Rom. iii. 20), the sin-offering was for the first time explicitly set forth. This is but natural, that the deepest ideas should be the last in order of development. It is needless to dwell on the universality of heathen sacrifices, and difficult to reduce to any single theory the various ideas involved therein. It is clear that the sacrifice was often looked upon as a gift or tribute to the gods. It is also clear that sacrifices were used as prayers to obtain benefits, or to avert wrath. On the other hand, that they were regarded as thank-offerings is equally certain. Nor was the higher idea of sacrifice, as a representation of the self-devotion of the offerer, body and soul, to the god, wholly lost, although generally obscured by the grosser and more obvious conceptions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation, that is, the belief in a communion with the gods, natural to man, broken off in some way, and by sacrifice to be restored. Now the essential difference between these heathen views of sacrifice and the Scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. In fact, it brings out, clearly and distinctly, the ideas which in heathenism were uncertain, vague, and perverted. But the essential points of distinction are two. First, that whereas the heathen conceived of their gods as alienated in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God Himself as approaching man, as pointing out and sanctioning the way by which the broken covenant should be restored.⁶ The second mark of distinction is closely connected with this, inasmuch as it shows sacrifice to be a scheme proceeding from God, and, in His foreknowledge, con-

nected with the one central fact of all human history. It is to be found in the typical character of all Jewish sacrifices, on which, as the Epistle to the Hebrews argues, all their efficacy depended. The nature and meaning of the various kinds of sacrifice is partly gathered from the form of their institution and ceremonial, partly from the teaching of the Prophets, and partly from the N. T., especially the Epistle to the Hebrews. All had relation, under different aspects, to a *Covenant* between God and man. The SIN-OFFERING represented that Covenant as broken by man, and as knit together again, by God's appointment, through the "shedding of blood." The shedding of the blood, the symbol of life, signified that the death of the offender was deserved for sin, but that the death of the victim was accepted for his death by the ordinance of God's mercy. Beyond all doubt the sin-offering distinctly witnessed that sin existed in man, that the "wages of that sin was death," and that God had provided an Atonement by the vicarious suffering of an appointed victim. The ceremonial and meaning of the BURNT-OFFERING were very different. The idea of expiation seems not to have been absent from it, for the blood was sprinkled round about the altar of sacrifice; but the main idea is the offering of the whole victim to God, representing (as the laying of the hand on its head shows) the devotion of the sacrificer, body and soul, to Him (Rom. xii. 1). The death of the victim was, so to speak, an incidental feature. The MEAT-OFFERINGS, the peace or thank-offering, the first-fruits, &c., were simply offerings to God of His own best gifts, as a sign of thankful homage, and as a means of maintaining His service and His servants. The characteristic ceremony in the peace-offering was the eating of the flesh by the sacrificer. It betokened the enjoyment of communion with God. It is clear from this that the idea of sacrifice is a complex idea, involving the propitiatory, the dedicatory, and the eucharistic elements. Any one of these, taken by itself, would lead to error and superstition. All three probably were more or less implied in each sacrifice, each element predominating in its turn. Now the Israelites, while they seem always to have retained the ideas of propitiation and of eucharistic offering, constantly ignored the self-dedication which is the link between the two, and which the regular burnt-offering should have impressed upon them as their daily thought and duty. It is therefore to this point that the teaching of the Prophets is mainly directed (1 Sam. xv. 22; Is. i. 10-20; Jer. vii. 22, 23; Ez. xx. 39-44; Hos. vi. 6; Am. v. 21-27; Mic. vi. 6-8). The same truth, here enunciated from without, is recognised from within by the Psalmist (Ps. xl. 8-11, l. 13, 14, li. 16, 17, cxli. 2). It is not to be argued from these passages that the idea of self-dedication is the main one of sacrifice. The idea of propitiation lies below it, taken for granted by the Prophets as by the whole people, but still enveloped in mystery until the Antitype should come to make all clear. For the evolution of this doctrine we must look to the N. T. Without entering directly on the great subject of the Atonement (which would be foreign to the scope of this article), it will be sufficient to refer to the connexion, established in the N. T., between it and the sacrifices of the Mosaic system. To do this, we need do little more than analyse the Epistle to the Hebrews, which contains the key of the whole sacri-

ficial doctrine. In the first place, it follows the prophetic books by stating, in the most emphatic terms, the intrinsic nullity of all mere material sacrifices. The very fact of their constant repetition is said to prove this imperfection; but it does not lead us to infer that they actually had no spiritual efficacy, if offered in repentance and faith. On the contrary, the object of the whole Epistle is to show their typical and probationary character, and to assert that in virtue of it alone they had a spiritual meaning. Our Lord is declared (see 1 Pet. i. 20) "to have been foreordained" as a sacrifice "before the foundation of the world;" or (as it is more strikingly expressed in Rev. xiii. 8) "slain from the foundation of the world." The material sacrifices represented this Great Atonement, as already made and accepted in God's foreknowledge; and to those who grasped the ideas of sin, pardon, and self-dedication, symbolized in them, they were means of entering into the blessings which the One True Sacrifice alone procured. They could convey nothing in themselves; yet, as types, they might, if accepted by a true, though necessarily imperfect, faith, be means of conveying in some degree the blessings of the Antitype. This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's Person of the priest, the offerer, and the sacrifice. It is clear that the Atonement, in this Epistle, as in the N. T. generally, is viewed in a twofold light. On the one hand, it is set forth distinctly as a vicarious sacrifice, which was rendered necessary by the sin of man, and in which the Lord "bare the sins of many." It is its essential characteristic that in it He stands absolutely alone, offering His sacrifice without any reference to the faith or the conversion of men. In it He stands out alone as the Mediator between God and man; and His sacrifice is offered once for all, never to be imitated or repeated. Now this view of the Atonement is set forth in the Epistle to the Hebrews, as typified by the sin-offering. All the expiatory and propitiatory sacrifices of the Law are now for the first time brought into full light. As the sin-offering, though not the earliest, is the most fundamental of all sacrifices, so the aspect of the Atonement, which it symbolizes, is the one on which all others rest. On the other hand, the sacrifice of Christ is set forth to us, as the completion of that perfect obedience to the will of the Father, which is the natural duty of sinless man, in which He is the representative of all men, and in which He calls upon us, when reconciled to God, to "take up the Cross and follow Him." In this view His death is not the principal object; we dwell rather on His lowly Incarnation, and His life of humility, temptation, and suffering, to which that death was but a fitting close. The main idea of this view of the Atonement is representative rather than vicarious. It is typified by the burnt-offering, in respect of which the N. T. merely quotes and enforces the language already cited from the O. T., and especially (see Heb. x. 6-9) the words of Ps. xl. 6, &c., which contrast with material sacrifice the "doing the will of God." As without the sin-offering of the Cross, this, our burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing. With these views of our Lord's sacrifice on earth, as typified in the Levitical sacrifices on the outer altar, is also to be connected the offering of His Intercession for us in heaven, which was represented

by the incense. The typical sense of the meat-offering, or peace-offering, is less connected with the sacrifice of Christ Himself, than with those sacrifices of praise, thanksgiving, charity, and devotion, which we, as Christians, offer to God, and "with which He is well pleased" (Heb. xiii. 15, 16) as with "an odour of sweet smell, a sacrifice acceptable to God" (Phil. iv. 18).

Sadamias. SHALLUM, one of the ancestors of Ezra (2 Esd. i. 1).

Sadas. AZGAD (1 Esd. v. 13; comp. Ezr. ii. 12).

Saddes. INDO 6 (1 Esd. viii. 45). In 1 Esd. viii. 46, the name is written "Dakdeus" in the A. V., as in the Geneva Version of both passages.

Sadduc. ZADOK the high-priest (1 Esd. viii. 2).

Sadducees (Matt. iii. 7, xvi. 1, 6, 11, 12, xxii. 23, 34; Mark xii. 18; Luke xx. 27; Acts iv. 1, v. 17, xxiii. 6, 7, 8), a religious party or school among the Jews at the time of Christ, who denied that the oral law was a revelation of God to the Israelites, and who deemed the written law alone to be obligatory on the nation, as of divine authority.—*Origin of the name.*—The Hebrew word by which they are called in the Mishna is *Tsaddukim*, the plural of *Tsaddik*, which undoubtedly means "just," or "righteous;" but which is never used in the Bible except as a proper name. The most obvious translation of the word, therefore, is to call them Zadoks or Zadokites. The ordinary Jewish statement is that they are named from a certain Zadok, a disciple of the Antigonos of Socho, who is mentioned in the Mishna as having received the oral law from Simon the Just, the last of the men of the Great Synagogue. Another ancient suggestion concerning the origin of the name "Sadducees," is in Epiphanius, who states that the Sadducees called themselves by that name from "righteousness," the interpretation of the Hebrew word *Zedek*; "and that there was likewise anciently a Zadok among the priests, but that they did not continue in the doctrines of their chief." This explanation of the origin of the word Sadducees must be rejected with that given by the Jews. In these circumstances, if recourse is had to conjecture, the first point to be considered is whether the word is likely to have arisen from the meaning of "righteousness," or from the name of an individual. This must be decided in favour of the latter alternative, inasmuch as the word Zadok never occurs in the Bible, except as a proper name; and then we are led to inquire as to who the Zadok of the Sadducees is likely to have been. Now, according to the existing records of Jewish history, there was one Zadok of transcendent importance, and only one; viz. the priest who acted such a prominent part at the time of David, and who declared in favour of Solomon, when Abiathar took the part of Adonijah as successor to the throne (1 K. i. 32-45). His line of priests appears to have had decided pre-eminence in subsequent history. Now, as the transition from the expression "sons of Zadok," and "priests of the seed of Zadok," to Zadokites, is easy and obvious, and as in the Acts of the Apostles, v. 17, it is said, "Then the high-priest rose, and all they that were with him, which is the sect of the Sadducees, and were filled with indignation," it has been conjectured by Geiger that the Sadducees or Zadokites were originally identical with the sons of Zadok, and constituted what may be termed a kind of sacerdotal aristocracy. To these were afterwards

attached all who for any reason reckoned themselves as belonging to the aristocracy; such, for example, as the families of the high-priest, who had obtained consideration under the dynasty of Herod. These were for the most part judges, and individuals of the official and governing class.—I. The leading tenet of the Sadducees was the negation of the leading tenet of their opponents. As the Pharisees asserted, so the Sadducees denied, that the Israelites were in possession of an Oral Law transmitted to them by Moses. For an equitable estimate of the Sadducees, it is proper to bear in mind emphatically how destitute of historical evidence the doctrine was which they denied. *That doctrine is at the present day rejected, probably by almost all, if not by all, Christians; and it is indeed so foreign to their ideas, that the greater number of Christians have never even heard of it, though it is older than Christianity, and has been the support and consolation of the Jews under a series of the most cruel and wicked persecutions to which any nation has ever been exposed during an equal number of centuries. It is likewise now maintained, all over the world, by those who are called the orthodox Jews. It must not be assumed that the Sadducees, because they rejected a Mosaic Oral Law, rejected likewise all traditions and all decisions in explanation of passages in the Pentateuch. Although they protested against the assertion that such points had been divinely settled by Moses, they probably, in numerous instances, followed practically the same traditions as the Pharisees. This will explain why in the Mishna specific points of difference between the Pharisees and Sadducees are mentioned, which are so unimportant.—II. The second distinguishing doctrine of the Sadducees, the denial of man's resurrection after death, followed in their conceptions as a logical conclusion from their denial that Moses had revealed to the Israelites the Oral Law. For on a point so momentous as a second life beyond the grave, no religious party among the Jews would have deemed themselves bound to accept any doctrine as an article of faith, unless it had been proclaimed by Moses, their great legislator; and it is certain that in the written Law of the Pentateuch there is a total absence of any assertion by Moses of the resurrection of the dead. This fact is presented to Christians in a striking manner by the well-known words of the Pentateuch which are quoted by Christ in argument with the Sadducees on this subject (Ex. iii. 6, 16; Mark xii. 26, 27; Matt. xxii. 31, 32; Luke xx. 37). It cannot be doubted that in such a case Christ would quote to his powerful adversaries the most cogent text in the Law; and yet the text actually quoted does not do more than suggest an *inference* on this great doctrine. It is true that in other parts of the O. T. there are individual passages which express a belief in a resurrection, such as in Is. xxvi. 19, Dan. xii. 2, Job xix. 26, and in some of the Psalms; and it may at first sight be a subject of surprise that the Sadducees were not convinced by the authority of those passages. But although the Sadducees regarded the books which contained these passages as sacred, it is more than doubtful whether any of the Jews regarded them as sacred in precisely the same sense as the written Law. To the Jews Moses was and is a colossal Form, pre-eminent in authority above all subsequent prophets. Hence scarcely any Jew would have deemed himself bound to believe in man's resurrection, unless the doctrine

had been proclaimed by Moses; and as the Sadducees disbelieved the transmission of any Oral Law by Moses, the striking absence of that doctrine from the written Law freed them from the necessity of accepting the doctrine as divine. In connexion with the disbelief of a resurrection by the Sadducees, it is proper to notice the statement (Acts xxiii. 8) that they likewise denied there was "angel or spirit." A perplexity arises as to the precise sense in which this denial is to be understood. The two principal explanations which have been suggested are, either that the Sadducees regarded the angels of the Old Testament as transitory unsubstantial representations of Jehovah, or that they disbelieved, not the angels of the Old Testament, but merely the angelical system which had become developed in the popular belief of the Jews after their return from the Babylonian Captivity. Perhaps, however, another suggestion is admissible. It appears from Acts xxiii. 9, that some of the scribes on the side of the Pharisees suggested the possibility of a spirit or an angel having spoken to St. Paul, on the very occasion when it is asserted that the Sadducees denied the existence of angel or spirit. Now the Sadducees may have disbelieved in the occurrence of any such phenomena in their own time, although they accepted all the statements respecting angels in the Old Testament; and thus the key to the assertion in the 8th verse that the Sadducees denied "angel or spirit" would be found exclusively in the 9th verse.—III. The opinions of the Sadducees respecting the freedom of the will, and the way in which those opinions are treated by Josephus, have been noticed elsewhere [PHARISEES]; and an explanation has been there suggested of the prominence given to a difference in this respect between the Sadducees and the Pharisees. It may be here added that possibly the great stress laid by the Sadducees on the freedom of the will may have had some connexion with their forming such a large portion of that class from which criminal judges were selected. The sentiment of the lines—

"Our acts our Angels are, or good or ill,
Our fatal shadows that walk by us still,"

would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis: and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a correct exponent of Sadducean thought.—IV. Some of the early Christian writers, such as Epiphanius, Origen, and Jerome, attribute to the Sadducees the rejection of all the Sacred Scriptures except the Pentateuch. The statement of these Christian writers is, however, now generally admitted to have been founded on a misconception of the truth, and probably to have arisen from a confusion of the Sadducees with the Samaritans. Josephus is wholly silent as to an antagonism on this point between the Sadducees and the Pharisees. What probably had more influence than anything else in occasioning this misconception respecting the Sadducees, was the circumstance that in arguing with them on the doctrine of a future life, Christ quoted from the Pentateuch only, although there are stronger texts in favour of the doctrine in some other books of the Old Testament.—V. In conclusion, it may be proper to notice a fact which, while it accounts for misconceptions of early Christian writers respecting the Sadducees, is on other grounds well worthy to arrest the attention. This fact is the rapid disappearance of the Sadducees

from history after the first century, and the subsequent predominance among the Jews of the opinions of the Pharisees. Two circumstances indirectly, but powerfully, contributed to produce this result: 1st, The state of the Jews after the capture of Jerusalem by Titus; and 2ndly, The growth of the Christian religion. As to the first point it is difficult to over-estimate the consternation and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state; and the doctrine of the Sadducees that there was nothing beyond the present life, would have appeared to them cold, heartless, and hateful. Again, while they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition, of which one of their own nation was the object, and another the unrivalled missionary to the heathen, was gradually making its way among the subjects of their detested conquerors, the Romans. One of the causes of its success was undoubtedly the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind. Consciously, therefore, or unconsciously, many circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy, to rally round the standard of the Oral Law, and to assert that their holy legislator, Moses, had transmitted to his faithful people by word of mouth, although not in writing, the revelation of a future state of rewards and punishments. This doctrine, the pledge of eternal life to them, as the resurrection of Jesus to Christians, is still maintained by the majority of our Jewish contemporaries; and it will probably continue to be the creed of millions long after the present generation of mankind has passed away from the earth.

Sa'doc. 1. **ṢADOK** the ancestor of Ezra (2 Esd. i. 1; comp. Ezr. vii. 2).—2. A descendant of Zerubbabel in the genealogy of Jesus Christ (Matt. i. 14).

Saffron (Heb. *carcôm*). There is not the slightest doubt that "saffron" is the correct rendering of the Hebrew word (Cant. iv. 14); the Arabic *Kurkum* is similar to the Hebrew, and denotes the *Crocus sativus*, or "saffron crocus." Saffron has from the earliest times been in high esteem as a perfume: "it was used," says Rosenmüller, "for the same purposes as the modern pot-pourri." Kitto says that the Safflower (*Carthamus tinctorius*), is cultivated in Syria for the sake of the flowers which are used in dyeing, but the *Karkôm* no doubt denotes the *Crocus sativus*. The word saffron is derived from the Arabic *Zafran*, "yellow."

Sa'la. **SALAH**, or **SHELAH**, the father of Eber (Luke iii. 35).

Sal'ah. The son of Arphaxad and father of Eber (Gen. x. 24, xi. 12-14; Luke iii. 35). The name is significant of *extension*. It thus seems to imply the historical fact of the gradual extension of a branch of the Shemitic race from its original seat in Northern Assyria towards the river Euphrates.

Sal'amis, a city at the east end of the island of Cyprus, and the first place visited by Paul and Barnabas, on the first missionary journey, after leaving the mainland at Seleucia. Here alone, among all the Greek cities visited by St. Paul, we read expressly of "synagogues" in the plural (Acts xiii. 5). Hence we conclude that there were

many Jews in Cyprus. And this is in harmony with what we read elsewhere. Jewish residents in the island are mentioned during the period when the Seleucidae reigned at Antioch (1 Macc. xv. 23). At a later period, in the reigns of Trajan and Hadrian, we are informed of dreadful tumults here, caused by a vast multitude of Jews. Salamis was not far from the modern *Famagousta*. It was situated near a river called the Pedieus, on low ground, which is in fact a continuation of the plain running up into the interior towards the place where *Nicosia*, the present capital of Cyprus, stands.

Salasada'i. **ZURISHADDAI** in Jud. viii. 1.

Salathiel, son of Jechonias king of Judah, and father of Zerobabel, according to Matt. i. 12; but son of Neri, and father of Zerobabel, according to Luke iii. 27; while the genealogy in 1 Chr. iii. 17-19, leaves it doubtful whether he is the son of Assir or Jechonias, and makes Zerubbabel his nephew. Upon the incontrovertible principle that no genealogy would assign to the true son and heir of a king any inferior and private parentage, whereas, on the contrary, the son of a private person would naturally be placed in the royal pedigree on his becoming the rightful heir to the throne; we may assert, with the utmost confidence, that St. Luke gives us the true state of the case, when he informs us that Salathiel was the son of Neri, and a descendant of Nathan the son of David. And from his insertion in the royal pedigree, both in 1 Chr. and St. Matthew's gospel, after the childless Jechonias, we infer, with no less confidence, that, on the failure of Solomon's line, he was the next heir to the throne of David. It may therefore be considered as certain, that Salathiel was the son of Neri, and the heir of Jechoniah. As regards the orthography of the name, it has, as noted above, two forms in Hebrew. The A. V. has Salathiel in 1 Chr. iii. 17, but everywhere else in the O. T. **SHEALTHIEL**.

Sal'cah. A city named in the early records of Israel as the extreme limit of Bashan (Deut. iii. 10; Josh. xiii. 11) and of the tribe of Gad (1 Chr. v. 11). On another occasion the name seems to denote a district rather than a town (Josh. xii. 5). It is doubtless identical with the town of *Sülkhad*, which stands at the southern extremity of the Jebel Hauran, twenty miles S. of *Kunawat* (the ancient Kenath), which was the southern outpost of the *Leja*, the Argob of the Bible. Immediately below *Sülkhad* commences the plain of the great Euphrates desert. The town is of considerable size, two to three miles in circumference, surrounding a castle on a lofty isolated hill.

Sal'chah. Another form of **SALCAH** (Deut. iii. 10).

Sal'em. 1. The place of which Melchizedek was king (Gen. xiv. 18; Heb. vii. 1, 2). No satisfactory identification of it is perhaps possible. The indications of the narrative are not sufficient to give any clue to its position. It is not even safe to infer, as some have done, that it lay between Damascus and Sodom. Dr. Wolff—no mean authority on Oriental questions—in a striking passage in his last work, implies that Salem was—what the author of the Epistle to the Hebrews understood it to be—a title, not the name of a place. To revert, however, to the topographical question; two main opinions have been current from the earliest ages of interpretation. 1. That of the Jewish commentators, who with one voice affirm that Salem is

Jerusalem, on the ground that Jerusalem is so called in Ps. lxxvi. 2. 2. Jerome himself, however, is not of the same opinion. He states without hesitation, that the Salem of Melchizedek was not Jerusalem, but a town near Scythopolis, which in his day was still called Salem. Elsewhere he places it more precisely at eight Roman miles from Scythopolis, and gives it then name as Salumias. Further, he identifies this Salem with the Salim of St. John the Baptist. 3. Professor Ewald pronounces that Salem is a town on the further side of Jordan, on the road from Damascus to Sodom, quoting at the same time John iii. 23. 4. A tradition given by Eupolemus differs in some important points from the Biblical account. According to this the meeting took place in the sanctuary of the city Argarizin, which is interpreted by Eupolemus to mean "the Mountain of the Most High." Argarizin is of course *har Gerizzim*. 5. A Salem is mentioned in Judith iv. 4, among the places which were seized and fortified by the Jews on the approach of Holofernes. If Ἀλλών is here, according to frequent usage, the Jordan valley, then the Salem referred to must surely be that mentioned by Jerome. Or, as is perhaps still more likely, it refers to another *Salim* near *Zerin* (Jezreel).—2. Ps. lxxvi. 2. It seems to be agreed on all hands that Salem is here employed for Jerusalem, but whether as a mere abbreviation to suit some exigency of the poetry, and point the allusion to the peace (*salem*) which the city enjoyed through the protection of God, or whether, after a well-known habit of poets, it is an antique name preferred to the more modern and familiar one, is a question not yet decided.

Salim. A place named (John iii. 23) to denote the situation of Aenon, the scene of St. John's last baptisms—Salim being the well-known town or spot, and Aenon a place of fountains, or other water, near it. Eusebius and Jerome, both affirm unhesitatingly that it existed in their day near the Jordan, eight Roman miles south of Scythopolis. Jerome adds (under "Salim") that its name was then Salumias. Various attempts have been more recently made to determine the locality of this interesting spot. 1. Some propose SHILIM and AIN, in the arid country far in the south of Judaea, entirely out of the circle of associations of St. John or our Lord. Others identify it with the SHALIM of 1 Sam. ix. 4, but this latter place is itself unknown. 2. Dr. Robinson suggests the modern village of *Salin*, three miles E. of *Nablis*, but this is no less out of the circle of St. John's ministrations, and is too near the Samaritans. A writer in the *Colonial Ch. Chron.*, No. cxxvi. 464, who concurs in this opinion of Dr. Robinson, was told of a village an hour east (?) of *Salim* "named *Ain-ai*, with a copious stream of water." 3. Dr. Barclay is filled with an "assured conviction" that Salim is to be found in *Wady Selein*, and Aenon in the copious springs of *Ain Farah*, among the deep and intricate ravines some five miles N.E. of Jerusalem. 4. The name of *Salim* has been lately discovered by Mr. Van de Velde in a position exactly in accordance with the notice of Eusebius, viz. six English miles south of *Beisan*, and two miles west of the Jordan. *Salim* fulfils also the conditions implied in the name of Aenon (springs), and the direct statement of the text, that the place contained abundance of water.

Salla'i. 1. A Benjamite, who settled in Jerusalem after the Captivity (Neh. xi. 8).—2. The head

of one of the courses of priests who went up from Babylon with Zerubbabel (Neh. xii. 20).

Sal'tu. 1. The son of Meshullam, a Benjamite (1 Chr. ix. 7; Neh. xi. 7).—2. SALLAI 2 (Neh. xii. 7).

Sal'mus. SHALLUM (1 Esd. ix. 25).

Sal'ma, or **Sal'mon** (Ruth iv. 20, 21; 1 Chr. ii. 11, 51, 54; Matt. i. 4, 5; Luke iii. 32). Son of Nahshon, the prince of the children of Judah, and father of Boaz, the husband of Ruth. On the entrance of the Israelites into Canaan, Salmon took Rahab of Jericho to be his wife, and from this union sprang the Christ. Two circumstances connected with Salmon have caused some perplexity. One is the variation in the orthography of his name, but the variation in proper names is so extremely common, that such slight differences are scarcely worth noticing. The other is the variation in his genealogy, which is more apparent than real. It arises from the circumstance that Bethlehem Ephratah, which was Salmon's inheritance, was part of the territory of Caleb, the grandson of Ephratah; and this caused him to be reckoned among the sons of Caleb.

Salmana'sar. SHALMANEZER (2 Esd. xiii. 40).

Sal'mon. The name of a hill near Shechem, on which Abimelech and his followers cut down the boughs with which they set the tower of Shechem on fire (Judg. ix. 48). Its exact position is not known. It is usually supposed that this hill is mentioned in a verse of perhaps the most difficult of all the Psalms (Ps. lxxvi. 14); and this is probable, though the passage is peculiarly difficult, and the precise allusion intended by the poet seems hopelessly lost. This is not the place for an exhaustive examination of the passage. It may be mentioned, however, that the literal translation of the words is, "Thou makest it snow," or "It snows," with liberty to use the word either in the past or in the future tense. As notwithstanding ingenious attempts, this supplies no satisfactory meaning, recourse is had to a translation of doubtful validity, "Thou makest it white as snow," or "It is white as snow"—words to which various metaphorical meanings have been attributed. The allusion which is most generally received, is that the words refer to the ground being snow-white with bones after a defeat of the Canaanite kings; and this may be accepted by those who will admit the scarcely permissible meaning, "white as snow," and who cannot rest satisfied without attaching some definite signification to the passage. In despair of understanding the allusion to Salmon, some suppose that Salmôn, i. e. *Tsalmôn*, is not a proper name in this passage, but merely signifies "darkness." Unless the passage is given up as corrupt, it seems more in accordance with reason to admit that there was some allusion present to the poet's mind, the key to which is now lost.

Sal'mon the father of Boaz (Ruth iv. 20, 21; Matt. i. 4, 5; Luke iii. 32). [SALMA.]

Salmo'ne. The east point of the island of CRETE (Acts xvii. 7).

Sal'mon. The Greek form 1. of Shallum, the father of Hilkiah (Bar. i. 7). [SHALLUM].—2. Of Saln the father of Zimri (1 Macc. ii. 26). [SALU.]

Salome. 1. The wife of Zebedee, as appears from comparing Matt. xxvii. 56 with Mark xv. 40. It is further the opinion of many modern critics that she was the sister of Mary, the mother of Jesus, to whom reference is made in John xix. 25. The words admit, however, of another and hitherto

generally received explanation, according to which they refer to the "Mary the wife of Cleophas" immediately afterwards mentioned. We can hardly regard the point as settled, though the weight of modern criticism is decidedly in favour of the former view. The only events recorded of Salome are that she preferred a request on behalf of her two sons for seats of honour in the kingdom of heaven (Matt. xx. 20), that she attended at the crucifixion of Jesus (Mark xv. 40), and that she visited his sepulchre (Mark xvi. 1). She is mentioned by name only on the two later occasions.—2. The daughter of Herodias by her first husband, Herod Philip (Matt. xiv. 6). She married in the first place Philip the tetrarch of Trachonitis, her paternal uncle, and secondly Aristobulus, the king of Chalcis.

Salt. Indispensable as salt is to ourselves, it was even more so to the Hebrews, being to them not only an appetizing condiment in the food both of man (Job vi. 6) and beast (Is. xxx. 24, see margin), and a most valuable antidote to the effects of the heat of the climate on animal food, but also entering largely into their religious services as an accompaniment to the various offerings presented on the altar (Lev. ii. 13). They possessed an inexhaustible and ready supply of it on the southern shores of the Dead Sea. [SEA, THE SALT.] Salt might also be procured from the Meliteranean Sea, and from this source the Phoenicians would naturally obtain the supply necessary for salting fish (Neh. xiii. 16) and for other purposes. The Jews appear to have distinguished between rock-salt and that which was gained by evaporation, as the Talmudists particularize one species (probably the latter) as the "salt of Sodom." The salt-pits formed an important source of revenue to the rulers of the country, and Antiochus conferred a valuable boon on Jerusalem by presenting the city with 375 bushels of salt for the Temple service. In addition to the uses of salt already specified, the inferior sorts were applied as a manure to the soil, or to hasten the decomposition of dung (Matt. v. 13; Luke xiv. 35). Too large an admixture, however, was held to produce sterility; and hence also arose the custom of sowing with salt the foundations of a destroyed city (Judg. ix. 45), as a token of its irretrievable ruin. The associations connected with salt in Eastern countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an antiseptic, durability, fidelity, and purity. Hence the expression, "covenant of salt" (Lev. ii. 13; Num. xviii. 19; 2 Chr. xiii. 5), as betokening an indissoluble alliance between friends; and again the expression, "salted with the salt of the palace" (Ezr. iv. 14), not necessarily meaning that they had "maintenance from the palace," as the A. V. has it, but that they were bound by sacred obligations of fidelity to the king. So in the present day, "to eat bread and salt together" is an expression for a league of mutual amity. It was probably with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God.

Salt, City of. The fifth of the six cities of Judah which lay in the "wilderness" (Josh. xv. 62). Dr. Robinson expresses his belief that it lay somewhere near the plain at the south end of the Salt Sea. On the other hand, Mr. Van de Velde mentions a *Nahr Muleh* which he passed in his

route from *Wady el-Rmail* to *Sebbeh*. It is one of four ravines which unite to form the *Wady el-Bedun*.

Salt, Valley of. A certain valley, or perhaps more accurately a "ravine," in which occurred two memorable victories of the Israelite arms. 1. That of David over the Edomites (2 Sam. viii. 13; 1 Chr. xviii. 12). 2. That of Amaziah (2 K. xiv. 7; 2 Chr. xxv. 11). Neither of these notices affords any clue to the situation of the Valley of Salt, nor does the cursory mention of the name ("Gemela" and "Mela") in the *Onomasticon*. By Josephus it is not named on either occasion. Seetzen was probably the first to suggest that it was the broad open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the south. The same view is taken (more decisively) by Dr. Robinson. It may be well to call attention to some considerations which seem to stand in the way of the implicit reception which most writers have given it since the publication of Dr. R.'s *Researches*. (a.) The word *Ge*, employed for the place in question, is not, to the writer's knowledge, elsewhere applied to a broad valley or sunk plain of the nature of the lower *Ghór*. (b.) *A priori*, one would expect the tract in question to be called in Scripture by the peculiar name uniformly applied to the more northern parts of the same valley—*ha-Arabbáh*. (c.) The name "Salt," though at first sight conclusive, becomes less so on reflection. It does not follow, because the Hebrew word *melach* signifies salt, that therefore the valley was salt. Just as *el-Milh* is the Arabic representative of the Hebrew *Moladai*, so possibly was *gemelach* the Hebrew representative of some archaic Edomite name. (d.) What title can be inferred from the narrative as to the situation of the *Gemelach* is in favour of its being nearer to Petia.

Sa'lu. The father of Zimmi the prince of the Simeonites, who was slain by Phinehas (Num. xxv. 14). Called also SALOM.

Sa'lum. 1. SHALLUM 8 (1 Esd. v. 28).—2. SHALLUM 6 (1 Esd. viii. 1).

Salutation. Salutations may be classed under the two heads of conversational and epistolary. The salutation at meeting consisted in early times of various expressions of blessing, such as "God be gracious unto thee" (Gen. xliii. 29); "Blessed be thou of the Lord" (Ruth iii. 10; 1 Sam. xv. 13); "The Lord be with you," "The Lord bless thee" (Ruth ii. 4); "The blessing of the Lord be upon you; we bless you in the name of the Lord" (Ps. cxix. 8). Hence the term "bless" received the secondary sense of "salute." The Hebrew term used in these instances (*shálóm*) has no special reference to "peace," as stated in the marginal translation, but to general well-being, and strictly answers to our "welfare." The salutation at parting consisted originally of a simple blessing (Gen. xxiv. 60, xxviii. 1, xlvii. 10; Josh. xxii. 6), but in later times the term *shálóm* was introduced here also in the form "Go in peace," or rather "Farewell" (1 Sam. i. 17, xx. 42; 2 Sam. xv. 9). In modern times the ordinary mode of address current in the East resembles the Hebrew:—*Es-salám aleykun*, "Peace be on you," and the term "*salám*" has been introduced into our own language to describe the Oriental salutation. The epistolary salutations in the period subsequent to the O. T. were framed on the model of the Latin style: the ad-

tion of the term "peace" may, however, be regarded as a vestige of the old Hebrew form (2 Macc. i. 1). The writer placed his own name first, and then that of the person whom he saluted; it was only in special cases that this order was reversed (2 Macc. i. 1, ix. 19; 1 Esdr. vi. 7). A combination of the first and third persons in the terms of the salutation was not unfrequent (Gal. i. 1, 2; Philem. 1; 2 Pet. i. 1). A form of prayer for spiritual mercies was also used. The concluding salutation consisted occasionally of a translation of the Latin *valete* (Acts xv. 29, xxiii. 30), but more generally of the term ἁνδράσιν, "I salute," or the cognate substantive, accompanied by a prayer for peace or grace.

Sam'ael, a variation for (margin) Salamiel [SHELUMIEL] in Jud. viii. 1.

Samai'as. 1. SHEMAIAH 23 (1 Esd. i. 9).—2. SHEMAIAH (1 Esd. viii. 39).—3. The "great Samai'as," father of Ananias and Jonathan (Tob. v. 13).

Samaria (Heb. *Shomerôn*), a city of Palestine. The word *Shomerôn* means, etymologically, "pertaining to a watch," or "a watch-mountain;" and we should almost be inclined to think that the peculiarity of the situation of Samaria gave occasion to its name. In the territory originally belonging to the tribe of Joseph, about six miles to the north-west of Shechem, there is a wide basin-shaped valley, encircled with high hills, almost on the edge of the great plain which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a less elevated oblong hill, with steep yet accessible sides, and a long flat top. This hill was chosen by Omri, as the site of the capital of the kingdom of Israel. He "bought the hill of Samaria of Shemer for two talents of silver, and built on the hill, and called the name of the city which he built, after the name of the owner, of the hill, Samaria" (1 K. xvi. 23, 24). From the date of Omri's purchase, B.C. 925, Samaria retained its dignity as the capital of the ten tribes. Ahab built a temple to Baal there (1 K. xvi. 32, 33); and from this circumstance a portion of the city, possibly fortified by a separate wall, was called "the city of the house of Baal" (2 K. x. 25). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in B.C. 901 (1 K. xx. 1), and in B.C. 892 (2 K. vi. 24-vii. 20); but on both occasions the siege was ineffectual. The possessor of Samaria was considered *de facto* king of Israel (2 K. xv. 3, 14); and woes denounced against the nation were directed against it by name (Is. vii. 9, &c.). In B.C. 721, Samaria was taken, after a siege of three years, by Shalmaneser king of Assyria (2 K. xviii. 9, 10), and the kingdom of the ten tribes was put an end to. Some years afterwards the district of which Samaria was the centre was reoccupied by Esarhaddon; but we do not hear especially of the city until the days of Alexander the Great. That conqueror took the city, which seems to have somewhat recovered itself, killed a large portion of the inhabitants, and suffered the remainder to settle at Shechem. He replaced them by a colony of Syro-Macedonians. These Syro-Macedonians occupied the city until the time of John Hyrcanus, who took it after a year's siege, and did his best to demolish it entirely. After this disaster (which occurred in A.C. 109), the Jews inhabited what remained of the city; at least we find it in their possession in

the time of Alexander Jannæus, and until Pompey gave it back to the descendants of its original inhabitants. By directions of Gabinius, Samaria and other demolished cities were rebuilt. But its most effectual rebuilding was undertaken by Herod the Great. He called it *Sebaste*, Σεβαστή = *Augusta*, after the name of his patron. How long Samaria maintained its splendour after Herod's improvements we are not informed. In the N. T. the city itself does not appear to be mentioned, but rather a portion of *the district* to which, even in older times, it had extended its name (Matt. x. 5; John iv. 4, 5). Henceforth its history is very unconnected. Septimius Severus planted a Roman colony there in the beginning of the third century. Sebaste fell into the hands of the Mohammedans during the siege of Jerusalem. At this day the city of Omri and of Herod is represented by a small village retaining few vestiges of the past except its name, *Sebástiyeh*, an Arabic corruption of Sebaste. Some architectural remains it has, partly of Christian construction or adaptation, as the ruined church of St. John the Baptist, partly, perhaps, traces of Idumean magnificence. St. Jerome, whose acquaintance with Palestine imparts a sort of probability to the tradition which prevailed so strongly in later days, asserts that Sebaste, which he invariably identifies with Samaria, was the place in which St. John the Baptist was imprisoned and suffered death. He also makes it the burial-place of the prophets Elisha and Obadiah.—2. The Samaria named in the present text of 1 Macc. v. 66 is evidently an error. The true correction is doubtless supplied by Josephus, who has Marissa (i. e. MARESHA).—3. SAMARIA, SAMARITANS. In the strictest sense of the term, a SAMARITAN would be an inhabitant of the *city* of Samaria. But it is not found at all in this sense, exclusively at any rate, in the O. T. In fact, it only occurs there once, and then in a wider signification, in 2 K. xvii. 29. There it is employed to designate those whom the king of Assyria had "placed in the *cities* of Samaria instead of the children of Israel." SAMARIA at first included all the tribes over which Jeroboam made himself king, whether east or west of the river Jordan (1 K. xiii. 32). In other places in the historical books of the O. T. (with the exception of 2 K. xvii. 24, 26, 28, 29) Samaria seems to denote the *city* exclusively. But the prophets use the word in a greatly extended sense. Hence the word Samaritan must have denoted every one subject to the king of the northern capital. But whatever extent the word might have acquired, it necessarily became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in B.C. 771 A. 740 respectively, "Pul king of Assyria, and Tiglath-pileser king of Assyria, carried away the Reubenites and the Gadites, and the half-tribe of Manasseh" (1 Chr. v. 26). This would be a second limitation. But the latter of these kings went further: "He took Ijon, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria" (2 K. xv. 29). This would be a third limitation. But we have yet to arrive at a fourth limitation of the kingdom of Samaria, and, by consequence, of the word Samaritan. It is evident from an occurrence in Heze-

Samaria, the ancient SAMARIA, from the E.N.E.

Behind the city are the mountains of Ephraim, verging on the Plain of Sharon. The Mediterranean Sea is in the furthest distance. The original sketch from which this view is taken was made by William Tipping, Esq., in 1842, and is engraved by his kind permission.

king's reign, that just before the deposition and death of Hoshea, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognised by portions of Asher, Issachar, and Zebulun, and even of Ephraim and Manasseh (2 Chr. xxx. 1-26). Men came from all those tribes to the Passover at Jerusalem. This was about B.C. 726. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northwards, and from the Mediterranean to the borders of Syria and Ammon eastwards. This brings us more closely to the second point of our discussion, the origin of those who are in 2 K. xvii. 29, and in the N. T., called Samaritans. Shalmaneser, as we have seen (2 K. xvii. 5, 6, 26), carried Israel, *i. e.* the remnant of the ten tribes which still acknowledged Hoshea's authority, into Assyria. This remnant consisted, as has been shown, of Samaria (the city) and a few adjacent cities and villages. Now, 1. Did he carry away all their inhabitants, or no? 2. Whether they were wholly or only partially desolated, who replaced the deported population? In reference to the former of these inquiries, it may be observed that the language of Scripture admits of scarcely a doubt. "Israel was carried away" (2 K. xvii. 6, 23), and other nations were placed "in the cities of Samaria *instead* of the children of Israel" (2 K. xvii. 24). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of "the poor of the land being left to be vine-dressers and husbandmen" (2 K. xxv. 12). We may then conclude that the cities of Samaria were not merely partially but wholly evacuated of their inhabitants in B.C. 721, and that they remained in this desolated state until, in the words of 2 K. xvii. 24, "the king of Assyria brought men from Babylon, and from Cuthah, and from Ava (Ivah, 2 K. xviii. 34), and from Hamath, and from Sepharvaim, and placed them in the cities

of Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof." Thus the new Samaritans—for such we must now call them—were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. An incidental question, however, arises. Who was the king of Assyria that effected this colonization? The Samaritans themselves, in Ezer. iv. 2, 10, attributed their colonization not to Shalmaneser, but to "Esar-haddon king of Assur," or to "the great and noble Assnapper," either the king himself or one of his generals (about B.C. 677). The fact too, that some of these foreigners came from Babylon would seem to direct us to Esar-haddon, rather than to his grandfather, Shalmaneser. And there is another reason why this date should be preferred. It coincides with the termination of the sixty-five years of Isaiah's prophecy, delivered B.C. 742, within which "Ephraim should be broken that it should not be a people" (Is. vii. 8). These strangers, whom we will now assume to have been placed in "the cities of Samaria" by Esarhaddon, were of course idolaters, and worshipped a strange medley of divinities. God's displeasure was kindled, and they were infested by beasts of prey, which had probably increased to a great extent before their entrance upon it. On their explaining their miserable condition to the king of Assyria, he despatched one of the captive priests to teach them "how they should fear the Lord." The priest came accordingly, and henceforth, in the language of the sacred historian, they "feared the Lord, and served their graven images, both their children and their children's children: as did their fathers, so do they unto this day" (2 K. xvii. 41). Such was the origin of the post-captivity or new Samaritans—men not of Jewish extraction, but from the further East. A gap occurs in their history until Judah has returned from captivity. They then desire to

be allowed to participate in the rebuilding of the Temple at Jerusalem. But they do not call it a *national* undertaking. They advance no pretensions to Jewish blood. They confess their Assyrian descent, and even put it forward ostentatiously, perhaps to enhance the merit of their partial conversion to God. Ezra, no doubt, from whose pen we have a record of the transaction, saw them through and through. On this the Samaritans throw off the mask, and become open enemies, frustrate the operations of the Jews through the reigns of two Persian kings, and are only effectually silenced in the reign of Darius Hystaspis, B.C. 519. The feud, thus unhappily begun, grew year by year more inveterate. Matters at length came to a climax. About B.C. 409, a certain Manasseh, a man of priestly lineage, on being expelled from Jerusalem by Nehemiah for an unlawful marriage, obtained permission from the Persian king of his day, Darius Nothus, to build a temple on Mount Gerizim, for the Samaritans, with whom he had found refuge. The animosity of the Samaritans became more intense than ever. They are said to have done everything in their power to annoy the Jews. Their own temple on Gerizim they considered to be much superior to that at Jerusalem. There they sacrificed a passover. Towards the mountain, even after the temple on it had fallen, wherever they were, they directed their worship. To their copy of the Law they arrogated an antiquity and authority greater than attached to any copy in the possession of the Jews. The Law (*i. e.* the five books of Moses) was their sole code; for they rejected every other book in the Jewish canon. The Jews, on the other hand, were not more conciliatory in their treatment of the Samaritans. The copy of the Law possessed by that people they declared to be the legacy of an apostate (Manasseh), and cast grave suspicions upon its genuineness. Certain other Jewish renegades had from time to time taken refuge with the Samaritans. Hence, by degrees, the Samaritans claimed to partake of Jewish blood, especially if doing so happened to suit their interest. A remarkable instance of this is exhibited in a request which they made to Alexander the Great, about B.C. 332. They desired to be excused payment of tribute in the Sabbatical year, on the plea that as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land in that year. Another instance of claim to Jewish descent appears in the words of the woman of Samaria to our Lord, John iv. 12, "Art thou greater than our father Jacob, who gave us the well?" Very far were the Jews from admitting this claim to consanguinity on the part of these people. They were ever reminding them that they were after all mere Cuthaeans, mere strangers from Assyria. The traditional hatred in which the Jew held the Samaritan is expressed in Ecclesiasticus i. 25, 26. And so long was it before such a temper could be banished from the Jewish mind, that we find even the Apostles believing that an inhospitable slight shown by a Samaritan village to Christ would be not unduly avenged by calling down fire from heaven. Such were the Samaritans of our Lord's day: a people distinct from the Jews, though lying in the very midst of the Jews; a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esarhaddon, and though they had abandoned their polytheism for a sort of ultra Mo-

saicism; a people, who—though their limits had gradually contracted, and the rallying-place of their religion on Mount Gerizim had been destroyed one hundred and sixty years before by John Hyrcanus (B.C. 130), and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-field of Syria and Egypt—still preserved their nationality, still worshipped from Shechem and their impoverished settlements towards their sacred hill; still retained their nationality, and could not coalesce with the Jews. Not indeed that we must suppose that the whole of the country called in our Lord's time Samaria, was in the possession of the Cuthaeans Samaritans, or that it had ever been so. It was bounded northward by the range of hills which commences at Mount Carmel on the west, and, after making a bend to the south-west, runs almost due east to the valley of the Jordan, forming the southern border of the plain of Esdraelon. It touched towards the south, as nearly as possible, the northern limits of Benjamin. Thus it comprehended the ancient territory of Ephraim, and of those Manassites who were west of Jordan. The Cuthaeans Samaritans, however, possessed only a few towns and villages of this large area, and these lay almost together in the centre of the district. At *Nâbus* the Samaritans have still a settlement, consisting of about 200 persons. The view maintained in the above remarks, as to the purely Assyrian origin of the New Samaritans, is that of Suicer, Reland, Hammond, Drusius in the *Critici Sacri*, Maldonatus, Hengstenberg, Hävernick, Robinson, and Abp. Trench. Others, as Winer, Döllinger, and Dr. Davidson, have held a different view, which may be expressed thus in Döllinger's own words: "In the northern part of the Promised Land (as opposed to Judaea proper) there grew up a mingled race which drew its origin from the remnant of the Israelites who were left behind in the country on the removal of the Ten Tribes, and also from the heathen colonists who were transplanted into the cities of Israel. Their religion was as hybrid as their extraction: they worshipped Jehovah, but, in addition to Him, also the heathen idols of Phœnician origin which they had brought from their native land" (*Heidenthum und Judenthum*, p. 739, §7).

Samaritan Pentateuch, a Recension of the commonly received Hebrew Text of the Mosaic Law, in use with the Samaritans, and written in the ancient Hebrew (*Ibri*), or so-called Samaritan character. This recension is found vaguely quoted by some of the early Fathers of the Church, under the name of "Παλαιότατον Ἑβραϊκὸν τὸ κατὰ Σαμαρείταις." Eusebius of Caesarea observes that the LXX. and the Sam. Pent. agree against the Received Text in the number of years from the Deluge to Abraham. Cyril of Alexandria speaks of certain words (Gen. iv. 8), wanting in the Hebrew, but found in the Samaritan. The Talmud, on the other hand, mentions the Sam. Pent. distinctly and contemptuously as a clumsily forged record. Down to within the last two hundred and fifty years, however, no copy of this divergent Code of Laws had reached Europe, and it began to be pronounced a fiction, and the plain words of the Church-Fathers—the better known authorities—who quoted it, were subjected to subtle interpretations. Suddenly, in 1816, Pietro della Valle, one of the first discoverers also of the Cuneiform inscriptions, acquired

a complete Codex from the Samaritans in Damascus. In 1823 it was presented by Achille Harley de Sancy to the library of the Oratory in Paris, and in 1828 there appeared a brief description of it by J. Morinus in his preface to the Roman text of the LXX. It was published in the Paris Polyglott, whence it was copied, with few emendations from other codices, by Walton. The number of MSS. in Europe gradually grew to sixteen. During the present century another, but very fragmentary copy, was acquired by the Gotha Library. A copy of the entire (?) Pentateuch, with Targum (? Sam. Version), in parallel columns, 4to., on parchment, was brought from *Nâblus* by Mr. Grove in 1861, for the Comte de Paris, in whose library it is. Respecting the external condition of these MSS., it may be observed that their sizes vary from 12mo. to folio, and that no scroll, such as the Jews and the Samaritans use in their synagogues, is to be found among them. Their material is vellum or cotton-paper; the ink used is black in all cases save the scroll used by the Samaritans at *Nâblus*, the letters of which are in gold. There are neither vowels, accents, nor diacritical points. The individual words are separated from each other by a dot. Greater or smaller divisions of the text are marked by two dots placed one above the other, and by an asterisk. A small line above a consonant indicates a peculiar meaning of the word, an unusual form, a passive, and the like: it is, in fact, a contrivance to bespeak attention. The whole Pentateuch is divided into nine hundred and sixty-four paragraphs, or *Kazzûs*, the termination of which is indicated by these figures, =, ., or <. To none of the MSS. which have as yet reached Europe, can be assigned a higher date than the 10th Christian century. The scroll used in *Nâblus* is said by the Samaritans to have been written by Abihua the son of Phinehas. Its true date is not known. The *Exercitationes* of Morinus, which placed the Samaritan Pentateuch far above the Received Text in point of genuineness, excited and kept up for nearly two hundred years one of the most extraordinary controversies on record. Characteristically enough, however, this was set at rest once for all by the very first systematic investigation of the point at issue. Ravius succeeded in finally disposing of this point of the superiority (*Exercitt. Phil. in Houbig. Prol. Lugd. Bat. 1755*). It was from his day forward allowed, almost on all hands, that the Masoretic text was the genuine one, but that in doubtful cases, when the Samaritan had an "unquestionably clearer" reading, this was to be adopted, since a certain amount of value, however limited, did attach to it. Here the matter rested until 1815, when Gesenius (*De Pent. Sam. Origine, Indole, et Auctoritate*) abolished the remnant of the authority of the Sam. Pent. We will now proceed to lay specimens of these once so highly prized variants before the reader, in order that he may judge for himself. We shall follow in this the commonly received arrangement of Gesenius, who divides all these readings into eight classes; to which, as we shall afterwards show, Frankel has suggested the addition of two or three others, while Kirchheim enumerates thirteen, which we will name hereafter. 1. The *first* class, then, consists of readings by which emendations of a grammatical nature have been attempted. (a.) The quiescent letters, or so-called *matres lectionis*, are supplied. (b.) The more poetical forms of the pronouns, probably less known to the Sam., are

altered into the more common ones. (c.) The same propensity for completing apparently incomplete forms is noticeable in the flexion of the verbs. (d.) On the other hand the paragogical letters *y* and *h* at the end of nouns, are almost universally struck out by the Sam. corrector; and, in the ignorance of the existence of nouns of a common gender, he has given them genders according to his fancy. (e.) The infin. absol. is, in the quaintest manner possible, reduced to the form of the finite verb. For obsolete or rare forms, the modern and more common ones have been substituted in a great number of places. 2. The *second* class of variants consists of glosses and interpretations received into the text. 3. The *third* class exhibits conjectural emendations of real or imaginary difficulties in the Masoretic text. 4. The *fourth* class exhibits readings in which apparent deficiencies have been corrected or supplied from parallel passages in the common text. 5. The *fifth* class is an extension of the one immediately preceding, and comprises larger phrases, additions, and repetitions from parallel passages. 6. To the *sixth* class belong those "emendations" of passages and words of the Hebrew text which contain something objectionable in the eyes of the Samaritans, on account either of historical improbability or apparent want of dignity in the terms applied to the Creator. Thus in the Sam. Pent. no one in the antediluvian times, begets his first son after he has lived 150 years: but one hundred years are, where necessary, subtracted before, and added after the birth of the first son. An exceedingly important and often discussed emendation of this class is the passage in Ex. xii. 40, which in our text reads, "Now the sojourning of the children of Israel who dwelt in Egypt was four hundred and thirty years." The Samaritan has "The sojourning of the children of Israel [and their fathers who dwell in the land of Canaan and in the land of Egypt] was four hundred and thirty years:" an interpolation of very late date indeed. Again, in Gen. ii. 2, "And God [?] had finished on the seventh day," is altered into "the sixth," lest God's rest on the Sabbath-day might seem incomplete. 7. The *seventh* class comprises what we might briefly call Samaritanisms, i. e. certain Hebrew forms, translated into the idiomatic Samaritan. 8. The *eighth* and last class contains alterations made in favour or on behalf of Samaritan theology, hermeneutics, and domestic worship. Thus the word *Elohim*, four times construed with the plural verb in the Hebrew Pentateuch, is in the Samaritan Pent. joined to the singular verb (Gen. xx. 13, xxvi. 53, xxv. 7; Ex. xxii. 9); and further, anthropomorphism as well as anthropopathism are carefully expunged—a practice very common in later times. The last and perhaps most momentous of all intentional alterations is the constant change of all the phrases, "God will choose a spot," into "He has chosen," viz. Geizim, and the well-known substitution of Geizim for Ebal in Deut. xxvii. 4 (A. V. 5). In Exodus as well as in Deuteronomy the Sam. has, immediately after the Ten Commandments, the following insertions from Deut. xxvii. 2-7 and xl. 30: "And it shall be on the day when ye shall pass over Jordan . . . ye shall set up these stones . . . on Mount Geizim . . . and there shalt thou build an altar . . . 'That mountain' on the other side Jordan by the way where the sun goeth down . . . in the champagne over against Gilgal, beside the plains of Moreh, 'over against Shechem':"—this last superfluous

addition, which is also found in Deut. xi. 30 of the Sam. Pent., being ridiculed in the Talmud. From the immense number of these worse than worthless variants Gesenius has singled out four, which he thinks preferable on the whole to those of the Masoretic Text. We will confine ourselves to mentioning them, and refer the reader to the recent commentaries upon them: he will find that they too have since been, all but unanimously, rejected. (1.) After the words, "And Cain spoke to his brother Abel" (Gen. iv. 8), the Sam. adds, "let us go into the field." (2.) In Gen. xxii. 13 the Sam. reads instead of "behind him a ram," "one ram." (3.) For (Gen. xlix. 14) "an ass of bone," i. e. a strong ass, the Sam. has "an ass of strangers." And (4.) for "he led forth his trained servants" (Gen. xiv. 14), the Sam. reads "he numbered." Important additions to this list have been made by Frankel, such as the Samaritans' preference of the imperat. for the 3rd pers.; ignorance of the use of the abl. absol.; Galileanisms,—to which also belongs the permutation of the letters *Ahevi* in the Samaritan Cod.; the occasional softening down of the *B* into *J*, of *J* into *J*, *Y* into *J*, &c., and chiefly the presence of words and phrases in the Sam. which are *not* interpolated from parallel passages, but are entirely wanting in our text. Frankel derives from these passages chiefly the conclusion that the Sam. Pent. was, partly at least, emended from the LXX., Onkelos, and other very late sources. We now subjoin, for the sake of completeness, the beforementioned thirteen classes of Kirchheim. 1. Additions and alterations in the Samaritan Pentateuch in favour of Gerizim. 2. Additions for the purpose of completion. 3. Commentary, glosses. 4. Change of verbs and moods. 5. Change of nouns. 6. Emendation of seeming irregularities by assimilating forms, &c. 7. Permutation of letters. 8. Pronouns. 9. Gender. 10. Letters added. 11. Addition of prepositions, conjunctions, articles, &c. 12. Junction of separated, and separation of joined words. 13. Chronological alterations. For our own part we cannot but think that as long as—(1) the history of the Samaritans remains involved in the obscurities of which a former article will have given an account; (2) we are restricted to a small number of comparatively recent Codices; (3) neither these Codices themselves have, as has just been observed, been thoroughly collated and recollated, nor (4) more than a feeble beginning has been made with anything like a collation between the various readings of the Sam. Pent. and the LXX.;—so long must we have a variety of the most divergent opinions, all based on "probabilities," which are designated on the other side as "false reasonings" and "individual crotchets," and which, moreover, not unfrequently start from flagrantly false premisses. We shall, under these circumstances, confine ourselves to a simple enumeration of the leading opinions, and the chief reasons and arguments alleged for and against them:—(1.) The Samaritan Pentateuch came into the hands of the Samaritans as an inheritance from the ten tribes whom they succeeded. Because (a.) It seems improbable that the Samaritans should have accepted their code at the hands of the Jews after the Exile since there existed an intense hatred between the two nationalities. (b.) The Samaritan Canon has only the Pentateuch in common with the Hebrew Canon: had that book been received at a period when the Hagiographa and the Prophets were in the Jews' hands, it would be surprising if they

had not also received those. (c.) The Sam. letters, avowedly the more ancient, are found in the Sam. Cod.; therefore it was written before the alteration of the character into the square Hebrew—which dates from the end of the Exile—took place. On the other side it is argued:—(a.) There existed no religious animosity whatsoever between Judah and Israel when they separated. The ten tribes could not therefore have bequeathed such an animosity to those who succeeded them. On the contrary, the contest between the slowly judaized Samaritans and the Jews, only dates from the moment when the latter refused to recognise the claims of the former, of belonging to the people of God, and rejected their aid in building the Temple. (b.) The jealousy with which the Samaritans regarded Jerusalem, and the intense hatred which they naturally conceived against the post-Mosaic writers of national Jewish history, would sufficiently account for their rejecting the other books, in all of which, save Joshua, Judges, and Job, either Jerusalem, as the centre of worship, or David and his House, are extolled. (c.) The present Hebrew character was not introduced by Ezra after the return from the Exile, but came into use at a much later period. The Samaritans might therefore have received the Pentateuch at the hands of the returned exiles, who, according to the Talmud, afterwards changed their writing, and in the Pentateuch only, so as to distinguish it from the Samaritan. (2.) The second leading opinion on the age and origin of the Sam. Pent. is that it was introduced by Manasseh at the time of the foundation of the Samaritan Sanctuary on Mount Gerizim. In support of this opinion are alleged, the idolatry of the Samaritans before they received a Jewish priest through Esarhaddon (2 K. xvii. 24-33), and the immense number of readings common to the LXX. and this Code, against the Masoretic Text. (3.) Other, but very isolated notions, are those of Morin, Le Clerc, Poncet, &c., that the Israelitish priest sent by the king of Assyria to instruct the new inhabitants in the religion of the country brought the Pentateuch with him. Further, that the Samaritan Pentateuch was the production of an impostor, Dositheus, who lived during the time of the Apostles, and who falsified the sacred records, in order to prove that he was the Messiah (Ussher). Against which there is only this to be observed, that there is not the slightest alteration of such a nature to be found. Finally, that it is a very late and faulty recension, made after the Masoretic Text (sixth Century after Christ), into which glosses from the LXX. had been received (Frankel). The chief opinions with respect to the agreement of the numerous and as yet uninvestigated readings of the LXX. and the Sam. Pent. are:—

1. That the LXX. have translated from the Sam.
2. That mutual interpolations have taken place.
3. That both Versions were formed from Hebrew Codices, which differed among themselves as well as from the one which afterwards obtained public authority in Palestine; that however very many wilful corruptions and interpolations have crept in in later times.
4. That the Samar. has in the main been altered from the LXX. It must, on the other hand, be stated also, that the Sam. and LXX. quite as often disagree with each other, and follow each the Masor. Text. Also, that the quotations in the N. T. from the LXX., where they coincide with the Sam. against the Hebr. Text, are so small in number and of so unimportant a nature that they

cannot be adduced as any argument whatsoever.—II. VERSIONS.—1. *Samaritan*.—According to the Samaritans themselves, their high-priest Nathaniel, who died about 20 B.C., is its author. Gesenius puts its date a few years after Christ. Juynboll thinks that it had long been in use in the second post-Christian century. Frankel places it in the post-Mohammedan time. It seems certain, however, that it was composed before the destruction of the second temple; and being intended, like the Targums, for the use of the people exclusively, it was written in the popular Samaritan idiom, a mixture of Hebrew, Aramaic, and Syriac. In this version the original has been followed, with a very few exceptions, in a slavish and sometimes perfectly childish manner, the sense evidently being of minor consideration. In other cases, where no Samaritan equivalent could be found for the Hebrew word, the translator, instead of paraphrasing it, simply transposes its letters, so as to make it look Samaritan. On the whole it may be considered a very valuable aid towards the study of the Samar. Text, on account of its very close verbal adherence. A few cases, however, may be brought forward, where the Version has departed from the Text, either under the influence of popular religious notions, or for the sake of explanation. Anthropomorphisms are avoided. A great difficulty is offered by the proper names which this version often substitutes, they being, in many cases, less intelligible than the original ones. The similarity it has with Onkelos occasionally amounts to complete identity; but no safe conclusion as to the respective relation of the two versions can be drawn from this. This Version has likewise, in passing through the hands of copyists and commentators, suffered many interpolations and corruptions. The first copy of it was brought to Europe by De la Valle, together with the Sam. Text, in 1616. Joh. Nedrinus first published it together with a faulty Latin translation in the Paris Polyglott, whence it was, with a few emendations, reprinted in Walton, with some notes by Castell. 2. *Tô Zapapeirikón*. The hatred between the Samaritans and the Jews is supposed to have caused the former to prepare a Greek translation of their Pent. in opposition to the LXX. of the Jews. In this way at least the existence of certain fragments of a Greek Version of the Sam. Pent., preserved in some MSS. of the LXX., together with portions of Aquila, Symmachus, Theodotion, &c., is accounted for. These fragments are supposed to be alluded to by the Greek Fathers under the name *Zapapeirikón*. It is doubtful however whether it ever existed in the shape of a complete translation, or only designated a certain number of scholia translated from the Sam. Version. Other critics again see in it only a corrected edition of certain passages of the LXX. 3. In 1070 an *Arabic* Version of the Sam. Pent. was made by Abu Said in Egypt, on the basis of the Arabic translation of Saadiah haggaon. Like the original Samaritan it avoids Anthropomorphisms and Anthropopathisms, replacing the latter by Euphemisms, besides occasionally making some slight alterations, more especially in proper nouns. It appears to have been drawn up from the Sam. Text, not from the Sam. Version. Often also it renders the original different from the Samar. Version. 4. To this Arabic version Abu Barachat, a Syrian, wrote in 1208 a somewhat paraphrastic commentary, which has by degrees come to be looked upon as a new Version—the *Syriac*.—III. SAMARITAN LITER-

CON. D. B.

ATURE.—It may perhaps not be superfluous to add here a concise account of the Samaritan literature in general, since to a certain degree it bears upon our subject. 1. *Chronicon Samaritanum*.—Of the Pentateuch and its Versions we have spoken. We have also mentioned that the Samaritans have no other book of our Received Canon. Joshua alone seems to have found favour in their eyes; but the *Book of Joshua*, which they perhaps possessed in its original form, gradually came to form only the groundwork of a fictitious national Samaritan history, overgrown with the most fantastic and anachronistic legends. This is the so-called “Samaritan Joshua,” or *Chronicon Samaritanum*, sent to Scaliger by the Samaritans of Cairo in 1584. It was edited by Juynboll (Leyden, 1848), and his acute investigations have shown that it was reduced into its present form about A.D. 1300, out of four special documents, three of which were Arabic, and one Hebrew (i.e. Samaritan). The chronicle embraces the time from Joshua to about A.D. 350, and was originally written in, or subsequently translated into, Arabic. 2. From this work chiefly has been compiled another Chronicle written in the 14th century (1355), by Abu’l Fatah. This comprises the history of the Jews and Samaritans from Adam to A.N. 756 and 798 (A.D. 1355 and 1397) respectively. It is of equally low historical value; its only remarkable feature being the adoption of certain Talmudical legends, which it took at second hand from Josippon ben Gorion. 3. Another “historical” work is on the history and genealogy of the patriarchs, from Adam to Moses, attributed to Moses himself; perhaps the same which Petermann saw at Nablus, and which consisted of sixteen vellum leaves (supposed, however, to contain the history of the world down to the end). 4. Of other Samaritan works chiefly in Arabic—their Samaritan and Hebrew literature having mostly been destroyed by the Emperor Commodius—may be briefly mentioned Commentaries upon the whole or parts of their Pentateuch, by Zadaka b. Manga b. Zadaka; further, by Muddin Eddin Jussuf b. Abi Said b. Khalef; by Ghazal Ibn Abn-l-Surur Al-Safawi Al-Ghazzi (A.N. 1167-8, A.D. 1753-4, Brit. Mus.), &c. Theological works chiefly in Arabic, mixed with Samaritanisms, by Abul Has-an of Tyre, *On the religious Manners and Customs of the Samaritans, and the World to come*; by Mowallék Eddin Zadaka el Israïli, *A Compendium of Religion, on the Nature of the Divine Being, on Man, on the Worship of God*; by Amin Eddin Abu’l Barakat, *On the Ten Commandments*; by Abu’l Hassan Ibn el Markum Gonajem ben Abulharaj’ Ibn Chatâr, *On Penance*; by Muhaddib Eddin Jussuf Ibn Salamah Ibn Jussuf Al Askari, *An Exposition of the Mosaic Laws*, &c., &c. Some grammatical works may be further mentioned, by Abu Ishak Ibrahim, *On the Hebrew Language*; by Abu Said, *On reading the Hebrew Text*. 5. Their Liturgical literature is more extensive, and not without a certain poetical value. It consists chiefly of hymns (Deffer, Durrân) and prayers for Sabbath and Feast days, and of occasional prayers at nuptials, circumcisions, burials, and the like.—IV. We shall only briefly touch here, in conclusion, upon the strangely contradictory rabbinical laws framed for the regulation of the intercourse between the two rival nationalities of Jews and Samaritans in religious and ritual matters; discrepancies due partly to the ever-shifting phases of their mutual relations, partly to the modifications brought

3 G

about, in the Samaritan creed, and partly to the now less now greater acquiescence of the Jews in the religious state of the Samaritans. Thus we find the older Talmudical authorities disputing whether the Cuthim (Samaritans) are to be considered as "Real Converts," or only converts through fear—"Lion Converts"—in allusion to the incident related in 2 K. xvii. 25. It would appear that notwithstanding their rejection of all but the Pentateuch, they had adopted many traditional religious practices from the Jews—principally such as were derived direct from the Books of Moses. It was acknowledged that they kept these ordinances with even greater rigour, than those from whom they adopted them. Their unleavened bread for the Passover is commended; their cheese; and even their whole food is allowed to the Jews. Their testimony was valued in that most stringent matter of the letter of divorce. They were admitted to the office of circumcising Jewish boys. The criminal law makes no difference whatever between them and the Jews. By degrees, however, inhibitions began to be laid upon the use of their wine, vinegar, bread. We hear of their exclusion by R. Meir, in the third generation of the Tannaim, and later again under R. Abbahu, the Amora, at the time of Diocletian; this time the exclusion was unconditional and final. Partaking of their bread was considered a transgression, to be punished like eating the flesh of swine. In Matt. x. 5 Samaritans and Gentiles are already mentioned together; and in Luke xvii. 18 the Samaritan is called "a stranger." The reason for this exclusion is variously given.

Sam'atus. One of the sons of Ozora in the list of 1 Esd. ix. 34.

Samei'us. SHEMAIAH 13 (1 Esd. ix. 21).

Sam'gar-Ne'bo. One of the princes or generals of the king of Babylon who commanded the victorious army of the Chaldeans at the capture of Jerusalem (Jer. xxxix. 3). The *Nebo* is the Chaldean Mercury; about the Samgar, opinions are divided.

Sa'mi. SHOBAI (1 Esd. v. 28).

Sa'mis. SHIMEI 13 (1 Esd. ix. 34).

Sam'lah. Gen. xxvi. 36, 37; 1 Chr. i. 47, 48. One of the kings of Edom, successor to Hualad or Hadar.

Sam'tus. SHEMA (1 Esd. ix. 43).

Sa'mos. A very illustrious Greek island off that part of Asia Minor where IONIA touches CARIA. Samos is a very lofty and commanding island. The Ionian Samos comes before our notice in the detailed account of St. Paul's return from his third missionary journey (Acts xx. 15). He had been at Chios, and was about to proceed to Miletus, having passed by Ephesus without touching there. The topographical notices given incidentally by St. Luke are most exact. In the time of Herod the Great, and when St. Paul was there, it was politically a "free city" in the province of ASIA.

Samothra'cia. The mention of this island in the account of St. Paul's first voyage to Europe (Acts xvi. 11) is for two reasons worthy of careful notice. In the first place, being a very lofty and conspicuous island, it is an excellent landmark for sailors, and must have been full in view, if the weather was clear, throughout that voyage from Troas to Neapolis. Secondly, this voyage was made with a fair wind. Not only are we told that it occupied only parts of two days, whereas on a subsequent return-voyage (Acts xx. 6) the time

spent at sea was five: but the technical word here used implies that they ran before the wind. Now the position of Samothrace is exactly such as to correspond with these notices, and thus incidentally to confirm the accuracy of a most artless narrative. St. Paul and his companions anchored for the night off Samothrace. The ancient city, and therefore probably the usual anchorage, was on the N. side, which would be sufficiently sheltered from a S.E. wind. In St. Paul's time Samothrace had, according to Pliny, the privileges of a small free state, though it was doubtless considered a dependency of the province of Macedonia.

Samp'sames (1 Mac. xv. 23). The name probably not of a sovereign, but of a place, which Grimm identifies with *Samsun* on the coast of the Black Sea, between Sinope and Trebizond.

Sam'son, son of Manoah, a man of the town of Zorah, in the tribe of Dan, on the border of Judah (Josh. xv. 33, xix. 41). The miraculous circumstances of his birth are recorded in Judg. xiii.; and the three following chapters are devoted to the history of his life and exploits. Samson takes his place in Scripture, (1) as a judge—an office which he filled for twenty years (Judg. xv. 20, xvi. 31); (2) as a Nazirite (Judg. xiii. 5, xvi. 17); and, (3) as one endowed with supernatural power by the Spirit of the Lord (Judg. xii. 25, xiv. 6, 19, xv. 14). (1.) As a judge his authority seems to have been limited to the district bordering upon the country of the Philistines, and his action as a deliverer does not seem to have extended beyond desultory attacks upon the dominant Philistines. It is evident from Judg. xiii. 1, 5, xv. 9-11, 20, and the whole history, that the Israelites, or at least Judah and Dan, which are the only tribes mentioned, were subject to the Philistines through the whole of Samson's judgeship; so that Samson's twenty years of office would be included in the forty years of the Philistine dominion. From the angel's speech to Samson's mother (Judg. xiii. 5), it appears further that the Israelites were already subject to the Philistines at his birth; and as Samson cannot have begun to be judge before he was twenty years of age, it follows that his judgeship must have coincided with the last twenty years of Philistine dominion. But when we turn to the First Book of Samuel, and especially to vii. 1-14, we find that the Philistine dominion ceased under the judgeship of Samuel. Hence it is obvious to conclude that the early part of Samuel's judgeship coincided with the latter part of Samson's; and that the capture of the ark by the Philistines in the time of Eli occurred during Samson's lifetime. There are besides several points in the respective narratives of the times of Samson and Samuel which indicate great proximity. There is no allusion whatever to other parts of Israel during Samson's judgeship, except the single fact of the men of the border tribe of Judah, 3000 in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xv. 9-13). The whole narrative is entirely local, and, like the following story concerning Micah (Judg. xvii., xviii.), seems to be taken from the annals of the tribe of Dan. (2.) As a Nazirite, Samson exhibits the law in Num. vi. in full practice. (3.) Samson is one of those who are distinctly spoken of in Scripture as endowed with supernatural power by the Spirit of the Lord. "The Spirit of the Lord began to move him at times in Mahaneh-Dan." "The Spirit of the Lord came mightily upon him."

and the cords that were upon his arms became as flax burnt with fire." "The Spirit of the Lord came upon him, and he went down to Askelon, and slew thirty men of them." The phrase, "the Spirit of the Lord came upon him," is common to him with Othniel and Gideon (Judg. iii. 10, vi. 34); but the connexion of supernatural power with the integrity of the Nazarite vow, and the particular gift of great strength of body, are quite peculiar to Samson. Indeed, his whole character and history have no exact parallel in Scripture. It is easy, however, to see how forcibly the Israelites would be taught, by such an example, that their national strength lay in their complete separation from idolatry, and consecration to the true God; and that He could give them power to subdue their mightiest enemies, if only they were true to His service (comp. 1 Sam. ii. 10). It is an interesting question whether any of the legends which have attached themselves to the name of Hercules may have been derived from Phœnician traditions of the strength of Samson. The combination of great strength with submission to the power of women; the slaying of the Nemean lion; the coming by his death at the hands of his wife; and especially the story told by Herodotus of the captivity of Hercules in Egypt, are certainly remarkable coincidences. Phœnician traders might easily have carried stories concerning the Hebrew hero to the different countries where they traded, especially Greece and Italy; and such stories would have been moulded according to the taste or imagination of those who heard them. Whatever is thought, however, of such coincidences, it is certain that the history of Samson is an historical, and not an allegorical narrative. It has also a distinctly supernatural element which cannot be explained away. The history, as we now have it, must have been written several centuries after Samson's death (Judg. xv. 19, 20, xviii. 1, 30, xix. 1), though probably taken from the annals of the tribe of Dan. The only mention of Samson in the N. T. is that in Heb. xi. 32.

Samuel. The last Judge, the first of the regular succession of Prophets, and the founder of the monarchy. He was the son of Elkanah, an Ephraimite or Ephraimite, and Hannah or Anna. The descent of Elkanah is involved in great obscurity. In 1 Sam. i. 1 he is described as an Ephraimite. In 1 Chr. vi. 22, 23 he is made a descendant of Korah the Levite. His birthplace is one of the vexed questions of sacred geography, as his descent is of sacred genealogy. [See *RAMATHAIM-ZOZAIM*.] The combined family must have been large. Peninah had several children, and Hannah had, besides Samuel, three sons and two daughters. It is on the mother of Samuel that our chief attention is fixed in the account of his birth. She is described as a woman of a high religious mission. Almost a Nazarite by practice (1 Sam. i. 15), and a prophetess in her gifts (1 Sam. ii. 1), she sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the O. T., and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty—*Samuel*, "the *Awakened* or *Heard of God*." Living in the great age of vows, she had before his birth dedicated him to the office of a Nazarite. As soon as he was weaned, she herself with her husband brought him to the Tabernacle at Shiloh, where she had received the

first intimation of his birth, and there solemnly consecrated him. The hymn which followed on this consecration is the first of the kind in the sacred volume. From this time the child is shut up in the tabernacle. He seems to have slept within the Holy Place (1 Sam. iii. 3), and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise. In this way his childhood was passed. It was whilst thus sleeping in the tabernacle that he received his first prophetic call (1 Sam. iii. 1-18). From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (iii. 19-21). In the overthrow of the sanctuary, which followed shortly on this vision, we hear not what became of Samuel (iv. 11). He next appears, probably twenty years afterwards, suddenly amongst the people, warning them against their idolatrous practices (vii. 3, 4). He convened an assembly at Mizpeh, probably the place in Benjamin. It was at the moment that he was offering up a sacrifice, that the Philistine host suddenly burst upon them. A violent thunderstorm came to the timely assistance of Israel. The Philistines fled, and, exactly at the spot where twenty years before they had obtained their great victory, they were totally routed. A stone was set up, which long remained as a memorial of Samuel's triumph, and gave to the place its name of Eben-ezer, "the Stone of Help" (1 Sam. vii. 12). This was Samuel's first and, as far as we know, his only military achievement. But it was apparently this which raised him to the office of "Judge" (comp. 1 Sam. xii. 11, and Eccles. xvi. 15-18). He visited, in discharge of his duties as ruler, the three chief sanctuaries on the west of Jordan—Bethel, Gilgal, and Mizpeh (1 Sam. vii. 16). His own residence was still his native city, Ramah or Ramathaim, which he further consecrated by an altar (vii. 17). Here he married, and two sons grew up to repeat under his eyes the same perversion of high office that he had himself witnessed in his childhood in the case of the two sons of Eli. In his old age he shared his power with them (1 Sam. viii. 1-4). 2. Down to this point in Samuel's life there is but little to distinguish his career from that of his predecessors. But his peculiar position in the sacred narrative turns on the events which follow. He is the inaugurator of the transition from what is commonly called the theocracy to the monarchy. The misdeed of his own sons precipitated the catastrophe which had been long preparing. The people demanded a king. For the whole night he lay fasting and sleepless, in the perplexity of doubt and difficulty. In the vision of that night, as recorded by the sacred historian, is given the dark side of the new institution, on which Samuel dwells on the following day (1 Sam. viii. 9-18). This presents his reluctance to receive the new order of things. The whole narrative of the reception and consecration of Saul gives his acquiescence in it. The final conflict of feeling and surrender of his office is given in the last assembly over which he presided, and in his subsequent relations with Saul. The assembly was held at Gilgal, immediately after the victory over the Ammonites. The monarchy was a second time solemnly inaugurated, and (according to the LXX), "Samuel" (in the Hebrew text "Saul") "and all the men of Israel rejoiced greatly." Then takes place his farewell address. It is the most signal example afforded

in the O. T. of a great character reconciling himself to a changed order of things, and of the Divine sanction resting on his acquiescence. 3. His subsequent relations with Saul are of the same mixed kind. The two institutions which they respectively represented ran on side by side. Samuel was still Judge. He judged Israel "*all the days of his life*" (vii. 15), and from time to time came across the king's path. But these interventions are chiefly in another capacity, which this is the place to unfold. Samuel is called emphatically "the Prophet" (Acts iii. 24, xiii. 20). He was especially known in his old age as "Samuel the Seer" (1 Sam. ix. 11, 18, 19; 1 Chr. ix. 22, xxvi. 28, xxix. 29). He was consulted far and near on the small affairs of life (1 Sam. ix. 7, 8). From this faculty, combined with his office of ruler, an awful reverence grew up around him. No sacrificial feast was thought complete without his blessing (ib. ix. 13). A peculiar virtue was believed to reside in his intercession. There was something peculiar in the long-sustained cry or shout of supplication, which seemed to draw down as by force the Divine answer (1 Sam. vii. 8, 9). But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought out in his relation with Saul, the second in his relation with David. (α). He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacerdotal enactments, which is so remarkable a characteristic of all the later prophets. He was, if a Levite, yet certainly not a Priest; and all the attempts to identify his opposition to Saul with a hierarchical interest are founded on a complete misconception of the facts of the case. From the time of the overthrow of Shiloh, he never appears in the remotest connexion with the priestly order. When he counsels Saul, it is not as the priest but as the prophet. Saul's sin in both cases where he came into collision with Samuel, was not of intruding into sacerdotal functions, but of disobedience to the prophetic voice. The first was that of not waiting for Samuel's arrival, according to the sign given by Samuel at his original meeting at Ramah (1 Sam. x. 8, xii. 8); the second was that of not carrying out the stern prophetic injunction for the destruction of the Amalekites. The parting was not one of rivals, but of dear though divided friends. The King throws himself on the Prophet with all his force; not without a vehement effort the prophet tears himself away. (β). He is the first of the regular succession of prophets (Acts iii. 24). Moses, Miriam, and Deborah, perhaps Ehud, had been prophets. But it was only from Samuel that the continuous succession was unbroken. His mother, though not expressly so called, was in fact a prophetess. But the connexion of the continuity of the office with Samuel appears to be still more direct. It is in his lifetime, long after he had been "established as a prophet" (1 Sam. iii. 20), that we hear of the companies of disciples, called in the O. T. "the sons of the prophets," by modern writers "the schools of the prophets." In those schools, and learning to cultivate the prophetic gifts, were some, whom we know for certain, others whom we may almost certainly conjecture, to have been so trained or influenced. One was Saul. Twice at least he is described as having been in the company of Samuel's disciples (1 Sam. x. 10, 11, xix. 24). Another was DAVID. The first acquaintance of Samuel with David was when he

privately anointed him at the house of Jesse. But the connexion thus begun with the shepherd boy must have been continued afterwards. David, at first, fled to "Naioth in Ramah," as to his second home (1 Sam. xix. 19). It is needless to enlarge on the importance with which these incidents invest the appearance of Samuel. He there becomes the spiritual father of the Psalmist king. He is also the Founder of the first regular institutions of religious instruction, and communities for the purposes of education. The death of Samuel is described as taking place in the year of the close of David's wanderings. It is said with peculiar emphasis, as if to mark the loss, that "all the Israelites were gathered together" from all parts of this hitherto divided country, and "lamented him," and "buried him," not in any consecrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (1 Sam. xxv. 1). The place long pointed out as his tomb is the height, most conspicuous of all in the neighbourhood of Jerusalem, immediately above the town of Gibeon, known to the Crusaders as "Montjoie," as the spot from whence they first saw Jerusalem, now called *Nehy Samuil*, "the Prophet Samuel." Heman, his grandson, was one of the chief singers in the Levitical choir (1 Chr. vi. 33, xv. 17, xxv. 5). The apparition of Samuel at Endor (1 Sam. xxviii. 14; Ecclus. xlii. 20) belongs to the history of SAUL.

Samuel, Books of. Two historical books of the Old Testament, which are not separated from each other in the Hebrew MSS., and which, from a critical point of view, must be regarded as one book. The present division was first made in the Septuagint translation, and was adopted in the Vulgate from the Septuagint. It was not till the year 1518 that the division of the Septuagint was adopted in Hebrew, in the edition of the Bible printed by the Bomberg at Venice. The book was called by the Hebrews "Samuel," probably because the birth and life of Samuel were the subjects treated of in the beginning of the work. *Authorship and Date of the Book.*—1st, as to the authorship. In common with all the historical books of the Old Testament, except the beginning of Nehemiah, the Book of Samuel contains no mention in the text of the name of its author. It is indisputable that the title "Samuel" does not imply that the prophet was the author of the Book of Samuel as a whole; for the death of Samuel is recorded in the beginning of the 25th chapter. Again, in reference to the Book of Samuel, the absence of the historian's name from both the text and the title is not supplied by any statement of any other writer, made within a reasonable period from the time when the book may be supposed to have been written. No mention of the author's name is made in the Book of Kings, nor, as will be hereafter shown, in the Chronicles, nor in any other of the sacred writings. In like manner, it is not mentioned either in the Apocrypha or in Josephus. There is a similar silence in the Mishna, where, however, the inference from such silence is far less cogent. And it is not until we come to the Babylonian Gemara, which is supposed to have been completed in its present form somewhere about 500 A.D., that any Jewish statement respecting the authorship can be pointed out, and then it is for the first time asserted that "Samuel wrote his book," i.e. as the words imply, the book which bears his name. But this statement cannot

be proved to have been made earlier than 1550 years after the death of Samuel; and unsupported as it is by reference to any authority of any kind, it would be unworthy of credit, even if it were not opposed to the internal evidence of the book itself. At the revival of learning, an opinion was propounded by Abraham, a learned Jew, † A.D. 1508, that the Book of Samuel was written by the prophet Jeremiah, and this opinion was adopted by Hugo Grotius. Notwithstanding the eminence, however, of these writers, this opinion must be rejected as highly improbable. In our own time the most prevalent idea in the Anglican Church seems to have been that the first twenty-four chapters of the Book of Samuel were written by the prophet himself, and the rest of the chapters by the prophets Nathan and Gad. Two circumstances have probably contributed to the adoption of this opinion at the present day:—1st, the growth of stricter ideas as to the importance of knowing who was the author of any historical work which advances claims to be trustworthy; and 2ndly, the mistranslation of an ambiguous passage in the First Book of Chronicles (xxix. 29), respecting the authorities for the life of David. The first point requires no comment. On the second point it is to be observed that the following appears to be the correct translation of the passage in question:—"Now the history of David first and last, behold it is written in the history of Samuel the seer, and in the history of Nathan the prophet, and in the history of Gad the seer"—in which the Hebrew word *dibre*, here translated "history," has the same meaning given to it each of the four times that it is used. And it may be deemed morally certain that this passage of the Chronicles is no authority for the supposition that, when it was written, any work was in existence of which either Gad, Nathan, or Samuel was the author. 2. Although the authorship of the Book of Samuel cannot be ascertained, there are some indications as to the date of the work. And yet even on this point no precision is attainable. The earliest undeniable external evidence of the existence of the book would seem to be the Greek translation of it in the Septuagint. The exact date, however, of the translation itself is uncertain. The next best external testimony is that of a passage in the Second Book of Maccabees (ii. 13), in which it is said of Nehemiah, that "he, founding a library, gathered together the acts of the kings, and the prophets, and of David, and the epistles of the kings concerning the holy gifts." Now, although this passage cannot be relied on for proving that Nehemiah himself did in fact ever found such a library, yet it is good evidence to prove that the Acts of the Kings were in existence when the passage was written; and it cannot reasonably be doubted that this phrase was intended to include the Book of Samuel, which is equivalent to the two first Books of Kings in the Septuagint. Hence there is external evidence that the Book of Samuel was written before the Second Book of Maccabees. And lastly, the passage in the Chronicles already quoted (1 Chr. xxix. 29) seems likewise to prove externally that the Book of Samuel was written before the Chronicles. In this case, admitting the date assigned, on internal grounds, to the Chronicles by a modern Jewish writer of undoubted learning and critical powers, there would be external evidence for the existence of the Book of Samuel earlier than 247 B.C., though not earlier than 312 B.C., the era of the Seleucidae.

If the internal evidence respecting the Book of Samuel is examined, there are indications of its having been written some centuries earlier. 1. The Book of Samuel seems to have been written at a time when the Pentateuch, whether it was or was not in existence in its present form, was at any rate not acted on as the rule of religious observances. This circumstance points to the date of the Book of Samuel as earlier than the reformation of Josiah. 2. It is in accordance with this early date of the Book of Samuel that allusions in it even to the existence of Moses are so few. After the return from the Captivity, and more especially after the changes introduced by Ezra, Moses became that great central figure in the thoughts and language of devout Jews which he could not fail to be when all the laws of the Pentateuch were observed, and they were all referred to him as the divine prophet who communicated them directly from Jehovah. This transcendent importance of Moses must already have commenced at the finding of the Book of the Law at the reformation of Josiah. Now it is remarkable that the Book of Samuel is the historical work of the Old Testament in which the name of Moses occurs most rarely. To a religious Jew, when the laws of the Pentateuch were observed, Moses could not fail to be the predominant idea in his mind; but Moses would not necessarily be of equal importance to a Hebrew historian who lived before the reformation of Josiah. 3. It tallies with an early date for the composition of the Book of Samuel that it is one of the best specimens of Hebrew prose in the golden age of Hebrew literature. In prose it holds the same place which Joel and the undisputed prophecies of Isaiah hold in poetical or prophetic language. At the same time this argument from language must not be pushed so far as to imply that, standing alone, it would be conclusive; for some writings, the date of which is about the time of the Captivity, are in pure Hebrew. Assuming, then, that the work was composed at a period not later than the reformation of Josiah—say B.C. 622—the question arises as to the very earliest point of time at which it could have existed in its present form? And the answer seems to be, that the earliest period was subsequent to the secession of the Ten Tribes (B.C. 975). If we go beyond this, and endeavour to assert the precise time between 975 B.C. and 622 B.C., when it was composed, all certain indications fail us. All that can be asserted as undeniable is, that the book, as a whole, can scarcely have been composed later than the reformation of Josiah, and that it could not have existed in its present form earlier than the reign of Rehoboam. It is to be added that no great weight, in opposition to this conclusion, is due to the fact that the death of David, although in one passage evidently implied (2 Sam. v. 5), is not directly recorded in the Book of Samuel. From this fact Hävernicks deems it a certain inference that the author lived not long after the death of David. But this is a very slight foundation for such an inference. In this absolute ignorance of the author's name, and vague knowledge of the date of the work, there has been a controversy whether the Book of Samuel is or is not a compilation from pre-existing documents; and if this is decided in the affirmative, to what extent the work is a compilation. It is not intended to enter fully here into this controversy, respecting which the reader is referred to Dr. Davidson's *Introduction to*

the Critical Study and Knowledge of the Holy Scriptures, London, Longman, 1856, in which this subject is dispositionately and fairly treated. *Sources of the Book of Samuel*.—Assuming that the book is a compilation, it is a subject of rational inquiry to ascertain the materials from which it was composed. But our information on this head is scanty. The only work actually quoted in this book is the Book of Jasher; i.e. the Book of the Upright. Notwithstanding the great learning which has been brought to bear on this title by numerous commentators, the meaning of the title must be regarded as absolutely unknown, and the character of the book itself as uncertain. The best conjecture hitherto offered as an induction from facts is, that it was a Book of Poems; but the facts are too few to establish this as a positive general conclusion. Without reference, however, to the Book of Jasher, the Book of Samuel contains several poetical compositions, on each of which a few observations may be offered; commencing with the poetry of David. (1.) David's Lamentation over Saul and Jonathan, called "The Bow." (2.) David's Lamentation on the death of Abner (2 Sam. iii. 33, 34). There is no reason to doubt the genuineness of this short poetical ejaculation. (3.) 2 Sam. xxii. A Song of David. For poetical beauty, the song is well worthy to be the production of David. The following difficulties, however, are connected with it. (a.) The date of the composition is assigned to the day when David had been delivered not only out of the hand of all his enemies, but likewise "out of the hand of Saul." Now David reigned forty years after Saul's death (2 Sam. v. 4, 5), and it was as king that he achieved the successive conquests to which allusion is made in the Psalm. (b.) In the closing verse (2 Sam. xxii. 51), Jehovah is spoken of as showing "mercy to His anointed, unto David and his seed for evermore." These words would be more naturally written of David than by David. They may, however, be a later addition. (c.) In some passages of the Psalm, the strongest assertions are made of the poet's uprightness and purity. Now it is a subject of reasonable surprise that, at any period after the painful incidents of his life in the matter of Uriah, David should have used this language concerning himself. (4.) A song, called "last words of David," 2 Sam. xxiii. 2-7. (5.) One other song remains, which is perhaps the most perplexing in the Book of Samuel. This is the Song of Hannah, a wife of Elkanah (1 Sam. ii. 1-10). Thenius conjectures that it was written by David after he had slain Goliath, and the Philistines had been defeated in a great battle. There is no historical warrant for this supposition; but the song is certainly more appropriate to the victory of David over Goliath, than to Hannah's having given birth to a child under the circumstances detailed in the first chapter of Samuel. It would, however, be equally appropriate to some other battles of the Israelites. In advancing a single step beyond the songs of the Book of Samuel, we enter into the region of conjecture as to the materials which were at the command of the author; and in points which arise for consideration, we must be satisfied with a suspense of judgment, or a slight balance of probabilities. For example, it being plain that in some instances there are two accounts of the same transaction, it is desirable to form an opinion whether these were founded on distinct written documents, or on distinct oral traditions. This point is open to

dispute; but the theory of written documents seems preferable. In the absence of any external evidence on this point, it is safer to suspend our judgment as to whether any portion of the Book of Samuel is founded on the writing of a contemporary, or on a tradition entitled to any peculiar credit. Perhaps the two conjectures respecting the composition of the Book of Samuel which are most entitled to consideration are—1st, That the list which it contains of officers or public functionaries under David is the result of contemporary registration; and 2ndly, That the Book of Samuel was the compilation of some one connected with the schools of the prophets, or penetrated by their spirit. In conclusion, it may be observed that it is very instructive to direct the attention to the passages in Samuel and the Chronicles which treat of the same events, and, generally, to the manner in which the life of David is treated in the two histories. A comparison of the two works tends to throw light on the state of the Hebrew mind at the time when the Book of Samuel was written, compared with the ideas prevalent among the Jews some hundred years later, at the time of the compilation of the Chronicles. It only remains to add, that in the numerous instances wherein there is a close verbal agreement between passages in Samuel and in the Chronicles, the sound conclusion seems to be, that the Chronicles were copied from Samuel, and not that both were copied from a common original. At the same time it would be unreasonable to deny, and it would be impossible to disprove, that the compiler, in addition to the Book of Samuel, made use of other historical documents which are no longer in existence.

Sanabaz'sar. SHESHBAZZAR (1 Esd. ii. 12, 15).
Sanabaz'sarna. SHESHBAZZAR (1 Esd. vi. 18, 20).

San'asib. The sons of Sanasib were priests who returned with Zorobabel (1 Esd. v. 24).

Sanball'at. A Moabite of Horonaim, as appears by his designation "Sanballat the Horonite" (Neh. ii. 10, 19, xiii. 28). All that we know of him from Scripture is that he had apparently some civil or military command in Samaria, in the service of Artaxerxes (Neh. iv. 2), and that, from the moment of Nehemiah's arrival in Judaea, he set himself to oppose every measure for the welfare of Jerusalem, and was a constant adversary to the Tirshatha. His companions in this hostility were Tobiah the Ammonite, and Geshem the Arabian (Neh. ii. 19, iv. 7). For the details of their opposition the reader is referred to the articles NEHEMIAH and NEHEMIAH, BOOK OF, and to Neh. vi. The only other incident in his life is his alliance with the high-priest's family by the marriage of his daughter with one of the grandsons of Eliashib, which, from the similar connexion formed by Tobiah the Ammonite (Neh. xiii. 4), appears to have been part of a settled policy concerted between Eliashib and the Samaritan faction. The expulsion from the priesthood of the guilty son of Joiada by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the Scriptural narrative ends—owing, probably, to Nehemiah's return to Persia—and with it likewise our knowledge of Sanballat.

Sandal. The sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It consisted simply of a sole attached to the foot by thongs. The Hebrew term *na'al* im-

plies such an article, its proper sense being that of *confining* or shutting in the foot with thongs: we have also express notice of the thong (A. V. "shoe-latchet") in several passages (Gen. xiv. 23; Is. v. 27; Mark i. 7). The Greek term *ὑπόδημα* properly applies to the sandal exclusively, as it means what is bound *under* the foot; but no stress can be laid on the use of the term by the Alexandrine writers. A similar observation applies to *συνδάλιον*. We learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, or wood, and that it was occasionally shod with iron. In Egypt various fibrous substances, such as palm leaves and papyrus stalks, were used in addition to leather, while in Assyria wood or leather was employed. In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. Sandals were worn by all classes of society in Palestine, even by the very poor (Am. viii. 6), and both the sandal and the thong or shoe-latchet were so cheap and common, that they passed into a proverb for the most insignificant thing (Gen. xiv. 23; Eccles. xvi. 19).

Assyrian Sandals. (From Layard, II 234.)

They were not, however, worn at all periods; they were dispensed with in-doors, and were only put on by persons about to undertake some business away from their homes; such as a military expedition (Is. v. 27; Eph. vi. 15), or a journey (Ex. xii. 11; Josh. ix. 5, 13; Acts xii. 8): on such occasions persons carried an extra pair. During meal-times the feet were undoubtedly uncovered, as implied in Luke vii. 38; John xiii. 5, 6. It was a mark of reverence to cast off the shoes in approaching a place or person of eminent sanctity (Ex. iii. 5; Josh. v. 15). It was also an indication of violent emotion, or of mourning, if a person appeared barefoot in public (2 Sam. xv. 30; Is. xx. 2; Ez. xxiv. 17, 23). To carry or to unloose a person's sandal was a menial office betokening great inferiority on the part of the person performing it (Matt. iii. 11; Mark i. 7; John i. 27; Acts xiii. 25). The expression in Ps. lx. 8, cviii. 9, "over Edom I cast out my shoe," evidently signifies the subjection of that country, but the exact point of the comparison is obscure. The use of the shoe in the transfer of property is noticed in Ruth iv. 7, 8.

Sanhedrim (accurately Sanhedrin), called also in the Talmud *the great Sanhedrim*, the supreme council of the Jewish people in the time of Christ and earlier. 1. *The origin* of this assembly is traced in the Mishna (*Sanhedr. i. 6*) to the seventy elders whom Moses was directed (Num. xi. 16, 17) to

associate with him in the government of the Israelites. This body continued to exist, according to the Rabbinical accounts, down to the close of the Jewish commonwealth. Since the time of Vorstius it has been generally admitted that the tribunal established by Moses was probably temporary, and did not continue to exist after the Israelites had entered Palestine. In the lack of definite historical information as to the establishment of the Sanhedrim, it can only be said in general that the Greek etymology of the name seems to point to a period subsequent to the Macedonian supremacy in Palestine. In the silence of Philo, Josephus, and the Mishna respecting the constitution of the Sanhedrim, we are obliged to depend upon the few incidental notices in the New Testament. From these we gather that it consisted of chief priests, or the heads of the twenty-four classes into which the priests were divided, elders, men of age and experience, and scribes, lawyers, or those learned in the Jewish law (Matt. xxvi. 57, 59; Mark xv. 1; Luke xxii. 66; Acts v. 21). 2. *The number of members* is usually given as seventy-one, but this is a point on which there is not a perfect agreement among the learned. The president of this body was styled *Nasi*, and, according to Maimonides, was chosen on account of his eminence in worth and wisdom. Often, if not generally, this pre-eminence was accorded to the high-priest. The vice-president, called in the Talmud "father of the house of judgment," sat at the right hand of the president. Some writers speak of a second vice-president, but this is not sufficiently confirmed. While in session the Sanhedrim sat in the form of a half-circle. 3. *The place* in which the sessions of the Sanhedrim were ordinarily held was, according to the Talmud, a hall called *Gazzith*, supposed by Lightfoot to have been situated in the south-east corner of one of the courts near the Temple building. In special exigencies, however, it seems to have met in the residence of the high-priest (Matt. xxvi. 3). Forty years before the destruction of Jerusalem, and consequently while the Saviour was teaching in Palestine, the sessions of the Sanhedrim were removed from the hall Gazzith to a somewhat greater distance from the temple building, although still on Mt. Moriah. After several other changes, its seat was finally established at Tiberias. As a judicial body the Sanhedrim constituted a supreme court, to which belonged in the first instance the trial of a tribe fallen into idolatry, false prophets, and the high-priest; also the other priests. As an administrative council it determined other important matters. Jesus was arraigned before this body as a false prophet (John xi. 47), and Peter, John, Stephen, and Paul as teachers of error and deceivers of the people. From Acts ix. 2 it appears that the Sanhedrim exercised a degree of authority beyond the limits of Palestine. According to the Jerusalem Gemara the power of inflicting capital punishment was taken away from this tribunal forty years before the destruction of Jerusalem. With this agrees the answer of the Jews to Pilate (John ix. 31). The Talmud also mentions a *lesser Sanhedrim* of twenty-three members in every city in Palestine in which were not less than 120 householders.

Sansan'nah, one of the towns in the south district of Judah, named in Josh. xv. 31 only. The towns of this district are not distributed into small groups like those of the highlands or the Shefelah

and as only very few of them have been yet identified, we have nothing to guide us to the position of Sansannah. It does not appear to be mentioned by any explorer, ancient or modern.

Saph, one of the sons of the giant slain by Sibbechai the Hushathite (2 Sam. xxi. 18). In 1 Chr. xx. 4 he is called SIPPAL.

Saphat. SHEPHATHIAH 2 (1 Esd. v. 9).

Saphat'as. SHEPHATHIAH 2 (1 Esd. viii. 34).

Sapheth. SHEPHATHIAH (1 Esd. v. 33).

Saphir, one of the villages addressed by the Prophet Micah (i. 11), but not elsewhere mentioned. By Eusebius and Jerome it is described as "in the mountain district between Eleutheropolis and Ascalon." In this direction a village called *es-Sawafir* still exists (or rather three of that name, two with affixes), possibly the representative of the ancient Saphir. *Es-Sawafir* lies seven or eight miles to the N.E. of Ascalon, and about twelve W. of *Beit-Jibrin*, to the right of the coast-road from Gaza. Tobler prefers a village called Saber, close to *Sawafir*. Schwarz suggests the village of *Safiriyeh*, a couple of miles N.W. of Lydda (136).

Sapphira, the wife of Ananias, and the participant both in his guilt and in his punishment (Acts v. 1-10).

Sapphire (Heb. *sappir*), a precious stone, apparently of a bright blue colour (see Ex. xxiv. 10). The *sappir* was the second stone in the second row of the high-priest's breastplate (Ex. xxviii. 18); it was extremely precious (Job xxviii. 16); it was one of the precious stones that ornamented the king of Tyre (Ez. xxviii. 13). Notwithstanding the identity of name between our sapphire and the *σάπφειρος*, and *sapphirus* of the Greeks and Romans, it is generally agreed that the *sapphirus* of the ancients was not our gem of that name, viz. the azure or indigo-blue, crystalline variety of Corundum, but our *Lapis-lazuli* (*Ultra-marine*). It is, however, not so certain that the *Sappir* of the Hebrew Bible is identical with the *Lapis-lazuli*. Rosenmüller and Braun argue in favour of its being our sapphire or precious Corundum. We are inclined to adopt this latter opinion, but are unable to come to any satisfactory conclusion.

Sara. 1. SARAH, the wife of Abraham (Heb. xi. 11; 1 Pet. iii. 6).—2. The daughter of Raguel, in the apocryphal history of Tobit.

Sarab'as. SHEREBIAH (1 Esd. ix. 48).

Sarah. 1. The wife of Abraham, and mother of Isaac. Of her birth and parentage we have no certain account in Scripture. Her name is first introduced in Gen. xi. 29, as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah and the father of Iscah." In Gen. xx. 12, Abraham speaks of her as "his sister, the daughter of the same father, but not the daughter of the same mother." The common Jewish tradition is that Sarai is the same as Iscah, the daughter of Haran, and the sister of Lot. The change of her name from "Sarai" to "Sarah" was made at the same time that Abram's name was changed to Abraham, on the establishment of the covenant of circumcision between him and God. That the name "Sarah" signifies "princess" is universally acknowledged; but the meaning of "Sarai" is still a subject of controversy. The older interpreters suppose it to mean "my princess." Her history is of course that of Abraham. She came with him

from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out. The times in which she plays the most important part in the history are the times when Abraham was sojourning, first in Egypt, then in Gerar, and where Sarah shared his deceit towards Pharaoh (Gen. xii. 1-15) and towards Abimelech (Gen. xx. 9-11). She died at Hebron at the age of 127 years, 28 years before her husband, and was buried by him in the cave of Machpelah. She is referred to in the N. T. as a type of conjugal obedience in 1 Pet. iii. 6, and as one of the types of faith in Heb. xi. 11.—2. SERAH, the daughter of Asher (Num. xvi. 46).

Sara'i, the original name of Sarah, the wife of Abraham. It is always used in the history from Gen. xi. 29 to xvii. 15, when it was changed to Sarah. The meaning of the name appears to be, as Ewald has suggested, "contentious."

Sarai'as. 1. SERATAH, the high-priest (1 Esd. v. 5).—2. SERAIAH, the father of Ezra (1 Esd. viii. 1; 2 Esd. i. 1).

Saramel, the name of the place in which the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Maccabaeus (1 Macc. xiv. 28). Some have treated it as a corruption of Jerusalem, but this is inadmissible. The following are some of the other conjectures:—1. *Hahatsar Millo*, "the court of Millo." 2. *Hahatsar Am El*, "the court of the people of God, that is, the great court of the Temple." 3. *Hasshar Am El*, "the gate of the people of God." 4. *Hassar Am El*, "prince of the people of God," as if not the name of a place, but the title of Simon. None of these explanations, however, can be regarded as entirely satisfactory.

Saraph. Mentioned in 1 Chr. iv. 22, among the descendants of Shelah the son of Judah.

Sarchedonus, a collateral form of the name Esar-haddon (Tob. i. 21).

Sarde'us. AZIZA (1 Esd. ix. 28).

Sardine, **Sardius** (Heb. *odem*), is, according to the LXX. and Josephus, the correct rendering of the Heb. term (which occurs in Ex. xxviii. 17, xxxix. 10; Ez. xxviii. 13) as the name of the stone which occupied the first place in the first row of the high-priest's breastplate. In Rev. iv. 3, St. John declares that he whom he saw sitting on the heavenly throne "was to look upon like a jasper and a sardine stone." The sixth foundation of the wall of the heavenly Jerusalem was a *sardius* (Rev. xxi. 20). There can scarcely be a doubt that either the sard or the sardonix is the stone denoted by *odem*. The sard, which is a superior variety of agate, has long been a favourite stone for the engraver's art. Sardis differ in colour: there is a bright red variety which, in Pliny's time, was the most esteemed, and perhaps the Heb. *odem*, from a root which means "to be red," points to this kind.

Sardis, a city situated about two miles to the south of the river Hermus, just below the range of Tmolus (*Bos Dagh*), on a spur of which its acropolis was built. It was the ancient residence of the kings of Lydia. Sardis was in very early times, both from the extremely fertile character of the neighbouring region, and from its convenient position, a commercial mart of importance. Chestnuts were first produced in the neighbourhood. The art of dyeing wool is said by Pliny to have been invented there; and at any rate Sardis was the

entrepôt of the dyed woollen manufactures. Sardis too was the place where the metal *electrum* was procured; and it was thither that the Spartans sent, in the 6th century B.C., to purchase gold for the purpose of gilding the face of the Apollo at Amyclæ. Sardis recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next three hundred years are very obscure. It changed hands more than once in the contests between the dynasties which arose after the death of Alexander. In the year 214 B.C. it was taken and sacked by the army of Antiochus the Great. After the ruin of Antiochus's fortunes it passed, with the rest of Asia on that side of Taurus, under the dominion of the kings of Pergamus, whose interests led them to divert the course of traffic between Asia and Europe away from Sardis. Its productive soil must always have continued a source of wealth; but its importance as a central mart appears to have diminished from the time of the invasion of Asia by Alexander. Of the few inscriptions which have been discovered, all, or nearly all, belong to the time of the Roman empire. Yet there still exist considerable remains of the earlier days. The massive temple of Cybele still bears witness in its fragmentary remains to the wealth and architectural skill of the people that raised it. On the north side of the acropolis, overlooking the valley of the Hermus, is a theatre near 400 feet in diameter, attached to a stadium of about 1000. This probably was erected after the restoration of Sardis by Alexander. The modern name of the ruins at Sardis is *Sert-Kalçesi*. Travellers describe the appearance of the locality, on approaching it from the N.W., as that of complete solitude. The Pactolus is a mere thread of water, all but evanescent in summer time. The *Wadis-tohai* (Hermus), in the neighbourhood of the town, is between 50 and 60 yards wide, and nearly 3 feet deep. In the time of the emperor Tiberius, Sardis was desolated by an earthquake. The whole face of the country is said to have been changed by this convulsion. In the case of Sardis the calamity was increased by a pestilential fever which followed. In the time of Pliny it was included in the same *conventus juridicus* with Philadelphia. The only passage in which Sardis is mentioned in the Bible is Rev. iii. 1-6.

Sardites, the, descendants of Sered the son of Zebulun (Num. xxvi. 26).

Sardonix is mentioned in the N. T. once only, viz. in Rev. xxi. 20. The sardonix consists of "a white opaque layer, superimposed upon a red transparent stratum of the true red sard" (King, *Antique Gems*, p. 9). It is, like the sard, merely a variety of agate, and is frequently employed by engravers for the purposes of a signet-ring.

Sarēa, one of the five scribes "ready to write swiftly" whom Esdras was commanded to take (2 Esd. xiv. 24).

Sarepta, the Greek form of the name ZAREPHATH (Luke iv. 26).

Sargon was one of the greatest of the Assyrian kings. His name is read in the native inscriptions as Sargina, while a town which he built and called after himself (now Khorsabad) was known as *Sarghūn* to the Arabian geographers. He is mentioned by name only once in Scripture (Is. xl. 1). Vitringa, Offerhaus, Eichhorn, and Hupfeld, identified him with Shalmaneser; Grotius, Lowth, and

Keil, with Sennacherib; Perizonius, Kalumky, and Michaëlis, with Esarhaddon. All these conjectures are now shown to be wrong by the Assyrian inscriptions, which prove Sargon to have been distinct from the several monarchs named, and fix his place in the list between Shalmaneser and Sennacherib. He was certainly Sennacherib's father, and there is no reason to doubt that he was his immediate predecessor. He ascended the throne of Assyria, as we gather from his annals, in the same year that Merodach-Baladan ascended the throne of Babylon, which, according to Ptolemy's Canon, was B.C. 721. He seems to have been an usurper. Sargon was undoubtedly a great and successful warrior. In his annals, which cover a space of fifteen years (from B.C. 721 to B.C. 706), he gives an account of his warlike expeditions against Babylon and Susiana on the south, Media on the east, Armenia and Cappadocia towards the north, Syria, Palestine, Arabia, and Egypt towards the west and the south-west. In this last direction he seems to have waged three wars—one in his second year (B.C. 720), for the possession of Gaza; another in his sixth year (B.C. 715), when Egypt itself was the object of attack; and a third in his ninth (B.C. 712), when the special subject of contention was Ashdod, which Sargon took by one of his generals. This is the event which causes the mention of Sargon's name in Scripture. The year of the attack, being B.C. 712, would fall into the reign of the first Ethiopian king, Salaco I., who probably conquered Egypt in B.C. 714. It is not as a warrior only that Sargon deserves special mention among the Assyrian kings. He was also the builder of useful works, and of one of the most magnificent of the Assyrian palaces. He probably reigned nineteen years, from B.C. 721 to B.C. 702, when he left the throne to his son, the celebrated Sennacherib.

Sar'id, a chief landmark of the territory of Zebulun (Josh. xix. 10, 12). All that can be gathered of its position is that it lay to the west of Chisloth-Tabur.

Sar'on, the district in which Lydda stood (Acts ix. 35 only); the SHARON of the O. T.

Saro'this. "The sons of Sarothie" are among the sons of the servants of Solomon who returned with Zorobabel (1 Esd. v. 34).

Sar'sechim, one of the generals of Nebuchadnezzar's army at the taking of Jerusalem (Jer. xxxix. 3). He appears to have held the office of chief eunuch. In Jer. xxxix. 13, Nebushasban is called Rab-saris, "chief eunuch;" and the question arises whether Nebushasban and Sarsechim may not be names of the same person. In Gesenius' *The-saurus* it is conjectured that Sarsechim and Rab-saris may be identical, and both titles of the same office.

Sar'uch. SERUG the son of Reu (Luke iii. 35).

Sa'tan. The word itself, the Hebrew *śāṭān*, is simply an "adversary," and is so used in 1 Sam. xxix. 4; 2 Sam. xix. 22; 1 K. v. 4, xi. 14, 23, 25; Num. xxii. 22, 32; Ps. cix. 6. This original sense is still found in our Lord's application of the name to St. Peter in Matt. xvi. 23. It is used as a proper name or title only four times in the O. T. viz. (with the article) in Job i. 6, 12, ii. 1, Zech. iii. 1, and (without the article) in 1 Chr. xxi. 1. It is with the scriptural revelation on the subject that we are here concerned; and it is clear, from this simple enumeration of passages, that it is to be sought in the New, rather than in the Old Testa-

ment. It divides itself naturally into the consideration of his existence, his nature, and his power and action.—(A.) HIS EXISTENCE.—It would be a waste of time to prove, that, in various degrees of clearness, the personal existence of a Spirit of Evil is revealed again and again in Scripture. Every quality, every action which can indicate personality, is attributed to him in language which cannot be explained away. The tendency of the mind in its inquiry as to the origin of evil is generally towards one or other of two extremes. The first is to consider evil as a negative imperfection, arising, in some unknown and inexplicable way, from the nature of matter, or from some disturbing influences which limit the action of goodness on earth. The other is the old Persian or Manichaean hypothesis, which traces the existence of evil to a rival Creator, not subordinate to the Creator of Good, though perhaps inferior to Him in power, and destined to be overcome by Him at last. The Revelation of Scripture, speaking with authority, meets the truth, and removes the error, inherent in both these hypotheses. It asserts in the strongest terms the perfect supremacy of God, so that under His permission alone, and for His inscrutable purposes, evil is allowed to exist (see for example Prov. xvi. 4; Is. xlv. 7; Am. iii. 6; comp. Rom. ix. 22, 23). It regards this evil as an anomaly and corruption, to be taken away by a new manifestation of Divine Love in the Incarnation and Atonement. The conquest of it began virtually in God's ordinance after the Fall itself, was effected actually on the Cross, and shall be perfected in its results at the Judgment Day. Still Scripture recognises the existence of evil in the world, not only as felt in outward circumstances ("the world"), and as inborn in the soul of man ("the flesh"), but also as proceeding from the influence of an Evil Spirit, exercising that mysterious power of free will, which God's rational creatures possess, to rebel against Him, and to draw others into the same rebellion ("the devil"). In accordance with the "economy" and progressiveness of God's revelation, the existence of Satan is but gradually revealed. In the first entrance of evil into the world, the temptation is referred only to the serpent. Throughout the whole period of the patriarchal and Jewish dispensation, this vague and imperfect revelation of the Source of Evil alone was given. The Source of all Good is set forth in all His supreme and unapproachable Majesty; evil is known negatively as the falling away from Him. The Book of Job stands, in any case, alone on the basis of "natural religion," apart from the gradual and orderly evolutions of the Mosiac revelation. In it, for the first time, we find a distinct mention of "Satan," the "adversary" of Job. But it is important to remark the emphatic stress laid on his subordinate position, on the absence of all but delegated power, of all terror, and all grandeur in his character. It is especially remarkable that no power of spiritual influence, but only a power over outward circumstances, is attributed to him. The Captivity brought the Israelites face to face with the great dualism of the Persian mythology, the conflict of Ormuzd with Ahriman, the co-ordinate Spirit of Evil. In the books written after the Captivity we have again the name of "Satan" twice mentioned (1 Chr. xxi. 1; Zech. iii. 1, 2); but it is confessed by all that the Satan of Scripture bears no resemblance to the Persian Ahriman. His subordination and inferiority are as strongly

marked as ever. In the interval between the Old and New Test. the Jewish mind had pondered on the scanty revelations already given of evil spiritual influence. But the Apocryphal Books (as, for example, Tobit and Judith), while dwelling on "demons," have no notice of Satan. The same may be observed of Josephus. But, while a mass of fable and superstition grew up on the general subject of evil spiritual influence, still the existence and nature of Satan remained in the background, felt, but not understood. The N. T. first brings it plainly forward. From the beginning of the Gospel, when he appears as the personal tempter of our Lord, through all the Gospels, Epistles, and Apocalypse, it is asserted or implied, again and again, as a familiar and important truth. Without dwelling on other passages, the plain, solemn, and unmetaphorical words of John viii. 44, must be sufficient.—(B.) HIS NATURE.—Of the nature and original state of Satan, little is revealed in Scripture. He is spoken of as a "spirit" in Eph. ii. 2, as the prince or ruler of the "demons" in Matt. xii. 24-26, and as having "angels" subject to him in Matt. xxv. 41; Rev. xii. 7, 9. The whole description of his power implies spiritual nature and spiritual influence. We conclude therefore that he was of angelic nature, a rational and spiritual creature, superhuman in power, wisdom, and energy; and not only so, but an archangel, one of the "princes" of heaven. We cannot, of course, conceive that anything essentially and originally evil was created by God. We can only conjecture, therefore, that Satan is a fallen angel, who once had a time of probation, but whose condemnation is now irrevocably fixed. But of the time, cause, and manner of his fall, Scripture tells us scarcely anything. It limits its disclosures, as always, to that which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii. 7, 9. Whatever be the meaning of this passage, it is certain that it cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii. 4, with the parallel passage in Jude 6. Here again the passage is mysterious; but it seems hardly possible to consider Satan as one of these; for they are in chains and guarded till the Great Day; he is permitted still to go about as the Tempter and Adversary, until his appointed time be come. Setting these passages aside, we have still to consider the declaration of our Lord in Luke x. 18, "I beheld Satan, as lightning, fall from heaven." This may refer to the fact of his original fall; but, in any case, it tells nothing of its cause or method. There is also the passage already quoted (John viii. 44); but here it seems likely the words refer to the beginning of his action upon man. Perhaps the only one, which has any value, is 1 Tim. iii. 6, "lest being lifted up by pride he fall into the condemnation of the devil." It is concluded from this that pride was the cause of the devil's condemnation. But, while these points are passed by almost in silence, Scripture describes to us, distinctly the moral nature of the Evil One. This is no matter of barren speculation to those who, by yielding to evil, may become the "children of Satan," instead of "children of God." The ideal of goodness is made up of the three great moral attributes of God—Love, Truth, and Purity or Holiness; combined with that spirit which is the natural temper of a finite and dependent creature, the spirit of Faith. We find,

Accordingly, that the opposites of these qualities are lent upon as the characteristics of the devil.—

C.) **HIS POWER AND ACTION.**—The power of Satan over the soul is represented as exercised either directly or by his instruments. His direct influence over the soul is simply that of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but it has the power of acting by suggestion of thoughts, without the medium of action or words—a power which is only in very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms, as a real external influence, correlative to, but not to be confounded with, the existence of evil within. Yet at the same time it is to be observed that its language is very far from countenancing, even for a moment, the horrors of the Manichean theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the Divine counsel, and broken by the Incarnate Son of God. It is brought out visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of His triumph. The history of the Book of Job shows plainly, what is elsewhere constantly implied, that Satanic influence is permitted in order to be overruled to good, to teach humility, and therefore faith. The mystery of the existence of evil is left unexplained, but its present subordination and future extinction are familiar truths. So accordingly, on the other hand, his power is spoken of as capable of being resisted by the will of man, when aided by the grace of God. Besides his own direct influence, the Scripture discloses to us the fact that Satan is the leader of a host of evil spirits or angels who share his evil work, and for whom the “everlasting fire is prepared” (Matt. xxv. 41). Of their origin and fall we know no more than of his, for they cannot be the same as the fallen and imprisoned angels of 2 Pet. ii. 4, and Jude 6; but one passage (Matt. xii. 24-26) identifies them distinctly with the *δαίμονια* (A. V. “devils”) who had power to possess the souls of men. They are mostly spoken of in Scripture in reference to possession; but in Eph. vi. 12, they are described in various lights, as “principalities,” “powers,” “rulers of the darkness of this world,” and “spiritual powers of wickedness in heavenly places” (or “things”); and in all as “wrestling” against the soul of man. In Rev. xii. 7-9, they are spoken of as fighting with “the dragon, the old serpent called the devil and Satan,” against “Michael and his angels,” and as cast out of heaven with their chief. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action are but little dwelt upon in comparison with his. But the Evil One is not only the “prince of the demons,” but also he is called the “prince of this world,” in John xii. 31, xiv. 30, xvi. 11, and even the “god of this world” in 2 Cor. iv. 4; the two expressions being united in Eph. vi. 12. This power he claimed for himself, as a *delegated authority*, in the temptation of our Lord (Luke iv. 6); and the temptation would have been unreal had he spoken altogether falsely. It implies another kind of indirect influence exercised through earthly instruments. There are some indications in Scripture of the exercise of this power through inanimate

instruments, of an influence over the powers of nature, and what men call the “chances” of life. Most of all is this indirect action of Satan manifested in those who deliberately mislead and tempt men. The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically *ὁ διάβολος*, “the devil.” The derivation of the word in itself implies only the endeavour to break the bonds between others, and “set them at variance;” but common usage adds to this general sense the special idea of “setting at variance by slander.” In the application of the title to Satan, both the general and special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other. The slander of God to man is seen best in the words of Gen. iii. 4, 5. They attribute selfishness and jealousy to the Giver of all good. The slander of man to God is illustrated by the Book of Job (Job i. 9-11, ii. 4, 5). In reference to it, Satan is called the “adversary” of man in 1 Pet. v. 8, and represented in that character in Zech. iii. 1, 2; and more plainly still designated in Rev. xii. 10, as “the accuser of our brethren, who accused them before our God day and night.” It is difficult for us to understand what can be the need of accusation, or the power of slander, under the all-searching eye of God. But these points, important as they are, are of less moment than the disclosure of the method of Satanic action upon the heart itself. It may be summed up in two words—Temptation and Possession. The subject of temptation is illustrated, not only by abstract statements, but also by the record of the temptations of Adam and of our Lord. It is expressly laid down (as in James i. 2-4) that “temptation,” properly so called, i. e. “trial,” is essential to man, and is accordingly ordained for him and sent to him by God (as in Gen. xxi. 1). Man’s nature is progressive; his faculties, which exist at first only in capacity, must be brought out to exist in actual efficiency by free exercise. His appetites and passions need to be checked by the reason and conscience, and this need constitutes a trial. Besides this, the will itself delights in independence of action. The need of giving up the individual will, freely and by conviction, so as to be in harmony with the will of God, is a still severer trial. It is this tentatibility of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the “tempter” (as in Matt. iv. 3; 1 Thess. iii. 5). He has power, first, to present to the appetites or passions their objects in vivid and captivating forms; and next, to act upon the false desire of the will for independence. It is a power which can be resisted, because it is under the control and overruling power of God (1 Cor. x. 13; James iv. 7, &c.). It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sower. Its positive exercise is set forth in the parable of the wheat and the tares. This exercise of the Tempter’s power is possible, even against a sinless nature. We see this in the Temptation of our Lord. But in the temptation of a fallen nature Satan has a greater power. Every sin committed makes a man the “servant of sin” for the future (John viii. 34; Rom. vi. 16): it therefore creates in the spirit of man a positive tendency to evil, which sympathises with, and aids,

the temptation of the Evil One. This is a fact recognised by experience. It is this which St. Paul calls "a law," i. e. an external power "of sin" over man, bringing the inner man into captivity (Rom. vii. 14-24). Its power is broken by the Atonement and the gift of the Spirit, but yet not completely cast out. It is to this spiritual power of evil, the tendency to falsehood, cruelty, pride, and unbelief, independently of any benefits to be derived from them, that Satan is said to appeal in tempting us. This twofold power of temptation is frequently referred to in Scripture, as exercised, chiefly by the suggestion of evil thoughts, but occasionally by the delegated power of Satan over outward circumstances. The subject itself is the most startling form of the mystery of evil; it is one on which, from our ignorance of the connexion of the First Cause with Second Causes in nature, and of the process of origination of human thought, experience can hardly be held to be competent either to confirm or to oppose the testimony of Scripture. On the subject of Possession see DEMONIACS.

Sathrabuzanes. SHETHARBOZAI (1 Esd. vi. 3, 7, 27).

Satyræ (Heb. *sêrim*), the rendering in the A. V. of the above-named plural noun, which, having the meaning of "hairy" or "rough," is frequently applied to "he-goats;" the *Sêrim*, however, of Is. xiii. 21, and xxiv. 14, where the prophet predicts the desolation of Babylon, have, probably, no allusion to any species of goat whether wild or tame. According to the old versions, and nearly all the commentators, our own translation is correct, and Satyræ, that is, demons of woods and desert places, half men and half goats (comp. Lev. xvii. 7; 2 Chr. xi. 15). The opinion held by Michaelis and Lichtenstein, that the *Sêrim* probably denote some species of ape, has been sanctioned by Hamilton Smith in Kitto's *Cyc.* That some species of *Cynocephalus* (dog-faced baboon) was an animal that entered into the theology of the ancient Egyptians, is evident from the monuments and from what Horapollo has told us. The other explanation, however, has the sanction of Goenius, Bochart, Rosenmüller, Parkhurst, Maurer, Fürst, and others.

Saul, more accurately SHAUL. The name of various persons in the Sacred History.—1. Saul of Rehoboth by the River was one of the early kings of Edom, and successor of Samlah (Gen. xxxvi. 37, 38). In 1 Chr. i. 48 he is called SHAUL.—2. The first king of Israel. There is a contradiction between the pedigree in 1 Sam. ix. 1, xiv. 51, which represents Saul and Abner as the grandsons of Abiel, and 1 Chr. viii. 33, ix. 39, which represents them as his great-grandsons. If we adopt the more elaborate pedigree in the Chronicles, we must suppose either that a link has been dropped between Abiel and Kish, in 1 Sam. ix. 1, or that the elder Kish, the son of Abiel (1 Chr. iv. 36), has been confounded with the younger Kish, the son of Ner (1 Chr. ix. 39). The pedigree in 1 Chr. viii. is not free from confusion, as it omits amongst the sons of Abiel, Ner, who in 1 Chr. ix. 36 is the fifth son, and who in both is made the father of Kish. His character is in part illustrated by the fierce, wayward, fitful nature of the tribe, and in part accounted for by the struggle between the old and new systems in which he found himself involved. To this we must add a taint of madness, which broke out in violent frenzy at times, leaving him with long lucid intervals. He was remarkable for

his strength and activity (2 Sam. i. 23), and like the Homeric heroes, of gigantic stature, taller by head and shoulders than the rest of the people, and of that kind of beauty denoted by the Hebrew word "good" (1 Sam. ix. 2), and which caused him to be compared to the gazelle, "the gazelle of Israel." The birthplace of Saul is not expressly mentioned; but, as Zelah was the place of Kish's sepulchre (2 Sam. xxi.), it was probably his native village. His father, Kish, was a powerful and wealthy chief, though the family to which he belonged was of little importance (ix. 1, 21). A portion of his property consisted of a drove of asses. In search of these asses, gone astray on the mountains, he sent his son Saul, accompanied by a servant, who acted also as a guide and guardian of the young man (ix. 3-10). It was while prosecuting this adventure that Saul met with Samuel for the first time. A Divine intimation had indicated to him the approach and the future destiny of the youthful Benjaminite. Surprised at his language, but still obeying his call, they ascended to the high place, and in the inn or caravanserai at the top found thirty or (LXX., and Joseph.) seventy guests assembled, amongst whom they took the chief place. In anticipation of some distinguished stranger, Samuel had bade the cook reserve a boiled shoulder, from which Saul, as the chief guest, was bidden to tear off the first morsel. They then descended to the city, and a bed was prepared for Saul on the house-top. At daybreak Samuel roused him. They descended again to the skirts of the town, and there (the servant having left them) Samuel poured over Saul's head the consecrated oil, and with a kiss of salutation announced to him that he was to be the ruler and (LXX.) deliverer of the nation (ix. 25-x. 1). From that moment a few life dawned upon him. He returned by a route which, like that of his search, it is impossible to make out distinctly; and at every step homeward it was confirmed by the incidents which, according to Samuel's prediction, awaited him (x. 9, 10). This is what may be called the private, inner view of his call. The outer call, which is related independently of the other, was as follows:—An assembly was convened by Samuel at Mizpeh, and lots were cast to find the tribe and the family which was to produce the king. Saul was named—and, by a Divine intimation, found hid in the circle of baggage which surrounded the encampment (x. 17-24). His stature at once conciliated the public feeling, and for the first time the shout was raised, afterwards so often repeated in modern times, "Long live the king" (x. 23-24), and he returned to his native Gibeah. He was (having apparently returned to his private life) on his way home, driving his herd of oxen, when he heard one of those wild lamentations in the city of Gibeah, such as mark in Eastern towns the arrival of a great calamity. It was the tidings of the threat issued by Nahash king of Ammon against Jabesh Gilead. "The Spirit of the Lord came upon him," as on the ancient Judges. The shy, retiring nature which we have observed, vanished never to return. Three (or six, LXX.) hundred thousand followed from Israel, and thirty (or seventy, LXX.) thousand from Judah: and Jabesh was rescued. The effect was instantaneous on the people—the punishment of the murmurers was demanded—but refused by Saul, and the monarchy was inaugurated anew at Gilgal (xi. 1-15). It should be, however, observed that according to 1 Sam. xii. 12, the affair of Nahash preceded and

occasioned the election of Saul. He becomes king of Israel. But he still so far resembles the earlier Judges, as to be virtually king only of his own tribe, Benjamin, or of the immediate neighbourhood. Almost all his exploits are confined to this circle of territory or associations. Samuel, who had up to this time been still named as ruler with Saul (xi. 7, 12, 14), now withdrew, and Saul became the acknowledged chief. In the 2nd year of his reign, he began to organise an attempt to shake off the Philistine yoke which pressed on his country; not least on his own tribe, where a Philistine officer had long been stationed even in his own field (x. 5, xiii. 3). An army of 3000 was formed, which he soon afterwards gathered together round him; and Jonathan, apparently with his sanction, rose against the officer and slew him (xiii. 2-4). This roused the whole force of the Philistine nation against him. The spirit of Israel was completely broken. In this crisis, Saul, now on the very confines of his kingdom at Gilgal, found himself in the position long before described by Samuel; longing to exercise his royal right of sacrifice, yet deterred by his sense of obedience to the Prophet. At last on the 7th day, he could wait no longer, but just after the sacrifice was completed Samuel arrived, and pronounced the first curse, on his impetuous zeal (xiii. 5-14). Meanwhile the adventurous exploit of Jonathan at Michmash brought on the crisis which ultimately drove the Philistines back to their own territory. It was signalled by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the rash vow which all but cost the life of his son (1 Sam. xiv. 24, 44). The other was the erection of his first altar, built either to celebrate the victory, or to expiate the savage feast of the famished people (xiv. 35). The expulsion of the Philistines (although not entirely completed, xiv. 52) at once placed Saul in a position higher than that of any previous ruler of Israel. The warlike character of his reign naturally still predominated, and he was now able to attack the neighbouring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (xiv. 47). The war with Amalek is twice related, first briefly (xiv. 48), and then at length (xv. 1-9). Its chief connexion with Saul's history lies in the disobedience to the prophetic command of Samuel; shown in the sparing of the king, and the retention of the spoil. This second act of disobedience called down the second curse, and the first distinct intimation of the transference of the kingdom to a rival. The struggle between Samuel and Saul in their final parting is indicated by the rent of Samuel's robe of state, as he tears himself away from Saul's grasp (for the gesture, see Joseph. *Ant.* vi. 7, § 5), and by the long mourning of Samuel for the separation — "Samuel mourned for Saul." "How long wilt thou mourn for Saul?" (xiv. 35, xvi. 1.) The rest of Saul's life is one long tragedy. The frenzy, which had given indications of itself before, now at times took almost entire possession of him. It is described in mixed phrases as "an evil spirit of God" (much as we might speak of "religious madness"), which, when it came upon him, almost choked or strangled him from its violence. In this crisis David was recommended to him by one of the young men of his guard. From this time forward their lives are blended together. [DAVID.] In Saul's better moments he never lost the strong affection which he had contracted for David. Occasionally too his prophetic gift re-

turned, blended with his madness (xix. 24). But his acts of fierce, wild zeal increased. At last the monarchy itself, which he had raised up, broke down under the weakness of its head. The Philistines re-entered the country, and with their chariots and horses occupied the plain of Esdraelon. Their camp was pitched on the southern slope of the range now called Little Hermon, by Shunem. On the opposite side, on Mount Gilboa, was the Israelite army, clinging as usual to the heights which were their safety. It was near the spring of Gideon's encampment, hence called the spring of Harod or "trembling"—and now the name assumed an evil omen, and the heart of the king as he pitched his camp there "trembled exceedingly" (1 Sam. xxviii. 5). In the loss of all the usual means of consulting the Divine Will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply to one of the necromancers who had escaped his persecution. She was a woman living at Endor, on the other side of Little Hermon. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner. Volumes have been written on the question, whether in the scene that follows we are to understand an imposture or a real apparition of Samuel. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognises the disguised king first by the appearance of Samuel, seemingly from his threatening aspect or tone as towards his enemy. Saul apparently saw nothing, but listened to her description of a god-like figure of an aged man, wrapped round with the royal or sacred robe. On hearing the denunciation, which the apparition conveyed, Saul fell the whole length of his gigantic stature (see xxviii. 20, margin) on the ground, and remained motionless till the woman and his servants forced him to eat. The next day the battle came on, and according to Josephus, perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1 Sam. xxi. 2). Saul himself with his armour-bearer was pursued by the archers and the charioteers of the enemy (1 Sam. xxi. 3; 2 Sam. i. 6). He was wounded. His shield was cast away (2 Sam. i. 21). According to one account, he fell upon his own sword (1 Sam. xxxi. 4). According to another account, an Amalekite came up at the moment of his death-wound, and found him "fallen," but leaning on his spear (2 Sam. i. 6, 10). The dizziness of death was gathered over him (LXX, 2 Sam. i. 9), but he was still alive; and he was, at his own request, put out of his pain by the Amalekite, who took off his royal diadem and bracelet, and carried the news to David (2 Sam. i. 7-10). The body on being found by the Philistines was stripped, and decapitated. The armour was sent into the Philistine cities, as if in retribution for the spoliation of Goliath, and finally deposited in the temple of Astarte, apparently in the neighbouring Canaanish city of Bethshan; and over the walls of the same city was hung the naked headless corpse, with those of his three sons (ver. 9, 10). The head was deposited (probably at Ashdod) in the temple of Dagon (1 Chr. x. 10). The corpse was removed from Bethshan by the gratitude of the inhabitants of Jabesh-gilead, who came over the Jordan by

night, carried off the bodies, burnt them, and buried them under the tamarisk at Jabesh (1 Sam. xxxi. 13). Thence, after the lapse of several years, his ashes and those of Jonathan were removed by David to their ancestral sepulchre at Zelah in Benjamin (2 Sam. xxi. 14).—3. The Jewish name of ST. PAUL. This was the most distinguished name in the genealogies of the tribe of Benjamin, to which the Apostle felt some pride in belonging (Rom. xi. 1; Phil. iii. 5). Nothing certain is known about the change of the Apostle's name from Saul to Paul (Acts xiii. 9). Two chief conjectures prevail concerning the change. (1.) That of Jerome and Augustine, that the name was derived from SERGIUS PAULUS, the first of his Gentile converts. (2.) That which appears due to Lightfoot, that Paulus was the Apostle's Roman name as a citizen of Tarsus, naturally adopted into common use by his biographer when his labours among the heathen commenced.

Savarán, an erroneous form of the title *Avaran*, borne by Eleazar the son of Mattathias (1 Macc. vi. 43).

Savias. Uzzi the ancestor of Ezra (1 Esd. viii. 2).

Saw. Egyptian saws, so far as has yet been discovered, were single-handed, though St. Jerome has been thought to allude to circular saws. As is the case in modern Oriental saws, the teeth usually incline towards the handle, instead of away from it like ours. They have, in most cases, bronze blades, apparently attached to the handles by leathern thongs, but some of those in the British Museum have their blades let into them like our knives. A double-handed iron saw has been found at Nimrud. No evidence exists of the use of the saw applied to stone in Egypt, nor without the double-handed saw does it seem likely that this should be the case; but we read of sawn stones used in the Temple (1 K. vii. 9). The saws "under" or "in" which David is said to have placed his captives were of iron. The expression in 2 Sam. xii. 31, does not necessarily imply torture, but the word "cut" in 1 Chr. xx. 3, can hardly be understood otherwise.

Scape-goat. [ATONEMENT, DAY OF.]

Scarlet. [COLOURS.]

Sceptre. The Hebrew term *shébet*, like its Greek equivalent *σκῆπτρον*, and our derivative *sceptre*, originally meant a *rod* or *staff*. It was thence specifically applied to the shepherd's crook (Lev. xvii. 32; Mic. vii. 14), and to the wand or sceptre of a ruler. The use of the staff as a symbol of authority was not confined to kings; it might be used by any leader, as instanced in Judg. v. 14, where for "pen of the writer," as in the A. V., we should read "sceptre of the leader." The allusions to it are all of a metaphorical character, and describe it simply as one of the insignia of supreme power (Gen. xlix. 10; Num. xxiv. 17; Ps. xlv. 6; Is. xiv. 5; Am. i. 5; Zech. x. 11; Wisd. x. 14; Bar. vi. 14). We are consequently unable to describe the article from any Biblical notices; we may infer that it was probably made of wood. The sceptre of the Persian monarch is described as "golden," i. e. probably of massive gold (Esth. iv. 11). A carved ivory staff discovered at Nimrud is supposed to have been a sceptre.

Seeva. A Jew residing at Ephesus at the time of St. Paul's second visit to that town (Acts xix. 14-16). He is described as a "high-priest," either as having exercised the office at Jerusalem, or as being chief of one of the twenty-four classes.

Science. In the A. V. this word occurs only in

Dan. i. 4, and 1 Tim. vi. 20. Its use in Dan. i. 4 is probably to be explained by the number of synonymous words in the verse, forcing the translators to look out for diversified equivalents in English. Why it should have been chosen for 1 Tim. vi. 20 is not so obvious. Its effect is injurious, as leading the reader to suppose that St. Paul is speaking of something else than the "knowledge" of which both the Judaizing and the mystic sects of the Apostolic age continually boasted, against which he so urgently warns men (1 Cor. viii. 1, 7), the counterfeit of the true knowledge which he prizes so highly (1 Cor. xii. 8, xiii. 2; Phil. i. 9; Col. iii. 10). A natural perversion of the meaning of the text has followed from this translation.

Scorpion (Heb. *šakrób*). The well-known animal of that name, belonging to the class *Arachnida* and order *Pulmonaria*, which is twice mentioned in the O. T. (Deut. viii. 15; Ez. ii. 6), and four times in the N. T. (Luke x. 19, xi. 12; Rev. ix. 3, 10). The wilderness of Sinai is especially alluded to as being inhabited by scorpions at the time of the exodus, and to this day these animals are common in the same district, as well as in some parts of Palestine. Ehrenberg enumerates five species as occurring near Mt. Sinai, some of which are found also in the Lebanon. Scorpions are generally found in dry and in dark places, under stones and in ruins, chiefly in warm climates. They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is situated at the extremity of the tail, has at its base a gland that secretes a poisonous fluid, which is discharged into the wound by two minute orifices at its extremity. In hot climates the sting often occasions much suffering, and sometimes alarming symptoms. The "scorpions" of 1 K. xii. 11, 14, 2 Chr. x. 11, 14, have clearly no allusion whatever to the animal, but to some instrument of scourging—unless indeed the expression is a mere figure. Celsus thinks the "scorpion" scourge was the spiny stem of what the Arabs call *Hodeh*, the *Solanum melongena*, var. *esculentum*, egg-plant.

Scorpion.

Scourging. The punishment of scourging was prescribed by the Law in the case of a betrothed bondwoman guilty of unchastity, and perhaps in the case of both the guilty persons (Lev. xix. 20). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually the stick, applied to the soles of the feet—bastinado. Under the Roman method the cul-

pirit was stripped, stretched with cords or thongs on a frame, and benten with rods.

Screech-owl. [OWL.]

Scribes (Heb. *sopherim*). I. *Name*.—(1.) Three meanings are connected with the verb *sāphar*, the root of *Sopherim*—(1) to write, (2) to set in order, (3) to count. The explanation of the word has been referred to each of these. The *Sopherim* were so called because they wrote out the Law, or because they classified and arranged its precepts, or because they counted with scrupulous minuteness every clause and letter it contained. The traditions of the Scribes, glorying in their own achievements, were in favour of the last of these etymologies. The second fits in best with the military functions connected with the word in the earlier stages of its history. The authority of most Hebrew scholars is with the first. The Greek equivalent answers to the derived rather than the original meaning of the word. The *γραμματεὺς* of a Greek state was not the mere writer, but the keeper and registrar of public documents (Thuc. iv. 118, vii. 10; so in Acts xiv. 35). (2.) The name of KIRJATH-SEPHER (Josh. xv. 15; Judg. i. 12) may possibly connect itself with some early use of the title. In the song of Deborah (Judg. v. 14) the word appears to point to military functions of some kind. The "pen of the writer" of the A. V. is probably the rod or sceptre of the commander numbering or marshalling his troops. Three men are mentioned as successively filling the office of Scribe under David and Solomon (2 Sam. viii. 17, xx. 25; 1 K. iv. 3). We may think of them as the king's secretaries, writing his letters, drawing up his decrees, managing his finances (comp. 2 K. xii. 10). At a later period the word again connects itself with the act of numbering the military forces of the country (Jer. lii. 25, and probably Is. xxxiii. 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (Prov. xxv. 1). To this period accordingly belongs the new significance of the title. It no longer designates only an officer of the king's court, but a class, students and interpreters of the Law, boasting of their wisdom (Jer. viii. 8). (3.) The seventy years of the Captivity gave a fresh glory to the name. The exiles would be anxious above all things to preserve the sacred books, the laws, the hymns, the prophecies of the past. The words of Ezr. vii. 10 describe the high ideal of the new office. The Scribe is "to seek the law of the Lord and to do it, and to teach in Israel statutes and judgments." (4.) Of the time that followed we have but scanty records. The Scribes' office apparently became more and more prominent. They appear as a distinct class, "the families of the Scribes," with a local habitation (1 Chr. ii. 55). They compile, as in the two Books of Chronicles, *excerpta* and *epitomes* of larger histories (1 Chr. xxix. 29; 2 Chr. ix. 29).—II. *Development of Doctrine*.—(1.) It is characteristic of the Scribes of this period that, with the exception of Ezra and Zadok (Neh. xiii. 13), we have no record of their names. A later age honoured them collectively as the men of the Great Synagogue. Never, perhaps, was so important a work done so silently. In the words of later Judaism they devoted themselves to the *Misra* (i. e. recitation, reading, as in Neh. xiii. 8), the careful

study of the text, and laid down rules for transcribing it with the most scrupulous precision. (2.) A saying is ascribed to Simon the Just (B.C. 300-290), which embodies the principle on which they had acted, and enables us to trace the next stage of the growth of their system. "Our fathers have taught us," he said, "three things, to be cautious in judging, to train many scholars, and to set a fence about the Law." They wished to make the Law of Moses the rule of life for the whole nation and for individual men. The Jewish teacher could recognise no principles beyond the precepts of the Law. (3.) The result showed that, in this as in other instances, the idolatry of the letter was destructive of the very reverence in which it had originated. Step by step the Scribes were led to conclusions at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting in to the circumstances of men's lives than the old, came practically to take their place. The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. (4.) Here it will be enough to notice what way the teaching of the Scribes in our Lord's time was making to that result. Their first work was to report the decisions of previous Rabbis. These were the *Halachoth* (the current precepts of the schools)—precepts binding on the conscience. A new code, a second *Corpus Juris*, the Mishna, grew out of them. The anecdotes of the schools or courts of law, the *cheter dicta* of Rabbis, the wildest fables of Jewish superstition (Tit. i. 14), were brought in, and the *Gemara* (completeness) filled up the measure of the Institutes of Rabbinic Law. The Mishna and the *Gemara* together were known as the Talmud (instruction). (5.) Side by side with this was a development in another direction. The sacred books were not studied as a code of laws only. To search into their meaning had from the first belonged to the ideal office of the Scribe. But here also the book suggested thoughts which could not logically be deduced from it. The fruit of the effort to find what was not there appears in the *Midrashim* (searchings, investigations) on the several books of the O. T. The process by which the meaning, moral or mystical, was elicited, was known as *Hagada* (saying, opinion). There was obviously no assignable limit to such a process. But there lay a stage higher even than the Hagada. The mystical school of interpretation culminated in the *Kabbala* (reception, the received doctrine). Every letter, every number, became pregnant with mysteries.—III. *History*.—(1.) The names of the earlier scribes passed away, as has been said, unrecorded. Simon the Just (circ. B.C. 300-290) appears as the last of the men of the Great Synagogue, the beginner of a new period. The memorable names of the times that followed—Antigonus of Socho, Zadok, Boëthos—connect themselves with the rise of the first opposition to the traditional system which was growing up. The tenet of the Sadducees, however, never commanded the adhesion of more than a small minority. It tended by maintaining the sufficiency of the letter of the Law, to destroy the very occupation of a Scribe, and the class, as such, belonged to the party of its opponents. The words "Scribes" and "Pharisees" were bound together by the closest possible alliance (Matt. xxiii. passim; Luke v. 30). To

understand their relation to each other in our Lord's time, or their connexion with His life and teaching, we must look back to what is known of the five pairs of teachers who represented the scribal succession. (2.) The two names that stand first in order are Jose ben-Joezer, a priest, and Jose ben-Jochanan (circ. B.C. 140-130). The precepts ascribed to them indicate a tendency to a greater elaboration of all rules connected with ceremonial defilement. The brave struggle with the Syrian kugs had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a fraternity (the *Chaverin*, or associates) bound to the strictest observance of the Law. (3.) Joshua ben-Perachiah and Nithai of Arbela were contemporary with John Hyrcanus (circ. B.C. 135-108), and enjoyed his favour till towards the close of his reign, when caprice or interest led him to pass over to the camp of the Sadducees. (4.) The secession of Hyrcanus involved the Pharisees, and therefore the Scribes as a class, in difficulties, and a period of confusion followed. The meetings of the Sanhedrim were suspended or became predominantly Sadducean. Under his successor, Alexander Jannai, the influence of Simon ben-Shetach over the queen-mother Salome re-established for a time the ascendancy of the Scribes. The Sanhedrim once again assembled, with none to oppose the dominant Pharisaic party. The return of Alexander from his campaign against Gaza again turned the tables. Eight hundred Pharisees took refuge in a fortress, were besieged, taken, and put to death. Joshua ben-Perachiah, the venerable head of the order, was driven into exile. The Sadducees failed, however, to win the confidence of the people. On the death of Jannai the influence of his widow Alexandra was altogether on the side of the Scribes, and Simon ben-Shetach and Judah ben-Tabbai entered on their work as joint teachers. Under them the juristic side of the Scribe's functions became prominent. Their rules turn chiefly on the laws of evidence. (5.) The two that followed, Shemaiah and Abtalion, were conspicuous for another reason. Now, for the first time, the teachers who sat in Moses' seat were not even of the children of Abiahum. Proselytes themselves, or the sons of proselytes, their pre-eminence in the knowledge of the Law raised them to this office. The lot of these two also was cast upon evil days. They had courage to attempt to check the rising power of Herod in his bold defiance of the Sanhedrim. When he showed himself to be irresistible they had the wisdom to submit, and were suffered to continue their work in peace. Its glory was, however, in great measure, gone. The doors of their school were no longer thrown open to all comers so that crowds might listen to the teacher. A fixed fee had to be paid on entrance. On the death of Shemaiah and Abtalion there were no qualified successors to take their place. Two sons of Bethera, otherwise unknown, for a time occupied it, but they were themselves conscious of their incompetence. (6.) The name of Hillel (born circ. B.C. 112) has hardly received the notice due to it from students of the Gospel history. The noblest and most genial representative of his order, we may see in him the best fruit which the system of the Scribes was capable of producing. It is instructive to mark at once how far he prepared the way for the higher teaching which was to follow, how far he inevitably fell short of it. In the earlier days of his activity

Hillel had as his colleague Menahem, probably the same as the Essene Manaen of Josephus. He, however, was tempted by the growing power of Herod, and, with a large number of his followers, abandoned at once their calling as Scribes and their habits of devotion. The place thus vacant was soon filled by Shammai. The two were held in nearly equal honour. One, in Jewish language, was the Nasi, the other the Ab-beth-din of the Sanhedrim. They did not teach, however, as their predecessors had done, in entire harmony with each other. Within the party of the Pharisees, within the order of the Scribes, there came for the first time to be two schools with distinctly opposed tendencies, one vehemently, rigidly orthodox, the other orthodox also, but with an orthodoxy which, in the language of modern politics, might be classed as Liberal Conservative. The points on which they differed were almost innumerable. In most of them, questions as to the causes and degrees of uncleanness, as to the law of contracts or of wills, we can find little or no interest. On the former class of subjects the school of Shammai represented the extreme development of the Pharisaic spirit. (7.) The teaching of Hillel showed some capacity for wider thoughts. His personal character was more loveable and attractive. While on the one side he taught as from a mind well stored with the traditions of the elders, he was, on the other, anything but a slavish follower of those traditions. He was the first to lay down principles for an equitable construction of the Law with a dialectic precision which seems almost to imply a Greek culture. The genial character of the man comes out in some of his sayings, which remind us of the tone of Jesus the son of Sirach, and present some faint approximations to a higher teaching. (8.) The contrast showed itself in the conduct of the followers not less than in the teachers. The disciples of Shammai were conspicuous for their fierceness, appealed to popular passions, and used the sword to decide their controversies. Out of that school grew the party of the Zealots, fierce, fanatical, vindictive, the Orangemen of Pharisaism. Those of Hillel were like their master (comp. e.g. the advice of Gamaliel, Acts v. 34-42), cautious, gentle, tolerant, unwilling to make enemies, content to let things take their course. One sought to impose upon the proselyte from heathenism the full burden of the Law, the other that he should be treated with some sympathy and indulgence. (9.) Outwardly the teaching of our Lord must have appeared to men different in many ways from both. But in most of the points at issue between the two parties, He must have appeared in direct antagonism to the school of Shammai, in sympathy with that of Hillel. So far, on the other hand, as the temper of the Hillel school was one of mere adaptation to the feeling of the people, cleaving to tradition, wanting in the intuition of a higher life, the teaching of Christ must have been felt as unsparingly condemning it. (10.) It adds to the interest of this inquiry to remember that Hillel himself lived, according to the tradition of the Rabbis, to the great age of 120, and may therefore have been present among the doctors of Luke ii. 46, and that Gamaliel, his grandson and successor, was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact, which so many passages in the Gospels lead us to infer, the existence all along of a party

among the Scribes themselves, more or less disposed to recognise Jesus of Nazareth as a teacher.—IV. *Education and Life*.—(1.) The special training for a Scribe's office began, probably, about the age of thirteen. According to the *Pirke Aboth* (v. 24) the child began to read the Mikra at five and the Mishna at ten. Three years later every Israelite became a child of the Law, and was bound to study and obey it. The great mass of men rested in the scanty teaching of their synagogues, in knowing and repeating their Tephillim, the texts inscribed on their phylacteries. For the boy who was destined by his parents, or who devoted himself, to the calling of a Scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous Rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. The master and his scholars met, the former sitting on a high chair, the elder pupils on a lower bench, the younger on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the Rabbi. The education was chiefly catechetical, the pupil submitting cases and asking questions, the teacher examining the pupil (Luke ii.). Parables entered largely into the method of instruction. (2.) After a sufficient period of training, probably at the age of thirty, the probationer was solemnly admitted to his office. The presiding Rabbi pronounced the formula, "I admit thee, and thou art admitted to the Chair of the Scribe," solemnly ordained him by the imposition of hands, and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the "key of knowledge" (comp. Luke x. 52), with which he was to open or to shut the treasures of Divine wisdom. (3.) There still remained for the disciple after his admission the choice of a variety of functions, the chances of failure and success. He might rise to high places, become a doctor of the law, an arbitrator in family litigations (Luke xii. 14), the head of a school, a member of the Sanhedrim. He might have to content himself with the humbler work of a transcriber, copying the Law and the Prophets for the use of synagogues, or Tephillim for that of the devout, or a notary writing out contracts of sale, covenants of espousals, bills of repudiation. The position of the more fortunate was of course attractive enough. (4.) In regard to social position there was a like contradiction between theory and practice. The older Scribes had had no titles; Shemaiah emphatically warned his disciples against them. In our Lord's time the passion for distinction was insatiable. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the close hereditary caste of the priesthood was powerless to compete with them. Unless the priest became a Scribe also, he remained in obscurity. (5.) The character of the order was marked under these influences by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognised by Him who rebuked them for their evil.

Scrip (Heb. *yalkút*). The Hebrew word thus translated appears in 1 Sam. xvii. 40, as a synonym for the bag in which the shepherds of Palestine

carried their food or other necessities. The scrip of the Galilean peasants was of leather, used especially to carry their food on a journey, and slung over their shoulders (Matt. x. 10; Mark vi. 8; Luke ix. 3, xxii. 35). The English word "scrip" is probably connected with *scrape, scrap*, and was used in like manner for articles of food.

Scripture. The chief facts relating to the books to which, individually and collectively, this title has been applied, will be found under BIBLE and CANON. It will fall within the scope of this article to trace the history of the word, and to determine its exact meaning in the language of the O. and N. T. (1.) It is not till the return from the Captivity that the word meets us with any distinctive force. In the earlier books we read of the Law, the Book of the Law. In Ex. xxxii. 16, the Commandments written on the tables of testimony are said to be "the writing of God," but there is no special sense in the word taken by itself. In the passage from Dan. x. 21, where the A. V. has "the Scripture of Truth," the words do not probably mean more than "a true writing." The thought of the Scripture as a whole is hardly to be found in them. This first appears in 2 Chr. xxx. 5, 18 ("as it was written," A. V.). The Greek word, as will be seen, kept its ground in this sense. A slight change passed over that of the Hebrew, and led to the substitution of another. The word *ekklhston* (= writings), in the Jewish arrangement of the O. T., used for a part and not the whole of the O. T. (the Hagiographa; comp. BIBLE). Another word was therefore wanted, and it was found in the *Mikra* (מִקְרָא, Neh. viii. 8), or "reading," the thing read or recited, recitation. This accordingly we find as the equivalent for the collective *γραφαι*. (2.) With this meaning the word *γραφη* passed into the language of the N. T. Used in the singular it is applied chiefly to this or that passage quoted from the O. T. (Mark xii. 10; John vii. 38, xiii. 18, xix. 37; Luke iv. 21; Rom. ix. 17; Gal. iii. 8, &c.). In two passages of some difficulty, some have seen the wider, some the narrower sense. (1.) *Πᾶσα γραφή θεοπνεύματος* (2 Tim. iii. 16) has been translated in the A. V. "All Scripture is given by inspiration of God." There is a preponderance of authority in favour of the rendering, "Every *γραφη*, being inspired, is also profitable. . . ." (2.) The meaning of the genitive in *πᾶσα προφητεία γραφῆς* (2 Pet. i. 20) seems at first sight distinctly collective. "Every prophecy of, i. e. contained in, the O. T. Scripture." A closer examination of the passage will perhaps lead to a different conclusion. (3.) In the plural, as might be expected, the collective meaning is prominent. In 2 Pet. iii. 16, we find an extension of the term to the Epistles of St. Paul; but it remains uncertain whether "the other Scriptures" are the Scriptures of the O. T. exclusively, or include other writings, then extant, dealing with the same topics. (4.) In one passage, *τὰ ἁγία γράμματα* (2 Tim. iii. 15) answers to "The Holy Scriptures" of the A. V.

Scythian occurs in Col. iii. 11 as a generalised term for rude, ignorant, degraded. The same view of Scythian barbarism appears in 2 Macc. iv. 47, and 3 Macc. vii. 5. The Scythians dwelt mostly on the north of the Black Sea, and the Caspian stretching thence indefinitely into inner Asia, and were regarded by the ancients as standing extremely low in point of intelligence and civilisation.

Scythopolis, that is, "the city of the Scythians," occurs in the A. V. of Jud. iii. 10 and 2 Macc. xii. 29 only. Bethshean has now, like so many other places in the Holy Land, regained its ancient name, and is known as *Beisan* only. A mound close to it on the west is called *Tell Shâk*, in which it is perhaps just possible that a trace of Scythopolis may linger. But although there is no doubt whatever of the identity of the place, there is considerable difference of opinion as to the origin of the name. The LXX. and Pliny attribute it to the Scythians, who in the words of the Byzantine historian George Syncellus, "overran Palestine, and took possession of Bysan, which from them is called Scythopolis." This has been in modern times generally referred to the invasion recorded by Herodotus (i. 104-6), when the Scythians, after their occupation of Media, passed through Palestine on their road to Egypt (about B.C. 600). Reland, however, discarded this explanation, and suggested that Scythopolis was a corruption of Succothopolis—the chief town of the district of Succoth. Since, however, the objection of Reland to the historical truth of Herodotus is now removed, the necessity for this suggestion seems not to exist. Dr. Robinson suggests that, after all, *City of the Scythians* may be right; the word *Scythia* being used as in the N. T. as equivalent to a barbarian or savage. In this sense he thinks it may have been applied to the wild Arabs, who then, as now, inhabited the *Ġhôr*, and at times may have had possession of Bethshean. Scythopolis was the largest city of the Decapolis, and only one of the ten which lay west of Jordan. It was surrounded by a district of its own of the most abundant fertility. It became the seat of a Christian bishop, and its name is found in the lists of signatures as late as the Council of Constantinople, A.D. 536. The latest mention of it under the title of Scythopolis is probably that of William of Tyre (xii. 16 and 26). He mentions it as if it was then actually so called, carefully explaining that it was formerly Bethshean.

Sea. The Sea, *yâm*, is used in Scripture to denote—1. The "gathering of the waters" (*yâmîm*), encompassing the land, or what we call in a more or less definite sense, "the Ocean" (Gen. i. 2, 10); Deut. xxx. 13, &c.). 2. Some portion of this, as the Mediterranean Sea (Deut. xi. 24), or the Red Sea (Ex. xv. 4). 3. Inland lakes, whether of salt or fresh water. 4. Any great collection of water, as the rivers Nile or Euphrates, especially in a state of overflow (Is. xix. 5; Am. viii. 8). The qualities or characteristics of the sea and sea-coast mentioned in Scripture are, 1. The sand, whose abundance on the coast both of Palestine and Egypt furnishes so many illustrations (Gen. xxii. 17, xli. 49; Judg. vii. 12; 1 Sam. xiii. 5; 1 K. iv. 20, 29; Is. x. 22; Matt. vii. 26). 2. The shore. 3. Creeks or inlets. 4. Harbours. 5. Waves or billows. It may be remarked that almost all the figures of speech taken from the sea in Scripture, refer either to its power or its danger. The place "where two seas met" (Acts xxvii. 41), may perhaps mean one where two currents, caused by the intervention of the island, met and produced an eddy, which made it desirable at once to ground the ship.

Sea, Molten. In the place of the laver of the tabernacle, Solomon caused a laver *to be cast for a similar purpose*, which from its size was called a *sea*. It was made partly or wholly of the brass, or

rather copper, which had been captured by David from "Tibhath and Chun, cities of Hadarezer king of Zobah" (1 K. vii. 23-26; 1 Chr. xviii. 8). Its dimensions were as follows:—Height, 5 cubits; diameter, 10 cubits; circumference, 30 cubits; thickness, 1 handbreadth; and it is said to have been capable of containing 2000, or according to 2 Chr. iv. 5, 3000 baths. Below the brim there was a double row of "knops," 10 (i. e. 5+5) in each cubit. These were probably a running border or double fillet of tendrils, and fruits, said to be gourds, of an oval shape. The brim itself, or lip, was wrought "like the brim of a cup, with flowers of lilies," i. e. curved outwards like a lily or lotus flower. The laver stood on twelve oxen, three towards each quarter of the heavens, and all looking outwards. It was mutilated by Ahaz, by being removed from its basis of oxen and placed on a stone base, and was finally broken up by the Assyrians (2 K. xvi. 14, 17, xxv. 13). Josephus says that the form of the sea was hemispherical, and that it held 3000 baths; and he elsewhere tells us that the bath was equal to 72 Attic *ξέσται*, or 1 *μετρῆρής* = 8 gallons 5-12 pints. The question arises, which occurred to the Jewish writers themselves, how the contents of the laver, as they are given in the sacred text, are to be reconciled with its dimensions. The Jewish writers supposed that it had a square hollow base for 3 cubits of its height, and 2 cubits of the circular form above. A far more probable suggestion is that of Thénius, in which Keil agrees, that it was of a bulging form below, but contracted at the mouth to the dimensions named in 1 K. vii. 23.

Hypothetical restoration of the Laver. From Keil.

Sea, the Salt. The usual, and perhaps the most ancient, name, for the remarkable lake, which to the Western world is now generally known as the Dead Sea.—1. It is found only, and but rarely, in the Pentateuch (Gen. xiv. 3; Num. xxxiv. 3, 12; Deut. xii. 17), and in the Book of Joshua (iii. 16, xiii. 3, xv. 2, 5, xviii. 19). 2. Another, and possibly a later name, is the SEA OF THE ARABAH (A. V. "sea of the plain"), which is found in Deut. iv. 49, and 2 K. xiv. 25; and combined with the former—"the sea of the Arabah, the salt sea"—in Deut. xii. 17; Josh. iii. 16, xii. 3. 3. In the prophets (Joel ii. 20; Ezek. xlvii. 18; Zech. xiv. 8) it is mentioned by the title of THE EAST SEA. 4. In Ez. xlvii. 8, it is styled, without previous reference, THE SEA, and distinguished from "the great sea"—the Mediterranean (ver. 10). 5. Its connexion with Sodom is first suggested in the Bible in the book of 2 Esdras (v. 7) by the name "Sodomitic sea." 6. In the Talmudical books it is called both the "Sea of Salt," and "Sea of Sodom." 7. Josephus, and before him

Map, and Longitudinal Section (from North to South), of the DEAD SEA, from the Observations, Surveys, and Soundings of Lynch, Goldinson, De Saulcy, Van de Velde, and others, drawn under the superintendence of Mr. Grove by Trolawney Saunders, and engraved by J. D. Cooper.

Diodorus Siculus, names it the Asphaltic Lake. 8. The name "Dead Sea" appears to have been first used in Greek by Pausanias (v. 7) and Galen (iv. 9), and in Latin (*mare mortuum*) by Justin (xxvi. 3, §6), or rather by the older historian, Trogus Pompeius (cir. B.C. 10), whose work he epitomized. 9. The Arabic name is *Bahr Lūt*, the "Sea of Lot."—II. 1. The so-called DEAD SEA is the final receptacle of the river Jordan, the lowest and largest of the three lakes which interrupt the rush of its downward course. It is the deepest portion of that very deep natural fissure which runs like a furrow from the Gulf of Akaba to the range of Lebanon, and from the range of Lebanon to the extreme north of Syria. 2. Viewed on the map, the lake is of an oblong form, of tolerably regular contour, interrupted only by a large and long peninsula which projects from the eastern shore, near its southern end, and virtually divides the expanse of the water into two portions, connected by a long, narrow,

and somewhat devious, passage. Its water surface is from N. to S. as nearly as possible 40 geographical, or 46 English miles long. Its greatest width (some 3 miles S. of *Ain Jidy*) is about 9 geogr. miles, or 10½ Eng. miles. The ordinary area of the upper portion is about 174 square geogr. miles; of the channel 29; and of the lower portion, hereafter styled "the lagoon," 46; in all about 250 square geographical miles. At its northern end the lake receives the stream of the Jordan: on its Eastern side the *Zūrka Ma'n* (the ancient Callirrhoe, and possibly the more ancient en-Eglaim), the *Mojib* (the Arnon of the Bible), and the *Beni-Hemād*. On the South the *Kurāhy* or *el-Ahzy*; and on the West that of *Ain Jidy*. These are probably all perennial, though variable, streams; but, in addition, the beds of the torrents which lead through the mountains East and West, and over the flat shelving plains on both North and South of the lake, show that in the winter a very large quantity of water must be poured into it.

There are also all along the western side a considerable number of springs, which appear to run continually, and all find their way into its waters. The lake has no visible outlet. 3. Excepting the last circumstance, nothing has yet been stated about the Dead Sea that may not be stated of numerous other inland lakes. The depression of its surface, however, and the depth which it attains below that surface, combined with the absence of any outlet, render it one of the most remarkable spots on the globe. According to the observations of Lieut. Lynch, the surface of the lake in May 1848 was 1316·7 feet below the level of the Mediterranean at Jaffa, and although we cannot absolutely rely on the accuracy of that dimension, still there is reason to believe that it is not very far from the fact. The measurements of the depth of the lake taken by the same party are probably more trustworthy. The upper portion is a perfect basin, descending rapidly till it attains, at about one-third of its length from the north end, a depth of 1308 feet. Immediately west of the upper extremity of the peninsula, however, this depth decreases suddenly to 336 feet, then to 114, and by the time the west point of the peninsula is reached, to 18 feet. Below this the southern portion is a mere lagoon of almost even bottom, varying in depth from 12 feet in the middle to 3 at the edges. 4. The level of the lake is liable to variation according to the season of the year. Since it has no outlet, its level is a balance struck between the amount of water poured into it, and the amount given off by evaporation. If more water is supplied than the evaporation can carry off, the lake will rise until the evaporating surface is so much increased as to restore the balance. On the other hand, should the evaporation drive off a larger quantity than the supply, the lake will descend until the surface becomes so small as again to restore the balance. The extreme differences in level resulting from these causes have not yet been carefully observed. 5. The change in level necessarily causes a change in the dimensions of the lake. This will chiefly affect the southern end. The shore of that part slopes up from the water with an extremely gradual incline. Over so flat a beach a very slight rise in the lake would send the water a considerable distance. Dr. Anderson, the geologist of the American expedition, conjectured that the water occasionally extended as much as 8 or 10 miles south of its then position. On the peninsula, the acclivity of which is much greater than that of the southern shores of the lagoon, and in the early part of the summer (June 2), Irby and Mangles found the "high-water mark a mile distant from the water's edge." At the northern end the shore being steeper, the water-line probably remains tolerably constant. The variation in breadth will not be so much. 6. The mountains which form the walls of the great fissure in whose depths the lake is contained, continue a nearly parallel course throughout its entire length. Viewed from the beach at the northern end of the lake—the only view within the reach of most travellers—there is little perceptible difference between the two ranges. Each is equally bare and stern to the eye. 7. Of the eastern side but little is known. One traveller in modern times (Seetzen) has succeeded in forcing his way along its whole length. Both Dr. Robinson from *Ain Jidy* (i. 502), and Lieut. Molyneux (127) from the surface of the lake, record their impression that the eastern mountains are much more

lofty than the western, and much more broken by clefts and ravines. In colour they are brown, or red,—a great contrast to the grey and white tones of the western mountains. Both sides of the lake, however, are alike in the absence of vegetation—almost entirely barren and scorched. 8. Seetzen's journey, just mentioned, was accomplished in 1807. He started in January from the ford of the Jordan through the upper country, by *Mhaur*, *Attarrus*, and the ravine of the *Wady Mojib* to the peninsula; returning immediately after by the lower level, as near the lake as it was possible to go. He was on foot with but a single guide. He represents the general structure of the mountains as limestone, capped in many places by basalt, and having at its foot a red ferruginous sand-tone, which forms the immediate margin of the lake. The rocks lie in a succession of enormous terraces, apparently more vertical in form than those on the west. The streams of the *Mojib* and *Zirka* issue from portals of dark red sandstone of romantic beauty, the overhanging sides of which no ray of sun ever enters. Palms are numerous; but except near the streams, there is no vegetation. 9. One remarkable feature of the northern portion of the eastern heights is a plateau which divides the mountains halfway up, apparently forming a gigantic landing-place in the slope, and stretching northwards from the *Wady Zirka Mu'tn*. 10. The western shores of the lake have been more investigated than the eastern, although they cannot be said to have been yet more than very partially explored. Two travellers have passed over their entire length:—De Saulcy in January 1851, from North to South, *Voyage dans la Syrie*, &c., 1853; and *Narrative of a Journey*, &c., London, 1854; and Poole in Nov. 1856, from South to North (*Geogr. Journal*, xxvi. 55). Others have passed over considerable portions of it, and have recorded observations both with pen and pencil. 11. The western range preserves for the greater part of its length a course hardly less regular than the eastern. That it does not appear so regular when viewed from the north-western end of the lake is owing to the projection of a mass of the mountain eastward from the line sufficiently far to shut out from view the range to the south of it. It is Dr. Robinson's opinion that the projection consists of the *Ris el Feshkhah* and its "adjacent cliffs" only. But it seems probable that the projection really commences further south, at the *Ras Mersed*, north of *Ain Jidy*. 12. The accompanying woodcut represents the view looking southward from the spring of *Ain Jidy*, a point about 700 feet above the water. It is taken from a drawing by the accurate pencil of Mr. Tipping, and gives a good idea of the course of that portion of the western heights, and of their ordinary character. 13. The portion actually represented in this view is described by Dr. Anderson as "varying from 1200 to 1500 feet in height, bold and steep, admitting nowhere of the ascent or descent of beasts of burden, and practicable only here and there to the most intrepid climber." 14. Further south the mountain-sides assume a more abrupt and savage aspect, and in the *Wady Zuweirah*, and still more at *Sebbek*—the ancient *Marada*—reach a pitch of rugged and repulsive, though at the same time impressive, desolation, which perhaps cannot be exceeded anywhere on the face of the earth. 15. The region which lies on the top of the western heights was probably at one time a wide table-land, rising

THE DEAD SEA.—View from *Ain Jidy*, looking South. From a drawing made on the spot in 1894, by W. Tipping, Esq.

gradually towards the high lands which form the central line of the country. It is now cut up by deep and difficult ravines, separated by steep and inaccessible summits; but portions of the table-lands still remain in many places to testify to the original conformation. The material is a soft cretaceous limestone. The surface is entirely desert, with no sign of cultivation. 16. Of the elevation of this region we hitherto possess but scanty observations. Between *Ain Jidy* and *Ain Terâbeh* the summit is a table-land 740 feet above the lake. Further north, above *Ain Terâbeh*, the summit of the pass is 1305·75 feet above the lake, within a few feet the height of the plain between the *Wady en-Nar* and *Goumran*, which is given by Mr. Poole at 1340 feet. 17. A beach of varying width skirts the foot of the mountains on the western side. Above *Ain Jidy* it consists mainly of the deltas of the torrents—fan-shaped banks of *débris* of all sizes, at a steep slope, spreading from the outlet of the torrent like those which become so familiar to travellers, in Northern Italy for example. In one or two places—as at the mouth of the Kidron and at *Ain Terâbeh*—the beach may be 1000 to 1400 yards wide, but usually it is much narrower, and often is reduced to almost nothing by the advance of the headlands. For its major part, as already remarked, it is impassable. Below *Ain Jidy*, however, a marked change occurs in the character of the beach. Alternating with the shingle, solid deposits of a new material, soft friable chalk, marl, and gypsum, with salt, begin to make their appearance. The width of the beach thus formed is considerably greater than that above *Ain Jidy*. From the *Birket el-Khûlîd* to the wady south of *Saltah*, a distance of six miles, it is from one to

two miles wide, and is passable for the whole distance. One feature of the beach is too characteristic to escape mention—the line of driftwood which encircles the lake, and marks the highest, or the ordinary high, level of the water. 18. At the south-west corner of the lake, below where the wadys *Zuweirah* and *Mahawat* break down through the enclosing heights, the beach is encroached on by the salt mountain or ridge of *Khashm Usdum*. This remarkable object is hitherto but imperfectly known. It is a long level ridge or dyke, of several miles long. Its northern portion runs S.S.E.; but after more than half its length it makes a sudden and decided bend to the right, and then runs S.W. It is from 300 to 400 feet in height, of inconsiderable width, consisting of a body of crystallized rock-salt, more or less solid, covered with a capping of chalky limestone and gypsum. The lower portion, the salt rock, rises abruptly from the glossy plain at its eastern base, sloping back at an angle of not more than 45°, often less. Between the north end of *K. Usdum* and the lake is a mound covered with stones and bearing the name of *um-Zoghul*. It is about 60 feet in diameter and 10 or 12 high, evidently artificial, and not improbably the remains of an ancient structure. 19. It follows from the fact that the lake occupies a portion of a longitudinal depression, that its northern and southern ends are not enclosed by highland, as its east and west sides are. The floor of the Ghor or Jordan Valley has been already described. [PALESTINE.] 20. A small piece of land lies off the shore about halfway between the entrance of the Jordan and the western side of the lake. It is nearly circular in form. Its sides are sloping, and therefore its size varies with the height of the water. When the writer went to it

in Sept. 1858, it was about 100 yards in diameter, 10 or 12 feet out of the water, and connected with the shore by a narrow neck or isthmus of about 100 yards in length. 21. Beyond the island the north-western corner of the lake is bordered by a low plain, extending up to the foot of the mountains of *Noby Musa*, and south as far as *Ras Fesh-khah*. This plain must be considerably lower than the general level of the land north of the lake, since its appearance implies that it is often covered with water. A similar plain (the *Ghór el-Belka*, or *Ghór Seisaban*) appears to exist on the N.E. corner of the lake between the embouchure of the Jordan and the slopes of the mountains of Moab. 22. The southern end is like the northern, a wide plain, and like it retains among the Arabs the name of *El Ghór*. It has been visited by but few travellers. The plain is bounded on the west side, below the *Khashm Usdum*, by a tract thickly studded with a confused mass of unimportant eminences, "low cliffs and conical hills," of chalky indurated marl. In height they vary from 50 to 150 feet. In colour they are brilliant white. 23. The waters of two-thirds of the *Arabah* drain northwards into the plain at the south of the lake, and thence into the lake itself. The *Wady el Jeb*—the principal channel by which this vast drainage is discharged on to the plain—is very large, "a huge channel," "not far from half a mile wide," "bearing traces of an immense volume of water, rushing along with violence, and covering the whole breadth of the valley." The body of detritus discharged by such a river must be enormous. 24. Of the eastern boundary of the plain we possess hardly any information. We know that it is formed by the mountains of Moab, and we can just discern that, adjacent to the lake, they consist of sandstone, red and yellow, with conglomerate containing porphyry and granite. 25. Of the plain itself hardly more is known than of its boundaries. Its greatest width from W. to E. is estimated at from 5 to 6 miles, while its length from the cave in the salt mountain to the range of heights on the south, appears to be about 8. Thus the breadth of the *Ghór* seems to be here considerably less than it is anywhere north of the lake, or across the lake itself. That part of it which more immediately adjoins the lake consists of two very distinct sections, divided by a lane running nearly N. and S. Of these the western is a region of salt and barrenness, bounded by the salt mountain of *Khashm Usdum*. Near the lake it bears the name of *es Sabkah*, i. e. the plain of salt mud. 26. To this the eastern section of the plain is an entire contrast. A dense thicket of reeds, almost impenetrable, divides it from the *Sabkah*. This part, the aspect of the land completely changes. It is a thick copse of shrubs similar to that around Jericho, and, like that, cleared here and there in patches where the *Ghawartneh*, or Arabs of the *Ghór*, cultivate their wheat and durra, and set up their wretched villages. The variety of trees appears to be remarkable. Here, as at Jericho, the secret of this vegetation is an abundance of fresh water acting on a soil of extreme richness. This district, so well wooded and watered, is called the *Ghór es-Safieh*. Its width is less than that of the *Sabkah*. 27. The eastern mountains which form the background to this district of woodland, are no less naked and rugged than those on the opposite side of the valley. They consist, according to the reports of Seetzen, Poole, and Lynch, of a red sand-

stone, with limestone above it—the sandstone is horizontal strata with vertical cleavage. Of their height nothing is known, but all travellers concur in estimating them as higher than those on the west, and as preserving a more horizontal line to the south. After passing from the *Ghór es-Safieh* to the north, a salt plain is encountered resembling the *Sabkah*, and like it overflowed by the lake when high. 28. We have now arrived at the peninsula which projects from the eastern shore and forms the north enclosure of the lagoon. Among the Arabs it appears to bear the names *Ghór el Mez-ra'ah* and *Ghór el Lisán*. 29. Its entire length from north to south is about 10 geogr. miles—and its breadth from 5½ to 6—though these dimensions are subject to some variation according to the time of year. It appears to be formed entirely of recent aqueous deposits, late or post-tertiary, very similar, if not identical, with those which face it on the western shore, and with the "mounds" which skirt the plains at the south and N.W. of the lake. It consists of a friable carbonate of lime intermixed with sand or sandy marls, and with frequent masses of sulphate of lime (gypsum). The whole is impregnated strongly with sulphur, and also with salt. At the north it is worn into a short ridge or mane, with very steep sides and serrated top. Towards the south the top widens into a table-land. A scanty growth of shrubs, so scanty as to be almost invisible, is found over the table-land. 30. There seems no reason to doubt that this peninsula is the remnant of a bed of late aqueous strata which were deposited at a period when the water of the lake stood very much higher than it now does, but which, since it attained its present level, and thus exposed them to the action of the winter torrents, are gradually being disintegrated and carried down into the depths of the lake. It may have been deposited either by the general action of the lake, or by the special action of a river, possibly in the direction of *Wady Kerak*. 31. The extraordinary difference between the depth of the two portions of the lake—north and south of the peninsula—has been already alluded to. The former is a bowl, which at one place attains the depth of more than 1300 feet, while the average depth along its axis may be taken as not far short of 1000. On the other hand the southern portion is a flat plain, with the greater part of its area nearly level, a very few feet only below the surface. 32. Thus the circular portion below the peninsula, and a part of the channel, form a mere lagoon, entirely distinct and separate from the basin of the lake proper. This portion, and the plain at the south as far as the rise or offset at which the *Arabah* commences—a district in all of some 16 miles by 8—would appear to have been left by the last great change in the form of the ground at a level not far below its present one, and consequently much higher than the bottom of the lake itself. But surrounded as it is on three sides by highlands, the waters of which have no other outlet, it has become the delta into which those waters discharge themselves. It is difficult to speak with confidence on any of the geological features of the lake, in the absence of reports by competent observers. But the theory that the lagoon was lowered by a recent change, and overflowed, seems directly contrary to the natural inference from the fact that such large torrents discharge themselves into that spot. 33. The water of the lake is not less remarkable than its other

features. Its most obvious peculiarity is its great weight. Its specific gravity has been found to be as much as 12.28; that is to say, a gallon of it would weigh over 12½ lbs. instead of 10 lbs., the weight of distilled water. Water so heavy must not only be extremely buoyant, but must possess great inertia. Its buoyancy is a common theme of remark by the travellers who have been upon it or in it. Dr. Robinson "could never swim before, either in fresh or salt water," yet here he "could sit, stand, lie, or swim without difficulty" (*B. R.* i. 506). 34. So much for its buoyancy. Of its weight and inertia the American expedition had also practical experience. In the gale in which the party were caught on their first day on the lake, between the mouth of the Jordan and *Ain Feshkah*, "it seemed as if the bows of the boats were encountering the sledge-hammers of the Titans." At ordinary times there is nothing remarkable in the action of the surface of the lake. Its waves rise and fall, and surf beats on the shore, just like the ocean. 35. One or two phenomena of the surface may be mentioned. Many of the old travellers, and some modern ones, mention that the turbid yellow stream of the Jordan is distinguishable for a long distance in the lake. The haze or mist which perpetually broods over the water has been already mentioned. It is the result of the prodigious evaporation. 36. The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. From the analysis of the U. S. expedition it appears that each gallon of the water, weighing 12½ lbs., contains nearly 3½ lbs. (3.319) of matter in solution—an immense quantity when we recollect that sea-water, weighing 10½ lbs. per gallon, contains less than ½ a lb. Of this 3½ lbs. nearly 1 lb. is common salt (chloride of sodium); about 2 lbs. chloride of magnesium, and less than ½ a lb. chloride of calcium (or muriate of lime). The most unusual ingredient is bromide of magnesium, which exists in truly extraordinary quantity. 37. The sources of the components of the water may be named generally without difficulty. The lime and magnesia proceed from the dolomitic limestone of the surrounding mountains; from the gypsum which exists on the shores, nearly pure, in large quantities; and from the carbonate of lime and carbonate of magnesia found on the peninsula and elsewhere. The chloride of sodium is supplied from *Akushm Usdum*, and the copious brine springs on both shores. Balls of nearly pure sulphur (probably the deposit of some sulphurous stream) are found in the neighbourhood of the lake, on the peninsula, on the western beach and the north-western heights, and on the plain S. of Jericho. Manganese, iron, and alumina have been found on the peninsula, and the other constituents are the product of the numerous mineral springs which surround the lake, and the washings of the aqueous deposits on the shores, which are gradually restoring to the lake the salts they received from it ages back when covered by its waters. The strength of these ingredients is heightened by the continual evaporation. 38. It has been long supposed that no life whatever existed in the lake. But recent facts show that some inferior organizations can and do find a home even in these salt and acrid waters. The Cabinet d'Hist. Naturelle at Paris contains a fine specimen of a coral called *Stylophora pistillata*, which is stated to have been brought from the lake in 1837 by the Marq. de l'Escalopier, and has every

appearance of having been a resident there, and not an ancient or foreign specimen. Ehrenberg discovered 11 species of Polygaster, 2 of Polythalamia, and 5 of Phytolithariae, in mud and water brought home by Lepsius. The copious phosphorescence mentioned by Lynch is also a token of the existence of life in the waters. The ducks seen diving by Poole must surely have been in search of some form of life, either animal or vegetable. 39. The statements of ancient travellers and geographers to the effect that no living creature could exist on the shores of the lake, or bird fly across its surface, are amply disproved by later travellers. The cane brakes of *Ain Feshkah*, and the other springs on the margin of the lake, harbour snipe, partridges, ducks, nightingales; and other birds, as well as frogs; hawks, doves, and hares are found along the shore, and the thickets of *Ain Jidy* contain innumerable birds." 40. Of the temperature of the water more observations are necessary before any inferences can be drawn. Lynch states that a stratum at 59° Fahr. is almost invariably found at 10 fathoms below the surface. Between *Wady Zūrka* and *Ain Terdebeh* the temp. at surface was 76°, gradually decreasing to 62° at 1044 ft. deep, with the exception just named. At other times, and in the lagoon, the temp. ranged from 82° to 90°, and from 5° to 10° below that of the air. 41. Nor does there appear to be anything inimical to life in the atmosphere of the lake or its shores, except what naturally proceeds from the great heat of the climate. The *Ghacdrineh* and *Rushakleh* Arabs, who inhabit the southern and western sides and the peninsula, are described as a poor stunted race; but this is easily accounted for by the heat and relaxing nature of the climate, and by their meagre way of life, without inferring anything specially unwholesome in the exhalations of the lake. 42. Of the Botany of the Dead Sea little or nothing can be said. Dr. Hooker, in his portion of the article PALESTINE, has spoken of the vegetation of the *Ghór* in general, and of that of *Ain Jidy* and the N.W. shore of the lake in particular. Beyond these, the only parts of the lake which he explored, nothing accurate is known. A few plants are named by Setzen as inhabiting the *Ghór es-Safieh* and the peninsula. 43. Of the Zoology of the shores, it is hardly too much to say that nothing is known. The birds and animals mentioned by Lynch and Robinson have been already named, but their accurate identification must await the visit of a traveller versed in natural history. 44. The appearance of the lake does not fulfil the idea conveyed by its popular name, "The Dead Sea," says a recent traveller, 'did not strike me with that sense of desolation and dreariness which I suppose it ought. I thought it a pretty, smiling lake—a nice ripple on its surface.'" Setzen, in a lengthened and unusually enthusiastic passage extols the beauties of the view from the delta at the mouth of the *Wady Mojiš*, and the advantages of that situation for a permanent residence. 45. The truth lies, as usual, somewhere between these two extremes. On the one hand the lake certainly is not a gloomy, deadly, smothering gulf. In this respect it does not at all fulfil the promise of its name. At sunrise and sunset the scene must be astonishingly beautiful. Every one who has been in the West of Scotland knows what extraordinary pictures are sometimes seen mirrored in the sea-water lochs when they lie

unruffled in the calm of early morning or of sunset. The reflexions from the bosom of the Dead Sea are said to surpass those, as far as the hues of the mountains which encircle it, when lit up by the gorgeous rising and setting suns of Syria, surpass in brilliancy and richness those of the hills around Loch Fyne and Loch Goyle. But on the other hand, there is something in the prevalent sterility and the dry, burnt, look of the shores, the overpowering heat, the occasional smell of sulphur, the dreary salt marsh at the southern end, and the fringe of dead driftwood round the margin, which must go far to excuse the title which so many ages have attached to the lake, and which we may be sure it will never lose. 46. It does not appear probable that the condition or aspect of the lake in biblical times was materially different from what it is at present. Other parts of Syria may have deteriorated in climate and appearance owing to the destruction of the wood which once covered them, but there are no traces either of the ancient existence of wood in the neighbourhood of the lake, or of anything which would account for its destruction supposing it to have existed. When Machaerus and 'Allirhoë were inhabited, and when the plain of Jericho was occupied with the crowded population necessary for the cultivation of its balsam-gardens, vineyards, sugar-plantations, and palm-groves, there may have been a little more life on the shores. But this can never have materially affected the lake. 47. The connexion between this singular lake and the Biblical history is very slight. In the topographical records of the Pentateuch and the Book of Joshua, it forms one among the landmarks of the boundaries of the whole country as well as of the inferior divisions of Judah and Benjamin. As a landmark it is once named in what appears to be a quotation from a lost work of the prophet Jonah (2 K. xiv. 25), itself apparently a reminiscence of the old Mosaic statement (Num. xxxiv. 8, 12). Besides this the name occurs once or twice in the imagery of the Prophets. In the New Testament there is not even an allusion to it. There is, however, one passage in which the "Salt Sea" is mentioned in a different manner to any of those already quoted, viz., as having been in the time of Abraham the Vale of Siddim (Gen. xiv. 3). 48. Now the evidence of the spot is sufficient to show that no material change has taken place in the upper and deeper portion of the lake for a period very long anterior to the time of Abraham. In the lower portion—the lagoon and the plain below it—if any change has occurred, it appears to have been rather one of reclamation than of submersion—the gradual silting up of the district by the torrents which discharge their contents into it. Owing to the gentle slope of the plain, temporary fluctuations in the level of the lake would affect this portion very materially; and it is quite allowable to believe that a few wet winters followed by cold summers, would raise the level of the lake sufficiently to lay the whole of the district south of the lagoon under water, and convert it for the time into a part of the "Salt Sea." Such an exceptional state of things the writer of the words in Gen. xiv. 3 may have witnessed and placed on record. 49. This is merely stated as a possible explanation; and it assumes the Vale of Siddim to have been the plain at the south end of the lake, for which there is no evidence. But it seems to the writer more natural to believe that the author of this note on a document which

even in his time was probably of great antiquity, believed that the present lake covered a district which in historic times had been permanently habitable dry land. Such was the implicit belief of the whole modern world—with the exception perhaps of Ireland—till within less than half a century. At the same time it must not be overlooked that the passage in question is the only one in the whole Bible—Old Testament, Apocrypha, or New Testament—to countenance the notion that the cities of the plain were submerged: a notion which the present writer has endeavoured elsewhere [SIDDIM; SODOM; ZOAR] to show does not date earlier than the Christian era. 50. The writer has there also attempted to prove that the belief which prompted the statements just quoted from modern writers, viz. that the Dead Sea was formed by the catastrophe which overthrew the "Cities of the Plain"—is a mere assumption. It is not only unsupported by Scripture, but is directly in the teeth of the evidence of the ground itself. Of the situation of those cities we only know that, being in the "Plain of the Jordan," they must have been to the north of the lake. Of the catastrophe which destroyed them, we only know that it is described as a shower of ignited sulphur descending from the skies. Its date is uncertain, but we shall be safe in placing it within the limit of 2000 years before Christ. The destruction of Sodom and Gomorrah may have been by volcanic action, but it may be safely asserted that no traces of it have yet been discovered, and that, whatever it was, it can have had no connexion with that far vaster and far more ancient event which opened the great valley of the Jordan and the Dead Sea, and at some subsequent time cut it off from communication with the Red Sea by forcing up between them the tract of the *Wady Arabah*.

SEAL. The importance attached to seals in the East is so great that without one no document is regarded as authentic. The use of some method of sealing is obviously, therefore, of remote antiquity. Among such methods used in Egypt at a very early period were engraved stones, pierced through their length and hung by a string or chain from the arm or neck, or set in rings for the finger. The most ancient form used for this purpose was the scarabaeus, formed of precious or common stone, or even of blue pottery or porcelain, on the flat side of which the inscription or device was engraved. Cylinders of stone or pottery bearing devices were also used as signets. But in many cases the seal consisted of a lump of clay, impressed with the seal and attached to the document, whether of papyrus or other material, by strings. The use of clay in sealing is noticed in the Book of Job (xxxviii. 14), and the signet-ring as an ordinary part of a man's equipment in the case of Judah (Gen. xxxviii. 18), who probably, like many modern Arabs, wore it suspended by a string from his neck or arm (Cant. viii. 6). The ring or the seal as an emblem of authority both in Egypt, in Persia, and elsewhere, is mentioned in the cases of Pharaoh with Joseph (Gen. xli. 42), of Ahab (1 K. xxi. 8), of Ahasuerus (Esth. iii. 10, 12, viii. 2), of Darius (Dan. vi. 17; also 1 Macc. vi. 15), and as an evidence of a covenant in Jer. xxxii. 10, 54; Neh. ix. 38, x. 1; Hag. ii. 23. Its general importance is denoted by the metaphorical use of the word, Rev. v. 1, ix. 4. Engraved signets were in use among the Hebrews in early times, as is evident in the de-

scription of the high-priest's breastplate, Ex. xxviii. 11, 36, xxxix. 6, and the work of the engraver as a distinct occupation is mentioned in Eccles. xxxviii. 27.

Seba (pl. *Sebaim*): A. V. incorrectly rendered *SABEANS*), heads the list of the sons of Cush. The list of the sons of Cush seems to indicate the position of the Cushite nation or country Seba. Nimrod, who is mentioned at the close of the list, ruled at first in Babylonia, and apparently afterwards in Assyria: of the names enumerated between Seba and Nimrod, it is highly probable that some belong to Arabia. We thus may conjecture a curve of Cushite settlements, one extremity of which is to be placed in Babylonia, the other, if prolonged far enough in accordance with the mention of the African Cush, in Ethiopia. The more exact position of Seba will be later discussed. Besides the mention of Seba in the list of the sons of Cush (Gen. x. 7; 1 Chr. i. 9), there are but three, or, as some hold, four notices of the nation (Ps. lxxii. 10; Is. xliii. 3, xlv. 14). The doubtful notice is in Ezekiel, in a difficult passage; "and with men of the multitude of Adam [were] brought drunkards [but the Keri reads 'people of Seba'] from the wilderness, which put bracelets upon their hands, and beautiful crowns upon their heads" (xxii. 42). The first clause would seem to favour the idea that a nation is meant, but the reading of the text is rather supported by what follows the mention of the "drunkards," i.e., passages seem to show (if we omit the last) that Seba was a nation of Africa, bordering on or included in Cush, and in Solomon's time independent and of political importance. We are thus able to conjecture the position of Seba. No ancient Ethiopian kingdom of importance could have excluded the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the Empire, and have laid the basis of that power that made *SHEBEK*, or *Sabaco*, able to conquer Egypt, and found the Ethiopian dynasty which ruled that country as well as Ethiopia. Josephus says that Seba was the ancient name of the Ethiopian island and city of Meroë, but he writes Seba, in the notice of the Noachian settlements, *Sabas*. The island of Meroë lay between the *Astaboras*, the *Atbara*, the most northern tributary of the Nile, and the *As-tapus*, the *Bahr el-Azrak* or "Blue River," the eastern of its two great confluents; it is also described as bounded by the *Astaboras*, the *As-tapus*, and the *Asasobas*, the latter two uniting to form the Blue River, but this is essentially the same thing. It was in the time of the kingdom rich and productive. The chief city was Meroë, which was an oracle of Jupiter Ammon. The remains of the city Meroë have not been identified with certainty.

Se'bat [MONTH.]

Se'acah. One of the six cities of Judah which were situated in the *Midbar* ("wilderness"), that is the tract bordering on the Dead Sea (Josh. xv. 61). Its position is not known.

Sechenias. 1. *SHECHANIAH* 2 (1 Esd. viii. 29).—2. *SHECHANIAH* 3 (1 Esd. viii. 32).

Se'chu. A place mentioned once only (1 Sam. xix. 22), apparently as lying on the route between Saul's residence, Gibeah, and Ramah (Ramathaim Zophim), that of Samuel. It was notorious for "the great well" (or rather cistern) which it con-

tained. Assuming that Saul started from Gibeah (*Tulcil el-Fid*), and that *Neby Samuil* is Ramah, then *Bir Neballa* (the well of Neballa), alleged by a modern traveller to contain a large pit, would be in a suitable position for the great well of Sechu.

Secur'dus was a Thessalonian who went with the Apostle Paul from Corinth as far as Asia, on his return to Jerusalem from his third missionary tour (see Acts xx. 4).

Sede'ias. 1. The father of Maaseiah (Bar. i. 1), and apparently identical with the false prophet in Jer. xxix. 21, 22.—2. Zedekiah, king of Judah (Bar. i. 8).

Seer. [PROPHET].

Se'gub. 1. The youngest son of Hiel the Bethelite, who rebuilt Jericho (1 K. xvi. 34).—2. Son of Hezion (1 Chr. ii. 21, 22).

Seir, Mount. We have both "land of Seir" (Gen. xxii. 3, xxxvi. 30), and "Mount Seir" (Gen. xiv. 6). 1. The original name of the mountain ridge extending along the east side of the valley of Arabah, from the Dead Sea to the Elanitic Gulf. The name may either have been derived from Seir the Horite, who appears to have been the chief of the aboriginal inhabitants (Gen. xxxvi. 20), or, what is perhaps more probable, from the rough aspect of the whole country. The name *Gebala*, or *Gabalene*, was applied to this province by Josephus, and also by Eusebius and Jerome. The northern section of Mount Seir, as far as Petra, is still called *Jebal*, the Arabic form of *Gabal*. The Mount Seir of the Bible extended much farther south than the modern province, as is shown by the words of Deut. ii. 1-8. It had the Arabah on the west (vers. 1 and 8); it extended as far south as the head of the Gulf of Akabah (ver. 8); its eastern border ran along the base of the mountain range where the plateau of Arabia begins. Its northern border is not so accurately determined. The land of Israel, as described by Joshua, extended from "the Mount Halak that goeth up to Seir, even unto Baal Gad" (Josh. xi. 17). As no part of Edom was given to Israel, Mount Halak must have been upon its northern border. Now there is a line of "naked" (*halak* signified "naked") white hills or cliffs which runs across the great valley about eight miles south of the Dead Sea, forming the division between the Arabah proper and the deep Ghor north of it. The view of these cliffs, from the shore of the Dead Sea, is very striking. They appear as a line of hills shutting in the valley, and extending up to the mountains of Seir. The impression left by them on the mind of the writer was that this is the very "Mount Halak that goeth up to Seir."

2. An entirely different place from the foregoing; one of the landmarks on the north boundary of the territory of Judah (Josh. xv. 19 only). It lay westward of Kirjath-jearim, and between it and Beth-shemesh. If *Kuriet el Enab* be the former, and *Ain-shems* the latter of these two, then Mount Seir cannot fail to be the ridge which lies between the *Wady Alya* and the *Wady Ghurgb*. How the name of Seir came to be placed so far to the north of the main seats of the Seirites we have no means of knowing. Perhaps, like other names occurring in the tribe of Benjamin, it is a monument of an incursion by the Edomites which has escaped record. But it is more probable that it derived its name from some peculiarity in the form or appearance of the spot.

Seir'ath. The place to which Ehud fled after his

murder of Eglon (Judg. iii. 26, 27). It was in "Mount Ephraim" (27), a continuation, perhaps, of the same wooded shaggy hills (such seems to be the signification of *Seir* and *Seirath*) which stretched on so far south as to enter the territory of Judah (Josh. xv. 10). It has hitherto escaped observation in modern times.

Sela and **Se'lah**, 2 K. xiv. 7; Is. xvi. 1: rendered "the rock" in the A. V., in Judg. i. 36, 2 Chr. xxv. 12, Obad. 3. Probably the city later known as Petra, the ruins of which are found about two days' journey N. of the top of the gulf of Akaba, and three or four S. from Jericho. It was in the midst of Mount Seir, in the neighbourhood of Mount Hor, and therefore Edomite territory, taken by Amaziah, and called JOKTHEEL. In the end of the fourth century B.C. it appears as the head-quarters of the Nabatheans, who successfully resisted the attacks of Antigonos. About 70 B.C. Petra appears as the residence of the Arab princes named Aretas. It was by Trajan reduced to subjection to the Roman empire. The city Petra lay, though at a high level, in a hollow shut in by mountain-cliffs, and approached only by a narrow ravine through which, and across the city's site, the river winds.

Sela-Ham-Mahlekoth (i.e. "the cliff of escapes" or "of divisions"). A rock or cliff in the wilderness of Maon, the scene of one of those remarkable escapes which are so frequent in the history of Saul's pursuit of David (1 Sam. xxiii. 28). No identification has yet been suggested.

Selah. This word, which is only found in the poetical books of the Old Testament, occurs seventy-one times in the Psalms, and three times in Habakkuk. In sixteen Psalms it is found once, in fifteen twice, in seven three times, and in one four times—always at the end of a verse, except in Ps. lv. 19 [20], lvii. 3 [4], and Hab. iii. 3, 9, where it is in the middle, though at the end of a clause. All the Psalms in which it occurs, except eleven (iii. vii. xxiv. xxxii. xlviii. l. lxxxii. lxxxiii. lxxxvii. lxxxix. cxlii.), have also the musical direction, "to the Chief Musician" (comp. also Hab. iii. 19); and in these exceptions we find the words *mizmor* (A. V. "Psalm"), *Shiggaion*, or *Maschil*, which sufficiently indicate that they were intended for music. Besides these, in the titles of the Psalms in which *Selah* occurs, we meet with the musical term *Alamoth* (lxvi.), *Altaschith* (lvii. lix. lxxv.), *Gittith* (lxxxi. lxxxiv.), *Mahalath Leannoth* (lxxxviii.), *Michtam* (lvii. lix. lx.), *Negmah* (lxi.), *Neginoth* (iv. liv. lv. lxxvii. lxxvi.; comp. Hab. iii. 19), and *Shushan-eduth* (lx.); and on this association alone might be formed a strong presumption that, like these, *Selah* itself is a term which had a meaning in the musical nomenclature of the Hebrews. What that meaning may have been is now a matter of pure conjecture. In by far the greater number of instances the Targum renders the word by "for ever," "for ever and ever." In Ps. xlix. 13 [14] it has "for the world to come;" in Ps. xxxix. 5 [6], "for the life everlasting;" and in Ps. cxl. 5 [6], "continually." This interpretation, which is the one adopted by the majority of Rabbinical writers, is purely traditional, and based upon no etymology whatever. It is followed by Aquila, Symmachus, Theodotion, Jerome, and the Peshito Syriac in some instances. That this rendering is manifestly inappropriate in some passages, as for instance Ps. xxi. 2 [3], xxxii. 4, lxxxi. 7 [8], and Hab. iii. 3, and

superfluous in others, as Ps. xlv. 8 [9], lxxxiv. 4 [5], lxxxix. 4 [5], was pointed out long since by Aben Ezra. In the Psalms the uniform rendering of the LXX. is *διδύχαλα*. The Vulgate omits it entirely. The rendering *διδύχαλα* of the LXX. and other translators is in every way as traditional as that of the Targum "for ever," and has no foundation in any known etymology. With regard to the meaning of *διδύχαλα* itself there is great doubt. Jerome enumerates the various opinions which have been held upon the subject; that *diapsalma* denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Others, he says, regard it as indicating a difference of rhythm, and the silence of some kind of music in the choir. On the whole, the rendering *διδύχαλα* rather increases the difficulty, for it does not appear to be the true meaning of *Selah*, and its own signification is obscure. Leaving the Versions and the Fathers, we come to the Rabbinical writers, the majority of whom follow the Targum and the dictum of R. Eliezer in rendering *Selah* "for ever." But Aben Ezra (on Ps. iii. 3) showed that in some passages this rendering was inappropriate, and expressed his own opinion that *Selah* was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth. Kimchi explained it as a musical term, signifying a raising or elevating the voice. Among modern writers there is the same diversity of opinion. Gesenius derives *Selah* from *sālāh*, to suspend. In accordance with his derivation, he interprets *Selah* to mean either, "suspend the voice," that is, "be silent," a hint to the singers; or "raise, elevate the stringed instruments." In either case he regards it as denoting a pause in the song, which was filled up by an interlude played by the choir of Levites. Ewald arrives at substantially the same result by a different process. He regards the phrase "Higgaion, *Selah*," in Ps. ix. 16 [17], as the full form, signifying "music, strike up!"—an indication that the voices of the choir were to cease while the instruments alone came in. Heugstenberg follows Gesenius, De Wette, and others, in the rendering *pause*! but refers it to the contents of the psalm, and understands it of the silence of the music in order to give room for quiet reflection. If this were the case, *Selah* at the end of a psalm would be superfluous. The same meaning of *pause* or *end* is arrived at by Fürst. Davidson says:—"The word denotes *elevation* or *ascent*, i.e. *loud*, *clear*. The music which commonly accompanied the singing was soft and feeble. In cases where it was to burst in more strongly during the silence of the song, *Selah* was the sign. At the end of a verse or strophe, where it commonly stands, the music may have readily been strongest and loudest." Augusti thought it was an exclamation, like *hallelujah*! and the same view was taken by the late Prof. Lee, who classes it among the interjections, and renders it *praise*! Beyond the fact that *Selah* is a musical term, we know absolutely nothing about it, and are entirely in the dark as to its meaning.

Sel'ed. One of the sons of Nadab, a descendant of Jerahmeel (1 Chr. ii. 30).

Selemi'a. One of the five men "ready to write swiftly," whom Esdras was commanded to take (2 Esd. xiv. 24).

Selemi'as. SHELEMIAH 1 (1 Esd. ix. 34).

Seleucia. near the mouth of the Orontes, was practically the seaport of ANTIOCH. The distance

between the two towns was about 16 miles. We are expressly told that St. Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts xiii. 4); and it is almost certain that he landed there on his return from it (xiv. 26). This strong fortress and convenient seaport was constructed by the first Seleucus, and here he was buried. It retained its importance in Roman times, and in St. Paul's day it had the privileges of a free city. The remains are numerous.

Seleucus IV. (Philopator), "king of Asia" (2 Macc. iii. 3), that is, of the provinces included in the Syrian monarchy, according to the title claimed by the Seleucidæ, even when they had lost their footing in Asia Minor (comp. 1 Macc. viii. 6, xi. 13, xii. 39, xiii. 32), was the son and successor of Antiochus the Great. He took part in the disastrous battle of Magnesia (B.C. 190), and three years afterwards, on the death of his father, ascended the throne. He was murdered, after a reign of twelve years (B.C. 175), by Heliodorus, one of his own courtiers (Dan. xi. 20). His son Demetrius I. (Soter), whom he had sent, while still a boy, as hostage to Rome, after a series of romantic adventures, gained the crown in 162 B.C. (1 Macc. vii. 1; 2 Macc. xiv. 1). The general policy of Seleucus towards the Jews, like that of his father (2 Macc. iii. 2, 3), was conciliatory, and he undertook a large share of the expenses of the Temple-service (2 Macc. iii. 3, 6). On one occasion, by the false representations of Simon, a Jewish officer [SIMON 3], he was induced to make an attempt to carry away the treasures deposited in the Temple, by means of the same Heliodorus who murdered him. The attempt signally failed, but it does not appear that he afterwards showed any resentment against the Jews (2 Macc. iv. 5, 6).

Sem. SHEM the patriarch (Luke iii. 36).

Semachi'ah. One of the sons of Shemaiah 9 (1 Chr. xvi. 7).

Sem'el. 1. SHIMEI 14 (1 Esd. ix. 33).—2. SHIMEI 16 (Esth. xi. 2).—3. The father of Mattathias in the genealogy of Jesus Christ (Luke iii. 26).

Semel'tius. SHIMSHAI (1 Esd. ii. 16, 17, 25, 30).

Sem'ia. SHIMEI 13 (1 Esd. ix. 23).

Semitic Languages. [SHEMITIC LANGUAGES.]

Sén'eah. The "children of Senah" are enumerated amongst the "people of Israel" who returned from the Captivity with Zerubbabel (Ezr. ii. 35; Neh. vii. 38). In Neh. iii. 3, the name is given with the article, *has-Senah*. The names in these lists are mostly those of towns; but Senah does not occur elsewhere in the Bible as attached to a town. The Magdal-Senna, or "great Senna" of Eusebius and Jerome, seven miles N. of Jericho ("Senna") however, is not inappropriate in position. Bertheau suggests that Senah represents not a single place but a district; but there is nothing to corroborate this.

Sen'eh. The name of one of the two isolated rocks which stood in the "passage of Michmash" (1 Sam. xiv. 4). It was the southern one of the two (ver. 5), and the nearest to Gaba. The name in Hebrew means a "thorn," or thorn-bush. Josephus mentions that the last encampment of Titus's army was at a spot "which in the Jews' tongue is called the valley," or perhaps the plain "of thorns, near to a village called Gabathsoulé," i. e. Gibeath of Saul.

Sen'ir. This name occurs twice in the A. V., viz. 1 Chr. v. 23, and Ez. xxvii. 5; but it should be found in two other passages, in each of which the Hebrew word is exactly similar to the above, viz. Deut. iii. 9, and Cant. iv. 8. In these it appears in the A. V. as SHENIR. It is the Amorite name for the mountain in the north of Palestine which the Hebrews called HERMON, and the Phenicians SIRION; or perhaps it was rather the name for a portion of the mountain than the whole. Abulfeda reports that the part of Anti-Lebanon north of Damascus—that usually denominated *Jebel esh Shurky*, "the East Mountain"—was in his day called *Sen'ir*.

Sennacherib was the son and successor of Sargon. His name in the original is read as *Tin-akki-irib*, which is understood to mean, "Sin (or the Moon) increases brothers;" an indication that he was not the first-born of his father. We know little or nothing of Sennacherib during his father's lifetime. From his name, and from a circumstance related by Polyhistor, we may gather that he was not the eldest son, and not the heir to the crown till the year before his father's death. Sennacherib mounted the throne B.C. 702. His first efforts were directed to crushing the revolt of Babylonians, which he invaded with a large army. Merodach-Baladan ventured on a battle, but was defeated and driven from the country. In his third year (B.C. 700) he turned his arms towards the west, chastised Sidon, took tribute from Tyre, Aradus, and the other Phœnician cities, as well as from Edom and Ashdod, besieged and captured Ascalon, made war on Egypt, which was still dependent on Ethiopia, took Libnah and Lachish on the Egyptian frontier, and, having probably concluded a convention with his chief enemy, finally marched against Hezekiah, king of Judah. It was at this time that "Sennacherib came up against all the fenced cities of Judah, and took them" (2 K. xviii. 13). There can be no doubt that the record which he has left of his campaign against "Hiskiah" in his third year, is the war with Hezekiah so briefly touched in the four verses of this chapter (vers. 13-16). In the following year (B.C. 699), Sennacherib invaded Babylonia for the second time. It was perhaps in this same year that Sennacherib made his second expedition into Palestine. Hezekiah had again revolted, and claimed the protection of Egypt. Instead, therefore, of besieging Jerusalem, the Assyrian king marched past it to the Egyptian frontier, attacked once more Lachish and Libna, but apparently failed to take them, sent messengers from the former to Hezekiah (2 K. xvii. 17), and on their return without his submission wrote him a threatening letter (2 K. xix. 14). Tirhaka was hastening to the aid of the Egyptians when an event occurred which relieved both Egypt and Judaea from their danger. In one night the Assyrians lost, either by a pestilence or by some more awful manifestation of divine power, 185,000 men! The camp immediately broke up—the king fled. Sennacherib reached his capital in safety, and was not deterred, by the terrible disaster which had befallen his arms, from engaging in other wars, though he seems thenceforward to have carefully avoided Palestine. In his fifth year he led an expedition into Armenia and Media; after which, from his sixth to his eighth year, he was engaged in wars with Susiana and Babylonia. From this point his annals fail us. Sennacherib reigned

twenty-two years. The date of his accession is fixed by the Canon of Ptolemy to B.C. 702, the first year of Belibus or Elibus. The date of his death is marked in the same document by the accession of Asaridanus (Esar-Haddon) to the throne of Babylon in B.C. 680. The monuments are in exact conformity with these dates, for the 22nd year of Sennacherib has been found upon them, while they have not furnished any notice of a later year. It is impossible to reconcile these dates with the chronology of Hezekiah's reign, according to the numbers of the present Hebrew text. Sennacherib was one of the most magnificent of the Assyrian kings. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His greatest work is the grand palace at Koyunjik. He also erected monuments in distant countries. Of the death of Sennacherib nothing is known beyond the brief statement of Scripture, that "as he was worshipping in the house of Nisroch his god, Adrammelech and Shazer his sons smote him with the sword, and escaped into the land of Armenia" (2 K. xix. 37; Is. xxxvii. 38).

Sen'uah. Properly Hassenuah, with the def. article. A Benjamite, the father of Judah, who was second over the city after the return from Babylon (Neh. xi. 9).

Se'orim. The chief of the fourth of the twenty-four courses of priests instituted by David (1 Chr. xxiv. 8).

Se'phar. It is written, after the enumeration of the sons of Joktan, "and their dwelling was from Mesha as thou goest unto Sephar, a mount of the east" (Gen. x. 30). The immigration of the Joktanites was probably from west to east, and they occupied the south-western portion of the peninsula. The undoubted identifications of Arabian places and tribes with their Joktanite originals are included within these limits, and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient seaport town called Dhafári or Zafari, and Dhafár or Zafár, without the inflexional termination, represents the Biblical site or district. All the evidence is clearly in favour of this site being that of the Sephar of the Bible, and the identification has accordingly been generally accepted by critics. More accurately, it appears to preserve the name mentioned in Gen. x. 30, and to be in the district anciently so named. It is situate on the coast, in the province of Hadramáwt, and near to the district which adjoins that province on the east, called Esh-Shihir. M. Fresnel gives almost all that is known of the present state of this old site in his *Lettres sur l'Hist. des Arabes avant l'Islamisme*. Zafár, he tells us, pronounced by the modern inhabitants "Isfôr," is now the name of a series of villages situate some of them on the shore, and some close to the shore, of the Indian Ocean, between Mirbat and Râs-Sâjir, extending a distance of two days' journey, or 17 or 18 hours, from east to west. Proceeding in this direction, those near the shore are named Tákah, Ed-Daháreez, El-Beled, El-Háfêh, Saláhah, and Awkad. The first four are on the sea-shore, and the last two at a small distance from it. El-Beled, otherwise called Harkâm, is, in M. Fresnel's opinion, the ancient Zafár. It is on a small peninsula lying between the ocean and a bay, and the port is on the land side of the town. The classical writers mention

Sapphar metropolis or Saphar, in long. 88°, lat. 14° 30', according to Ptol., the capital of the Sappharitæ, placed by Ptol. near the Homeritæ; but their accounts are obscure, and probably from hearsay.

Seph'arad. A name which occurs in Obad. ver. 20 only. Its situation has always been a matter of uncertainty, and cannot even now be said to be settled. (1.) The reading of the LXX., *ἔως Ἐφραθά*, is probably a mere conjecture, though it may point to a modified form of the name in the then original, viz. Sepharath. (2.) The reading of the Vulgate, *Bosporus*, was adopted by Jerome from his Jewish instructor. We have no means of knowing to which Bosporus Jerome's teacher alluded—the Cimmerian or the Thracian. The Targum Jonathan and the Peshito-Syriac, and from them the modern Jews, interpret Sepharad as Spain (Ispania and Hispania). (3.) Others have suggested the identity of Sepharad with Sippharia in Mesopotamia, but that is more probably SEPHARVAIM. (4.) The name has perhaps been discovered in the cuneiform Persian inscriptions of *Naksh-e-Rustum* and *Behistun*; and also in a list of Asiatic nations given by Niebuhr. In the latter it occurs between Ka Ta Pa TUK (Cappadocia) and Ta UNA (Ionia). De Saey was the first to propose the identification of this with Sepharad, and subsequently it was suggested by Lassen that S Pa Ra D was identical with Sardis, the ancient capital of Lydia. (5.) Ewald considers that Sepharad has a connexion with Zarephath in the preceding verse; and suggests that the true reading is Sepharum, and that it is to be found in a place three hours from Akka, i.e. doubtless the modern *Shefu 'Omar*. (6.) Michaelis, among other conjectures, ingeniously suggests that the "Spartans" of 1 Macc. xii. 15 are accurately "Sepharadites."

Sepharva'im is mentioned by Sennacherib in his letter to Hezekiah as a city whose king had been unable to resist the Assyrians (2 K. xix. 13; Is. xxxvii. 13; comp. 2 K. xviii. 34). It is coupled with Heia and Ava, or Ivah, which were towns on the Euphrates above Babylon. Again, it is mentioned, in 2 K. xvii. 24; where it is again joined with Ava, and also with Cuthah and Babylon. These indications are enough to justify us in identifying the place with the famous town of Sippara, on the Euphrates above Babylon, which was near the site of the modern Mosaib. The dual form indicates that there were two Sipparas, one on either side of the river. Berosus called Sippara, "a city of the sun;" and in the inscriptions it bears the same title, being called *Tispar sha Shamus*, or "Sippara of the Sun"—the sun being the chief object of worship there (comp. 2 K. xvii. 31).

Sephe'la. The Greek form of the ancient word *has-Shefêlâh*, the native name for the southern division of the low-lying flat district which intervenes between the central highlands of the Holy Land and the Mediterranean, the other and northern portion of which was known as SHARON. The name occurs throughout the topographical records of Joshua, the historical works, and the topographical passages in the Prophets; always with the article prefixed, and always denoting the same region (Deut. i. 7; Josh. ix. 1, x. 40, xi. 2, 16 a, xii. 8, xv. 33; Judg. i. 9; 1 K. x. 27; 1 Chr. xxvii. 28; 2 Chr. i. 15, ix. 27, xxvi. 10, xxviii. 18; Jer. xvii. 26, xxiii. 44, xxxiii. 13; Obad. 19; Zach.

vii. 7). In each of these passages, however, the word is treated in the A. V. not as a proper name, analogous to *the Campagna, the Wolds, the Carse*, but as a mere appellative, and rendered "the vale," "the valley," "the plain," "the low plains," and "the low country." The name Shefelah is retained in the old versions, even those of the Samaritans, and Rabbi Joseph on Chronicles (probably as late as the 11th century A.D.). It was actually in use down to the 5th century. No definite limits are mentioned to the Shefelah, nor is it probable that there were any. In the list of Joshua (xv. 33-47) it contains 43 "cities," as well as the hamlets and temporary villages dependent on them. Of these, as far as our knowledge avails us, the most northern was Ekron, the most southern Gaza, and the most western Nezip (about 7 miles N.N.W. of Hebron). A large number of these towns, however, were situated not in the plain, nor even on the western slopes of the central mountains, but in the mountains themselves. The Shefelah was, and is, one of the most productive regions in the Holy Land. It was in ancient times the corn-field of Syria, and as such the constant subject of warfare between Philistines and Israelites, and the refuge of the latter when the harvests in the central country were ruined by drought (2 K. viii. 1-3). But it was also, from its evenness, and from its situation on the road between Egypt and Assyria, exposed to continual visits from foreign armies, visits which at last led to the destruction of the Israelite kingdom.

Septuagint. The causes which produced this version, the number and names of the translators, the times at which different portions were translated, are all uncertain. It appears at the present day in four principal editions. 1. *Biblia Polyglotta Complutensis*, A.D. 1514-1517. 2. The Aldine Edition, Venice, A.D. 1518. 3. The Roman Edition, edited under Pope Sixtus V., A.D. 1587. 4. Facsimile Edition of the Codex Alexandrinus, by H. H. Baber, A.D. 1816. 1, 2. The texts of (1) and (2) were probably formed by collation of several MSS. 3. The Roman edition (3) is printed from the venerable *Codex Vaticanus*. A transcript of the Codex Vaticanus, prepared by Cardinal Mai, was lately published at Rome, by Vercelloni. It is much to be regretted that this edition is not so accurate as to preclude the necessity of consulting the MS. 4. The Facsimile Edition, by Mr. Baber, is printed with types made after the form of the letters in the *Codex Alexandrinus*.—*Manuscripts.* The various readings given by Holmes and Parsons enable us to judge, in some measure, of the character of the several MSS. and of the degree of their accordance with the Hebrew text. They are distinguished thus by Holmes: the *uncial* by Roman numerals, the *cursorie* by Arabic figures. Among them may be specially noted, with their probable dates and estimates of value as given by Holmes in his Preface to the Pentateuch:—

UNCIAL.*	Probable date Century
I. COTTONIANUS. Brit. Mus. (fragments) . . .	4
II. VATICANUS. Vat. Library, Rome . . .	4
III. ALEXANDRINUS. Brit. Mus.	5
VII. AMBROSIANUS. Ambros. Lib., Milan. . .	7
X. COISLINIANUS. Bibl. Imp., Paris . . .	7

* The Codex Sinaiticus, an uncial MS., is supposed by Theodoroff to be as ancient as Cod. Vaticanus (II.).

107. } Vaticanus (330) } Similar to Complut. . . .	14
108. } Parisiensis. Imp. Lib. } (Text. and 19) . . .	13

The texts of these MSS. differ considerably from each other, and consequently differ in various degrees from the Hebrew original. The following are the results of a comparison of the readings in the first eight chapters of Exodus:—1. Several of the MSS. agree well with the Hebrew; others differ very much. 2. The chief variance from the Hebrew is in the addition or omission of words and clauses. 3. Taking the Roman text as the basis, there are found 80 places (α) where some of the MSS. differ from the Roman text, either by addition or omission, in agreement with the Hebrew; 26 places (β) where differences of the same kind are not in agreement with the Hebrew. There is therefore a large balance against the Roman text, in point of accordance with the Hebrew. 4. Those MSS. which have the largest number of differences of class (α) have the smallest number of class (β). There is evidently some strong reason for this close accordance with the Hebrew in these MSS. But whence these varieties of text? Was the Version at first more in accordance with the Hebrew, as in (72) and (59), and did it afterwards degenerate into the less accurate state of the Codex Vaticanus? Or was the Version at first less accurate, like the Vatican text, and afterwards brought, by critical labours, into the more accurate form of the MSS. which stand highest in the scale? History supplies the answer. Jerome speaks of two copies, one older and less accurate, *κοινη*, fragments of which are believed to be represented by the still extant remains of the old Latin Version; the other more faithful to the Hebrew, which he took as the basis of his own new Latin Version. In another place he speaks of the corruption of the ancient translation, and the great variety of copies used in different countries. Origen, finding great discordance in the several copies of the LXX., laid this version side by side with the other three translations of Aquila, Theodotion, and Symmachus; and, taking their accordance with each other as the test of their agreement with the Hebrew, marked the copy of the LXX. with an *obelos* †, where he found superfluous words, and supplied the deficiencies of the LXX. by words taken from the other versions, with an *asterisc*, *, prefixed. From Eusebius we learn that this work of Origen was called *τετραπλάς*, the fourfold Bible. But this was only the earlier and the smaller portion of Origen's labours: he rested not till he had acquired the knowledge of Hebrew, and compared the Septuagint directly with the Hebrew copies. Eusebius thus describes the labours which led to the greater work, the *Hexapla*; the last clause of the passage refers to the *Tetrapla*: "So careful was Origen's investigation of the sacred

oracles, that he learnt the Hebrew tongue, and made himself master of the original Scriptures received among the Jews, in the Hebrew letters; and reviewed the versions of the other interpreters of the Sacred Scriptures, besides the LXX.; and discovered some translations varying from the well-known versions of Aquila, Symmachus, and Theodotion, which he searched out and brought to light from their long concealment in neglected corners; . . . and in his Hexapla, after the four principal versions of the Psalms, added a fifth, yea, a sixth and seventh translation, stating that one of these was found in a cask at Jericho, in the time of Antoninus, son of Severus; and bringing these all into one view, and dividing them in columns, over against one another, together with the Hebrew text, he left to us the work called *Hexapla*; having arranged separately, in the *Tetrapla*, the versions of Aquila, Symmachus, and Theodotion, together with the version of the Seventy." From Jerome we learn that in the Hexapla the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters. The fate of this laborious work is unknown. It was brought from Tyre and laid up in the Library at Caesarea, and there probably perished by the flames, A.D. 653. One copy, however, had been made by Pamphilus and Eusebius, of the column containing the corrected text of the Septuagint, with Origen's *asterisks* and *obeli*, and the letters denoting from which of the other translators each addition was taken. This copy is probably the ancestor of those Codices which now approach most nearly to the Hebrew, and are entitled *Hexaplar*. To these main sources of our existing MSS. must be added the recensions of the Septuagint mentioned by Jerome and others, viz. those of Lucian of Antioch and Hesychius of Egypt, not long after the time of Origen. Each of these had a wide range: that of Lucian in the Churches from Constantinople to Antioch; that of Hesychius in Alexandria and Egypt; while the Churches lying between these two regions used the Hexaplar text copied by Eusebius and Pamphilus.—J. HISTORY OF THE VERSION.—The ancient text, called *κοινή*, which was current before the time of Origen, whence came it? 1. This version was highly esteemed by the Hellenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work. The manner in which it is quoted by the writers of the New Testament proves that it had been long in general use. It was found wherever the Greek language prevailed, or the Jews were scattered. To the wide dispersion of this version we may ascribe in great measure that general persuasion which prevailed over the whole East of the near approach of the Redeemer. 2. Not less wide was the influence of the Septuagint in the spread of the Gospel. Many of those Jews who were assembled at Jerusalem on the day of Pentecost, from Asia Minor, from Africa, from Crete and Rome, used the Greek language; from Antioch and Alexandria in the East, to Rome and Massilia in the West, the voice of the Gospel sounded forth in Greek. For a long period the Septuagint was the Old Testament of the far larger part of the Christian Church. Let us now try to ascend towards the source. Can we find any clear, united, consistent testimony to the origin of the Septuagint? (1) Where and (2) when was it made? and (3) by whom? and (4) whence the title? (1) The only point in which all agree

is that Alexandria was the birthplace of the Version. (2) The Version was made, or at least commenced, in the time of the earlier Ptolemies, in the first half of the third century B.C. (3) *By whom was it made?*—The following are some of the traditions current among the Fathers:—Irenaeus (lib. iii. c. 24) relates that Ptolemy Lagi, wishing to adorn his Alexandrian Library with the writings of all nations, requested from the Jews of Jerusalem a Greek version of their Scriptures; that they sent seventy elders well skilled in the Scriptures and in later languages; that the king *separated them from one another*, and bade them all translate the several books. When they came together before Ptolemy and showed their versions, God was glorified, for *they all agreed exactly*; from beginning to end, in every phrase and word, so that all men may know *that the Scriptures are translated by the inspiration of God*. Epiphanius says that the translators were divided into pairs, in 36 cells, each pair being provided with two scribes; and that 36 versions, agreeing in every point, were produced, *by the gift of the Holy Spirit*. But Jerome boldly throws aside the whole story of the cells and the inspiration, and refers to the relation of Aristaeus, or Aristeus, and to Josephus, the former being followed by the latter. This (so called) letter of Aristeas to his brother Philocrates is still extant. It gives a splendid account of the origin of the Septuagint; of the embassy and presents sent by King Ptolemy to the high-priest at Jerusalem, by the advice of Demetrius Phalereus, his librarian, 50 talents of gold and 50 talents of silver, &c.: the Jewish slaves whom he set free, paying their ransom himself; the letter of the king; the answer of the high-priest; the choosing of six interpreters from each of the twelve tribes, and their names; the copy of the Law, in letters of gold; their arrival at Alexandria on the anniversary of the king's victory over Antigonus; the feast prepared for the seventy-two, which continued for seven days; the questions proposed to each of the interpreters in turn, with the answers of each; their lodging by the sea-shore; and the accomplishment of their work in seventy-two days, *by conference and comparison*. This is the story which probably gave to this version the title of the *Septuagint*. A simpler account, and probably more genuine, is that given by Aristobulus (2nd century B.C.). For before Demetrius Phalereus a translation had been made, by others, of the history of the Hebrews' going forth out of Egypt, and of all that happened to them, and of the conquest of the land, and of the exposition of the whole Law. But the entire translation of our whole Law was made in the time of the king named Philadelphus, a man of greater zeal, under the direction of Demetrius Phalereus. The Prologue of the Wisdom of Jesus the Son of Sirach makes mention of "the Law itself, the Prophets, and the rest of the books," having been translated from the Hebrew into another tongue. The letter of Aristeas was received as genuine and true for many centuries. The general belief of scholars now is, that it was the work of some Alexandrian Jew, whether with the object of enhancing the dignity of his Law, or the credit of the Greek version, or for the meaner purpose of gain. But the Pseudo-Aristaeus had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the Version itself:—1. The

Version was made at Alexandria. 2. It was begun in the time of the earlier Ptolemies, about 280 B.C. 3. The Law (i. e. the Pentateuch) alone was translated at first. But by whom was the Version made? As Hody justly remarks, "it is of little moment whether it was made at the command of the king or spontaneously by the Jews; but it is a question of great importance whether the Hebrew copy of the Law, and the interpreters (as Pseudo-Aristeas and his followers relate), were summoned from Jerusalem, and sent by the high-priest to Alexandria." On this question no testimony can be so conclusive as the evidence of the Version itself, which bears upon its face the marks of imperfect knowledge of Hebrew, and exhibits the forms and phrases of the Macedonic Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. The question as to the moving cause which gave birth to the Version is one which cannot be so decisively answered either by internal evidence or by historical testimony. The balance of probability must be struck between the tradition of the king's intervention and the simpler account suggested by the facts of history, and the phenomena of the Version itself. It is well known that, after the Jews returned from the Captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the Books of Moses in the synagogues of Palestine were explained to them in the Chaldaic tongue, in Targums or Paraphrases; and the same was done with the Books of the Prophets, when, at a later time, they also were read in the synagogues. The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek. They had settled in Alexandria in large numbers soon after the time of Alexander, and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the Law first and afterwards the Prophets would be explained in Greek, and from this practice would arise in time an entire Greek Version. 4. *Whence the title?*—It seems unnecessary to suppose, with Eichhorn, that the title *Septuagint* arose from the approval given to the Version by an Alexandrian Sanhedrim of 70 or 72; that title appears sufficiently accounted for above by the prevalence of the letter of Aristeas, describing the mission of 72 interpreters from Jerusalem.—II. CHARACTER OF THE SEPTUAGINT.—*The Character of the Version.*—Is it faithful in substance? Is it minutely accurate in details? Does it bear witness for or against the tradition of its having been made by special inspiration? These are some of the chief questions: there are others which relate to particulars. 1. Was the Version made from Hebrew MSS. with the vowel points now used? 2. Were the Hebrew words divided from one another, and were the final letters, פ, פֿ, ב, ד, ג, in use when

the Septuagint was made? A minute examination shows that the Hebrew MSS. used by the Greek translators were not pointed as at present, that they were written without intervals between the words, and that the present final forms were not then in use. In a few cases the translators appear to have preserved the true pointing and division of the words. We now proceed to the larger questions. A. *Is the Septuagint faithful in substance?*—1. It has been clearly shown by Hody, Frankel, and others, that the several books were translated by

different persons, without any comprehensive revision to harmonise the several parts. Names and words are rendered differently in different books. 2. Thus the character of the Version varies much in the several books; those of the Pentateuch are the best. 3. The poetical parts are, generally speaking, inferior to the historical, the original abounding with rarer words and expressions. 4. In the Major Prophets (probably translated nearly 100 years after the Pentateuch) some of the most important prophecies are sadly obscured. Ezekiel and the Minor Prophets (speaking generally) seem to be better rendered. 5. Supposing the numerous glosses and duplicate renderings, which have evidently crept from the margin into the text, to be removed, and forming a rough estimate of what the Septuagint was in its earliest state, we may perhaps say of it that it is the image of the original seen through a glass not adjusted to the proper focus; the larger features are shown, but the sharpness of definition is lost.—B. We have anticipated the answer to the second question—*Is the Version minutely accurate in details?*—but will give a few examples. 1. The same word in the same chapter is often rendered by differing words. 2. Differing words by the same word. 3. The divine names are frequently interchanged. 4. Proper names are sometimes translated, sometimes not. 5. The translators are often misled by the similarity of Hebrew words. In very many cases the error may be thus traced to the similarity of some of the Hebrew letters; in some it is difficult to see any connexion between the original and the Version. 6. Besides the above deviations, and many like them, which are probably due to accidental causes, the change of a letter, or doubtful writing in the Hebrew, there are some passages which seem to exhibit a studied variation in the LXX. from the Hebrew (e. g. Gen. ii. 2; Ex. xii. 40). Frequently the strong expressions of the Hebrew are softened down, where human pangs are ascribed to GOD. The Version is therefore not minutely accurate in details.—F. We shall now be prepared to weigh the tradition of the Fathers, that the Version was made by inspiration. If there be such a thing as an *inspiration of translators*, it must be an effect of the Holy Spirit on their minds, enabling them to do their *work of translation* more perfectly than by their own abilities and acquirements; to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human infirmity and weariness; and so to produce a copy of the Scriptures, setting forth the Word of God, and the history of his people, in its original truth and purity. The reader will be able to judge whether the Septuagint Version satisfies this test. If it does, it will be found not only substantially faithful, but minutely accurate in details; it will be, in short, a republication of the original text, purified from the errors of human hands and eyes, stamped with fresh authority from Heaven. This is a question to be decided by facts, by the phenomena of the Version itself. We will simply declare our own conviction that, instead of such a Divine republication of the original, we find a marked distinction between the original and the Septuagint.—III. WHAT, THEN, ARE THE BENEFITS TO BE DERIVED FROM THE STUDY OF THE SEPTUAGINT?—1. For the Old Testament. The Septuagint gives evidence of the character and condition of the Hebrew MSS. from which it was made, with

respect to vowel points and the mode of writing. Being made from MSS. far older than the Masoretic revision, the Septuagint often indicates readings more ancient and more correct than those of our present Hebrew MSS. and editions; and often speaks decisively between the conflicting readings of the present MSS. (e.g. Ps. xvi. 10, xxii. 17; Hos. vi. 5). In Gen. iv. 8, a clause necessary to the sense is omitted in the Hebrew, but preserved in the LXX. In all these cases we do not attribute any paramount *authority* to the Septuagint on account of its superior antiquity to the extant Hebrew MSS.; but we take it as an evidence of a more ancient Hebrew text, as an eye-witness of the texts, 280 or 180 years B.C. 2. The close connexion between the Old and New Testament makes the study of the Septuagint extremely valuable, and almost indispensable to the theological student. It was manifestly the chief storehouse from which the Apostles drew their proofs and precepts. 3. Further, the language of the Septuagint is the mould in which the thoughts and expressions of the Apostles and Evangelists are cast. In this version Divine Truth has taken the Greek language as its shrine, and adapted it to the things of God. 4. The frequent citations of the LXX. by the Greek Fathers, and of the Latin Version of the LXX. by the Fathers who wrote in Latin, form another strong reason for the study of the Septuagint. 5. On the value of the Septuagint as a monument of the Greek language in one of its most curious phases, this is not the place to dwell.—**OBJECTS TO BE ATTAINED BY THE CRITICAL SCHOLAR.**—1. A question of much interest still waits for a solution: the relation between the Septuagint and the Samaritan Pentateuch. 2. For the critical scholar it would be a worthy object of pursuit to ascertain, as nearly as possible, the original text of the Septuagint as it stood in the time of the Apostles and Philo. The critic would probably take as his basis the Roman edition, from the Codex Vaticanus, as representing most nearly the ancient (*κοινή*) texts. The collection of fragments of Origen's *Hexapla*, by Montfaucou and others, would help him to eliminate the additions which have been made to the LXX. from other sources, and to purge out the glosses and double renderings; the citations in the New Testament and in Philo, in the early Christian Fathers, both Greek and Latin, would render assistance of the same kind; and perhaps the most effective aid of all would be found in the fragments of the Old Latin Version collected by Salatier in 3 vols. folio (Rheims, 1743). 3. Another work, of more practical and general interest, still remains to be done, viz. to provide a Greek version, accurate and faithful to the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. Such an edition might prepare the way for the correction of the blemishes which remain in our Authorised English Version.

Sepulchre. [BUNIAL.]

Ser'ah, the daughter of Asher (Gen. xlii. 17; 1 Chr. vii. 30), called in Num. xxvi. 46, SARAH

Sera'iah. 1. The king's scribe or secretary in the reign of David (2 Sam. viii. 17).—2. The high-priest in the reign of Zedekiah (2 K. xxv. 18; 1 Chr. vi. 14; Jer. lii. 24).—3. The son of Tanhumeth the Netophathite (2 K. xv. 23; Jer. xl. 8).—4. The son of Kenaz, and brother of Othniel

(1 Chr. iv. 13, 14).—5. Ancestor of Jehu, a Simeonite chieftain (1 Chr. iv. 35).—6. One of the children of the province who returned with Zerubbabel (Ezr. ii. 2).—7. One of the ancestors of Ezra the scribe (Ezr. vii. 1), but whether or not the same as Seraiah the high-priest seems uncertain.—8. A priest, or priestly family, who signed the covenant with Nehemiah (Neh. x. 2).—9. A priest, the son of Hilkiah (Neh. xi. 11).—10. The head of a priestly house which went up from Babylon with Zerubbabel (Neh. xii. 1, 12).—11. The son of Neriah, and brother of Baruch (Jer. li. 59, 61). He went with Zedekiah to Babylon in the fourth year of his reign, or, as the Targum has it, "in the mission of Zedekiah," and is described as *sar mēnūchāh* (lit. "prince of rest;" A. V. "a quiet prince;" marg. "or, prince of Menuchah, or, chief chamberlain"), a title which is interpreted by Kimchi as that of the office of chamberlain. Perhaps he was an officer who took charge of the royal caravan on its march, and fixed the place where it should halt. Seraiah was commissioned by the prophet Jeremiah to take with him on his journey the roll in which he had written the doom of Babylon, and sink it in the midst of the Euphrates, as a token that Babylon should sink, never to rise again (Jer. li. 60-64).

Ser'aphim. An order of celestial beings, whom Isaiah beheld in vision standing above Jehovah as He sat upon His throne (Is. vi. 2). They are described as having each of them three pairs of wings, with one of which they covered their faces (a token of humility); with the second they covered their feet (a token of respect); while with the third they flew. They seem to have borne a general resemblance to the human figure, for they are represented as having a face, a voice, feet, and hands (ver. 6). Their occupation was twofold—to celebrate the praises of Jehovah's holiness and power (ver. 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antiphonal chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of the throne. The idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at *Mourghab* in Persia, we meet with a representation of a man with two pairs of wings, springing from the shoulders, and extending, the one pair upwards, the other downwards, so as to admit of covering the head and the feet. The meaning of the word "seraph" is extremely doubtful; the only word which resembles it in the current Hebrew is *saraph*, "to burn," whence the idea of *brilliance* has been extracted; but it is objected that the Hebrew term never bears this secondary sense. Gesenius connects it with an Arabic term signifying *high* or *exalted*; and this may be regarded as the generally received etymology.

Ser'ed, the firstborn of Zebulun (Gen. xlii. 14; Num. xxvi. 26).

Ser'gius Paulus was the name of the proconsul of Cyprus when the Apostle Paul visited that island with Barnabas on his first missionary tour (Acts xiii. 7 sq.). He is described as an intelligent man, truth-seeking, eager for information from all sources within his reach. It was this trait of his character which led him in the first instance to admit to his society Elymas the Magian, and afterwards to seek out the missionary strangers and learn from them the nature of the Christian doctrine. But Sergius

was not effectually or long deceived by the arts of the impostor; for on becoming acquainted with the Apostle he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth.

Seron, a general of Antiochus Epiph., in chief command of the Syrian army (1 Macc. iii. 13, 24), who was defeated at Bethhoron by Judas Maccabæus (B.C. 166).

Serpent. The following Hebrew words denote serpents of some kind or other:—*ʿAṣhûb*, *peṭhen*, *tzephaʿ* or *tzeph'ônî*, *shephîphôn*, *nâchâsh*, and *eph'eh*. The first four are noticed under the articles ADDER and ASP: the two remaining names we proceed to discuss. 1. *Nâchâsh*, the generic name of any serpent, occurs frequently in the O. T. The following are the principal Biblical allusions to this animal:—Its subtlety is mentioned in Gen. iii. 1; its wisdom is alluded to by our Lord in Matt. x. 16; the poisonous properties of some species are often mentioned (see Ps. lviii. 4; Prov. xxiii. 32); the sharp tongue of the serpent, which it would appear some of the ancient Hebrews believed to be the instrument of poison, is mentioned in Ps. cxl. 3; Job xx. 16, "the viper's tongue shall slay him;" although in other places, as in Prov. xxiii. 32, Eccl. x. 8, 11, Num. xxi. 9, the venom is correctly ascribed to the bite, while in Job xx. 14 the gall is said to be the poison; the habit serpents have of lying concealed in hedges is alluded to in Eccl. x. 3, and in holes of walls, in Am. v. 19; their dwelling in dry sandy places, in Deut. viii. 15; their wonderful mode of progression did not escape the observation of the author of Prov. xxx., who expressly mentions it as "one of the three things which were too wonderful for him" (19); the oviparous nature of most of the order is alluded to in Is. lix. 5, where the A. V., however, has the unfortunate rendering of "cockatrice." The art of taming and charming serpents is of great antiquity, and is alluded to in Ps. lviii. 5; Eccl. x. 11; Jer. viii. 17, and doubtless intimated by St. James (iii. 7), who particularises serpents among all other animals that "have been tamed by man." It was under the form of a serpent that the devil seduced Eve: hence in Scripture Satan is called "the old serpent" (Rev. xii. 9, and comp. 2 Cor. xi. 3). The part which the serpent played in the transaction of the Fall must not be passed over without some brief comment, being full of deep and curious interest. First of all, then, we have to note the subtlety ascribed to this reptile. It was an ancient belief, both amongst Orientals and the people of the western world, that the serpent was endued with a large share of sagacity. The particular wisdom alluded to by our Lord refers, it is probable, to the sagacity displayed by serpents in avoiding danger. The disciples were warned to be as prudent in not incurring unnecessary persecution. It has been supposed by many commentators that the serpent, prior to the Fall, moved along in an erect attitude. It is quite clear that an erect mode of progression is utterly incompatible with the structure of a serpent: consequently, had the snakes before the Fall moved in an erect attitude, they must have been formed on a different plan altogether. There is no reason whatever to conclude from the language of Scripture that the serpent underwent any change of form on account of the part it played in the history of the Fall. The typical form of the serpent and its mode of pro-

gression were in all probability the same before the Fall as after it: but subsequent to the Fall its form and progression were to be regarded with hatred and disgust by all mankind, and thus the animal was cursed "above all cattle," and a mark of condemnation was for ever stamped upon it. Serpents are said in Scripture to "eat dust" (see Gen. iii. 14; Is. lxv. 25; Mic. vii. 17); these animals, which for the most part take their food on the ground, do consequently swallow with it large portions of sand and dust. "Almost throughout the East," writes Dr. Kalisch, "the serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phœnicians adored that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven (*tiên-hoangs*) bodies of serpents. Some other nations fluctuated in their conceptions regarding the serpent." The evil spirit in the form of a serpent appears in the Ahirman or lord of evil who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile. But compare the opinion of Dr. Kalisch, who says "the serpent is the reptile, not an evil demon that had assumed its shape. . . . If the serpent represented Satan, it would be extremely surprising that the former only was cursed; and that the latter is not even mentioned. . . . it would be entirely at variance with the Divine justice for ever to curse the animal whose shape it had pleased the evil one to assume." Much has been written on the question of the "fiery serpents" of Num. xxi. 6, 8, with which it is usual erroneously to identify the "fiery flying serpent" of Is. xxx. 6, and xiv. 29. There is no occasion to refer the venomous snakes in question to the kind of which Niebuhr speaks, and which the Arabs at Basra denominate *Helo surrie*, or *Helo thidre*, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date-trees they inhabit. The Hebrew term rendered "fiery" by the A. V. is by the Alexandrine edition of the LXX. represented by "deadly;" Onkelos, the Arabic version of Saadins, and the Vulg. translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to the bright colour of the serpents. It is impossible to point out the species of poisonous snake which destroyed the people in the Arabian desert. It is obvious that either the *Cerastes*, or the *Naja haje*, or any other venomous species frequenting Arabia, may denote the "serpent of the burning bite" which destroyed the children of Israel. The "fiery flying serpent" of Isaiah (l. c.) can have no existence in nature. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures.—2. *Eph'eh* occurs in Job xx. 16; Is. xxx. 6, and lxv. 5 (A. V. "viper"). There is no Scriptural allusion by means of which it is possible to determine the species of serpent indicated by the Hebrew term, which is derived from a root which signifies "to hiss." Shaw speaks of some poisonous snake which the Arabs call *Leffah* (*El efah*): "it is the most malignant of the tribe, and rarely above a foot long." Jackson also mentions this serpent: from his description it would seem to be the Algerine adder (*Echidna arietans*, var. *Mauritanica*). The snake that fastened on St. Paul's hand when he was at Melita

(Acts xxviii. 3) was probably the common viper of this country (*Pelias berus*), or else the *Vipera aspis*.

Serpent, Brazen. The familiar history of the brazen serpent need not be repeated here. The scene of the history, determined by a comparison of Num. xxi. 3, and xxxiii. 42, must have been either Zalmonah or Punon. 1. The truth of the history will, in this place, be taken for granted. Those who prefer it may choose among the hypotheses by which men halting between two opinions have endeavoured to retain the historical and to eliminate the supernatural element. To most of the Israelites it must have seemed as strange then as it did afterwards to the later Rabbis, that any such symbol should be employed. The Second Commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. What reason was there for the difference? In part, of course, the answer may be, that the Second Commandment forbade, not all symbolical forms as such, but those that men made for themselves to worship; but the question still remains, why was *this* form chosen? It is hardly enough to say, with Jewish commentators, that any outward means might have been chosen. It is hardly enough again to say, with most Christian interpreters, that it was intended to be a type of Christ. If the words of our Lord in John iii. 14, 15, point to the fulfilment of the type, there must yet have been another meaning for the symbol. To present the serpent-form as deprived of its power to hurt, impaled as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been overcome, and thus help to strengthen the weak faith of the Israelites in a victory over both. To some writers this has commended itself as the simplest and most obvious view. Others, again, have started from a different ground. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they find there that it was worshipped as an *agathodaemon*, the symbol of health and life. Contrasted as these views appear, they have, it is believed, a point of contact. The idea primarily connected with the serpent in the history of the Fall, as throughout the proverbial language of Scripture, is that of wisdom (Gen. iii. 1; Matt. x. 16; 2 Cor. xi. 3). Wisdom, apart from obedience to a divine order, allying itself to man's lower nature, passes into cunning. Man's nature is envenomed and degraded by it. But wisdom, the self-same power of understanding, yielding to the divine law, is the source of all healing and restoring influences, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be so to them in proportion as they ceased to be sensual and rebellious.—II. The next stage in the history of the brazen serpent shows how easily even a legitimate symbol, retained beyond its time, after it had done its work, might become the occasion of idolatry. It appears in the reign of Hezekiah as having been, for some undefined period, an object of worship. The zeal of that king leads him to destroy it. We are left to conjecture when the worship began, or what was its locality. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development. The church of St. Ambrose, at Milan, has boasted for centuries of possessing the brazen serpent which Moses set up in the wilder-

ness. The earlier history of the relic, so called, is matter for conjecture.—III. When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the Book of Wisdom sees in it "a sign of salvation;" "he that turned himself was not saved by the thing that he saw, but by Thee that art the Saviour of all" (Wisd. xvi. 6, 7). The Targum of Jonathan paraphrases Num. xxi. 8: "He shall be healed if he direct his heart unto the Name or the Word of the Lord." Philo, with his characteristic taste for an ethical, mystical interpretation, represents the history as a parable of man's victory over his lower sensuous nature. The facts just stated may help us to enter into the bearing of the words of John iii. 14, 15.—IV. A full discussion of the typical meaning here unfolded belongs to Exegesis rather than to a Dictionary. It will be enough to note here that which connects itself with facts or theories already mentioned. On the one side the typical interpretation has been extended to all the details. On the other it has been maintained that the serpent was from the beginning, and remains still exclusively the symbol of evil; that the lifting-up of the Son of Man answered to that of the serpent, because on the cross the victory over the serpent was accomplished. It will not surprise us to find that, in the spiritual as in the historical interpretation, both theories have an element of truth.

Serpent-Charming. There can be no question at all of the remarkable power which, from time immemorial, has been exercised by certain people in the East over poisonous serpents. The art is most distinctly mentioned in the Bible, and probably alluded to by St. James (iii. 7). The usual species operated upon, both in Africa and in India, are the hooded snakes (*Naja tripudians*, and *Naja haje*) and the horned *Cerastes*. That the charmers frequently, and perhaps generally, take the precaution of extracting the poison-fangs before the snakes are subjected to their skill, there is much probability for believing; but that this operation is not always attended to is clear from the testimony of Bruce and numerous other writers. Some have supposed that the practice of taking out or breaking off the poison-fangs is alluded to in Ps. lvi. 6, "Break their teeth, O God, in their mouth." The serpent-charmer's usual instrument is a flute. Those who

Serpent-charming

professed the art of taming serpents were called by the Hebrews *ménachášim*, while the art itself was called *lachash* (Jer. viii. 17; Eccl. x. 11); but these terms were not always used in this restricted sense.

Seru'g. Son of Reu, and great-grandfather of Abraham. His age is given in the Hebrew Bible as 230 years (Gen. xi. 20-23); 30 years before he begot Nahor, and 200 years afterwards. Bochart conjectures that the town of *Seru'g*, a day's journey from Charrae in Mesopotamia, was named from this patriarch. Nuidas and others ascribe to him the deification of dead benefactors of mankind. Epiphanius states that, though in his time idolatry took its rise, yet it was confined to pictures. He characterises the religion of mankind up to Seru'g's days as Scythic.

Servant. The Hebrew terms *na'ar* and *meshárêth*, which alone answer to our "servant," in as far as this implies the notions of liberty and voluntariness, are of comparatively rare occurrence. On the other hand, *'ebed*, which is common and equally rendered "servant" in the A. V., properly means a *slave*. The terms above given refer to the exceptional cases of young or confidential attendants. Joshua, for instance, is described as at once the *na'ar* and *meshárêth* of Moses (Ex. xxxiii. 11); Elisha's servant sometimes as the former (2 K. iv. 12, v. 20), sometimes as the latter (2 K. iv. 43, vi. 15). Amnon's servant was a *meshárêth* (2 Sam. xiii. 17, 18), while young Joseph was a *na'ar* to the sons of Bilhah (Gen. xxxvii. 2). The confidential designation *meshárêth* is applied to the priests and Levites, in their relation to Jehovah (Ezr. viii. 17; Is. lxi. 6; Ez. xlv. 11).

Ses'is. SHASHAI (1 Esd. ix. 34).

Ses'thel. BEZALEEL of the sons of Pahath-Moab (1 Esd. ix. 31).

Se'th. Gen. iv. 25, v. 3; 1 Chr. i. 1. The third son of Adam, and father of Enos. The signification of his name is "appointed" or "put" in the place of the murdered Abel; but Ewald thinks that another signification, which he prefers, is indicated in the text, viz. "seedling," or "germ." In the 4th century there existed in Egypt a sect calling themselves Sethians, who are classed by Neander among those Gnostic sects which, in opposing Judaism, approximated to paganism.

Sethu'r. The Asherite spy, son of Michael (Num. xiii. 13).

Seven. The frequent recurrence of certain numbers in the sacred literature of the Hebrews is obvious to the most superficial reader; and it is almost equally obvious that these numbers are associated with certain ideas, so as in some instances to lose their numerical force, and to pass over into the province of symbolic signs. This is more or less true of the numbers three, four, seven, twelve, and forty; but seven so far surpasses the rest, both in the frequency with which it recurs, and in the importance of the objects with which it is associated, that it may fairly be termed the *representative* symbolic number. It has hence attracted considerable attention, and may be said to be the keystone on which the symbolism of numbers depends. The origin of this symbolism is a question that meets us at the threshold of any discussion as to the number seven. The views of Biblical critics may be ranged under two heads, according as the symbolism is attributed to theoretical speculations as to the internal properties of the number itself, or to external associations of a physical or historical character. According to the former of these views, the symbol-

ism of the number seven would be traced back to the symbolism of its component elements three and four, the first of which = Divinity, and the second = Humanity, whence seven = Divinity + Humanity, or, in other words, the union between God and Man, as effected by the manifestations of the Divinity in creation and revelation. This theory is seductive from its ingenuity, and its appeal to the imagination, but there appears to be little foundation for it. We turn to the second class of opinions which attribute the symbolism of the number seven to external associations. The influence of the number seven was not restricted to the Hebrews; it prevailed among the Persians (Esth. i. 10, 14), among the ancient Indians, among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, &c. The wide range of the word *seven* is in this respect an interesting and significant fact: with the exception of "six," it is the only numeral which the Semitic languages have in common with the Indo-European. In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon, or to the supposed number of the planets. The peculiarity of the Hebrew view consists in the special dignity of the *seventh*, and not simply in that of *seven*. We cannot trace back the peculiar associations of the Hebrews farther than to the point when the seventh day was consecrated to the purposes of religious rest. Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of *religious periodicity*. The Sabbath, being the seventh day, suggested the adoption of seven as the *coefficient*, so to say, for the appointment of all sacred periods; and we thus find the 7th month ushered in by the Feast of Trumpets, and signalled by the celebration of the Feast of Tabernacles and the great Day of Atonement; 7 weeks as the interval between the Passover and the Pentecost; the 7th year as the Sabbatical year; and the year succeeding 7 × 7 years as the Jubilee year. From the idea of periodicity, it passed by an easy transition to the *duration* or *repetition* of religious proceedings; and thus 7 days were appointed as the length of the Feasts of Passover and Tabernacles; 7 days for the ceremonies of the consecration of priests, and so on; 7 victims to be offered on any special occasion, as in Balaam's sacrifice (Num. xxiii. 1), and especially at the ratification of a treaty, the notion of seven being embodied in the very term signifying to swear, literally meaning to *do seven times* (Gen. xxi. 28). The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a *cyclical* number, with the subordinate notions of perfection or completeness. It is mentioned in a variety of passages too numerous for quotation (*e.g.* Job v. 19; Jer. xv. 9; Matt. xii. 45) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness. The foregoing applications of the number seven become of great practical importance in connexion with the interpretation of some of the prophetic portions of the Bible, and particularly of the Apocalypse. We have but to run over the chief subjects of that book, in order to see the necessity of deciding whether the number is to be accepted in a literal or a metaphorical sense—in other words, whether it represents a number or a

quality. The decision of this question affects not only the number seven, but also the number which stands in a relation of antagonism to seven, viz. the half of seven, which appears under the form of forty-two months, = $3\frac{1}{2}$ years (Rev. xiii. 5), twelve hundred and sixty days, also = $3\frac{1}{2}$ years (xi. 3, xii. 6), and again a time, times, and half a time = $3\frac{1}{2}$ years (xii. 14). If the number seven express the notion of completeness, then the number half-seven = incompleteness and the secondary ideas of suffering and disaster: if the one represent divine agency, the other we may expect to represent human agency.

Shaal'abbîn. A town in the allotment of Dan. named between Ir-Shemesh and Ajalon (Josh. xix. 42).

Shaalbim. The commoner form of the name of a town of Dan which in one passage is found as Shaalabbîn. It occurs in an ancient fragment of history inserted in Judg. i. enumerating the towns of which the original inhabitants of Canaan succeeded in keeping possession after the general conquest. It is mentioned with Ajalon again in Josh. xix. 42 (Shaalabbîn), and with Bethshemesh both there and in 1 K. iv. 9. By Eusebius and Jerome it is mentioned in the *Onomasticon* as a large village in the district of Sebaste (i. e. Samaria), and as then called Selabn. But this is not very intelligible. It is also at variance with another notice of Jerome (on Ezek. xlviii. 22). No trace appears to have been yet discovered of any name resembling Shaalbim, in the neighbourhood of *Yalo* or *Ain-shems*, or indeed anywhere else.

Shaal'bonite, the. Eliabha the Shaalbonite was one of David's thirty-seven heroes (2 Sam. xxiii. 32; 1 Chr. xi. 33). He was the native of a place named Shaalbon, which is unmentioned elsewhere, unless it is identical with SHAALBIM or SHAALABBIN of the tribe of Dan.

Sha'aph. 1. The son of Jahdai (1 Chr. ii. 47). —2. The son of Caleb the brother of Jerahmeel by his concubine Maachah (1 Chr. ii. 49).

Shaara'im. A city in the territory allotted to Judah (Josh. xv. 36; in A. V. incorrectly Shara'im). It is mentioned again in the account of the rout which followed the fall of Goliath (1 Sam. xvii. 52). These two notices are consistent with each other. Shaaraim is therefore probably to be looked for somewhere west of *Shuwa'eh*, on the lower slopes of the hills, where they subside into the great plain. We find the name mentioned once more in a list of the towns of Simeon (1 Chr. iv. 31), occupying the same place with Sharuhen and Suisannah, in the corresponding lists of Joshua. It is impossible that the same Shaaraim can be intended, and indeed it is quite doubtful whether it be not a mere corruption of one of the other two names.

Shaah'gaz. The eunuch in the palace of Xerxes who had the custody of the women in the second house (Esth. ii. 14).

Shabbetha'i. 1. A Levite in the time of Ezra (Ezr. x. 15). It is apparently the same who with Jeshua and others instructed the people in the knowledge of the Law (Neh. viii. 7). —2. One of the chief of the Levites after the return from Babylon (Neh. xi. 16). Possibly 1. and 2. are identical.

Shachi'a. Properly "Shabiah," a son of Shahrîm by his wife Hodesh (1 Chr. viii. 10).

Shaddai. An ancient name of God, rendered "Almighty" everywhere in the A. V. In all passages of Genesis, except one (xix. 25), in Ex. vi. 3, and

in Ez. x. 5, it is found in connexion with *El*, "God," *El Shaddai* being there rendered "God Almighty," or "the Almighty God." It occurs six times in Genesis, once in Exodus (vi. 3), twice in Numbers (xxiv. 4, 16), twice in Ruth (i. 20, 21), thirty-one times in Job, twice in the Psalms (lxxviii. 14 [15], xci. 1), once in Isaiah (xlii. 6), twice in Ezekiel (i. 24, x. 5), and once in Joel (i. 15). In Genesis and Exodus it is found in what are called the Elohistic portions of those books, in Numbers in the Jehovistic portion, and throughout Job the name *Shaddai* stands in parallelism with *Elohim*, and never with *Jehovah*. By the name or in the character of *El-Shaddai*, God was known to the patriarchs (Gen. xvii. 1, xxviii. 3, xliii. 14, xlviii. 3, xlix. 25), before the name *Jehovah*, in its full significance, was revealed (Ex. vi. 3). The prevalent idea attaching to the name in all the passages in which it occurs is that of strength and power, and our translators have probably given to "*Shaddai*" its true meaning when they rendered it "Almighty." The derivations assigned to *Shaddai* are various. We may mention, only to reject, the Rabbinical etymology which connects it with *dai*, "sufficiency." According to this, *Shaddai* signifies "He who is sufficient," "the all-sufficient One;" and so "He who is sufficient in himself," and therefore self-existent. Gesenius (*Gram.* § 86, and *Jesûa*, xlii. 6) regards *shaddai*, as the plural of majesty from a singular noun, *shad*, root *shadad*, of which the primary notion seems to be, "to be strong." It is evident that this derivation was present to the mind of the prophet from the play of words in Is. xlii. 6. On the whole there seems no reasonable objection to the view taken by Gesenius, which Lee also adopts.

Shad'rach. The Chaldee name of Hananiah, the chief of the "three children," whose song, as given in the apocryphal Daniel, forms part of the service of the Church of England, under the name of "Benedicite, omnia opera." A longer prayer in the furnace is also ascribed to him in the LXX. and Vulgate, but this is thought to be by a different hand from that which added the song. The history of Shadrach, or Hananiah, as told in Dan. i.-iii., is well known. After their deliverance from the furnace, we hear no more of Shadrach, Meshach, and Abed-nego in the O. T.; neither are they spoken of in the N. T., except in the pointed allusion to them in the Epistle to the Hebrews, as having "through faith quenched the violence of fire" (Heb. xi. 33, 34). But there are repeated allusions to them in the later apocryphal books, and the martyrs of the Maccabean period seem to have been much encouraged by their example. See 1 Macc. ii. 59, 60; 3 Macc. vi. 6; 4 Macc. xii. 9, xvi. 3, 21, xviii. 12.

Sha'ge. Father of Jonathan the Hararite, one of David's guard (1 Chr. xi. 34). [See SHAGMAH 5.]

Shahara'im. A Benjamite whose history and descent are alike obscure in the present text (1 Chr. viii. 8). It is more intelligible if we remove the full stop from the end of ver. 7, and read on thus: "and begat Uzza and Ahibud, and Shaharaim he begat in the field of Moab," &c.

Shahas'mah. One of the towns of the allotment of Issachar (Josh. xix. 22 only).

Shalem. Gen. xxxiii. 18. It seems more than probable that this word should not here be taken as a proper name, but that the sentence should be rendered, "Jacob came safe to the city of She-

chem. It is certainly remarkable that there should be a modern village bearing the name of *Salim* in position to a certain degree consistent with the requirements of the narrative when so interpreted:—viz. 3 miles east of *Nâblus* (the ancient Shechem), and therefore between it and the Jordan Valley, where the preceding verse (ver. 17) leaves Jacob settled. But there are several considerations which weigh very much against this being more than a fortuitous coincidence. 1. If *Shalem* was the city in front of which Jacob pitched his tent, then it certainly was the scene of the events of chap. xxiv.; and the well of Jacob and the tomb of Joseph must be removed from the situation in which tradition has so appropriately placed them to some spot further eastward and nearer to *Salim*. 2. Though east of *Nâblus*, *Salim* does not appear to lie near any actual line of communication between it and the Jordan Valley. 3. With the exception of the LXX., Peshito-Syriac, and Vulgate, among the ancients, and Luther's and the Auth. Vers. among the moderns, the unanimous voice of translators and scholars is in favour of treating *shalim* as a mere appellative. *Salim* does not appear to have been visited by any traveller.

Shalim, the Land of. A district through which Saul passed on his journey in quest of his father's asses (1 Sam. ix. 4, only). The spelling of the name in the original, properly *Shâlâm*, shows that it had no connexion with *Shalem*, or with the modern *Salim*, east of *Nâblus*. It is more possibly identical with the "land of Shual." But this can only be taken as a conjecture.

Shal'isha, the Land of. One of the districts traversed by Saul when in search of the asses of Kish (1 Sam. ix. 4, only). It apparently lay between "Mount Ephraim" and the "land of Shalim," a specification which with all its evident preciseness is irreconcilable. The difficulty is increased by placing *Shalisha* at *Sâris* or *Khirbet Sâris*, a village a few miles west of Jerusalem. If the land of *Shalisha* contained, as it not improbably did, the place called *BAAL-SHALISHA* (2 K. iv. 42), then the whole disposition of Saul's route would be changed.

Shallech'eth, the Gate. One of the gates of the "house of Jehovah," whether by that expression be intended the sacred tent of David or the Temple of Solomon (1 Chr. xxvi. 16). It was the gate "to the causeway of the ascent." As the causeway is actually in existence, the gate *Shallecheth* can hardly fail to be identical with the *Bab Sûsûth*, or *Sinsûth*, which enters the west wall of the Haram about 600 feet from the south-west corner of the Haram wall.

Shallum, the fifteenth king of Israel, son of Jabesh, conspired against Zechariah, son of Jeroboam II., killed him, and brought the dynasty of Jehu to a close, B.C. 770. In the English version of 2 K. xv. 10, we read, "And Shallum the son of Jabesh conspired against him, and smote him before the people, and slew him, and reigned in his stead." But in the LXX. we find *Keßaðu* instead of *before the people*, i. e. Shallum and Keblaam killed Zechariah. Ewald accepts this translation, and considers that Qobolam or *Keßaðu* was a fellow-conspirator or rival of Shallum, of whose subsequent fate we have no information. On the death of Zechariah, Shallum was made king, but, after reigning in Samaria for a month only, was in his turn dethroned and killed by Menahem.—2. The

husband (or son, according to the LXX. in 2 K.) of Huldah the prophetess (2 K. xxii. 14; 2 Chr. xxiv. 22) in the reign of Josiah. He appears to have been keeper of the priestly vestments in the Temple.—3. A descendant of Shesham (1 Chr. ii. 40, 41).—4. The third son of Josiah king of Judah, known in the Books of Kings and Chronicles as Jehoahaz (1 Chr. iii. 15; Jer. xxii. 11). Hengstenberg regards the name as symbolical, "the recompensed one," and given to Jehoahaz in token of his fate, as one whom God recompensed according to his deserts. But it is more probably the original name of the king, which was changed to Jehoahaz when he came to the crown.—5. Son of Shaul the son of Simeon (1 Chr. iv. 25).—6. A high-priest, son of Zadok and ancestor of Ezra (1 Chr. vi. 12, 13; Ezr. vii. 2).—7. A son of Naphtali (1 Chr. vii. 13).—8. The chief of a family of porters or gatekeepers of the east gate of the Temple (1 Chr. ix. 17). His descendants were among those who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45).—9. Son of Kore, a Korahite (1 Chr. ix. 31). With this Shallum we may identify Meshelemiah and Shelemiah (1 Chr. xxvi. 1, 2, 9, 14), but he seems to be different from the last-mentioned Shallum.—10. Father of Jehizkiah, an Ephraimite (2 Chr. xxviii. 12).—11. One of the porters of the Temple who had married a foreign wife (Ezr. x. 24).—12. One of the sons of Bani (Ezr. x. 42).—13. The son of Halafoesh and ruler of a district of Jerusalem (Neh. iii. 12).—14. The uncle of Jeremiah (Jer. xxxii. 7); perhaps the same as 2.—15. Father or ancestor of Manseiah (Jer. xxv. 4); perhaps the same as 9.

Shall'un. The son of Col-hozeh, and ruler of a district of the Mizpah (Neh. iii. 15).

Shalma'i. The children of Shalmi (or SHALMAI, as in the margin of Ezr. ii. 46) were among the Nethinim who returned with Zerubbabel (Ezr. ii. 46; Neh. vii. 48). In Neh. the name is properly SALMAI.

Shalman. Shalmaneser king of Assyria (Hos. x. 14).

Shalmaneser was the Assyrian king who reigned immediately before Sargon, and probably immediately after Tiglath-pileser. He can scarcely have ascended the throne earlier than B.C. 730, and may possibly not have done so till a few years later. It must have been soon after his accession that he led the forces of Assyria into Palestine, where Hoshea, the last king of Israel, had revolted against his authority (2 K. xvii. 3). No sooner was he come than Hoshea submitted, acknowledged himself a "servant" of the Great King, and consented to pay him a fixed tribute annually. He soon after concluded an alliance with the king of Egypt, and withheld his tribute in consequence. In B.C. 723 Shalmaneser invaded Palestine for the second time, and, as Hoshea refused to submit, laid siege to Samaria. The siege lasted to the third year (B.C. 721), when the Assyrian arms prevailed (2 K. xvii. 4-6, xviii. 9-11). It is uncertain whether Shalmaneser conducted the siege to its close, or whether he did not lose his crown to Sargon before the city was taken.

Sha'ma. One of David's guard, son of Hothan of Aroer (1 Chr. xi. 44).

Shamari'ah. Son of Rehoboam (2 Chr. xi. 19).

Sha'med. Properly SHAMER, or Shemer; one of the sons of Elpaal the Benjamite (1 Chr. viii. 2).

Sha mer. 1. A Merarite Levite (1 Chr. vi. 46).

—2. **SHONER** the son of Heber an Asherite (1 Chr. vii. 34).

Shamgar. Son of Anath, judge of Israel after Ehud, and before Barak, though possibly contemporary with the latter, since he seems to be spoken of in Judg. v. 6 as a contemporary of Jael, if the reading is correct. It is not improbable from his patronymic that Shamgar may have been of the tribe of Naphtali, since Beth-anath is in that tribe (Judg. i. 33). In the days of Shamgar, Israel was in a most depressed condition, and the whole nation was cowed. At this conjuncture Shamgar was raised up to be a deliverer. With no arms in his hand but an ox-goad (Judg. iii. 31; comp. 1 Sam. xiii. 21), he made a desperate assault upon the Philistines, and slew 600 of them. But it was reserved for Deborah and Barak to complete the deliverance.

Shamhuth. The fifth captain for the fifth month in David's arrangement of his army (1 Chr. xxvii. 8). From a comparison of the lists in 1 Chr. xi., xxvii., it would seem that Shamhuth is the same as **SHAMMOTH** the Harorite.

Shamir. The name of two places in the Holy Land. 1. A town in the mountain district of Judah (Josh. xv. 48, only). It probably lay some eight or ten miles south of Hebron, but it has not been yet discovered.—2. A place in Mount Ephraim, the residence and burial-place of Tola the judge (Judg. x. 1, 2). It is singular that this judge, a man of Issachar, should have taken up his official residence out of his own tribe. Shamir is not mentioned by the ancient topographers. Schwarz proposes to identify it with *Samir*, half-way between Samaria and Jenin, about eight miles from each. Van de Velde proposes *Khirbet Sammer*, ten miles E.S.E. of Nablus.

Shamir. "A Kohathite, son of Micah, or Michah, the first-born of Uzziel (1 Chr. xxiv. 24).

Shamra. One of the sons of Zophar, an Asherite (1 Chr. vii. 37).

Shammah. 1. The son of Reuel the son of Esau (Gen. xxvii. 13, 17; 1 Chr. i. 37).—2. The third son of Jesse, and brother of David (1 Sam. xvi. 9, xvii. 13). Called also **SHIMEA**, **SHIMEAH**, and **SHUMMA**.—3. One of the three greatest of David's mighty men. He was with him during his outlaw life in the cave of Adullam, and signalled himself by defending a piece of ground full of lentiles against the Philistines on one of their marauding incursions. This achievement gave him a place among the first three heroes (2 Sam. xxiii. 11-17). The text of Chronicles at this part is clearly very fragmentary, and what is there attributed to Eleazar the son of Dodo properly belongs to Shammah. There is still, however, a discrepancy in the two narratives. The scene of Shammah's exploit is said in Samuel to be a field of lentiles, and in 1 Chron. a field of barley. Kennicott proposes in both cases to read "barley."—4. The Harodite, one of David's mighties (2 Sam. xxiii. 25). He is called "**SHAMMORU** the Harorite" in 1 Chr. xi. 27, and in 1 Chr. xxvii. 8 "**SHAMHUTH** the Izrahite." Kennicott maintained the true reading in both to be "Shamhuth the Harodite."—5. In the list of David's mighty men in 2 Sam. xxiii. 32, 33, we find "Jonathan, Shammah the Hararite;" while in the corresponding verse of 1 Chr. xi. 34, it is "Jonathan, the son of Shage the Hararite." Combining the two, Kennicott proposes to read "Jonathan, the son of Shamha, the Hararite."

Shamma'i. 1. The son of Onam (1 Chr. ii. 28,

32).—2. Son of Rekem (1 Chr. ii. 44, 45).—3. The brother of Miriam and Ishbah the founder of Eshtemoa, in an obscure genealogy of the descendants of Judah (1 Chr. iv. 17).

Shammoth. The Harorite, one of David's guard (1 Chr. xi. 27).

Shammua. 1. The Reubenite spy, son of Zaccor (Num. xiii. 4).—2. Son of David, by his wife Bathsheba (1 Chr. xiv. 4).—3. A Levite, the father of Abda (Neh. xi. 17). The same as **SHEMAIHAH** 6.—4. The representative of the priestly family of Bilgai, or Bilgai, in the days of Joiakim (Neh. xii. 18).

Shammu'ah. Son of David (2 Sam. v. 14); elsewhere called **SHAMMUA**, and **SHIMEA**.

Shamshera'i. One of the sons of Jeroham, a Benjaminite (1 Chr. viii. 26).

Shapham. A Gadite of Bashan (1 Chr. v. 12).

Shaphan. The scribe or secretary of king Josiah. He was the son of Azaliah (2 K. xxii. 3; 2 Chr. xxxiv. 8), father of Abikam (2 K. xxii. 12; 2 Chr. xxxiv. 20), Elashah (Jer. xxix. 3), and Gemariah (Jer. xxxvi. 10, 11, 12), and grandfather of Gedaliah (Jer. xxxix. 14, xl. 5, 9, 11, xli. 2, xliii. 6), Michaiah (Jer. xxxvi. 11), and probably of Jaazaniah (Ez. vii. 11). There seems to be no sufficient reason for supposing that Shaphan the father of Abikam, and Shaphan the scribe, were different persons. The history of Shaphan brings out some points with regard to the office of scribe which he held. He appears on an equality with the governor of the city and the royal recorder, with whom he was sent by the king to Hilkiah to take an account of the money which had been collected by the Levites for the repair of the Temple and to pay the workmen (2 K. xxii. 4; 2 Chr. xxxiv. 9; comp. 2 K. xii. 10). Ewald calls him Minister of Finance (*Gesch.* iii. 697). It was on this occasion that Hilkiah communicated his discovery of a copy of the Law, which he had probably found while making preparations for the repair of the Temple. Shaphan was then apparently an old man, for his son Abikam must have been in a position of importance, and his grandson Gedaliah was already born. Be this as it may, Shaphan disappears from the scene, and probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elishama was scribe (Jer. xxxvi. 12).

Shaphat. 1. The Simeonite spy, son of Hori (Num. xiii. 5).—2. The father of the prophet Elisha (1 K. xix. 16, 19; 2 K. iii. 11, vi. 31).—3. One of the six sons of Shemaiah in the royal line of Judah (1 Chr. iii. 22).—4. One of the chiefs of the Gadites in Bashan (1 Chr. v. 12).—5. The son of Adlai, who was over David's oxen in the valleys (1 Chr. xxvii. 29).

Shapher, Mount (Num. xxxiii. 23). The name of a desert station where the Israelites encamped. No site has been suggested for it.

Shara'i. One of the sons of Bani (Ezr. x. 40).

Shara'im. An imperfect version (Josh. xv. 36) only of the name **SHAARAIM**.

Shatar. The father of Ahiam the Hararite (2 Sam. xxiii. 33). In 1 Chr. xi. 35 he is called **SACAR**, which Kennicott thinks the true reading.

Sharezer was a son of Seunacherib, whom, in conjunction with his brother Adrammelech, he murdered (2 K. xix. 37).

Sharon. A district of the Holy Land occasionally referred to in the Bible (1 Chr. v. 16, xxvii. 29; Is. xxxiii. 9, xxxv. 2, lxx. 10; Cant. ii. 1;

Acts ix. 35, A. V. SARON). The name has on each occurrence, with one exception only, the definite article (1 Chr. v. 16). It would therefore appear that "the Sharon" was some well-defined region familiar to the Israelites. The only guide to its locality furnished by Scripture is its mention with Lydda in Acts ix. 35. There is, however, no doubt of the identification of Sharon. It is that broad rich tract of land which lies between the mountains of the central part of the Holy Land and the Mediterranean—the northern continuation of the SHEFELAH. Eusebius and Jerome, under the name of Saronas, specify it as the region extending from Caesarea to Joppa. A general sketch of the district is given under the head of PALESTINE (p. 671).—**2.** The SHARON of 1 Chr. v. 96, to which allusion has already been made, is distinguished from the western plain by not having the article attached to its name as the other invariably has. It is also apparent from the passage itself that it was some district on the east of Jordan in the neighbourhood of Gilead and Bashan. The name has not been met with in that direction. Dr. Stanley suggests that Sharon may here be a synonym for the *Mishor*.

Sha'ronite, the. Shitrai, who had charge of the royal herds pastured in Shaon (1 Chr. xxvii. 29), is the only Sharonite mentioned in the Bible.

Shar'uben. A town named in Josh. xix. 6 only, amongst those which were allotted within Judah to Simon. Sharuben does not appear in the catalogue of the cities of Judah; but instead of it, and occupying the same position with regard to the other names, we find SHILAH (xv. 35). In the list of 1 Chr. on the other hand, the same position is occupied by SHAAKAIM (iv. 31). Whether these are different places, or different names of the same place, or mere variant ones of careless copyists, and, in the last case, which is the original form, it is perhaps impossible now to determine.

Shasha'i. One of the sons of Bani in the time of Ezri (Ezr. x. 40).

Shashak. A Benjamite, one of the sons of Beriah (1 Chr. viii. 14, 25).

Sha'ul. 1. The son of Simeon by a Canaanitish woman (Gen. xlvii. 10; Ex. vi. 15; Num. xxvi. 13; 1 Chr. iv. 24), and founder of the family of the SHAULITES.—**2.** One of the kings of Edom (1 Chr. i. 48, 49). In the A. V. of Gen. xxxvi. 37 he is less accurately called SAUL.—**3.** A Kohathite, son of Uzziab (1 Chr. vi. 24).

Sha'veh, the Valley of. A name found only in Gen. xiv. It is one of those archaic names with which this venerable chapter abounds—so archaic, that many of them have been elucidated by the insertion of their more modern equivalents in the body of the document, by a later but still very ancient hand. In the present case the explanation does not throw any light upon the locality of Sha'veh:—"The valley of Sha'veh, that is the Valley of the King" (ver. 17). True, the "Valley of the King" is mentioned again in 2 Sam. xviii. 18, as the site of a pillar set up by Absalom; but this passage again conveys no indication of its position, and it is by no means certain that the two passages refer to the same spot.

Sha'veh Kiriat'haim, mentioned (Gen. xiv. 5) as the residence of the Emim at the time of Chedor-lamer's incursion. Kiriat'haim is named in the later history, though it has not been identified; and Sha'veh Kiriat'haim was probably the valley in or by which the town lay.

Shav'aha. The royal secretary in the reign of David (1 Chr. xviii. 16). He is apparently the same with SERAIAH (2 Sam. viii. 17). In 2 Sam. xx. 25 he is called SHEVA, and in 1 K. iv. 8 SHISHA.

Shawm. In the Prayer-book version of Ps. xcvi. 7, "with trumpets also and *shawms*" is the rendering of what stands in the A. V. "with trumpets and sound of *cornet*." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarinet.

Shea'l. One of the sons of Bani who had married a foreign wife (Ezr. x. 29).

Shea'tiel. Father of Zerubbabel (Ezr. iii. 2, 8, v. 2; Neh. xii. 1; Hagg. i. 1, 12, 14, ii. 2, 23).

Shear'iah. One of the six sons of Azai, a descendant of Saul (1 Chr. viii. 38, ix. 44).

Shearing-house, the. A place on the road between Jezreel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 K. x. 12, 14). The translators of our version have given in the margin the literal meaning of the name—"house of binding of the shepherds." It is probable that the original meaning has escaped. Eusebius mentions it as a village of Samaria "in the great plain [of Esdraelon] 15 miles from Logeon."

She'ar-Ja'shub (lit. "a remnant shall return"). The son of Isaiah the prophet (Is. vii. 3). The name, like that of Maher-shalah-hash-baz, had a mystical significance (comp. Is. x. 20-22).

She'ba. The son of Bichri, a Benjamite from the mountains of Ephraim (2 Sam. xx. 1-22), the last chief of the Absalom insurrection. He is described as a "man of Belial." But he must have been a person of some consequence, from the immense effect produced by his appearance. It was in fact all but an anticipation of the revolt of Jeroboam. The occasion seized by Sheba was the emulation, as if from loyalty, between the northern and southern tribes on David's return (2 Sam. xx. 1, 2). The king might well say, "Sheba the son of Bichri shall do us more harm than did Absalom" (ib. 6). Sheba traversed the whole of Palestine, apparently rousing the population, Joab following in full pursuit. It seems to have been his intention to establish himself in the fortress of Abel-Beth-maachah, famous for the prudence of its inhabitants (2 Sam. xx. 18). That prudence was put to the test on the present occasion. Joab's terms were—the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall, and the insurrection ended.—**2.** A Gadite of Bashan (1 Chr. v. 13).

She'ba. 1. A son of Ramah, son of Cush (Gen. x. 7; 1 Chr. i. 9).—**2.** A son of Joktan (Gen. x. 28; 1 Chr. i. 22).—**3.** A son of Jokhan, son of Keturah (Gen. xxv. 3; 1 Chr. i. 32). We shall consider, first, the history of the Joktanite Sheba; and, secondly, the Cushite Sheba and the Keturahite Sheba together.—**1.** It has been shown, in ARABIA and other articles, that the Joktanites were among the early colonists of southern Arabia, and that the kingdom which they there founded was, for many centuries, called the kingdom of Sheba, after one of the sons of Joktan. They appear to have been preceded by an aboriginal race, which the Arabian historians describe as a people of gigantic stature. But

besides these extinct tribes, there are the evidences of Cushite settlers, who probably preceded the Joktanites. Sheba seems to have been the name of the great south Arabian kingdom and the peoples which composed it, until that of Himyer took its place in later times. On this point much obscurity remains. The apparent difficulties of the case are reconciled by supposing, as M. Caussin de Perceval has done, that the kingdom and its people received the name of Sheba (*Arabic*, Sebâ), but that its chief and sometimes reigning family or tribe was that of Himyer. In support of the view that the name of Sheba applied to the kingdom and its people as a generic or national name, we find in the *Kâmoos* "the name of Sebâ comprises the tribes of the Yemen in common." And further, as Himyer meant the "Red Man," so probably did Sebâ. We have assumed the identity of the Arabic Sebâ, with Sheba. The pl. form *sebidm* corresponds with the Greek *Σαβαῖοι* and the Latin Sabaei. In the Bible, the Joktanite Sheba, mentioned genealogically in Gen. x. 28, recurs, as a kingdom, in the account of the visit of the queen of Sheba to king Solomon. That the queen was of Sheba in Arabia, and not of Sebâ the Cushite kingdom of Ethiopia, is unquestionable. The other passages in the Bible which seem to refer to the Joktanite Sheba occur in Is. lx. 6; and again in Jer. vi. 20. On the other hand, in Ps. lxxii. 10, the Joktanite Sheba is undoubtedly meant. The kingdom of Sheba embraced the greater part of the Yemen, or Arabia Felix. Its chief cities, and probably successive capitals, were Sebâ, San'â (UZAL), and Zafâr (SEPHAR). Sebâ was probably the name of the city, and generally of the country and nation; but the statements of the Arabian writers are conflicting on this point. Near Sebâ was the famous Dyke of El-'Arim, said by tradition to have been built by Lukmân the 'Adite, to store water for the inhabitants of the place, and to avert the descent of the mountain torrents. The catastrophe of the rupture of this dyke is an important point in Arab history, and marks the dispersion in the 2nd century of the Joktanite tribes. This, like all we know of Sebâ, points irresistibly to the great importance of the city as the ancient centre of Joktanite power. The history of the Sabaeans has been examined by M. Caussin de Perceval, but much remains to be adjusted before its details can be received as trustworthy, the earliest safe chronological point being about the commencement of our era. An examination of the existing remains of Sabaeans and Himyerite cities and buildings will, it cannot be doubted, add more facts to our present knowledge. The ancient buildings are of massive masonry, and evidently of Cushite workmanship or origin. Later temples, and palace-temples, of which the Arabs give us descriptions, were probably of less massive character; but Sabaeans art is an almost unknown and interesting subject of inquiry. The religion celebrated in those temples was cosmic; but this subject is too obscure and too little known to admit of discussion in this place.—II. Sheba, son of Raamah son of Cush, settled somewhere on the shores of the Persian Gulf. In the *Marâsid* (s. v.) Mr. Stanley Poole has found an identification which appears to be satisfactory—that on the island of Awâl (one of the "Bahreyn Islands"), are the ruins of an ancient city called Sebâ. It was this Shebâ that carried on the great Indian traffic with Palestine, in conjunction with, as we hold, the other Sheba, son of

Jokshan son of Keturah, who like DEDAN, appears to have formed, with the Cushite of the same name, one tribe.

She'ba. One of the towns of the allotment of Simeon (Josh. xix. 2). In the list of the cities of the south of Judah, there is a Shema (xv. 26) which stands next to Moladah, and which is probably the 'Sheba in question. This suggestion is supported by the reading of the Vatican LXX.

She'bah. The famous well which gave its name to the city of Beersheba (Gen. xxvi. 33). According to this version of the occurrence, Shebah, or more accurately Shibeah, was the fourth of the series of wells dug by Isaac's people, and received its name from him, apparently in allusion to the oaths (31) which had passed between himself and the Philistine chieftains the day before. It should not be overlooked that according to the narrative of an earlier chapter the well owed its existence and its name to Isaac's father (xii. 32). Some commentators, as Kalisch (*Gen.* 500), looking to the fact that there are two large wells at *Bir es Seba*, propose to consider the two transactions as distinct, and as belonging the one to the one well, the other to the other. Others see in the two narratives merely two versions of the circumstances under which this renowned well was first dug.

Sheba'm. One of the towns in the pastoral district on the east of Jordan—demanded by and finally ceded to the tribes of Reuben and Gad (Num. xxiii. 3, only). It is probably the same which appears in the altered forms of SHUBMAH and SHUMAH.

Shebaniah. 1. A Levite in the time of Ezra (Neh. ix. 4, 5). He sealed the covenant with Nehemiah (Neh. x. 10).—2. A priest, or priestly family, who sealed the covenant with Nehemiah (Neh. x. 4, xii. 14). Called SHECHANIAH in Neh. xii. 3.—3. Another Levite who sealed the covenant with Nehemiah (Neh. x. 12).—4. One of the priests appointed by David to blow with the trumpets before the ark of God (1 Chr. xv. 24).

Shebarim. A place named in Josh. vii. 5, only, as one of the points in the flight from Ai. No trace of the name has been yet remarked.

Sheb'er. Son of Caleb ben-Hezron by his concubine Maachah (1 Chr. ii. 48).

Sheb'na. A person of high position in Hezekiah's court, holding at one time the office of prefect of the palace (Is. xxii. 15), but subsequently the subordinate office of secretary (Is. xxxvi. 3; 2 K. xix. 2). This change appears to have been effected by Isaiah's interposition. From the omission of his father's name, it has been conjectured that he was a *novus homo*, perhaps a foreigner.

Sheb'uel. 1. A descendant of Gershom (1 Chr. xxiii. 16, xxvi. 24), who was ruler of the treasures of the house of God; called also SHUBAEL (1 Chr. xxiv. 20). He is the last descendant of Moses of whom there is any trace.—2. One of the fourteen sons of Heman the minstrel (1 Chr. xiv. 4); called also SHUBAEL (1 Chr. xxv. 20).

Shecaniah. 1. The tenth in order of the priests who were appointed by lot in the reign of David (1 Chr. xxiv. 11).—2. A priest in the reign of Hezekiah (2 Chr. xxxi. 15).

Shechaniah. 1. A descendant of Zerubbabel (1 Chr. iii. 21, 22).—2. Some descendants of Shechaniah returned with Ezra (Ezr. viii. 3).—3. The sons of Shechaniah were another family who returned with Ezra (Ezr. viii. 5). In this verse

some name appears to have been omitted. Perhaps the reading should be: "of the sons of Zattu, Shechaniah, the son of Jahaziel"—4. The son of Jehiel of the sons of Elam (Err. x. 2).—5. The father of Shemaiah 2 (Neh. iii. 29).—6. The son of Arah (Neh. vi. 18).—7. The head of a priestly family who returned with Zerubbabel (Neh. xii. 3).

Shechem. There may be some doubt respecting the origin of the name. It has been made a question whether the place was so called from Shechem, the son of Hamor, head of their tribe in the time of Jacob (Gen. xxxiii. 18, sq.), or whether he received his name from the city. The import of the name favours, certainly, the latter supposition. The etymology of the Hebrew word *shechem* indicates that the place was situated on some mountain or hill-side; and that presumption agrees with Josh. xx. 7, which places it in Mount Ephraim (see also, 1 K. xii. 25), and with Judg. ix. 9, which represents it as under the summit of Gerizim, which belonged to the Ephraim range. The other Biblical intimations in regard to its situation are only indirect. But the historical and traditional data which exist outside of the Bible are abundant and decisive. Josephus describes Shechem as between Gerizim and Ebal. The present *Nabulus* is a corruption merely of Neapolis; and Neapolis succeeded the more ancient Shechem. All the early writers who touch on the topography of Palestine, testify to this identity of the two. The city received its new name from Vespasian, and on coins still extant is called Flavia Neapolis. Its situation accounts for another name which it bore among the natives, while it was known chiefly as Neapolis to foreigners. It is nearly midway between Judaea and Galilee. Being thus a "thoroughfare" on this important route, it was called *Mabortha* or *Mubartha*, as Josephus states (*B. J.* iv. 8, §1). Pliny writes the same name "Mamortha." The ancient town, in its most flourishing age, may have filled a wider circuit than its modern representative. It could easily have extended further up the side of Gerizim, and eastward nearer to the opening into the valley from the plain. But any great change in this respect, certainly the idea of an altogether different position, the natural conditions of the locality render doubtful. Josephus says that more than ten thousand Samaritans (inhabitants of Shechem are meant) were destroyed by the Romans on one occasion. The population, therefore, must have been much greater than *Nabulus* with its present dimensions would contain. The situation of the town is one of surpassing beauty. It lies in a sheltered valley, protected by Gerizim on the south, and Ebal on the north. The feet of these mountains, where they rise from the town, are not more than five hundred yards apart. The bottom of the valley is about 1800 feet above the level of the sea, and the top of Gerizim 800 feet higher still. The site of the present city, which we believe to have been also that of the Hebrew city, occurs exactly on the water-summit; and streams issuing from the numerous springs there, flow down the opposite slopes of the valley, spreading verdure and fertility in every direction. Travellers vie with each other in the language which they employ to describe the scene that bursts here so suddenly upon them on arriving in spring or early summer at this paradise of the Holy Land. "The whole valley," says Dr. Robinson, "was filled with gardens of vegetables, and orchards of all kinds of fruits, watered by fountains, which

burst forth in various parts and flow westwards in refreshing streams. It came upon us suddenly like a scene of fairy enchantment. We saw nothing to compare with it in all Palestine. Here, beneath the shadow of an immense mulberry-tree, by the side of a purling rill, we pitched our tent for the remainder of the day and the night. . . . We rose early, awakened by the songs of nightingales and other birds, of which the gardens around us were full." The allusions to Shechem in the Bible are numerous, and show how important the place was in Jewish history. Abraham, on his first migration to the Land of Promise, pitched his tent and built an altar under the Oak (or Terebinth) of Moreh at Shechem. "The Canaanite was then in the land;" and it is evident that the region, if not the city, was already in possession of the aboriginal race (see Gen. xii. 6). At the time of Jacob's arrival here, after his sojourn in Mesopotamia (Gen. xxxiii. 18, xxxiv.), Shechem was a Hivite city, of which Hamor, the father of Shechem, was the headman. It was at this time that the patriarch purchased from that chieftain "the parcel of the field," which he subsequently bequeathed, as a special patrimony, to his son Joseph (Gen. xliii. 22; Josh. xxiv. 32; John iv. 6). The field lay undoubtedly on the rich plain of the *Mukhna*, and its value was the greater on account of the well which Jacob had dug there, so as not to be dependent on his neighbours for a supply of water. The desilement of Dinah, Jacob's daughter, and the capture of Shechem and massacre of all the male inhabitants by Simeon and Levi, are events that belong to this period (Gen. xxxiv. 1 sq.). The oak under which Abraham had worshipped, survived to Jacob's time (Gen. xxxv. 1-4). The "oak of the monument" (Judg. ix. 6), where the Shechemites made Abimelech king, marked, perhaps, the veneration with which the Hebrews looked back to these earliest footsteps (the *incunabula gentis*) of the patriarchs in the Holy Land. In the distribution of the land after its conquest by the Hebrews, Shechem fell to the lot of Ephraim (Josh. xx. 7), but was assigned to the Levites, and became a city of refuge (Josh. xxi. 20, 21). It acquired new importance as the scene of the renewed promulgation of the Law, when its blessings were heard from Gerizim and its curses from Ebal, and the people bowed their heads and acknowledged Jehovah as their king and ruler (Deut. xxvii. 11; and Josh. ix. 33-35). It was here Joshua assembled the people, shortly before his death, and delivered to them his last counsels (Josh. xxiv. 1, 25). After the death of Gideon, Abimelech, his bastard son, induced the Shechemites to revolt from the Hebrew commonwealth and elect him as king (Judg. ix.). It was to denounce this act of usurpation and treason that Jotham delivered his parable of the trees to the men of Shechem from the top of Gerizim, as recorded at length in Judg. ix. 22 sq. In revenge for his expulsion, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (Judg. ix. 34-45). It was soon restored, however, for we are told in 1 K. xii. that all Israel assembled at Shechem, and Rehoboam, Solomon's successor, went thither to be inaugurated as king. Here, at this same place, the ten tribes renounced the house of David, and transferred their allegiance to Jeroboam (1 K. xii. 16), under whom Shechem became for a time the capital of his kingdom. We come next to

The Valley and Town of Nābulus, the ancient Shechem, from the south-western flank of Mount Ebal, looking Westward. The mountain on the left is Gerizim. The Mediterranean is discernible in the distance. From a sketch by W. Tipping, Esq.

the epoch of the exile. The people of Shechem doubtless shared the fate of the other inhabitants, and were, most of them at least, carried into captivity (2 K. xvii. 5, 6, xviii. 9 sq.). But Shalmaneser, the conqueror, sent colonies from Babylon to occupy the place of the exiles (2 K. xvii. 24). It would seem that there was another influx of strangers, at a later period, under Esar-haddon (Ezr. iv. 2). From the time of the origin of the Samaritans, the history of Shechem blends itself with that of this people and of their sacred mount, Gerizim. [SAMARIA, SAMARITAN PENT.] Shechem reappears in the New Testament. It is the Sychar of John iv. 5, near which the Saviour conversed with the Samaritan woman at Jacob's Well. In Acts vii. 16, Stephen reminds his hearers that certain of the patriarchs (meaning Joseph, as we see in Josh. xxiv. 32, and following, perhaps, some tradition as to Jacob's other sons) were buried at Sychem. It only remains to add a few words relating more especially to Nābulus, the heir, under a different name, of the site and honours of the ancient Shechem. The population consists of about five thousand, among whom are five hundred Greek Christians, one hundred and fifty Samaritans, and a few Jews. The enmity between the Samaritans and Jews is as inveterate still, as it was in the days of Christ. The Mohammedans of course, make up the bulk of the population. The main street follows the line of the valley from east to west, and contains a well-stocked bazaar. Most of the other streets cross this: here are the smaller shops and the workstands of the artisans. Most of the streets are narrow and dark, as the houses hang over them on arches, very much as in the closest parts of Cairo. The houses are of stone, and of the most ordinary style, with the exception of these of the

wealthy sheikhs of Safaria who live here. There are no public buildings of any note. The *Kentsch* or synagogue of the Samaritans is a small edifice, in the interior of which there is nothing remarkable, unless it be an alcove, screened by a curtain, in which their sacred writings are kept. The structure may be three or four centuries old. Nābulus has five mosks, two of which, according to a tradition in which Mohammedans, Christians, and Samaritans agree, were originally churches. Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water within and around the city. He gives the names of twenty-seven of the principal of them. Some of the gardens are watered from the fountains, while others have a soil so moist as not to need such irrigation. The olive, as in the days when Jotham delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, pomegranates, are abundant. The valley of the Nile itself hardly surpasses Nābulus in the production of vegetables of every sort. Being, as it is, the gateway of the trade between Jaffa and Beirut on the one side, and the trans-Jordanic districts on the other, and the centre also of a province so rich in wool, grain, and oil, Nābulus becomes, necessarily, the seat of an active commerce, and of a comparative luxury to be found in very few of the inland Oriental cities. This account would be incomplete without some mention of the two spots in the neighbourhood of Nābulus which bear the names of the Well of Jacob and the Tomb of Joseph. Of these the former is the more remarkable. It lies about a mile and a half east of the city, close to the lower road, and just beyond the wretched hamlet of Balḏta. Among the Mohammedans and Samaritans it is known as Bir el-Yakūb, or 'Ain

Yakob; the Christians sometimes call it *Bir es-Samiriyeh*—"the well of the Samaritan woman." Formerly there was a square hole opening into a carefully-built vaulted chamber, about 10 feet square, in the floor of which was the true mouth of the well. Now a portion of the vault has fallen in and completely covered up the mouth, so that nothing can be seen above but a shallow pit half filled with stones and rubbish. The well is deep—75 ft. when last measured—and there was probably a considerable accumulation of rubbish at the bottom. Sometimes it contains a few feet of water, but at others it is quite dry. It is entirely excavated in the solid rock, perfectly round, 9 ft. in diameter, with the sides hewn smooth and regular. Of all the special localities of our Lord's life, this is almost the only one absolutely undisputed. The second of the spots alluded to is the Tomb of Joseph. It lies about a quarter of a mile north of the well, exactly in the centre of the opening of the valley between Gerizim and Ebal. It is a small square enclosure of high whitewashed walls, surrounding a tomb of the ordinary kind, but with the peculiarity that it is placed diagonally to the walls, instead of parallel, as usual. A rough pillar used as an altar, and black with the traces of fire, is at the head, and another at the foot of the tomb. In the walls are two slabs with Hebrew inscriptions, and the interior is almost covered with the names of pilgrims in Hebrew, Arabic, and Samaritan. Beyond this there is nothing to remark in the structure itself. The local tradition of the Tomb, like that of the well, is as old as the beginning of the 4th century.

Shechem. 1. The son of Hamor the chieftain of the Hivite settlement of Shechem at the time of Jacob's arrival (Gen. xxxiii. 19, xxxiv. 2-26; Josh. xxiv. 32; Judg. ix. 28).—2. A man of Manasseh, of the clan of Gilead (Num. xxvi. 31).—3. A Gilendite, son of Sheaida, the younger brother of the foregoing (1 Chr. vii. 19).

Shechemites, the. The family of Shechem, son of Gilead (Num. xxvi. 31; comp. Josh. xvii. 2).

Shechinah. This term is not found in the Bible. It was used by the later Jews, and borrowed by Christians from them, to express the visible majesty of the Divine Presence, especially when resting, or dwelling, between the Cherubim on the mercy-seat in the Tabernacle, and in the temple of Solomon; but not in Zerubbabel's temple, for it was one of the five particulars which the Jews reckon to have been wanting in the second temple. The use of the term is first found in the Targums, where it forms a frequent periphrasis for God, considered as dwelling amongst the children of Israel, and is thus used, especially by Onkelos, to avoid ascribing corporeity to God Himself. In *Ex.* xxv. 8, where the Hebrew has "Let them make me a sanctuary that I may dwell among them," Onkelos has, "I will make my Shechinah to dwell among them." In *xxix.* 45, 46, for the Hebrew "I will dwell among the children of Israel," Onkelos has, "I will make my Shechinah to dwell, &c." In *Ps.* lxxiv. 2, for "this Mount Zion wherein thou hast dwelt," the Targum has "wherein thy Shechinah hath dwelt." In the description of the dedication of Solomon's Temple (1 K. viii. 12, 13), the Targum of Jonathan runs thus: "The Lord is pleased to make His Shechinah dwell in Jerusalem. I have built the house of the sanctuary for the house of thy Shechinah for ever." And in 1 K. vi.

13, for the Heb. "I will dwell among the children of Israel," Jonathan has "I will make my Shechinah dwell." In *Is.* vi. 5 he has the combination, "the glory of the Shechinah of the King of ages, the Lord of Hosts;" and in the next verse he paraphrases "from off the altar," by "from before His Shechinah on the throne of glory in the lofty heavens that are above the altar." Compare also *Num.* v. 3, xxxv. 34; *Ps.* lxxviii. 17, 18, cxxxv. 21; *Is.* xxxiii. 5, lvii. 15; *Is.* lvi. 17, 21, and numerous other passages. On the other hand, it should be noticed that the Targums never render "the cloud" or "the glory" by Shechinah. Hence, as regards the use of the word *Shechinah* in the Targums, it may be defined as a periphrasis for God whenever He is said to dwell on Zion, amongst Israel, or between the Cherubims, and so on, in order, as before said, to avoid the slightest approach to materialism. Our view of the Targumistic notion of the Shechinah would not be complete if we did not add, that though, as we have seen, the Jews reckoned the Shechinah among the marks of the Divine favour which were wanting to the second Temple, they manifestly expected the return of the Shechinah in the days of the Messiah. Thus *Hagg.* i. 8, "build the house, and I will take pleasure in it, and I will be glorified, saith the Lord," is paraphrased by Jonathan, "I will cause my Shechinah to dwell in it in glory." Compare also *Zech.* ii. 10, viii. 3; *Ez.* xliii. 7, 9. As regards the visible manifestation of the Divine Presence dwelling amongst the Israelites, to which the term Shechinah has attached itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light, enveloped in a cloud, and usually concealed by the cloud, so that the cloud itself was for the most part alone visible; but on particular occasions the glory appeared. The allusions in the N. T. to the Shechinah are not unfrequent. Thus in the account of the Nativity, the words, "Lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them" (Luke ii. 9), followed by the apparition of "the multitude of the Heavenly host," recall the appearance of the Divine glory on Sinai, when "He shined forth from Paran, and came with ten thousands of saints" (*Deut.* xxxiii. 2; comp. *Ps.* lxxviii. 17; *Acts* vii. 53; *Heb.* ii. 2; *Ezek.* xliii. 2). The "God of glory" (*Acts* vii. 2, 55), "the cherubims of glory" (*Heb.* ix. 5), "the glory" (*Rom.* ix. 4), and other like passages, are distinct references to the manifestations of the glory in the O. T. When we read in *John* i. 14, that "the Word was made flesh, and dwelt among us, and we beheld his glory;" or in 2 *Cor.* xii. 9, "that the power of Christ may rest upon me;" or in *Rev.* xxi. 3, "Behold the tabernacle of God is with men, and He will dwell with them" we have not only references to the Shechinah, but are distinctly taught to connect it with the incarnation and future coming of Messiah, as type with antitype. It should also be specially noticed that the attendance of angels is usually associated with the Shechinah. These are most frequently called (*Ez.* x. xi.) cherubim; but sometimes, as in *Is.* vi., seraphim (comp. *Rev.* iv. 7, 8). The predominant association, however, is with the cherubim, of which the golden cherubim on the mercy-seat were the representation.

Shedeur. The father of Elizur, chief of the tribe of Reuben at the time of the Exodus (*Num.* i. 5, ii. 10, vii. 30, 35, x. 18).

Sheep. Sheep were an important part of the possessions of the ancient Hebrews and of Eastern nations generally. The first mention of sheep occurs in Gen. iv. 2. They were used in the sacrificial offerings, both the adult animal (Ex. xx. 24; 1 K. viii. 63; 2 Chr. xxix. 33) and the lamb, i. e., "a male from one to three years old," but young lambs of the first year were more generally used in the offerings (see Ex. xxix. 38; Lev. ix. 3, xii. 6; Num. xxviii. 9, &c.). No lamb under eight days old was allowed to be killed (Lev. xxii. 27). A very young lamb was called *táleh* (see 1 Sam. vii. 9; Is. lxxv. 25). Sheep and lambs formed an important article of food (1 Sam. xxv. 18; 1 K. i. 19, iv. 23; Ps. xlii. 11, &c.). The wool was used as clothing (Lev. xiii. 47; Deut. xxii. 11; Prov. xxxi. 13; Job xxxi. 20, &c.). "Rams' skins dyed red" were used as a covering for the tabernacle (Ex. xxv. 5). Sheep and lambs were sometimes paid as tribute (2 K. iii. 4). It is very striking to notice the immense numbers of sheep that were reared in Palestine in Biblical times. Sheep-shearing is alluded to Gen. xxxi. 19, xxxviii. 13; Deut. xv. 19; 1 Sam. xxv. 4; Is. liii. 7, &c. Sheep-dogs were employed in Biblical times, as is evident from Job xxx. 1, "the dogs of my flock." Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (comp. John x. 4; Ps. lxxvii. 20, lxxx. 1), though they also drove them (Gen. xxxiii. 13). The following quotation from Hartley's *Researches in Greece and the Levant*, p. 321, is so strikingly illustrative of the allusions in John x. 1-16, that we cannot do better than quote it: "Having had my attention directed last night to the words in John x. 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it was, and that the sheep obeyed the shepherd when he called them by their names. This morning I had an opportunity of verifying the truth of this remark. Passing by a flock of sheep, I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then bade him call one of his sheep. He did so, and it instantly left its pasture and its companions and ran up to the hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that 'a stranger will they not follow, but will flee from him.' The shepherd told me that many of his sheep were still wild, that they had not yet learned their names, but that by teaching them they would all learn them." The common sheep of Syria and Palestine are the broad-tail (*Ovis laticaudatus*), and a variety of the common sheep of this country (*Ovis aries*) called the *Bidoween* according to Russell (*Aleppo*, ii. p. 147). The broad-tailed kind has long been reared in Syria. The whole passage in Gen. xxx. which bears on the subject of Jacob's stratagem with Laban's sheep is involved in considerable perplexity, and Jacob's conduct in this matter has been severely and uncompromisingly condemned by some writers. It is altogether impossible to account for the complete success which attended his device of setting peeled rods before the ewes and she-goats as they came to drink in the watering troughs, on *natural grounds*. We must agree with the Greek fathers and ascribe the production of Jacob's spotted sheep and goats to Divine agency. In Gen. xxxi. 5-13, where Jacob expressly

states that his success was due to Divine interference, it is hard to believe that Jacob is uttering nothing but a tissue of falsehoods. We are aware that a still graver difficulty in the minds of some persons remains, if the above explanation be adopted, but we have no other alternative. As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our Blessed Lord (Is. liii. 7; Acts viii. 32, &c.). The relation that exists between Christ, "the chief Shepherd," and His members, is beautifully compared to that which in the East is so strikingly exhibited by the shepherds to their flocks.

Broad-tailed Sheep.

the. One of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii. 1, 32; xii. 39). It stood between the tower of Meah and the chamber of the corner (iii. 32, 1) or gate of the guard-house (xii. 39, A. V. "prison-gate"). The latter seems to have been at the angle formed by the junction of the wall of the city of David with that of the city of Jerusalem proper, having the sheep-gate on the north of it. The position of the sheep-gate may therefore have been on or near that of the *Bab el-Kattân*.

Sheep-market, the (John v. 2). The word "market" is an interpolation of our translators, possibly after Luther, who has *Schafhaus*. The words of the original are ἐν τῇ προβατικῇ, to which should probably be supplied not market, but gate, πυλῆ, as in the LXX. version of the passages in Nehemiah quoted in the foregoing article.

Shehari'ah. A Benjamite, son of Jehoram (1 Chr. viii. 26).

Shekel. In a former article [MONEY] a full account has been given of the coins called shekels, which are found with inscriptions in the Samaritan character; so that the present article will only contain notices of a few particulars relating to the Jewish coinage which did not fall within the plan of the former. It may, in the first place, be desirable to mention, that although some shekels are found with Hebrew letters instead of Samaritan, these are undoubtedly all forgeries. *Ramban*, i. e. *Rabbi-Moses-Bar-Nachman*, who lived about the commencement of the 13th century, describes a shekel which he had seen, and of which the Cu-

Itaenans read the inscription with ease. The explanation which they gave of the inscription was, on one side: *Shekel ha-Shekalim*, "the shekel of shekels," and on the other "Jerusalem the Holy." The former was doubtless a misinterpretation of the usual inscription "the shekel of Israel;" but the latter corresponds with the inscription on our shekels (Bayer, *De Numis.* p. 11). But the most important passage of all is that in which R. Azarias de Rossi quotes the description of a shekel seen by Ramban at St. Jean d'Acre, A.D. 1210. He gives the inscriptions as above, "the Shekel of Shekels," and "Jerusalem the Holy;" but he also determines the weight, which he makes about *half an ounce*. We find, therefore, that in early times shekels were known to the Jewish Rabbis with Samaritan inscriptions, corresponding with those now found (except in one point, which is probably an error), and corresponding with them in weight. We believe that W. Postell is the first Christian writer who saw and described a shekel. He was a Parisian traveller who visited Jerusalem early in the 16th century. Postell gives a very bad woodcut of one of these shekels, but the inscription is correct. He was unable to explain the letters over the vase, which soon became the subject of a discussion among the learned men of Europe, which lasted for nearly two centuries. The correspondence of the newly-found coins with the earlier description is almost demonstrative. But they bear such undoubted marks of genuineness, that no judge of ancient coins could doubt them for a moment. On the contrary, to a practised eye, those with *Hebrew* inscriptions bear undoubted marks of spuriousness. Among the symbols found on this series of coins is one which is considered to represent that which was called *Lulab* by the Jews. This term was applied to the branches of the three trees mentioned in Lev. xviii. 40, which are thought to be the Palm, the Myrtle, and the Willow. The symbol on the Reverse of the shekels, representing a twig with three buds, appears to bear more resemblance to the buds of the pomegranate than to any other plant. The following list is given by Cavedoni as an enumeration of *all* the coins which can be attributed with any certainty to Simon Maccabaeus.—I. Shekels of three years, with the inscription *Shekel Israel* on the Obverse with a Vase, over which appears (1) an *Alph*; (2) the letter *Shin* with a *Beth*; (3) the letter *Shin* with a *Ginell*. R. On the Reverse is the twig with three buds, and the inscription *Jerusalem Kadoshah* or *Hak-kadoshah*.—II. The same as the above, only half the weight, which is indicated by the word *chätsi*, "a half." These occur only in the first and second years. The above are silver.—III. *Shénath Arb'a Chätsi*. The fourth year—a half. A Citron between two *Lulabs*. R. *Lugeulath Tsiyon*, "Of the Liberation of Zion." A Palm-tree between two baskets of fruit.—IV. *Shénath Arb'a, Rebs'a*. The fourth year—a fourth. Two *Lulabs*. R. "Of the Liberation of Zion,"—as before. Citron-finit.—V. *Shénath Arb'a*. The fourth year. *Lulab* between two Citrons. R. *Lugeulath Tsiyon*, as before. The Vase as on the shekel and half-shekel. These are of copper. In the course of 1862 a work of considerable importance was published at Breslau by Dr. M. A. Levy, entitled *Geschichte der Jüdischen Münzen*. There are one or two points on which it is desirable to state the views of the author, especially as he quotes coins which have only be-

come known lately. Some coins have been described in the *Revue Numismatique* (1860, p. 260 *seq.*), to which the name of Eleazar coins has been given. A coin was published some time ago by De Saulcy which is supposed by that author to be a counterfeit coin. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar (the son of Simon), who was a priest, and Simon Ben Giora, were at the head of large factions. It is suggested by Dr. Levy that money may have been struck which bore the names of both these leaders; but it seems scarcely probable, as they do not appear to have acted in concert. But a copper coin has been published in the *Revue Numismatique* which undoubtedly bears the inscription of "Eleazar the priest." Its types are—1. A vase with one handle and the inscription "Eleazar the priest," in Samaritan letters. R. A bunch of grapes with the inscription, "year one of the redemption of Israel." Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins. These coins, as well as some that bear the name of Simon or Simeon, are attributed by Dr. Levy to the period of this first rebellion. It is, however, quite clear that some of the coins bearing similar inscriptions belong to the period of Bar-cochab's rebellion (or *Barcoceb's*, as the name is often spelt) under Hadrian, because they are stamped upon denarii of Trajan, his predecessor.

She'lah. 1. The youngest son of Judah by the daughter of Shuah (Gen. xxviii. 5, 11, 14, 26, xvi. 12; Num. xxvi. 20; 1 Chr. ii. 3, iv. 21).—

2. The proper form of the name of SARAH the son of Arphaxad (1 Chr. i. 18, 24).

She'lanites, the. The descendants of SHELAH 1 (Num. xxvi. 20).

Shelemiah. 1. One of the sons of Bani in the time of Ezra (Ezr. x. 39).—2. The father of Hananiah (Neh. iii. 30).—3. A priest in the time of Nehemiah (Neh. xiii. 13).—4. The father of Jehucal, or Jucal, in the time of Zedekiah (Jer. xxxvii. 3).—5. The father of Irijah, the captain of the ward who arrested Jeremiah (Jer. xxxvii. 13).—6. The same as MESHELEMIAM and SHALUM 8 (1 Chr. xvi. 14).—7. Another of the sons of Bani in the time of Ezra (Ezr. x. 41).—8. Ancestor of Jehudi in the time of Jehoakim (Jer. xxxvi. 14).—9. Son of Abdeel; one of those who received the orders of Jehoakim to take Baruch and Jeremiah (Jer. xxxvi. 26).

She'leph. Gen. x. 26; 1 Chr. i. 20. The second in order of the sons of Joktan. The tribe which sprang from him has been satisfactorily identified, both in modern and classical times; as well as the district of the Yemen named after him. Sheleph is found where we should expect to meet with him, in the district (*Mikhlaß*, as the ancient divisions of the Yemen are called, by the Arabs) of Sulaf, which appears to be the same as Niebuhr's *Sälie*, written in his map *Selfia*. Besides this geographical trace of Sheleph, we have the tribe of Shelef or *Shulaf*. Yákrout in the *Mocjam*, s. v., says, "Es-Selif or Es-Sulaf they are two ancient tribes of the tribes of Yemen; Hishám Ibn-Mohammed says they are the children of Yuktán (Joktan); . . . And a district in El-Yemen is named after the Sulaf.

El-Kalkasander says, "El-Sulaf, called also Beni-s-Silfān, a tribe of the descendants of Kahtān (Joktan)." . . . Yākot also says that El-Muntabik was an idol belonging to Es-Sulaf. Finally, according to the *Kīmao*, Sulaf was a branch-tribe of Dhu-l-Killa.

Shel'sh, son of Helem (1 Chr. vii. 35).

Shel'omi. An Asherite, father of Ahihud (Num. xxiv. 27).

Shel'omith. 1. The daughter of Dibri of the tribe of Dan (Lev. xxiv. 11).—2. The daughter of Zerubbabel (1 Chr. iii. 19).—3. Chief of the Izharites (1 Chr. xxiii. 18).—4. A descendant of Eliezer the son of Moses, in the reign of David (1 Chr. xxvi. 25, 26, 28).—5. A Gershonite, son of Shimei (1 Chr. xxiii. 9). "Shimei" is probably a mistake.—6. According to the present text, the sons of Shelomith, with the son of Josphiah at their head, returned from Babylon with Ezra (Ezr. viii. 10). There appears, however, to be an omission, and the true reading is probably, "Of the sons of Bani, Shelomith the son of Josphiah."

Shel'omoth. The same as SHELOMITH 3 (1 Chr. xxiv. 22).

Shel'miel. The son of Zurishaddai, and prince of the tribe of Simeon at the time of the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19).

Shem. The eldest son of Noah, born (Gen. v. 32) when his father had attained the age of 500 years. He was 98 years old, married, and childless, at the time of the Flood. After it, he, with his father, brothers, sisters-in-law, and wife, received the blessing of God (ix. 1), and entered into the covenant. Two years afterwards he became the father of Arphaxad (xi. 10), and other children were born to him subsequently. With the help of his brother Japheth, he covered the nakedness of their father, which Canaan and Ham did not care to hide. In the prophecy of Noah which is connected with this incident (ix. 25-27), the first blessing falls on Shem. He died at the age of 600 years. Assuming that the years ascribed to the patriarchs in the present copies of the Hebrew Bible are correct, it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. And when Shem died, Abraham was 148 years old, and Isaac had been 9 years married. The portion of the earth occupied by the descendants of Shem (x. 21-31) intersects the portions of Japheth and Ham, and stretches in an uninterrupted line from the Mediterranean Sea to the Indian Ocean. Beginning at its north-western extremity with Lydin, it includes Syria (Aram), Chaldaea (Arphaxad), parts of Assyria (Asshur), of Persia (Elam), and of the Arabian Peninsula (Joktan).

Shem'a. One of the towns of the south of Judah (Josh. xv. 26). In the list of the towns of Simeon selected from those in the south of Judah, Sheba takes the place of Shema, probably by an error of transcription or a change of pronunciation.

Shem'a. 1. A Reubenite, ancestor of Bela (1 Chr. v. 8).—2. Son of Elpal (1 Chr. viii. 13). Probably the same as SHIMMI.—3. One of those who stood at Ezra's right hand when he read the Law to the people (Neh. viii. 4).

Shem'aah. A Benjaminite of Gibeah, and father of Ahiezer and Joash (1 Chr. xii. 3).

Shemai'ah. 1. A prophet in the reign of Rehoboam. When the king had assembled 180,000 men of Benjamin and Judah to reconquer the

northern kingdom after its revolt, Shemaiah was commissioned to charge them to return to their homes, and not to war against their brethren (1 K. xii. 22; 2 Chr. xi. 2). His second and last appearance upon the stage was upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak king of Egypt (2 Chr. xii. 5, 7). He wrote a chronicle containing the events of Rehoboam's reign (2 Chr. xii. 15).—2. The son of Shechaniah, among the descendants of Zerubbabel (1 Chr. iii. 22). He was keeper of the east gate of the city, and assisted Nehemiah in restoring the wall (Neh. iii. 29).—3. Ancestor of Ziza, a prince of the tribe of Simeon (1 Chr. iv. 37). Perhaps the same as SHIMEI 6.—4. Son of Joel a Reubenite; perhaps the same as SHEMA (1 Chr. v. 4).—5. Son of Hasshub, a Merarite Levite (1 Chr. ix. 14; Neh. xi. 15).—6. Father of Obadiah, or Abda, a Levite (1 Chr. ix. 16).—7. Son of Elizaphan, and chief of his house in the reign of David (1 Chr. xv. 8, 11).—8. A Levite, son of Nethaneel, and also a scribe in the time of David (1 Chr. xxiv. 6).—9. The eldest son of Obed-edom the Gittite (1 Chr. xxvi. 4, 6, 7).—10. A descendant of Jeduthun the singer who lived in the reign of Hezekiah (2 Chr. xxix. 14).—11. One of the sons of Adonikam who returned with Ezra (Ezr. viii. 13).—12. One of the "heads" whom Ezra sent for to his camp by the river of Ahava, for the purpose of obtaining Levites and ministers for the Temple from "the place Casiphia" (Ezr. viii. 16).—13. A priest of the family of Harim, who put away his foreign wife at Ezra's bidding (Ezr. x. 21).—14. A layman of Israel, son of another Harim, who also had married a foreigner (Ezr. x. 31).—15. Son of Delaiah the son of Mehetabeel, a prophet in the time of Nehemiah (Neh. vi. 10).—16. The head of a priestly house who signed the covenant with Nehemiah (Neh. x. 8). His family went up with Zerubbabel, and were represented in the time of Joiakim by Jehonathan (Neh. xii. 6, 18). Probably the same who is mentioned again in Neh. xii. 35.—17. One of the princes of Judah at the time of the dedication of the Wall of Jerusalem (Neh. xii. 34).—18. One of the choir on the same occasion (Neh. xii. 36).—19. A priest who blew a trumpet on the same occasion (Neh. xii. 42).—20. Shemaiah the Nehelamite, a false prophet in the time of Jeremiah (Jer. xxix. 24-32).—21. A Levite in the reign of Jehoshaphat (2 Chr. xvii. 8).—22. A Levite in the reign of Hezekiah (2 Chr. xxxi. 15).—23. A Levite in the reign of Josiah, who assisted at the solemn passover (2 Chr. xxxv. 9).—24. The father of Urijah of Kirjath-jearim (Jer. xxvi. 20).—25. The father of Delaiah (Jer. xxxvi. 12).

Shemariah. 1. One of the Benjaminite warriors who came to David at Ziklag (1 Chr. xii. 5).—2. One of the family of Harim, a layman of Israel, who put away his foreign wife in the time of Ezra (Ezr. x. 32).—3. One of the family of Bani, under the same circumstances as the preceding (Ezr. x. 41).—4. A prophet in the time of Hezekiah (2 Chr. xxxi. 15).—5. A prophet in the time of Josiah, who assisted at the solemn passover (2 Chr. xxxv. 9).—6. The father of Urijah of Kirjath-jearim (Jer. xxvi. 20).—7. The father of Delaiah (Jer. xxxvi. 12).

Shem'ber. King of Zebulun, and ally of the king of Sodom when he was attacked by the northern invaders under Chedorlaomer (Gen. xiv. 2).

Shem'er. The owner of the hill on which the city of Samaria was built (1 K. xvi. 24), and after whom it was called *Shomeron* by its founder Omri who bought the site for two silver talents.

Shem'ida. A son of Gilead (Num. xxvi. 32; Josh. xvii. 2).

Shem'idah. *Shemida the son of Gilead (1 Chr. vii. 19).

Shemida'ites, the. The descendants of Shemida the son of Gilead (Num. xxvi. 32). They obtained their lot among the male children of Manasseh (Josh. xvii. 2).

Shem'inith. The title of Ps. vi. is: "To the chief Musician on Neginoth upon Shem'inith," or "the eighth," as the margin of the A. V. has it. A similar direction is found in the title of Ps. xii. (comp. 1 Chr. xv. 21). The LXX. in both passages renders *ἐπὶ τῆς ὀγδόης*, and the Vulgate *pro octava*. The Geneva Version gives "upon the eighth tune." Most Rabbinical writers, as Rashi and Aben Ezra, follow the Targum on the Psalms in regarding it as a harp with eight strings; but this has no foundation, and depends upon a misconstruction of 1 Chr. xv. 21. Gesenius says it denotes the *hiss*, in opposition to Alamoth (1 Chr. xv. 20), which signifies the *treble*. Others, with the author of *Shille Haghibborin*, interpret, "the *sheminith*" as the *octave*. It seems most probable that Sheminith denotes a certain air known as the eighth, or a certain key in which the Psalm was to be sung.

Shemi'ramoth. 1. A Levite of the second degree, in the choir formed by David (1 Chr. xv. 18, 20, xvi. 5).—2. A Levite in the reign of Jehoshaphat (2 Chr. xvii. 8).

Shemitic Languages and Writing. INTRODUCTION, §§1-3.—1. The expressions, "Shemitic family," and "Shemitic languages," are based, as is well known, on a reference to Gen. x. 21 seqq. Subsequently, the obvious inaccuracy of the expression has led to an attempt to substitute others,

such as Western Asiatic, or Syro-Arabic—this last a happily chosen designation, as bringing at once before us the two geographical extremes of this family of languages. But the earlier, though incorrect one, has maintained its ground: and for purposes of convenience we shall continue to use it. 2. It is impossible to lay down with accuracy the boundaries of the area, occupied by the tribes employing so-called Shemitic dialects. For general purposes, the highlands of Armenia may be taken as the Northern boundary—the river Tigris and the ranges beyond it as the Eastern—and the Red Sea, the Levant, and certain portions of Asia Minor as the Western. 3. Varieties of the great Shemitic language-family are to be found in use in the following localities within the area named. In those ordinarily known as Syria, Mesopotamia, Babylonia, and Assyria, there prevailed Aramaic dialects of different kinds, e. g. Biblical Chaldaic—that of the Targums and of the Syriac versions of Scripture—to which may be added other varieties of the same stock—such as that of the Palmyrene inscriptions—and of different Sabian fragments. Along the Mediterranean seaboard, and among the tribes settled in Canaan, must be placed the home of the language of the canonical books of the Old Testament, among which were interspersed some relics of that of the Phœnicians. In the south, amid the seclusion of Arabia, was preserved the dialect destined at a subsequent period so widely to surpass its sisters in the extent of territory over which it is spoken. A variety, allied to this last, is found to have been domiciliated for a long time in Abyssinia. The following table is given by Professor M. Müller:—

GENEALOGICAL TABLE OF THE SHEMITIC FAMILY OF LANGUAGES.

Living Languages	Dead Languages	Classes.
Dialects of Arabic	Ethiopic	} Arabic, or Southern. Hebraic.
" Aramaic	Hiyyaritic Inscriptions	
the Jews	Biblical Hebrew	} Middle. Aramaic.
	Samaritan (Pentateuch)	
Neo-Syriac .	Carthaginian, Phœnician Inscriptions	} Northern.
	Chaldee (Masora, Talmud, Targum, Biblical Chaldee)	
	Syriac (Peshito, 2nd cent. A.D.)	
	Cuneiform Inscriptions of Babylon and Nineveh	

There is much that is probable in the notion held by more than one scholar, that the spoken dialect of the Shemitic tribes external to Arabia (in the earliest periods of their history) closely resembled, or was in fact a better variety of Aramaic. 4. The history of the Shemitic people tells us of various movements undertaken by them, but supplies no remarkable instances of their *assimilating*. Though carrying with them their language, institutions, and habits, they are not found to have struck root, but remained strangers and exotics in several instances, passing away without traces of their occupancy. And the same inveterate isolation still characterizes tribes of the race, when on new soil. 5. The peculiar elements of the Shemitic character will be found to have exercised considerable influence on their literature. Indeed, accordance is seldom more close, than in the case of the Shemitic race (where not checked by external causes), between the generic type of thought, and its outward expression. Like other languages, this one is mainly resolvable into monosyllabic primitives. These monosyllabic primitives may still be traced in particles, and words least exposed to the ordinary causes of variation. But differences are observable in the

principal parts of speech—the verb and the noun. Secondary notions, and those of relation, are grouped round the primary ones of meaning in a single word, susceptible of various internal changes according to the particular requirement. Another leading peculiarity of this branch of languages, is the absence (save in the case of proper names) of compound words—to which the sister family is indebted for so much life and variety. In the Shemitic family—agglutination, not logical sequence—Independent roots, not compound appropriate derivations from the same root, are used to express respectively a train of thought, or different modifications of a particular notion.

§§ 6-13. HEBREW LANGUAGE.—PERIOD OF GROWTH.—6. The Hebrew language is a branch of the so-called Shemitic family, extending over a large portion of South-Western Asia.* In the north (or Aram, under which designation are comprehended Syria, Mesopotamia, Babylonia), and under a climate partially cold and ungenial—in the close proximity of tribes of a different origin, not unfrequently masters by conquest—the Shemitic dialect became in places harsher, and its general character less pure and distinct. Towards the south,

opposite causes contributed to maintain the language in its purity. Originally, the language of the Hebrews presented more affinities with the Aramaic, in accordance with their own family accounts, which bring the patriarchs from the N.E.,—more directly from northern Mesopotamia.—7. Two questions, in direct connexion with the early movements of the ancestors of the subsequent Hebrew nation, have been discussed with great earnestness by many writers—the first bearing on the causes which set the Terachite family in motion towards the south and west; the second, on the origin and language of the tribes in possession of Canaan at the arrival of Abraham. Scripture only tells us that, led in a way which they knew not, chosen Shemitic wanderers of the lineage of Arphaxad, set forth on the journey fraught with such enduring consequences to the history of the world, as recorded in Scripture, in its second stage of progress. There is nothing unreasonableness in the thought, that the movement of Terah from Ur of the Chaldees was caused by Divine suggestion, acting on a mind ill at ease in the neighbourhood of Cushite thought and habits. The leading particulars of that memorable journey are preserved to us in Scripture, which is also distinct upon the fact, that the new comers and the early settlers in Canaan found no difficulty in conversing. On what grounds is the undoubted similarity of the dialect of the Terachites, to that of the occupants at the time of their immigration, to be explained? Of the origin of its earliest occupants, history records nothing certain. Some claim for the early inhabitants of Asia Minor a Japhethian origin. Others affirm the descent of these early tribes from Lud, the fourth son of Shem.—8. Another view is that put forward by our countryman Rawlinson, and shared by other scholars. "Either from ancient monuments, or from tradition, or from the dialects now spoken by their descendants, we are authorised to infer that at some very remote period, before the rise of the Shemitic or Arian nations, a great Scythic" (= Hamitic) "population must have overspread Europe, Asia, and Africa, speaking languages all more or less dissimilar in their vocabulary, but possessing in common certain organic characteristics of grammar and construction." And this statement would appear, in its leading features, to be historically sound. As was to be anticipated, both from its importance and from its extreme obscurity, few subjects connected with Biblical antiquities have been more warmly discussed than the origin of the Canaanitish occupants of Palestine. Looking to the authoritative records (Gen. ix. 18, x. 6, 15-20) there would seem to be no reason for doubt as to the Hamitic origin of these tribes. Nor can the singular accordances discernible between the language of these Canaanitish (= Hamitic) occupants and the Shemitic family be justly pleaded in bar of this view of the origin of the former. "If we examine the invaluable ethnography of the Book of Genesis we shall find that, while Ham is the brother of Shem, and therefore a relationship between his descendants and the Shemitic nations fully recognised, the Hamites are described as those who previously occupied the different countries into which the Aramaean race afterwards forced their way. Thus Scripture (Gen. x. seqq.) attributes to the race of Ham not only the aboriginal population of Canaan, with its wealthy and civilised communities on the coast, but also the

mighty empires of Babylon and Nineveh, the rich kingdoms of Sheba and Havilah in Arabia Felix, and the wonderful realm of Egypt. There is every reason to believe—indeed in some cases the proof amounts to demonstration—that all these Hamitic nations spoke languages which differed only dialectically from those of the Syro-Arabic family."—9. Connected with this subject of the relationship discernible among the early Noahidae is that of the origin and extension of the art of writing among the Shemites, the branch with which we are at present concerned. The question would seem to be, in the case of the Terachite branch of the Shemitic stock, did they acquire the art of writing from the Phoenicians, or Egyptians, or Assyrians—or was it evolved from given elements among themselves? [WRITING.]—10. Between the dialects of Aram and Arabia, that of the Terachites occupied a middle place. The dialect which we are now considering has been ordinarily designated as that of the Hebrews, rather than of the Israelites. Probably the term "Hebrews" should be regarded as designating all the Shemitic-speaking tribes which had migrated to the south from the other side of the Euphrates; and in that case might have been applied by the earlier inhabitants of Canaan.—11. Many causes, all obvious and intelligible, combine to make difficult, if not impossible, any formal or detached account of the Hebrew language, anterior to its assuming a written shape. The extant remains of Hebrew literature are destitute of any important changes in language, during the period from Moses to the Captivity. A certain and intelligible amount of progress, but no considerable or remarkable difference (according to one school), is really observable in the language of the Pentateuch, the Books of Joshua, Judges, Ruth, Samuel, the Kings, the Psalms, or the prophecies of Isaiah, Hosea, Amos, Joel, Micah, Nahum, Habakkuk, and Jeremiah—widely separated from each other by time as are many of these writings. At the first sight, and to modern judgment, much of this appears strange, and possibly untenable; but an explanation of the difficulty is sought in the unbroken residence of the Hebrew people, without removal or molestation. An additional illustration of the immunity from change is to be drawn from the history of the other branches of the Shemitic stock.—12. Moreover, is it altogether a wild conjecture to assume as not impossible, the formation of a sacred language among the chosen people, at so marked a period of their history as that of Moses? Such a language would be the sacred and learned one—that of the few—and no clearer proof of the limited hold exercised by this classical Hebrew on the ordinary language of the people can be required than its rapid withdrawal, after the Captivity, before a language composed of dialects hitherto disregarded, but still living in popular use.—13. A few remarks may not be out of place here with reference to some leading linguistic peculiarities in different books of the O. T. For ordinary purposes the old division into the golden and silver ages is sufficient. A detailed list of peculiarities observable in the Pentateuch is given by Scholz, divided under lexical, grammatical, and syntactical heads. With the style of the Pentateuch that of Joshua very closely corresponds. In the Book of Ruth the style points to an earlier date, the asserted Aramaisms being probably relics of the popular dialect. The same linguistic peculiarities are observable in the Books of

Samuel. The Books of Job and Ecclesiastes contain many asserted Aramaisms, which have been pleaded in support of a late origin of these two poems. In the case of the first, it is argued (on the other side) that these peculiarities are not to be considered so much poetical ornaments as ordinary expressions and usages of the early Hebrew language. As respects the Book of Ecclesiastes, in many instances the peculiarities of style seem rather referable to the secondary Hebrew of a late period of Hebrew history than to an Aramaic origin. In addition to roughness of diction, so-called Aramaisms are to be found in the remains of Jonah and Hosea, and expressions closely allied in those of Amos. This is not the case in the writings of Nahum, Zephaniah, and Habakkuk, and in the still later ones of the minor prophets; the treasures of past times, which filled their hearts, served as models of style. In the case of Ezekiel, Jewish critics have sought to assign its peculiarities of style and expression to a secondary Hebrew origin. The peculiarities of language in Daniel belong to another field of inquiry; and under impartial consideration more difficulties may be found to disappear, as in the case of those with regard to the asserted Greek words. With these exceptions, few traces of dialects are discernible in the small remains still extant, for the most part composed in Judah and Jerusalem. The Aramaic elements are most plainly observable in the remains of some of the less educated writers. The general style of Hebrew prose literature is plain and simple, but lively and pictorial, and rising with the subject, at times, to considerable elevation. But the requisite elevation of poetical composition led to the introduction of many expressions which we do not commonly find in Hebrew prose literature. For the origin and existence of these we must look especially to the Aramaic. But from the earliest period of the existence of a literature among the Hebrew people to B.C. 600, the Hebrew language continued singularly exempt from change. From that period the Hebrew dialect will be found to give way before the Aramaic.

§§ 14-19. ARAMAIC LANGUAGE.—SCHOLASTIC PERIOD.—14. The language ordinarily called Aramaic is a dialect of the great Shemitic family, deriving its name from the district over which it was spoken, Aram = the high or hill country (as Canaan = the low country). In general practice Aram was divided into Eastern and Western. The dialects of these two districts were severally called Chaldaic and Syriac—designations not happily chosen, but, as in the case of Shemitic, of too long currency to be changed without great inconvenience. The eastern boundary of the Shemitic languages is obscure; but this much may be safely assumed, that this family had its earliest settlement on the upper basin of the Tigris, from which extensions were doubtless made to the south.—15. Without entering into the discussions respecting the exact propriety of the expressions, it will be sufficient to follow the ordinary division of the Aramaic into the Chaldaic or Eastern, and the Western or Syriac dialects. (1.) The earliest extant fragments are the well-known ones to be found at Dan. ii. 4-vii. 28; Ezr. iv. 8-vi. 18, vii. 12-26; Jer. x. 11. Affinities are to be traced, without difficulty, between these fragments, which differ again in some very marked particulars from the earliest Targums. (2.) The Syro-Chaldaic originals of several of the Apocryphal books are lost; many

Hebraisms were engrafted on the Aramaic as spoken by the Jews, but the dialect of the earlier Targums contains a perceptibly smaller amount of such admixture than later compilations. (3.) The language of the Gemaras is extremely composite—that of the Jerusalem Gemara being less pure than that of Babylon. Still lower in the scale are those of the fast-expiring Samaritan dialect and that of Galilee. (4.) The curious book Zohar, among its foreign additions, contains very many from the Arabic. (5.) The Masora, brief and symbolical, is chiefly remarkable for what may be called vernacular peculiarities. (6.) The Christian or ecclesiastical Aramaic is that ordinarily known as Syriac—the language of early Christianity, as Hebrew and Arabic, respectively, of the Jewish religion and Mahometanism. a. The dialect of Galilee appears to have been marked by confusion of letters **ב** and **בּ**, **ז** with **ד**—and aphæresis of the guttural—a habit of connecting words otherwise separate—carelessness about vowel-sounds,—and the substitution of **א** final for **ה**. b. The Samaritan dialect appears to have been a compound of the vulgar Hebrew with Aramaic. A confusion of the mute letters, and also of the gutturals, with a predilection for the letter **ו**, has been noticed. c. The dialect called that of Jerusalem or Judea, between which and the purer one of the Babylonish Jews so many invidious distinctions have been drawn, seems to have been variable, from frequent changes among the inhabitants—and also to have contained a large amount of words different from those in use in Babylonia—besides being somewhat incorrect in its orthography. The small amount of real difference between the two branches of Aramaic has been often urged as an argument for making any division superfluous. But it has been well observed by Fürst, that each is animated by a very different spirit. The chief relics of Chaldaic, or Eastern Aramaic—the Targums—are filled with traditional faith in the varied pages of Jewish history. Western Aramaic, or Syriac literature, on the other hand, is essentially Christian. Accordingly, the tendency and linguistic character of the first is essentially Hebrew, that of the second Hellenic. One is full of Hebraisms, the other of Hellenisms.—16. Perhaps few lines of demarcation are traced with greater difficulty than those by which one age of a language is separated from another. This is remarkably the case in respect of the cessation of the Hebrew, and the ascendancy of the Aramaic, or, as it may be put, in respect of the date at which the period of growth terminates, and that of exposition and scholasticism begins, in the literature of the chosen people.—17. In the scholastic period, of which we now treat, the schools of the prophets were succeeded by “houses of inquiry.” Two ways only of extending the blessings hence derivable, seem to have presented themselves to the national mind by commentary (*targum*) and inquiry (*derash*). In the first of these—Targumic literature, but limited openings occurred for critical studies; in the second, still fewer. The vast storehouse of Hebrew thought reaching through so many centuries—known by the name of the Talmud—and the collections of a similar nature called the Midrashim, extending in the case of the first, dimly but tangibly, from the period of the Captivity to the times of Rabbi Asher—the closer of the Talmud (A.D. 426), contain comparatively few accessions to linguistic knowledge.—18. Of the

other main division of the Aramaic language—the Western or Syriac dialect—the earliest existing document is the Peshito version of the Scriptures, which not improbably belongs to the middle of the second century. The Syrian dialect is thickly studded with foreign words—Arabic, Persian, Greek, and Latin, especially with the third. A comparison of this dialect with the Eastern branch will show that they are closely allied in all the most important peculiarities of grammar and syntax, as well as in their store of original words—the true standard in linguistic researches.—19. The Chaldaic paraphrases of Scripture are exceedingly valuable for the light which they throw on Jewish manners and customs, and the meaning of passages otherwise obscure, as likewise for many happy renderings of the original text. But they are valuable also on higher reasons—the Christian interpretation put by their authors on controverted passages. A comparative estimate is not yet attainable, as to what in Targumic literature is the pure expression and development of the Jewish mind, and what is of foreign growth. But, as has been said, the Targums and kindred writings are of considerable dogmatical and exegetical value; and a similar good work has been effected by means of the cognate dialect, Western Aramaic or Syriac. From the 3rd to the 9th century, Syriac was to a great part of Asia—what in their spheres Hellenic Greek and mediæval Latin have respectively been—the one ecclesiastical language of the district named.

§§ 20-24. ARABIC LANGUAGE.—PERIOD OF REVIVAL.—20. The early population of Arabia, its antiquities and peculiarities, have been described under ARABIA. We find Arabia occupied by a confluence of tribes, the leading one of undoubted Ishmaelitic descent—the others of the seed or lineage of Abraham, and blended by alliance, language, neighbourhood, and habits. Before these any aboriginal inhabitants must have disappeared. We have seen that the peninsula of Arabia lay in the track of Cushite civilization, in its supposed return-course towards the north-east. There may now be found abundant illustration of the relationship of the Himyaritic with the early Semitic; and the language of the Ehlkil (or Mahrah) presents us with the singular phenomenon of a dialect less Arabic than Hebrew, and possessing close affinity with the Ghez, or Ethiopian.—21. The affinity of the Ghez (Cush? the sacred language of Ethiopia) with the Semitic has been long remarked. In its lexical peculiarities, the Ghez is said to resemble the Aramaic, in its grammatical the Arabic. The alphabet is very curious, differing from Semitic alphabets in the number, order, and name and form of the letters, by the direction of the writing, and especially by the form of vowel notation.—22. Internal evidence demonstrates that the Arabic language, at the time when it first appears on the field of history, was being developed in its remote and barren peninsular home. A well-known legend speaks of the present Arabic language as being a fusion of different dialects, effected by the tribe of Koreish settled round Mecca, and the reputed wardens of the Caaba. In any case, the paramount purity of the Koreishite dialect is asserted by Arabic writers on grammar. But the recognition of the Koran, as the ultimate standard in linguistic as in religious matters, established in Arabic judgment the superior purity of the Koreishite dialect. That the Arabs possessed a litera-

ture anterior to the birth of Mohammed, and expressed in a language marked with many grammatical peculiarities, is beyond doubt. Even in our own times, scholars have seemed unwilling altogether to abandon the legend—how at the fair of Ocâdh goods and traffic—wants and profit—were alike neglected, while bards contended amid their listening countrymen, anxious for such a verdict as should entitle their lays to a place among the Moallakat, the *Avadhûara* of the Caaba, or national temple at Mecca. But the appearance of Mohammed put an end for a season to commerce and bardic contests; nor was it until the work of conquest was done that the faithful resumed the pursuits of peace. The earliest reliable relics of Arabic literature are only fragments, to be found in what has come down to us of pre-Islamite compositions. And various arguments have been put forward against the probability of the present form of these remains being their original one. Their obscurities, it is contended, are less those of age than of individual style, while their uniformity of language is at variance with the demonstrably late cultivation and ascendancy of the Koreishite dialect. Another, and not a feeble argument, is the utter absence of allusion to the early religion of the Arabs. It is not within the scope of this sketch to touch upon the theological teaching of the Koran, its objects, sources, merits, or deficiencies. But its style is very peculiar. Assuming that it represents the best forms of the Koreishite dialect about the middle of the 7th century, we may say of the Koran, that its linguistic approached its religious supremacy. The Koran may be characterized as marking the transition from versification to prose, from poetry to eloquence.—23. With regard to the value of Arabic in illustration, two different judgments obtain. According to one, all the lexical riches and grammatical varieties of the Semitic family are to be found combined in the Arabic.—24. Another school maintains very different opinions. The comparatively recent date (in their present form at least) and limited amount of Arabic remains are pleaded against its claims as a standard of reference in respect of the Hebrew. Its verbal copiousness, elaborate mechanism, subtlety of thought, wide and diversified fields of literature, cannot be called in question. But it is urged (and colourably) that its riches are not all pure metal, and that no great attention to etymology has been evinced by native writers on the language. Undoubtedly schools such as that of Albert Schultens (d. 1730) have unduly exalted the value of Arabic in illustration; but in what may be designated as the field of lower criticism its importance cannot be disputed.

§§ 25-32. STRUCTURE OF THE SHEMITIC LANGUAGES.—25. The question as to whether any large amount of primitives in the Semitic languages is fairly deducible from imitation of sounds, has been answered very differently by high authorities. Gesenius thought instances of onomatopoeia very rare in extant remains, although probably more numerous at an early period. Hoffmann's judgment is the same, in respect of Western Aramaic. On the other hand, Renan qualifies his admission of the identity of numerous Semitic and Japhetic primitives by a suggestion that these, for the most part, may be assigned to biliteral words, originating in the imitation of the simplest and most obvious sounds. But more probably "the

460 or 500 roots which remain as the constituent elements in different families of languages are not interjections, nor are they imitations. They are *phonetic* types, produced by a power inherent in human nature."—26. The deeply curious inquiry, as to the extent of affinity still discernible between Shemitic and Japhetic roots, belongs to another article. Nothing in the Scripture which bears upon the subject can be fairly pleaded against such an affinity being possible. But in treating the Shemitic languages in connexion with Scripture, it is most prudent to turn away from this tempting field of inquiry to the consideration of the simple elements—the primitives—the true base of every language, in that these, rather than the mechanism of grammar are to be regarded as exponents of internal spirit and character.—27. Humboldt has named two very remarkable points of difference between the Japhetic and Shemitic language-families. The first peculiarity is the trilateral root (as the language is at present known)—the second the expression of significations by consonants, and *relations* by vowels—both forming part of the flexions within words, so remarkable in the Shemitic family. In the opinion of the same scholar, the prevalent trilateral root was substituted for an earlier or biliteral, as being found impracticable and obscure in use. Traces of this survive in the rudest, or Aramaic, branch, where what is pronounced as one syllable, in the Hebrew forms two, and in the more elaborate Arabic three—e.g. ktal, katal, katla. It is needless to say that much has been written on the question of this peculiarity being original or secondary. A writer among ourselves has thus stated the case:—"An uniform root-formation by three letters or two syllables developed itself out of the original monosyllabic state by the addition of a third letter. This tendency to enlargement presents itself in the Indo-Germanic also: but there is this difference, that in the latter monosyllabic roots remain besides those that have been enlarged, while in the other they have almost disappeared." In this judgment most will agree.—28. We now approach a question of great interest. Was the art of writing invented by Moses and his contemporaries, or from what source did the Hebrew nation acquire it? It can hardly be doubted that the art of writing was known to the Israelites in the time of Moses. Great difference of opinion has prevailed as to which of the Shemitic peoples may justly claim the invention of letters. As has been said, the award to the Phoenicians, so long unchallenged, is now practically set aside. A more probable theory would seem that which represents letters as having passed from the Egyptians to the Phoenicians and Hebrews. Either people may have acquired this accomplishment from the same source, at the same time and independently—or one may have preceded the other, and subsequently imparted the acquisition. As the Hebrew and Phœnician alphabets do correspond, and the character is less Phœnician than Hebrew, the latter people would seem to have been the first possessors of this accomplishment, and to have imparted it subsequently to the Phœnicians. The theory (now almost passed into a general belief) of an early uniform language overspreading the range of countries comprehended in Gen. x., serves to illustrate this question. According to the elaborate analysis of Lepsius, the original alphabet of the language-family, of which the Shemitic formed a part, stood as follows:—

Weak Ordinate. Labials. Gutturals.

Alph = A . Both + Gimel + Daleth = Media
He = E + I . Vav + Heth + Teth = Aspirates
Ghain = O + u Pe + Kaph + Tau = Tenues

As the processes of enunciation became more delicate, the liquids Lamed, Mem, Nun, were apparently interposed as the *third* row, with the original S, Samech, from which were derived Zain, Tsaddi, and Shin—Caph (soft *k*), from its limited functions, is apparently of later growth; and the separate existence of Resh, in many languages, is demonstrably of comparatively recent date, as distinguished from the kindred sound Lamed. In the one letter yet to be mentioned—Yod—as in Kaph and Lamed, the same scholar finds remains of the ancient vowel strokes, which carry us back to the early syllabaria, whose existence he maintains with great force and learning.—29. The history of the formation of the written characters among the Hebrews is discussed in the article WRITING. The history of the characters, ordinarily used in the Syriac (or Western) branch of the Aramaic family, is blended with that of those used in Judea. Like the square characters, they were derived from the old Phœnician, but passed through some intermediate stages. The first variety is that known by the name of Estrangelo—a heavy cumbrous character said to be derived from the Greek *στρογγύλος*, but more probably from two Arabic words signifying the writing of the Gospel. It is to be found in use in the very oldest documents. Concurrently with this, re traces of the existence of a smaller and more cursive character, very much resembling it. There are also other varieties, slightly differing—the Nestorian for example—but that in ordinary use, is the Peshito=simple (or lineal according to some). Its origin is somewhat uncertain, but probably may be assigned to the 7th century of our era. The history of the Arabic language has another peculiar feature, beyond its excessive purism, which has been alluded to, at first sight, so singular among the dwellers in the desert. Until a comparatively short time before the days of Mohammed, the art of writing appears to have been practically unknown. For the Himyarites guarded with jealous care their own peculiar character—the "musnad," or elevated; in itself unfitted for general use. Possibly different tribes might have possessed approaches to written characters; but about the beginning of the 7th century, the heavy cumbrous Cufic character (so called from Cufa, the city where it was most early used) appears to have been generally adopted. It was said to have been invented by Muramar-Ibn Murrat, a native of Babylonian Irak.—30. As in the Hebrew and Aramaic branches, so in the Arab branch of the Shemitic family, various causes rendered desirable the introduction of diacritical signs and vowel points, which took place towards the close of the 7th century of our era—not however without considerable opposition at the outset, from Shemitic dislike of innovation, and addition to the roll of instruction already complete in itself. At first a simple mark or stroke, like the diacritical line in the Samaritan MSS., was adopted to mark unusual significations. A further and more advanced stage, like the diacritical points of the Aramaic, was the employment of a point *above* the line to express sounds of a high kind, like *a* and *o*—one *below* for feebler and lower ones like *i* and *e*—and a third in the centre of the letters *for* those of a harsher kind, as distinguished from the

other two.—31. The reverence of the Jews, for their sacred writings, would have been outraged by any attempts to introduce an authoritative system of interpretation at variance with existing ones. To reduce the reading of the Scriptures to authoritative and intelligible uniformity was the object of the Masoretes, by means of a system of vowels and accents. Of the names of the inventors, or the exact time of their introduction, nothing can be stated with certainty. Their use probably began about the sixth century, and appears to have been completed about the tenth. The system has been carried out with far greater minuteness in the Hebrew, than in the two sister dialects. The Arabic grammarians did not proceed beyond three signs for *a*, *i*, *u*; the Syriac added *e* and *o*, which they represented by figures borrowed from the Greek alphabet, not very much altered. Connected with this is the system of accents, which is involved in the same obscurity of origin. But it bears rather on the relation of words and the members of sentences, than on the construction of individual words.—32. A comparison of the Shemitic languages, as known to us, presents them as very unevenly developed. In their present form the Arabic is undoubtedly the richest: but it would have been rivalled by the Hebrew had a career been vouchsafed equally long and favourable to this latter.

Shem'uel. 1. Son of Ammihud, appointed from the tribe of Simeon to divide the land of Canaan (Num. xxiv. 20).—2. **SAMUEL**, the prophet (1 Chr. vi. 33).—3. Son of Toi, and one of the chiefs of the tribe of Issachar (1 Chr. vii. 2).

Shen. A place mentioned only in 1 Sam. vii. 12. Nothing is known of it.

Shen'asar. Son of Salathiel, or Shealtiel (1 Chr. iii. 18).

Shenir. This name occurs in Dent. iii. 9; Cant. iv. 8. It is an inaccurate equivalent for the Hebrew *Senir*, the Amorite name for Mount Hermon. [SENIR.]

Shephai'm. A place mentioned only in the specification by Moses of the eastern boundary of the Promised Land (Num. xxiv. 10, 11). The ancient interpreters (Targ. Pseudojon.; Snadiah) render the name by Apameia; but it seems uncertain whether by this they intend the Greek city of that name on the Orontes, 50 miles below Antioch, or whether they use it as a synonym of Bauias or Dun, as Schwarz affirms. No trace of the name appears, however, in that direction.

Shephathiah. A Benjamite, father of MESULLAM 6 (1 Chr. ix. 8). The name is properly SHEPHATHIAH, as in the ed. of 1611.

Shephatiah. 1. The fifth son of David by his wife Abital (2 Sam. iii. 4; 1 Chr. iii. 3).—2. The family of Shephatiah, 372 in number, returned with Zerubbabel (Ezr. ii. 4; Neh. vii. 9). A second detachment of eighty, with Zediah at their head, came up with Ezra (Ezr. vii. 8).—3. The family of another Shephatiah were among the children of Solomon's servants, who came up with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).—4. A descendant of Perez, or Pharez, the son of Judah, and ancestor of Athaiah (Neh. xi. 4).—5. The son of Mattan; one of the princes of Judah who counselled Zedekiah to put Jeremiah in the dungeon (Jer. xxxviii. 1).—6. The Haruphite, or Hariphite, one of the Benjamite warriors who joined David in his retreat at Ziklag (1 Chr. xii. 5).—7. Son of Maachah, and chief of the Simeonites in the

reign of David (1 Chr. xxvii. 16).—8. Son of Jeshoshaphat (2 Chr. xxi. 2).

Shepherd. In a nomadic state of society every man, from the sheikh down to the slave, is more or less a shepherd. The progenitors of the Jews in the patriarchal age were nomads, and their history is rich in scenes of pastoral life. The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (Gen. xxx. 29 ff., xxxvii. 12 ff.), but even by their daughters (Gen. xxix. 6 ff.; Ex. ii. 19). The Egyptian captivity did much to implant a love of settled abode, and consequently we find the tribes which still retained a taste for shepherd life selecting their own quarters apart from their brethren in the Transjordanic district (Num. xxxi. 1 ff.). Henceforward in Palestine Proper the shepherd held a subordinate position. The office of the Eastern shepherd, as described in the Bible, was attended with much hardship, and even danger. He was exposed to the extremes of heat and cold (Gen. xxi. 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sycamore" or Egyptian fig (Am. vii. 14), the "husks" of the carob-tree (Luke xv. 16), and perchance the locusts and wild honey which supported the Baptist (Matt. iii. 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii. 34; Is. xxxi. 4; Jer. v. 6; Am. iii. 12); nor was he free from the risk of robbers or predatory hordes (Gen. xxxi. 39). To meet these various foes the shepherd's equipment consisted of the following articles:—a mantle, made probably of sheepskin with the fleece on, which he turned inside out in cold weather, as implied in the comparison in Jer. xliii. 12 (cf. Juv. xiv. 187); a scrip or wallet, containing a small amount of food (1 Sam. xvii. 40); a sling, which is still the favourite weapon of the Bedouin shepherd (1 Sam. xvii. 40); and, lastly, a staff, which served the double purpose of a weapon against foes, and a crook for the management of the flock (1 Sam. xvii. 40; Ps. xxiii. 4; Zech. xi. 7). If the shepherd was at a distance from his home, he was provided with a light tent (Cant. i. 8; Jer. xxxv. 7), the removal of which was easily effected (Is. xxxviii. 12). In certain localities, moreover, towers were erected for the double purpose of spying an enemy at a distance, and protecting the flock: such towers were erected by Uzziah and Jotham (2 Chr. xxvi. 10, xxvii. 4), while their existence in earlier times is testified by the name Migdal-Eder (Gen. xxxv. 21, A. V. "tower of Eder"; Mic. iv. 8, A. V. "tower of the flock"). The routine of the shepherd's duties appears to have been as follows:—In the morning he led forth his flock from the fold (John x. 4), which he did by going before them and calling to them, as is still usual in the East; arrived at the pasture, he watched the flock with the assistance of dogs (Job xxx. 1), and, should any sheep stray, he had to search for it until he found it (Ez. xxiv. 12; Luke xv. 4); he supplied them with water, either at a running stream or at troughs attached to wells (Gen. xxix. 7, xxx. 38; Ex. ii. 16; Ps. xxiii. 2); at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them "under the rod" as they entered the door of the enclosure (Lev. xxvii. 32; Ez. xx. 37), checking each sheep as it passed, by a motion of the hand (Jer. xxxiii. 13); and, finally, he watched the cu-

traces of the fola throughout the night, acting porter (John x. 3). The shepherd's office thus required great watchfulness, particularly by night (Luke ii. 8; cf. Nah. iii. 18). It also required tenderness towards the young and feeble (Is. xl. 11), particularly in driving them to and from the pasturing (Gen. xxxiii. 13). In large establishments there were various grades of shepherds, the highest being styled "rulers" (Gen. xlvii. 6), or "chief shepherds" (1 Pet. v. 4): in a royal household the title of *abbir*, "mighty," was bestowed on the person who held the post (1 Sam. xxi. 7). The hatred of the Egyptians towards shepherds (Gen. xli. 34) may have been mainly due to their contempt for the sheep itself, which appears to have been valued neither for food nor generally for sacrifice, the only district where they were offered being about the Natron lakes. It may have been increased by the memory of the Shepherd invasion.

Shephi'. Son of Shobal, of the sons of Seir (1 Chr. i. 40). Called also SHEPHO (Gen. xxxvi. 23).

She'pho. The same as SHEPHI (Gen. xxxvi. 23).

Sheph'uphan. One of the sons of Bela the first-born of Benjamin (1 Chr. viii. 5). His name is also written SHEPHUPHAM (A. V. "Shupham," Num. xxvi. 39), SHUPPIM (1 Chr. vii. 12, 15), and MUPPIM (Gen. xli. 21). [MUPPIM.]

She'rah. Daughter of Ephraim (1 Chr. vii. 24), and foundress of the two Beth-horons, and of UZZEN-SHERAH.

Sherebi'ah. A Levite in the time of Ezra, of the family of Mahli the son of Merari (Ezr. viii. 18, 24). When Ezra read the Law to the people, Sherebi'ah was among the Levites who assisted him (Neh. viii. 7). He took part in the psalm of confession and thanksgiving which was sung at the solemn fast after the Feast of Tabernacles (Neh. ix. 4, 5), and signed the covenant with Nehemiah (Neh. x. 12). He is again mentioned as among the chief of the Levites who belonged to the choir (Neh. xii. 8, 24).

Shere'sh. Son of Machir the son of Manasseh by his wife Maachah (1 Chr. vii. 16).

Shere'zer. Properly "Shaezer;" one of the messengers sent in the fourth year of Darius by the people who had returned from the Captivity to inquire concerning fasting in the fifth month (Zech. vii. 2). [REGEEMELECH.]

She'shach is a term which occurs only in Jeremiah (xxv. 26, li. 41), who evidently uses it as a synonym either for Babylon or for Babylonia. According to some commentators, it represents "Babel" on a principle well known to the later Jews—the substitution of letters according to their position in the alphabet, counting backwards from the last letter, for those which hold the same numerical position, counting in the ordinary way. It may well be doubted, however, if this fanciful practice is as old as Jeremiah. Sir H. Rawlinson has observed that the name of the moon-god, which was identical, or nearly so, with that of the city of Abraham, Ur (or Hur), "might have been read in one of the ancient dialects of Babylon as *Shis'haki*." Sheshach may stand for Ur, Ur itself, the old capital, being taken to represent the country.

Shesha'i. One of the three sons of Anak who dwelt in Hebron (Num. xiii. 22) and were driven thence and slain by Caleb at the head of the children of Judah (Josh. xv. 14; Judg. i. 10).

Shesha'n. A descendant of Jerahmeel the son of Hebron (1 Chr. ii. 31, 84, 35).

Sheshbazzar. The Chaldean or Persian name given to Zerubbabel, in Ezr. i. 8, 11, v. 14, 16; 1 Esdr. ii. 12, 15. The Jewish tradition that Sheshbazzar is Daniel, is utterly without weight. [ZERUBBABEL.]

Sheth. 1. The patriarch SETH (1 Chr. i. 1).—

2. In the A. V. of Num. xxiv. 17, the Heb. *Sheth* is rendered as a proper name, but there is reason to regard it as an appellative, and to translate, instead of "the sons of Sheth," "the sons of tumult," the wild warriors of Moab (comp. Jer. xlviii. 45).

Shetha'r (Pers. "a star").* One of the seven princes of Persia and Media, who had access to the king's presence, and were the first men in the kingdom, in the third year of Xerxes (Esth. i. 14).

Shethar-Bornai (Pers. "star of splendour"). A Persian officer of rank, having a command in the province "on this side the river" under Tatnai the satrap, in the reign of Darius Hystaspis (Ezr. v. 3, 6, vi. 6, 13). He joined with Tatnai and the Apharsachites in trying to obstruct the progress of the Temple in the time of Zerubbabel, and in writing a letter to Darius, of which a copy is preserved in Ezr. v. As regards the name Shethar-bornai, it seems to be certainly Persian. The first element of it appears as the name Shethar, one of the seven Persian princes in Esth. i. 14. The whole name is not unlike Sati-barzanes, a Persian in the time of Artaxerxes Mnemon (Ctesias, 57).

She'va. 1. The scribe or royal secretary of David (2 Sam. xx. 25). He is called elsewhere SERATAH (2 Sam. viii. 17), SHISHA (1 K. iv. 8), and SHAVSHA (1 Chr. xvi. 18).—2. Son of Caleb ben-Ihezron by his concubine Maachah (1 Chr. ii. 49).

Shew Bread. (Ex. xxv. 30, xxxv. 13, xxxix. 36, &c.), literally "bread of the face" or "faces." Within the Ark it was directed that there should be a table of shittim wood, i. e. *acacia*, two cubits in length, a cubit in breadth, and a cubit and a half in height, overlaid with pure gold, and "having a golden crown to the border thereof round about," i. e. a border or list, in order, as we may suppose, to hinder that which was placed on it from being by any accident falling off. The further description of this table will be found in Ex. xxv. 23-30, and a representation of it as it existed in the Herodian Temple forms an interesting feature in the bas-reliefs within the Arch of Titus. The accuracy of this may, as is obvious, be trusted. It exhibits one striking correspondence with the prescriptions in Exodus. We there find the following words: "and thou shalt make unto it a border of a handbreadth round about." In the sculpture of the Arch the hand of one of the slaves who is carrying the Table, and the border, are of about equal breadth. It was thought by Philo and Clement of Alexandria that the Table was a symbol of the world, its four sides or legs typifying the four seasons. In 2 Chr. iv. 19 we have mention of "the tables, whereon the shewbread was set," and at ver. 8 we read of Solomon making ten tables. The table of the second Temple was carried away by Antiochus Epiphanes (1 Macc. i. 22), and a new one made at the refurnishing of the sanctuary under Judas Maccabeus (1 Macc. iv. 49). Afterwards Ptolemy Philadelphus presented a magnificent table. The Table stood in the sanctuary together with the seven-branched candlestick and the altar of incense.

Every Sabbath twelve newly-baked loaves were put on it in two rows, six in each, and sprinkled with incense, where they remained till the following Sabbath. Then they were replaced by twelve new ones, the incense was burned, and they were eaten by the priests in the Holy Place, out of which they might not be removed. Besides these, the Shewbread Table was adorned with dishes, spoons, bowls, &c., which were of pure gold (Ex. xxv. 29). The number of loaves (twelve) is considered by Philo and Josephus to represent the twelve months. If there was such a reference, it must surely have been quite subordinate to that which is obvious at once. The twelve loaves plainly answer to the twelve tribes (compare Rev. xii. 2). But, taking this for granted, we have still to ascertain the meaning of the rite, and there is none which is left in Scripture so wholly unexplained. But, although unexplained, it is referred to as one of the leading and most solemn appointments of the sanctuary (comp. 2 Chr. xiii. 10, 11). In this absence of explanation of that which is yet regarded as so solemn, we have but to seek whether the names bestowed on and the rites connected with the shewbread will lead us to some apprehension of its meaning. The first name we find given it is obviously the dominant one, *lechem pântin*, "bread of the face or faces." We have used the words *face* or *faces*, for *pântin*, it needs scarcely be said, exists only in the plural, and is therefore applied equally to the face of one person and of many. In connexion with this meaning, it continually bears the secondary one of *presence*. The *pântin*, therefore, or Presence, is that not of the people but of God. But in what sense? Spencer and others consider it bread offered to God as was the Minchah, a symbolical meal for God somewhat answering to a heathen *Lectisternium*. But it is not easy to find this meaning in the recorded appointments. Bähr remarks, and justly, that the phrase *pântin* is applied solely to the table and the bread, not to the other furniture of the sanctuary, the altar of incense, or the golden candlestick. There is something therefore peculiar to the former which is denoted by the title. Of the Angel of God's Presence it is said that God's "Name is in Him" (Ex. xxiii. 20). The Presence and the Name may therefore be taken as equivalent. Both, in reference to their context, indicate the manifestation of God to His creatures. Hence, as Name stands for He or Himself, so Face for *Person*: to see the Face, for, to see the Person. The Bread of the Face is therefore that bread through which God is seen, that is, with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Whence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating and retaining that life which consists in seeing the face of God.

Shibboleth, Judg. xii. 6. The Hebrew word which the Gileadites under Jephthah made use of at the passages of the Jordan, after a victory over the Ephraimites, to test the pronunciation of the sound *sh* by those who wished to cross over the river. The Ephraimites, it would appear, in their dialect substituted for *sh* the simple sound *s*; and the Gileadites, regarding every one who failed to pronounce *sh* as an Ephraimite and therefore an enemy, put him to death accordingly. The word "Shibboleth," which has now a second life in the English language

in a new signification, has two meanings in Hebrew; 1st, an ear of corn; 2ndly, a stream or flood (Ps. lxi. 2, 15); and it was, perhaps, in the latter sense that this particular word suggested itself to the Gileadites, the Jordan being a rapid river. There is no mystery in this particular word. Any word beginning with the sound *sh* would have answered equally well as a test.

Shibmah (properly Sibmah). One of the places on the east of Jordan which were taken possession of and rebuilt by the tribe of Reuben (Num. xxxii. 38). It is probably the same with Shebam, *i. e.* Sebam.

Shi'ron. One of the landmarks at the western end of the north boundary of Judah (Josh. xv. 11, only). It lay between Ekron (*Aktr*) and Jabneel (*Yebna*), the port at which the boundary ran to the sea. No trace of the name has been discovered between these two places, which are barely four miles apart.

Shield (*tsinnâh, mágén, shelet, sócherâh*). The three first of the Hebrew terms quoted have been already noticed under the head of ARMS, where it is stated that the *tsinnâh* was a large oblong shield or target, covering the whole body; that the *mágén* was a small round or oval shield; and that the term *shelet* is of doubtful import, applying to some ornamental piece of armour. To these we may add *sócherâh*, a poetical term occurring only in Ps. xci. 4. The ordinary shield consisted of a framework of wood covered with leather; it thus admitted of being burnt (Ex. xxxix. 9). The *mágén* was frequently cased with metal, either brass or copper; its appearance in this case resembled gold, when the sun shone on it (1 Macc. vi. 39), and to this, rather than to the practice of smearing blood on the shield, we may refer the redness noticed by Nahum (ii. 3). The surface of the shield was kept bright by the application of oil, as implied in Is. xxi. 5; hence Saul's shield is described as "not anointed with oil" *i. e.* dusty and gory (2 Sam. i. 21). Oil would be as useful for the metal as for the leather shield. In order to preserve it from the effects of weather, the shield was kept covered, except in actual conflict (Is. xxii. 6). The shield was worn on the left arm, to which it was attached by a strap. Shields of state were covered with beaten gold. Solomon made such for use in religious processions (1 K. x. 16, 17). Shields were suspended about public buildings for ornamental purposes (1 K. x. 17; 1 Macc. iv. 57, vi. 2). In the metaphorical language of the Bible the shield generally represents the protection of God (*e. g.* Ps. iii. 3, xxvii. 7); but in Ps. xlvii. 9 it is applied to earthly rulers, and in Eph. vi. 16, to faith.

Shiggaion, Ps. vii. 1. A particular kind of Psalm; the specific character of which is now not known. In the singular number the word occurs nowhere in Hebrew, except in the inscription of the 7th Psalm. In the inscription to the Ode of the Prophet Habakkuk iii. 1, the word occurs in the plural number; but the phrase in which it stands "*al shigyônôth*" is deemed almost unanimously, as it would seem, by modern Hebrew scholars to mean "after the manner of the Shiggaion," and to be merely a direction as to the kind of musical measures by which the ode was to be accompanied. Gesenius and Fürst, *s. v.*, concur in deriving it from *shiggâh*, in the sense of magnifying or extolling with praises; and they justify this derivation by kindred Syriac words. Shiggaion would thus mean

+ hymn or psalm; but its specific meaning, if it has any, as applicable to the 7th Psalm, would continue unknown. Ewald, Rödiger, and Delitzsch derive it from *shāgāl*, in the sense of reeling, as from wine, and consider the word to be somewhat equivalent to a dithyrambus; while De Wette, Lee, and Hitzig, interpret the word as a psalm of lamentation, or a psalm in distress, as derived from Arabic. Hupfeld, on the other hand, conjectures that shigionoth is identical with higgaiion Ps. ix. 16, in the sense of poem or song. The Versions give no help. In the A. V. of Hab. iii. 1, the rendering is "upon shigionoth," as if shigionoth were some musical instrument. But under any circumstances 'al must not be translated "upon" in the sense of playing upon an instrument. It would be better rendered there "to the accompaniment of."

Shi'hon. A town of Issachar, named only in Josh. xix. 19. It occurs between Haphraim and Anaharath. Eusebius and Jerome (*Onomast.*) mention it as then existing "near Mount Tabor." The only name at all resembling it at present in that neighbourhood is the *Chirbet Sch'in* of Dr. Schulz, 1½ mile N.W. of *Deburieh*. The identification is, however, very uncertain.

Shi'hor of Egypt (1 Chr. xiii. 5) is spoken of as one limit of the kingdom of Israel in David's time, the entering in of Hamath being the other. It must correspond to "Shihor," "the Shihor which [is] before Egypt" (Josh. xiii. 2, 3), A. V. "Sihor," sometimes, at least, a name of the Nile. It would appear that Shihor of Egypt and "the Shihor which [is] before Egypt" might designate the stream of the Wādī-l-'Aareesh: Shihor alone would still be the Nile.

Shi'hor-Lib'nath. Named only in Josh. xix. 26 as one of the landmarks of the boundary of Asher. Nothing is known of it. By the ancient translators and commentators the names are taken as belonging to two distinct places. But modern commentators, beginning perhaps with Masius, have inclined to consider Shihor as identical with the name of the Nile, and Shihor-Lib'nath to be a river. They interpret the Shihor-Lib'nath as the glass river, which they then naturally identify with the Belus of Pliny, the present *Nahr Naman*. But this theory is surely very far-fetched.

Shil'hi. The father of Azubah, Jehoshaphat's mother (1 K. xxii. 42; 2 Chr. xx. 31).

Shil'him. One of the cities in the southern portion of the tribe of Judah. Its place in the list is between Lebeth and Ain, or Ain-limmon (Josh. xv. 32), and it is not elsewhere mentioned. No trace of it has yet been discovered. The juxtaposition of Shillim and Ain has led to the conjecture that they are identical with the Salim and Aenon of St. John the Baptist; but their position in the south of Judah seems to forbid this.

Shil'lem. Son of Naphtali, and ancestor of the family of the Shillemites (Gen. xlii. 24; Num. xxvi. 49).

Shil'lemites, the. The descendants of Shillem the son of Naphtali (Num. xxvi. 49).

Shilo'ah, the Waters of. A certain soft-flowing stream mentioned by the prophet Isaiah (viii. 6). There is no reason to doubt that the waters in question were the same which are better known under their later name of **SILLOAM**—the only perennial spring of Jerusalem. •

Shiloh. In the A. V. of the Bible, Shiloh is once used as the name of a person, in a very difficult

passage, in the 10th verse of the 49th chapter of Genesis. Supposing that the translation is correct, the meaning of the word is Peaceable, or Pacific, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Is. ix. 6 is expressly called the Prince of Peace. But, on the other hand, if the original Hebrew text is correct as it stands, there are three objections to this translation, which, taken collectively, seem fatal to it. 1st. The word Shiloh occurs nowhere else in Hebrew as the name or appellation of a person. 2ndly. The only other Hebrew word, apparently, of the same form, is Giloh (Josh. xv. 51; 2 Sam. lv. 12); and this is the name of a city, and not of a person. 3rdly. By translating the word as it is translated everywhere else in the Bible, viz. as the name of the city in Ephraim where the Ark of the Covenant remained during such a long period, a sufficiently good meaning is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (compare 1 Sam. iv. 12). The simple translation is, "The sceptre shall not depart from Judah, nor the ruler's staff from between his feet, till he shall go to Shiloh."

And, in this case, the allusion would be to the primacy of Judah in war (Judg. i. 1, 2, xx. 18; Num. ii. 3, x. 14), which was to continue until the Promised Land was conquered, and the Ark of the Covenant was solemnly deposited at Shiloh. The objections to this interpretation are set forth at length by Hengstenberg, and the reasons in its favour, with an account of the various interpretations which have been suggested by others, are well given by Davidson (*Introduction to the Old Testament*, i. 199-210).—2. The next best translation of Shiloh is perhaps that of "Rest." The passage would then run thus: "The sceptre shall not depart from Judah . . . till rest come, and the nations obey him;" and the reference would be to the Messiah, who was to spring from the tribe of Judah. This translation deserves respectful consideration, as having been ultimately adopted by Gesenius.—3. A third explanation of Shiloh, on the assumption that it is not the name of a person, is a translation by various learned Jews, apparently countenanced by the Targum of Jonathan, that *Shiloh* merely means "his son," i. e. the son of Judah (in the sense of the Messiah), from a supposed word *Shil*, "a son." There is, however, no such word in known Hebrew. The translation, then, of Shiloh as the name of a city is to be regarded as the soundest, if the present Hebrew text is correct. It is proper, however, to bear in mind the possibility of there being some error in that text. When Jerome translated the word "qui missus est," we may be certain that he did not read it as Shiloh, but as some form of *shalach*, "to send." We may likewise be certain that the translator in the Septuagint did not read the word as it stands in our Bibles. He read it as *shel-lôh* = *shellô* and translated it well by the phrase *τὸ ἀποκείμενον ἀδελφῷ*; so that the meaning would be, "The sceptre shall not depart from Judah . . . till the things reserved for him come." It is most probable that Ezekiel read the word in the same way. It is not meant by these remarks that *shellôh* is more likely to have been correct than Shiloh. But the fact that there were different readings, in former times, of this very difficult passage, necessarily tends to suggest the possibility that the correct reading may have been lost. Whatever interpreta-

tion of the present reading may be adopted, the one which must be pronounced entitled to the least consideration is that which supposes the prophecy relates to the birth of Christ as occurring in the reign of Herod just before Judaea became a Roman province. There is no such interpretation in the Bible, and however ancient this mode of regarding the passage may be, it must submit to the ordeal of a dispassionate scrutiny.

Shiloh. In Judg. xxi. 19 it is said that Shiloh is "on the north side of Bethel, on the east side of the highway that goeth up from Bethel to Shechem, and on the south of Lebanon." In agreement with this the traveller at the present day, going north from Jerusalem, lodges the first night at *Beitin*, the ancient Bethel; the next day, at the distance of a few hours, turns aside to the right, in order to visit *Scitân*, the Arabic for Shiloh; and then passing through the narrow Wady, which brings him to the main road, leaves *el-Lebbân*, the Lebanon of Scripture, on the left, as he pursues "the highway" to *Nâblus*, the ancient Shechem. [SHECHEM.] Its present name is sufficiently like the more familiar Hebrew name, while it is identical with *Shilon* (see above), on which it is evidently founded. Shiloh was one of the earliest and most sacred of the Hebrew sanctuaries. The ark of the covenant, which had been kept at Gilgal, during the progress of the Conquest (Josh. xviii. 1 sq.) was removed thence on the subjugation of the country, and kept at Shiloh from the last days of Joshua to the time of Samuel (Josh. xviii. 10; Judg. xviii. 31; 1 Sam. iv. 3). It was here the Hebrew conqueror divided among the tribes the portion of the west Jordan-region, which had not been already allotted (Josh. xviii. 10, xix. 51). In this distribution, or an earlier one, Shiloh fell within the limits of Ephraim (Josh. xvi. 5). The seizure here of the "daughters of Shiloh" by the Benjamites, is recorded as an event which preserved one of the tribes from extinction (Judg. xxi. 19-23). The ungodly conduct of the sons of Eli occasioned the loss of the ark of the covenant, which had been carried into battle against the Philistines, and Shiloh from that time sank into insignificance. It stands forth in the Jewish history as a striking example of the Divine indignation (Jer. vii. 12). The contour of the region, as the traveller views it on the ground, indicates very closely where the ancient town must have stood. A Tell, or moderate hill, rises from an uneven plain, surrounded by other higher hills, except a narrow valley on the south, which hill would naturally be chosen as the principal site of the town. The tabernacle may have been pitched on this eminence, where it would be a conspicuous object on every side. The ruins found there at present are very inconsiderable. They consist chiefly of the remains of a comparatively modern village, with which some large stones and fragments of columns are intermixed, evidently from much earlier times. At the distance of about fifteen minutes from the main site, is a fountain, which is approached through a narrow dale. Its water is abundant, and, according to a practice very common in the East, flows first into a pool or well, and thence into a larger reservoir, from which flocks and herds are watered.

Shil'oni. This word occurs in the A. V. only in Neh. xi. 5, where it should be rendered—as it is in other cases—"the Shilonite," that is, the descendant of Shelah the youngest son of Judah.

Sh'ilonite, the, that is, the native or resident of Shiloh:—a title ascribed only to Abijah (1 K. xi. 29, xii. 15, xv. 29; 2 Chr. ix. 29, x. 15).

Shilo'nites, the, are mentioned among the descendants of Judah dwelling in Jerusalem at a date difficult to fix (1 Chr. ix. 5). They are doubtless the members of the house of SHELAH, who in the Pentateuch are more accurately designated SHELANITES.

Shil'shah. Son of Zophah of the tribe of Asher (1 Chr. vii. 37).

Shim'ea. 1. Son of David by Bathsheba (1 Chr. iii. 5).—2. A Merarite Levite (1 Chr. vi. 30 [15]).—3. A Gershonite Levite, ancestor of Asaph the minstrel (1 Chr. vi. 39 [24]).—4. The brother of David (1 Chr. xx. 7), elsewhere called SHAMMAH, SHIMMA, and SHIMEAH.

Shim'eah. 1. Brother of David, and father of Jonathan and Jonadab (2 Sam. xxi. 21): called also SHAMMAH, SHIMEA, and SHIMMA.—2. A descendant of Jehiel the father or founder of Gibeon (1 Chr. viii. 32).

Shim'eam. A descendant of Jehiel, the founder or prince of Gibeon (1 Chr. ix. 38). Called SHIMEAH in 1 Chr. viii. 32.

Shim'eath. An Ammonitess, mother of Jozabab, or Zabab, one of the murderers of King Joash (2 K. xii. 21 [22]; 2 Chr. xxiv. 26).

Shim'ei. 1. Son of Gershom the son of Levi (Num. iii. 18; 1 Chr. vi. 17, 29, xxiii. 7, 9, 10; Zech. xii. 13); called SHIMI in Ex. vi. 17. In 1 Chr. vi. 29, according to the present text, he is called the son of Libni, and both are reckoned as sons of Merari, but there is reason to suppose that there is something omitted in this verse.—2. Shimea the son of Gera, a Benjamite of the house of Saul, who lived at Bahurim. When David and his suite were seen descending the long defile, on his flight from Absalom (2 Sam. xvi. 5-13), the whole feeling of the clan of Benjamin burst forth without restraint in the person of Shimei. He ran along the ridge, cursing, throwing stones at the King and his companions, and when he came to a patch of dust on the dry hill-side, taking it up, and throwing it over them. Abishai was so irritated, that, but for David's remonstrance, he would have darted across the ravine (2 Sam. xvi. 9) and torn or cut off his head. The whole conversation is remarkable, as showing what may almost be called the slang terms of abuse prevalent in the two rival courts. The royal party passed on; Shimei following them with his stones and curses as long as they were in sight. The next meeting was very different. The king was now returning from his successful campaign. Just as he was crossing the Jordan, in the ferry-boat or on the bridge (2 Sam. xix. 18), the first person to welcome him on the western, or perhaps even on the eastern side, was Shimei, who may have seen him approaching from the heights above. He threw himself at David's feet in abject penitence. But the king's suspicions were not set at rest by this submission; and on his deathbed he recalls the whole scene to the recollection of his son Solomon. Solomon gave Shimei notice that from henceforth he must consider himself confined to the walls of Jerusalem on pain of death. He was to build a house in Jerusalem (1 K. ii. 36, 37). For three years the engagement was kept. At the end of that time, for the purpose of capturing two slaves who had escaped to Gath, he went out on his ass and made his journey successfully (ib. ii. 40).

On his return, the king took him at his word, and he was slain by Benaiah (ib. ii. 41-46).—**3.** One of the adherents of Solomon at the time of Adonijah's usurpation (1 K. i. 8). Unless he is the same as Shimei the son of Elah (1 K. iv. 18), Solomon's commissariat officer, or with Shimeah, or Shammah, David's brother, it is impossible to identify him.—

4. Solomon's commissariat officer in Benjamin (1 K. iv. 18).—**5.** Son of Pedajah, and brother of Zerubbabel (1 Chr. iii. 19).—**6.** A Simeonite, son of Zaccur (1 Chr. iv. 26, 27).—**7.** Son of Gog, Reubenite (1 Chr. v. 4).—**8.** A Gershonite Levite, son of Jahath (1 Chr. vi. 42).—**9.** Son of Jeduthun, and chief of the tenth division of the singers (1 Chr. xxv. 17).—**10.** The Ramathite who was over David's vineyards (1 Chr. xxvii. 27).—**11.** A Levite of the sons of Heman, who took part in the purification of the Temple under Hezekiah (2 Chr. xxix. 14).—**12.** The brother of Cononiah the Levite in the reign of Hezekiah (2 Chr. xxxi. 12, 13). Perhaps the same as the preceding.—**13.** A Levite in the time of Ezra who had married a foreign wife (Ezr. x. 23).—**14.** One of the family of Hashum, who put away his foreign wife at Ezra's command (Ezr. x. 33).—**15.** A son of Bani, who had also married a foreign wife and put her away (Ezr. x. 38).—**16.** Son of Kish a Benjamite, and ancestor of Mordecai (Esth. ii. 5).

Shimeon. A layman of Israel, of the family of Ilarim, who had married a foreign wife and divorced her in the time of Ezra (Ezr. x. 31).

Shimhi. A Benjamite, apparently the same as SHEMA the son of Elpaal (1 Chr. viii. 21).

Shim'i=SHIMEI I, Ex. vi. 47.

Shim'ites, the. The descendants of Shimei the son of Geishom (Num. iii. 21).

Shim'na. The third son of Jesse, and brother of David (1 Chr. ii. 13).

Shimon. The four sons of Shimon are enumerated in an obscure genealogy of the tribe of Judah (1 Chr. iv. 20).

Shimrath. A Benjamite, of the sons of Shimhi (1 Chr. viii. 21).

Shim'ri. 1. A Simeonite, son of Shemaiah (1 Chr. iv. 37).—**2.** The father of Jediah, one of David's guard (1 Chr. xi. 45).—**3.** A Kohathite Levite in the reign of Hezekiah (2 Chr. xxix. 13).

Shim'ri'ah. A Moabitess, mother of Jehoabad, one of the assassins of King Joash (2 Chr. xxiv. 26). In 2 K. xii. 21, she is called SHOMER.

Shimrom. SHIMRON the son of Issachar (1 Chr. vii. 1).

Shim'ron. A city of Zebulun (Josh. xi. 1, xix. 15). Its full appellation was perhaps SHIMRON-MERON. Schwarz proposes to identify it with the Simonias of Josephus, now *Simundjeh*, a village a few miles W. of Nazareth.

Shimron. The fourth son of Issachar according to the lists of Genesis (xlvii. 13) and Numbers (xxvi. 24), and the head of the family of the SHIMRONITES.

Shim'ronites, the. The family of SHIMRON, son of Issachar (Num. xxvi. 24).

Shim'ron-Meron. The king of Shimron-meron is mentioned as one of the thirty-one kings vanquished by Joshua (Josh. xii. 20). It is probably (though not certainly) the complete name of the place elsewhere called SHIMRON. There are two claimants to identify with Shimron-meron. The old Jewish traveller hay-Parchi fixes it at two hours west of Engannim (*Jenin*), south of the mountains

of Gilboa, at a village called in his day *Dan Meron*. The other is the village of *Simundjeh*, west of Nazareth.

Shimaha'l. The scribe or secretary of Rehum, who was a kind of satrap of the conquered province of Judea, and of the colony of Samaria, supported by the Persian court (Ezr. iv. 8, 9, 17, 23). He was apparently an Aramean, for the letter which he wrote to Artaxerxes was in Syriac (Ezr. iv. 7), and the form of his name is in favour of this supposition.

Shin'ab. The king of Admah in the time of Abraham (Gen. xiv. 2).

Shin'ar seems to have been the ancient name of the great alluvial tract through which the Tigris and Euphrates pass before reaching the sea—the tract known in later times as Chaldaea or Babylonia. It was a plain country where brick had to be used for stone, and slime for mortar (Gen. xi. 3). Among its cities were Babel (Babylon), Erech or Orsch (Orchoš), Calneh or Calno (probably *Niffer*), and Accad, the site of which is unknown. These notices are quite enough to fix the situation. The native inscriptions contain no trace of the term, which seems to be purely Jewish, and unknown to any other people. At least it is extremely doubtful whether there is really any connexion between Shin'ar and Singara or *Sinjar*. Singara was the name of a town in Central Mesopotamia, well known to the Romans. It may be suspected that Shinar was the name by which the Hebrews originally knew the lower Mesopotamian country, where they so long dwelt, and which Abraham brought with him from "Ur of the Chaldees."

Ship. No one writer in the whole range of Greek and Roman literature has supplied us with so much information concerning the merchantships of the ancients as St. Luke in the narrative of St. Paul's voyage to Rome (Acts xxvii. xxviii.). It is important to remember that he accomplished it in three ships: first the Adramyttian vessel which took him from Caesarea to Myra, and which was probably a coasting vessel of no great size (xxvii. 1-6); secondly, the large Alexandrian corn-ship, in which he was wrecked on the coast of Malta (xxvii. 6-xxviii. 1); and thirdly, another large Alexandrian corn-ship, in which he sailed from Malta by Syracuse and Rhegium to Puteoli (xxviii. 11-13). (1.) *Size of Ancient Ships.*—The narrative which we take as our chief guide affords a good standard for estimating this. The ship in which St. Paul was wrecked had 276 persons on board (Acts xxvii. 37), besides a cargo of wheat (ib. 10, 38); and all these passengers seem to have been taken on to Puteoli in another ship (xxviii. 11) which had its own crew and its own cargo. Now in English transport-ships, prepared for carrying troops, it is a common estimate to allow a ton and a half per man. On the whole, if we say that an ancient merchant-ship might range from 500 to 1000 tons, we are clearly within the mark. (2.) *Steering Apparatus.*—Some commentators have fallen into strange perplexities from observing that in Acts xxvii. 40 ("the fastenings of the rudders") St. Luke uses the plural. Ancient ships were in truth not steered at all by rudders fastened or hinged to the stern, but by means of two paddle-rudders, one on each quarter, acting in a rowlock or through a porthole, as the vessel might be small or large. (3.) *Build and Ornaments of the Hull.*—It is probable that there was no very marked difference between the bow and the stern. The "hold" (Jonah i. 5) would pre-

sent no special peculiarities. One characteristic ornament, rising in a lofty curve at the stern or the bow, is familiar to us in works of art, but no allusion to it occurs in Scripture. That personification of ships, which seems to be instinctive, led the ancients to paint an eye on each side of the bow (comp. Acts xxvii. 15). An ornament of that which took him on from Malta to Pozzuoli is more explicitly referred to. The "sign" of that ship (Acts xxviii. 11) was CASTOR AND POLLUX; and the symbols of these heroes were doubtless painted or sculptured on each side of the bow. (4.) *Undergirders*.—The imperfection of the build, and still more (see below, 6) the peculiarity of the rig, in ancient ships, resulted in a greater tendency than in our times to the starting of the planks, and consequently to leaking and foundering. Hence it was customary to take on board peculiar contrivances, suitably called "helps" (Acts xxvii. 17), as precautions against such dangers. These were simply cables or chains, which in case of necessity could be passed round the frame of the ship, at right angles to its length, and made tight. (5.) *Anchors*.—It is probable that the ground tackle of Greek and Roman sailors was quite as good as our own. Ancient anchors were similar in form to those which we use now, except that they were without flukes. Two allusions to anchoring are found in the N. T., one in a very impressive metaphor concerning Christian hope (Heb. vi. 19). The other passage is part of the literal narrative of St. Paul's voyage at its most critical point. The ship in which he was sailing had four anchors on board, and these were all employed in the night, when the danger of falling on breakers was imminent. The sailors on this occasion anchored by the stern (Acts xxvii. 29). (6.) *Masts, Sails, Ropes, and Yards*.—These were collectively called *σκεύη* or *σκευή*, or *gear*. We find this word twice used for parts of the rigging in the narrative of the Acts (xxvii. 17, 19). The rig of an ancient ship was more simple and clumsy than that employed in modern times. Its great feature was one large mast, with one large square sail fastened to a yard of great length. Hence the strain upon the hull, and the danger of starting the planks, were greater than under the present system,

Ancient Ship. From a Paluting at Pompeii.

which distributes the mechanical pressure more evenly over the whole ship. Not that there were never more masts than one, or more sails than one on the same mast, in an ancient merchantman. But these were repetitions, so to speak, of the same general unit of rig. In the O. T. the mast is mentioned (Is. xxxiii. 23); and from another prophet

(Ez. xxvii. 5) we learn that cedar-wood from Lebanon was sometimes used for this part of ships. There is a third passage (Prov. xxiii. 34), where the top of a ship's mast is probably intended. In Ez. xxvii. 29, oars are distinctly mentioned; and it seems that oak-wood from Bashan was used in making them. Another feature of the ancient, as of the modern ship, is the flag at the top of the mast (Is. l.c., and xxx. 17). (7.) *Rate of Sailing*.—St. Paul's voyages furnish excellent data for approximately estimating this; and they are quite in harmony with what we learn from other sources. We must notice here, however (what commentators sometimes curiously forget), that winds are variable. Thus the voyage between TROAS and PHILIPPI, accomplished on one occasion (Acts xvi. 11, 12) in two days, occupied on another occasion (Acts xx. 6) five days. With a fair wind an ancient ship would sail fully seven knots an hour. (8.) *Sailing before the wind, and near the wind*.—The rig which has been described is, like the rig of Chinese junks, peculiarly favourable to a quick run before the wind (Acts xvi. 11, xxvii. 16). It would, however, be a great mistake to suppose that ancient ships could not work to windward. The superior rig and build, however, of modern ships enable them to sail nearer to the wind than was the case in classical times. A modern ship, if the weather is not very boisterous, will sail within six points of the wind. To an ancient vessel, of which the hull was more clumsy, and the yards could not be braced so tight, it would be safe to assign seven points as the limit. (9.) *Lying-to*.—A ship that could make progress on her proper couree, in moderate weather, when sailing within seven points of the wind, would lie-to in a gale, with her length making about the same angle with the direction of the wind. This is done when the object is, not to make progress at all hazards, but to ride out a gale in safety; and this is what was done in St. Paul's ship when she was undergirded and the boat taken on board (Acts xxvii. 14-17) under the lee of CLAUDA. (10.) *Ship's Boat*.—This is perhaps the best place for noticing separately the *σκάφη*, which appears prominently in the narrative of the voyage (Acts xxvii. 16, 32). Every large merchant-ship must have had one or more boats. It is evident that the Alexandrian corn-ship in which St. Paul was sailing from Fair Havens, and in which the sailors, apprehending no danger, hoped to reach PHENICE, had her boat towing behind. (11.) *Officers and Crew*.—In Acts xxvii. 11 we have both *κυβερνήτης* and *ναύκληρος*. The latter is the owner (in part or in whole) of the ship or the cargo, receiving also (possibly) the fares of the passengers. The former has the charge of the steering. The word for "shipmen" (Acts xxvii. 27, 30) and "sailors" (Rev. xviii. 17) is simply the usual term *ναῦται*. (12.) *Storms and Shipwrecks*.—The first century of the Christian era was a time of immense traffic in the Mediterranean; and there must have been many vessels lost there every year by shipwreck, and (perhaps) as many by foundering. This last danger would be much increased by the form of rig described above. Besides this, we must remember that the ancients had no compass, and very imperfect charts and instruments, if any at all. Certain coasts were much dreaded, especially the African Syrtis (ib. 17). The danger indicated by breakers (it. 29), and the fear of falling on rocks, are matters of course. St. Paul's experience seems to have been full of illustrations of all

these perils. (13.) *Boats on the Sea of Galilee*.—In the narratives of the call of the disciples to be “fishers of men” (Matt. iv. 18-22; Mark i. 16-20; Luke v. 1-11), there is no special information concerning the characteristics of these boats. In the account of the storm and the miracle on the lake (Matt. viii. 23-27; Mark iv. 35-41; Luke viii. 22-25), it is for every reason instructive to compare the three narratives; and we should observe that Luke is more technical in his language than Matthew, and Mark than Luke. With the large population round the Lake of Tiberias, there must have been a vast number both of fishing-boats and pleasure-boats, and that boat-building must have been an active trade on its shores. (14.) *Merchant-Ships in the Old Testament*.—The earliest passages where seafaring is alluded to in the O. T. are the following in order, Gen. xlix. 13, in the prophecy of Jacob concerning Zebulun; Num. xxiv. 24, in Balaam’s prophecy; Deut. xxviii. 68, in one of the warnings of Moses; Judg. v. 17, in Deborah’s Song. Next after these it is natural to mention the illustrations and descriptions connected with this subject in Job (ix. 26); and in the Psalms (xlviii. [xlviii.] 7, ciii. [civ.] 26, cvi. 23). Prov. xxiii. 34 has already been quoted. To this add xxx. 19, xxxi. 14. Solomon’s own ships, which may have suggested some of these illustrations (1 K. ix. 26; 2 Chr. viii. 18, ix. 21), have previously been mentioned. We must notice the disastrous expedition of Jehoshaphat’s ships from the same port of Ezion-geber (1 K. xxii. 48, 49; 2 Chr. xx. 36, 37). The passages which remain are in the prophets (Is. ii. 16, xliii. 1, 44, lx. 9; Ez. xxvii. 1; Jon. i. 3-16). In Dan. xi. 40 we touch the subject of ships of war. (15.) *Ships of War in the Apocrypha*.—Military operations both by land and water (1 Macc. viii. 23, 32) are prominent subjects in the Books of Maccabees (1 Macc. viii. 26, 28; 2 Macc. iv. 20). Here we must not forget the monument erected by Simon Maccabaeus on his father’s grave. Finally must be mentioned the *noyade* at Joppa, when the resident Jews, with wives and children, 200 in number, were induced to go into boats and were drowned (2 Macc. xii. 3, 4).

Shiph’i. A Simeonite, father of Ziza, a prince of the tribe in the time of Hezekiah (1 Chr. iv. 37).

Shiph’mite, *the*. Probably, though not certainly, the native of SHEPIAM (1 Chr. xxvii. 27).

Shiph’rah (Ex. i. 15). The name of one of the two midwives of the Hebrews who disobeyed the command of Pharaoh to kill the male children (vers. 15-21).

Shiph’tan. Father of Kemuel, a prince of the tribe of Ephraim (Num. xxxiv. 24).

Shisha. Father of Elihoreph and Ahiah, the royal secretaries in the reign of Solomon (1 K. iv. 3). He is apparently the same as SHAVSHA, who held the same position under David.

Shishak, king of Egypt, the Sheshenk I. of the monuments, first sovereign of the Bubastite xxiii^d dynasty. *Chronology*.—The reign of Shishak offers the first determined synchronisms of Egyptian and Hebrew history. The synchronism of Shishak and Solomon, and that of Shishak and Rehoboam may be nearly fixed, as shown in article CHRONOLOGY. The first year of Shishak would about correspond to the 26th of Solomon, and the 20th to the 5th of Rehoboam. The synchronism of Zerah and Aa is more difficult to determine. It seems most probable that the war with Zerah took place early in Aa’s reign, before his

15th year, and thus also early in the reign of Usarken II. The chronological place of these synchronisms may be calculated on the Egyptian as well as the Biblical side. The evidence from the data supplied by the monuments would lead us to place the accession of Sheshenk I. B.C. 980 or 983, or else seven years later than each of these dates. The Biblical date of Sheshenk’s conquest of Judah has been computed to be B.C. cir. 969, and this having taken place in his 20th year, his accession would have been B.C. cir. 988. The progress of Assyrian discovery has, however, induced some writers to propose to shorten the chronology by taking 35 years as the length of Manasseh’s reign, in which case all earlier dates would have to be lowered 20 years. The proposed reduction would place the accession of Sheshenk I. B.C. cir. 968, and this date is certainly more in accordance with those derived from the Egyptian data than the higher date, but these data are too approximative for us to lay any stress upon minute results from them. *History*.—The origin of the royal line of which Sheshenk I. was the head is extremely obscure. Mr. Birch’s discovery that several of the names of the family are Shemitic has led to the supposition that it was of Assyrian or Babylonian origin. Lepsius gives a genealogy of Sheshenk I. from the tablet of Har-p-seu from the Sennepum, which, if correct, decides the question. In this, Sheshenk I. is the son of a chief Namuret, whose ancestors, excepting his mother, who is called “royal mother,” not as Lepsius gives it, “royal daughter,” are all untitled persons, and, all but the princess, bear foreign, apparently Shemitic names. But, as M. de Rougé observes, this genealogy cannot be conclusively made out from the tablet, though we think it more probable than he does. Sheshenk I., on his accession, must have found the state weakened by internal strife and deprived of much of its foreign influence. In the time of the later kings of the Rameses family, two, if not three, sovereigns had a real or titular authority; but before the accession of Sheshenk it is probable that their lines had been united: certainly towards the close of the xxiii^d dynasty a Pharaoh was powerful enough to lead an expedition into Palestine and capture Gezer (1 K. ix. 16). Sheshenk took as the title of his standaid, “He who attains royalty by uniting the two regions [of Egypt].” He himself probably married the heiress of the Rameses family, while his son and successor Usarken appears to have taken to wife the daughter, and perhaps heiress, of the Tanite xxiii^d dynasty. Probably it was not until late in his reign that he was able to carry on the foreign wars of the earlier king who captured Gezer. It is observable that we trace a change of dynasty in the policy that induced Sheshenk at the beginning of his reign to receive the fugitive Jeroboam (1 K. xi. 40). The king of Egypt does not seem to have commenced hostilities during the powerful reign of Solomon. It was not until the division of the tribes, that, probably at the instigation of Jeroboam, he attacked Rehoboam. The following particulars of this war are related in the Bible: “In the fifth year of king Rehoboam, Shishak king of Egypt came up against Jerusalem, because they had transgressed against the LORD, with twelve hundred chariots, and threescore thousand horsemen; and the people [were] without number that came with him out of Egypt; the Lubim, the Sukkimi, and the Cushim. And he took the fenced cities which [pertained] to Judah, and came to Jerusalem.”

(2 Chr. xii. 2-4). Shishak did not pillage Jerusalem, but exacted all the treasures of his city from Rehoboam, and apparently made him tributary (5, 9-12, esp. 8). The narrative in Kings mentions only the invasion and the exaction (1 K. xiv. 25, 26). The strong cities of Rehoboam are thus enumerated in an earlier passage: "And Rehoboam dwelt in Jerusalem, and built cities for defence in Judah. He built even Beth-lehem, and Etam, and Tekoa, and Beth-zur, and Shoco, and Adullam, and Gath, and Mareshah, and Ziph, and Adoraim, and Lachish, and Azekah, and Zorah, and Aijalon, and Hebron, which [are] in Judah and in Benjamin fenced cities" (2 Chr. xi. 5-10). Shishak has left a record of this expedition, sculptured on the wall of the great temple of El-Karnak. It is a list of the countries, cities, and tribes, conquered or ruled by him, or tributary to him. In this list Champollion recognised a name which he translated incorrectly, "the kingdom of Judah," and was thus led to trace the names of certain cities of Palestine. The document has since been more carefully studied by Dr. Brugsch, and with less success by Dr. Blau. The Pharaohs of the Empire passed through northern Palestine to push their conquests to the Euphrates and Mesopotamia. Shishak, probably unable to attack the Assyrians, attempted the subjugation of Palestine and the tracts of Arabia which border Egypt, knowing that the Arabs would interpose an effectual resistance to any invader of Egypt. He seems to have succeeded in consolidating his power in Arabia, and we accordingly find Zerah in alliance with the people of Gerrar, if we may infer this from their sharing his overthrow.

Shitra'i. A Sharonite who was over David's herds that fed in Sharon (1 Chr. xxvii. 29).

Shittah-tree, Shittim (Heb. *shittáh*), is without doubt correctly referred to some species of *Acacia*,

of which three or four kinds occur in the Bible laws. The wood of this tree—perhaps the *A. Seyal*—is more definitely signified—was extensively employed in the construction of the tabernacle (see Ex. xxv., xxvi., xxvii., xxxvii., xxxviii.). The Egyptian name of the *Acacia* is *sont*, *sant*, or *santh*. The Heb. term is, by Jablonski, Celsius, and many other authors, derived from the Egyptian word. The *Shittáh* tree of Scripture is by some thought to refer more especially to the *Acacia Seyal*, though perhaps the *Acacia Nilotica* and *A. Arabica* may be included under the term. The *A. Seyal* is very common in some parts of the peninsula of Sinai. These trees are more common in Arabia than in Palestine, though there is a valley on the west side of the Dead Sea, the *Wady Seyal*, which derives its name from a few acacia-trees there. The *Acacia Seyal*, like the *A. Arabica*, yields the well-known substance called gum arabic which is obtained by incisions in the bark, but it is impossible to say whether the ancient Jews were acquainted with its use. From the tangled thickets into which the stem of this tree expands, Stanley well remarks that hence is to be traced the use of the plural form of the Heb. noun, *Shittim*, the sing. number occurring but once only in the Bible. Besides the *Acacia Seyal*, there is another species, the *A. tortilis*, common on Mt. Sinai. These acacias, which are for the most part tropical plants, must not be confounded with the tree (*Robinia pseudo-acacia*) popularly known by this name in England, which is a North American plant, and belongs to a different genus and suborder. The true acacias belong to the order *Leguminosae*, sub-order *Mimosaceae*.

Shittim. The place of Israel's encampment between the conquest of the Transjordanic highlands and the passage of the Jordan (Num. xxxii. 49, xxv. 1; Josh. ii. 1, iii. 1; Mic. vi. 5). Its full name appears to be given in the first of these passages—Abel has-Shittim—"the meadow, or moist place, of the acacias." It was "in the Arboth-Moab, by Jordan-Jericho" (Num. xxii. 1, xxvi. 3, xxxi. 12, xxxii. 48, 49). That is to say, it was in the Arabah or Jordan Valley, opposite Jericho. The Nachal-Shittim, or *Wady-Sunt*, as it would now be called, of Joel (iii. 18), can hardly be the same spot as that described above, but there is nothing to give a clue to its position.

Shiza. A Reubenite, father of Adina (1 Chr. xi. 42).

Sho'a. A proper name which occurs only in Ez. xxiii. 23, in connexion with Pekod and Koa. The three apparently designate districts of Assyria with which the southern kingdom of Judah had been intimately connected, and which were to be arrayed against it for punishment. Rashi remarks on the three words, "The interpreters say that they signify officers, princes, and rulers." Those who take Sho'a as an appellative refer to the usage of the word in Job xxiv. 19 (A. V. "rich") and Is. xxxii. 5 (A. V. "bountiful"). But a consideration of the latter part of the verse Ez. xxiii. 23, and the fondness which Ezekiel elsewhere shows for playing upon the sound of proper names (as in xxvii. 10, xxx. 5), lead to the conclusion that in this case Pekod, Sho'a, and Koa are proper names also. The only name which has been found at all resembling Sho'a is that of a town in Assyria, mentioned by Pliny, "*Sue* in rupibus," near Gaugamela, and west of the Orontes mountain-chain.

Sho'bab. 1. Son of David by Bathsheba (2 Sam

Acacia Seyal.

v. 14; 1 Chr. iii. 5, xiv. 4). — 2 Apparently the son of Caleb the son of Hezron by his wife Azubah (1 Chr. ii. 18).

Sho'bach. The general of Hadarezer king of the Syrians of Zobah, who was defeated by David in person at Helam. Shobach was wounded, and died on the field (2 Sam. x. 15-18). In 1 Chr. xix. 16, 18, he is called SHOPHACH.

Shoba'i. The children of Shobai were a family of the doorkeepers of the Temple, who returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45).

Sho'bal. 1. The second son of Seir the Horite (Gen. xxxvi. 20; 1 Chr. i. 38), and one of the "dukes" or phylarchs of the Horites (Gen. xxxvi. 23). — 2. Son of Caleb the son of Hur, and founder or prince of Kirjath-jearim (1 Chr. ii. 50, 52). — 3. In 1 Chr. iv. 1, 2, Shobal appears with Hur among the sons of Judah. He is possibly the same as the preceding.

Sho'bek. One of the heads of the people who sealed the covenant with Nehemiah (Neh. x. 24).

Sho'bi. Son of Nahash of Rabbah of the children of Ammon (2 Sam. xvii. 27). He was one of the first to meet David at Mahanaim on his flight from Absalom.

Sho'co, 2 Chr. xi. 7. A variation in the A. V. of the name SOCOH.

Sho'cho, 2 Chr. xxviii. 18. One of the four varieties of the name SOCOH.

Sho'choh, 1 Sam. xvii. 1. The same as SOCOH.

Sho'hām. A Merarite Levite, son of Jaaziah (1 Chr. xxiv. 27).

Shoe. [SANDAL.]

Sho'mer. 1. An Asherite (1 Chr. vii. 32); also called Shamer (ver. 34). — 2. The father of Jehoabad, who slew king Joash (2 K. xii. 21): in the parallel passage in 2 Chr. xxiv. 26, the name is converted into the feminine form Shomerith, who is further described as a Moabitess.

Sho'phach. SHOBACH, the general of Hadarezer (1 Chr. xix. 16, 18).

Sho'phan. One of the fortified towns on the east of Jordan which were taken possession of and rebuilt by the tribe of Gad (Num. xxxiii. 35).

Shoshan'nim. "To the chief musician upon Shoshannim" is a musical direction to the leader of the Temple-choir which occurs in Pss. xlv., lxi., and most probably indicates the melody "after" or "in the manner of" (A. V. "upon") which the Psalms were to be sung. As "Shoshannim" literally signifies "lilies," it has been suggested that the word denotes lily-shaped instruments of music, perhaps cymbals. Ben Zeb regards it as an instrument of psalmody, and Junius and Tremellius, after Kimchi, render it "hexachorda," an instrument with six strings, referring it to the root, *shesh*, "six."

Shoshan'nim-E'duth. In the title of Ps. lxxx. is found the direction "to the chief musician upon Shoshannim-eduth," which appears, according to the most probable conjecture, to denote the melody or air "after" or "in the manner of" which the Psalm was to be sung. As the words now stand they signify "lilies, a testimony," and the two are separated by a large distinctive accent. In themselves they have no meaning in the present text, and must therefore be regarded as probably a fragment of the beginning of an older Psalm with which the choir were familiar.

Shu'a. A Canaanite of Adullam, father of Judah's wife (1 Chr. ii. 3).

Shu'ah. 1. Son of Abraham by Keturah (Gen. xxv. 2; 1 Chr. i. 32). — 2. Properly "Shuchah;" brother of Cheub (1 Chr. iv. 11). — 3. The father of Judah's wife (Gen. xxxviii. 2, 12); also called SHUA in the A. V.

Shu'al. Son of Zophah, an Asherite (1 Chr. vii. 36).

Shu'al, the Land of. A district named only in 1 Sam. xiii. 17. It is pretty certain from the passage that the land of Shual lay north of Michmash. If therefore it be identical with the "land of Shalim" (1 Sam. ix. 4)—as is not impossible—we obtain the first and only clue yet obtained to Saul's journey in quest of the asses. The name *Shual* has not yet been identified.

Shu'bael. 1. SHEBUEL the son of Gershom (1 Chr. xxiv. 20). — 2. SHEBUEL the son of Heman the minstrel (1 Chr. xxv. 20).

Shu'hām. Son of Dan, and ancestor of the SHUHAMITES (Num. xxvi. 42).

Shu'hāmites, the. The descendants of Shuham, or Hushim, the son of Dan (Num. xxvi. 42, 43).

Shu'hite. This ethnic appellative "Shuhite" is frequent in the Book of Job, but only as the epithet of one person, Bildad. The local indications of the Book of Job point to a region on the western side of Chaldea, bordering on Arabia; and exactly in this locality, above Hit and on both sides of the Euphrates, are found, in the Assyrian inscriptions, the *Tukhti*, a powerful people. It is probable that these were the Shuhites.

Shu'lamite, the. One of the personages in the poem of Solomon's Song (vi. 13). The name denotes a woman belonging to a place called Shulem. The only place bearing that name, of which we have any knowledge, is Shunem itself. In fact there is good ground for believing that the two were identical. If, then, Shulammitte and Shunammite are equivalent, there is nothing surely extravagant in supposing that the Shunammite who was the object of Solomon's passion was Abishag.

Shu'mathites, the. One of the four families who sprang from Kirjath-jearim (1 Chr. ii. 53).

Shu'nammite, the, i. e. the native of Shunem, as is plain from 2 K. iv. 1. It is applied to two persons:—Abishag, the nurse of king David (1 K. i. 3, 15, ii. 17, 21, 22), and the nameless hostess of Elisha (2 K. iv. 12, 23, 36).

Shu'nem. One of the cities allotted to the tribe of Issachar (Josh. xix. 18). It occurs in the list between Chesulloth and Haphraim. It is mentioned on two occasions (1 Sam. xxviii. 4; 2 K. iv. 8). It was besides the native place of Abishag (1 K. i. 3). By Eusebius and Jerome it is mentioned twice, as 5 miles south of Mount Tabor, and then known as Sulem; and as a village in Acrabattine, in the territory of Sebaste called Sanim. The latter of these two identifications probably refers to *Sanūr*, a well-known fortress some 7 miles from *Sebastiyyeh* and 4 from *Arrabeh*. The other has more in its favour, since it agrees with the position of the present *Solam*, a village on the S.W. flank of *Jebel Duhi*, 3 miles N. of Jezreel, 5 from Gilboa (*J. Fukua*), full in view of the sacred spot on Mount Carmel, and situated in the midst of the finest corn-fields in the world.

Shu'ni. Son of Gad, and founder of the family of the Shunites (Gen. xlii. 16; Num. xvi. 15).

Shu'nites, the. Descendants of Shuni (Num. xxvi. 15).

Shu'phām. [SHUPPIM.]

Shu'phamites, the. The descendants of Shupham, or Shephupham, the Benjamite (Num. xxvi. 39).

Shuppin. In the genealogy of Benjamin "Shuppin and Huppin, the children of Ir," are reckoned in 1 Chr. vii. 12. It is the same as Iri the son of Bela the son of Benjamin, so that Shuppin was the great-grandson of Benjamin. Lord A. Hervey conjectures that Shuppin or Shephupham was a son of Benjamin, whose family was reckoned with that of Ir or Iri.

Shur, a place just without the eastern border of Egypt. Shur is first mentioned in the narrative of Hagar's flight from Sarah (Gen. xvi. 7). Abraham afterwards "dwelt between Kadesh and Shur, and sojourned in Gerar" (xx. 1). The first clear indication of its position occurs in the account of Ishmael's posterity. "And they dwelt from Havilah unto Shur, that [is] before Egypt, as thou goest toward Assyria" (xxv. 18; comp. 1 Sam. xv. 7, xxvii. 8). The wilderness of Shur was entered by the Israelites after they had crossed the Red Sea (Ex. xv. 22, 23). It was also called the Wilderness of Etham (Num. xxxiii. 8). Shur may have been a fortified town east of the ancient head of the Red Sea, but in the hands of the Arabs, or at one time the Philistines, not of the Egyptians. From its being spoken of as a limit, it was probably the last Arabian town before entering Egypt. The hieroglyphic inscriptions have not been found to throw any light upon this question.

Shushan, or Susa, is said to have received its name from the abundance of the lily (*Shûshan* or *Shûshanah*) in its neighbourhood. 1. *History.*—It was originally the capital of the country called in Scripture Elam, and by the classical writers, sometimes Cissia, sometimes Susis or Susiana. The first distinct mention of the town that has been as yet found is in the inscriptions of *Asshur-bani-pal*, the son and successor of Esar-haddon, who states that he took the place, and exhibits a ground-plan of it upon his sculptures. The date of this monument is about B.C. 680. We next find Susa in the possession of the Babylonians, to whom Elam had probably passed at the division of the Assyrian empire made by Cyaxares and Nabopolassar (Dan. viii. 2). The conquest of Babylon by Cyrus transferred Susa to the Persian dominion; and it was not long before the Achaemenian princes determined to make it the capital of their whole empire, and the chief place of their own residence. According to some writers, the change was made by Cyrus; according to others, it had at any rate taken place before the death of Cambyses; but, according to the evidence of the place itself and of the other Achaemenian monuments, it would seem most probable that the transfer was really the work of Darius Hystaspis. Susa accordingly became the metropolis of Persia, and is recognised as such by Aeschylus, Herodotus, Ctesias, Strabo, and almost all the best writers. Susa retained its pre-eminence to the period of the Macedonian conquest. After this it declined. The preference of Alexander for Babylon caused the neglect of Susa by his successors, none of whom ever made it their capital city. We hear of it once only in their wars, when it falls into the power of Antigonus (B.C. 315). 2. *Position, &c.*—Most historians and comparative geographers have inclined to identify it with the modern *Sus* or *Sûsh*, which, is in lat. 32° 10', long. 48° 28' E. from Greenwich, between the Shapur and the river of Dizful. At

the distance of a few miles east and west of the city were two other streams—the Coprates or river of Dizful, and the right arm of the Choaspes (the modern *Kerkhah*). Thus the country about Susa was most abundantly watered. 3. *General Description of the Ruins.*—The ruins of Susa cover a space about 6000 feet long from east to west, by 4500 feet broad from north to south. The circumference of the whole, exclusive of outlying and comparatively insignificant mounds, is about three miles. According to Mr. Loftus, "the principal existing remains consist of four spacious artificial platforms, distinctly separate from each other. Of these the western mound is the smallest in superficial extent, but considerably the most lofty and important. . . . Its highest point is 119 feet above the level of the Shaur (Shapur). In form it is an irregular, obtuse-angled triangle, with its corners rounded off, and its base facing nearly due east." Mr. Loftus regards this mound as indubitably the remains of the famous citadel of Susa, so frequently mentioned by the ancient writers.

Shûshan-Eduth. "To the chief musician upon Shushan-Eduth" is plainly a musical direction, whatever else may be obscure about it (Ps. lx.). In Ps. lxxx. we have the fuller phrase "Shoshannim-eduth," of which Roediger regards Shushan-eduth as an abbreviation. As it now stands it denotes "the lily of testimony," and possibly contains the first words of some Psalm to the melody of which that to which it was prefixed was sung. There does not appear to be much support for the view taken by some that Shushan-eduth is a musical instrument, so called from its resemblance to a lily in shape, or from having lily-shaped ornaments upon it, or from its six (*shesh*) strings. As a conjecture this is certainly ingenious, but it has the disadvantage of introducing as many difficulties as it removes. Simonis connects *'éduth* with the Arabic *'ud*, a lute, or kind of guitar played with a plectrum, and considers it to be the melody produced by this instrument; so that in his view Shushan-eduth indicates that the lily-shaped cymbals were to be accompanied with playing on the lute. We may therefore regard the words in question as a fragment of an old psalm or melody, the same in character as *Aijeleth Shahar* and others, which contained a direction to the leader of the choir.

Shu'thalhites, the. The descendants of Shuthelah the son of Ephraim (Num. xxvi. 35).

Shuthelah. Head of an Ephraimite family, called after him Shuthalhites (Num. xxvi. 35), and lineal ancestor of Joshua, the son of Nun (1 Chr. vii. 20-27). Shuthelah appears from the former passage to be a son of Ephraim, and the father of Eran, from whom sprung a family of Erantites (ver. 36). He appears also to have had two brothers, Becher, father of the Bachrites, and Tahan, father of the Tahanites. But in 1 Chr. vii. we have a further notice of Shuthelah, where he appears first of all, as in Num., as the son of Ephraim; but in ver. 21, he is placed six generations later. From the recurrence of other names too, it appears that the text in 1 Chr. vii. is corrupt. The following observations will perhaps assist us to restore it. 1. The names that are repeated over and over again, either in identical or in slightly varied forms, represent probably only ONE person. Hence, Shuthelah in vers. 20 and 21, and Telah in ver. 25, are the same as the Shuthelah of Num. xvi. 35, 36. 2. The words "his son" are improperly added after Bere-

and Tabath in 1 Chr. vii. 20. 3. Tahan is improperly inserted in 1 Chr. vii. 25 as a son of Shuthelah, as appears from Num. xxvi. 35, 36. The result is that Shuthelah's line may be thus restored: (1) Joseph. (2) Ephraim. (3) Shuthelah. (4) Eran, or Laadan. (5) Amminud. (6) Elishama, captain of the host of Ephraim (Num. i. 10, ii. 18, vii. 48). (7) Nun. (8) Joshua. As regards the interesting story of the destruction of Ephraim's sons by the men of Gath, which Ewald, Bunsen, Lepsius and others have variously explained, it is impossible in the confused state of the text to speak positively as to the part borne in it by the house of Shuthelah. Putting together the insuperable difficulties in understanding the passage of the literal Ephraim, and his literal sons and daughter, with the fact that the settlements of the Ephraimites in the mountainous district, where Beth-horon, Gezer, Timnath-Serah, &c. lay, were exactly suited for a descent upon the plains of the Philistine country where the men of Gath fed their cattle, and with the further facts that the Ephraimites encountered a successful opposition from the Canaanites in Gezer (Josh. xvi. 10; Judg. i. 29), and that they apparently called in later the Benjamites to help them in driving away the men of Gath (1 Chr. viii. 13), it seems best to understand the narrative as of the times after the entrance into Canaan.

Sia. "The children of Sia" were a family of Nethiun who returned with Zerubbabel (Neh. vii. 47). The name is written **SIAIA** in Ezr. ii. 44, and **SID** in 1 Esd. v. 29.

Siaha = **Sta** (Ezr. ii. 44).

Sibbecha'i. **SIBBECHAI**, the Hushathite (2 Sam. xxi. 18; 1 Chr. xxvii. 11).

Sibbecha'i. One of David's guard, and eighth captain for the eighth month of 24,000 men of the king's army (1 Chr. xi. 29, xxvii. 11). He belonged to one of the principal families of Judah, the Zathites, or descendants of Zerah, and is called "the Hushathite," probably from the place of his birth. Sibbechai's great exploit, which gave him a place among the mighty men of David's army, was his single combat with Saph, or Sippai, the Philistine giant, in the battle at Gezer, or Gob (2 Sam. xxi. 18; 1 Chr. xx. 4).

Sib'boleth. The Ephraimite pronunciation of the word Shubboleth (Judg. xii. 6).

Sib'mah. A town on the east of the Jordan, one of those which were taken and occupied by the tribe of Reuben (Josh. xiii. 19). Like most of the Transjordanic places, Sibmah disappears from view during the main part of the Jewish history. We, however, gain a parting glimpse of it in the lament over Moab pronounced by Isaiah and by Jeremiah (Is. xvi. 8, 9; Jer. xlviii. 32). Sibmah seems to have been known to Eusebius, and Jerome states that it was hardly 500 paces distant from Heshbon. No trace of the name has been discovered more recently.

Sibra'im. One of the landmarks on the northern boundary of the Holy Land as stated by Ezekiel (xlvii. 16). It has not been identified.

Sic'chem. 1. The same well-known name—identical in the Hebrew—with that which in all other places in the O. T. is accurately rendered by our translators **SHECHEM** (Gen. xii. 6). — 2. Eccles. i. 26. The Greek original here is in the form which is occasionally found in the O. T. as the equivalent of **SHECHEM**.

Sie yon. A city mentioned with several others

in 1 Macc. xv. 23. The oldest name of the town on the coast (the Sicyon of the times before Alexander) was said to have been *Alvυδλη*, or *Alvυαλολ*. This was perhaps the common native name, and Sicyon that given to it by the Phœnician traders. But the Sicyon referred to in the Book of Maccabees is a more recent city, built on the site which served as an acropolis to the old one, and distant from the shore from twelve to twenty stades. Demetrius Poliorcetes, in the year 303 B.C., surprised the garrison which Ptolemy had five years before placed there, and made himself master of the harbour and the lower town. The acropolis was surrendered to him, and he then persuaded the population, whom he restored to independence, to destroy the whole of the buildings adjacent to the harbour, and remove thither; the site being one much more easily defensible, especially against any enemy who might attack from the sea. Diodorus describes the new town as including a large space so surrounded on every side by precipices as to be unapproachable by the machines which at that time were employed in sieges, and as possessing the great advantage of a plentiful supply of water within its circuit. Modern travellers completely confirm his account.

Siddim, the Vale of. A place named only in one passage of Genesis (xiv. 3, 8, 10). The meaning of the name is very doubtful. Gesenius expresses his conviction that the real meaning of the words *Emek has-Siddim* is "a plain cut up by stony channels which render it difficult of transit." Dr. Stanley conjectures that Siddim is connected with *Sādch* (field), and thus that the signification of the name was the "valley of the fields." As to the spot itself:—1. It was one of that class of valleys which the Hebrews designated by the word *Emek*. This term appears to have been assigned to a broad flattish tract, sometimes of considerable width, enclosed on each side by a definite range of hills. 2. It was so far a suitable spot for the combat between the four and five kings (ver. 8); but, 3. It contained a multitude of bitumen-pits sufficient materially to affect the issue of the battle. 4. In this valley the kings of the five allied cities of Sodom, Gomorrah, Admah, Zeboim, and Bela, seem to have awaited the approach of the invaders. It is therefore probable that it was in the neighbourhood of the "plain, or circle, of Jordan" in which those cities stood. 5. So much may be gathered from the passage as it appears originally to have stood. But the words which more especially bear on the subject of this article (ver. 3) do not form part of the original document. If we could venture, as some have done, to interpret the latter clause of verse 3, "which is near," or "which is at, or by, the Salt Sea," then we might agree with Dr. Robinson and others in identifying the Valley of Siddim with the enclosed plain which intervenes between the south end of the lake and the range of heights which terminate the *Ghôr* and commence the *Wady Arabah*. But the original of the passage will not bear even this slight accommodation, and it is evident that in the mind of the author of the words the Salt Sea covers the actual space formerly occupied by the Vale of Siddim.

Siddô. A city on the coast of Pamphylia in lat. 36° 48', long. 31° 27', ten or twelve miles to the east of the river Eurymedon. It is mentioned in 1 Macc. xvp 23, among the list of places to which the Roman senate sent letters in favour of the Jews. It was a colony of Cumæans. Siddô was closely

connected with Aradus in Phoenicia by commerce, even if there was not a considerable Phoenician element in the population. It is possible that the name has the same root as that of Sidon, and that it was originally a Phoenician settlement, and that the Cumæan colony was something subsequent. In the times in which Side appears in history it had become a place of considerable importance. It was the station of Antiochus's navy on the eve of the battle with the Rhodian fleet described by Livy (xxxvii. 23, 24). The remains, too, which still exist, are an evidence of its former wealth. They stand on a low peninsula running from N.E. to S.W., and the maritime character of the former inhabitants appears from the circumstance that the walls towards the sea were but slightly built, while the one which faces the land is of excellent workmanship, and remains, in a considerable portion, perfect even to this time. A theatre (belonging apparently to the Roman times) is one of the largest and best preserved in Asia Minor, and is calculated to have been capable of containing more than 15,000 spectators. Three gates led into the town from the sea, and one, on the north-eastern side, into the country. The two principal harbours, which at first seem to have been united in one, were at the extremity of the peninsula: they were closed, and together contained a surface of nearly 500 yards by 200. The country by which Sidò is backed is a broad swampy plain, stretching out for some miles beyond the belt of sand-hills which fringe the seashore. Low hills succeed, and behind these, far inland, are the mountains which, at Mount Climax 40 miles to the west, and again about the same distance to the east, come down to the coast.

Sidôn. The Greek form of the Phœnician name Zidon. As such it occurs naturally in the N. T. and Apocrypha of the Auth. Version; 2 Esd. i. 11; Jud. ii. 28; 1 Macc. v. 15; Matt. xi. 21, 22; xv. 21; Mark iii. 8, &c. But we also find it in the O. T. (Gen. x. 15, 19).

Sido'niâns. The Greek form of the word ZIDONIANS, usually so exhibited in the Auth. Vers. of the O. T. It occurs Deut. iii. 9; Josh. xiii. 4, 6; Judg. iii. 3; 1 K. v. 6.

Sh'hon. King of the Amorites when Israel arrived on the borders of the Promised Land (Num. xxi. 21). He was evidently a man of great courage and audacity. Shortly before the time of Israel's arrival he had dispossessed the Moabites of a splendid territory, driving them south of the natural bulwark of the Arnon (xxi. 26-29). When the Israelite host appears, he does not hesitate or temporise like Balak, but at once gathers his people together and attacks them. But the battle was his last. He and all his host were destroyed, and their district from Arnon to Jabbok became at once the possession of the conqueror.

Sh'hor, accurately **Shihor**, once the **Shihor** or **Shihor of Egypt**, when unqualified, a name of the Nile. It is held to signify "the black" or "turbid." There are but three occurrences of Shihor in the Bible, and but one of Shihor of Egypt, or Shihor-Mizraim. It is spoken of as one of the limits of territory which was still unconquered when Joshua was old (Josh. xiii. 2, 3). With this passage must be compared that in which Shihor-Mizraim occurs, David is related to have "gathered all Israel together from Shihor of Egypt even unto the entering of Hamath" (1 Chr. xiii. 5). There is no other evidence that the Israelites ever spread westward beyond

Gaza. The stream may therefore be that of the Wâdi-'Aresch. That the stream intended by Shihor unqualified was a navigable river is evident from a passage in Isaiah, where it is said of Tyre, "And by great waters, the sowing of Shihor, the harvest of the river [is] her revenue" (xxiii. 3). Here Shihor is either the same as, or compared with, Yeôr, generally thought to be the Nile, but in this work suggested to be the extension of the Red Sea. [RED SEA.] In Jeremiah the identity of Shihor with the Nile seems distinctly stated (ii. 18). In articles NILE and RIVER of EGYPT it is maintained too strongly that Shihor, however qualified, is always the Nile. The later opinion of the writer is expressed here under SHIHOR of EGYPT. The latter is, he thinks, unquestionably the Nile, the former two probably, but not certainly, the same.

Sil'as. An eminent member of the early Christian Church, described under that name in the Acts, but as Silvanus in St. Paul's Epistles. He first appears as one of the leaders of the Church at Jerusalem (Acts xv. 22), holding the office of an inspired teacher (xv. 32). His name, derived from the Latin *silva*, "wood," betokens him a Hellenistic Jew, and he appears to have been a Roman citizen (Acts xvi. 37). He was appointed as a delegate to accompany Paul and Barnabas on their return to Antioch with the decree of the Council of Jerusalem (Acts xv. 22, 32). Having accomplished this mission, he returned to Jerusalem (Acts xv. 33). He must, however, have immediately revisited Antioch, for we find him selected by St. Paul as the companion of his second missionary journey (Acts xv. 40-xvii. 40). At Berea he was left behind with Timothy while St. Paul proceeded to Athens (Acts xvii. 14), and we hear nothing more of his movements until he rejoined the Apostle at Corinth (Acts xviii. 5). His presence at Corinth is several times noticed (2 Cor. i. 19; 1 Thess. i. 1; 2 Thess. i. 1). Whether he was the Silvanus who conveyed St. Peter's First Epistle to Asia Minor (1 Pet. v. 12) is doubtful; the probabilities are in favour of the identity. A tradition of very slight authority represents Silas to have become bishop of Corinth. We have finally to notice, for the purpose of rejecting, the theories which identify Silas with Tertius (Rom. xvi. 22).

Silk. The only *undoubted* notice of silk in the Bible occurs in Rev. xviii. 12, where it is mentioned among the treasures of the typical Babylon. It is, however, in the highest degree probable that the texture was known to the Hebrews from the time that their commercial relations were extended by Solomon. The well-known classical name of the substance does not occur in the Hebrew language. The Hebrew terms which have been supposed to refer to silk are *meshi* and *demeshek*. The former occurs only in Ez. xvi. 10, 13 (A. V. "silk"). The other term *demeshek* occurs in Am. ii. 12 (A. V. "Damascus"), and has been supposed to refer to silk from the resemblance of the word to our "damask." It appears, however, that "damask" is a corruption of *dimakso*, a term applied by the Arabs to the raw material alone. We must, therefore, consider the reference to silk as extremely dubious. The value set upon silk by the Romans, as implied in Rev. xviii. 12, is noticed by Josephus, as well as by classical writers.

Silla. "The house of Millo which goeth down to Silla," was the scene of the murder of king Joash (2 K. xii. 20). What or where Silla was is

entirely matter of conjecture. Some have suggested the Pool of Siloam. Others refer it to a place on or connected with the causeway or flight of steps (*mesillâh*) which led from the central valley of the city up to the court of the Temple. We have no clue to its position.

Silo'ah, the Pool of. Properly "the Pool of Shelach," or rather "has-Shelach" (Neh. iii. 15). This was possibly a corrupt form of the name which is first presented as Shiloach, then as Siloam, and is now *Selwân*.

Silo'am (*Shiloach*, Is. viii. 6; *Shelach*, Neh. iii. 15). Rabbinical writers, and, following them, Jewish travellers, both ancient and modern, retain the earlier *Shiloach* in preference to the later *Shelach*. Siloam is one of the few undisputed localities in the topography of Jerusalem; still retaining its old name (with Arabic modification, *Silwân*), while every other pool has lost its Bible-designation. This is the more remarkable as it is a mere suburban tank of no great size, and for many an age not particularly good or plentiful in its waters, though Josephus tells us that in his day they were both "sweet and abundant." Apart from the identity of name, there is an unbroken chain of exterior testimony, during eighteen centuries, connecting the present *Birket Silwân* with the *Shiloh* of Isaiah and the *Silwân* of St. John. From Josephus we learn that it was without the city; that it was at this pool that the "old wall" took a bend and shot out eastward; that there was a valley under it, and one beside it; a hill right opposite, apparently on the other side of the Kedron, hard by a cliff or rock called Peristereon; that it was at the termination or mouth of the Tyropoeon; that close beside it,

apparently eastward, was another pool, called Solomon's pool, to which the "old wall" came after leaving Siloam, and past which it went on to *Ophias*, where, bending northward, it was united to the eastern arcade of the Temple. In the Antonine Itinerary (A.D. 333) it is set down in the same locality, but it is said to be "*juxta murum*," as Josephus implies; whereas now it is a considerable distance—upwards of 1200 feet—from the nearest angle of the present wall, and nearly 1900 feet from the southern wall of the Haram. Jerome speaks of it as being in the Valley of the Son or Hinnom, as Josephus does of its being at the mouth of the Tyropoeon. He speaks of Siloam as dependent on the rains, and as the only fountain used in his day. But other authorities, and the modern water-provision of the city, show us that it never could have been wholly dependent on its pools. Its innumerable bottle-necked private cisterns kept up a supply at all times. In the 7th cent. Antoninus Martyr mentions Siloam, as both fountain and pool. Bernhard the monk speaks of it in the 9th cent., and the annalists of the Crusades mention its site, in the fork of two valleys, as we find it. Benjamin of Tudela (A.D. 1173) speaks of "the great spring of Shiloach which runs into the brook Kedron." Felix Fabri (A.D. 1484) describes Siloam at some length. Arnold von Harff (A.D. 1496) also identifies the spot. After this, the references to Siloam are innumerable; nor do they, with one or two exceptions, vary in their location of it. A little way below the Jewish burying ground, but on the opposite side of the valley, where the Kedron turns slightly westward, and widens itself considerably, is the fountain of the Virgin or *Um-ed-Dera*, near the beginning

The Village of *Silwân* (Siloam), and the lower part of the Valley of the Kedron, showing the "King's gardens," which are watered by the Pool. The background is the highlands of Judah. The view is from a Photograph by James Graham, Esq., taken from beneath the S. wall of the Haram.

CON. D. B.

of that saddle-shaped projection of the Temple-hill supposed to be the OPHEL of the Bible, and the *Ophels* of Josephus. At the back part of this fountain a subterraneous passage begins, through which the water flows, and through which a man may make his way, sometimes walking erect, sometimes stooping, sometimes kneeling, and sometimes crawling, to Siloam. This rocky conduit, which twists considerably, is 1750 feet long. It has had tributaries which have formerly sent their waters down from the city pools or Temple-wells to swell Siloam. It enters Siloam at the north-west angle; or rather enters a small rock-cut chamber which forms the *vestibule* of Siloam, about five or six feet broad. To this you descend by a few rude steps, under which the water pours itself into the main pool. This pool is oblong; about 18 feet broad, and 19 feet deep; but it is never filled, the water either passing directly through, or being maintained at a depth of three or four feet. The present pool is a ruin, with no moss or ivy to make it romantic; its sides falling in; its pillars broken; its stair a fragment; its walls giving way; the edge of every stone worn round or sharp by time; in some parts mere *débris*; though around its edges, wild flowers, and, among other plants, the aspen-tree, grow luxuriantly. The grey crumbling limestone of the stone (as well as of the surrounding rocks, which are almost verdureless) gives a poor and worn-out aspect to this venerable relic. The present pool is not the original building; it may be the work of crusaders, perhaps even improved by Saladin, whose affection for wells and pools led him to care for all these things. Yet the spot is the same. This pool, which we may call the *second*, seems anciently to have poured its waters into a *third*, before it proceeded to water the royal gardens. This *third* is perhaps that which Josephus calls "Solomon's pool," and which Nehemiah calls "the King's pool" (ii. 14). The expression in Isaiah (lviii. 6), "waters of Shiloah that go softly," seems to point to the slender rivulet, flowing gently, though once very profusely, out of Siloam into the lower breadth of level, where the king's gardens, or royal paradise, stood, and which is still the greenest spot about the Holy City. Siloam is a sacred spot, even to the Moslem; much more to the Jew. It was to Siloam that the Levite was sent with the golden pitcher on the "last and great day of the feast" of Tabernacles; it was from Siloam that he brought the water which was then poured over the sacrifice, in memory of the water from the rock of Rephidim; and it was to this Siloam water that the Lord pointed when He stood in the Temple on that day and cried, "If any man thirst, let him come unto me and drink." The Lord sent the blind man to wash, not *in*, as our version has it, but *at* (eis) the pool of Siloam: for it was the clay from his eyes that was to be washed off; and the Evangelist is careful to throw in a remark, not for the purpose of telling us that Siloam meant an "aqueduct," as some think, but to give higher significance to the miracle. "Go wash at Siloam," was the command; the Evangelist adds, "which is by interpretation, SENT" (John ix. 7). That "Sent" is the natural interpretation is evident, not simply from the word itself, but from other passages where the Hebrew word is used in connexion with water, as Job iii. 10, "he sendeth waters upon the fields;" and Ezek. xxxi. 4, "she sent out her little rivers unto all the trees of the field."

Silo'am, Tower in (Luke xiii. 4). Of this we know nothing definitely beyond these words of the Lord. In connexion with Ophel, there is mention made of "a tower that lieth out" (Neh. iii. 26); and there is no unlikelihood in connecting this *projecting* tower with the tower in Siloam, while one may be almost excused for the conjecture that its *projection* was the cause of its ultimate fall.

Silva'nus. [SILAS.]

Silver (Heb. *ceseph*). In very early times, according to the Bible, silver was used for ornaments (Gen. xxiv. 53) and for vessels of various kinds. Images for idolatrous worship were made of silver or overlaid with it (Ex. xx. 23: Hos. xiii. 2; Hab. ii. 19; Bar. vi. 39), and the manufacture of silver shrines for Diana was a trade in Ephesus (Acts xix. 24). But its chief use was as a medium of exchange, and throughout the O. T. we find *ceseph*, "silver," used for money, like the Fr. *argent*. Vessels and ornaments of gold and silver were common in Egypt in the times of Osirtasen I., and Thothmes III., the contemporaries of Joseph and Moses. In the Homeric poems we find indications of the constant application of silver to purposes of ornament and luxury. The practice of overlaying silver with gold referred to in Homer (*Od.* vi. 232, xxiii. 159), is nowhere mentioned in the Bible, though inferior materials were covered with silver (*Prov.* xxvi. 23). Silver was brought to Solomon from Arabia (2 Chr. ix. 14) and from Tarshish (2 Chr. ix. 21), which supplied the markets of Tyre (*Ez.* xxvii. 12). From Tarshish it came in the form of plates (*Jer.* x. 9), like those on which the sacred books of the Singhalese are written to this day. In Homer (*Il.* ii. 857), Alybe is called the birthplace of silver, and was probably celebrated for its mines. But Spain appears to have been the chief source whence silver was obtained by the ancients. Possibly the hills of Palestine may have afforded some supply of this metal. For an account of the knowledge of obtaining and refining silver possessed by the ancient Hebrews see the articles LEAD and MINES. Silver mixed with alloy is referred to in *Jer.* vi. 30, and a finer kind, either purer in itself, or more thoroughly purified, is mentioned in *Prov.* viii. 19.

Silverlings, a word used once only in the A. V. (*Is.* vii. 23), as a translation of the Hebrew word *ceseph*, elsewhere rendered "silver" or "money."

Simalcu's, an Arabian chief who had charge of Antiochus, the young son of Alexander Balas, before he was put forward by Tryphon as a claimant to the Syrian throne (1 Macc. xi. 39).

Simeon. The second of Jacob's sons by Leah. His birth is recorded in Gen. xxix. 33. The first group of Jacob's children consists, besides Simeon, of the three other sons of Leah—Reuben, Levi, Judah. With each of these Simeon is mentioned in some connexion. "As Reuben and Simeon are mine," says Jacob, "so shall Joseph's sons Ephraim and Manasseh be mine" (Gen. xlviii. 5). With Levi, Simeon was associated in the massacre of the Shechemites (xxiv. 25). With Judah the connexion was drawn still closer. He and Simeon not only "went up" together, side by side, in the forefront of the nation, to the conquest of the south of the Holy Land (*Judg.* i. 3, 17), but their allotments lay together in a more special manner than those of the other tribes. Besides the massacre of Shechem, the only personal incident related of Simeon is the fact of his being selected by Joseph as

the hostage for the appearance of Benjamin (Gen. xlii. 13, 24, 36; xlii. 23). The chief families of the tribe are mentioned in the lists of Gen. xlii. (10), in which one of them, bearing the name of Shaul (Saul), is specified as "the son of the Canaanites"—Num. xxvi. (12-14), and 1 Chr. iv. (24-43). At the census at Sinai Simeon numbered 59,300 fighting men (Num. i. 23). When the second census was taken, at Shittim, the numbers had fallen to 22,200, and it was the weakest of all the tribes. This was no doubt partly due to the recent mortality following the idolatry of Peor, but there must have been other causes which have escaped mention. The connexion between Simeon and Levi implied in the Blessing of Jacob (Gen. xlix. 5-7) has been already adverted to. The non-appearance of Simeon's name in the Blessing of Moses (Deut. xxxiii. 6) may be explained in two ways. On the assumption that the Blessing was actually pronounced in its present form by Moses, the omission may be due to his displeasure at the misbehaviour of the tribe at Shittim. On the assumption that the Blessing, or this portion of it, is a composition of later date, then it may be due to the fact of the tribe having by that time vanished from the Holy Land. The latter of these is the explanation commonly adopted. During the journey through the wilderness Simeon was a member of the camp which marched on the south side of the Sacred Tent. His associates were Reuben and Gad. The connexion between Judah and Simeon already mentioned seems to have begun with the Conquest. Judah and the two Joseph-brethren were first served with the lion's share of the land; and then, the Canaanites having been sufficiently subdued to allow the Sacred Tent to be established without risk in the heart of the country, the work of dividing the remainder amongst the seven inferior tribes was proceeded with (Josh. viii. 1-6). Benjamin had the first turn, then Simeon (xix. 1). By this time Judah had discovered that the tract allotted to him was too large (xix. 9), and also too much exposed on the west and south for even his great powers. To Simeon accordingly was allotted a district out of the territory of his kinsman, on its southern frontier, which contained eighteen or nineteen cities, with their villages, spread round the venerable well of Beersheba (Josh. xix. 1-8; 1 Chr. iv. 28-33). Of these places, with the help of Judah, the Simeonites possessed themselves (Judg. i. 3, 17); and here they were found, doubtless by Joab, residing in the reign of David (1 Chr. iv. 31). What part Simeon took at the time of the division of the kingdom we are not told. The only thing which can be interpreted into a trace of its having taken any part with the northern kingdom are the two casual notices of 2 Chr. xv. 9 and xxiv. 6, which appear to imply the presence of Simeonites there in the reigns of Asa and Josiah. On the other hand the definite statement of 1 Chr. iv. 41-43 proves that at that time there were still some of them remaining in the original seat of the tribe, and actuated by all the warlike lawless spirit of their progenitor. This fragment of ancient chronicle relates two expeditions in search of more eligible territory. The audacity and intrepidity which seem to have characterized the founder of the tribe of Simeon are seen in their fullest force in the last of his descendants of whom there is any express mention in the Sacred Record. Whether the book which bears her name be a history or a historic romance, JUDITH

will always remain one of the most prominent figures among the deliverers of her nation. Bethulia would almost seem to have been a Simeonite colony. Simeon is named by Ezekiel (xlviii. 25), and the author of the Book of the Revelation (vii. 7) in their catalogues of the restoration of Israel.—2. A priest of the family of Josiab—or JEHOIARIB—one of the ancestors of the Maccabees (1 Macc. ii. 1).—3. Son of Juda and father of Levi in the genealogy of our Lord (Luke iii. 30).—4. That is, Simon Peter (Acts xv. 14).—5. A devout Jew, inspired by the Holy Ghost, who met the parents of our Lord in the Temple, took Him in his arms, and gave thanks for what he saw, and knew of Jesus (Luke ii. 25-35). In the apocryphal Gospel of Nicodemus, Simeon is called a high-priest. Rabban Simeon, whose grandmother was of the family of David, succeeded his father Hillel as president of the Sanhedrim about A.D. 13, and his son Gamaliel was the Pharisee at whose feet St. Paul was brought up (Acts xxii. 3). A Jewish writer specially notes that no record of this Simeon is preserved in the Mishna. It has been conjectured that he or his grandson of the same name, may be the Simeon of St. Luke.

Simeon Niger. Acts xiii. 1. [NIGER.]

Simon. 1. Son of Mattathias. [MACCABEES.] —2. Son of Onias the high-priest, whose eulogy closes the "praise of famous men" in the Book of Ecclesiasticus (ch. iv.). [ECCLESIASTICUS.] —3. "A governor of the Temple" in the time of Seleucus Philopator, whose information as to the treasures of the Temple led to the sacrilegious attack of Heliodorus (2 Macc. iii. 4, &c.). Considerable doubt exists as to the exact nature of the office which he held (2 Macc. iii. 4). The chief difficulty lies in the fact that Simon is said to have been of "the tribe of Benjamin" (2 Macc. iii. 3), while the earlier "ruler of the house of God" (1 Chr. ix. 11; 2 Chr. xxxi. 13; Jer. xx. 1) seems to have been always a priest, and the "captain of the Temple" (Luke xxii. 4; Acts iv. 1, v. 24, 26) and the keeper of the treasures (1 Chr. xxvi. 24; 2 Chr. xxxi. 12) must have been at least Levites. Herzfeld conjectures that *Benjamin* is an error for *Minjamen*, the head of a priestly house (Neh. xii. 5, 17).—4. SIMON THE BROTHER OF JESUS.—The only undoubted notice of this Simon occurs in Matt. xiii. 55, Mark vi. 3. He has been identified by some writers with Simon the Canaanite, and still more generally with Symeon who became bishop of Jerusalem after the death of James, A.D. 62. The former of these opinions rests on no evidence whatever, nor is the latter without its difficulties.—5. SIMON THE CANAANITE, one of the Twelve Apostles (Matt. x. 4; Mark iii. 18), otherwise described as Simon Zelotes (Luke vi. 15; Acts i. 13). The latter term, which is peculiar to Luke, is the Greek equivalent for the Chaldee term preserved by Matthew and Mark. [CANAANITE.] Each of these equally points out Simon as belonging to the faction of the Zealots, who were conspicuous for their fierce advocacy of the Mosaic ritual.—6. SIMON OF CYRENE.—A Hellenistic Jew, born at Cyrene on the north coast of Africa, who was present at Jerusalem at the time of the crucifixion of Jesus, either as an attendant at the feast (Acts ii. 10), or as one of the numerous settlers at Jerusalem from that place (Acts vi. 9). Meeting the procession that conducted Jesus to Golgotha, as he was returning from the country, he was pressed into the service to bear the cross (Matt. xxvii. 32;

Mark xv. 21; Luke xxiii. 26), when Jesus himself was unable to bear it any longer (comp. John xix. 17). Mark describes him as the father of Alexander and Rufus, perhaps because this was the Rufus known to the Roman Christians (Rom. xvi. 13), for whom he more especially wrote.—7. **SIMON THE LEPER**.—A resident at Bethany, distinguished as “the leper.” It is not improbable that he had been miraculously cured by Jesus. In his house Mary anointed Jesus preparatory to His death and burial (Matt. xxvi. 6 &c.; Mark xiv. 3 &c.; John xii. 1 &c.).—8. **SIMON MAGUS**.—A Samaritan living in the Apostolic age, distinguished as a sorcerer or “magician,” from his practice of magical arts (Acts viii. 9). His history is a remarkable one; he was born at Gitton, a village of Samaria, identified with the modern *Kuryet Jit*, near *Nābulus*. He was probably educated at Alexandria, and there became acquainted with the eclectic tenets of the Gnostic school. Either then or subsequently he was a pupil of Dositheus, who preceded him as a teacher of Gnosticism in Samaria, and whom he supplanted with the aid of Cleobius. He is first introduced to us in the Bible as practising magical arts in a city of Samaria, perhaps *Sychar* (Acts viii. 5; comp. John iv. 5), and with such success, that he was pronounced to be “the power of God which is called great” (Acts viii. 10). The preaching and miracles of Philip having excited his observation, he became one of his disciples, and received baptism at his hands. Subsequently he witnessed the effect produced by the imposition of hands, as practised by the Apostles Peter and John, and, being desirous of acquiring a similar power for himself, he offered a sum of money for it. His object evidently was to apply the power to the prosecution of magical arts. The motive and the means were equally to be reprobated; and his proposition met with a severe denunciation from Peter, followed by a petition on the part of Simon, the tenor of which bespeaks terror but not penitence (Acts viii. 9-24). Simon's history, subsequently to his meeting with Peter, is involved in difficulties. Early Church historians depict him as the pertinacious foe of the Apostle Peter, whose movements he followed for the purpose of seeking encounters, in which he was signally defeated. His first encounter with Peter took place at Caesarea Stratonis, whence he followed the Apostle to Rome. His death is associated with the meeting in question: according to Hippolytus, the earliest authority on the subject, Simon was buried alive at his own request, in the confident assurance that he would rise again on the third day. According to another account, he attempted to fly in proof of his supernatural power; in answer to the prayers of Peter, he fell and sustained a fracture of his thigh and ankle-bones; overcome with vexation, he committed suicide.—9. **SIMON PETER**. [**PETER**.]—10. **SIMON**, a Pharisee, in whose house a penitent woman anointed the head and feet of Jesus (Luke vii. 40).—11. **SIMON THE TANNER**.—A Christian convert living at Joppa, at whose house Peter lodged (Acts ix. 43). The house was near the sea-side (Acts x. 6, 32), for the convenience of the water.—12. **SIMON**, the father of Judas Iscariot (John vi. 71, xiii. 2, 26).

Simon Chozamaeus. **SHIMEON**, and the three following names in Ezer. x. 31, 32, are thus written in the LXX. (1 Ead. ix. 32).

Sim'ri. Properly “Shimri,” son of Hosah, a

Merarite Levite in the reign of David (1 Chr. xxi. 10).

Sin, a city of Egypt, mentioned only by Ezekiel (xxx. 15, 16). The name is Hebrew, or, at least, Shemitic, Gesenius supposes it to signify “clay.” It is identified in the Vulg. with Pelusium, *Πηλούσιον*, “the clayey or muddy” town. The ancient Egyptian name is still to be sought for: it has been supposed that Pelusium preserves traces of it, but this is very improbable. Champollion identifies Pelusium with the *Peremoun*, *Peremon*, and *Bare-moun* of the Copts, *El-Farmā* of the Arabs, which was in the time of the former a boundary-city. The site of Pelusium is as yet undetermined. It has been thought to be marked by mounds near Burg et-Teeneh, now called *El-Farmā* and not *Et-Teeneh*. This is disputed by Captain Spratt, who supposes that the mound of Aboo-Kheeyar indicates where it stood. This is further inland, and apparently on the west of the old Pelusiac branch, as was Pelusium. It is situate between Farmā and Tel-Defenneh. The antiquity of the town of Sin may perhaps be inferred from the mention of “the wilderness of Sin” in the journeys of the Israelites (Ex. xvi. 1; Num. xxxiii. 11). Pelusium is mentioned by Ezekiel, in one of the prophecies relating to the invasion of Egypt by Nebuchadnezzar, as one of the cities which should then suffer calamities, with, probably, reference to their later history. The prophet speaks of Sin as “Sin the stronghold of Egypt” (ver. 15). This place it held from that time until the period of the Romans. Herodotus relates that Sennacherib advanced against Pelusium, and that near Pelusium Cambyses defeated Psammenitus. In like manner the decisive battle in which Ochus defeated the last native king, Nertanebos, *NEKHT-NEBF*, was fought near this city.

Sin, Wilderness of. The name of a tract of the wilderness which the Israelites reached after leaving the encampment by the Red Sea (Num. xxxiii. 11, 12). Their next halting-place (Ex. xvi. 1, xvii. 1) was Rephidim, probably the *Wady Feiran* [*REPHE-DIM*]; on which supposition it would follow that Sin must lie between that wady and the coast of the Gulf of Suez, and of course west of Sinai. In the wilderness of Sin the manna was first gathered, and those who adopt the supposition that this was merely the natural product of the *tarfa* bush, find from the abundance of that shrub in *Wady es Sheikh*, S. E. of *W. Ghirundel* a proof of local identity. At all events, that wady is as probable as any other.

Sin-Offering (Heb. *chattāth*). The sin-offering among the Jews was the sacrifice, in which the ideas of propitiation and of atonement for sin were most distinctly marked. It is first directly enjoined in Lev. iv., whereas in chs. i.-iii. the burnt-offering, meat-offering, and peace-offering are taken for granted, and the object of the Law is to regulate, not to enjoin, the presentation of them to the Lord. Nor is the word *chattāth* applied to any sacrifice in ante-Mosaic times. It is therefore peculiarly a sacrifice of the Law. The idea of propitiation was no doubt latent in earlier sacrifices, but it was taught clearly and distinctly in the Levitical sin-offering. The ceremonial of the sin-offering is described in Lev. iv. and vi. The **TRESPASS-OFFERING** (Heb. *ashām*) is closely connected with the sin-offering in Leviticus, but at the same time clearly distinguished from it, being in some cases offered with it as a distinct part of the same sacri-

fices; as, for example, in the cleansing of the leper (Lev. xiv.). The distinction of ceremonial clearly indicates a difference in the idea of the two sacrifices. The nature of that difference is still a subject of great controversy. Looking first to the derivation of the two words, it is clear that, so far as derivation goes, there appears to be more of reference to general and actual sin in the former, to special cases of negligence in the latter. Turning next to the description, in the Book of Leviticus, of the circumstances under which each should be offered, we find one important passage (Lev. v. 1-13) in which the sacrifice is called first a "trespass-offering" (ver. 6), and then a "sin-offering" (ver. 7, 9, 11, 12). We may conclude that the word *ashām* is not here used in its technical sense, and that the passage is to be referred to the sin-offering only. We find that the sin-offerings were—(A.) REGULAR. (1.) *For the whole people*, at the New Moon, Passover, Pentecost, Feast of Trumpets, and Feast of Tabernacles (Num. xxviii. 15-xxix. 38): besides the solemn offering of the two goats on the Great Day of Atonement (Lev. xvi.). (2.) *For the Priests and Levites* at their consecration (Ex. xxix. 10-14, 36); besides the yearly sin-offering (a bullock) for the high-priest on the Great Day of Atonement (Lev. xvi.). (B.) SPECIAL. (1.) *For any sin of "ignorance"* (Lev. iv.). (2.) *For refusal to bear witness* (Lev. v. 1). (3.) *For ceremonial defilement* not wilfully contracted (Lev. v. 2, 3, xii. 6-8, xiv. 19, 31, xv. 15, 30; Num. vi. 6-11, 16). (4.) *For the breach of a rash oath* (Lev. v. 4). The trespass-offerings, on the other hand, were always special, as—(1.) *For sacrilege "in ignorance"* (Lev. v. 15, 16). (2.) *For ignorant transgression* (v. 17-19). (3.) *For fraud, suppression of the truth, or perjury* (vi. 1-6). (4.) *For rape of a betrothed slave* (Lev. xix. 20, 21). (5.) *At the purification of the leper* (Lev. xiv. 12), and the *polluted Nazarite* (Num. vi. 12), offered with the sin-offering. From this enumeration it will be clear that the two classes of sacrifices, although distinct, touch closely upon each other, as especially in B. (1) of the sin-offering, and (2) of the trespass-offering. It is also evident that the sin-offering was the only regular and general recognition of sin in the abstract, and accordingly was far more solemn and symbolical in its ceremonial; the trespass-offering was confined to special cases, most of which related to the doing of some material damage, either to the holy things or to man, except in (5), where the trespass-offering is united with the sin-offering. Josephus declares that the sin-offering is presented by those "who fall into sin in ignorance," and the trespass-offering by "one who has sinned and is conscious of his sin, but has no one to convict him thereof." Without attempting to decide so difficult and so controverted a question, we may draw the following conclusions:—First, that the sin-offering was far the more solemn and comprehensive of the two sacrifices. Secondly, that the sin-offering looked more to the guilt of the sin done, irrespective of its consequences, while the trespass-offering looked to the evil consequences of sin, either against the service of God, or against man, and to the duty of atonement, as far as atonement was possible. Thirdly, that in the sin-offering especially we find symbolized the acknowledgment of sinfulness as inherent in man, and of the need of expiation by sacrifice to renew the broken covenant between man and God. There is one other question

of some interest, as to the nature of the sins for which either sacrifice could be offered. It is seen at once that in the Law of Leviticus, most of them, which are not purely ceremonial, are called sins of "ignorance" (see Heb. ix. 7); and in Num. xv. 30, it is expressly said that while such sins can be atoned for by offerings, "the soul that doeth aught presumptuously" (Heb. *with a high hand*) "shall be cut off from among his people." . . . "His iniquity shall be upon him" (comp. Heb. x. 26). But here are sufficient indications that the sins here called "of ignorance" are more strictly those of "negligence" or "frailty," repented of by the unpunished offender, as opposed to those of deliberate and unrepentant sin. If we turn to the sins actually referred to in Lev. iv. v., we find some which certainly are not sins of pure ignorance; they are indeed few out of the whole range of sinfulness, but they are real sins. In considering this subject, it must be remembered that the sacrifices of the Law had a temporal, as well as a spiritual, significance and effect. They restored an offender to his place in the commonwealth of Israel; they were therefore an atonement to the King of Israel for the infringement of His law.

Sinai, Mount. The Greek form of the well-known name SINAI (Jud. v. 14; Acts vii. 30, 38).

Sinai. Nearly in the centre of the peninsula which stretches between the horns of the Red Sea lies a wedge of granite, grüstein, and porphyry rocks rising to between 8000 and 9000 feet above the sea. Its shape resembles a scalene triangle, with a crescent cut from its northern or longer side, on which border Rüssegger's map gives a broad skirting tract of old red sandstone, reaching nearly from gulf to gulf, and traversed by a few ridges, chiefly of tertiary formation, running nearly N.W. and S.E. On the S.W. side of this triangle, a wide alluvial plain—narrowing, however, towards the N.—lines the coast of the Gulf of Suez, whilst that on the eastern or Akabah coast is so narrow as almost to disappear. Between these alluvial edges and the granitic mass a strip of the same sandstone is interposed, the two strips converging at *Ras Mohammed*, the southern promontory of the whole. This nucleus of plutonic rocks is said to bear no trace of volcanic action since the original upheaval of its masses. It has been arranged in three chief masses as follows:—1. The N.W. cluster above *Wady Feirân*; its greatest relief found in the five-peaked ridge of *Serbâl*, at a height of 6342 feet above the sea. 2. The eastern and central one; its highest point the *Jebel Katherin*, at a height of 8063 (Rüppell) to 8168 (Rüssegger) feet. 3. The S.E. one closely connected, however, with 2; its highest point, *Um Shawan*, being that also of the whole. Before considering the claims of the individual mountains to Scriptural notice, there occurs a question regarding the relation of the names Horeb and Sinai. The latter name first occurs as that of the limit on the further side from Egypt of the wilderness of Sin (Ex. xvi. 1), and again (xix. 1, 2) as the "wilderness" or "desert of Sinai," before *Mount Sinai* is actually spoken of, as in ver. 11—soon after we find it. But the name "Horeb" is, in the case of the rebuke of the people by God for their sin in making the golden calf, reintroduced into the Sinaitic narrative (xxiii. 6), having been previously most recently used in the story of the murmuring at Rephidim (xvii. 6), and

earlier as the name of the scene of the appearance of God in the "burning bush" (iii. 1). Horeb, strictly taken, may probably be a dry plain, valley, or bed of a wady near the mountain; and yet *Mount Horeb*, on the "vast green plain" of which was doubtless excellent pasture, may mean the mountain viewed in reference thereto, or its side abutting thereon. But beyond the question of the relation which these names naturally bear, there remains that of site. Sinai is clearly a summit distinctly marked. Where are we to look for it? There are three principal views in answer to this question:—I. That of Lepsius, favoured also by Burckhardt (*Trav.* p. 609), that Serbâl is Sinai, some 30 miles distant westward from the *Jebel Mûsa*, but close to the *Wady Feirân* and *El Hessua*, which he identifies, as do most authorities, with Rephidim, just a mile from the old convent of *Farân*. The earliest traditions are in its favour. But there are two main objections to this:—(1.) It is clear, from *Ex.* xix. 2 (comp. xvii. 1), that the interval between Rephidim and Sinai was that of a regular stage of the march. (2.) There is no plain or wady of any sufficient size near Serbâl to offer camping ground to so large a host, or perhaps the tenth part of them.—II. The second is that of Ritter, that, allowing Serbâl the reverence of an early sanctuary, the *Jebel Mûsa* is Sinai, and that the *Wady es Sebayeh*, which its S.E. or highest summit overhangs, is the spot where the people camped before the mount; but the second objection to Serbâl applies almost in equal force to this—the want of space below.—III. The third is that of Robinson, that the modern Horeb of the monks—viz. the N.W. and lower face of the *Jebel Mûsa*, crowned with a range of magnificent cliffs, the highest point called *Kas Sasâfeh*, or *Sûsâfeh*, as spelt by Robinson—overlooking the plain *er Rahah*, is the scene of the giving of the Law, and that peak the mountain into which Moses ascended. Lepsius objects, but without much force (since he himself climbed it), that the peak *Sasâfeh* is nearly inaccessible. It is more to the purpose to observe that the whole *Jebel Mûsa* is, comparatively with adjacent mountains, insignificant. The conjunction of mountain with plain is the greatest feature of this site; in choosing it, we lose in the mountain, as compared with *Serbâl*, but we gain in the plain, of which *Serbâl* has nothing. It may be added that, supposing *Wady Tayyibeh* to have been the encampment "by the sea," as stated in *Num.* xxxiii. 10, three routes opened there before the Israelites: the most southerly one down the plain *el Kâa to Tûr*; the most northerly by the *Sarbût el Khadem*; and the middle one by *Wady Feirân*, by which they would pass the foot of *Serbâl*, which therefore in this case alone could possibly be Sinai. The middle route aforesaid from *W. Tayyibeh* reaches the *W. Feirân* through what is called the *W. Mo-hatteb*, or "written valley," from the inscriptions on the rocks which line it, generally considered to have been the work of Christian hands, but whether those of a Christian people localised there at an unknown period, as Lepsius thinks, or of passing pilgrims, as is the more general opinion, is likely to continue doubtful.

Sin'im. A people noticed in *Is.* xlix. 12, as living at the extremity of the known world, either in the south or east. The majority of the early interpreters adopted the former view, but the *I.XX.* in giving *Πέρας* favours the latter, and the

weight of modern authority is thrown into the same scale, the name being identified by Gesenius, Hitzig, Knobel, and others, with the classical *Sinac*, the inhabitants of the southern part of *China*. No locality in the south equally commends itself to the judgment. There is no *a priori* improbability in the name of the *Sinac* being known to the inhabitants of Western Asia in the age of Isaiah; for though it is not mentioned by the Greek geographer until the age of Ptolemy, it is certain that an inland commercial route connected the extreme east with the west at a very early period. The *Sinac* attained an independent position in Western China as early as the 8th century B.C., and in the 3rd century A.D. established their sway under the dynasty of Ts'in over the whole of the empire.

Sinite. A tribe of Canaanites (*Gen.* x. 17; 1 Chr. i. 15), whose position is to be sought for in the northern part of the Lebanon district. Various localities in that district bear a certain amount of resemblance to the name, particularly *Sinna*, a mountain fortress mentioned by Strabo; *Sinun* or *Sini*, the ruins of which existed in the time of Jerome; *Syn*, a village mentioned in the 15th century as near the river Arca; and *Dumniyeh*, a district near *Tripoli*. The Targums of Onkelos and Jonathan give *Orthosia*, a town on the coast to the north-east of Tripolis.

Sion, Mount. 1. One of the various names of Mount Hermon which are fortunately preserved, all not improbably more ancient than "Hermon" itself (*Deut.* iv. 48 only).—2. The Greek form of the Hebrew name *ZION* (*Tsion*), the famous Mount of the Temple (1 Macc. iv. 37, 60, v. 54, vi. 48, 62, vii. 33, x. 11, xiv. 27; *Heb.* xii. 22; *Rev.* xiv. 1).

Siph'moth. One of the places in the south of Judah which David frequented during his freebooting life (1 Sam. xxx. 28). No one appears yet to have even suggested an identification of it.

Sippai. Saph, one of the sons of Rephaim, or "the giants," slain by Sibbechai at Gezer (1 Chr. xx. 4).

Sirach, the father of Jesus (Joshua), the writer of the Hebrew original of the Book of Ecclesiasticus.

Sirah, the Well of. The spot from which Abner was recalled by Joab to his death at Hebron (2 Sam. iii. 26 only). It was apparently on the northern road from Hebron. There is a spring and reservoir on the western side of the ancient northern road, about one mile out of Hebron, which is called *Ain Saru*. This may be a relic of the well of Sirah.

Sir'ion. One of the various names of Mount Hermon, that by which it was known to the Zidonians (*Deut.* iii. 9). The use of the name in *Ps.* xxix. 6 (slightly altered in the original—Shirion instead of Sirion) is remarkable.

Sisama'i. A descendant of Sheshan in the line of Jerahmeel (1 Chr. ii. 40).

Sis'era. Captain of the army of Jabin king of Canaan who reigned in Hazor. He himself resided in Harosheth of the Gentiles. The particulars of the rout of Megiddo and of Sisera's flight and death are drawn out under the heads of BARAK, DEBORAH, Jael, KENITES, KISHON, MANTLE, TENT.—2. After a long interval the name re-appears in the lists of the Nethinim who returned from the Captivity with Zerubbabel (*Ezr.* ii. 53; *Neh.* vii. 55). It doubtless tells of Canaanite captives devoted to the lowest offices of the Temple.

Sisinnes. Tattuai, the governor of Syria and Phœnicia under Darius, and a contemporary of Zerubbabel (1 Esdr. vi. 3).

Sitnah. The second of the two wells dug by Isaac in the valley of Gerar, the possession of which the herdmen of the valley disputed with him (Gen. xvi. 21). Of the situation of Sitnah nothing whatever is known.

Sivan. [MONTH.]

Slave. The institution of slavery was recognised, though not established, by the Mosaic Law with a view to mitigate its hardship and to secure to every man his ordinary rights. Repugnant as the notion of slavery is to our minds, it is difficult to see how it can be dispensed with in certain phases of society without, at all events, entailing severer evils than those which it produces. The Hebrew designation of the slave shows that service was the salient feature of his condition; for the term "*ebed*," usually applied to him, is derived from a verb signifying "to work," and the very same term is used in reference to offices of high trust held by free men. In short, service and slavery would have been to the ear of the Hebrew equivalent terms, though he fully recognised grades of servitude, according as the servant was a Hebrew or a non-Hebrew, and, if the latter, according as he was bought with money (Gen. xvii. 12; Ex. xii. 44) or born in the house (Gen. xiv. 14, xv. 3, xvi. 23). We shall proceed to describe the condition of these classes, as regards their original reduction to slavery, the methods by which it might be terminated, and the treatment while in that state.—*I. Hebrew Slaves.* 1. The circumstances under which a Hebrew might be reduced to servitude were—(1) poverty; (2) the commission of theft; and (3) the exercise of paternal authority. In the first case, a man who had mortgaged his property, and was unable to support his family, might sell himself to another Hebrew, with a view both to obtain maintenance, and perchance a surplus sufficient to redeem his property (Lev. xxv. 25, 39). It has been debated whether under this law a creditor could seize his debtor and sell him as a slave; the words do not warrant such an inference. (2) The commission of theft rendered a person liable to servitude, whenever restitution could not be made on the scale prescribed by the Law (Ex. xxii. 1, 3). The thief was bound to work out the value of his restitution money in the service of him on whom the theft had been committed. (3) The exercise of paternal authority was limited to the sale of a daughter of tender age to be a maidservant, with the ulterior view of her becoming the concubine of the purchaser (Ex. xxi. 7). 2. The servitude of a Hebrew might be terminated in three ways:—(1) by the satisfaction or the remission of all claims against him; (2) by the recurrence of the year of Jubilee (Lev. xxv. 40); and (3) the expiration of six years from the time that his servitude commenced (Ex. xxi. 2; Deut. xv. 12). (4) To the above modes of obtaining liberty the Rabbins added as a fourth, the death of the master without leaving a son, there being no power of claiming the slave on the part of any heir except a son. If a servant did not desire to avail himself of the opportunity of leaving his service, he was to signify his intention in a formal manner before the judges (or more exactly *at the place of judgment*), and then the master was to take him to the door-post, and to bore his ear through with an awl (Ex. xxi. 6), driving the awl

into or "unto the door," as stated in Deut. xv. 17, and thus fixing the servant to it. A servant who had submitted to this operation remained, according to the words of the Law, a servant "for ever" (Ex. xxi. 6). These words are, however, interpreted by Josephus and by the Rabbins as meaning until the year of Jubilee. 3. The condition of a Hebrew servant was by no means intolerable. His master was admonished to treat him, not "as a bondservant, but as an hired servant and as a sojourner," and, again, "not to rule over him with rigour" (Lev. xxv. 39, 40, 43). At the termination of his servitude the master was enjoined not to "let him go away empty," but to remunerate him liberally out of his flock, his floor, and his winepress (Deut. xv. 13, 14). In the event of a Hebrew becoming the servant of a "stranger," meaning a non-Hebrew, the servitude could be terminated only in two ways, viz. by the arrival of the year of Jubilee, or by the repayment to the master of the purchase-money paid for the servant, after deducting a sum for the value of his services proportioned to the length of his servitude (Lev. xxv. 47-55). A Hebrew woman might enter into voluntary servitude on the score of poverty, and in this case she was entitled to her freedom after six years' service, together with her usual gratuity at leaving, just as in the case of a man (Deut. xv. 12, 13). Thus far we have seen little that is objectionable in the condition of Hebrew servants. In respect to marriage there were some peculiarities which to our ideas, would be regarded as hardships. A master might, for instance, give a wife to a Hebrew servant for the time of his servitude, the wife being in this case, it must be remarked, not only a slave but a non-Hebrew. Should he leave when his term has expired, his wife and children would remain the absolute property of the master (Ex. xxi. 4, 5). Again, a father might sell his young daughter to a Hebrew, with a view either of marrying her himself, or of giving her to his son (Ex. xxi. 7-9). It diminishes the apparent harshness of this proceeding if we look on the purchase-money as in the light of a dowry given, as was not unusual, to the parents of the bride; still more, if we accept the Rabbinical view that the consent of the maid was required before the marriage could take place. The position of a maiden thus sold by her father was subject to the following regulations:—(1) She could not "go out as the men servants do," i. e. she could not leave at the termination of six years, or in the year of Jubilee, if her master was willing to fulfil the object for which he had purchased her. (2) Should he not wish to marry her, he should call upon her friends to procure her release by the repayment of the purchase-money. (3) If he betrothed her to his son, he was bound to make such provision for her as he would for one of his own daughters. (4) If either he or his son, having married her, took a second wife, it should not be to the prejudice of the first. (5) If neither of the three first specified alternatives took place, the maid was entitled to immediate and gratuitous liberty (Ex. xxi. 7-11). The custom of reducing Hebrews to servitude appears to have fallen into disuse subsequently to the Babylonish captivity. Vast numbers of Hebrews were reduced to slavery as war-captives at different periods by the Phœnicians (Joel. iii. 6), the Philistines (Joel iii. 6; Am. i. 6), the Syrians (1 Macc. iii. 41; 2 Macc. viii. 11), the Egyptians (Joseph. *Ant.* xii. 2, §3), and, above all, by the

Romans (Joseph. E. J. vi. 9, §3).—II. *Non-Hebrew Slaves*.—1. The majority of Non-Hebrew slaves were war-captives, either of the Canaanites who had survived the general extermination of their race under Joshua, or such as were conquered from the other surrounding nations (Num. xxxi. 26 ff.). Besides these, many were obtained by purchase from foreign slave-dealers (Lev. xxv. 44, 45); and others may have been resident foreigners who were reduced to this state either by poverty or crime. The children of slaves remained slaves, being the class described as "born in the house" (Gen. xiv. 14, xvii. 12; Eccl. ii. 7), and hence the number was likely to increase as time went on. The average value of a slave appears to have been thirty shekels (Ex. xxi. 32). 2. That the slave might be manumitted, appears from Ex. xxi. 26, 27; Lev. xix. 20. As to the methods by which this might be effected, we are told nothing in the Bible; but the Rabbins specify the following four methods:—(1) redemption by a money payment, (2) a bill or ticket of freedom, (3) testamentary disposition, or, (4) any act that implied manumission, such as making a slave one's heir. 3. The slave is described as the "possession" of his master, apparently with a special reference to the power which the latter had of disposing of him to his heirs as he would any other article of personal property (Lev. xxv. 45, 46); the slave is also described as his master's "money" (Ex. xxi. 21), i.e. as representing a certain money value. Such expressions show that he was regarded very much in the light of a *mancipium* or chattel. But on the other hand provision was made for the protection of his person (Lev. xxiv. 17, 22; Ex. xxi. 20). A minor personal injury, such as the loss of an eye or a tooth, was to be recompensed by giving the servant his liberty (Ex. xxi. 26, 27). The position of the slave in regard to religious privileges was favourable. He was to be circumcised (Gen. xvii. 12), and hence was entitled to partake of the Paschal sacrifice (Ex. xxi. 44), as well as of the other religious festivals (Deut. xii. 12, 18, xvi. 11, 14). The occupations of slaves were of a menial character, as implied in Lev. xxv. 39, consisting partly in the work of the house, and partly in personal attendance on the master.

Slime. The rendering in the A. V. of the Heb. *chémâr*, the *Hommar* of the Arabs, translated *ῥαπαλτος* by the LXX. and *bitumen* in the Vulgate. The three instances in which it is mentioned in the O. T. are abundantly illustrated by travellers and historians, ancient and modern. It is first spoken of as used for cement by the builders in the plain of Shinar, or Babylonia (Gen. xi. 3). The bitumen pits in the vale of Siddim are mentioned in the ancient fragment of Canaanitish history (Gen. xiv. 10); and the ark of papyrus in which Moses was placed was made impervious to water by a coating of bitumen and pitch (Ex. ii. 3). Herodotus (i. 179) tells us of the bitumen found at Is, a town of Babylonia, eight days' journey from Babylon. The captive Eretrians (Her. vi. 119) were sent by Darius to collect asphaltum, salt, and oil at Ardericca, a place two hundred and ten stadia from Susa, in the district of Cissia. The town of Is was situated on a river, or small stream, of the same name which flowed into the Euphrates, and carried down with it the lumps of bitumen, which was used in the building of Babylon. Ammianus Marcellinus (xxiii. 6, §23) tells us that Babylon was

built with bitumen by Semiramis. The town of Is, mentioned by Herodotus, is without doubt the modern *Hî or Heet*, on the west or right bank of the Euphrates, and four days' journey, N.W., or rather W.N.W., of Bagdad. The principal bitumen pit at Heet, says Mr. Rich, has two sources, and is divided by a wall in the centre, on one side of which bitumen bubbles up, and on the other the oil of naphtha. Sir R. K. Porter observed "that bitumen was chiefly confined by the Chaldean builders, to the foundations, and lower parts of their edifices: for the purpose of preventing the ill effects of water." The use of bitumen appears to have been confined to the Babylonians, for at Nineveh, Mr. Layard observes, "bitumen and reeds were not employed to cement the layers of bricks, as at Babylon; although both materials are to be found in abundance in the immediate vicinity of the city." The bitumen of the Dead Sea is described by Strabo, Josephus, and Pliny. Strabo (xvi. p. 763) gives an account of the volcanic action by which the bottom of the sea was disturbed, and the bitumen thrown to the surface. It was at first liquefied by the heat, and then changed into a thick viscous substance by the cold water of the sea, on the surface of which it floated in lumps. The Arabs of the neighbourhood have perpetuated the story of its formation as given by Strabo. Dr. Thomson tells us that they still call the bitumen pits by the name *biâret hûmmar*, which strikingly resembles the Heb. *bcôrôth chêmâr* of Gen. xiv. 10. Strabo says that in Babylonia boats were made of wicker-work, and then covered with bitumen to keep out the water (xvi. p. 743).

Sling. The sling has been in all ages the favourite weapon of the shepherds of Syria (1 Sam. xvii. 40), and hence was adopted by the Israelitish army, as the most effective weapon for light-armed troops. The Benjamites were particularly expert in their use of it (Judg. xx. 16; comp. 1 Chron. xii. 2). It was advantageously used in attacking and defending towns (2 K. iii. 25), and in skirmishing. Other eastern nations availed themselves of it, as the Syrians (1 Macc. ix. 11), who also invented a kind of artificial sling (1 Macc. vi. 51). The construction of the weapon hardly needs description; it consisted of a couple of strings of sinew or some

Egyptian Slingers. (Wilkinson.)

fibrous substance, attached to a leathern receptacle for the stone in the centre, which was termed the *caph*, i.e. pan (1 Sam. xxi. 29): the sling was swung once or twice round the head, and the stone was then discharged by letting go one of the strings.

Slings-stones were selected for their smoothness (1 Sam. xvii. 40), and were recognised as one of the ordinary munitions of war (2 Chr. xxvi. 14). In action the stones were either carried in a bag round the neck (1 Sam. xvii. 40), or were heaped up at the feet of the combatant.

Smith. The work of the smith, together with an account of his tools, is explained in **HANDICRAFT**. A description of the smith's workshop is given in **Ecclus.** xxxviii. 28.

Smyrna. The city to which allusion is made in Revelation ii. 8-11, was founded, or at least the design of founding it was entertained, by Alexander the Great soon after the battle of the Granicus. It was situated twenty stades from the city of the same name, which after a long series of wars with the Lydians had been finally taken and sacked by Halyattes. The rich lands in the neighbourhood were cultivated by the inhabitants, scattered in villages about the country, for a period which Strabo, speaking roundly, calls 400 years. The descendants of this population were reunited in the new Smyrna, which soon became a wealthy and important city. It seems not impossible, that just as St. Paul's illustrations in the Epistle to the Corinthians are derived from the Isthmian games, so the message to the Church in Smyrna contains allusions to the ritual of the pagani mysteries which prevailed in that city. In the time of Strabo the ruins of the Old Smyrna still existed, and were partially inhabited, but the new city was one of the most beautiful in all Asia. The streets were laid out as near as might be at right angles; but an unfortunate oversight of the architect, who forgot to make underground drains to carry off the storm rains, occasioned the flooding of the town with the filth and refuse of the streets. There was a large public library there, and also a handsome building surrounded with porticoes which served as a museum. It was consecrated as a herodium to Homer, whom the Smyrniacians claimed as a countryman. There was also an Odeum, and a temple of the Olympian Zeus, with whose cult that of the Roman emperors was associated. Olympian games were celebrated here, and excited great interest. Smyrna under the Romans was the seat of a *conventus iudicis*, whither law cases were brought from the citizens of Magnesia on the Sipylus, and also from a Macedonian colony settled in the same country under the name of Hyrcani.

Snail. The representative in the A. V. of the Hebrew words *shabûl* and *chômet*. 1. *Shabûl* occurs only in Ps. lvi. 9 (8 A. V.). The rendering of the A. V. ("snail") is supported by the authority of many of the Jewish Doctors, and is probably correct. The term *Shabûl* would denote either a *Linæa* or a *Helix*, which are particularly noticeable for the slimy track they leave behind them. 2. *Chômet* occurs only as the name of some unclean animal in Lev. xi. 30. The LXX. and Vulg. understand some kind of *Lizard* by the term; the Arabic versions of Erpenius and Saadias give the *Chameleon* as the animal intended. Perhaps some kind of lizard may be intended, as the two most important old versions conjecture.

Snow. The historical books of the Bible contain only two notices of snow actually falling (2 Sam. xxiii. 20; 1 Macc. xiii. 22), but the allusions in the poetical books are so numerous that there can be no doubt as to its being an ordinary occurrence in the winter months (Ps. cxlvii. 16, cxlviii. 8).

The snow lies deep in the ravines of the highest ridge of Lebanon until the summer is far advanced, and indeed never wholly disappears; the summit of Hermon also perpetually glistens with frozen snow. From these sources probably the Jews obtained their supplies of ice for the purpose of cooling their beverages in summer (Prov. xxv. 13). The liability to snow must of course vary considerably in a country of such varying altitude as Palestine. At Jerusalem snow often falls to the depth of a foot or more in January and February, but it seldom lies. At Nazareth it falls more frequently and deeply, and it has been observed to fall even in the maritime plain of Joppa and about Carmel.

So. "So king of Egypt" is once mentioned in the Bible. Hoshea, the last king of Israel, evidently intending to become the vassal of Egypt, sent messengers to him and made no present, as had been the yearly custom, to the king of Assyria (2 Kings xvii. 4). So has been identified by different writers with the first and second kings of the Ethiopian XXVth dynasty, called by Manetho, Sabakôn (Shebek), and Sebichôs (Shebetek). The accession of Teharka, or Tirhakah, was perhaps B.C. 695. If we assign 24 years to the two predecessors, the commencement of the dynasty would be B.C. 719. But it is not certain that their reigns were continuous. If we adopt the earlier dates, So must correspond to Shebek, if the later, perhaps to Shebetek; but if it should be found that the reign of Tirhakah is dated too high, the former identification might still be held. From Egyptian sources we know nothing more of Shebek than that he conquered and put to death Bocchoris, the sole king of the XXIVth dynasty, as we learn from Manetho's list, and that he continued the monumental works of the Egyptian kings. The standard inscription of Sargon in his palace at Khursabâd states, according to M. Oppert, that after the capture of Samaria, Hanan king of Gaza, and Sebech sultan of Egypt, met the king of Assyria in battle at Rapih (Raphia), and were defeated, Sebech disappeared, but Hanan was captured.

Soap. The Hebrew term *bôrith* is a general term for any substance of cleansing qualities. As, however, it appears in Jer. ii. 22, in contradistinction to *nether*, which undoubtedly means "natron," or mineral alkali, it is fair to infer that *bôrith* refers to vegetable alkali, or some kind of potash, which forms one of the usual ingredients in our soap. Numerous plants, capable of yielding alkalies, exist in Palestine and the surrounding countries; we may notice one named *Hubeibeh* (the *salsola kali* of botanists) found near the Dead Sea, the ashes of which are called *el-kûlî* from their strong alkaline properties, the *Ajram*, found near Sinai, which when pounded serves as a substitute for soap. Modern travellers have also noticed the *Saponaria officinalis* and the *Mesembryanthemum nodiflorum*, both possessing alkaline properties, as growing in Palestine.

So'cho. 1 Chr. iv. 18. Probably the town of Socoh in Judah, though which of the two cannot be ascertained.

So'choh. Another form of the name which is more correctly given in the A. V. as **SOCOH**. The present one occurs in 1 K. iv. 10, and is therefore probably, though not certainly, Socoh 1.

So'coh. The name of two towns in the tribe of Judah. 1. In the district of the Shefelah (Josh. xv. 35). It is a member of the same group with Jarmuth, Azekah, Shaaraim, &c. The same relative situation is implied in the other passages in

which the place is mentioned (1 Sam. xvii. 1. 2 Chr. xi. 7, xlviii. 18). In the time of Eusebius and Jerome (*Onomast.* "Soccho") it bore the name of Socchoth, and lay between 8 and 9 Roman miles from Eleutheropolis, on the road to Jerusalem. Dr. Robinson's identification of Socoh with *esh-Shuweikeh* in the western part of the mountains of Judah is very probable. It lies about 1 mile to the north of the track from *Beit Jibrin* to Jerusalem, between 7 and 8 English miles from the former. From this village probably came "Antigonus of Soco," who lived about the commencement of the 3rd century B.C.—2. Also a town of Judah, but in the mountain district (Josh. xv. 48). It has been discovered by Dr. Robinson in the *Wady-el-Khatti*, about 10 miles S.W. of Hebron; bearing, like the other Socoh, the name of *esh Shuweikeh*.

Sod'i. The father of Gaddiel, the spy selected from the tribe of Zebulun (Num. xiii. 10).

Sodom. One of the most ancient cities of Syria. It is commonly mentioned in connexion with Gomorrah, but also with Admah and Zebaim, and on one occasion (Gen. xiv.) with Bela or Zoar. Sodom was evidently the chief town in the settlement. The four are first named in the ethnological records of Gen. x. 19, as belonging to the Canaanites. The next mention of the name of Sodom (Gen. xiii. 10-13) gives more certain indication of the position of the city. Abram and Lot are standing together between Bethel and Ai (ver. 3), taking, as any spectator from that spot may still do, a survey of the land around and below them. Eastward of them, and absolutely at their feet, lay the "circle of Jordan." The whole circle was one great oasis—"a garden of Jehovah" (ver. 10). In the midst of the garden the four cities of Sodom, Gomorrah, Admah, and Zebaim appear to have been situated. It is necessary to notice how absolutely the cities are identified with the district. In the subsequent account of their destruction (Gen. xix.), the topographical terms are employed with all the precision which is characteristic of such early times. The mention of the Jordan is conclusive as to the situation of the district, for the Jordan ceases where it enters the Dead Sea, and can have no existence south of that point. We have seen what evidence the earliest records afford of the situation of the five cities. Let us now see what they say of the nature of that catastrophe by which they are related to have been destroyed. It is described in Gen. xix. as a shower of brimstone and fire from Jehovah, from the skies. However we may interpret the words of the earliest narrative one thing is certain, that the lake was not one of the agents in the catastrophe. Nor is it implied in any of the later passages in which the destruction of the cities is referred to throughout the Scriptures. Quite the contrary. Those passages always speak of the district on which the cities once stood, not as submerged, but, as still visible, though desolate and uninhabitable. In agreement with this is the statement of Josephus, and the accounts of heathen writers, as Strabo and Tacitus; who, however vague their statements, are evidently under the belief that the district was not under water, and that the remains of the towns were still to be seen. From all these passages, though much is obscure, two things seem clear. 1. That Sodom and the rest of the cities of the plain of Jordan stood on the north of the Dead Sea. 2. That neither the cities nor the district were

submerged by the lake, but that the cities were overthrown and the land spoiled, and that it may still be seen in its desolate condition. When, however, we turn to more modern views, we discover a remarkable variance from these conclusions. 1. The opinion long current, that the five cities were submerged in the lake, and that their remains—walls, columns, and capitals—might be still discerned below the water, hardly needs refutation after the distinct statement and the constant implication of Scripture. But—2. A more serious departure from the terms of the ancient history is exhibited in the prevalent opinion that the cities stood at the south end of the Lake. This appears to have been the belief of Josephus and Jerome. It seems to have been universally held by the mediæval historians and pilgrims, and it is adopted by modern topographers, probably without exception. There are several grounds for this belief; but the main point, on which Dr. Robinson rests his argument is the situation of Zoar. (a.) "Lot," says he, "fled to Zoar, which was near to Sodom; and Zoar lay almost at the southern end of the present sea, probably in the mouth of the *Wady Kerak*." (b.) Another consideration in favour of placing the cities at the southern end of the lake is the existence of similar names in that direction. (c.) A third argument, and perhaps the weightiest of the three, is the existence of the salt mountain at the south of the lake, and its tendency to split off in columnar masses, presenting a rude resemblance to the human form. But it is by no means certain that salt does not exist at other spots round the lake. It thus appears that on the situation of Sodom no satisfactory conclusion can at present be come to. On the one hand the narrative of Genesis seems to state positively that it lay at the northern end of the Dead Sea. On the other hand the long-continued tradition and the names of existing spots seem to pronounce with almost equal positiveness that it was at its southern end. Of the catastrophe which destroyed the city and the district of Sodom we can hardly hope ever to form a satisfactory conception. Some catastrophe there undoubtedly was. But what secondary agencies, besides fire, were employed in the accomplishment of the punishment cannot be safely determined in the almost total absence of exact scientific description of the natural features of the ground round the lake. It was formerly supposed that the overthrow of Sodom was caused by the convulsion which formed the Dead Sea. This theory is stated by Dean Milman in his *History of the Jews* (i. 15, 16) with great spirit and clearness. But the changes which occurred when the limestone strata of Syria were split by that vast fissure which forms the Jordan Valley and the basin of the Salt Lake, must not only have taken place at a time long anterior to the period of Abraham, but must have been of such a nature and on such a scale as to destroy all animal life far and near. Since the knowledge of these facts has rendered the old theory untenable, a new one has been branched by Dr. Robinson. "That the fertile plain is now in part occupied by the southern bay lying south of the peninsula; and that, by some convulsion or catastrophe of nature connected with the miraculous destruction of the cities, either the surface of this plain was scooped out, or the bottom of the lake heaved up so as to cause the waters to overflow and cover permanently a larger tract than formerly." To this very ingenious theory two objections may

be taken. (1.) "The 'plain of the Jordan,' in which the cities stood (as has been stated) can hardly have been at the south end of the lake; and (2.) The geological portion of the theory does not appear to agree with the facts. The whole of the lower end of the lake, including the plain which borders it on the south, has every appearance not of having been lowered since the formation of the valley, but of undergoing a gradual process of filling up. But in fact the narrative of Gen. xix. neither states nor implies that any convulsion of the earth occurred. The word *hâphac*, rendered in the A. V. "overthrow," is the only expression which suggests such a thing. If it were possible to speculate on materials at once so slender and so obscure as are furnished by that narrative, it would be more consistent to suppose that the actual agent in the ignition and destruction of the cities had been of the nature of a tremendous thunderstorm accompanied by a discharge of meteoric stones. The name *Sodôm* has been interpreted to mean "burning." This is possible, though it is not at all certain. Fürst connects it with a root meaning to enclose or fortify. In fact, like most archaic names, it may, by a little ingenuity, be made to mean almost anything. The miserable fate of Sodom and Gomorrah is held up as a warning in numerous passages of the Old and New Testaments (2 Pet. ii. 6; Jude 4-7; Mark vi. 11).

Sod'oma. Rom. ix. 29. In this place alone the Authorized Version has followed the Greek and Vulgate form of the well-known name *Sodom*.

Sod'omites. This word does not denote the inhabitants of Sodom (except only in 2 Esdr. vii. 36) or their descendants; but it is employed in the A. V. of the Old Testament for those who practised as a religious rite the abominable and unnatural vice from which the inhabitants of Sodom and Gomorrah have derived their lasting infamy. It occurs in Deut. xxiii. 17; 1 K. xiv. 24, xv. 12, xxii. 46; 2 K. xxiii. 7; and Job xxxvi. 14 (margin). The Hebrew word *Kadesh* is said to be derived from a root *kadash*, which (strange as it may appear) means "pure," and thence "holy." "This dreadful 'consecration,' or rather desecration, was spread in different forms over Phœnicia, Syria, Phrygia, Assyria, Babylonia. Ashtaroth, the Greek Astarte, was its chief object."

Sodom'itish Sea, the, 2 Esd. v. 7; meaning the Dead Sea.

Sol'omon. I. *Name.*—The changes of pronunciation are worth noticing. We lose something of the dignity of the name when it passes from the measured stateliness of the Hebrew to the anapaest of the N. T., or the tribrach of our common speech. It appears, though with an altered sound, in the Arabic *Suleimân*.—II. *Materials.*—(1.) The comparative scantiness of historical data for a life of Solomon is itself significant. While that of David occupies 1 Sam. xvi.-xxi., 2 Sam. i.-xxiv., 1 K. i. ii., 1 Chr. x.-xxix., that of Solomon fills only the eleven chapters 1 K. i.-xi., and the nine 2 Chr. i.-ix. The writers give extracts only from larger works which were before them, "The book of the Acts of Solomon" (1 K. xi. 41); "The book of Nathan the prophet, the book of Ahijah the Shilonite, the visions of Iddo the seer" (2 Chr. ix. 29). (2.) We shall probably not be far wrong in thinking of Nathan as having written the account of the accession of Solomon and the dedication of the Temple (1 K. i.-viii. 66, 2 Chr. i.-viii. 15). To Ahijah

the Shilonite, active at the close of the reign, alive some time after Jeroboam's accession, we may ascribe the short record of the sin of Solomon, and of the revolution to which he himself had so largely contributed (1 K. xi.). From the Book of the Acts of Solomon came probably the miscellaneous facts as to the commerce and splendour of his reign (1 K. ix. 10-x. 29). (3.) Besides the direct history of the O. T. we may find some materials for the life of Solomon in the books that bear his name, and in the Psalms which are referred, on good grounds, to his time, Ps. ii., xlv., lxv., lxxii., cxxvii. (4.) Other materials are but very scanty. The history of Josephus is, for the most part, only a loose and inaccurate paraphrase of the O. T. narrative. In him, and in the more erudite among early Christian writers, we find some fragments of older history not without their value, extracts from archives alleged to exist at Tyre in the first century of the Christian era, and from the Phœnician histories of Menander and Dios, from Eupolemos, from Alexander Polyhistor, Menander, and Laitus. (5.) The legends of later Oriental literature will claim a distinct notice.—III. *Education.*—(1.) The student of the life of Solomon must take as his starting-point the circumstances of his birth. He was the child of David's old age, the last-born of all his sons (1 Chr. iii. 5). The feelings of the king and of his prophet-guide expressed themselves in the names with which they welcomed his birth. The yearnings of the "man of war," who "had shed much blood," for a time of peace, now led him to give to the new-born infant the name of Solomon (*Shlōmōh* = the peaceful one). Nathan, with a marked reference to the meaning of the king's own name (David = the darling, the beloved one), calls the infant Jedidiah (*Judid-yah*), that is the "darling of the Lord" (2 Sam. xii. 24, 25). (2.) The three influences which must have entered most largely into the education of Solomon were those of his father, his mother, and the teacher under whose charge he was placed from his earliest infancy (2 Sam. xii. 25). (3.) The fact just stated, that a prophet-priest was made the special instructor, indicates the king's earnest wish that his child at least should be protected against the evils which, then and afterwards, showed themselves in his elder sons, and be worthy of the name he bore. At first, apparently, there was no distinct purpose to make him his heir. Absalom is still the king's favourite son (2 Sam. xiii. 37, xviii. 33)—is looked on by the people as the destined successor (2 Sam. xiv. 13, xv. 1-6). The death of Absalom, when Solomon was about ten years old, left the place vacant, and David pledged his word in secret to Bathsheba that he, and no other, should be the heir (1 K. i. 13). The words which were spoken somewhat later, express, doubtless, the purpose which guided him throughout (1 Chr. xxviii. 9, 20). His son's life should not be as his own had been, one of hardships and wars, dark crimes and passionate repentance, but, from first to last, be pure, blameless, peaceful, fulfilling the ideal of glory and of righteousness, after which he himself had vainly striven. The glorious visions of Ps. lxxii. may be looked on as the prophetic expansion of those hopes of his old age. So far, all was well. But we may not ignore the fact, that the later years of David's life presented a change for the worse, as well as for the better. The liturgical element of religion becomes, after the first passionate out-pouring of

Pa. li., unduly predominant. We cannot rest in the belief that his influence over his son's character was one exclusively for good. (4.) In Eastern countries, and under a system of polygamy, the son is more dependent, even than elsewhere, on the character of the mother. Nothing that we know of Bathsheba leads us to think of her as likely to mould her son's mind and heart to the higher forms of goodness. (5.) What was likely to be the influence of the prophet to whose care the education of Solomon was confided? We know, beyond all doubt, that he could speak bold and faithful words when they were needed (2 Sam. vii. 1-17, xii. 1-14). But this power, belonging to moments or messages of special inspiration, does not involve the permanent possession of a clear-sighted wisdom, or of aims uniformly high; and we in vain search the later years of David's reign for any proof of Nathan's activity for good. (6.) Under these influences the boy grew up. At the age of ten or eleven he must have passed through the revolt of Absalom, and shared his father's exile (2 Sam. xv. 16). He would be taught all that priests, or Levites, or prophets had to teach. The growing intercourse of Israel with the Phoenicians would lead naturally to a wider knowledge of the outlying world and its wonders than had fallen to his father's lot. Admirable, however, as all this was, a shepherd-life, like his father's, furnished, we may believe, a better education for the kindly calling (Ps. lxxviii. 70, 71). —IV. *Accession*.—(1.) The feebleness of David's old age led to an attempt which might have deprived Solomon of the throne his father destined for him. Adonijah, next in order of birth to Absalom, like Absalom "was a goodly man" (1 K. i. 6), in full maturity of years, backed by the oldest of the king's friends and counsellors. Following in the steps of Absalom, he assumed the kingly state of a chariot and a bodyguard; and David, more passive than ever, looked on in silence. At last a time was chosen for openly proclaiming him as king. A solemn feast at EN-ROGEL was to inaugurate the new reign. All were invited to it but those whom it was intended to displace. It was necessary for those whose interests were endangered to take prompt measures. Bathsheba and Nathan took counsel together. The king was reminded of his oath. Solomon went down to GITHON, and was proclaimed and anointed king. The shouts of his followers fell on the startled ears of the guests at Adonijah's banquet. One by one they rose and departed. The plot had failed. A few months more, and Solomon found himself, by his father's death, the sole occupant of the throne. (2.) The position to which he succeeded was unique. Never before, and never after, did the kingdom of Israel take its place among the great monarchies of the East. Large treasures accumulated through many years were at his disposal. The people, with the exception of the tolerated worship in high places, were true servants of Jehovah. Knowledge, art, music, poetry, had received a new impulse, and were moving on with rapid steps, to such perfection as the age and the race were capable of attaining. Of Solomon's personal appearance we have no direct description, as we have of the earlier kings. There are, however, materials for filling up the gap. Whatever higher mystic meaning may be latent in Ps. xlv., or the Song of Songs, we are all but compelled to think of them as having had, at least, a historical starting-point. They tell us of one who

was, in the eyes of the men of his own time, "fairer than the children of men," the face "bright and ruddy" as his father's (Cant. v. 10; 1 Sam. xvii. 42), bushy locks, dark as the raven's wing, yet not without a golden glow, the eyes soft as "the eyes of doves," the "countenance as Lebanon, excellent as the cedars," "the chiefest among ten thousand, the altogether lovely" (Cant. v. 9-16). Add to all this gifts of a noble, far-reaching intellect, large and ready sympathies, a playful and genial humour, the lips "full of grace," the soul "anointed" as "with the oil of gladness" (Ps. xlv.), and we may form some notion of what the king was like in that dawn of his golden prime. (3.) The historical starting-point of the Song of Songs just spoken of connects itself, in all probability, with the earliest facts in the history of the new reign. The narrative, as told in 1 K. ii., is not a little perplexing. Bathsheba, who had before stirred up David against Adonijah, now appears as interceding for him, begging that Abishag the Shunamite, the virgin concubine of David, might be given him as a wife. Solomon, who till then had professed the profoundest reverence for his mother, his willingness to grant her anything, suddenly flashes into fiercest wrath at this. The petition is treated as part of a conspiracy in which Joab and Abiathar are sharers. Benaiah is once more called in. Adonijah is put to death at once. Joab is slain even within the precincts of the Tabernacle, to which he had fled as an asylum. Abiathar is deposed, and exiled, sent to a life of poverty and shame (1 K. ii. 31-36), and the high-priesthood transferred to another family more ready than he had been to pass from the old order to the new. Soon afterwards an opportunity is thrown in his way of getting rid of one, who had been troublesome before, and might be troublesome again. He presses the letter of a compact against a man who by his infatuated disregard of it seemed given over to destruction (1 K. ii. 36-46). As he punishes his father's enemies, he also shows kindness to the friends who had been faithful to him. Chimham, the son of Baazillai, apparently receives an inheritance near the city of David (2 Sam. xix. 31-40; 1 K. ii. 7). —V. *Foreign Policy*.—(1.) All the data for a continuous history that we have are—(a.) The duration of the reign, 40 years (1 K. xi. 42). (b.) The commencement of the Temple in the 4th, its completion in the 11th year of his reign (1 K. vi. 1, 37, 38). (c.) The commencement of his own palace in the 7th, its completion in the 20th year (1 K. vii. 1; 2 Chr. viii. 1). (d.) The conquest of Hamath-Zobah, and the consequent foundation of cities in the region North of Palestine after the 20th year (2 Chr. viii. 1-6). With materials so scanty as these, it will be better to group the chief facts in an order which will best enable us to appreciate their significance.—(2.) *Egypt*. The first act of the foreign policy of the new reign must have been to most Israelites a very startling one. He made affinity with Pharaoh, king of Egypt, by marrying his daughter (1 K. iii. 1). The immediate results were probably favourable enough. The new queen brought with her as a dowry the frontier-city of Gezer, against which, as threatening the tranquillity of Israel, and as still possessed by a remnant of the old Canaanites, Pharaoh had led his armies. She was received with all honour. A separate and stately palace was built for her, before long, outside the city of David (2 Chr. viii. 11). (3.) The ultimate issue of the

alliance showed that it was hollow and impolitic. There may have been a revolution in Egypt. There was at any rate a change of policy. There, we may believe, by some kind of compact, expressed or understood, was planned the scheme which led first to the rebellion of the Ten Tribes, and then to the attack of Shishak on the weakened and dismantled kingdom of the son of Solomon. (4.) *Tyre*. The alliance with the Phœnician king rested on a somewhat different footing. It had been part of David's policy from the beginning of his reign. Hiram had been "ever a lover of David." He, or his grandfather, had helped him by supplying materials and workmen for his palace. As soon as he heard of Solomon's accession he sent ambassadors to salute him. A correspondence passed between the two kings, which ended in a treaty of commerce. The opening of Joppa as a port created a new coasting-trade, and the materials from Tyre were conveyed to it on floats, and thence to Jerusalem (2 Chr. ii. 16). In return for these exports, the Phœnicians were only too glad to receive the corn and oil of Solomon's territory. (5.) The results of the alliance did not end here. Now, for the first time in the history of Israel, they entered on a career as a commercial people. They joined the Phœnicians in their Mediterranean voyages to the coasts of Spain. Solomon's possession of the Edomite coast enabled him to open to his ally a new world of commerce. The ports of Elath and Ezion-geber were filled with ships of Tarshish, merchant-ships, manned chiefly by Phœnicians, but built at Solomon's expense, which sailed down the Aelanitic Gulf of the Red Sea, on to the Indian Ocean, to lands which had before been hardly known even by name. (6.) According to the statement of the Phœnician writers quoted by Josephus (*Ant.* viii. 5, §5), the intercourse of the two kings had in it also something of the sportiveness and freedom of friends. They delighted to perplex each other with hard questions, and laid wagers as to their power of answering them. The singular fragment of history inserted in 1 K. ix. 11-14, recording the cession by Solomon of sixteen cities, and Hiram's dissatisfaction with them, is perhaps connected with these imperial wagers. (7.) These were the two most important alliances. The absence of any reference to Babylon and Assyria, and the fact that the Euphrates was recognised as the boundary of Solomon's kingdom (2 Chr. ix. 26), suggest the inference that the Mesopotamian monarchies were, at this time comparatively feeble. Other neighbouring nations were content to pay annual tribute in the form of gifts (2 Chr. ix. 24). (8.) The survey of the influence exercised by Solomon on surrounding nations would be incomplete if we were to pass over that which was more directly personal—the fame of his glory and his wisdom. Wherever the ships of Tarshish went, they carried with them the report, losing nothing in its passage, of what their crews had seen and heard. The journey of the queen of Sheba, though from its circumstances the most conspicuous, did not stand alone. She had heard of the wisdom of Solomon, and connected with it "the name of Jehovah" (1 K. x. 1). She came with hard questions to test that wisdom, and the words just quoted may throw light upon their nature. The historians of Israel delighted to dwell on her confession that the reality surpassed the fame, "the one-half of the greatness of thy wisdom was not told me" (2 Chr. ix. 6).—VI. *Internal History*.—(1.) We

can now enter upon the reign of Solomon; in its bearing upon the history of Israel, without the necessity of a digression. The first prominent scene is one which presents his character in its noblest aspect. There were two holy places which divided the reverence of the people, the ark and its provisional tabernacle at Jerusalem, and the original Tabernacle of the congregation, which, after many wanderings, was now pitched at Gibeon. It was thought right that the new king should offer solemn sacrifices at both. After those at Gibeon there came that vision of the night which has in all ages borne its noble witness to the hearts of rulers. Not for riches, or long life, or victory over enemies, would the son of David, then at least true to his high calling, feeling himself as "a little child" in comparison with the vastness of his work, offer his supplications, but for a "wise and understanding heart," that he might judge the people. The "speech pleased the Lord." (2.) The wisdom asked for was given in large measure, and took a varied range. The wide world of nature, animate and inanimate, the lives and characters of men, lay before him, and he took cognisance of all. But the highest wisdom was that waited for the highest work, for governing and guiding, and the historian hastens to give an illustration of it. The pattern-instance is, in all its circumstances, thoroughly Oriental (1 K. iii. 16-28). (3.) But the power to rule showed itself not in judging only, but in organising. Prominent among the "princes" of his kingdom, *i. e.* officers of his own appointment, were members of the priestly order: Azariah the son of Zadok, Zadok himself the high-priest, Benaiah the son of Jehoiada as captain of the host, another Azariah and Zabud, the sons of Nathan, one over the officers who acted as purveyors to the king's household (1 K. iv. 2-5), the other in the more confidential character of "king's friend." In addition to these there were the two scribes, the king's secretaries, drawing up his edicts and the like, Elihoreph and Ahiah, the recorder or annalist of the king's reign, the superintendent of the king's house, and household expenses (Is. xxii. 15), including probably the *harém*. The last in order, at once the most indispensable and the most hated, was Adoniram, who presided "over the tribute." (4.) The last name leads us to the king's finances. The first impression of the facts given us is that of abounding plenty. The large quantities of the precious metals imported from Ophir and Tarshish would speak, to a people who had not learnt the lessons of a long experience, of a boundless source of wealth (1 K. ix. 28). All the kings and princes of the subject-provinces paid tribute in the form of gifts, in money and in kind, "at a fixed rate year by year" (1 K. x. 25). Monopolies of trade contributed to the king's treasury (1 K. x. 28, 29). The king's domain-lands were apparently let out, at a fixed annual rental (*Cant.* viii. 11). All the provinces of his own kingdom were bound each in turn to supply the king's enormous household with provisions (1 K. iv. 21-23). The total amount thus brought into the treasury in gold, exclusive of all payments in kind, amounted to 666 talents (1 K. x. 14). (5.) It was hardly possible, however, that any financial system could bear the strain of the king's passion for magnificence. The cost of the Temple was, it is true, provided for by David's savings and the offerings of the people; but even while that was building, yet more when it was

finished, one structure followed on another with ruinous rapidity. All the equipment of his court, the "apparel" of his servants, was on the same scale. A body-guard attended him. "threescore valiant men," tallest and handsomest of the sons of Israel. Forty thousand stalls of horses for his chariots, and twelve thousand horsemen, made up the measure of his magnificence (1 K. iv. 26). As the treasury became empty, taxes multiplied and monopolies became more irksome. The people complained, not of the king's idolatry, but of their burdens, of his "grievous yoke" (1 K. xii. 4). Their hatred fell heaviest on Adoniram, who was over the tribute. (5.) It remains for us to trace that other downfall, belonging more visibly, though not more really, to his religious life, from the loftiest height even to the lowest depth. The building and dedication of the Temple are obviously the representatives of the first. All that can be said as to its architecture, proportions, materials [TEMPLE], and the organisation of the ministering PRIESTS and LEVITES, will be found elsewhere. Here it will be enough to picture to ourselves the feelings of the men of Judah as they watched, during seven long years, the Cycloplan foundations of vast stones gradually rising up and covering the area of the threshing-floor of Araunah. Far from colossal in its size, it was conspicuous chiefly by the lavish use, within and without, of the gold of Ophir and Parvaim. Throughout the whole work the tranquillity of the kingly city was unbroken by the sound of the workman's hammer. (7.) We cannot ignore the fact that even now there were some darker shades in the picture. He reduced the "strangers" in the land, the remnant of the Canaanite races, to the state of helots, and made their life "bitter with all hard bondage." One hundred and fifty-three thousand, with wives and children in proportion, were torn from their homes and sent off to the quarries and the forests of Lebanon (1 K. v. 15; 2 Chr. ii. 17, 18). One trace of the special servitude of "these hewers of stone" existed long afterwards in the existence of a body of men attached to the Temple, and known as SOLOMON'S SERVANTS. (8.) After seven years and a half the work was completed, and the day came to which all Israelites looked back as the culminating glory of their nation. Their worship was now established on a scale as stately as that of other nations. The ark from Zion, the tabernacle from Gibeon, were both removed (2 Chr. v. 5), and brought to the new Temple. The choirs of the priests and Levites met in their fullest force, arrayed in white linen. Then, it may be for the first time, was heard the noble hymn, "Lift up your heads, O ye gates, and be ye lift up, ye everlasting doors, and the King of Glory shall come in." The trumpeters and singers were "as one" in their mighty Hallelujah—"O praise the Lord, for He is good, for His mercy endureth for ever" (2 Chr. v. 13). The ark was solemnly placed in its golden sanctuary, and then "the cloud," the "glory of the Lord," filled the house of the Lord. The two tables of stone, associated with the first rude beginnings of the life of the wilderness, were still, they and they only, in the ark which had now so magnificent a shrine (2 Chr. v. 10). And throughout the whole scene, the person of the king is the one central object, compared with whom even priests and prophets are for the time subordinate. Abstaining, doubtless, from distinctively priestly acts, such as slaying the

victims and offering incense, he yet appears, even more than David did in the bringing up the ark, in a liturgical character. From him came the lofty prayer, the noblest utterance of the creed of Israel, setting forth the distance and the nearness of the Eternal God, One, Incomprehensible, dwelling not in temples made with hands, yet ruling men, hearing their prayers, giving them all good things, wisdom, peace, righteousness. (9.) The solemn day was followed by a week of festival, synchronising with the Feast of Tabernacles, the time of the completed vintage. Representatives of all the tribes, elders, fathers, captains, proselytes, it may be, from the newly-acquired territories in Northern Syria (2 Chr. vi. 32, vii. 8).—all were assembled, rejoicing in the actual glory and the bright hopes of Israel. For the king himself then, or at a later period (the narrative of 1 K. ix. and 2 Chr. vii. leaves it doubtful), there was a strange contrast to the glory of that day. He must be taught that what he had done was indeed right and good, but that it was not all, and might not be permanent. Obedience was better than sacrifice. There was a danger near at hand. (10.) The danger came, and in spite of the warning the king fell. Before long the priests and prophets had to grieve over rival temples to Moloch, Chemosh, Ashtaroth, forms of ritual not idolatrous only, but cruel, dark, impure. This evil came, as the compiler of 1 K. xi. 1-8 records, as the penalty of another. He gave himself to "strange women." He found himself involved in a fascination which led to the worship of strange gods. The starting-point and the goal are given us. We are left, from what we know otherwise, to trace the process. Something there was perhaps in his very "largeness of heart," so far in advance of the traditional knowledge of his age, rising to higher and wider thoughts of God, which predisposed him to it. In recognising what was true in other forms of faith, he might lose his horror at what was false. With this there may have mingled political motives. He may have hoped, by a policy of toleration, to conciliate neighbouring princes, to attract a larger traffic. But probably also there was another influence less commonly taken into account. The wide-spread belief of the East in the magic arts of Solomon is not, it is believed, without its foundation of truth. (11.) Disasters followed before long as the natural consequence of what was politically a blunder as well as religiously a sin. The strength of the nation rested on its unity, and its unity depended on its faith. Whatever attractions the sensuous ritual which he introduced may have had for the great body of the people, the priests and Levites must have looked on the rival worship with entire disfavour. The zeal of the prophetic order was now kindled into active opposition (1 K. xi. 28-39). The king in vain tried to check the current that was setting strong against him. The old tribal jealousies gave signs of renewed vitality. Ephraim was prepared once more to dispute the supremacy of Judah, needing special control (1 K. xi. 28). And with this weakness within there came attacks from without. The king, prematurely old, must have foreseen the rapid breaking up of the great monarchy to which he had succeeded. (12.) Of the inner changes of mind and heart which ran parallel with this history Scripture is comparatively silent. Something may be learnt from the books that bear his name, which, whether written by him or not

stand in the Canon of the O. T. as representing, with profound, inspired insight the suggestive phases of his life; something also from the fact that so little remains out of so much, out of the songs, proverbs, treatises of which the historian speaks (1 K. iv. 32, 33). *Excerpta* only are given from the 8000 Proverbs. Of the thousand and five Songs we know absolutely nothing. The poems of the Son of David may have been like those of Hafiz. The Scribes who compiled the Canon of the O. T. may have acted wisely, rightly, charitably to his fame, in excluding them. (13.) The books that remain meet us, as has been said, as at any rate representing the three stages of his life. The Song of Songs brings before us the brightness of his youth. Then comes in the Book of Proverbs, the stage of practical, prudential thought. The poet has become the philosopher, the mystic has passed into the moralist. But the man passed through both stages without being permanently the better for either. They were to him but phases of his life which he had known and exhausted (Eccl. i., ii.). And therefore there came, as in the Confessions of the Preacher, the great retribution. (14.) Here our survey must end. We may not enter into the things within the veil, or answer either way, the doubting question, Is there any hope? It would not be profitable to give references to the patristic and other writers who have dealt with this subject.—VII. *Legends*.—(1.) Round the facts of the history, as a nucleus, there gathers a whole world of fantastic fables, Jewish, Christian, Mahometan, refractions, coloured and distorted, according to the media through which they pass, of a colossal form. Even in the Targum of Ecclesiastes we find strange stories of his character. He and the Rabbis of the Sanhedrim sat and drank wine together in Jabne. His *paradise* was filled with costly trees which the evil spirits brought him from India. He left behind him spells and charms to cure diseases and cast out evil spirits. His wisdom enabled him to interpret the speech of beasts and birds. He knew the secret virtues of gems and herbs. He was the inventor of Syriac and Arabian alphabets. (2.) Arabic imagination took a yet wilder flight. After a long struggle with the rebellious Africats and Jinns, Solomon conquered them and cast them into the sea. To him belonged the magic ring which revealed to him the past, the present, and the future. Because he stayed his march at the hour of prayer instead of riding on with his horsemen God gave him the winds as a chariot, and the birds flew over him, making a perpetual canopy. The visit of the Queen of Sheba furnished some three or four romances. (3.) The fame of Solomon spread northward and eastward to Persia. At Shiraz they showed the *Meder-Suleiman*, or tomb of Bath-sheba, said that Persepolis had been built by the *Jinns* at his command, and pointed to the Takht-i-Suleimann (Solomon's throne) in proof. (4.) As might be expected, the legends appeared in their coarsest and basest form in Europe, losing all their poetry, the mere appendages of the most detestable of Apocrypha, Books of Magic, a Hygro-manteia, a Contradictio Salomonis condemned by Gelasius, Incantationes, Clavicula, and the like. One pseudonymous work has a somewhat higher character, the *Psalterium Salomonis*, altogether without merit, a mere cento from the Psalms of David, but not otherwise offensive.—VIII. *New Testament*.—We pass from this wild farrago of

Jewish and other fables, to that which presents the most entire contrast to them. The teaching of the N. T. adds nothing to the materials for a life of Solomon. It enables us to take the truest measure of it. The teaching of the Son of Man passes sentence on all that kingly pomp (Matt. vi. 29). It was reserved for the true, the later Son of David, to fulfil the prophetic yearnings which had gathered round the birth of the earlier. He was the true Shêlômôh, the prince of peace, the true Jedid-jah, the well-beloved of the Father.

Solomon's Porch. [PALACE.]

Solomon's Servants (CHILDREN OF). (Ezr. ii. 56, 58; Neh. vii. 57, 60). The persons thus named appear in the lists of the exiles who returned from the Captivity. They occupy all but the lowest places in those lists, and their position indicates some connexion with the services of the Temple. (1.) The name, as well as the order, implies inferiority even to the Nethinim. (2.) The starting point of their history is to be found probably in 1 K. v. 13, 14, ix. 20, 21; 2 Chr. viii. 7, 8. Canaanites were reduced by Solomon to the helot state, and compelled to labour in the king's stone-quarries, and in building his palaces and cities. (3.) 1 Chr. xii. 2 throws some light on their special office. The Nethinim were appointed to be hewers of wood (Josh. ix. 23), and this was enough for the services of the Tabernacle. For the construction and repairs of the Temple another kind of labour was required, and the new slaves were set to the work of hewing and squaring stones (1 K. v. 17, 18). Their descendants appear to have formed a distinct order, inheriting probably the same functions and the same skill.

Solomon's Song. [CANTICLES.]

Solomon, Wisdom of. [WISDOM, BOOK OF.]

Son The term "son" is used in Scripture language to imply almost any kind of descent or succession, as *ben shânâh*, "son of a year," i. e. a year old, *ben kesheth*, "son of a bow," i. e. an arrow. The word *bar* is often found in N. T. in composition, as Bar-timæus.

Soothsayer. [DIVINATION.]

So'pater. Sopater the son of Pyrrhus of Beroea was one of the companions of St. Paul on his return from Greece into Asia, as he came back from his third missionary journey (Acts xx. 4).

Sopher'eth. "The children of Sophereth" were a family who returned from Babylon with Zerubabel among the descendants of Solomon's servants (Ezr. ii. 55; Neh. vii. 57).

Sophonias. The Prophet ZEPHANIAH (2 Esd. i. 40).

Sorcerer. [DIVINATION.]

So'rek, the Valley of. A wady in which lay the residence of Dalilah (Judg. xvi. 4). It appears to have been a Philistine place, and possibly was nearer Gaza than any other of the chief Philistine cities, since thither Samson was taken after his capture at Dalilah's house. Beyond this there are no indications of its position, nor is it mentioned again in the Bible. Eusebius and Jerôme state that a village named Capbarsorech was shown in their day "on the north of Eleutheropolis, near the town of Saar (or Sarna), i. e. Zorah, the native place of Samson."

Sosip'atgr. 1. A general of Judas Maccabæus, who in conjunction with Dosithus defeated Timotheus and took him prisoner, c. B.C. 164 (2 Macc. xii. 19-24).—2. Kinsman or fellow-tribesman of

St. Paul (Rom. xvi. 21). He is probably the same person as SOPATER of Berea.

Sosthenes was a Jew at Corinth, who was seized and beaten in the presence of Gallio (see Acts xviii. 12-17). Some have thought that he was a Christian, and was maltreated thus by his own countrymen, because he was known as a special friend of Paul. A better view is, that Sosthenes was one of the bigoted Jews; and that "the crowd" were Greeks who, taking advantage of the indifference of Gallio, and ever ready to show their contempt of the Jews, turned their indignation against Sosthenes. In this case he must have been the successor of Crispus (Acts xviii. 8). Paul wrote the First Epistle to the Corinthians jointly in his own name and that of a certain Sosthenes whom he terms "the brother" (1 Cor. i. 1). Some have held that he was identical with the Sosthenes mentioned in the Acts. If this be so, he must have been converted at a later period, and have been at Ephesus and not at Corinth, when Paul wrote to the Corinthians. The name was a common one, and but little stress can be laid on that coincidence.

Sotratius, a commander of the Syrian garrison in the Acra at Jerusalem in the reign of Antiochus Epiphanes (c. B.C. 172; 2 Macc. iv. 27, 29).

Sotai. The children of Sotai were a family of the descendants of Solomon's servants who returned with Zerubbabel (Ezr. ii. 55; Neh. vii. 57).

South Ramoth. One of the places frequented by David and his band of outlaws during the latter part of Saul's life (1 Sam. xxx. 27). The towns mentioned with it show that Ramoth must have been on the southern confines of the country—the very border of the desert. It is no doubt identical with RAMATH OF THE SOUTH.

Sow. [SWINE.]

Sower, Sowing. The operation of sowing with the hand is one of so simple a character, as to need little description. The Egyptian paintings furnish many illustrations of the mode in which it was conducted. The sower held the vessel or basket containing the seed, in his left hand, while with his right he scattered the seed broadcast. The "drawing out" of the seed is noticed, as the most characteristic action of the sower, in Ps. cxvi. 6 (A. V. "precious") and Am. ix. 13. In wet soils the seed was trodden in by the feet of animals (Is. xxii. 20). The sowing season commenced in October and continued to the end of February, wheat being put in before, and barley after the beginning of January. The Mosaic law prohibited the sowing of mixed seed (Lev. xix. 19; Deut. xxii. 9).

Spain. The Hebrews were acquainted with the position and the mineral wealth of Spain from the time of Solomon, whose alliance with the Phœnicians enlarged the circle of their geographical knowledge to a very great extent. The local designation, Tarshish, representing the *Tartessus* of the Greeks, probably prevailed until the fame of the Roman wars in that country reached the East, when it was superseded by its classical name. The Latin form of this name is represented by the *Iovavia* of 1 Macc. viii. 3 (where, however, some copies exhibit the Greek form), and the Greek by the *Σπάρδα* of Rom. xv. 24, 28. The passages cited contain all the Biblical notices of Spain. The mere intention of St. Paul to visit Spain implies two interesting facts, viz. the establishment of a Christian community in that country, and this by means of Hellenistic Jews resident there. The

early introduction of Christianity into that country is attested by Irenæus (i. 3) and Tertullian (*adv. Jud.* 7).

Sparrow (Heb. *tzippôr*). This Heb. word occurs upwards of forty times in the O. T. In all passages excepting two it is rendered by A. V. indifferently "bird" or "fowl." In Ps. lxxxiv. 3, and Ps. cii. 7, A. V. renders it "sparrow." The Greek *τρυφίλος* ("sparrow," A. V.) occurs twice in N. T., Matt. x. 29, Luke xii. 6, 7, where the Vulg. has *passeres*. *Tzippôr*, from a root signifying to "chirp" or "twitter," appears to be a phonetic representation of the call-note of any passerine bird. It was reserved for later naturalists to discriminate the immense variety of the smaller birds of the passerine order. Excepting in the cases of the thrushes and the larks, the natural history of Aristotle scarcely comprehends a longer catalogue than that of Moses. Yet in few parts of the world are the species of passerine birds more numerous or more abundant than in Palestine. A very cursory survey has supplied a list of above 100 different species of this order. Although the common sparrow of England (*Passer domesticus*, L.) does not occur in the Holy Land, its place is abundantly supplied by two very closely allied Southern species (*Passer saicalicola*, Vieill., and *Passer cisalpinus*, Tem.). Our English Tree Sparrow (*Passer montanus*, L.) is also very common, and may be seen in numbers on Mount Olivet, and also about the sacred enclosure of the mosque of Omar. This is perhaps the exact species referred to in Ps. lxxxiv. 3. Most of our commoner small birds are found in Palestine. The starling, chaffinch, greenfinch, linnet, goldfinch, corn-bunting, pipits, blackbird, song-thrush, and the various species of wagtail abound. The wood-lark (*Alauda arborea*, L.), crested lark (*Galerida cristata*, Boie.), Calandra lark (*Melanocorypha calandra*, Bp.), short-toed lark (*Calandrella brachydactyla*, Kaup.), Isabel lark (*Alauda deserti*, Licht.), and various other desert species, which are snared in great numbers for the markets, are far more numerous on the southern plains than the skylark in England. In the olive-yards, and among the brushwood of the hills, the Ortolan bunting (*Emberiza hortulana*, L.), and especially Cretzschmar's bunting (*Emberiza caesia*, Cietz.), take the place of our common yellow-hammer, an exclusively northern species. As most of our warblers (*Sylviadae*) are summer migrants, and have a wide eastern range, it was to be expected that they should occur in Syria; and accordingly upwards of twenty of those on the British list have been noted there, including the robin, redstart, whitethroat, blackcap, nightingale, willow-wren, Dartford warbler, whinchat, and stonechat. Besides these, the Palestine lists contain fourteen others, more southern species, of which the most interesting are perhaps the little fantail (*Cisticola schoenicola*, Bp.), the orpheau (*Curruca orpheus* Boie.), and the Sardinian warbler (*Sylvia melanocephala*, Lath.). The chats (*Saxicolae*), represented in Britain by the wheatear, whinchat, and stonechat, are very numerous in the southern parts of the country. At least nine species have been observed. Yet they are not recognised among the Bedouin inhabitants by any name to distinguish them from the larks. The rock sparrow (*Petronia stultia*, Strickl.) is a common bird in the barer portions of Palestine, eschewing woods, and generally to be seen perched alone on the top of a rock or on any large stone. From this

habit it has been conjectured to be the bird alluded to in Ps. cii. 7, as "the sparrow that sitteth alone upon the housetop;" but as the rock sparrow, though found among ruins, never resorts to inhabited buildings, it seems more probable that the bird to which the psalmist alludes is the blue thrush (*Petroscopsus cyaneus*, Boie.). It is a solitary

Petroscopsus cyaneus.

bird, eschewing the society of its own species, and rarely more than a pair are seen together. Among the most conspicuous of the small birds of Palestine are the shrikes (Lani), of which the red-backed shrike (*Lanius collurio*, L.) is a familiar example in the south of England, but there represented by at least five species, all abundantly and generally distributed, viz., *Emmocoetus rufus*, Bp., the woodchat shrike, *Lanius meridionalis*, L.; *L. minor*, L.; *L. personatus*, Tem.; and *Telephonus cucullatus*, Gr. There are but two allusions to the singing of birds in the Scriptures, Eccles. xii. 4 and Ps. civ. 12. As the psalmist is here speaking of the sides of streams and rivers, he probably had in his mind the bulbul of the country, or Palestine nightingale (*Ixos xanthopygius*, Hempr.), a bird not very far removed from the thrush tribe, and a closely allied species of which is the true bulbul of Persia and India. Small birds were therefore probably as ordinary an article of consumption among the Israelites as they still are in the markets both of the Continent and of the East (Luke xii. 6; Matt. x. 29). There are four or five simple methods of fowling practised at this day in Palestine which are probably identical with those alluded to in the O. T. The simplest, but by no means the least successful, among the dexterous Bedouins, is fowling with the throwstick. The only weapon used is a short stick, about 18 inches long and half an inch in diameter. When the game has been discovered, which is generally the red-legged great partridge (*Caccabis saxatilis*, Mey.), the desert partridge (*Ammoperdix Heyi*, Gr.), or the little bustard (*Otis tetrax*, L.), the stick is huddled with a revolving motion so as to strike the legs of the bird as it runs, or sometimes at a rather higher elevation, so that when the victim, alarmed by the approach of the weapon, begins to rise, its wings are struck and it is slightly disabled. The fleet pursuers soon come up, and, using their burnous, is a sort of net, catch and at

CON. D. B

once out the throat of the game. A more scientific method of fowling is that alluded to in Eccles. xi. 30, by the use of decoy birds. Whether falconry was ever employed as a mode of fowling or not is by no means so clear. At the present day it is practised with much care and skill by the Arab inhabitants of Syria, though not in Judaea proper.

Sparta (1 Macc. xiv. 16; 2 Macc. v. 9: A. V. "Lacedaemonians"). In the history of the Macabees mention is made of a remarkable correspondence between the Jews and the Spartans, which has been the subject of much discussion. The alleged facts are briefly these. When Jonathan endeavoured to strengthen his government by foreign alliances (c. B.C. 144), he sent to Sparta to renew a friendly intercourse which had been begun at an earlier time between Areus and Onias, on the ground of their common descent from Abraham (1 Macc. xii. 5-23). The embassy was favourably received, and after the death of Jonathan "the friendship and league" was renewed with Simon (1 Macc. xiv. 16-23). Several questions arise out of these statements as to (1) the people described under the name Spartans, (2) the relationship of the Jews and Spartans, (3) the historic character of the events, and (4) the persons referred to under the names Onias and Areus. 1. The whole context of the passage, as well as the independent reference to the connexion of the "Lacedaemonians" and Jews in 2 Macc. v. 9, seem to prove clearly that the reference is to the Spartans, properly so called. 2. The actual relationship of the Jews and Spartans (2 Macc. v. 9) is an ethnological error, which it is difficult to trace to its origin. It is possible that the Jews regarded the Spartans as the representatives of the Pelagii, the supposed descendants of Peleg the son of Eber. It is certain, from an independent passage, that a Jewish colony existed at Sparta at an early time (1 Macc. xv. 23). 3. The incorrectness of the opinion on which the intercourse was based is obviously no objection to the fact of the intercourse itself. But it is urged that the letters said to have been exchanged are evidently not genuine, since they betray their fictitious origin negatively by the absence of characteristic forms of expression, and positively by actual inaccuracies. To this it may be replied that the Spartan letters (1 Macc. xii. 20-23; xiv. 20-23) are extremely brief, and exist only in a translation of a translation, so that it is unreasonable to expect that any Doric peculiarities should have been preserved. On the other hand the absence of the name of the second king of Sparta in the first letter (1 Macc. xii. 20), and of both kings in the second (1 Macc. xiv. 20), is probably to be explained by the political circumstances under which the letters were written. 4. The difficulty of fixing the date of the first correspondence is increased by the recurrence of the names involved. Two kings bore the names Areus, one of whom reigned B.C. 309-265, and the other, his grandson, died B.C. 257, being only eight years old. The same name was also borne by an adventurer, who occupied a prominent position at Sparta, c. B.C. 184. In Judaea, again, three high priests bore the name Onias, the first of whom held office B.C. 330-309 (or 300); the second B.C. 240-226; and the third c. B.C. 198-171. Josephus is probably correct in fixing the event in the time of Onias III.

Spear. [ARMS.]

Spearman. The word thus rendered in the 3 M

A.V. of Acts xlii. 23 is of very rare occurrence, and its meaning is extremely obscure. Two hundred *δεξιοδδοι* formed part of the escort which accompanied St. Paul in the night-march from Jerusalem to Caesarea. They are clearly distinguished both from the heavy-armed legionaries, who only went as far as Antipatris, and from the cavalry, who continued the journey to Caesarea. As nothing is said of the return of the *δεξιοδδοι* to Jerusalem after their arrival at Antipatris, we may infer that they accompanied the cavalry to Caesarea, and this strengthens the supposition that they were irregular light-armed troops, so lightly armed, indeed, as to be able to keep pace on the march with mounted soldiers.

Spice, Spices. Under this head it will be desirable to notice the following Hebrew words, *bāsām*, *nēcōth*, and *samnitm*. 1. *Bāsām*, *besem*, or *bōsem*.

Balm of Gilead (*Amyris gileadensis*).

The first-named form of the Hebrew term, which occurs only in Cant. v. 1, "I have gathered my myrrh with my spice," points apparently to some definite substance. In the other places, with the exception perhaps of Cant. i. 13, vi. 2, the words refer more generally to sweet aromatic odours, the principal of which was that of the balsam, or balm of Gilead; the tree which yields this substance is now generally admitted to be the *Amyris* (*Balsamodendron*) *opobalsamum*; though it is probable that other species of *Amyridaceae* are included under the terms. The identity of the Hebrew name with the Arabic *Basham* or *Balsām*, leaves no reason to doubt that the substances are identical. The form *Besem* or *Bōsem*, which is of frequent occurrence in the O. T., may well be represented by the general term of "spices," or "sweet odours," in accordance with the renderings of the LXX. and Vulg. The balm of Gilead tree grows in some parts of Arabia and Africa, and is seldom more than fifteen feet

SPIKENARD

high, with straggling branches and scanty foliage. The balsam is chiefly obtained from incisions in the bark, but the substance is procured also from the green and ripe berries. 2. *Nēcōth* (Gen. xxxvii. 25; xliii. 11). The most probable explanation is that which refers the word to the Arabic *naka'at*, i. e. "the gum obtained from the *Tragacanth*" (*Astragalus*). The gum is a natural exudation from the trunk and branches of the plant. It is uncertain whether the word *nēcōth* in 2 K. xx. 13; Is. xxxix. 2, denotes spice of any kind. The A. V. reads in the text "the house of his precious things," the margin gives "spicery." 3. *Samnitm*. A general term to denote those aromatic substances which were used in the preparation of the anointing oil, the incense offerings, &c. The spices mentioned as being used by Nicodemus for the preparation of our Lord's body (John xix. 39, 40) are "myrrh and aloes," by which latter word must be understood, not the aloes of medicine (*Aloe*), but the highly-scented wood of the *Aquilaria agallochum*.

Spider. The representative in the A. V. of the Hebrew words *accābīsh* and *semānīth*. 1. *Accābīsh* occurs in Job viii. 14, and in Is. lix. 5. There is no doubt of the correctness of our translation in rendering this word "spider." 2. *Sēmānīth*, wrongly translated by the A. V. "spider" in Prov. xxx. 28, the only passage where the word is found, has reference, it is probable, to some kind of lizard. The lizard indicated is evidently some species of *Gecko*, some notice of which genus of animals is given under the article LIZARD.

Spikenard (Heb. *nērd*). Of this substance mention is made twice in the O. T., viz. in Cant. i. 12, iv. 13, 14. The ointment with which our Lord was anointed as He sat at meat in Simon's house at Bethany consisted of this precious substance, the costliness of which may be inferred from the indignant surprise manifested by some of the witnesses of the transaction (see Mark xiv. 3-5; John xii. 3, 5). There is no doubt that *sunbul* is by Arabian authors used as the representative of the Greek *nardos*, as Sir Wm. Jones has shown. Dr. Royle having ascertained that the *jatamansa*, one of the Hindu synonyms for the *sunbul*, was annually brought from the mountains overhanging the Ganges and Jumna

Spikenard.

rivers down to the plains, purchased some of these fresh roots and planted them in the botanic gardens at Sahayunpore. This plant, which has been called *Nardostachys jatamansi* by De Candolle, is evidently the kind of *nardos* described by Dioscorides (l. 6) under the name of γάργυρίς, i. e. "the Ganges nard."

Spinning. The notices of spinning in the Bible are confined to Ex. xxxv. 25, 26; Matt. vi. 28; and Prov. xxxi. 19. The latter passage implies (according to the A. V.) the use of the same instruments which have been in vogue for hand-spinning down to the present day, viz. the distaff and spindle. The distaff, however, appears to have been dispensed with, and the term so rendered means the spindle itself, while that rendered "spindle" represents the *whirl* of the spindle, a button of circular rim which was affixed to it, and gave steadiness to its circular motion. The "whirl" of the Syrian women was made of amber in the time of Pliny. The spindle was held perpendicularly in the one hand, while the other was employed in drawing out the thread.

Sponge is mentioned only in the N. T. (Matt. xxvii. 48; Mark xv. 36; John xix. 29). The commercial value of the sponge was known from very early times; and although there appears to be no notice of it in the O. T., yet it is probable that it was used by the ancient Hebrews, who could readily have obtained it good from the Mediterranean.

Stachys. A Christian at Rome, saluted by St. Paul in the Epistle to the Romans (xvi. 9).

Sponuse. [MARRIAGE.]

Stacte (Heb. *nátáf*), the name of one of the sweet spices which composed the holy incense (see Ex. xxx. 34). The Heb. word occurs once again (Job xxxvi. 27). For the various opinions as to what substance is intended by *nátáf*, see Celsius (*Hierob.* i. 529). Rosenmüller identifies the *nátáf* with the gum of the storax tree (*Styrax officinale*), but all that is positively known is that it signifies an odorous distillation from some plant.

Standards. [ENSIGNS.]

Star of the Wise Men. Until the last few years the interpretation of St. Matt. ii. 1-12, by theologians in general, coincided in the main with that which would be given to it by any person of ordinary intelligence who read the account with due attention. Some supernatural light resembling a star had appeared in some country (possibly Persia) far to the East of Jerusalem, to men who were versed in the study of celestial phenomena, conveying to their minds a supernatural impulse to repair to Jerusalem, where they would find a new-born king. It supposed them to be followers, and possibly priests, of the Zend religion, whereby they were led to expect a Redeemer in the person of the Jewish infant. On arriving at Jerusalem, after diligent inquiry and consultation with the priests and learned men who could naturally best inform them, they are directed to proceed to Bethlehem. The star which they had seen in the East re-appeared to them and preceded them, until it took up its station over the place where the young child was. The whole matter, that is, was supernatural. Latterly, however, a very different opinion has gradually become prevalent upon the subject. The star has been displaced from the category of the supernatural, and has been referred to the ordinary astronomical phenomenon of a conjunction of the planets Jupiter and Saturn. The idea originated with Kepler. In

the month of May, B.C. 7, a conjunction of the planets Jupiter and Saturn occurred, not far from the first point of Aries, the planets rising in Chaldaea about $3\frac{1}{2}$ hours before the sun. It is said that on astrological grounds such a conjunction could not fail to excite the attention of men like the Magi. Supposing them to have set out at the end of May B.C. 7 upon a journey for which the circumstances will be seen to require at least seven months, the planets were observed to separate slowly until the end of July, when their motions becoming retrograde, they again came into conjunction by the end of September. At that time there can be no doubt Jupiter would present to astronomers, especially in so clear an atmosphere, a magnificent spectacle. It was then at its most brilliant apparition, for it was at its nearest approach both to the sun and to the earth. Not far from it would be seen its duller and much less conspicuous companion Saturn. This glorious spectacle continued almost unaltered for several days, when the planets again slowly separated, then came to a halt, when, by re-assuming a direct motion, Jupiter again approached to a conjunction for the third time with Saturn, just as the Magi may be supposed to have entered the Holy City. And, to complete the fascination of the tale, about an hour and a half after sunset, the two planets might be seen from Jerusalem, hanging as it were in the meridian, and suspended over Bethlehem in the distance. These celestial phenomena thus described are, it will be seen, beyond the reach of question, and at the first impression they assuredly appear to fulfil the conditions of the Star of the Magi. The first circumstance which created a suspicion to the contrary, arose from an exaggeration, unaccountable for any man having a claim to be ranked among astronomers, on the part of Dr. Ideler himself, who described the two planets as wearing the appearance of one bright but diffused light to persons having weak eyes. Not only is this imperfect eyesight inflicted upon the Magi, but it is quite certain that, had they possessed any remains of eyesight at all, they could not have failed to see, not a single star, but two planets, at the very considerable distance of double the moon's apparent diameter. Exaggerations of this description induced the writer of this article to undertake the very formidable labour of calculating afresh an *ephemeris* of the planets Jupiter and Saturn, and of the sun, from May to December B.C. 7. The result was to confirm the fact of there being three conjunctions during the above period, though somewhat to modify the dates assigned to them by Dr. Ideler. (a) It is conceivable that solely on the ground of astrological reasons men would be induced to undertake a seven months' journey. And as to the widely-spread and prevalent expectation of some powerful personage about to show himself in the East, the fact of its existence depends on the testimony of Tacitus, Suetonius, and Josephus. But it ought to be very carefully observed that all these writers speak of this expectation as applying to Vespasian, in A.D. 69, which date was seventy-five years, or two generations after the conjunction in question! (b) On Dec. 4, B.C. 7, the sun set at Jerusalem at 5 p.m. Supposing the Magi to have then commenced their journey to Bethlehem, they would first see Jupiter and his dull and somewhat distant companion $1\frac{1}{2}$ hour distant from the meridian, in a S.E. direction, and decidedly to the East of Bethlehem. By the time they came to Rachel's tomb the planets would

be due south of them, on the meridian, and no longer over the hill of Bethlehem. The road then takes a turn to the east, and ascends the hill near to its western extremity; the planets therefore would now be on their right hands, and a little behind them: the "star," therefore, ceased altogether to go "before them" as a guide. Arrived on the hill and in the village, it became physically impossible for the star to stand over any house whatever close to them, seeing that it was now visible far away beyond the hill to the west, and far off in the heavens at an altitude of 57°. As they advanced, the star would of necessity recede, and under no circumstances could it be said to stand "over" any house, unless at the distance of miles from the place where they were. Thus the beautiful phantasm of Kepler and Ideler, which has fascinated so many writers, vanishes before the more perfect daylight of investigation.

Stater (A. V. "a piece of money," margin, "stater"). 1. The term stater is held to signify a coin of a certain weight, but perhaps means a standard coin. The gold staters were didrachms of the later Phœnician and the Attic talents, which, in this denomination, differ only by about four grains troy. Of the former talent were the Dacic staters or Daries; of the latter, the stater of Athens. The electrum staters were coined by the Greek towns on the west coast of Asia Minor. They are of gold and silver mixed, in the proportion of three parts of gold to one of silver. Thus far the stater is always a didrachm. In silver, however, the term is applied to the tetradrachm of Athens, which was of the weight of two gold staters of the same currency. There can therefore be no doubt that the name stater was applied to the standard denomination of both metals, and does not positively imply either a didrachm or a tetradrachm. 2. In the N. T. the stater is once mentioned, in the narrative of the miracle of the sacred tribute-money (Matt. xvii. 24-27). The stater must here mean a silver tetradrachm; and the only tetradrachms then current in Palestine were of the same weight as the Hebrew shekel. And it is observable, in confirmation of the minute accuracy of the Evangelist, that at this period the silver currency in Palestine consisted of Greek imperial tetradrachms, or staters, and Roman denarii of a quarter their value, didrachms having fallen into disuse.

Steel. In all cases where the word "steel" occurs in the A. V. the true rendering of the Hebrew is "copper." Whether the ancient Hebrews were acquainted with steel is not perfectly certain. It has been inferred from a passage in Jeremiah (xv. 12), that the "iron from the north" there spoken of denoted a superior kind of metal, hardened in an unusual manner, like the steel obtained from the Chalybes of the Pontus, the ironsmiths of the ancient world. The hardening of iron for cutting instruments was practised in Pontus, Lydia, and Laconia. Justin mentions two rivers in Spain, the Biblilis and Chalybs, the water of which was used for hardening iron (comp. Plin. xxxiv. 41). There is, however, a word in Hebrew, *paldah*, which occurs only in Nah. ii. 3 [4], and is there rendered "corches," but which most probably denotes steel or hardened iron, and refers to the flashing scythes of the Assyrian chariots. Steel appears to have been known to the Egyptians. The steel weapons in the tomb of Rameses III., says Wilkinson, are painted blue, the bronze red.

Stephanas. A Christian convert of Coriath whose household Paul baptised as the "first fruits of Achaia" (1 Cor. i. 16, xvi. 15).

Stephen, the First Martyr. He was the chief of the Seven (commonly called DEACONS) appointed to rectify the complaints in the early Church of Jerusalem, made by the Hellenistic against the Hebrew Christians. His Greek name indicates his own Hellenistic origin. His importance is stamped on the narrative by a reiteration of emphatic almost superlative phrases: "full of faith and of the Holy Ghost" (Acts vi. 5); "full of grace and power" (ib. 8); irresistible "spirit and wisdom" (ib. 10); "full of the Holy Ghost" (vii. 55). Of his ministrations amongst the poor we hear nothing. But he seems to have been an instance, such as is not uncommon in history, of a new energy derived from a new sphere. He shot far ahead of his six companions, and far above his particular office. First, he arrests attention by the "great wonders and miracles that he did." Then begins a series of disputations with the Hellenistic Jews of North Africa, Alexandria, and Asia Minor, his companions in race and birthplace. The subject of these disputations is not expressly mentioned; but, from what follows, it is evident that he struck into a new vein of teaching, which eventually caused his martyrdom. Down to this time the Apostles and the early Christian community had clung in their worship, not merely to the Holy Land and the Holy City, but to the Holy Place of the Temple. This local worship, with the Jewish customs belonging to it, he now denounced. So we must infer from the accusations brought against him, confirmed as they are by the tenor of his defence. The actual words of the charge may have been false, as the sinister and malignant intention which they ascribed to him was undoubtedly false. He was arrested at the instigation of the Hellenistic Jews, and brought before the Sanhedrin. When the charge was formally lodged against him, his countenance kindled (vi. 15). For a moment, the account seems to imply, the judges of the Sanhedrin were awed at his presence. Then the high-priest that presided appealed to him to know his own sentiments on the accusations brought against him. To this Stephen replied in a speech which has every appearance of being faithfully reported. The framework in which his defence is cast is a summary of the history of the Jewish Church. In the facts which he selects from this history, he is guided by two principles—at first more or less latent, but gradually becoming more and more apparent as he proceeds. The first is the endeavour to prove that, even in the previous Jewish history, the presence and favour of God had not been confined to the Holy Land or the Temple of Jerusalem. This he illustrates with a copiousness of detail which makes his speech a summary almost as much of sacred geography as of sacred history. The second principle of selection is based on the attempt to show that there was a tendency from the earliest times towards the same ungrateful and narrow spirit that had appeared in this last stage of their political existence. Both of these selections are worked out on what may almost be called critical principles. It would seem that, just at the close of his argument, Stephen saw a change in the aspect of his judges, as if for the first time they had caught the drift of his meaning. He broke off from his calm address, and turned suddenly upon them in an impassioned attack which shows

that he saw what was in store for him. As he spoke they showed by their faces that their hearts "were being sawn asunder," and they kept gnashing their set teeth against him; but still, though with difficulty, restraining themselves. He, in this last crisis of his fate, turned his face upwards to the open sky, and as he gazed the vault of heaven seemed to him to part asunder; and the Divine Glory appeared through the rending of the earthly veil—the Divine Presence, seated on a throne, and on the right hand the human form of "Jesus," Stephen spoke as if to himself, describing the glorious vision; and, in so doing, alone of all the speakers and writers in the N. T., except only Christ Himself, uses the expressive phrase, "the Son of Man." As his judges heard the words, they could fear no longer. They broke into a loud yell; they clapped their hands to their ears; they flew as with one impulse upon him, and dragged him out of the city to the place of execution. Those were to take the lead in this wild and terrible act who had taken upon themselves the responsibility of denouncing him (Deut. xvii. 7; comp. John viii. 7). In this instance, they were the witnesses who had reported or mis-reported the words of Stephen. They, according to the custom, for the sake of facility in their dreadful task, stripped themselves, as is the Eastern practice on commencing any violent exertion; and one of the prominent leaders in the transaction was deputed by custom to signify his assent to the act by taking the clothes into his custody, and standing over them whilst the bloody work went on. The person who officiated on this occasion was a young man from Tarsus—one probably of the Cilician Hellenists who had disputed with Stephen. His name, as the narrative significantly adds, was Saul. Everything was now ready for the execution. It was outside the gates of Jerusalem. The earlier tradition fixed it at what is now called the Damascus gate. The later, which is the present tradition, fixed it at what is hence called St. Stephen's gate. As the first volley of stones burst upon him, he called upon the Master whose human form he had just seen in the heavens, and repeated almost the words with which He himself had given up His life on the cross, "O Lord Jesus, receive my spirit." Another crash of stones brought him on his knees. One loud piercing cry answering to the loud shriek or yell with which his enemies had flown upon him—escaped his dying lips. Again clinging to the spirit of his Master's words, he cried "Lord, lay not this sin to their charge," and instantly sank upon the ground, and, in the touching language of the narrator, who then uses for the first time the word, afterwards applied to the departure of all Christians, but here the more remarkable from the bloody scenes in the midst of which the death took place—"fell asleep." His mangled body was buried by the class of Hellenists and proselytes to which he belonged. The importance of Stephen's career may be briefly summed up under three heads:—I. He was the first great Christian ecclesiastic, "the Archdeacon," as he is called in the Eastern Church.—II. He is the first martyr—the proto-martyr. To him the name "martyr" is first applied (Acts xxii. 20).—III. He is the forerunner of St. Paul. He was the anticipator, as, had he lived, he would have been the propagator, of the new phase of Christianity, of which St. Paul became the main support.

Stocks. The term "stocks" is applied in the

A. V. to two different articles, one of which (Heb. *mahpəceth*) answers rather to our pillory, while the other (*sad*) answers to our "stocks," the feet alone being confined in it. The prophet Jeremiah was confined in the first sort (Jer. xx. 2), which appears to have been a common mode of punishment in his day (Jer. xxix. 26), as the prisons contained a chamber for the special purpose, termed "the house of the pillory" (2 Chr. xvi. 10; A. V. "prison-house"). The stocks (*sad*) are noticed in Job xiii. 27, xxiii. 11, and Acts xvi. 24. The term used in Prov. vii. 22 (A. V. "stocks") more properly means a fetter.

Stoics. The Stoics and Epicureans, who are mentioned together in Acts xvii. 18, represent the two opposite schools of practical philosophy which survived the fall of higher speculation in Greece. The Stoic school was founded by Zeno of Citium (c. B.C. 280), and derived its name from the painted "portico" (*stoa*) in which he taught. Zeno was followed by Cleanthes (c. B.C. 260), Cleanthes by Chrysippus (c. B.C. 240), who was regarded as the intellectual founder of the Stoic system. Stoicism soon found an entrance at Rome, and under the Empire stoicism was not unnaturally connected with republican virtue. The ethical system of the Stoics has been commonly supposed to have a close connexion with Christian morality. But the morality of stoicism is essentially based on pride, that of Christianity on humility; the one upholds individual independence, the other absolute faith in another; the one looks for consolation in the issue of fate, the other in Providence; the one is limited by periods of cosmical ruin, the other is consummated in a personal resurrection (Acts xvii. 18). But in spite of the fundamental error of stoicism, which lies in a supreme egotism, the teaching of this school gave a wide currency to the noble doctrines of the Fatherhood of God, the common bonds of mankind, the sovereignty of the soul.

Stomacher. The Heb. *petihgil* describes some article of female attire (Is. iii. 24), the character of which is a mere matter of conjecture. The LXX describes it as a variegated tunic; the Vulgate as a species of girdle.

Stones. The uses to which stones were applied in ancient Palestine were very various. 1. They were used for the ordinary purposes of building, and in this respect the most noticeable point is the very large size to which they occasionally run (Maik xiii. 1). Robinson gives the dimensions of one as 24 feet long by 6 feet broad and 3 feet high. For most public edifices hewn stones were used: an exception was made in regard to altars (Ex. xx. 25; Deut. xxvii. 5; Josh. viii. 31). The Phœnicians were particularly famous for their skill in hewing stone (2 Sam. v. 11; 1 K. v. 18). Stones were selected of certain colours in order to form ornamental string-courses (1 Chr. xxix. 2). They were also employed for pavements (2 K. xvi. 17; comp. Esth. i. 6). 2. Large stones were used for closing the entrances of caves (Josh. x. 18; Dan. vi. 17), sepulchres (Matt. xxvii. 60; John xi. 38, xx. 1), and springs (Gen. xxix. 2). 3. Flint-stones occasionally served the purpose of a knife, particularly for circumcision and similar objects (Ex. iv. 25; Josh. v. 2, 3). 4. Stones were further used as a munition of war for slings (1 Sam. xvii. 40, 49), catapults (2 Chr. xxvi. 14), and bows (Wisd. v. 22; comp. 1 Macc. vi. 51); as boundary marks (Deut. xix. 14, xxvii. 17; Job xxiv. 2; Prov. xxii.

28, xxiii. 10); as weights for scales (Deut. xxv. 13; Prov. xvi. 11); and for mills (2 Sam. xi. 21). 5. Large stones were set up to commemorate any remarkable events (Gen. xxviii. 18, xxxv. 14, xxi. 45; Josh. iv. 9; 1 Sam. vii. 12). Such stones were occasionally consecrated by anointing (Gen. xxviii. 18). A similar practice existed in heathen countries, and by a singular coincidence these stones were described in Phœnicia by a name very similar to Bethel, viz. *beth-yitia*. The only point of resemblance between the two consists in the custom of anointing. 6. That the worship of stones prevailed among the heathen nations surrounding Palestine, and was borrowed from them by apostate Israelites, appears from Is. lvii. 6 according to the ordinary rendering of the passage. 7. Heaps of stones were piled up on various occasions, as in token of a treaty (Gen. xxxi. 46); or over the grave of some notorious offender (Josh. vii. 26, viii. 20; 2 Sam. xlviii. 17). 8. The "white stone" noticed in Rev. ii. 17 has been variously regarded as referring to the pebble of acquittal used in the Greek courts; to the lot cast in elections in Greece; to both these combined; to the stones in the high-priest's breastplate; to the tickets presented to the victors at the public games; or, lastly, to the custom of writing on stones. 9. The use of stones for tablets is alluded to in Ex. xxiv. 12, and Josh. viii. 32. 10. Stones for striking fire are mentioned in 2 Macc. x. 3. 11. Stones were prejudicial to the operations of husbandry: hence the custom of spoiling an enemy's field by throwing quantities of stones upon it (2 K. iii. 19, 25), and, again, the necessity of gathering stones previous to cultivation (Is. v. 2; Eccl. iii. 5). 12. The notice in Zech. xii. 8 of the "burdensome stone" is referred by Jerome to the custom of lifting stones as an exercise of strength (comp. Eccles. vi. 21); but it may equally well be explained of a large corner-stone as a symbol of strength (Is. xxviii. 16). Stones are used metaphorically to denote hardness or insensibility (1 Sam. xxv. 37; Ez. xi. 19, xxxvi. 26), as well as firmness or strength (Gen. xlix. 24). The members of the Church are called "living stones," as contributing to rear that living temple in which Christ, himself "a living stone," is the chief or head of the corner (Eph. ii. 20-22; 1 Pet. ii. 4-8).

Stones, Precious. The reader is referred to the separate articles, such as AGATE, CARBUNCLE, SARDONYX, &c., for such information as it has been possible to obtain on the various gems mentioned in the Bible. The identification of many of the Hebrew names of precious stones is a task of considerable difficulty. As far, however, as regards the stones of the high-priest's breastplate, it must be remembered that the authority of Josephus, who had frequent opportunities of seeing it worn, is preferable to any other. The Vulgate agrees with his nomenclature, and in Jerome's time the breastplate was still to be inspected in the Temple of Concord: hence this agreement of the two is of great weight. Precious stones are frequently alluded to in the Holy Scriptures; they were known and very highly valued in the earliest times. The Tyrians traded in precious stones supplied by Syria (Ez. xxvii. 16). The merchants of Sheba and Raamah in South Arabia, and doubtless India and Ceylon, supplied the markets of Tyre with various precious stones. The art of engraving on precious stones was known from the very earliest times. Sir G. Wilkinson says, "The Israelites learnt the art of

cutting and engraving stones from the Egyptians;" but it is probable that it was known to them long before their sojourn in Egypt (Gen. xxxviii. 18). The twelve stones of the breastplate were engraved each one with the name of one of the tribes (Ex. xxviii. 17-21). It is an undecided question whether the diamond was known to the early nations of antiquity. The A. V. gives it as the rendering of the Heb. *Yahdām*, but it is probable that the jasper is intended. The substance used for polishing precious stones by the ancient Hebrews and Egyptians was emery powder or the emery stone (*brundum*), a mineral inferior only to the diamond in hardness. In our article on *LIGURE*, we were of opinion that the stone denoted was probably *tourmaline*. We objected to the "hyacinth stone" representing the *lyncurium* of the ancients, because of its not possessing attractive powers in any marked degree. It appears, however, from a communication kindly made to us by Mr. King, that the *hyacinth* (*zircon*) is highly electric when rubbed. Precious stones are used in Scripture in a figurative sense, to signify value, beauty, durability, &c., in those objects with which they are compared (see Cant. v. 14; Is. lix. 11, 12; Lam. iv. 7; Rev. iv. 3, xxi. 10, 21).

Stoning. [PUNISHMENTS.]

Stork (Heb. *chaskidh*). It is singular that a bird so conspicuous and familiar as the stork must have been both in Egypt and Palestine should have escaped notice by the LXX., but there can be no doubt of the correctness of the rendering of A. V.

White Stork (*Ciconia alba*).

The White Stork (*Ciconia alba*, L.) is one of the largest and most conspicuous of land birds, standing nearly four feet high, the jet black of its wings and its bright red beak and legs contrasting finely with the pure white of its plumage (Zech. v. 9). In the neighbourhood of man it devours readily all kinds of offal and garbage. For this reason, doubtless, it is placed in the list of unclean birds by the Mosaic Law (Lev. xi. 19; Deut. xiv. 18). The range of the white stork extends over the whole of Europe, except the British Isles, where it is now only a rare visitant and over Northern Africa and Asia, as far

at least as Birmah. The Black Stork (*Ciconia nigra*, L.), though less abundant in places, is scarcely less widely distributed, but has a more easterly range than its congener. Both species are very numerous in Palestine. While the black stork is never found about buildings, but prefers marshy places in forests, and breeds on the tops of the loftiest trees; the white stork attaches itself to man, and for the service which it renders in the destruction of reptiles and the removal of offal has been repaid from the earliest times by protection and reverence. The derivation of *chusidih* (from *chased*, "kindness") points to the paternal and filial attachment of which the stork seems to have been a type among the Hebrews no less than the Greeks and Romans. It was believed that the young repaid the care of their parents by attaching themselves to them for life, and tending them in old age. Pliny also notices their habit of always returning to the same nest. Probably there is no foundation for the notion that the stork so far differs from other birds as to recognise its parents after it has become mature; but of the fact of these birds returning year after year to the same spot, there is no question. That the parental attachment of the stork is very strong, has been proved on many occasions. Few migratory birds are more punctual to the time of their reappearance than the white stork, or at least, from its familiarity and conspicuousness, its migrations have been more accurately noted. Pliny states that it is rarely seen in Asia Minor after the middle of August. This is probably a slight error, as the ordinary date of its arrival in Holland is the second week in April, and it remains until October. In Palestine it has been observed to arrive on the 22nd March. The stork has no note, and the only sound it emits is that caused by the sudden snapping of its long mandibles. Some unnecessary difficulty has been raised respecting the expression in Ps. civ. 17, "As for the stork, the fir-trees are her house." In lands of ruins, which from their neglect and want of drainage supply him with abundance of food, he finds a column or a solitary arch the most secure position for his nest; but where neither towers nor ruins abound he does not hesitate to select a tall tree, as both storks, swallows, and many other birds must have done before they were tempted by the artificial conveniences of man's buildings to desert their natural places of nidification. It is therefore needless to interpret the text of the stork merely *perching* on trees. It probably was no less numerous in Palestine when David wrote than now; but the number of suitable towers must have been far fewer, and it would therefore resort to trees. The black stork, no less common in Palestine, has never relinquished its natural habit of building upon trees. This species, in the north-eastern portion of the land, is the most abundant of the two.

Strain at. The A. V. of 1611 renders Matt. xxiii. 24, "Ye blind guides! which *strain* at a gnat, and swallow a camel." There can be little doubt, that this obscure phrase is due to a printer's error, and that the true reading is "strain out." "In a ride from Tangier to Tetuan," remarks a traveller, "I observed that a Moorish soldier who accompanied me, when he drank, always unfolded the end of his turban and placed it over the mouth of his *bota*, drinking through the muslin, to *strain out* the *gnats*, whose larvae swarm in the water of that country."

Stranger. A "stranger" in the technical sense

of the term may be defined to be a person of foreign, i. e. non-Israelitish, extraction resident within the limits of the promised land. He was distinct from the proper "foreigner," inasmuch as the latter still belonged to another country, and would only visit Palestine as a traveller: he was still more distinct from the "nations," or non-Israelite peoples. The term may be compared with our expression "naturalized foreigner." The terms "applied to the "stranger" have special reference to the fact of his *residing* in the land. The existence of such a class of persons among the Israelites is easily accounted for: the "mixed multitude" that accompanied them out of Egypt (Ex. xii. 38) formed one element; the Canaanitish population, which was never wholly extirpated from their native soil, formed another and a still more important one; captives taken in war formed a third; fugitives, hired servants, merchants, &c., formed a fourth. The census of them in Solomon's time gave a return of 153,600 males (2 Chr. ii. 17), which was equal to about a tenth of the whole population. The enactments of the Mosaic Law, which regulated the political and social position of resident strangers, were conceived in a spirit of great liberality. With the exception of the Moabites and Ammonites (Deut. xxiii. 3), all nations were admissible to the rights of citizenship under certain conditions. Whether a stranger could ever become legally a landowner is a question about which there may be doubt. The stranger appears to have been eligible to all civil offices, that of king excepted (Deut. xvii. 15). In regard to religion, it was absolutely necessary that the stranger should not infringe any of the fundamental laws of the Israelitish state. If he was a bondsman he was obliged to submit to circumcision (Ex. xii. 44); if he was independent, it was optional with him; but if he remained uncircumcised, he was prohibited from partaking of the Passover (Ex. xii. 48), and could not be regarded as a full citizen. Liberty was also given in regard to the use of prohibited food to an uncircumcised stranger. Assuming, however, that the stranger was circumcised, no distinction existed in regard to legal rights between the stranger and the Israelite. The Israelite is enjoined to treat him as a brother (Lev. xix. 34; Deut. x. 19). It also appears that the "stranger" formed the class whence the hirelings were drawn; the terms being coupled together in Ex. xii. 45; Lev. xxii. 10, xxv. 6, 40. The liberal spirit of the Mosaic regulations respecting strangers presents a strong contrast to the rigid exclusiveness of the Jews at the commencement of the Christian era. The growth of this spirit dates from the time of the Babylonish captivity. Our Lord condemns it in the parable of the good Samaritan, where He defines the term "neighbour" in a sense new to His hearers (Luke x. 36). It should be observed, however, that the proselyte of the New Testament is the true representative of the stranger of the Old Testament, and towards this class a cordial feeling was manifested.

Straw. Both wheat and barley straw were used by the ancient Hebrews chiefly as fodder for their horses, cattle, and camels (Gen. xxiv. 25; 1 K. iv. 28; Is. xi. 7, lxx. 25). There is no intimation that straw was used for litter. It was employed by the Egyptians for making bricks (Ex. v. 7, 16), being chopped up and mixed with the clay to make them more compact and to prevent their cracking. The ancient Egyptians reaped their corn

close to the ear, and afterwards cut the straw close to the ground and laid it by. This was the straw that Pharaoh refused to give to the Israelites.

Stream of Egypt occurs once in the A. V. instead of "the river of Egypt" (Is. xxvii. 12). [RIVER OF EGYPT.]

Street. The streets of a modern Oriental town presented a great contrast to those with which we are familiar, being generally narrow, tortuous, and gloomy, even in the best towns. Their character is mainly fixed by the climate and the style of architecture, the narrowness being due to the extreme heat, and the gloominess to the circumstance of the windows looking for the most part into the inner court. As these same influences existed in ancient times, we should be inclined to think that the streets were much of the same character as at present. The street called "Straight," in Damascus (Acts ix. 11), was an exception to the rule of narrowness: it was a noble thoroughfare, 100 feet wide, divided in the Roman age by colonnades into three avenues, the central one for foot passengers, the side passages for vehicles and horsemen going in different directions. The shops and warehouses were probably collected together into bazars in ancient as in modern times (Jer. xxxvii. 21), and of the wool, brazier, and clothes bazars in Jerusalem (Joseph. *B. J.* v. 8, §1), and perhaps the agreement between Benhadad and Ahab that the latter should "make streets in Damascus" (1 K. xx. 34), was in reference rather to bazars, and thus amounted to the establishment of a *jus commercii*. That streets occasionally had names appears from Jer. xxxvii. 21; Acts ix. 11. That they were generally unpaved may be inferred from the notices of the pavement laid by Herod the Great at Antioch, and by Herod Agrippa II. at Jerusalem. Hence pavement forms one of the peculiar features of the ideal Jerusalem (Tob. xiii. 17; Rev. xxi. 21). Each street and bazar in a modern town is locked up at night: the same custom appears to have prevailed in ancient times (Cant. iii. 3).

Stripes. [PUNISHMENTS.]

Su'ah. Son of Zophai, an Asherite (1 Chr. vii. 36).

Su'ba. The sons of Suba were among the sons of Solomon's servants who returned with Zorobabel (1 Esd. v. 34).

Subai = SHALMAI (1 Esd. v. 30; comp. Ezr. ii. 46).

Succoth. A town of ancient date in the Holy Land, which is first heard of in the account of the homeward journey of Jacob from Padan-aram (Gen. xxxiii. 17). The name is fancifully derived from the fact of Jacob's having there put up "booths" (*Succoth*) for his cattle, as well as a house for himself. From the itinerary of Jacob's return it seems that Succoth lay between PENIEL, near the foot of the torrent Jabbok, and Shechem (comp. xxxi. 30, and xxxiii. 18). In accordance with this is the mention of Succoth in the narrative of Gideon's pursuit of Zebah and Zalmunna (Judg. vii. 5-17). It would appear from this passage that it lay on the east of Jordan, which is corroborated by the fact that it was allotted to the tribe of Gad (Josh. xiii. 27). Succoth is named once again after this—in 1 K. vii. 46; 2 Chr. iv. 17—as marking the spot at which the brass-foundries were placed for casting the metal-work of the Temple. It appears to have been known in the time of Jerome, who says that there was then a

town named Sochoth beyond the Jordan, in the district of Scythopolis. Nothing more, however, was heard of it till Burckhardt's journey. He mentions it in a note to p. 345 (July 2). He is speaking of the places about the Jordan, and, after naming three ruined towns "on the west side of the river to the north of Bysan," he says: "Near where we crossed to the south are the ruins of Sukkot. The spot at which he crossed he has already stated to have been 'two hours from Bysan, which bore N.N.W.'" Dr. Robinson and Mr. Van de Velde have discovered a place named *Sâkât*, evidently entirely distinct both in name and position from that of Burckhardt. In the accounts and maps of these travellers it is placed on the west side of the Jordan, less than a mile from the river, and about 10 miles south of *Beisan*. The distance of *Sâkât* from *Beisan* is too great, even if it were on the other side of the Jordan, to allow of its being the place referred to by Jerome. The *Sukkot* of Burckhardt is more suitable. But it is doubtful whether either of them can be the Succoth of the Old Test. For the events of Gideon's story the latter of the two is not unsuitable. *Sâkât*, on the other hand, seems too far south, and is also on the west of the river. But both appear too far to the north for the Succoth of Jacob. Until the position of Succoth is more exactly ascertained, it is impossible to say what was the VALLEY OF SUCCOTH mentioned in Ps. lx. 6 and cviii. 7.

Succoth, the first camping-place of the Israelites when they left Egypt (Ex. xii. 37, xiii. 20; Num. xxxiii. 5, 6). This place was apparently reached at the close of the first day's march. Ramesses, the starting-place, was probably near the western end of the Wâdi-t-Tumeylât. The distance traversed in each day's journey was about fifteen miles, and as Succoth was not in the desert, the next station, Etham, being "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6), it must have been in the valley, and consequently nearly due east of Ramesses, and fifteen miles distant in a straight line.

Succoth-Benoth occurs only in 2 K. xvii. 30. It has generally been supposed that this term is pure Hebrew, and signifies the "tents of daughters;" which some explain as "the booths in which the daughters of the Babylonians prostituted themselves in honour of their idol," others as "small tabernacles in which were contained images of female deities." Sir H. Rawlinson thinks that Succoth-benoth represents the Chaldean goddess *Zibunîth*, the wife of Merodach, who was especially worshipped at Babylon.

Su'chathites. One of the families of scribes at Jabez (1 Chr. ii. 55).

Sud. A river in the immediate neighbourhood of Babylon, on the banks of which Jewish exiles lived (Bar. i. 4). No such river is known to geographers: but the original text may have been *Sur*, the river Euphrates, which is always named by Arab geographers "the river of Sura."

Sud = SIA, or SIAHA (1 Esd. v. 29; comp. Neh. vii. 47; Ezr. ii. 44).

Su'dias = HODAVIAH 3 and HODEVAH (1 Esd. v. 26; comp. Ezr. iii. 40; Neh. xii. 43).

Sukkiims, a nation mentioned (2 Chr. xii. 3) with the Lubim and Cushim as supplying part of the army which came with Shishak out of Egypt when he invaded Judah. The Sukkiims may correspond to some one of the shepherd or

wandering races mentioned on the Egyptian monuments.

Sun. In the history of the creation the sun is described as the "greater light" in contradistinction to the moon or "lesser light," in conjunction with which it was to serve "for signs, and for seasons, and for days, and for years," while its special office was "to rule the day" (Gen. i. 14-16). The "signs" referred to were probably such extraordinary phenomena as eclipses, which were regarded as conveying premonitions of coming events (Jer. x. 2; Matt. xxiv. 29, with Luke xxi. 25). The joint influence assigned to the sun and moon in deciding the "seasons," both for agricultural operations and for religious festivals, and also in regulating the length and subdivisions of the "years," correctly describes the combination of the lunar and solar year, which prevailed at all events subsequently to the Mosaic period. The sun "ruled the day," not only in reference to its powerful influences, but also as deciding the length of the day and supplying the means of calculating its progress. Sun-rise and sun-set are the only defined points of time in the absence of artificial contrivances for telling the hour of the day. Between these two points the Jews recognized three periods, viz. when the sun became hot, about 9 A.M. (1 Sam. xi. 9; Neh. vi. 3); the double light or noon (Gen. xliii. 16; 2 Sam. iv. 5), and "the cool of the day" shortly before sunset (Gen. iii. 8). The sun also served to fix the quarters of the hemisphere, east, west, north, and south, which were represented respectively by the rising sun, the setting sun (Is. xlv. 6; Ps. l. 1), the dark quarter (Gen. xii. 14; Joel ii. 20), and the brilliant quarter (Deut. xxxiii. 23; Job xxxvii. 17; Ez. xl. 24); or otherwise by their position relative to a person facing the rising sun—before, behind, on the left hand, and on the right hand (Job xxiii. 8, 9). The apparent motion of the sun is frequently referred to in terms that would imply its reality (Josh. x. 13; 2 K. xx. 11; Ps. xix. 6; Eccl. i. 5; Hab. iii. 11). The worship of the sun, as the most prominent and powerful agent in the kingdom of nature, was widely diffused throughout the countries adjacent to Palestine. The Arabians appear to have paid direct worship to it without the intervention of any statue or symbol (Job xxi. 26, 27), and this simple style of worship was probably familiar to the ancestors of the Jews in Chaldaea and Mesopotamia. The Hebrews must have been well acquainted with the idolatrous worship of the sun during the captivity in Egypt, both from the contiguity of On, the chief seat of the worship of the sun as implied in the name itself (On=the Hebrew Bethshemesh, "house of the sun," Jer. xliii. 13), and also from the connexion between Joseph and Poti-pherah ("he who belongs to Ra"), the priest of On (Gen. xli. 45). After their removal to Canaan, the Hebrews came in contact with various forms of idolatry, which originated in the worship of the sun; such as the Bael of the Phoenicians, the Molech or Milcom of the Ammonites, and the Hadad of the Syrians. It does not follow that the object symbolized by them was known to the Jews themselves. If we have any notice at all of conscious sun-worship in the early stages of their history, it exists in the doubtful term *chammânim* (Lev. xxvi. 30; Is. xvii. 8, &c.) which probably described the stone pillars or statues under which the solar Bael was worshipped at Baal-Hamon (Cant. viii. 11) and other places. To

judge from the few notices we have on the subject in the Bible, we should conclude that the Jews derived their mode of worshipping the sun from several quarters. The importance attached to the worship of the sun by the Jewish kings, may be inferred from the fact that the horses were stalled within the precincts of the temple (2 K. xxiii. 11). In the metaphorical language of Scripture the sun is emblematic of the law of God (Ps. cix. 7), of the cheering presence of God (Ps. lxxxiv. 11), of the person of the Saviour (John i. 9; Mal. iv. 2), and of the glory and purity of heavenly beings (Rev. i. 16, x. 1, xii. 1).

Sur. One of the places on the sea-coast of Palestine, which are named as having been disturbed at the approach of Holofernes (Jud. ii. 28). Some have suggested Dor, others a place named Sora, others, again, *Sûrafend*. But none of these are satisfactory.

Suretiship. In the entire absence of commerce the law laid down no rules on the subject of suretiship, but it is evident that in the time of Solomon commercial dealings had become so multiplied that suretiship in the commercial sense was common (Prov. vi. 1, xi. 15, xvii. 18, xx. 16, xxii. 26, xxvii. 13). But in older times the notion of one man becoming a surety for a service to be discharged by another was in full force (see Geh. xlv. 32). The surety of course became liable for his client's debts in case of his failure.

Su'sa. Esth. i. 3, vii. 18. [SHUSHAN.]

Su'sanachites is found once only—in Ezr. iv. 9. There can be no doubt that it designates either the inhabitants of the city Susa, or those of the country—Sasis or Susiana. Perhaps the former explanation is preferable.

Susan'na. 1. The heroine of the story of the Judgment of Daniel.—2. One of the women who ministered to the Lord (Luke viii. 3).

Su'si. The father of Gaddi the Manassite spy (Num. xxi. 11).

Swallow. Heb. *dôrôr*, and *'âgûr*, both thus translated in A. V. *Dôrôr* occurs twice, Ps. lxxxiv. 3, and Prov. xxvi. 2; *'âgûr*, also twice, Is. xxxviii. 14, and Jer. viii. 7, both times in conjunction with *sûs* or *sûs*. In each passage *sûs* is rendered, probably correctly, by LXX. swallow, A. V. crane [CRANE], which is more probably the true signification of *'âgûr*. The rendering of A. V. for *dôrôr* seems less open to question. The characters ascribed in the several passages where the names occur, are strictly applicable to the swallow, viz. its swiftness of flight, its nesting in the buildings of the Temple, its mournful, garrulous note, and its regular migration, shared indeed in common with several others. Many species of swallow occur in Palestine. All those familiar to us in Britain are found. The swallow, martin, and sand martin abound. Besides these the eastern swallow and the crag martin, are also common. Of the genus *Cypselus* (swift), our swift is common, and the splendid alpine swift may be seen in all suitable localities.

Swan (Heb. *tinshemeth*). Thus rendered by A. V. in Lev. xi. 18; Deut. xiv. 16, where it occurs in the list of unclean birds. Bochart explains it *noctua* (owl). Gesenius suggests the *pelican*. These conjectures cannot be admitted as satisfactory, the owl and pelican being both distinctly expressed elsewhere in the catalogue. Nor is the A. V. translation likely to be correct. The renderings of the

LXX., "porphyrio" and "ibis," are either of them more probable. Neither of these birds occurs elsewhere in the catalogue, both would be familiar to residents in Egypt, and the original seems to point to some water-fowl. *Πορφυρίων*, *porphyrio antiquorum*, Bp., the purple water-hen, is mentioned by Aristotle, Aristophanes, Pliny, and more fully described by Athenaeus. It is allied to our corn-crake and water-hen, and is the largest and most beautiful of the family *Rallidae*. It frequents marshes and the sedge by the banks of rivers in all the countries bordering on the Mediterranean, and is abundant in Lower Egypt.

Sweating, [OATH.]

Sweat, Bloody. One of the physical phenomena attending our Lord's agony in the garden of Gethsemane is described by St. Luke (xxii. 44): "His sweat was as it were great drops (lit. clots) of blood falling down to the ground." The genuineness of this verse and of the preceding has been doubted, but is now generally acknowledged. Of this malady, known in medical science by the term *diapedesis*, there have been examples recorded both in ancient and modern times. Aristotle was aware of it. The cause assigned is generally violent mental emotion. Dr. Millingen (*Curiosities of Medical Experience*, p. 489, 2nd ed.) gives the following explanation of the phenomenon: "It is probable that this strange disorder arises from a violent commotion of the nervous system, turning the streams of blood out of their natural course, and forcing the red particles into the cutaneous excretories. A mere relaxation of the fibres could not produce so powerful a revulsion. It may also arise in cases of extreme debility, in connexion with a thinner condition of the blood." Several cases of so called bloody sweat are reported. There is still, however, wanted a well-authenticated instance in modern times, observed with all the care and attested by all the exactness of later medical science.

Swine (Heb. *châšîr*). (1.) The flesh of swine was forbidden as food by the Levitical law (Lev. xi. 7; Deut. xiv. 8); the abhorrence which the Jews as a nation had of it may be inferred from Is. lxx. 4, and 2 Macc. vi. 18, 19. Swine's flesh was forbidden to the Egyptian priests. The Arabians also were disallowed the use of it. No other reason for the command to abstain from swine's flesh is given in the law of Moses beyond the general one which forbade any of the mammalia as food which did not literally fulfil the terms of the definition of a "clean animal," viz. that it was to be a cloven-footed ruminant. It is, however, probable that dietetical considerations may have influenced Moses in his prohibition of swine's flesh; it is generally believed that its use in hot countries is liable to induce cutaneous disorders; hence in a people liable to leprosy the necessity for the observance of a strict rule. Although the Jews did not breed swine, during the greater period of their existence as a nation, there can be little doubt that the heathen nations of Palestine used the flesh as food. At the time of our Lord's ministry it would appear that the Jews occasionally violated the law of Moses with respect to swine's flesh.* Whether "the herd of swine" into which the devils were allowed to enter (Matt. vii. 32; Mark v. 13) were the property of the Jewish or Gentile inhabitants of Gadara does not appear from the sacred narrative but that the practice of keeping swine did

exist amongst some of the Jews seems clear from the enactment of the law of Hyrcanus "ne cui porcum alere liceat." (2.) The wild boar of the wood (Ps. lxxx. 13) is the common *Sus scrofa* which is frequently met with in the woody parts of Palestine, especially in Mount Tabor.

Sword.* [ARMS.]

Sycamine-Tree is mentioned once only, viz., in Luke xvii. 6. There is no reason to doubt that the sycamine is distinct from the sycamore of the same evangelist (xix. 4). The sycamine is the mulberry-tree (*Morus*). Both black and white mulberry-trees are common in Syria and Palestine

Morus nigra (Mulberry).

Sycamore (Heb. *shikmâh*). The Hebrew word occurs in the O. T. only in the plural form *shikmâ*, and once fem., Is. lxxviii. 47. The two Greek words occur only once each in the N. T. (Luke xvii. 6, xix. 4). Although it may be admitted that the *Sycamine* is properly, and in Luke xvii. 6, the *Mulberry*, and the *Sycamore* the *Fig-mulberry*, or *Sycamore-fig* (*Ficus Sycomorus*), yet the latter is the tree generally referred to in the O. T., and called by the Sept. *sycamine*, as 1 K. x. 27; 1 Chr. xxvii. 28; Ps. lxxviii. 47; Am. vii. 14. The *Sycamore*, or *Fig-mulberry*, is in Egypt and Palestine a tree of great importance and very extensive use. It attains the size of a walnut-tree, has wide-spreading branches, and affords a delightful shade. On this account it is frequently planted by the waysides. Its leaves are heart-shaped, downy on the under side, and fragrant. The fruit grows directly from the trunk itself on little sprigs, and in clusters like the grape. To make it eatable, each fruit, three or four days before gathering, must, it is said, be punctured with a sharp instrument or the finger-nail. This was the original employment of the prophet Amos, as he says vii. 14. So great was the value of these trees, that David appointed for them in his kingdom a special overseer, as he did for the olives (1 Chr. xivii. 28); and it is mentioned as one of the heaviest of Egypt's calamities, that her sycamore

mores were destroyed by hailstones (Ps. lxxviii. 47.)

Ficus sycomaria.

Sychar. A place named only in John iv. 5. It is specified as "a city of Samaria called Sychar." Sychar was either a name applied to the town of Shechem, or it was an independent place. 1. The first of these alternatives is now almost universally accepted. In the words of Dr. Robinson, "In consequence of the hatred which existed between the Jews and the Samaritans, and in allusion to their idolatry, the town of Sichem received, among the Jewish common people, the by-name Sychar." No trace, however, of such a nickname is found either in the Targums or the Talmud. But, presuming that Jacob's well was then, where it is now shown, at the entrance of the valley of *Nablus*, Shechem would be too distant to answer to the words of St. John, since it must have been more than a mile off. The earliest Christian tradition discriminates Shechem from Sychar. Eusebius (*Onomast.*) says that Sychar was in front of the city of Neapolis; and, again, that it lay by the side of Luza, which was three miles from Neapolis. Sychar, on the other hand, he places in the suburbs of Neapolis by the tomb of Joseph. The Bourdeaux Pilgrim describes Shechem as at the foot of the mountain, and as containing Joseph's monument and plot of ground. And he then proceeds to say that a thousand paces thence was the place called Sychar. 2. In favour of Sychar having been an independent place is the fact that a village named *'Askar* still exists at the south-east foot of Ebal, about north-east of the Well of Jacob, and about half a mile from it. A

village like *'Askar* answers much more appropriately to the casual description of St. John than so large and so venerable a place as Shechem. On the other hand there is an etymological difficulty in the way of this identification. *'Askar* begins with the letter *'Ain*, which Sychar does not appear to have contained.

Sychem. The Greek form of the word Shechem, the name of the well-known city of Central Palestine. It occurs in Acts vii. 16 only. The main interest of the passage rests on its containing two of those numerous and singular variations from the early history, as told in the Pentateuch, with which the speech of St. Stephen abounds. A hasty variation of the name of Sychem, viz. *SICHEM*, is found, and its people are mentioned as—

Sychemite, the, in Jud. v. 16.

Sye'lus = *JEHIEL* 3 (1 Esd. i. 8; comp. 2 Chr. xxxv. 8).

Sye'ne, properly *SEVENEH*, a town of Egypt on the frontier of Cush or Ethiopia. The prophet Ezekiel speaks of the desolation of Egypt "from Migdol to Seveneh, even unto the border of Cush" (xxix. 10), and of its people being slain "from Migdol to Seveneh" (xxx. 6). Migdol was on the eastern border, and Seveneh is thus rightly identified with the town of Syene, which was always the last town of Egypt on the south, though at one time included in the nome Nubia. Its ancient Egyptian name is *SUN*. The modern town is slightly to the north of the old site.

Synagogue. It may be well to note at the outset the points of contact between the history and ritual of the synagogues of the Jews, and the facts to which the inquiries of the Biblical student are principally directed. (1.) They meet us as the great characteristic institution of the later phase of Judaism. (2.) We cannot separate them from the most intimate connexion with our Lord's life and ministry. In them He worshipped in His youth, and in His manhood. They were the scenes of no small portion of His work. (3.) There are the questions, leading us back to a remoter past: In what did the worship of the synagogue originate? what type was it intended to reproduce? what customs, alike in nature, if not in name, served as the starting-point for it? (4.) The synagogue, with all that belonged to it, was connected with the future as well as with the past. It was the order with which the first Christian believers were most familiar. Widely divergent as the two words and the things they represented afterwards became, the Ecclesia had its starting-point in the Synagogue. Keeping these points in view, it remains to deal with the subject in a somewhat more formal manner.—1. *Name.*—(1.) The Aramaic equivalent *cenishta* first appears in the Targum of Onkelos as a substitute for Heb. *'edah* (= congregation) in the Pentateuch. The more precise local designation (*Beth ha-Ceneseth* = House of gathering), belongs to a yet later date. (2.) The word *συναγωγὴ*, not unknown in classical Greek, became prominent in that of the Hellenists. It appears in the LXX. as the translation of not less than twenty-one Hebrew words in which the idea of a gathering is implied. In the books of the Apocrypha the word, as in those of the O. T., retains its general meaning, and is not used specifically for any recognised place of worship. In the N. T., however, the local meaning is the dominant one. Sometimes the word is applied to the tribunal

which was connected with or sat in the synagogue in the narrower sense (Matt. x. 17, xxiii. 34; Mark xiii. 9; Luke xxi. 12, xi. 11). Within the limits of the Jewish Church it perhaps kept its ground as denoting the *place* of meeting of the Christian brethren (Jas. ii. 2).—II. *History*.—(1.) Jewish writers have claimed for their synagogues a very remote antiquity. In well-nigh every place where the phrase "before the Lord" appears, they recognise in it a known sanctuary, a fixed place of meeting, and therefore a synagogue. (2.) Apart from these far-fetched interpretations, we know too little of the life of Israel, both before and under the monarchy, to be able to say with certainty whether there was anything at all corresponding to the synagogues of later date. (3.) During the exile, in the absence of the Temple-worship, the meetings of devout Jews probably became more systematic, and must have helped forward the change which appears so conspicuously at the time of the return. The whole history of Ezra presupposes the habit of solemn, probably of periodic meetings (Ezr. viii. 15; Neh. vii. 2, ix. 1; Zech. vii. 5). To that period accordingly we may attribute the revival if not the institution of synagogues. Assuming Ewald's theory as to the date and occasion of Ps. lxxiv., there must, at some subsequent period, have been a great destruction of the buildings, and a consequent suspension of the services. It is, at any rate, striking that they are not in any way prominent in the Maccabean history. When that struggle was over, there appears to have been a freer development of what may be called the synagogue parochial system among the Jews of Palestine and other countries. Well-nigh every town or village had its one or more synagogues. (4.) It is hardly possible to overestimate the influence of the system thus developed. To it we may ascribe the tenacity with which, after the Maccabean struggle, the Jews adhered to the religion of their fathers, and never again relapsed into idolatry. The people were now in no danger of forgetting the Law, and the external ordinances that hedged it round. Here, as in the cognate order of the Scribes, there was an influence tending to diminish and ultimately almost to destroy the authority of the hereditary priesthood. The way was silently prepared for a new and higher order, which should rise in "the fulness of time" out of the decay and abolition of both the priesthood and the Temple.—III. *Structure*.—(1.) The size of a synagogue, like that of a church or chapel, varied with the population. Its position was, however, determinate. It stood, if possible, on the highest ground, in or near the city to which it belonged. And its direction too was fixed. Jerusalem was the *Kiblah* of Jewish devotion. The synagogue was so constructed, that the worshippers as they entered, and as they prayed, looked toward it. The building was commonly erected at the cost of the district. Sometimes it was built by a rich Jew, or even as in Luke vii. 5, by a friendly proselyte. (2.) In the internal arrangement of the synagogue we trace an obvious analogy to the type of the Tabernacle. At the upper or Jerusalem end stood the Ark, the chest which, like the older and more sacred Ark, contained the Book of the Law. It gave to that end the name and character of a sanctuary. This part of the synagogue was naturally the place of honour. Here were the "chief seats," after which Pharisees and Scribes strove so eagerly (Matt. xxiii. 6), to which the wealthy and honoured worshipper was

invited (James ii. 2, 3). Here too, in front of the Ark, still reproducing the type of the Tabernacle, was the eight-branched lamp, lighted only on the greater festivals. Besides this, there was one lamp kept burning perpetually. A little further towards the middle of the building was a raised platform, on which several persons could stand at once, and in the middle of this rose a pulpit, in which the Reader stood to read the lesson or sat down to teach. The congregation were divided, men on one side, women on the other, a low partition, five or six feet high, running between them. The arrangements of modern synagogues, for many centuries, have made the separation more complete by placing the women in low side-galleries, screened off by lattice-work.—IV. *Officers*.—(1.) In smaller towns there was often but one Rabbi. Where a fuller organization was possible, there was a college of Elders (Luke vii. 3) presided over by one who was "the chief of the synagogue" (Luke viii. 41, 49, xiii. 14; Acts xviii. 8, 17). (2.) The most prominent functionary in a large synagogue was known as the *Shelṭach* (= *legatus*), the officiating minister who acted as the delegate of the congregation, and was therefore the chief reader of prayers, &c., in their name. (3.) The (*hazzan*, or "minister" of the synagogue (Luke iv. 20) had duties of a lower kind resembling those of the Christian deacon or sub-deacon. He was to open the doors, to get the building ready for service. (4.) Besides these there were ten men attached to every synagogue, whose functions have been the subject-matter of voluminous controversy. They were known as the *Batlanim* (= *Otiōsi*), and no synagogue was complete without them. They were supposed to be men of leisure, not obliged to labour for their livelihood, able therefore to attend the week-day as well as the Sabbath services. Rheinford sees in them simply a body of men, permanently on duty, making up a congregation (ten being the minimum number), so that there might be no delay in beginning the service at the proper hours, and that no single worshipper might go away disappointed. (5.) It will be seen at once how closely the organization of the synagogue was reproduced in that of the Ecclesia. Here also there was the single presbyter-bishop in small towns, a council of presbyters under one head in large cities. The *legatus* of the synagogues appears in the *ἄγγελος* (Rev. i. 20, ii. 1), perhaps also in the *ἀπόστολος* of the Christian Church.—V. *Worship*.—(1.) The ritual of the synagogue was to a large extent the reproduction of the statelier liturgy of the Temple. It will be enough, in this place, to notice in what way the ritual, no less than the organization, was connected with the facts of the N. T. history, and with the life and order of the Christian Church. (2.) From the synagogue came the use of fixed forms of prayer. To that the first disciples had been accustomed from their youth. They had asked their Master to give them a distinctive one, and he had complied with their request (Luke xi. 1), as the Baptist had done before for his disciples, as every Rabbi did for his. The forms might be and were abused. (3.) The large admixture of a didactic element in Christian worship, that by which it was distinguished from all Gentile forms of adoration, was derived from the older order. "Moses" was "read in the synagogues every Sabbath-day" (Acts xv. 21), the whole Law being read consecutively, so as to be completed, according to one cycle, in three years.

The writings of the Prophets were read as second lessons in a corresponding order. They were followed by the *Derash* (Acts xiii. 15), the exposition, the sermon of the synagogue. (4.) To the ritual of the synagogue we may probably trace a practice which has sometimes been a stumbling-block to the student of Christian antiquity, the subject-matter of fierce debate among Christian controversialists. Whatever account may be given of it, it is certain that Prayers for the Dead appear in the Church's worship as soon as we have any trace of it after the immediate records of the Apostolic age. There is a probability indefinitely great that prayers for the departed (the *Kaddish* of later Judaism) were familiar to the synagogues of Palestine and other countries, that the early Christian believers were not startled by them as an innovation, that they passed uncondemned even by our Lord Himself. (5.) The conformity extends also to the times of prayer. In the hours of service this was obviously the case. The third, sixth, and ninth hours were in the times of the N. T. (Acts iii. 1, x. 3, 9), and had been probably for some time before (Ps. lv. 17; Dan. vi. 10), the fixed times of devotion, known then, and still known, respectively as the *Shachdrith*, the *Minchah*, and the *'Arbith*. The same hours, it is well known, were recognised in the Church of the second, probably in that of the first century also. The solemn days of the synagogue were the second, the fifth, and the seventh, the last or Sabbath being the conclusion of the whole. The transfer of the sanctity of the Sabbath to the Lord's Day involved a corresponding change in the order of the week, and the first, the fourth, and the sixth became to the Christian society what the other days had been to the Jewish. (6.) The following suggestion as to the mode in which this transfer was effected, involves, it is believed, fewer arbitrary assumptions than any other, and connects itself with another interesting custom, common to the Church and the Synagogue. It was a Jewish custom to end the Sabbath with a feast, in which they did honour to it as to a parting king. The feast was held in the synagogue. A cup of wine, over which a special blessing had been spoken, was handed round. It is obvious that, so long as the Apostles and their followers continued to use the Jewish mode of reckoning, so long *i.e.* as they fraternized with their brethren of the stock of Abraham, this would coincide in point of time with their *δειπνον* on the first day of the week. By degrees the time became later, passed on to midnight, to the early dawn of the next day. (7.) From the synagogue lastly came many less conspicuous practices, which meet us in the liturgical life of the first three centuries. Ablution, entire or partial, before entering the place of meeting (Heb. x. 22; John xiii. 1-15); standing and not kneeling, as the attitude of prayer (Luke xvii. 11); the arms stretched out; the face turned towards the Kiblah of the East; the responsive Amen of the congregation to the prayers and benedictions of the elders (1 Cor. xiv. 16).—VI. *Judicial Functions*.—(1.) The language of the N. T. shows that the officers of the synagogue exercised in certain cases a judicial power. (2.) It is not quite so easy, however, to define the nature of the tribunal, and the precise limits of its jurisdiction. In two of the passages referred to (Matt. x. 17; Mark xiii. 9) they are carefully distinguished from the councils. It seems probable that the council was the larger tribunal of 23, which sat in every city, and that

under the term synagogue we are to understand a smaller court, probably that of the Ten judges mentioned in the Talmud. (3.) Here also we trace the outline of a Christian institution. The *ἐκκλησία*, either by itself or by appointed delegates, was to act as a Court of Arbitration in all disputes among its members. The elders of the Church were not, however, to descend to the trivial disputes of daily life. For the elders, as for those of the synagogue, were reserved the graver offences against religion and morals.

Synagogue, the Great. (1.) On the return of the Jews from Babylon, a great council was appointed, according to Rabbinic tradition, to re-organize the religious life of the people. It consisted of 120 members, and these were known as the men of the Great Synagogue, the successors of the prophets, themselves, in their turn, succeeded by scribes prominent, individually, as teachers. Ezra was recognised as president. Their aim was to restore again the *crown*, or *glory* of Israel. To this end they collected all the sacred writings of former ages and their own, and so completed the canon of the O. T. They instituted the feast of Purim. They organised the ritual of the synagogue, and gave their sanction to the *Shemoneh Esereth*, the eighteen solemn benedictions in it. (2.) Much of this is evidently uncertain. The absence of any historical mention of such a body, not only in the O. T. and the Apocrypha, but in Josephus, Philo, and the *Seder Olum*, so that the earliest record of it is found in the *Pirke Aboth*, *circa* the second century after Christ, had led some critics to reject the whole statement as a Rabbinic invention. The narrative of Neh. viii. 13 clearly implies the existence of a body of men acting as counsellors under the presidency of Ezra, and these may have been an assembly of delegates from all provincial synagogues—a synod of the National Church.

Syn'tyche, a female member of the Church of Philippi (Phil. iv. 2, 3).

Syracuse. The celebrated city on the eastern coast of Sicily. St. Paul arrived thither in an Alexandrian ship from Melita, on his voyage to Rome (Acts xxviii. 12). The magnificence which Cicero describes as still remaining in his time, was then no doubt greatly impaired. But the site of Syracuse rendered it a convenient place for the African corn-ships to touch at, for the harbour was an excellent one, and the fountain Arethusa in the island furnished an unfauling supply of excellent water. In the time of St. Paul's voyage, Sicily did not supply the Romans with corn to the extent it had done in the time of King Hiero, and in a less degree as late as the time of Cicero. It is an error, however, to suppose that the soil was exhausted: for Strabo expressly says, that for corn, and some other productions, Sicily even surpassed Italy. At this period, there were only five Roman colonies in Sicily, of which Syracuse was one. The others were Catania, Tauromenium, Thermae, and Tyndaris. Messina too, although not a colony, was a town filled with a Roman population.

Syria is the term used throughout our version for the Hebrew *Aram*, as well as for the Greek *Συρία*. Most probably Syria is for *Tsyrta*, the country about *Tsur*, or Tyre, which was the first of the Syrian towns known to the Greeks. 1. *Geographical extent*.—It is very difficult to fix the limits of Syr^a. The Hebrew *Aram* seems to commence on the northern frontier of Palestine, and to extend thence northward to the skirts of Taurus,

westward to the Mediterranean, and eastward probably to the Khabour river. Its chief divisions are Aram-Damasek, or "Syria of Damascus," Aram-Zobah, or "Syria of Zobah," Aram-Naharaim, "Mesopotamia," or "Syria of the Two Rivers," and Padan-Aram, "the plain Syria," or "the plain at the foot of the mountains." Of these we cannot be mistaken in identifying the first with the rich country about Damascus, lying between Anti-libanus and the desert, and the last with the district about Harran and Orfhah, the flat country stretching out from the western extremity of Mons Masius towards the true source of the Khabour at *Ras-el-Ain*. Aram-Naharaim seems to be a term including this last tract, and extending beyond it, though how far beyond is doubtful. Aram-Zobah seems to be the tract between the Euphrates and Coele-syria. The other divisions of Aram, such as Aram-Maachah and Aram-beth-Rehob, are more difficult to locate with any certainty. Probably they were portions of the tract intervening between Anti-libanus and the desert. The Greek writers used the term Syria still more vaguely than the Hebrews did Aram. On the one hand they extended it to the Euxine; on the other they carried it to the borders of Egypt. Still they seem always to have had a feeling that Syria Proper was a narrower region. The LXX. and New Testament writers distinguish Syria from Phœnicia on the one hand, and from Samaria, Judæa, Idumæa, &c., on the other. In the present article it seems best to take the word in this narrow sense, and to regard Syria as bounded by Amanus and Taurus on the north, by the Euphrates and the Arabian desert on the east, by Palestine on the south, by the Mediterranean near the mouth of the Orontes, and then by Phœnicia upon the west. The tract thus circumscribed is about 300 miles long from north to south, and from 50 to 150 miles broad. It contains an area of about 30,000 square miles. 2. *General physical features.*—The general character of the tract is mountainous, as the Hebrew name Aram (from a root signifying "height") sufficiently implies. On the west, two longitudinal chains, running parallel with the coast at no great distance from one another, extend along two-thirds of the length of Syria, from the latitude of Tyre to that of Antioch. In the latitude of Antioch the longitudinal chains are met by the chain of Amanus, an outlying barrier of Taurus, having the direction of that range, which in this part is from south-west to north-east. The most fertile and valuable tract of Syria is the long valley intervening between Libanus and Anti-libanus. The northern mountain region is also fairly productive; but the soil of the plains about Aleppo is poor, and the eastern flank of the Anti-libanus, except in one place, is peculiarly sterile. 3. *The Mountain Ranges.*—(a) Lebanon. Of the various mountain-ranges of Syria, Lebanon possesses the greatest interest. It extends from the mouth of the Litany to *Arka*, a distance of nearly 100 miles, and is composed chiefly of Jura limestone, but varied with sandstone and basalt. [LEBANON.] (b) Anti-libanus. This range, as the name implies, stands over against Lebanon, running in the same direction, i. e. nearly north and south, and extending the same length. (c) Bargylus. Mount Bargylus, called now *Jebel Nosairi* towards the south, and towards the north *Jebel Kraad*, extends from the mouth of the *Nahr-el-Kebir* (Eleutherus), nearly opposite Hems, to the vicinity of Antioch, a distance of rather more than 100 miles.

One of the western spurs terminates in a remarkable headland, known to the ancients as Mount Casius, and now called *Jebel-el-Akra*, or the "Bald Mountain." (d) Amanus. North of the mouth of the Orontes, between its course and the eastern shore of the Gulf of Issus (*Iskanderun*), lies the range of Amanus, which divides Syria from Cilicia. Its average elevation is 5000 feet, and it terminates abruptly at *Ras-el-Khanzir*, in a high cliff overhanging the sea. 4. *The Rivers.*—The principal rivers of Syria are the Litany and the Orontes. The Litany springs from a small lake situated in the middle of the Coele-syrian valley, about six miles to the south-west of Baalbek. It enters the sea about 5 miles north of Tyre. The source of the Orontes is but about 15 miles from that of the Litany. Its modern name is the *Nahr-el-Asi*, or "Rebel Stream," an appellation given to it on account of its violence and impetuosity in many parts of its course. The other Syrian streams of some consequence, besides the Litany and the Orontes, are the *Barada* or river of Damascus, the *Kowik*, or river of Aleppo, and the *Sajur*, a tributary of the Euphrates. 5. *The Lakes.*—The principal lakes of Syria are the *Agh-Dengiz*, or Lake of Antioch; the *Sabakhah*, or Salt Lake, between Aleppo and Balis; the *Bahr-el-Kades*, on the upper Orontes; and the *Bahr-el-Merj*, or Lake of Damascus. 6. *The Great Valley.*—By far the most important part of Syria, and on the whole its most striking feature, is the great valley which reaches from the plain of *Unk*, near Antioch, to the narrow gorge on which the *Litany* enters in about lat. 33° 30'. This valley, which runs nearly parallel with the Syrian coast, extends the length of 230 miles, and has a width varying from 6 or 8 to 15 or 20 miles. The more southern portion of it was known to the ancients as Coele-syria, or "the Hollow Syria," and has been already described. [COELESYRIA.] 7. *The Northern Highlands.*—Northern Syria, especially the district called Commagène, between Taurus and the Euphrates, is still very insufficiently explored. It seems to be altogether an elevated tract, consisting of twisted spurs from Taurus and Amanus, with narrow valleys between them, which open out into bare and sterile plains. The highest elevation of the plateau between the two rivers is 1500 feet; and this height is reached soon after leaving the Euphrates, while towards the west the decline is gradual. 8. *The Eastern Desert.*—East of the inner mountain-chain, and south of the cultivable ground about Aleppo, is the great Syrian Desert, an elevated dry upland, for the most part of gypsum and marls, producing nothing but a few spare bushes of wormwood, and the usual aromatic plants of the wilderness. The region is traversed with difficulty, and has never been accurately surveyed. The most remarkable oasis is at Palmyra, where there are several small streams and abundant palm-trees. 9. *Chief Divisions.*—According to Strabo, Syria Proper was divided into the following districts:—1. Commagène; 2. Cyrrhæstia; 3. Seleucia; 4. Coele-syria; and 5. Damascène. If we take its limits, however, as laid down above (§ 1), we must add to these districts three others: Chalybonitis, or the country about Aleppo; Chalcis or Chalcidicæ, a small tract south of this, about the lake in which the river of Aleppo ends; and Palmyrène, or the desert so far as we consider it to have been Syrian. 10. *Principal towns.*—The chief towns of Syria may be thus arranged, as

nearly as possible in the order of their importance: 1. Antioch; 2. Damascus; 3. Apameia; 4. Seleucia; 5. Tadmor or Palmyra; 6. Laodiceia; 7. Epiphaneia (Hamath); 8. Samosata; 9. Hierapolis (Mabug); 10. Chalybon; 11. Emesa; 12. Heliopolis; 13. Laodiceia ad Libanum; 14. Cyrrhus; 15. Chalcis; 16. Poseideium; 17. Heracleia; 18. Gindarus; 19. Zeugma; 20. Thapsacus. Of these, Samosata, Zeugma, Thapsacus, are on the Euphrates; Seleucia, Laodiceia, Poseideium, and Heracleia, on the sea-shore; Antioch, Apameia, Epiphaneia, and Emesa (*Hema*) on the Orontes; Heliopolis and Laodiceia ad Libanum, in Coele-syria; Hierapolis, Chalybon, Cyrrhus, Chalcis, and Gindarus, in the northern highlands; Damascus on the skirts, and Palmyra, in the centre of the eastern desert. 11. *History*.—The first occupants of Syria appear to have been of Hamitic descent. The Canaanitish races, the Hittites, Jebusites, Amorites, &c., are connected in Scripture with Egypt and Ethiopia, Cush and Mizraim (Gen. x. 6 and 15-18). These tribes occupied not Palestine only, but also Lower Syria, in very early times as we may gather from the fact that Hamath is assigned to them in Genesis (x. 18). Afterwards they seem to have become possessed of Upper Syria also. After a while the first comers, who were still to a great extent nomads, received a Semitic infusion, which most probably came to them from the south-east. The only Syrian town whose existence we find distinctly marked at this time is Damascus (Gen. xiv. 15; xv. 2), which appears to have been already a place of some importance. Next to Damascus must be placed Hamath (Num. xiii. 21, xxxiv. 8). Syria at this time, and for many centuries afterwards, seems to have been broken up among a number of petty kingdoms. The Jews first came into hostile contact with the Syrians, under that name, in the time of David. Claiming the frontier of the Euphrates, which God had promised to Abraham (Gen. xv. 18), David made war on Hadadezer, king of Zobah (2 Sam. viii. 3, 4, 13). The Damascus Syrians were likewise defeated with great loss (ib. ver. 5). Zobah, however, was far from being subdued as yet. When, a few years later, the Ammonites determined on engaging in a war with David, and applied to the Syrians for aid, Zobah, together with Beth-Rehob, sent them 20,000 footmen, and two other Syrian kingdoms furnished 13,000 (2 Sam. x. 6). This army being completely defeated by Joab, Hadadezer obtained aid from Mesopotamia (ib. ver. 16), and tried the chance of a third battle, which likewise went against him, and produced the general submission of Syria to the Jewish monarch. The submission thus begun continued under the reign of Solomon (1 K. iv. 21). The only part of Syria which Solomon lost seems to have been Damascus, where an independent kingdom was set up by Rezon, a native of Zobah (1 K. xi. 23-25). On the separation of the two kingdoms, soon after the accession of Rehoboam, the remainder of Syria no doubt shook off the yoke. Damascus now became decidedly the leading state, Hamath being second to it, and the northern Hittites, whose capital was Carchemish near *Bambuk*, third. [DAMASCUS.] Syria became attached to the great Assyrian empire, from which it passed to the Babylonians, and from them to the Persians. In B.C. 333 it submitted to Alexander without a struggle. Upon the death of Alexander Syria became, for the first time, the head of a great kingdom. On the

division of the provinces among his generals (B. C. 321), Seleucus Nicator received Mesopotamia and Syria. Antioch was begun in B. C. 300, and; being finished in a few years, was made the capital of Seleucus' kingdom. The country grew rich with the wealth which now flowed into it on all sides. The history of Syria under the Seleucid princes has been already given in detail, in the articles treating of each monarch [ANTIOCHUS, DEMETRIUS, SELEUCUS, &c.]. The most flourishing period was the reign of the founder, Nicator. The empire was then almost as large as that of the Achemenian Persians, for it at one time included Asia Minor, and thus reached from the Egean to India. The reign of Nicator's son, Antiochus I., called Soter, was the beginning of the decline, which was progressive from his date. It passed under the power of Tigranes, king of Armenia, in B. C. 83, and was not made a province of the Roman Empire till after Pompey's complete defeat of Mithridates and his ally Tigranes, B. C. 64. As Syria holds an important place, not only in the Old Testament, but in the New, some account of its condition under the Romans must now be given. That condition was somewhat peculiar. While the country generally was formed into a Roman province, under governors who were at first proprætors or quaestors, then proconsuls, and finally legates, there were exempted from the direct rule of the governor, in the first place, a number of "free cities," which retained the administration of their own affairs, subject to a tribute levied according to the Roman principles of taxation; and 2ndly, a number of towns, which were assigned to petty princes, commonly natives, to be ruled at their pleasure, subject to the same obligations with the free cities as to taxation. The free cities were Antioch, Seleucia, Apameia, Epiphaneia, Tiplolis, Sidon, and Tyre; the principalities, Comagênê, Chalcis ad Belum (near *Baalbek*), Aethura, Abila or Abilênê, Palmyra, and Damascus. The principalities were sometimes called kingdoms, sometimes tetrarchies. They were established where it was thought that the natives were so inveterately wedded to their own customs, and so well disposed for revolt, that it was necessary to consult their feelings, to flatter the national vanity, and to give them the semblance without the substance of freedom. The list of the governors of Syria, from its conquest by the Romans to the destruction of Jerusalem, has been made out with a near approach to accuracy, and is as follows:—

		Date of entering office.	Date of quitting office.
M. Aemilius Scaurus . . .	Quæstor pro prætor	B.C. 62	B.C. 61
L. Marcius Philippus . .	Proprætor	61	59
Lentulus Marcellinus . .	Proprætor	59	57
Gabinus	Proconsul	56	55
Crassus		55	53
Cassius	Quæstor	53	51
M. Calpurnius Bibulus . .	Proconsul	51	47
Sext. Julius Cæsar . . .		47	46
Q. Cæcilius Bassus . . .	Prætor	46	44
Q. Cornificius	received authority from the Senate to dispossess Bactra, but failed		
L. Statius Murena . . .			
Q. Marcus Crispus . . .			
C. Cassius Longinus . . .	Proconsul	B.C. 43	B.C. 42
L. Decidius Saxa	Legatus	41	40
P. Ventidius Bassus . .	Legatus	40	38
Sosius	Legatus	38	35
L. Munatius Plancus . .	Legatus	35	32
L. Calpurnius Bibulus . .	Legatus	31	31
Q. Didius	Legatus	30	
M. Valerius Messalla . .	Legatus	29	29
Varro	Legatus	24	
M. Vipsanius Agrippa . .	Legatus	22	

Names.	Titles of office.	Date of entering office.	Date of quitting office.
M. Tullius	Legatus	19 (?)	
M. Vipstanus Agrippa	Legatus	15	
M. Titius	Legatus	11	7
C. S. Silius Saturninus	Legatus	7	3
P. Quintilius Varus	Legatus	3	A.D. 5
P. Sulpicius Quirinius	Legatus	A.D. 5	
Q. Caecilius Metellus } Creticus Silanus	Legatus		17
M. Culpurnius Piso	Legatus	17	19
Cn. Sentius Saturninus	Prolegatus	19	
L. Pomponius Flaccus	Propraetor	22	33
L. Vitellius	Legatus	35	39
P. Petronius	Legatus	39	42
Vibius Maraus	Legatus	42	48
C. Cassius Longinus	Legatus	48	51
T. Numidius* Quadratus	Legatus	51	60
Domitius Corbulo	Legatus	60	63
Cincius	Legatus	63	
C. Cestius Gallus	Legatus	65	67
P. Licinius Mucianus	Legatus	67	69

The history of Syria during the period may be summed up in a few words. Down to the battle of Pharsalia, Syria was fairly tranquil, the only troubles being with the Arabs, who occasionally attacked the eastern frontier. The Roman governor laboured hard to raise the condition of the province, taking great pains to restore the cities, which had gone to decay under the later Seleucidae. After Pharsalia (B.C. 46) the troubles of Syria were renewed. Julius Caesar gave the province to his relative Sextus in B.C. 47; but Pompey's party was still so strong in the East, that in the next year one of his adherents, Caecilius Bassus, put Sextus to death, and established himself in the government so firmly that he was able to resist for three years three proconsuls appointed by the Senate to dispossess him, and only finally yielded upon terms which he himself offered to his antagonists. Bassus had but just made his submission, when, upon the assassination of Caesar, Syria was disputed between Cassius and Dolabella, the friend of Antony, a dispute terminated by the suicide of Dolabella, B.C. 43. The next year Cassius left his province and went to Philippi, where, after the first unsuccessful engagement, he too committed suicide. Syria then fell to Antony, who appointed as his legate, L. Decidius Saxa, in B.C. 41. Ptolemy, the crown-prince of Parthia, son of Arsaces XIV., assisted by the Roman refugee, Labienus, overran Syria and Asia Minor, defeating Antony's generals, and threatening Rome with the loss of all her Asiatic possessions (B.C. 40-39). Ventidius, however, in B.C. 38, defeated the Parthians, slew Ptolemy, and recovered for Rome her former boundary. A quiet time followed. In B.C. 27 took place that formal division of the provinces between Augustus and the Senate from which the imperial administrative system dates; and Syria, being from its exposed situation among the *provinciae principis*, continued to be ruled by legates, who were of consular rank (*consulares*) and bore severally the full title of "Legatus Augusti pro praetore." Judaea occupied a peculiar position. A special procurator was therefore appointed to rule it, who was subordinate to the governor of Syria, but within his own province had the power of a legatus. Syria continued without serious disturbance from the expulsion of the Parthians (B.C. 38) to the breaking out of the Jewish war (A.D. 66). In B.C. 19 it was visited by Augustus, and in A.D. 18-19 by Germanicus, who died at Antioch in the last-named year. In A.D. 44-47 it was the

* Called "Vindilius" by Tacitus.

scene of a severe famine. A little earlier Christianity had begun to spread into it, partly by means of those who "were scattered" at the time of Stephen's persecution (Acts xi. 19), partly by the exertions of St. Paul (Gal. i. 21). The Syrian Church soon grew to be one of the most flourishing (Acts xiii. 1, xv. 23, 35, 41, &c.).

Syriae Versions. [VERSIONS, SYRIAC.]

Syro-Phoenician occurs only in Mark vii. 26. The coinage of the words "Syro-Phoenicia," and "Syro-Phoenicians," seems to have been the work of the Romans, though it is difficult to say exactly what they intended by the expressions. They denoted perhaps a mixed race, half-Phoenicians and half-Syrians. In later times a geographic sense of the terms superseded the ethnic one. The Emperor Hadrian divided Syria into three parts, Syria Proper, Syro-Phoenice, and Syria Palaestina; and henceforth a Syro-Phoenician meant a native of this sub-province, which included Phoenicia Proper, Damascus, and Palmyrene. It is perhaps most probable that St. Mark really wrote *Σύρα Φοινίσσα*, "a Phoenician Syrian," which is found in some copies.

Ta'anach. An ancient Canaanitish city, whose king is enumerated amongst the thirty-one conquered by Joshua (Josh. xii. 21). It came into the half tribe of Manasseh (Josh. xvii. 11, xxi. 25; 1 Chr. vii. 29), and was bestowed on the Kohathite Levites (Josh. xxi. 25.) Taanach is almost always named in company with Megiddo, and they were evidently the chief towns of that fine rich district which forms the western portion of the great plain of Esdraelon (1 K. iv. 12). There it is still to be found. The identification of *Ta'annuk* with Taanach, may be taken as one of the surest in the whole Sacred Topography. It was known to Eusebius and to hap-Parchi, the Jewish mediaeval traveller, and it still stands about 4 miles south-east of *Lejjün*, retaining its old name with hardly the change of a letter.

Ta'anath-Shiloh. A place named once only (Josh. xvi. 6) as one of the landmarks of the boundary of Ephraim, but of which boundary it seems impossible to ascertain. All we can tell is, that at this part the enumeration is from west to east, Janobah being east of Taanath Shiloh. Janobah has been identified with some probability at *Yanün*, on the road from *Nablus* to the Jordan Valley. The name *Tāna*, or *Ain Tāna*, seems to exist in that direction. In a list of places contained in the Talmud, Taanath Shiloh is said to be identical with SHILOH. Kurtz's view, that Taanath was the ancient Canaanite name of the place, and Shiloh the Hebrew name, is ingenious, but at present it is a mere conjecture.

Tab'aath. TABBAOTH (1 Esd. v. 29).

Tab'baath. The children of Tabbaath were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 43; Neh. vii. 46).

Tab'bath. A place mentioned only in Judg. vii. 22, in describing the flight of the Midianite host after Gideon's night attack. The host fled to Beth-shittah, to Zererah, to the brink of Abelenolah on Tabbath. Beth-shittah may be *Shüttah*, which lies on the open plain between *Jebel Fuhäs* and *Jebel Duhy*, 4 miles east of *Ain Jalüd*, the

probable scene of Gideon's onslaught. But no attempt seems to have been made to identify Tabboth, nor does any name resembling it appear in the books or maps, unless it be *Tubukhat-Fahil*, i. e. "Terrace of Fahil."

Tab'eal. The son of Tabeal was apparently an Ephraimite in the army of Pekah the son of Remaliah, or a Syrian in the army of Rezin, when they went up to besiege Jerusalem in the reign of Ahaz (Is. vii. 8). The Aramaic form of the name favours the latter supposition.

Tab'eol. An officer of the Persian government in Samaria in the reign of Artaxerxes (Ezr. iv. 7). His name appears to indicate that he was a Syrian.

Tabell'ius. (1 Esdr. ii. 16.) [TABEEL.]

Tab'erah. The name of a place in the wilderness of Parau (Num. xi. 3; Deut. ix. 22). It has not been identified.

Tabering. The obsolete word thus used in the A. V. of Nah. ii. 7 requires some explanation. The Hebrew word connects itself with *tôph*, "a timbrel." The A. V. reproduces the original idea. The "tabour" or "tabor" was a musical instrument of the drum-type, which with the pipe formed the band of a country village. To "tabour," accordingly, is to beat with loud strokes as men beat upon such an instrument.

Tabernacle. The description of the Tabernacle and its materials will be found under TEMPLE. Here it remains for us to treat—(1) of the word and its synonyms; (2) of the history of the Tabernacle itself; (3) of its relation to the religious life of Israel; (4) of the theories of later times respecting it.—I. *The Word and its Synonyms.*—(1.) The first word used (Ex. xxv. 9) is *Mishcân*=dwelling. It connects itself with the Jewish, though not Scriptural, word *Shechinah*, as describing the dwelling-place of the Divine Glory. It is not applied in prose to the common dwellings of men, but seems to belong rather to the speech of poetry (Ps. lxxxvii. 2; Cant. i. 8). (2.) Another word, however, is also used, more connected with the common life of men; *ôhel*, the "tent" of the Patriarchal age of Abraham, and of Jacob (Gen. ix. 21, &c.). For the most part, as needing something to raise it, it is used, when applied to the Sacred Tent, with some distinguishing epithet. In one passage only (1 K. i. 39) does it appear with this meaning by itself. (3.) *Baith* is applied to the Tabernacle in Ex. xxiii. 19, xxxiv. 26; Josh. vi. 24, ix. 23; Judg. xviii. 31, x. 18, as it had been, apparently, to the tents of the Patriarchs (Gen. xxxiii. 17). So far as it differs from the two preceding words, it expresses more definitely the idea of a fixed settled habitation. (4.) *Kôdesh*, *Mikdash*, the holy, consecrated place, and therefore applied, according to the graduated scale of holiness of which the Tabernacle bore witness, sometimes to the whole structure (Ex. xxv. 8; Lev. xii. 4), sometimes to the court into which none but the priests might enter (Lev. iv. 6; Num. iii. 38, iv. 12), sometimes to the innermost sanctuary of all, the Holy of Holies (Lev. iv. 6?). (5.) *Hôdél*, as meaning the stately building, or palace of Jehovah (1 Chr. xxix. 1. 19), is applied more commonly to the Temple (2 K. xxiv. 13, &c.), but was used also of the Tabernacle at Shiloh (1 Sam. i. 9, iii. 3) and Jerusalem (Ps. v. 7). (6.) The two words (1) and (2) receive a new meaning in combination (a.) with *mô'êd*, and (b.) with *hâ'edûth*. To understand the full meaning of the distinctive titles thus formed is

CON. D. B.

to possess the key to the significance of the whole Tabernacle. (a.) The real meaning of the word is to be found in what may be called the *locus classicus*, as the interpretation of all words connected with the Tabernacle (Ex. xxix. 42-46). It is clear that "congregation" is inadequate. Not the gathering of the worshippers only, but the meeting of God with His people, to commune with them, to make himself known to them, was what the name embodied. (7.) The other compound phrase, (b.) is rightly rendered "the tent of the testimony" (Num. ix. 15), "the tabernacle of witness" (Num. xvii. 7, xviii. 2). In this case the tent derives its name from that which is the centre of its holiness. The two tables of stone within the ark are emphatically the testimony (Ex. xxv. 16, 21, xxxi. 18).—II. *History.*—(1.) The outward history of the Tabernacle begins with Ex. xxv. It comes after the first great group of Laws (xix.-xxiii.), after the covenant with the people, after the vision of the Divine Glory (xxiv.). For forty days and nights Moses is in the mount. •There rose before him, not without points of contact with previous associations, yet in no degree formed out of them, the "pattern" of the Tabernacle. He is directed in his choice of the two chief artists, Bezaleel of the tribe of Judah, Aholiab of the tribe of Dan (xxxi.). The sin of the golden calf apparently postpones the execution. As in a transition period, the whole future depending on the penitence of the people, on the intercession of their leader, a tent is pitched, probably that of Moses himself, outside the camp, to be provisionally the Tabernacle of Meeting. Of this provisional Tabernacle it has to be noticed, that there was as yet no ritual and no priesthood. The people went out to it as to an oracle (Ex. xxxii. 7). (2.) Another outline Law was however given; another period of solitude, like the first, followed. The work could now be resumed. The people offered the necessary materials in excess of what was wanted (Ex. xxxvi. 5, 6). Other workmen (Ex. xxxvi. 2) and work-women (Ex. xxxv. 25) placed themselves under the direction of Bezaleel and Aholiab. The parts were completed separately, and then, on the first day of the second year from the Exodus, the Tabernacle itself was erected and the ritual appointed for it begun (Ex. xl. 2). (3.) The position of the new Tent was itself significant. It stood, not, like the provisional Tabernacle, at a distance from the camp, but in its very centre. The Priests on the east, the other three families of the Levites on the other sides, were closest in attendance, the "body-guard" of the Great King. In the wider square, Judah, Zebulun, Issachar, were on the east; Ephraim, Manasseh, Benjamin, on the west; the less conspicuous tribes, Dan, Asher, Naphtali, on the north; Reuben, Simeon, Gad, on the south side. When the army put itself in order of march, the position of the Tabernacle, carried by the Levites, was still central, the tribes of the east and south in front, those of the north and west in the rear (Num. ii.). (4.) In all special facts connected with the Tabernacle, the original thought reappears. It is the place where man meets with God. (5.) As long as Canaan remained unconquered, and the people were still therefore an army, the Tabernacle was probably moved from place to place, wherever the host of Israel was, for the time, encamped; and, finally, was placed at Shiloh (Josh. ix. 27, xviii. 1). The reasons of the choice are not given. Partly, perhaps, its central position, partly

its belonging to the powerful tribe of Ephraim, the tribe of the great captain of the host, may have determined the preference. There it continued during the whole period of the Judges. There, too, as the religion of Israel sunk towards the level of an orgiastic Heathenism, troops of women assembled, shameless as those of Midian, worshippers of Jehovah, and concubines of His priests (1 Sam. ii. 22). (6.) A state of things which was rapidly assimilating the worship of Jehovah to that of Ashtaroth, or Mylitta, needed to be broken up. The Ark of God was taken and the sanctuary lost its glory: and the Tabernacle, though it did not perish, never again recovered it (1 Sam. iv. 22). It probably became once again a moveable sanctuary, less honoured as no longer possessing the symbol of the Divine Presence, yet cherished by the priesthood, and some portions, at least, of its ritual, kept up. For a time it seems, under Saul, to have been settled at NOB (1 Sam. xxi. 1-6). The massacre of the priests and the flight of Abiathar must, however, have robbed it yet further of its glory. It had before lost the Ark. It now lost the presence of the High-Priest, and with it the oracular ephod, the URIM and the THUMMIM (1 Sam. xxii. 20, xxiii. 6). What change of fortune then followed we do not know. In some way or other, it found its way to Gibeon (1 Chr. xvi. 39). The capture of Jerusalem and the erection there of a new Tabernacle, with the ark, of which the old had been deprived (2 Sam. vi. 17; 1 Chr. xv. 1), left it little more than a traditional, historical sanctity. It retained only the old altar of burnt-offerings (1 Chr. xxi. 29). The divided worship continued all the days of David. The sanctity of both places was recognised by SOLOMON on his accession (1 K. iii. 15; 2 Chron. i. 3). But it was time that the anomaly should cease. The purpose of David fulfilled by Solomon, was that the claims of both should merge in the higher glory of the Temple.—III. *Relation to the religious life of Israel.*—(1.) Whatever connexion may be traced between other parts of the ritual of Israel and that of the nations with which Israel had been brought into contact, the thought of the Tabernacle meets us as entirely new. The "house of God" [BETHEL] of the Patriarchs had been the large "pillar of stone" (Gen. xxviii. 18, 19), bearing record of some high spiritual experience, or the grove which, with its dim, doubtful light, attuned the souls of men to a divine awe (Gen. xxi. 33). A sacred tent, a moving Bethel, was the fit sanctuary for a people still nomadic. It was capable of being united afterwards, as it actually came to be, with "the grove" of the older *cultus* (Josh. xxiv. 26). (2.) The structure of the Tabernacle was obviously determined by a complex and profound symbolism; but its meaning remains one of the things at which we can but dimly guess. No interpretation is given in the Law itself. That which meets us in the Epistle to the Hebrews, the application of the *types* of the Tabernacle to the mysteries of Redemption, was latent till those mysteries were made known. And, yet, we cannot but believe that, as each portion of the wonderful order rose before the inward eye of the lawgiver, it must have embodied distinctly manifold truths which he apprehended himself, and sought to communicate to others. (3.) The thought of a graduated sanctity, like that of the outer court, the Holy Place, the Holy of Holies, had its counterpart, often the same number of stages, in the structure of Egyptian

tian temples. In the Adytum, often at least, was the sacred ARK, the culminating point of holiness, containing the highest and most mysterious symbols, winged figures, generally like those of the cherubim, the emblems of stability and life. Here were outward points of resemblance. Of all elements of Egyptian worship this was one which could be transferred with least hazard, with most gain. No one could think that the Ark itself was the likeness of the God he worshipped. When we ask what gave the Ark its holiness, we are led on at once to the infinite difference, the great gulf between the two systems. That of Egypt was predominantly *cosmical*, starting from the productive powers of nature. That of Israel was predominantly ethical. In the depths of the Holy of Holies, and for the high-priest as for all Israel, there was the revelation of a righteous Will requiring righteousness in man. And over the Ark was the *Côphoreth* (MERCY-SEAT), so called with a twofold reference to the root-meaning of the word. It *covered* the Ark. It was the witness of a mercy *covering* sins. And over the Mercy-seat were the CHERUBIM, reproducing, in part at least, the symbolism of the great Hamitic races. Representing as they did the manifold powers of nature, created life in its highest form, their overshadowing wings, meeting as in token of perfect harmony, declared that nature as well as man found its highest glory in subjection to a Divine Law, that men might take refuge in that Order, as under the shadow of the wings of God. The material not less than the forms, in the Holy of Holies was significant. The acacia or shittim-wood, least liable, of woods then accessible, to decay, might well represent the imperishableness of Divine Truth, of the Laws of Duty. Ark, mercy-seat, cherubim, the very walls, were all overlaid with gold, the noblest of all metals, the symbol of light and purity, sun-light itself as it were, fixed and embodied, the token of the incorruptible, of the glory of a great king. Dimensions also had their meaning. Difficult as it may be to feel sure that we have the key to the enigma, there can be but little doubt that the older religious systems of the world did attach a mysterious significance to each separate number; that the training of Moses, as afterwards the far less complete initiation of Pythagoras in the symbolism of Egypt, must have made that transparently clear to him, which to us is almost impenetrably dark. (4.) Into the inner sanctuary neither people nor the priests as a body ever entered. Strange as it may seem, that in which everything represented light and life was left in utter darkness, in profound solitude. Once only in the year, on the DAY OF ATONEMENT, might the high-priest enter. The strange contrast has, however, its parallel in the spiritual life. Death and life, light and darkness, are wonderfully united. Only through death can we truly live. Only by passing into the "thick darkness" where God is (Ex. xx. 21; 1 K. viii. 12) can we enter at all into the "light inaccessible," in which He dwells everlastingly. And to come there with blood, the symbol of life, touching with that blood the mercy-seat, with incense, the symbol of adoration (Lev. xvi. 12-14), what did that express but the truth, (1) that man must draw near to the righteous God with no lower offering than the pure worship of the heart, with the living sacrifice of body, soul, and spirit; (2) that could such a perfect sacrifice be found, it would have a mysterious

power working beyond itself, in proportion to its perfection, to cover the multitude of sins? (5.) From all others, from the high-priest at all other times, the Holy of Holies was shrouded by the double VEIL, bright with many colours and strange forms, even as curtains of golden tissue were to be seen hanging before the Adytum of an Egyptian temple, a strange contrast often to the bestial form behind them. The veil itself represented the infinite variety, the *πολυποικίλος σοφία* of the Divine order in Creation (Eph. iii. 10). And there again were seen copied upon the veil, the mysterious forms of the cherubim; how many, or in what attitude, or of what size, or in what material, we are not told. (6.) The outer sanctuary was one degree less awful in its holiness than the inner. Silver, the type of Human Purity, took the place of gold, the type of the Divine Glory. It was to be trodden daily by the priests, as by men who lived in the perpetual consciousness of the nearness of God, of the mystery behind the veil. Barefooted and in garments of white linen, like the priests of Isis, they accomplished their ministrations. And here, too, there were other emblems of Divine realities. With no opening to admit light from without, it was illumined only by the golden LAMP with its seven lights, one taller than the others, as the Sabbath is more sacred than the other days of the week, never all extinguished together, the perpetual symbol of all derived gifts of wisdom and holiness in man, reaching their mystical perfection when they shine in God's sanctuary to His glory (Ex. xxv. 31, xxvii. 20; Zech. iv. 1-14). The SHEW-BREAD, the "bread of faces," of the Divine Presence, served as a token that, though there was no form or likeness of the Godhead, He was yet there, accepting all offerings, recognising in particular that special offering which represented the life of the nation at once in the distinctness of its tribes and in its unity as a people. The meaning of the ALTAR OF INCENSE was not less obvious. The cloud of fragrant smoke was the natural, almost the universal, emblem of the heart's adoration (Ps. cxli. 2). Upon that altar no "strange fire" was to be kindled. When fresh fire was needed it was to be taken from the ALTAR OF BURNT-OFFERING in the outer court (Lev. ix. 24, x. 1). (7.) Outside the tent, but still within the consecrated precincts, was the COURT, fenced in by an enclosure, yet open to all the congregation as well as to the Levites, those only excepted who were ceremonially unclean. Here therefore stood the ALTAR OF BURNT-OFFERINGS, at which SACRIFICES in all their varieties were offered by penitent or thankful worshippers (Ex. xxvii. 1-8; xxxviii. 1), the brazen LAVER at which those worshippers purified themselves before they sacrificed, the priests before they entered into the sanctuary (Ex. xxx. 17-21). Here the graduated scale of holiness ended. — IV. *Theories of later times.* — (1.) It is not probable that the elaborate symbolism of such a structure was understood by the rude and sensual multitude that came out of Egypt. Yet it was not the less, was perhaps the more fitted, on that account to be an instrument for the education of the people. To the most ignorant and debased it was at least a witness of the nearness of the Divine King. It met the craving of the human heart which prompts to worship, with an order which was neither idolatrous nor impure. More thoughtful minds were led inevitably to higher truths. If the words, "He that dwelleth between the cherubim,"

spoke on the one side of a special, localised manifestation of the Divine Presence, they spoke also on the other of that Presence, as in the heaven of heavens, in the light of setting suns, in the blackness and the flashes of the thunder-clouds. (2.) The thought thus uttered, essentially poetical in its nature, had its fit place in the psalms and hymns of Israel. It lost its beauty, it led men on a false track, when it was formalised into a system. At a time when Judaism and Greek philosophy were alike effete, when a feeble physical science, which could read nothing but its own thoughts in the symbols of an older and deeper system, was after its own fashion rationalising the mythology of heathenism, there were found Jewish writers willing to apply the same principle of interpretation to the Tabernacle and its order. The result appears in Josephus and in Philo, in part also in Clement of Alexandria and Origen. (3.) It will have been clear from all that has been said that the Epistle to the Hebrews has not been looked on as designed to limit our inquiry into the meaning of the symbolism of the Tabernacle, and that there is consequently no ground for adopting the system of interpreters who can see in it nothing but an aggregate of types of Christian mysteries.

Tabernacles, the Feast of (Ex. xxiii. 16, "the feast of ingathering"), the third of the three great festivals of the Hebrews, which lasted from the 15th till the 22nd of Tisri. 1. The following are the principal passages in the Pentateuch which refer to it: Exod. xxiii. 16; Lev. xxiii. 34-36, 39-43; Num. xxi. 12-38; Deut. xvi. 13-15, xxi. 10-13. In Neh. viii. there is an account of the observance of the feast by Ezra. — II. The time of the festival fell in the autumn, when the whole of the chief fruits of the ground, the corn, the wine, and the oil, were gathered in (Ex. xxiii. 16; Lev. xxiii. 39; Deut. xvi. 13-15). Its duration was strictly only seven days (Deut. xvi. 13; Ex. xiv. 25). But it was followed by a day of holy convocation, distinguished by sacrifices of its own, which was sometimes spoken of as an eighth day (Lev. xxiii. 36; Neh. viii. 18). During the seven days the Israelites were commanded to dwell in booths or huts formed of the boughs of trees. The boughs were of the olive, palm, pine, myrtle, and other trees with thick foliage (Neh. viii. 15, 16). According to Rabbinical tradition, each Israelite used to tie the branches into a bunch, to be carried in his hand, to which the name *kiddush* was given. The burnt-offerings of the Feast of Tabernacles were by far more numerous than those of any other festival. There were offered on each day two rams, fourteen lambs, and a kid for a sin-offering. But what was most peculiar was the arrangement of the sacrifices of bullocks, in all amounting to seventy (Num. xxix. 12-38). The eighth day was a day of holy convocation of peculiar solemnity, and, with the seventh day of the Passover, and the day of Pentecost, was designated *'atsareth*. We are told that on the morning of this day the Hebrews left their huts and dismantled them, and took up their abode again in their houses. The special offerings of the day were a bullock, a ram, seven lambs, and a goat for a sin-offering (Num. xxix. 36, 38). When the Feast of Tabernacles fell on a Sabbatical year, portions of the Law were read each day in public, to men, women, children, and strangers (Deut. xxxi. 10-13). We find Ezra reading the Law during the festival "day by day, from the first day to the

last day" (Neh. viii. 18).—III. There are two particulars in the observance of the Feast of Tabernacles which appear to be referred to in the New Testament, but are not noticed in the Old. These were, the ceremony of pouring out some water of the pool of Siloam, and the display of some great lights in the court of the women. We are told that each Israelite, in holiday attire, having made up his *luláv*, before he bade his last, repaired to the Temple with the *luláv* in one hand and the citron in the other, at the time of the ordinary morning sacrifice. The parts of the victim were laid upon the altar. One of the priests fetched some water in a golden ewer from the pool of Siloam, which he brought into the court through the water gate. As he entered the trumpets sounded, and he ascended the slope of the altar. At the top of this were fixed two silver basins with small openings at the bottom. Wine was poured into that on the eastern side, and the water into that on the western side, whence it was conducted by pipes into the Cedron. In the evening, both men and women assembled in the court of the women, expressly to hold a rejoicing for the drawing of the water of Siloam. At the same time there were set up in the court two lofty stands, each supporting four great lamps. These were lighted on each night of the festival. It appears to be generally admitted that the words of our Saviour (John vii. 37, 38).—"If any man thirst, let him come unto me and drink. He that believeth on me, as the Scripture hath said, out of his belly shall flow rivers of living water"—were suggested by the pouring out of the water of Siloam. But it is very doubtful what is meant by "the last day, that great day of the feast." It would seem that either the last day of the feast itself, that is the seventh, or the last day of the religious observances of the series of annual festivals, the eighth, must be intended. Dean Alford reasonably supposes that the eighth day may be meant, and that the reference of our Lord was to an ordinary and well-known observance of the feast, though it was not, at the very time, going on. We must resort to some such explanation, if we adopt the notion that our Lord's words (John viii. 12).—"I am the light of the world"—refer to the great lamps of the festival.—IV. There are many directions given in the Mishna for the dimensions and construction of the huts. They were not to be lower than ten palms, nor higher than twenty cubits. They were to stand by themselves, and not to rest on any external support, nor to be under the shelter of a larger building, or of a tree. They were not to be covered with skins or cloth of any kind, but only with boughs, or, in part, with reed mats or laths. The furniture of the huts was to be, according to most authorities, of the plainest description. It is said that the altar was adorned throughout the seven days with sprigs of willows, one of which each Israelite who came into the court brought with him. The great number of the sacrifices has been already noticed. But besides these, the Chagigahs or private peace-offerings were more abundant than at any other time.—V. Though all the Hebrew annual festivals were seasons of rejoicing, the Feast of Tabernacles was, in this respect, distinguished above them all. The huts and the *luláv*s must have made a gay and striking spectacle over the city by day, and the lamps, the flambeaux, the music, and the joyous gatherings in the court of the Temple must have given a still more festive character to the night.

Hence, it was called by the Rabbis *the festival, kar' ékayán*. There is a proverb in *Succah* (v. 1), "He who has never seen the rejoicing at the pouring out of the water of Siloam has never seen rejoicing in his life."—VI. The main purposes of the Feast of Tabernacles are plainly set forth (Ex. xxiii. 16 and Lev. xxiii. 43). It was to be at once a thanksgiving for the harvest, and a commemoration of the time when the Israelites dwelt in tents during their passage through the wilderness. In one of its meanings, it stands in connexion with the Passover, as the Feast of Abib; and with Pentecost, as the feast of harvest: in its other meaning, it is related to the Passover as the great yearly memorial of the deliverance from the destroyer, and from the tyranny of Egypt. But naturally connected with this exultation in their regained freedom was the rejoicing in the more perfect fulfilment of God's promise, in the settlement of His people in the Holy Land. Besides this, Philo saw in this feast a witness for the original equality of all the members of the chosen race. But the culminating point of this blessing was the establishment of the central spot of the national worship in the Temple at Jerusalem. Hence it was evidently fitting that the Feast of Tabernacles should be kept with an unwonted degree of observance at the dedication of Solomon's Temple (1 K. viii. 2, 65; Joseph. *Ant.* viii. 4, §5), again, after the rebuilding of the Temple by Ezra (Neh. viii. 13-18), and a third time by Judas Maccabaeus when he had driven out the Syrians and restored the Temple to the worship of Jehovah (2 Macc. x. 5-8).

Tabitha, also called Dorcas by St. Luke: a female disciple of Joppa, "full of good works," among which that of making clothes for the poor is specifically mentioned. While St. Peter was at the neighbouring town of Lydda, Tabitha died, upon which the disciples at Joppa sent an urgent message to the Apostle, begging him to come to them without delay. Upon his arrival Peter found the deceased already prepared for burial, and laid out in an upper chamber where she was surrounded by the recipients and the tokens of her charity. After the example of our Saviour in the house of Jairus (Matt. ix. 25; Mark v. 40), "Peter put them all forth," prayed for the Divine assistance, and then commanded Tabitha to arise (comp. Mark v. 41; Luke viii. 54). She opened her eyes and sat up, and then, assisted by the Apostle, rose from her couch. This great miracle, as we are further told, produced an extraordinary effect in Joppa, and was the occasion of many conversions there (Acts ix. 36-42). The name of "Tabitha" is the Aramaic form answering to the Hebrew *tsibiyáh*, a "female gazelle." St. Luke gives "Dorcas" as the Greek equivalent of the name.

Tabor and **Mount Tabor**, one of the most interesting and remarkable of the single mountains in Palestine. It rises abruptly from the north-eastern arm of the Plain of Esdraelon, and stands entirely insulated except on the west, where a narrow ridge connects it with the hills of Nazareth. It presents to the eye, as seen from a distance, a beautiful appearance, being so symmetrical in its proportions, and rounded off like a hemisphere or the segment of a circle, yet varying somewhat as viewed from different directions. The body of the mountain consists of the peculiar limestone of the country. It is now called *Jebel et-Túr*. It lies about six or eight miles almost due east from Nazareth. The

ascent is usually made on the west side, near the little village of Deburih, probably the ancient Daberath (Josh. xix. 12), though it can be made with entire ease in other places. It requires three-quarters of an hour or an hour to reach the top. The top of Tabor consists of an irregular platform, embracing a circuit of half-an-hour's walk and commanding wide views of the subject plain from end to end. Tabor does not occur in the New Testament, but makes a prominent figure in the Old. The Book of Joshua (xix. 22) mentions it as the boundary between Issachar and Zebulun (see ver. 12). Barak, at the command of Deborah, assembled his forces on Tabor, and descended thence with "ten thousand men after him" into the plain, and conquered Sisera on the banks of the Kishon (Judg. iv. 6-15). The brothers of Gideon, each of whom "resembled the children of a king," were murdered here by Zebah and Zalmunna (Judg. viii. 18, 19). Some writers, after Herder and others, think that Tabor is intended when it is said of Issachar and Zebulun in Deut. xxxiii. 19, that "they shall call the people unto the mountain; there they shall offer sacrifices of righteousness." Dr. Robinson has thus described the ruins which are to be seen at present on the summit of Tabor. "All around the top are the foundations of a thick wall built of large stones, some of which are bevelled, showing that the entire wall was perhaps originally of that character. In several parts are the remains of towers and bastions. The chief remains are upon the ledge of rocks on the south of the little basin, and especially towards its eastern end; here are—in indiscriminate confusion—walls, and arches, and foundations, apparently of dwelling-houses, as well as other buildings, some of hewn, and some of large bevelled stones. The walls and traces of a fortress are seen here, and further west along the southern brow, of which one tall pointed arch of a Saracenic gateway is still standing, and bears the name of *Bab el-Hava*, 'Gate of the Wind.'" The Latin Christians have now an altar here, at which their priests from Nazareth perform an annual mass. The Greeks also have a chapel, where, on certain festivals, they assemble for the celebration of religious rites. The idea that our Saviour was transfigured on Tabor prevailed extensively among the early Christians, who adopted legends of this nature, and reappears often still in popular religious works. It is impossible, however, to acquiesce in the correctness of this opinion. It can be proved from the Old Testament, and from later history, that a fortress or town existed on Tabor from very early times down to B. C. 53 or 50; and, as Josephus says that he strengthened the fortifications there, about A.D. 60, it is morally certain that Tabor must have been inhabited during the intervening period, that is, in the days of Christ. Tabor, therefore, could not have been the Mount of Transfiguration; for when it is said that Jesus took his disciples "up into a high mountain apart, and was transfigured before them" (Matt. xvii. 1, 2), we must understand that he brought them to the summit of the mountain, where they were alone by themselves.

Tabor is mentioned in the lists of 1 Chr. vi. as a city of the Merarite Levites, in the tribe of Zebulun (ver. 77). The list of the towns of Zebulun (Josh. xix.) contains the name of CHISLOTH-TABOR (ver. 12). It is therefore, possible, either that Chisloth-tabor is abbreviated into Tabor by the

chronicler, or that by the time these later lists were compiled, the Merarites had established themselves on the sacred mountain, and that Tabor is Mount Tabor.

Tabor, the Plain of. It has been already pointed out, that this is an incorrect translation, and should be THE OAK OF TABOR. It is mentioned in 1 Sam. x. 3 only, as one of the points in the homeward journey of Saul after his anointing by Samuel. But unfortunately, like so many of the other spots named in this interesting passage, the position of the Oak of Tabor has not yet been fixed. Ewald seems to consider it certain that Tabor and Deborah are merely different modes of pronouncing the same name, and he accordingly identifies the oak of Tabor with the tree under which Deborah, Rachel's nurse, was buried (Gen. xxv. 8). But this, though most ingenious, can only be received as a conjecture.

Tabret. [TIMBREL.]
Tab'rimon. Properly, Tabrimmon, i.e. 'good is Rimmon,' the Syrian god. The father of Ben-hadad I., king of Syria in the reign of Aza (1 K. xv. 18).

Tache. The word thus rendered occurs only in the description of the structure of the tabernacle and its fittings (Ex. xxvi. 6, 11, 33, xxxv. 11, xxxvi. 13, xxxix. 33), and appears to imitate the small hooks by which a curtain is suspended to the rings from which it hangs, or connected vertically, as in the case of the veil of the Holy of Holies, with the loops of another curtain.

Tachmonite, the. "The Tachmonite that sat in the seat," chief among David's captains (2 Sam. xxiii. 8), is in 1 Chr. xi. 11 called "Jashobeam an Hachmonite," or, as the margin gives it, "son of Hachmoni." Kennicott has shown, that the words translated "he that sat in the seat," are a corruption of Jashobeam, and that "the Tachmonite" is a corruption of the "son of Hachmoni," which was the family or local name of Jashobeam. Therefore he concludes "Jashobeam the Hachmonite" to have been the true reading.

Tadmor, called "Tadmor in the wilderness" (2 Chr. viii. 4). There is no reasonable doubt that this city, said to have been built by Solomon, is the same as the one known to the Greeks and Romans and to modern Europe by the name, in some form or other, of Palmyra. The identity of the two cities results from the following circumstances: 1st, The same city is specially mentioned by Josephus (*Ant.* viii. 6, §1) as being in his time the name of Tadmor among the Syrians, and Palmyra among the Greeks; and in his Latin translation of the Old Testament, Jerome translates Tadmor by Palmira (2 Chr. viii. 4). 2ndly, The modern Arabic name of Palmyra is substantially the same as the Hebrew word, being Tadmur or Tathmur. 3rdly, The word Tadmor has nearly the same meaning as Palmyra, signifying probably the "City of Palms," from Tamar, a Palm. 4thly, The name Tadmor or Tadmör actually occurs as the name of the city in Aramaic and Greek inscriptions which have been found there. 5thly, In the Chronicles, the city is mentioned as having been built by Solomon after his conquest of Hamath Zobah, and it is named in conjunction with "all the store-cities which he built in Hamath." This accords fully with the situation of Palmyra [HAMATH]; and there is no other known city, either in the desert or not in the desert, which can lay claim to the

name of Tadmor. In addition to the passage in the Chronicles, there is a passage in the Book of Kings (1 K. ix. 18) in which, according to the marginal reading (*Keri*), the statement that Solomon built Tadmor, likewise occurs. But on referring to the original text (*Cethib*), the word is found to be not Tadmor, but Tamar. Now, as all the other towns mentioned in this passage with Tamar are in Palestine (Gezer, Beth-horon, Bealath), as it is said of Tamar that it was "in the wilderness *in the land*," and as, in Ezekiel's prophetic description of the Holy Land, there is a Tamar mentioned as one of the borders of the land on the south (Ez. xlviii. 19), where, as is notorious, there is a desert, it is probable that the author of the Book of Kings did not really mean to refer to Palmyra, and that the marginal reading of "Tadmor" was founded on the passage in the Chronicles. If this is admitted, the suspicion naturally suggests itself, that the compiler of the Chronicles may have misapprehended the original passage in the Book of Kings, and may have incorrectly written "Tadmor" instead of "Tamar." On this hypothesis there would have been a curious circle of mistakes; and the final result would be, that any supposed connexion between Solomon and the foundation of Palmyra must be regarded as purely imaginary. This conclusion is not necessarily incorrect or unreasonable, but there are not sufficient reasons for adopting it. As the city is nowhere else mentioned in the whole Bible, it would be out of place to enter into a long, detailed history of it on the present occasion. The following leading facts, however, may be mentioned. The first author of antiquity who mentions Palmyra is Pliny the Elder. Afterwards it was mentioned by Appian in connexion with a design of Mark Antony to let his cavalry plunder it. In the second century A.D. it seems to have been beautified by the Emperor Hadrian. In the beginning of the third century A.D. it became a Roman colony under Caracalla (211-217 A.D.), and received the *jus Italicum*. Subsequently, in the reign of Gallienus, the Roman Senate invested Odenathus, a senator of Palmyra, with the regal dignity, on account of his services in defeating Sapor king of Persia. On the assassination of Odenathus, his celebrated wife Zenobia seems to have conceived the design of erecting Palmyra into an independent monarchy; and, in prosecution of this object, she, for a while, successfully resisted the Roman arms. She was at length defeated and taken captive by the Emperor Aurelian (A.D. 273), who left a Roman garrison in Palmyra. This garrison was massacred in a revolt; and Aurelian punished the city by the execution not only of those who were taken in arms, but likewise of common peasants, of old men, women, and children. From this blow Palmyra never recovered, though there are proofs of its having continued to be inhabited until the downfall of the Roman Empire.

Tahan. A descendant of Ephraim (Num. xxvi. 35). In 1 Chr. vii. 25 he appears as the son of Telah.

Tahanites, the. The descendants of the preceding (Num. xxvi. 35).

Tahath. 1. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 24, 37 [9, 22]).—2. According to the present text, son of Bered, and great-grandson of Ephraim (1 Chr. vii. 20). Burriington, however, identifies Tahath with Tahan, the son of Ephraim.—3. Grandson of the preceding, as the text now stands (1 Chr. vii. 20). But Burriington considers him as a son of Ephraim.

Tahath. The name of a desert-station of the Israelites between Makheloth and Tarah (Num. xxiii. 26). The site has not been identified.

Tah'panhes, Tahaph' nehse, Tahap'anes. A city of Egypt, of importance in the time of the prophets Jeremiah and Ezekiel. The name is evidently Egyptian, and closely resembles that of the Egyptian queen TAPHENES. The Coptic name of this place, *Taphnas*, is clearly derived from the LXX. form. Tahpanhes was evidently a town of Lower Egypt near or on the eastern border. When Johanan and the other captains went into Egypt "they came to Tahpanhes" (Jer. xliii. 7). The Jews in Jeremiah's time remained here (Jer. xlii. 1). It was an important town, being twice mentioned by the latter prophet with Noph or Memphis (ii. 16, xlii. 14). Here stood a house of Pharaoh-hophra before which Jeremiah hid great stones (xliii. 8-10). It is mentioned with "Ramesse and all the land of Gesen" in Jud. i. 9. Herodotus calls this place Daphnae of Pelusium. In the *Itinerary of Antoninus* this town, called Dafno, is placed 16 Roman miles to the south-west of Pelusium. This position seems to agree with that of Tel-Defenneh, which Sir Gardner Wilkinson supposes to mark the site of Daphnae. Can the name be of Greek origin? No satisfactory Egyptian etymology has been suggested.

Tah'penes, a proper name of an Egyptian queen. She was wife of the Pharaoh who received Hadad the Edomite, and who gave him her sister in marriage (1 K. xi. 18-20). In the LXX. the latter is called the elder sister of Thekemina, and in the addition to ch. xii. Shishak (Susakim) is said to have given Ano, the elder sister of Thekemina his wife, to Jeroboam. It is obvious that this and the earlier statement are irreconcilable. There is therefore but one Tahpenes or Thekemina. No name that has any near resemblance to either Tahpenes or Thekemina has yet been found among those of the period.

Tahrea. Son of Mienah, and grandson of Mephibosheth (1 Chr. ix. 41).

Tah'tim Hod'shi, the Land of. One of the places visited by Job during his census of the land of Israel. It occurs between Gilead and Dan-jan (2 Sam. xxiv. 6). The name has puzzled all the interpreters. The old versions throw no light upon it.

Talent, the greatest weight of the Hebrews. [WEIGHTS].

Tali'tha ou'mi. Two Syriac words (Mark v. 41), signifying "Damsel, arise."

Talma'i. 1. One of the three sons of "the Anak," who were slain by the men of Judah (Num. xiii. 22; Josh. xv. 14; Judg. i. 10).—2. Son of Ammihud, king of Geshur (2 Sam. iii. 3, xiii. 37; 1 Chr. iii. 2). He was probably a petty chieftain dependent on David.

Tal'mon. The head of a family of doorkeepers in the Temple, "the porters for the camps of the sons of Levi" (1 Chr. ix. 17; Neh. xi. 19). Some of his descendants returned with Zerubbabel (Ezr. ii. 42; Neh. vii. 45), and were employed in their hereditary office in the days of Nehemiah and Ezra (Neh. xii. 25).

Talmud (*i.e.* doctrine, from the Hebrew word "to learn") is a large collection of writings, containing a full account of the civil and religious law of the Jews. It was a fundamental principle of the Pharisees common to them with all orthodox modern

Jews, that by the side of the written law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and to explain the written law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth. The classical passage in the Mishna on this subject is the following:—"Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue." This oral law, with the numerous commentaries upon it, forms the Talmud. It consists of two parts, the Mishna and Gemara. 1. The MISHNA, or "second law," which contains a compendium of the whole ritual law, was reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the 2nd century of the Christian era. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. The precise date of his death is disputed; some placing it in a year somewhat antecedent to 194, A.D. while others place it as late as 220 A.D., when he would have been about 81 years old. Viewed as a whole, the precepts in the Mishna treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. The Mishna is very concisely written, and requires notes. 2. This circumstance led to the Commentaries called GEMARA (i. e. *Supplement, Completion*) which form the second part of the Talmud, and which are very commonly meant when the word "Talmud" is used by itself. There are two Gemaras: one of Jerusalem, in which there is said to be no passage which can be proved to be later than the first half of the 4th century; and the other of Babylon, completed about 500 A.D. The Babylonian Talmud is almost four times as large as that of Jerusalem.—The language of the Mishna is that of the later Hebrew, purely written on the whole, though with a few grammatical Aramaisms, and interspersed with Greek, Latin, and Aramaic words which had become naturalized. The Mishna is distributed into six great divisions or orders. "Section I., *Seeds*: of Agrarian Laws, commencing with a chapter on Prayers. In this section the various tithes and donations due to the Priests, the Levites, and the poor, from the products of the lands, and further the Sabbatical year, and the prohibited mixtures in plants, animals and garments, are treated of. Section II., *Fests*: of Sabbath, Feast and Fast days, the work prohibited, the ceremonies ordained, the sacrifices to be offered, on them. Special chapters are devoted to the Feast of the Exodus from Egypt, to the New year's Day, to the Day of Atonement (one of the most impressive portions of the whole book), to the Feast of Tabernacles, and to that of Haman. Section III., *Women*: of betrothal, marriage, divorce, &c.: also of vows. Section IV., *Damages*: including a great part of the civil and criminal law. It treats of the law of trover, of buying and selling, and the ordinary monetary transactions. Further, of the greatest crime known to the law, viz., idolatry. Next of

witnesses, of oaths, of legal punishments, and of the Sanhedrin itself. This section concludes with the so-called 'Sentences of the Fathers,' containing some of the sublimest ethical dicta known in the history of religious philosophy. Section V., *Sacred Things*: of sacrifices, the first-born, &c.; also of the measurements of the Temple (Middoth). Section VI., *Purifications*: of the various levitical and other hygienic laws, of impure things and persons, their purification, &c. The regulations contained in these six treatises are of very different kinds. They are apparently important and unimportant, intended to be permanent or temporary. They are either clear expansions of Scriptural precepts, or independent traditions, linked to Scripture only hermeneutically. They are 'decisions,' 'fences,' 'injunctions,' 'ordinances,' or simply 'Mosaic Halachah from Sinai'—much as the Roman laws consist of 'Senatusconsulta,' 'Plebiscita,' 'Edicts,' 'Responsa Prudentium,' and the rest. Every precept traditionally received or passed by the majority becomes, in a manner, a religious, divinely sanctioned one, although it was always open to the subsequent authorities to reconsider and to abrogate; as, indeed, one of the chief reasons against the writing down of the Code, even after its redaction, was just this, that it should never become fixed and immutable." (See *Quarterly Review*, vol. 123, p. 443, art. "Talmud.")—The Mishna was published by Surenhusius in 6 vols. folio, Amsterdam, 1698, 1703, with a Latin translation of the text. There is no reasonable doubt that, although it may include a few passages of a later date, the Mishna was composed, as a whole, in the 2nd century, and represents the traditions which were current amongst the Pharisees at the time of Christ.

Tal'sas. ELASAH (1 Esd. ix. 22).

Tamah. The children of Tamah, or Thamah (Ezr. ii. 53), were among the Nethinim who returned with Zerubbabel (Neh. vii. 55).

Tamar. The name of three women remarkable in the history of Israel.—1. The wife successively of the two sons of Judah, Er and Onan (Gen. xxxviii. 6-30). Her importance in the sacred narrative depends on the great anxiety to keep up the lineage of Judah. It seemed as if the family were on the point of extinction. Er and Onan had successively perished suddenly. Judah's wife Bathshuah died; and there only remained a child Shelah, whom Judah was unwilling to trust to the dangerous union, as it appeared, with Tamar, lest he should meet with the same fate as his brothers. Accordingly she resorted to the desperate expedient of entrapping the father himself into the union which he feared for his son. He took her for one of the unfortunate women who were consecrated to the inure rites of the Canaanite worship. He promised her, as the price of his intercourse, a kid from the locks to which he was going, and left as his pledge his ornaments and his staff. The kid he sent back by his shepherd (LXX.), Hirah of Adullam. The woman could nowhere be found. Months afterwards it was discovered to be his own daughter-in-law Tamar. She was sentenced to be burnt alive, and was only saved by the discovery, through the pledges which Judah had left, that her seducer was no less than the chieftain of the tribe. The fruits of this intercourse were twins, PHAREZ and ARAM, and through Pharez the sacred line was continued.—2. Daughter of David and Maachah the Geshurite princess, and thus sister of Absalom.

(2 Sam. xiii. 1-32; 1 Chr. iii. 9). She and her brother were alike remarkable for their extraordinary beauty. This fatal beauty inspired a frantic passion in her half-brother Amnon, the eldest son of David by Ahinoam. Morning by morning, as he received the visits of his friend Jonadab, he is paler and thinner. Jonadab discovers the cause, and suggests to him the means of accomplishing his wicked purpose. He was to feign sickness. The king, who appears to have entertained a considerable affection, almost awe, for him, as the eldest son (2 Sam. xiii. 5, 21: LXX.), came to visit him; and Amnon entreated the presence of Tamar, on the pretext that she alone could give him food that he would eat. It would almost seem that Tamar was supposed to have a peculiar art of baking palatable cakes. She came to his house, took the dough and kneaded it, and then in his presence kneaded it a second time into the form of cakes. She then took the pan, in which they had been baked, and poured them all out in a heap before the prince. He caused his attendants to retire, called her to the inner room, and there accomplished his design. In her touching remonstrance two points are remarkable. First, the expression of the infamy of such a crime "in Israel," implying the loftier standard of morals that prevailed, as compared with other countries at that time; and, secondly, the belief that even this standard might be overcome lawfully by royal authority—"Speak to the king, for he will not withhold me from thee." The brutal hatred of Amnon succeeding to his brutal passion, and the indignation of Tamar at his barbarous insult, even surpassing her indignation at his shameful outrage, are pathetically and graphically told. The story of Tamar, revolting as it is, has the interest of revealing to us the interior of the royal household beyond that of any other incident of those times. (1.) The establishments of the princes. (2.) The simplicity of the royal employments. (3.) The dress of the princesses. (4.) The relation of the king to the princes and to the law.—3. Daughter of Absalom (2 Sam. xiv. 7). She ultimately, by her marriage with Uriah of Gibeah, became the mother of Maaciah, the future queen of Judah, or wife of Abijah (1 K. xv. 2).

Tamar. A spot on the south-eastern frontier of Judah, named in Ezek. xlvii. 19, xlviii. 28 only, evidently called from a palm-tree. If not *Hazazon Tamar*, the old name of Engedi, it may be a place called *Thamar* in the *Onomasticon* ("Hazon Tamar"), a day's journey south of Hebron.

Tammuz. Properly "the Tammuz," the article indicating that at some time or other the word had been regarded as an appellative. In the sixth year of the captivity of Jehoiachin, in the sixth month and on the fifth day of the month, the prophet Ezekiel, viii. 14, as he sat in his house surrounded by the elders of Judah, was transported in spirit to the far distant Temple at Jerusalem. The hand of the Lord God was upon him, and led him "to the door of the gate of the house of Jehovah, which was towards the north; and behold there the women sitting, weeping for the Tammuz." Some translate the last clause "causing the Tammuz to weep." No satisfactory etymology of the word has been proposed. The ancient versions supply us with no help. The LXX., the Targum of Jonathan Ben Uzziel, the Peshito Syriac, and the Arabic in Walton's Polyglot, merely reproduce the Hebrew word. The Vulgate alone gives *Adonis* as a modern equi-

valent, and this rendering has been eagerly adopted by subsequent commentators, with but few exceptions. It is at least as old, therefore, as Jerome, and the fact of his having adopted it shows that it must have embodied the most credible tradition. Cyril of Alexandria, and Theodoret, give the same explanation, and are followed by the author of the *Chronicon Paschale*. The only exception to this uniformity is in the Syriac translation of Melito's *Apology*, edited by Dr. Cureton in his *Spicilegium Syriacum*. The date of the translation is unknown; the original if genuine must belong to the second century. The following is a literal rendering of the Syriac: "The sons of Phoenicia worshipped Balthi, the queen of Cyprus. For she loved Tammuz, the son of Cuthar, the king of the Phoenicians, and forsook her kingdom and came and dwelt in Gebal, a fortress of the Phoenicians. And at that time she made all the villages subject to Cuthar the king. For before Tammuz she had loved Ares, and committed adultery with him, and Hephæstus her husband caught her, and was jealous of her. And he (i. e. Ares) came and slew Tammuz on Lebanon while he made a hunting among the wild boars. And from that time Balthi remained in Gebal, and died in the city of Aphaca, where Tammuz was buried." We have here very clearly the Greek legend of Adonis reproduced with a simple change of name. In the next century it assumes for the first time a different form in the hands of a Rabbinical commentator. Rabbi Solomon Isaaki (Rashi) has the following note on the passage in Ezekiel. "An image which the women make hot in the inside, and its eyes were of lead, and they melted by reason of the heat of the burning and it seemed as if it wept; and they (the women) said, He asketh for offerings. 'Tammuz is a word signifying burning.'" In the 12th century (A.D. 1161) Solomon ben Abraham Parchon has the following observations upon Tammuz. "It is the likeness of a reptile which they make upon the water, and the water is collected in it and flows through its holes, and it seems as if it wept." At the close of this century we meet for the first time with an entirely new tradition repeated by R. David Kimchi from the Moreh Nebuchim of Maimonides. "Our Rabbi Mosheh bar Maimon, of blessed memory, has written, that it is found written in one of the ancient idolatrous books, that there was a man of the idolatrous prophets, and his name was Taminuz. And he called to a certain king and commanded him to serve the seven planets and the twelve signs. And that king put him to a violent death, and on the night of his death there were gathered together all the images from the ends of the earth to the temple of Babel, to the golden image which was the image of the sun. Now this image was suspended between heaven and earth, and it fell down in the midst of the temple, and the images likewise (fell down) round about it, and it told them what had befallen Tammuz the prophet. And the images *al. cf. 'hem* wept and lamented all the night; and, as it came to pass, in the morning all the images flew away to their own temples in the ends of the earth." The book of the ancient idolaters from which Maimonides quotes, is the now celebrated work on the Agriculture of the Nabatheans, to which reference will be made hereafter. The tradition recorded by Jerome, which identifies Tammuz with Adonis, has been followed by most subsequent commentators. Luther and others regarded Tammuz as a name of

Bacchus. That Tammuz was the Egyptian Osiris, and that his worship was introduced to Jerusalem from Egypt, was held by Calvin, Piscator, Junius, Leusden, and Pfeiffer. The slight hint given by the prophet of the nature of the worship and worshippers of Tammuz has been sufficient to connect them with the yearly mourning for Adonis by the Syrian damsels. Beyond this we can attach no especial weight to the explanation of Jerome. It is a conjecture and nothing more, and does not appear to represent any tradition. All that can be said therefore is, that it is not impossible that Tammuz may be a name of Adonis the sun-god, but that there is nothing to prove it. The town of Byblos in Phœnicia was the head-quarters of the Adonis-worship. The feast in his honour was celebrated each year in the temple of Aphrodite on the Lebanon, with rites partly sorrowful, partly joyful. The Emperor Julian was present at Antioch when the same festival was held (Amm. Marc. xxii. 9, §13). It lasted seven days, and began with the disappearance of Adonis. Then followed the search made by the women after him. His body was represented by a wooden image placed in the so-called "gardens of Adonis," which were earthenware vessels filled with mould, and planted with wheat, barley, lettuce, and fennel. In one of these gardens Adonis was found again. The finding-again was the commencement of a wake, accompanied by all the usages which in the East attend such a ceremony, cutting the breast with knives (Jer. xvi. 6), and playing on pipes (comp. Matt. ix. 23). The image of Adonis was then washed and anointed with spices, placed in a coffin on a bier, and the wound made by the boar was shown on the figure. The people sat on the ground round the bier, with their clothes rent (comp. *Ep. of Jer.* 31, 32), and the women howled and cried aloud. The whole terminated with a sacrifice for the dead, and the burial of the figure of Adonis. The identification of Tammuz with an idolatrous prophet, which has already been given in a quotation from Maimonides, who himself quotes from the *Agriculture of the Nabatheans*, has been recently revived by Prof. Chwolson of St. Petersburg. The old Babylonian book was written, he maintains, by one Qût'ânî, towards the end of the 14th century B.C., and was translated into Arabic by a descendant of the ancient Chaldeans, whose name was Ibn Washiyyah. Qût'ânî tells the same story of the prophet Tammuz as has already been given in the quotation from Kimchi. In the Targum of Jonathan on Gen. viii. 5, "the tenth mouth" is translated "the month Tammuz."

Ta'nach. A slight variation of the name TANACH (Josh. xxi. 25).

Tanhu'meth. The father of Seraiah in the time of Gedaliah (2 K. xxv. 23; Jer. xl. 8).

Tanis. Jud. i. 10. [ZOAN.]

Ta'phath. The daughter of Solomon, who was married to Ben-Abinadab (1 K. iv. 11).

Ta'phon. One of the cities in Judæa fortified by Bacchides (1 Macc. ix. 50). It is probably the BETH-TAPPUAH of the Old Testament.

Tappu'ah. 1. A city of Judah, in the district of the Shefelah, or lowland (Josh. xv. 34). It was no doubt situated on the lower slopes of the mountains of the N.W. portion of Judah, about 12 miles W. of Jerusalem.—2 A place on the boundary of the "children of Joseph" (Josh. xvi. 8, xvii. 8). Its full name was probably En-tappuah (xvii. 7). It seems natural to look for it somewhere to the

S.W. of Nâbhus, in the neighbourhood of the *Wady Falak*.

Tappu'ah. One of the sons of Hebron, of the tribe of Judah (1 Chr. ii. 43). It is doubtless the same as BETH-TAPPUAH.

Tappu'ah, the land of. A district named in the specification of the boundary between Ephraim and Manasseh (Josh. xvii. 8). The name has not yet been met with at all in the central district of Palestine.

Ta'rah. A desert-station of the Israelites between Tabath and Mithkah (Num. xxxiii. 27).

Taralah. One of the towns in the allotment of Benjamin (Josh. xviii. 27).

Tare'a. The same as Tahrea, the son of Micah (1 Chr. viii. 35).

Tares. There can be little doubt that the ζῆνδα of the psalm (Matt. xiii. 25) denote the weed called "darnel" (*Lolium temulentum*). The word used by the Evangelist is an Oriental, and not a Greek term. The darnel before it comes into ear is very similar in appearance to wheat; hence the command that the *zizania* should be left to the harvest, lest while men plucked up the tares "they should root up also the wheat with them." Dr. Stanley, however, speaks of women and children picking up from the wheat in the corn-fields of Samaria the tall green stalks, still called by the Arabs *zucân*. "These stalks," he continues, "if sown designedly throughout the fields, would be inseparable from the wheat, from which, even when growing naturally and by chance, they are at first sight hardly distinguishable." The grain-growers in Palestine believe that the *zucân* is merely a degenerate wheat; that in wet seasons the wheat turns to tares.

Targums. [VERSIONS, CHALDEE.]

Tarpelites, the. A race of colonists who were planted in the cities of Samaria after the captivity of the northern kingdom of Israel (Ezr. iv. 9). They have not been identified with any certainty.

Tarshish. 1. Probably Tartessus. A city and emporium of the Phœnicians in the south of Spain. The etymology is uncertain. With three exceptions in the Book of Chronicles, the following are references to all the passages in the Old Testament, in which the word "Tarshish" occurs (Jon. i. 3, iv. 2; Gen. x. 4; 1 Chr. i. 7; Is. ii. 16, xxiii. 1, 6, 10, 14, lx. 9, lxvi. 19; Jer. x. 9; Ez. xxvii. 12, 25, xxxviii. 13; 1 K. x. 22, xxi. 48 [49]; Ps. xlviii. 8, lxxvii. 10). On a review of these passages, it will be seen that not one of them furnishes direct proof that Tarshish and Tartessus were the same cities. But their identity is rendered highly probable by the following circumstances. 1st. There is a very close similarity of name between them, Tartessus being merely Tarshish in the Aramaic form. 2ndly. There seems to have been a special relation between Tarshish and Tyre, as there was at one time between Tartessus and the Phœnicians. 3rdly. The articles which Tarshish is stated by the prophet Ezekiel (xvii. 12) to have supplied to Tyre, are precisely such as we know through classical writers to have been productions of the Spanish Peninsula. In regard to tin, the trade of Tarshish in this metal is peculiarly significant, and taken in conjunction with similarity of name and other circumstances already mentioned, is reasonably conclusive as to its identity with Tartessus. For even now the countries in Europe, or on the shores of the Mediterranean Sea where tin is found are very few; and in reference to ancient times, it

would be difficult to name any such countries except Iberia or Spain, Lusitania, which was somewhat less in extent than Portugal, and Cornwall in Great Britain. Now if the Phoenicians, for purposes of trade, really made coasting voyages on the Atlantic Ocean as far as to Great Britain, no emporium was more favourably situated for such voyages than Tartessus. Subsequently, when Tyre lost its independence, the relation between it and Tarshish was probably altered, and for a while, the exhortation of Isaiah xxiii. 10, may have been realised by the inhabitants passing through their land, free as a river. This independence of Tarshish, combined with the overshadowing growth of the Carthaginian power, would explain why in after times the learned Jews do not seem to have known where Tarshish was. Thus, although in the Septuagint translation of the Pentateuch, the Hebrew word was as closely followed as it could be in Greek, the Septuagint translators of Isaiah and Ezekiel translate the word by "Carthage" and "the Carthaginians" (Is. xxiii. 1, 10, 14; Ez. xxvii. 12, xxxviii. 13); and in the Targum of the Book of Kings and of Jeremiah, it is translated "Africa" (1 K. xvii. 48; Jer. x. 9). In one passage of the Septuagint (Is. ii. 16), and in others of the Targum, the word is translated *sea*; which receives apparently some countenance from Jerome, in a note on Is. ii. 16, wherein he states that the Hebrews believe that Tharsis is the name of the sea in their own language. And Josephus, misled, apparently, by the Septuagint translation of the Pentateuch, which he misinterpreted, regarded Tharsis as Tarsus in Cilicia. In the absence of positive proof, we may acquiesce in the statement of Strabo, that the river Baetis (now the Guadalquivir) was formerly called Tartessus, that the city Tartessus was situated between the two arms by which the river flowed into the sea, and that the adjoining country was called Tartessus. But there were two other cities which some deemed to have been Tartessus; one, Gadir, or Gadirra (Cadiz), and the other, Carteia, in the Bay of Gibraltar.—2. If the Book of Chronicles is to be followed, there would seem to have been a Tarshish, accessible from the Red Sea, in addition to the Tarshish of the south of Spain. Thus, with regard to the ships of Tarshish, which Jehoshaphat caused to be constructed at Ezion Geber on the Aelanitic Gulf of the Red Sea (1 K. xxii. 48), it is said in the Chronicles (2 Chr. xx. 36) that they were made to go to Tarshish; and in like manner the navy of ships which Solomon had previously made in Ezion Geber (1 K. ix. 26), is said in the Chronicles (2 Chr. ix. 21) to have gone to Tarshish with the servants of Hiram. It is not to be supposed that the author of these passages in the Chronicles contemplated a voyage to Tarshish in the south of Spain by going round what has since been called the Cape of Good Hope. The two alternatives from which selection should be made seem to be, 1st, That there were two emporia or districts called Tarshish, viz. one in the south of Spain, and one in the Indian Ocean; or, 2ndly, That the compiler of the Chronicles, misapprehending the expression "ships of Tarshish," supposed that they meant ships destined to go to Tarshish; whereas, although this was the original meaning, the words had come to signify large Phoenician ships, of a particular size and description, destined for long voyages, just as in English "East Indiaman" was a general name given to

vessels, some of which were not intended to go to India at all. The first alternative was adopted by Bochart. The second, which was first suggested by Vitringa, has been adopted by the acutest Biblical critics of our own time. This alternative is in itself by far the most probable, and ought not to occasion any surprise. Although, however, the point to which the fleet of Solomon and Hiram went once in three years did not bear the name of Tarshish, the question here arises of what that point was, however it was called? And the reasonable answer seems to be *India*, or the Indian Islands. This is shown by the nature of the imports with which the fleet returned, which are specified as "gold, silver, ivory, apes, and peacocks" (1 K. x. 22). The gold might possibly have been obtained from Africa, or from Ophir in Arabia, and the ivory and the apes might likewise have been imported from Africa; but the peacocks point conclusively, not to Africa, but to India. There are only two species known; both inhabit the continent and islands of India; so that the mention of the peacock seems to exclude the possibility of the voyage having been to Africa. The inference to be drawn from the importation of peacocks is confirmed by the Hebrew name for the ape and the peacock. Neither of these names is of Hebrew, or even Semitic, origin; and each points to India. Thus the Hebrew word for ape is *Kôph*, while the Sanscrit word is *kapi*. Again, the Hebrew word for peacock is *tukki*, which cannot be explained in Hebrew, but is akin to *tôku* in the Tamil language, in which it is likewise capable of explanation. It is only to be added, that there are not sufficient data for determining what were the ports in India or the Indian Islands which were reached by the fleet of Hiram and Solomon. Sir Emerson Tennent has made a suggestion of *Point de Galle*, in Ceylon. But however reasonable this suggestion may be, it can only be received as a pure conjecture.

Tarsus. The chief town of CILICIA, "no mean city" in other respects, but illustrious to all time as the birthplace and early residence of the Apostle Paul (Acts ix. 11, xxi. 39, xxii. 3). Even in the flourishing period of Greek history it was a city of some considerable consequence. After Alexander's conquests had swept this way, and the Seleucid kingdom was established at Antioch, Tarsus usually belonged to that kingdom, though for a time it was under the Ptolemies. In the Civil Wars of Rome it took Caesar's side, and on the occasion of a visit from him had its name changed to Julopolis. Augustus made it a "free city." It was renowned as a place of education under the early Roman emperors. Strabo compares it in this respect to Athens and Alexandria. Tarsus also was a place of much commerce. It was situated in a wild and fertile plain on the banks of the Cydnus. No ruins of any importance remain.

Tartak. One of the gods of the Avite, or Avvite, colonists of Samara (2 K. xvii. 31). According to Rabbinical tradition, Tartak is said to have been worshipped under the form of an ass. A Persian or Pehivi origin has been suggested for the name, according to which it signifies either "intense darkness," or "hero of darkness," or the underworld, and so perhaps some planet of ill-luck as Saturn or Mars.

Tartan, which occurs only in 2 K. xviii. 17, and Is. xx. 1, has been generally regarded as a proper name. Recent discoveries make it probable that in Tartan, as in Rabwaris and Rubshukh

we have not a proper name at all, but a title or official designation, like Pharaoh or Surenra. The Assyrian *Tartan* is a general, or commander-in-chief.

Tatnai, Satrap of the province west of the Euphrates in the time of Darius Hystaspis (Ezr. v. 3, 6, vi. 6, 13). The name is thought to be Persian.

Taverns, the three. [THREE TAVERNS.]

Taxes. I. Under the Judges, according to the theocratic government contemplated by the law, the only payments incumbent upon the people as of permanent obligation were the **TITHES**, the **FIRST FRUITS**, the **REDEMPTION-MONEY** of the first-born, and other offerings as belonging to special occasions. The payment by each Israelite of the half-shekel as "atonement-money," for the service of the tabernacle, on taking the census of the people (Ex. xxx. 13), does not appear to have had the character of a recurring tax, but to have been supplementary to the free-will-offerings of Ex. xxv. 1-7, levied for the one purpose of the construction of the sacred tent. In later times, indeed, after the return from Babylon, there was an annual payment for maintaining the fabric and services of the Temple; but the fact that this begins by the voluntary compact to pay one-third of a shekel (Neh. x. 32) shows that till then there was no such payment recognised as necessary. A little later the third became a half, and under the name of the *didrachma* (Matt. xvii. 24) was paid by every Jew, in whatever part of the world he might be living.—II. The kingdom, with its centralised government and greater magnificence, involved, of course, a larger expenditure, and therefore a heavier taxation. The chief burdens appear to have been: (1) A tithe of the produce both of the soil and of live stock (1 Sam. viii. 15, 17). (2) Forced military service for a month every year (1 Sam. viii. 12; 1 K. ix. 22; 1 Chr. xxvii. 1). (3) Gifts to the king (1 Sam. x. 27, xvi. 20, xvii. 18). (4) Import duties (1 K. x. 15). (5) The monopoly of certain branches of commerce (1 K. ix. 28, xxii. 48, x. 28, 29). (6) The appropriation to the king's use of the early crop of hay (Am. vii. 1). At times, too, in the history of both the kingdoms there were special burdens. A tribute of 50 shekels a head had to be paid by Menahem to the Assyrian king (2 K. xv. 20), and under his successor Hoshea this assumed the form of an annual tribute (2 K. xvii. 4).—III. Under the Persian empire, the taxes paid by the Jews were, in their broad outlines, the same in kind as those of other subject races. The financial system which gained for Darius Hystaspis the name of the "shopkeeper king" involved the payment by each satrap of a fixed sum as the tribute due from his province. In Judaea, as in other provinces, the inhabitants had to provide in kind for the maintenance of the governor's household, besides a money-payment of 40 shekels a day (Neh. v. 14, 15). In Ezr. iv. 13, 20, vii. 24, we get a formal enumeration of the three great branches of the revenue. The influence of Ezra secured for the whole ecclesiastical order, from the priests down to the Nethinim, an immunity from all three (Ezr. vii. 24); but the burden pressed heavily on the great body of the people.—IV. Under the Egyptian and Syrian kings the taxes paid by the Jews became yet heavier. The "farming" system of finance was adopted in its worst form. The taxes were put up to auction. The

contract sum for those of Phoenicia, Judaea, Samaria, had been estimated at about 8000 talents. An unscrupulous adventurer would bid double that sum, and would then go down to the province, and by violence and cruelty, like that of Turkish or Hindoo collectors, squeeze out a large margin of profit for himself.—V. The pressure of Roman taxation, if not absolutely heavier, was probably more galling, as being more thorough and systematic, more distinctively a mark of bondage. The capture of Jerusalem by Pompey was followed immediately by the imposition of a tribute, and within a short time the sum thus taken from the resources of the country amounted to 10,000 talents. When Judaea became formally a Roman province, the whole financial system of the Empire came as a natural consequence. The taxes were systematically farmed, and the publicans appeared as a new curse to the country. The *Portoria* were levied at harbours, piers, and the gates of cities (Matt. xvii. 24; Rom. xiii. 7). In addition to this there was the poll-tax paid by every Jew, and looked upon, for that reason, as the special badge of servitude. United with this, as part of the same system, there was also, in all probability, a property-tax of some kind. In addition to these general taxes, the inhabitants of Jerusalem were subject to a special house-duty about this period.

Taxing. I. The English word conveys to us more distinctly the notion of a tax or tribute, actually levied, but it appears to have been used in the 16th century for the simple assessment of a subsidy upon the property of a given county, or the registration of the people for the purpose of a poll-tax. The word *ἀπογραφὴ* by itself leaves the question whether the returns made were of population or property undetermined. In either case "Census" would have seemed the most natural Latin equivalent.—II. Two distinct registrations, or taxings, are mentioned in the N. T., both of them by St. Luke. The first is said to have been the result of an edict of the emperor Augustus, that "all the world (i. e. the Roman empire) should be taxed" (Luke ii. 1), and is connected by the Evangelist with the name of Cyrenus, or Quirinus. The second, and more important (Acts v. 37), is distinctly associated, in point of time, with the revolt of Judas of Galilee. The account of Josephus brings together the two names which St. Luke keeps distinct, with an interval of several years between them.—III. There are, however, some other questions connected with the statement of Luke ii. 1-3, which call for some notice. (1.) The truth of the statement has been questioned by Strauss and De Wette, and others, on the ground that neither Josephus nor any other contemporary writer mentions a census extending over the whole empire at this period (A.U.C. 750). (2.) Palestine, it is urged further, was, at this time, an independent kingdom under Herod, and therefore would not have come under the operation of an imperial edict. (3.) If such a measure, involving the recognition of Roman sovereignty, had been attempted under Herod, it would have roused the same resistance as the undisputed census under Quirinus did at a later period. (4.) The statement of St. Luke that "all went to be taxed, every one into his own city," is said to be inconsistent with the rules of the Roman census, which took cognizance of the place of residence only, not of the place of birth. (5.) Neither in the Jewish nor the Roman census would it have been necessary for the wife to,

travel with her husband in order to appear personally before the registrar. (i.) But it must be remembered that our history of this portion of the reign of Augustus is defective. Tacitus begins his *Annals* with the emperor's death. Suetonius is gossiping, inaccurate, and ill-arranged. Dion Cassius leaves a gap from A.U.C. 748 to 756, with hardly any incidents. Josephus does not profess to give a history of the empire. It might easily be that a general census, circ. A.U.C. 749-750, should remain unrecorded by them. There is, however, some evidence, more or less circumstantial, in confirmation of St. Luke's statement. (1.) The inference drawn from the silence of historians may be legitimately met by an inference drawn from the silence of objectors. It never occurred to Celsus, or Lucian, or Porphyry, questioning all that they could in the Gospel history, to question this. (2.) A remarkable passage in Suidas mentions a census, agreeing in some respects, with that of St. Luke. (3.) Tertullian appeals to the returns of the census for Syria under Sentius Saturninus as accessible to all who cared to search them, and proving the birth of Jesus in the city of David. (4.) Gieswell has pointed to some circumstances mentioned by Josephus in the last year of Herod's life, which imply some special action of the Roman government in Syria, the nature of which the historian carelessly or deliberately suppresses. (ii.) The second objection admits of a satisfactory answer. The statistical document already referred to included subject-kingdoms and allies, no less than the provinces. If Augustus had any desire to know the resources of Judaea, the position of Herod made him neither willing nor able to resist. (iii.) We need not wonder that the measure should have been carried into effect without any popular outbreak. It was a return of the population only, not a valuation of property; there was no immediate taxation as the consequence. (iv.) The alleged inconsistency of what St. Luke narrates is precisely what might be expected under the known circumstances of the case. The census, though Roman in origin, was effected by Jewish instrumentality, and in harmony therefore with Jewish customs. (v.) The last objection as to the presence of the Virgin, where neither Jewish nor Roman practice would have required it, is perhaps the most frivolous and vexatious of all. If Mary were herself of the house and lineage of David, there may have been special reasons for her appearance at Bethlehem. In any case the Scripture narrative is consistent with itself.

Te'bah. Eldest of the sons of Nahor, by his concubine Remmah (Gen. xxii. 24).

Tebali'ah. Third son of Hosah of the children of Merari (1 Chr. xxvi. 11).

Teb'eth. [MONTH.]

Tehin'nah. The father or founder of Ir-Nahash, the city of Nahash, and son of Eshton (1 Chr. iv. 12).

Tell-tree. [OAK.]

Teko'a and Teko'ah, a town in the tribe of Judah (2 Chr. xi. 6), on the range of hills which rise near Hebron, and stretch eastward towards the Dead Sea. Jerome says that Tekoa was six Roman miles from Bethlehem, and that as he wrote he had that village daily before his eyes. In his *Onomasticon* he represents Tekoa as nine miles only from Jerusalem; but elsewhere he agrees with Eusebius in making the distance twelve miles. It is not enumerated in the Hebrew catalogue of towns in Judah (Josh. xiv. 49), but is inserted in that passage

of the Septuagint. The "wise woman" whom Joab employed to effect a reconciliation between David and Absalom was obtained from this place (2 Sam. xiv. 2). Here also, Ira, the son of Ikkes, one of David's thirty, "the mighty men," was born, and was called on that account "the Tekoite" (2 Sam. xxi. 28). It was one of the places which Rehoboam fortified, at the beginning of his reign, as a defence against invasion from the south (2 Chr. xi. 6). Some of the people from Tekoa took part in building the walls of Jerusalem, after the return from the Captivity (Neh. iii. 5, 27). In Jer. vi. 1, the prophet exclaims, "Blow the trumpet in Tekoa and set up a sign of fire in Beth-Haccerem." But Tekoa is chiefly memorable as the birthplace of the prophet Amos (Amos vii. 14). Tekoa is known still as *Tekk'a*, and, though it lies somewhat aside from the ordinary route, has been visited and described by several recent travellers. Its distance from *Beit Lahm* agrees precisely with that assigned by the early writers as the distance between Tekoa and Bethlehem. It is within sight also of the "Frank Mountain," beyond question the famous Herodium, or site of Herod's Castle, which Josephus represents as near the ancient Tekoa. It lies on an elevated hill, which spreads itself out into an irregular plain of moderate extent. Various ruins exist at Tekoa, such as the walls of houses, cisterns, broken columns, and heaps of building-stones. Some of these stones have the so-called "bevelled" edges which are supposed to show a Hebrew origin. Near *Tekk'a*, among the same mountains, on the brink of a frightful precipice, are the ruins of *Khureitan*, possibly a corruption of Kerioth (Josh. xv. 25), and in that case perhaps the birthplace of Judas the traitor, who was thence called Iscariot, i. e. "man of Kerioth." High up from the bottom of the ravine is an opening in the face of the rocks which leads into an immense subterranean labyrinth, which many suppose may have been the Cave of Adullam. One of the gates of Jerusalem in Christian times seems to have borne the name of Tekoa.

Teko'a. A name occurring in the genealogies of Judah (1 Chr. ii. 24, iv. 5), as the son of Ashur. There is little doubt that the town of Tekoa is meant.

Teko'ite, the. IRA ben-Ikkes, one of David's warriors, is thus designated (2 Sam. xxiii. 26; 1 Chr. xi. 28, xxvii. 9). The common people among the TEKOITES displayed great activity in the repairs of the wall of Jerusalem under Nehemiah (Neh. iii. 5, 27).

Tel-a'bib was probably a city of Chaldaea or Babylonia, not of Upper Mesopotamia, as generally imagined (Ez. iii. 15). The whole scene of Ezekiel's preaching and visions seems to have been Chaldaea Proper; and the river Chebar, as already observed, was not the *Khabour*, but a branch of the Euphrates.

Telah. A descendant of Ephraim, and ancestor of Joshua (1 Chr. vii. 25).

Tel'aim. The place at which Saul collected and smothered his forces before his attack on Ainalak (1 Sam. xv. 4, only). It may be identical with TELEM. On the other hand the reading of the LXX. in 1 Sam. xv. 4—viz. Gilgal, is remarkable; and is almost sufficient to induce the belief that in this case the LXX. and Josephus have preserved the right name, and that instead of Telaim we should, with them, read Gilgal. The Targum renders it "lamps of the Passover," according to a curious fancy, mentioned elsewhere in the Jewish books,

that the army met at the Passover, and that the census was taken by counting the lambs.

Telasar is mentioned in 2 K. xix. 12, and in Is. xxxvii. 12 as a city inhabited by "the children of Eden," which had been conquered, and was held in the time of Sennacherib by the Assyrians. In both it is connected with Gozan (Gauzanitis), Haran (Carrhae, now *Harran*), and Rezephe (the *Razappa* of the Assyrian Inscriptions), all of which belong to the hill country above the Upper Mesopotamian plain. Telassar, the chief city of a tribe known as the *Beni Eden*, must have been in Western Mesopotamia, in the neighbourhood of Harran and Orfa.

Tel'em. One of the cities in the extreme south of Judah (Josh. xv. 24). It occurs between Ziph and Bealoth; but has not been identified. The name *Dhullan* is found in Van de Velde's map, attached to a district immediately to the north of the *Kubbet el-Bad*, south of *el Milh* and *Ar'arah*—a position very suitable.

Tel'em. A porter or doorkeeper of the Temple in the time of Ezra (Ezr. x. 24). He is probably the same as TALMON in Neh. xii. 25.

Tel-Har'sa, or **Tel-Har'saha**, one of the Babylonian towns, or villages, mentioned in Ezr. ii. 59; Neh. vii. 61. It was probably in the low country near the sea, in the neighbourhood of Tel-Melah and Cherub; but we cannot identify it with any known site.

Tel-Melah is joined with Tel Harsa and Cherub in the two passages already cited under TEL-HARSA. It is perhaps the Thelme of Ptolemy (v. 20).

Tema. The ninth son of Ishmael (Gen. xxv. 15; 1 Chr. i. 30); whence the tribe called after him, mentioned in Job vi. 19; Jer. xxv. 23, and also the land occupied by this tribe (Is. xxi. 13, 14). The name is identified satisfactorily with Teyma, a small town on the confines of Syria, between it and Wadi-l-Kura, on the road of the Damascus pilgrim-caravan. It is in the neighbourhood of Dumat-el-Jendel, which agrees etymologically and by tradition with the Ishmaelite DUMAH, and the country of Keydû, or KEDAR.

Teman. 1. A son of Eliphaz, son of Esau by Adah (Gen. xxxvi. 11, 15, 42; 1 Chr. i. 36, 53).—

2. A country, and probably a city, named after the Edomite phylarch, or from which the phylarch took his name. The Hebrew signifies "south," &c. (see Job ix. 9; Is. xliii. 6); and it is probable that the land of Teman was a southern portion of the land of Edom, or, in a wider sense, that of the sons of the East, the Beni-kedem. Teman is mentioned in five places by the Prophets, in four of which it is connected with Edom, and in two with Dedan (Jer. xlix. 7, 8; Ez. xxv. 13). In common with most Edomite names, Teman appears to have been lost. Eusebius and Jerome mention Teman as a town in their day distant 15 miles from Petra, and a Roman post. The identification of the existing Mann with this Teman may be geographically correct, but it cannot rest on etymological grounds. The gentile noun of Teman is *témânî* (Job ii. 11, xxii. 1), and Eliphaz the Temanite was one of the wise men of Edom. The gen. n. occurs also in Gen. xxxvi. 34, where the land of Temani is mentioned.

Temani. [TEMAN.]

Temanite. [TEMAN.]

Temeni. Son of Ashur, the father of Tekoa, by his wife Naarah (1 Chr. iv. 6).

Temple. There is perhaps no building of the ancient world which has excited so much attention

since the time of its destruction as the Temple which Solomon built at Jerusalem, and its successor as rebuilt by Herod. Its spoils were considered worthy of forming the principal illustration of one of the most beautiful of Roman triumphal arches, and Justinian's highest architectural ambition was that he might surpass it. Throughout the middle ages it influenced to a considerable degree the forms of Christian churches, and its peculiarities were the watchwords and rallying-points of all associations of builders. When the French expedition to Egypt, in the first years of this century, had made the world familiar with the wonderful architectural remains of that country, every one jumped to the conclusion that Solomon's Temple must have been designed after an Egyptian model. The Assyrian discoveries of Botta and Layard have within the last twenty years given an entirely new direction to the researches of the restorers. Unfortunately, however, no Assyrian temple has yet been exhumed of a nature to throw much light on this subject, and we are still forced to have recourse to the later buildings at Persepolis, or to general deductions from the style of the nearly contemporary secular buildings at Nineveh and elsewhere, for such illustrations as are available. Before proceeding, however, to investigate the arrangements of the Temple, it is indispensable first carefully to determine those of the Tabernacle which Moses caused to be erected in the Desert of Sinai immediately after the promulgation of the Law from that mountain.

TABERNACLE.—The written authorities for the restoration of the Tabernacle are, first, the detailed account to be found in the 26th chapter of Exodus, and repeated in the 36th, verses 8 to 38, without any variation beyond the slightest possible abridgement. Secondly, the account given of the building by Josephus (*Ant.* iii. 6), which is so nearly a repetition of the account found in the Bible that we may feel assured that he had no really important authority before him except the one which is equally accessible to us. The additional indications contained in the Talmud and in Philo are so few and indistinct, that they practically add nothing to our knowledge. **Outer Enclosure.**—The court of the Tabernacle was surrounded by canvas screens. Those of the Tabernacle were 5 cubits in height, and supported by pillars of brass 5 cubits apart, to which the curtains were attached by hooks and fillets of silver (Ex. xxvii. 9, &c.). This enclosure was only broken on the eastern side by the entrance, which was 20 cubits wide, and closed by curtains of fine twined linen wrought with needlework, and of the most gorgeous colours. The space enclosed within these screens was a double square, 50 cubits, or 75 feet north and south, and 100 cubits or 150 ft. east and west. In the outer or eastern half was placed the altar of burnt-offerings, described in Ex. xxvii. 1-8, and between it and the Tabernacle the laver, at which the priests washed their hands and feet on entering the Temple. In the square towards the west was situated the Temple or Tabernacle itself. The dimensions in plan of this structure are easily ascertained. Josephus states them as 30 cubits long by 10 broad, or 45 feet by 15, and the Bible is scarcely less distinct, as it says that the north and south walls were each composed of twenty upright boards (Ex. xxvi. 15, &c.), each board one cubit and a half in width, and at the west end there were six boards equal to 9 cubits, which, with the angle boards or posts, made up the

10 cubits of Josephus. Each of these boards was furnished with two tenons at its lower extremity, which fitted into silver sockets placed on the ground. At the top at least they were jointed and fastened together by bars of shittim or acacia wood run through rings of gold (Ex. xxvi. 26).

Plan of the Outer Court of the Tabernacle.

Both authorities agree that there were five bars for each side, but a little difficulty arises from the Bible describing (ver. 28) a middle bar which reached from end to end. As we shall presently see, this bar was probably applied to a totally different purpose, and we may therefore assume for the present that Josephus' description of the mode in which they were applied is the correct one:—"Every one," he says (*Ant.* iii. 6, §3), "of the pillars or boards had a ring of gold affixed to its front outwards, into which were inserted bars gilt with gold, each of them 5 cubits long, and these bound together the boards; the head of one bar running into another after the manner of one tenon inserted into another. But for the wall behind there was only one bar that went through all the boards, into which one of the ends of the bars on both sides was inserted." So far, therefore, everything seems certain and easily understood. The Tabernacle was an oblong rectangular structure,

30 cubits long by 10 broad, open at the eastern end, and divided internally into two apartments. The Holy of Holies, into which no one entered—not even the High-priest, except on very extraordinary occasions—was a cube, 10 cubits square in plan, and 10 cubits high to the top of the wall. In this was placed the Mercy-seat, surmounted by the cherutim, and on it was placed the Ark containing the tables of the Law. In front of these was an outer chamber, called the Holy Place—20 cubits long by 10 broad, and 10 high, appropriated to the use of the priests. In it were placed the golden candlestick on one side, the table of shew-bread opposite, and between them in the centre the altar of incense. The roof of the Tabernacle was formed by 3, or rather 4, sets of curtains, the dimensions of two of which are given with great minuteness both in the Bible and by Josephus. The innermost (Ex. xxvi. 1, &c.), of fine twined linen according to our translation (Josephus calls them wool), were ten in number, each 4 cubits wide and 28 cubits long. These were of various colours, and ornamented with cherubim of "cunning work." Five of these were sewn together so as to form larger curtains, each 20 cubits by 28, and these two again were joined together, when used, by fifty gold buckles or clasps. Above these were placed curtains of goats' hair, each 4 cubits wide by 30 cubits long, but eleven in number; these were also sewn together, six into one curtain, and five into the other, and, when used, were likewise joined together by fifty gold buckles. Over these again was thrown a curtain of rams' skins with the wool on, dyed red, and a fourth covering is also specified as being of badgers' skins, so named in the A. V., but which probably really consisted of seal-skins. This did not of course cover the rams' skins, but most probably was only used as a coping or ridge piece to protect the junction of the two curtains of rams' skins which were laid on each slope of the roof, and probably only laced together at the top. The question which has hitherto proved a stumblingblock to restorers is, to know how these curtains were applied as a covering to the Tabernacle. The solution of the difficulty appears singularly obvious. It is simply, that the tent had a ridge, as all tents have had from the days of Moses down to the present day; and we have also very little difficulty in predicating that the angle formed by the two sides of the roof at the ridge was a right angle—not because it is a reasonable and usual angle for such a roof, and one that would most likely be adopted in so regular a building, but because its adoption reduces to harmony the only abnormal measurement in the whole building. It is now easy to explain all the other diffi-

Diagram of the Dimensions of the Tabernacle in Section.

South-East View of the Tabernacle as restored

culties which have met previous restorers. First. The Holy of Holies was divided from the Holy Place by a screen of four pillars supporting curtains which no one was allowed to pass. But, strange to say, in the entrance there were five pillars in a similar space. Now, no one would put a pillar in the centre of an entrance without a motive; but the moment a ridge is assumed it becomes indispensable. It may be assumed that all the five pillars were spaced within the limits of the 10 cubits of the breadth of the Tabernacle, viz. one in the centre, two opposite the two ends of the walls, and the other two between them; but the probabilities are so infinitely greater that those two last were beyond those at the angles of the tent, that it is hardly worth while considering the first hypothesis. By the one here adopted the pillars in front would, like everything else, be spaced exactly 5 cubits apart. Secondly. Josephus twice asserts that the Tabernacle was divided into three parts, though he specifies only two—the Adytum and the Pronaos. The third was of course the porch, 5 cubits deep, which stretched across the width of the house. Thirdly. In speaking of the western end, the Bible always uses the plural, as if there were two sides there. There was, of course, at least one pillar in the centre beyond the wall,—there may have been five,—so that there practically were two sides there. Fourthly. We now understand why there are 10 breadths in the under curtains and 11 in the upper. It was that they might break joint—in other words, that the seam of the one, and especially the great joining of the two divisions, might be over the centre of the lower curtain, so as to prevent the rain penetrating through the joints. It may also be remarked that, as the two cubits which were in excess at the west hung at an angle, the depth of fringe would be practically about the same as on the sides.

SOLOMON'S TEMPLE.—It was David who first proposed to replace the Tabernacle by a more permanent building, but was forbidden for the reasons assigned by the prophet Nathan (2 Sam. vii. 5, &c.), and though he collected materials and made arrangements, the execution of the task was left for his son Solomon. He, with the assistance of Hiram

king of Tyre, commenced this great undertaking in the fourth year of his reign, and completed it in seven years, about 1005 B.C. according to the received chronology. On comparing the Temple, as described in 1 Kings vi. and 2 Chronicles ii. and by Josephus vii. 3, with the Tabernacle, as just explained, the first thing that strikes us is that all the arrangements were identical, and the dimensions of every part exactly double those of the preceding

Plan of Solomon's Temple, showing the disposition of the chambers in two stories.

structure. Thus the Holy of Holies in the Tabernacle was a cube, 10 cubits each way; in the Temple it was 20 cubits. The Holy Place or outer hall was 10 cubits wide by 20 long and 10 high in the Tabernacle. In the Temple all these dimensions were exactly double. The porch in the Tabernacle was 5 cubits deep, in the Temple 10; its width in both instances being the width of the house. The chambers round the House and the

Tabernacle were each 5 cubits wide on the ground-floor, the difference being that in the Temple the two walls taken together made up a thickness of 5 cubits, thus making 10 cubits for the chambers. Taking all these parts together, the ground-plan of the Temple measured 80 cubits by 40; that of the Tabernacle was 40 by 20; and what is more striking than even this, is that though the walls were 10 cubits high in the one and 20 cubits in the other, the whole height of the Tabernacle was 15, that of the Temple 30 cubits; the one roof rising 5, the other 10 cubits above the height of the internal walls. So far as the dimensions above quoted are concerned, everything is as clear and as certain as anything that can be predicated of any building of which no remains exist; but beyond this there are certain minor problems by no means so easy to resolve, but fortunately they are of much less importance. The first is the *Height*.—That given in 1 K. vi. 2—of 30 cubits—is so reasonable in proportion to the other dimensions, that the matter might be allowed to rest there were it not for the assertion (2 Chr. iii. 4) that the height, though apparently only of the porch, was 120 cubits=180 feet. Both Josephus and the Talmud persistently assert that there was a superstructure on the Temple equal in height to the lower part, and the total height they, in accordance with the Book of Chronicles, call 120 cubits or 180 feet. In looking through the monuments of antiquity for something to suggest what this might be, the only thing that occurs is the platform or Talar that existed on the roofs of the Palace Temples at Persepolis. *Jachin and Boaz*.—There are no features connected with the Temple of Solomon which have given rise to so much controversy, or been so difficult to explain, as the form of the two pillars of brass which were set up in the porch of the house. It has even been supposed that they were not pillars in the ordinary sense of the term, but obelisks; for this, however, there does not appear to be any authority. According to 1 K. vii. 15 *et seq.*, the pillars were 18 cubits high and 12 in circumference, with capitals five cubits in height. Above this was (ver. 19) another member, called also chapter of lily-work, four cubits in height, but which from the second

mention of it in ver. 22 seems more probably to have been an entablature, which is necessary to complete the order. As these members make out 27 cubits, leaving 3 cubits or 4½ feet for the slope of the roof, the whole design seems reasonable and proper. If this conjecture is correct, we have no great difficulty in suggesting that the lily-work must have been something like the Persepolitan cornice, which is probably nearer in style to that of the buildings at Jerusalem than anything else we know of. *Internal Supports*.—The existence of these two pillars in the porch suggests an inquiry which has hitherto been entirely overlooked: Were there any pillars in the interior of the Temple? If they were introduced at all, there must have been four in the sanctuary and ten in the hall, not necessarily equally spaced, in a transverse direction, but probably standing 6 cubits from the walls, leaving a centre aisle of 8 cubits. The question, in fact, is very much the same that met us in discussing the construction of the Tabernacle. No internal supports to the roofs of either of these buildings are mentioned anywhere. But the difficulties of construction without them would have been so enormous, and their introduction so usual and so entirely unobjectionable, that we can hardly understand their not being employed. *Chambers*.—The only other feature which remains to be noticed is the application of three tiers of small chambers to the walls of the Temple externally on all sides, except that of the entrance. Though not expressly so stated, these were a sort of monastery, appropriated to the residence of the priests who were either permanently or in turn devoted to the service of the Temple. The lowest story was only 5 cubits in width, the next 6, and the upper 7, allowing an offset of 1 cubit on the side of the Temple, or of 3 inches on each side, on which the flooring joists rested, so as not to cut into the walls of the Temple. It is, again, only at Persepolis that we find anything at all analogous to this; in the Palace of Darius we find a similar range on either hand. *Outer Court*.—The enclosure of the Temple consisted, according to the Bible (1 K. vi. 36), of a low wall of three courses of stones and a row of cedar beams, both probably highly ornamented. As it is more than probable that the same duplication of dimensions took place in this as in all the other features of the Tabernacle, we may safely assume that it was 10 cubits, or 15 feet, in height, and almost certainly 100 cubits north and south, and 200 east and west. There is no mention in the Bible of any porticoes or gateways or any architectural ornaments of this enclosure.

TEMPLE OF ZERUBBABEL.—We have very few particulars regarding the Temple which the Jews erected after their return from the Captivity (cir. 520 B.C.), and no description that would enable us to realize its appearance. But there are some dimensions given in the Bible and elsewhere which are extremely interesting as affording points of comparison between it and the Temples which preceded it, or were erected after it. The first and most authentic are those given in the Book of Ezra (vi. 3), when quoting the decree of Cyrus, wherein it is said, "Let the house be builded, the place where they offered sacrifices, and let the foundations thereof be strongly laid; the height thereof threescore cubits, and the breadth thereof threescore cubits, with three rows of great stones and a row of new timber." Josephus quotes this passage almost liter-

Cornice of lily-work at Persepolis.

ally, but in doing so enables us with certainty to translate the word here called *Row* as "Story,"—as indeed the sense would lead us to infer. The other dimensions of 60 cubits in breadth, is 20 cubits in excess of that of Solomon's Temple, but there is no reason to doubt its correctness, for we find both from Josephus and the Talmud that it was the dimension adopted for the Temple when rebuilt, or rather repaired by Herod. We are left therefore with the alternative of assuming that the porch and the chambers all round were 20 cubits in width, including the thickness of the walls, instead of 10 cubits, as in the earlier building. This alteration in the width of the Pteromata made the Temple 100 cubits in length by 60 in breadth, with a height, it is said, of 60 cubits, including the upper room or Talar, though we cannot help suspecting that this last dimension is somewhat in excess of the truth. The only other description of this Temple is found in Hecataeus the Abderite, who wrote shortly after the death of Alexander the Great. As quoted by Josephus, he says, that "In Jerusalem towards the middle of the city is a stone walled enclosure about 500 feet in length, and 100 cubits in width, with double gates," in which he describes the Temple as being situated. Hecataeus also mentions that the altar was 20 cubits square and 10 high. And although he mentions the Temple itself, he unfortunately does not supply us with any dimensions. From these dimensions we gather, that if "the Priests and Levites and Elders of families were disconsolate at seeing how much more sumptuous the old Temple was than the one which on account of their poverty they had just been able to erect" (Ezr. iii. 12); it certainly was not because it was smaller, as almost every dimension had been increased one-third. In speaking of these Temples we must always bear in mind that their dimensions

were practically very far inferior to those of the Heathen. Even that of Ezra is not larger than an average parish church of the last century—Solomon's was smaller. It was the lavish display of the precious metals, the elaboration of carved ornament, and the beauty of the textile fabrics, which made up their splendour and rendered them so precious in the eyes of the people.

TEMPLE OF EZEKIEL.—The vision of a Temple which the prophet Ezekiel saw while residing on the banks of the Chebar in Babylonia in the 25th year of the Captivity, does not add much to our knowledge of the subject. It is not a description of a Temple that ever was built or ever could be erected at Jerusalem, and can consequently only be considered as the *beau idéal* of what a Shemitic Temple ought to be. Notwithstanding its ideal character, the whole is extremely curious, as showing what were the aspirations of the Jews in this direction, and how different they were from those of other nations; and it is interesting here, inasmuch as there can be little doubt but that the arrangements of Herod's Temple were in a great measure influenced by the description here given.

TEMPLE OF HEROD.—For our knowledge of the last and greatest of the Jewish Temples we are indebted almost wholly to the works of Josephus, with an occasional hint from the Talmud. The Bible unfortunately contains nothing to assist the researches of the antiquary in this respect. The Temple or naos itself was in dimensions and arrangement very similar to that of Solomon, or rather that of Zerubbabel—more like the latter; but this was surrounded by an inner enclosure of great strength and magnificence, measuring as nearly as can be made out 180 cubits by 240, and adorned by porches and ten gateways of great magnificence; and beyond this again was an outer enclosure mea-

Temple of Herod restored. Scale of 200 feet to 1 inch.

suring externally 400 cubits each way. It has already been pointed out [JERUSALEM] that the Temple was certainly situated in the S.W. angle of the area now known as the Haram area at Jerusalem, and it is hardly necessary to repeat here the arguments there adduced to prove that its dimensions were what Josephus states them to be, 400 cubits, or one stadium, each way. What Herod did apparently was to take in the whole space between the Temple and the city wall on its eastern side, and to add a considerable space on the north and south to support the porticoes which he added there. As the Temple terrace thus became the principal defence of the city on the east side, there were no gates or openings in that direction. The north side, too, where not covered by the fortress Antonia, became part of the defences of the city, and was likewise without external gates. On the south side, which was enclosed by the wall of Ophel, there were double gates nearly in the centre. These gates still exist at a distance of about 365 feet from the south-western angle, and are perhaps the only architectural features of the Temple of Herod which remain *in situ*. This entrance consists of a double archway of Cyclopean architecture on the level of the ground, opening into a square vestibule measuring 40 feet each way. From this a double tunnel, nearly 200 feet in length, leads to a flight of steps which rise to the surface in the court of the Temple, exactly at that gateway of the inner Temple which led to the altar, and is the one of the four gateways on this side by which any one arriving from Ophel would naturally wish to enter the inner enclosure, placed a little more to the eastward than the exact centre of the enclosure, where naturally we should otherwise have looked for it. We learn from the Talmud, that the gate of the inner Temple to which this passage led was called the "Water Gate;" and it is interesting to be able to identify a spot so prominent in the description of Nehemiah (xii. 37). Towards the west there were four gateways to the external enclosure of the Temple, and the positions of three of these can still be traced with certainty. The first or most southern led over the bridge the remains of which were identified by Dr. Robinson, and joined the Stoa Basilica of the Temple with the royal palace. The second was that discovered by Dr. Barclay, 270 feet from the S.W. angle, at a level of 17 feet below that of the southern gates just described. The site of the third is so completely covered by the buildings of the Meckme that it has not yet been seen, but it will be found between 200 and 250 feet from the N.W. angle of the Temple area. The fourth was that which led over the causeway which still exists at a distance of 600 feet from the south-western angle. *Cloisters.*—The most magnificent part of the Temple, in an architectural point of view, seems certainly to have been the cloisters which were added to the outer court when it was enlarged by Herod. The cloisters in the west, north, and east side were composed of double rows of Corinthian columns, 25 cubits or 37 feet 6 inches in height with flat roofs, and resting against the outer wall of the Temple. These, however, were immeasurably surpassed in magnificence by the royal porch or Stoa Basilica which overhung the southern wall. This is so minutely described by Josephus, that there is no difficulty in understanding its arrangement or ascertaining its dimensions. It consisted of a nave and two aisles, that towards the Temple being open,

that towards the country closed by a wall. The breadth of the centre aisle was 45 feet; of the side aisles 30 from centre to centre of the pillars; their height 50 feet, and that of the centre aisle 100 feet. This magnificent structure was supported by 162 Corinthian columns. At a short distance from the front of these cloisters was a marble screen or enclosure, 3 cubits in height. Again, at a short distance within this was a flight of steps supporting the terrace or platform on which the Temple itself stood. The court of the Temple was very nearly a square. It may have been exactly so, for we have not all the details to enable us to feel quite certain about it. The *Middoth* says it was 187 cubits E. and W., and 137 N. and S. To the eastward of this was the court of the women, the dimensions of which are not given by Josephus, but are in the *Middoth*, as 137 cubits square—a dimension we may safely reject. If we assume that the enclosure of the court of the Gentiles, or the Chel, was nearly equidistant on all four sides from the cloisters, its dimension must have been about 37 or 40 cubits east and west, most probably the former. The great ornament of these inner courts seems to have been their gateways, the three especially on the north and south leading to the Temple court. These, according to Josephus, were of great height, strongly fortified and ornamented with great elaboration. But the wonder of all was the great eastern gate leading from the court of the women to the upper court. This seems to have been the pride of the Temple area. It was also in all probability the one called the "Beautiful Gate" in the New Testament. Immediately within this gateway stood the altar of burnt-offerings. Both the Altar and the Temple were enclosed by a low parapet one cubit in height. Within this last enclosure towards the westward stood the Temple itself. Its internal dimensions were the same as those of the Temple of Solomon. Although the internal dimensions remained the same, there seems no reason to doubt but that the whole plan was augmented by the Pteromata or surrounding parts being increased from 10 to 20 cubits, so that the third Temple like the second, measured 60 cubits across, and 100 cubits east and west. The width of the façade was also augmented by wings or shoulders projecting 20 cubits each way, making the whole breadth 100 cubits, or equal to the length. So far all seems certain, but when we come to the height, every measurement seems doubtful. Both Josephus and the Talmud seem delighted with the truly Jewish idea of a building which, without being a cube, was 100 cubits long, 100 broad, and 100 high. We cannot help suspecting that in this instance Josephus was guilty of systematically doubling the altitude of the building he was describing, as it can be proved he did in some other instances. But when we turn from actual measurement and try to realize its appearance or the details of its architecture, we launch into a sea of conjecture with very little indeed to guide us, at least in regard to the appearance of the Temple itself. Whatever may have been the case with the Temple of Solomon, it is nearly certain that the style of the second Temple must have been identical with that of the buildings we are so familiar with at Persepolis and Susa. The Jews were too closely connected with the Persians and Babylonians at this period to know of any other style, and in fact their Temple was built under the superintendence of the very parties

who were erecting the contemporary edifices at Persepolis and Susa.

Ten Commandments. (1.) The popular name in this, as in so many instances, is not that of Scripture. There we have the "ten words," not the Ten Commandments (Ex. xxxiv. 28; Deut. iv. 13 x. 4, Heb.). The difference is not altogether an unmeaning one. The word of God, the "word of the Lord," the constantly recurring term for the fullest revelation, was higher than any phrase expressing merely a command, and carried with it more the idea of a self-fulfilling power. Other names are even more significant. These, and these alone, are "the words of the covenant" (Ex. xxxiv. 28). They are also the Tables of Testimony, sometimes simply "the testimony" (Ex. xxv. 16, xxxi. 18, &c.) (2.) The circumstances in which the Ten great Words were first given to the people surrounded them with an awe which attached to no other precept. In the midst of the cloud, and the darkness, and the flashing lightning, and the fiery smoke, and the thunder, like the voice of a trumpet, Moses was called to receive the Law without which the people would cease to be a holy nation. Here, as elsewhere, Scripture unites two facts which men separate. God, and not man, was speaking to the Israelites in those terrors, and yet, in the language of later inspired teachers, other instrumentality was not excluded. No other words were proclaimed in like manner. And the record was as exceptional as the original revelation. Of no other words could it be said that they were written as these were written, engraved on the Tables of Stone, not as originating in man's contrivance or sagacity, but by the power of the Eternal Spirit, by the "finger of God" (Ex. xxxi. 18, xxxii. 16). (3.) The number Ten was, we can hardly doubt, itself significant to Moses and the Israelites. The received symbol, then and at all times, of completeness, it taught the people that the Law of Jehovah was perfect (Ps. xix. 7). The fact that they were written not on one, but on two tables, probably in two groups of five each, taught men the great division of duties towards God, and duties towards our neighbour, which we recognise as the groundwork of every true Moral system. It taught them also, five being the symbol of imperfection, how incomplete each set of duties would be when divorced from its companion. (4.) In what way the Ten Commandments were to be divided has, however, been a matter of much controversy. At least four distinct arrangements present themselves. (a.) In the received teaching of the Latin Church resting on that of St. Augustine the first Table contained three commandments, the second the other seven. It involved, however, and in part proceeded from an alteration in the received arrangement. What we know as the first and second were united, and consequently the Sabbath law appeared at the close of the First Table as the third, not as the fourth commandment. The completeness of the number was restored in the Second Table by making a separate (the ninth) command of the precept, "Thou shalt not covet thy neighbour's wife," which with us forms part of the tenth. (b.) The familiar division, referring the first four to our duty towards God, and the six remaining to our duty towards man, is, on ethical grounds, simple and natural enough. (c.) A modification of (a.) has been adopted by later Jewish writers. Retaining the combination of the first and second commandments of the common order,

they have made a new "word" of the opening declaration, "I am the Lord thy God, which brought thee out of the land of Egypt, out of the house of bondage," and so have avoided the necessity of the subdivision of the tenth. (d.) Rejecting these three, there remains that recognised by the older Jewish writers, Josephus and Philo, and supported ably and thoughtfully by Ewald, which places five commandments in each Table; and thus preserves the *pentad* and *decad* grouping which pervades the whole code. A modern jurist would perhaps object that this places the fifth commandment in a wrong position, that a duty to parents is a duty towards our neighbour. From the Jewish point of view, it is believed, the place thus given to that commandment was essentially the right one. Instead of duties towards God, and duties towards our neighbours, we must think of the First Table as containing all that belonged to the *Eὐσεβεία* of the Greeks, to the *Pietas* of the Romans, duties *i. e.* with no corresponding rights, while the Second deals with duties which involve rights, and come therefore under the head of *Justitia*. The duty of honouring, *i. e.* supporting, parents came under the former head. (5.) To these Ten Commandments we find in the Samaritan Pentateuch an eleventh added:—"But when the Lord thy God shall have brought thee into the land of Canaan, whither thou goest to possess it, thou shalt set thee up two great stones, and shalt plaister them with plaister, and shalt write upon these stones all the words of this Law. Moreover, after thou shalt have passed over Jordan, thou shalt set up those stones which I command thee this day, on Mount Gerizim, and thou shalt build there an altar to the Lord thy God, an altar of stones: thou shalt not lift up any iron thereon. Of unhewn stones shalt thou build that altar to the Lord thy God, and thou shalt offer on it burnt-offerings to the Lord thy God, and thou shalt sacrifice peace-offerings, and shalt eat them there, and thou shalt rejoice before the Lord thy God in that mountain beyond Jordan, by the way where the sun goeth down, in the land of the Canaanite that dwelleth in the plain country over against Gilgal, by the oak of Moreh, towards Sichem" (Walton, *Bibl. Polyglott.*). The interpolation has every mark of being a bold attempt to claim for the schismatic worship on Gerizim the solemn sanction of the voice on Sinai, to place it on the same footing as the Ten great Words of God. (6.) The treatment of the Ten Commandments in the Targum of Jonathan ben Uzziel is not without interest. There the first and second commandments are united, to make up the second, and the words "I am the Lord thy God," &c., are given as the first. More remarkable is the addition of a distinct reason for the last five commandments no less than for the first five. "Thou shalt commit no murder, for because of the sins of murderers the word goeth forth upon the world." (7.) The absence of any distinct reference to the Ten Commandments as such in the *Pirke Aboth* (=Maxims of the Fathers) is both strange and significant. With all their ostentation of profound reverence for the Law, the teaching of the Rabbis turned on other points than the great laws of duty.

Tent. Among the leading characteristics of the nomadic race, those two have always been numbered, whose origin has been ascribed to Jabal the son of Lamech (Gen. iv. 20), viz., to be tent-dwellers and keepers of cattle. The same may be

Arab Tent (Layard).

said of the forefathers of the Hebrew race; nor was it until the return into Canaan from Egypt that the Hebrews became inhabitants of cities. An Arab tent is minutely described by Burckhardt. It is called *beit*, "house;" its covering consists of stuff, about three-quarters of a yard broad, made of black goats'-hair (Cant. i. 5), laid parallel with the tent's length. This is sufficient to resist the heaviest rain. The tent-poles, called *amúd*, or columns, are usually nine in number, placed in three groups, but many tents have only one pole, others two or three. The ropes which hold the tent in its place are fastened, not to the tent-cover itself, but to loops consisting of a leathern thong tied to the ends of a stick, round which is twisted a piece of old cloth, which is itself sewed to the tent-cover. The ends of the tent-ropes are fastened to short sticks or pins, called *weed* or *acoutad*, which are driven into the ground, with a mallet (Judg. iv. 21). Round the back and sides of the tents runs a piece of stuff removable at pleasure to admit air. The tent is divided into two apartments, separated by a carpet partition drawn across the middle of the tent and fastened to the three middle posts. When the pasture near an encampment is exhausted, the tents are taken down, packed on camels and removed (Is. xxxviii. 12; Gen. xxvi. 17, 22, 25). In choosing places for encampment, Arabs prefer the neighbourhood of trees, for the sake of the shade and coolness which they afford (Gen. xviii. 4, 8).

Terah. The father of Abram, Nahor, and Haran, and through them the ancestor of the great families of the Israelites, Ishmaelites, Midianites, Moabites, and Ammonites (Gen. xi. 24-32). The account given of him in the O. T. narrative is very brief. We learn from it simply that he was an idolater (Josh. xxiv. 2), that he dwelt beyond the Euphrates in Ur of the Chaldees (Gen. xi. 28), and that in the south-westerly migration, which from some unexplained cause he undertook in his old age, he went with his son Abram, his daughter-in-law Sarai, and his grandson Lot, "to go into the

land of Canaan, and they came unto Haran, and dwelt there" (Gen. xi. 31). And finally, "the days of Terah were two hundred and five years: and Terah died in Haran" (Gen. xi. 32). From the simple facts of Terah's life recorded in the O. T. has been constructed the entire legend of Abram which is current in Jewish and Arabian traditions. Terah the idolater is turned into a maker of images, and "Ur of the Chaldees" is the original of the "furnace" into which Abram was cast (comp. Ez. v. 2). In the Jewish traditions Terah is a prince and a great man in the palace of Nimrod, the captain of his army, his son-in-law according to the Arabs. His wife is called in the Talmud Amtelai, or Emtelai, the daughter of Carnebo.

Teraphim, only in plural, images connected with magical rites. [MAGIC.] The derivation of the name is obscure. In one case a single statue seems to be intended by the plural (1 Sam. xix. 13, 16). The teraphim carried away from Laban by Rachel do not seem to have been very small; and the image hidden in David's bed by Michal to deceive Saul's messengers, was probably of the size of a man, and perhaps in the head and shoulders, if not lower, of human or like form. Laban regarded his teraphim as gods, and it would therefore appear that they were used by those who added corrupt practices to the patriarchal religion. Teraphim again are included among Micah's images (Judg. xvii. 3-5, xviii. 17, 18, 20). Teraphim were consulted for oracular answers by the Israelites (Zech. x. 2; comp. Judg. xviii. 5, 6; 1 Sam. xv. 22, 23, xix. 13, 16, LXX.; and 2 K. xxiii. 24), and by the Babylonians, in the case of Nebuchadnezzar (Ez. xxi. 19-22). There is no evidence that they were ever worshipped.

Ter'esh. One of the two eunuchs whose plot to assassinate Ahasuerus was discovered by Mordecai (Esth. ii. 21, vi. 2). He was hanged.

Ter'tius, probably a Roman, was the amanuensis of Paul in writing the Epistle to the Romans (Rom. xvi. 22). Some have proposed without reason to identify him with Silas. Nothing certain is known of him.

Tertullus, "a certain orator" (Acts xxiv. 1) who was retained by the High Priest and Sanhedrim to accuse the Apostle Paul at Caesarea before the Roman Procurator Antonius Felix. He evidently belonged to the class of professional orators. We may infer that Tertullus was of Roman, or at all events of Italian origin. The exordium of his speech is designed to conciliate the good will of the Procurator, and is accordingly overcharged with flattery. There is a strange contrast between the opening clause and the brief summary of the Procurator's administration given by Tacitus (*Hist.* v. 9). But the commendations of Tertullus were not altogether unfounded, as Felix had really succeeded in putting down several seditious movements. It is not very easy to determine whether St. Luke has preserved the oration of Tertullus entire. On the whole it seems most natural to conclude that the historian, who was almost certainly an ear-witness, merely gives an abstract of the speech, giving however in full the most salient points (ver. 5).

Testament, New. [NEW TESTAMENT.]

Testament, Old. [OLD TESTAMENT.]

Te'ta = HATTITA, 1 Esd. v. 28.

Tetrarch. Properly the sovereign or governor of the fourth part of a country. (1.) Herod Antipas (*Matt.* xiv. 1; *Luke* iii. 1, 19, ix. 7; *Acts* xiii. 1), who is commonly distinguished as "Herod the tetrarch," although the title of "king" is also assigned to him both by Matthew (xiv. 9) and by Mark (vi. 14, 22 sqq.). (2.) Herod Philip, who is said by Luke (iii. 1) to have been "tetrarch of Iturea, and of the region of Trachonitis." (3.) Lysanias, who is said (*Luke* iii. 1) to have been "tetrarch of Abilene." The title of tetrarch was at this time probably applied to petty tributary princes without any such determinate meaning. But it appears from Josephus that the tetrarchies of Antipas and Philip were regarded as constituting each a fourth part of their father's kingdom. We conclude that in these two cases, at least, the title was used in its strict and literal sense.

Thaddaeus, a name in Mark's catalogue of the twelve Apostles (*Mark* iii. 18). In the great majority of MSS. in Matthew's catalogue (*Matt.* x. 3) Lebbaeus is probably the original reading. From a comparison with the catalogue of St. Luke (*Luke* vi. 15; *Acts* i. 13) it seems scarcely possible to doubt that the three names of Judas, Lebbaeus, and Thaddaeus were borne by one and the same person.

Tha'hash. Son of Nahor by his concubine Reumah (*Gen.* xxii. 24).

Tha'mah. "The children of Thamah" were a family of Nethinim who returned with Zerubbabel (*Ezr.* ii. 53).

Tha'mar. TAMAR 1 (*Matt.* i. 3).

Tham'natha. One of the cities of Judaea fortified by Bacchides (1 *Macc.* ix. 50). Tham'natha no doubt represents an ancient TIMNATH, possibly the present *Tibneh*.

Thank-offering, or Peace-offering, the properly eucharistic offering among the Jews, in its theory resembling the MEAT-OFFERING, and therefore indicating that the offerer was already reconciled to, and in covenant with, God. Its ceremonial is described in Lev. iii. The peace-offerings, unlike other sacrifices, were not ordained to be offered in fixed and regular course. The only constantly recurring peace-offering appears to have been that of the two firstling lambs at Pentecost (*Lev.* xxiii.

19). The general principle of the peace-offering seems to have been, that it should be entirely spontaneous, offered as occasion should arise, from the feeling of the sacrificer himself (*Lev.* xix. 5). On the first institution (*Lev.* vii. 11-17), peace-offerings are divided into "offerings of thanksgiving," and "vows or free-will offerings;" of which latter class the offering by a Nazirite, on the completion of his vow, is the most remarkable (*Num.* vi. 14). We find accordingly peace-offerings offered for the people on a great scale at periods of unusual solemnity or rejoicing. In two cases only (*Judg.* xx. 26; 2 *Sam.* xxiv. 25) peace-offerings are mentioned as offered with burnt-offerings at a time of national sorrow and fasting.

Tha'ra. TERAH the father of Abraham (*Luke* iii. 34).

Thar'ra, *Esth.* xii. 1. A corrupt form of TERESH.

Thar'shiah. 1. In this more accurate form the translators of the A. V. have given in two passages (1 *K. x.* 22, xxii. 48) the name elsewhere presented as TARSHISH.—2. A Benjamin, one of the family of Bilhan and the house of Jedaiel (1 *Chr.* vii. 10 only).

Thas'si. The surname of Simon the son of Mattathias (1 *Macc.* ii. 3). The derivation of the word is uncertain.

Theatre. For the general subject, see *Dict. of Ant.* pp. 995-998. For the explanation of the biblical allusions, two or three points only require notice. The Greek term, like the corresponding English term, denotes the *place* where dramatic performances are exhibited, and also the *scene* itself or *spectacle* which is witnessed there. It occurs in the first or local sense in *Acts* xix. 29. It was in the theatre at Caesarea that Herod Agrippa I. gave audience to the Tyrian deputies, and was himself struck with death, because he heard so gladly the impious acclamations of the people (*Acts* xii. 21-23). The other sense of the term "theatre" occurs in 1 *Cor.* iv. 9, where the Common Version renders, "God hath set forth us the apostles last, as it were appointed to death; for we are made a *spectacle* unto the world, and to angels, and to men." Instead of "spectacle" (so also Wiclif and the Rhemish translators after the Vulgate), some might prefer the more energetic Saxon, "gazing-stock," as in Tyndale, Cranmer, and the Geneva version.

Thebes (A. V., No, the multitude of No, populous No).—A chief city of ancient Egypt, long the capital of the upper country, and the seat of the Diospolitan dynasties, that ruled over all Egypt at the era of its highest splendour. The sacred name of Thebes was *P-amen*, "the abode of Amon," which the Greeks reproduced in their *Diospolis*, especially with the addition *the Great*. No-Amon is the name of Thebes in the Hebrew Scriptures (*Jer.* xlvii. 25; *Nah.* iii. 8). Ezekiel uses *No* simply to designate the Egyptian seat of Ammon (*Ez.* xxx. 14, 16). The name of Thebes in the hieroglyphics is explained under NO-AMON. The origin of the city is lost in antiquity. Niebuhr is of opinion that Thebes was much older than Memphis, and that, "after the centre of Egyptian life was transferred to Lower Egypt, Memphis acquired its greatness through the ruin of Thebes." Other authorities assign priority to Memphis. But both cities date from our earliest authentic knowledge of Egyptian history. The first allusion to Thebes in classical literature is the familiar passage of the *Iliad*

(ix. 881-885).—"Egyptian Thebes, where are vast treasures laid up in the houses; where are a hundred gates, and from each two hundred men go forth with horses and chariots." It has been questioned whether Herodotus visited Upper Egypt, but he says, "I went to Heliopolis and to Thebes, expressly to try whether the priests of those places would agree in their accounts with the priests at Memphis" (ii. 3). Afterwards he describes the features of the Nile valley, and the chief points and distances upon the river, as only an eye-witness would be likely to record them. In the 1st century before Christ, Diodorus visited Thebes, and he devotes several sections of his general work to its history and appearance. Though he saw the city when it had sunk to quite secondary importance, he preserves the tradition of its early grandeur—its circuit of 140 stadia, the size of its public edifices, the magnificence of its temples, the number of its monuments, the dimensions of its private houses, some of them four or five stories high—all giving it an air of grandeur and beauty surpassing not only all other cities of Egypt, but of the world. Diodorus deplores the spoiling of its buildings and monuments by Cambyzes (Diod. i. 45, 46). Strabo, who visited Egypt a little later—at about the beginning of the Christian era—thus describes (xvii. p. 816) the city under the name Diospolis. But, in the uncertainty of these historical allusions, the monuments of Thebes are the most reliable witnesses for the ancient grandeur of the city. These are found in almost equal proportions upon both sides of the river. The parallel ridges which skirt the narrow Nile valley upon the east and west from the northern limit of Upper Egypt, here sweep outward upon either side, forming a circular plain whose diameter is nearly ten miles. The plan of the city, as indicated by the principal monuments, was nearly quadrangular, measuring two miles from north to south, and four from east to west. Its four great landmarks were, Karnak and Luxor upon the eastern or Arabian side, and Qooruah and Medeenet Haboo upon the western or Libyan side. There are indications that each of these temples may have been connected with those facing it upon two sides by grand *dromoi*, lined with sphinxes and other colossal figures. Upon the western bank there was almost a continuous line of temples and public edifices for a distance of two miles, from Qooruah to Medeenet Haboo; and Wilkinson conjectures that from a point near the latter, perhaps in the line of the colossi, the "Royal street" ran down to the river, which was crossed by a ferry terminating at Luxor on the eastern side. Beginning at the northern extremity on the western bank, the first conspicuous ruins are those of the *Menephtheion*, a palace-temple of the nineteenth dynasty, and therefore belonging to the middle style of Egyptian architecture. Nearly a mile southward from the Menephtheion are the remains of the combined palace and temple known since the days of Strabo as the Memnonium. An examination of its sculptures shows that this name was inaccurately applied, since the building was clearly erected by Rameses II. The general form of the Memnonium is that of a parallelogram in three main sections, the interior areas being successively narrower than the first court, and the whole terminating in a series of sacred chambers beautifully sculptured and ornamented. But the most remarkable feature of these ruins is the gigantic statue of Rameses II. Proceeding again

toward the south for about the same distance, we find at Medeenet Haboo ruins upon a more stupendous scale than at any other point upon the western bank of Thebes. These consist of a temple founded by Thothmes I., which presents some of the grandest effects of the old Egyptian architecture, and its battle-scenes are a valuable contribution to the history of Rameses III. Behind this long range of temples and palaces are the Libyan hills, which, for a distance of five miles, are excavated to the depth of several hundred feet for sepulchral chambers. Some of these, in the number and variety of their chambers, the finish of their sculptures, and the beauty and freshness of their frescoes, are among the most remarkable monuments of Egyptian grandeur and skill. The eastern side of the river is distinguished by the remains of Luxor and Karnak, the latter being of itself a city of temples. The approach to Karnak from the south is marked by a series of majestic gateways and towers, which were the appendages of later times to the original structure. The temple properly faces the river, i. e. toward the north-west. The courts and propylæa connected with this structure occupy a space nearly 1800 feet square, and the buildings represent almost every dynasty of Egypt, from Sesortasen I. to Ptolemy Euergetes I. Courts, pylons, obelisks, statues, pillars, everything pertaining to Karnak, are on the grandest scale. The grandeur of Egypt is here in its architecture, and almost every pillar, obelisk, and stone tells its historic legend of her greatest monarchs. We have alluded, in the opening of this article, to the debated question of the priority of Thebes to Memphis. As yet the data are not sufficient for its satisfactory solution, and Egyptologists are not agreed. Upon the whole we may conclude that before the time of Menes there was a local sovereignty in the Thebaid, but the historical nationality of Egypt dates from the founding of Memphis. When the Shepherds or Hyksos, a nomadic race from the east, invaded Egypt and fixed their capital at Memphis, a native Egyptian dynasty was maintained at Thebes, at times tributary to the Hyksos, and at times in military alliance with Ethiopia against the invaders; until at length, by a general uprising of the Thebaid, the Hyksos were expelled, and Thebes became the capital of all Egypt under the resplendent eighteenth dynasty. This supremacy continued until the close of the nineteenth dynasty, or for a period of more than five hundred years; but under the twentieth dynasty the glory of Thebes began to decline, and after the close of that dynasty her name no more appears in the lists of kings. Still the city was retained as the capital, in whole or in part, and the achievements of Shishonk the Bubastite, of Tirhakah the Ethiopian, and other monarchs of celebrity, are recorded upon its walls. Ezekiel proclaims the destruction of Thebes by the arm of Babylon (Ez. xxx. 14-16). The Persian invader completed the destruction that the Babylonian had begun.

Thebez. A place memorable for the death of the bravo Abimelech (Judg. ix. 50). Thebez is not mentioned again in the Bible. But it was known to Eusebius and Jerome. In their day the village still bore its old name, and was situated "in the district of Neapolis," 13 Roman miles therefrom, on the road to Scythopolis. There it still is; its name—*Tubás*—hardly changed.

Thecoe's, the Wilderness of. The wild uncultivated pastoral tract lying around the town of

Tekoa, more especially to the east of it (1 Macc. ix. 33).

Thel'assar. Another form of the name examined under TEL-ASSAR (2 K. xix. 12).

Theler'sas. 1 Esd. v. 36. The Greek equivalent of the name TEL-HARSAS.

Theman. Bar. iii. 22, 23. [TEMAN.]

Theocanus. TIKVAN the father of Jahaziah (1 Esd. ix. 14).

Theodotus. An envoy sent by Nicanor to Judas Macc. c. B.C. 162 (2 Macc. xiv. 19).

Theophilus. 1. The person to whom St. Luke inscribes his Gospel and the Acts of the Apostles (Luke i. 3; Acts i. 1). We meet with a considerable number and variety of theories concerning him. (1.) Several commentators, especially among the Fathers, have been disposed to doubt the personality of Theophilus, regarding the name either as that of a fictitious person, or as applicable to every Christian reader. (2.) From the honourable epithet *κράτιστε*, applied to Theophilus in Luke i. 3 (comp. Acts xxiii. 26, xxiv. 3, xxvi. 25), it has been argued with much probability, but not quite conclusively, that he was a person in high official position. Thus Theophylact conjectures that he was a Roman governor, or a person of senatorial rank. Oecumenius tells us that he was a governor. The traditional connexion of St. Luke with Antioch has disposed some to look upon Antioch as the abode of Theophilus, and possibly as the seat of his government. (3.) According to Bar Bahlul, a Syrian lexicographer of the 10th century, Theophilus was an illustrious convert at Alexandria. Jacob Hase conjectured that he was no other than the celebrated Philo. (4.) Alexander Morus makes the rather hazardous conjecture that the Theophilus of St. Luke is identical with the person who is recorded by Tacitus (*Ann.* ii. 55) to have been condemned for fraud at Athens by the court of the Areopagus. Grotius also conjectures that he was a magistrate of Achaia baptized by St. Luke. (5.) It is obvious to suppose that Theophilus was a Christian. But a different view has been entertained. Heumann, assuming that he was a Roman governor, argues that he could not be a Christian, because no Christian would be likely to have such a charge entrusted to him. Another writer, Theodore Hase, believes that the Theophilus of Luke was no other than the deposed High Priest Theophilus the son of Ananus. In the first place, we may safely reject the Patristic notion that Theophilus was either a fictitious person, or a mere personification of Christian love. The epithet *κράτιστε* is a sufficient evidence of his historical existence. It does not, indeed, prove that he was a governor, but it makes it most probable that he was a person of high rank. All that can be conjectured with any degree of safety concerning him, comes to this, that he was a Gentile of rank and consideration, who came under the influence of St. Luke, or under that of St. Paul, at Rome, and was converted to the Christian faith. —2. A Jewish High-Priest, the son of Annas or Ananus, brother-in-law to Caiaphas, and brother and immediate successor of Jonathan. Theophilus is not mentioned by name in the New Testament; but it is most probable that he was the High Priest who granted a commission to Saul to proceed to Damascus, and to take into custody any believers whom he might find there.

Ther'as. The equivalent in 1 Esd. viii. 41, 61, for the AVAYA of the parallel passage in Ezra.

Ther'meleth. TEL-MELAH, 1 Esd. v. 36.

Thessalonians, First Epistle to the. 1. The date of the Epistle is made out approximately in the following way. During the course of his second missionary journey, probably in the year 52, St. Paul founded the Church of Thessalonica. Leaving Thessalonica he passed on to Berea. From Berea he went to Athens, and from Athens to Corinth (Acts xvii. 1-xviii. 18). Now it appears that, when this Epistle was written, Silvanus and Timothy were in the Apostle's company (1 Thess. i. 1; comp. 2 Thess. i. 1)—a circumstance which confines the date to the second missionary journey (Acts xviii. 5; 2 Cor. i. 19). The Epistle then must have been written in the interval between St. Paul's leaving Thessalonica and the close of his residence at Corinth, i. e. according to the received chronology within the years 52-54. Other considerations however narrow the limits of the possible date still more closely, and enable us to place the writing of this Epistle early in St. Paul's residence at Corinth, a few months after he had founded the Church at Thessalonica, at the close of the year 52 or the beginning of 53. The statement in the subscription appearing in several MSS. and versions, that it was written "from Athens," is a superficial inference from 1 Thess. iii. 1, to which no weight should be attached. 2. The Epistles to the Thessalonians then (for the second followed the first after no long interval) are the earliest of St. Paul's writings—perhaps the earliest written records of Christianity. It is interesting therefore to compare the Thessalonian Epistles with the later letters, and to note the points of difference. These differences are mainly threefold. (1.) In the general style of these earlier letters there is greater simplicity and less exuberance of language. The brevity of the opening salutation is an instance of this. The closing benediction is correspondingly brief. And throughout the Epistles there is much more evenness of style. (2.) The antagonism to St. Paul is not the same. Here the opposition comes from Jews. A period of five years changes the aspect of the controversy. The opponents of St. Paul are then no longer Jews, so much as Judaizing Christians. It was now urged that though the Gentiles may be admitted to the Church of Christ, the only door of admission is the Mosaic covenant-rite of circumcision. The language of St. Paul speaking of the Jewish Christians in this Epistle shows that he opposition to his teaching had not at this time assumed this second phase. (3.) Many of the distinctive doctrines of Christianity were yet not evolved and distinctly enunciated till the needs of the Church drew them out into prominence at a later date. It has often been observed for instance, that there is in the Epistles to the Thessalonians no mention of the characteristic contrast of "faith and works;" that the word "justification" does not once occur; that the idea of dying with Christ and living with Christ, so frequent in St. Paul's later writings, is absent in these. In the Epistles to the Thessalonians, the Gospel preached is that of the coming of Christ, rather than of the cross of Christ. There are many reasons why the subject of the second advent should occupy a larger space in the earliest stage of the Apostolic teaching than afterwards. 3. The occasion of this Epistle was as follows: St. Paul had twice attempted to revisit Thessalonica, and both times had been disappointed. Thus prevented from seeing them in person, he had sent Timothy to inquire and report to him as to

their condition (iii. 1-5). Timothy returned with most favourable tidings, reporting not only their progress in Christian faith and practice, but also their strong attachment to their old teacher (iii. 6-10). The First Epistle to the Thessalonians is the outpouring of the Apostle's gratitude on receiving this welcome news. At the same time the report of Timothy was not unmixed with alloy. There were certain features in the condition of the Thessalonian Church which called for St. Paul's interference, and to which he addresses himself in his letter. (1.) The very intensity of their Christian faith, dwelling too exclusively on the day of the Lord's coming, had been attended with evil consequences. On the other hand, a theoretical difficulty had been felt. Certain members of the Church had died, and there was great anxiety lest they should be excluded from any share in the glories of the Lord's advent (iv. 13-18). (2.) The Thessalonians needed consolation and encouragement under persecution (ii. 14, iii. 2-4). (3.) An unhealthy state of feeling with regard to spiritual gifts was manifesting itself (v. 19, 20). (4.) There was the danger of relapsing into their old heathen profligacy (iv. 4-8). 4. Yet notwithstanding all these drawbacks, the condition of the Thessalonian Church was highly satisfactory, and the most cordial relations existed between St. Paul and his converts there. This honourable distinction it shares with the other great Church of Macedonia, that of Philippi. 5. A comparison of the narrative in the Acts with the allusions in this and the Second Epistle to the Thessalonians is instructive. Passing over patent coincidences, we may single out one of a more subtle and delicate kind. It arises out of the form which the accusation brought against St. Paul and his companions at Thessalonica takes in the Acts: "All these do contrary to the decrees of Cæsar, saying that there is another king, one Jesus" (xvii. 7). The allusions in the Epistles to the Thessalonians enable us to understand the ground of this accusation. It appears that the *kingdom* of Christ had entered largely into his oral teaching in this city, as it does into that of the Epistles themselves. On the other hand, the language of these Epistles diverges from the narrative of St. Luke on two or three points in such a way as to establish the independence of the two accounts, and even to require some explanation. (1.) The first of these relates to the composition of the Church of Thessalonica. In the First Epistle St. Paul addresses his readers distinctly as Gentiles, who had been converted from idolatry to the Gospel (i. 9, 10). In the Acts we are told that "some (of the Jews) believed . . . and of the devout Greeks (i. e. proselytes) a great multitude, and of the chief women not a few" (xvii. 4). Even if we retain the common reading, the account of St. Luke does not exclude a number of believers converted directly from heathendom: and, if any divergence remains, it is not greater than might be expected in two independent writers, one of whom, not being an eye-witness, possessed only a partial and indirect knowledge. (2.) In the Epistle the persecutors of the Thessalonian Christians are represented as their fellow-countrymen (ii. 14), whereas in the Acts the Jews are regarded as the bitterest opponents of the faith (xvii. 5). This is fairly met by Paley, who points out that the Jews were the instigators of the persecution, which however they were powerless of themselves to carry out without aid from

the heathen. (3.) The narrative of St. Luke appears to state that St. Paul remained only three weeks at Thessalonica (xvii. 2), whereas in the Epistle, though there is no direct mention of the length of his residence among them, the whole language (i. 4, ii. 4-11) points to a much longer period. In the Acts it is stated simply that for three Sabbath days St. Paul taught in the synagogue. The silence of the writer does not exclude subsequent labour among the Gentile population. (4.) The notices of the movements of Silas and Timotheus in the two documents do not accord at first sight. In the Acts St. Paul is conveyed away secretly from Berea to escape the Jews. Arrived at Athens, he sends to Silas and Timothy, whom he had left behind at Berea, urging them to join him as soon as possible (xvii. 14-16). It is evident from the language of St. Luke that the Apostle expects them to join him at Athens. Yet we hear nothing more of them for some time, when at length after St. Paul had passed on to Corinth, and several incidents had occurred since his arrival there, we are told that Silas and Timotheus came from Macedonia (xviii. 5). From the First Epistle on the other hand, we gather the following facts. St. Paul there tells us that they (i. e. himself, and probably Silas), no longer able to endure the suspense, "consented to be left alone at Athens, and sent Timothy their brother" to Thessalonica (iii. 1, 2). Timothy returned with good news (iii. 6) (whether to Athens or Corinth does not appear), and when the two Epistles to the Thessalonians were written, both Timothy and Silas were with St. Paul (1 Thess. i. 1; 2 Thess. i. 1; comp. 2 Cor. i. 19). We may suppose either that (i.) Timotheus was despatched to Thessalonica, not from Athens, but from Berea. In this case Timotheus would take up Silas somewhere in Macedonia on his return, and the two would join St. Paul in company; not however at Athens, but later on at Corinth. Or (ii.) Timotheus and Silas did join the Apostle at Athens, where we learn from the Acts that he was expecting them. From Athens he despatched Timotheus to Thessalonica, so that he and Silas had to forego the services of their fellow-labourer for a time. This mission is mentioned in the Epistle, but not in the Acts. Subsequently he sends Silas on some other mission, not recorded either in the history or the Epistle; probably to another Macedonian Church, Philippi for instance. Silas and Timotheus returned together from Macedonia and joined the Apostle at Corinth. 6. This Epistle is rather practical than doctrinal. It was suggested rather by personal feeling, than by any urgent need, which might have formed a centre of unity, and impressed a distinct character on the whole. Under these circumstances we need not expect to trace unity of purpose, or a continuous argument, and any analysis must be more or less artificial. The body of the Epistle, however, may conveniently be divided into two parts, the former of which, extending over the first three chapters, is chiefly taken up with a retrospect of the Apostle's relation to his Thessalonian converts, and an explanation of his present circumstances and feelings, while the latter, comprising the 4th and 5th chapters, contains some seasonable exhortations. At the close of each of these divisions is a prayer, commencing with the same words, "May God Himself," etc., and expressed in somewhat similar language. The Epistle closes with personal injunctions and a benediction (v. 25-28),

7. The external evidence in favour of the genuineness of the First Epistle to the Thessalonians is chiefly negative, but this is important enough. There is no trace that it was ever disputed at any age or in any section of the Church, or even by any individual, till the present century. On the other hand, the allusions to it in writers before the close of the 2nd century are confessedly faint and uncertain. It is more important to observe that the Epistle was included in the Old Latin and Syriac Versions, that it is found in the Canon of the Muratorian fragment, and that it was also contained in that of Marcion. Towards the close of the 2nd century from Irenaeus downwards, we find this Epistle directly quoted and ascribed to St. Paul. The evidence derived from the character of the Epistle itself is so strong that it may fairly be called irresistible. It would be impossible to enter into the question of style here, but the reader may be referred to the Introduction of Jowett, who has handled this subject very fully and satisfactorily. An equally strong argument may be drawn also from the matter contained in the Epistle. In the first place, the fineness and delicacy of touch with which the Apostle's relations towards his Thessalonian converts are drawn, are quite beyond the reach of the clumsy forgeries of the early Church. In the second place, the writer uses language which, however it may be explained, is certainly coloured by the anticipation of the speedy advent of the Lord. Such a position would be an anachronism in a writer of the 2nd century. The genuineness of this Epistle was first questioned by Schrader, who was followed by Baur. The following is a summary of Baur's arguments. (i.) He attributes great weight to the general character of the epistle, the difference of style, and especially the absence of distinctive Pauline doctrines. (ii.) In the mention of the "wrath" overtaking the Jewish people (ii. 16), Baur sees an allusion to the destruction of Jerusalem, and therefore a proof of the later date of the Epistle. (iii.) He urges the contradictions to the account in the Acts. (iv.) He discovers references to the Acts, which show that the Epistle was written later. (v.) He supposes passages in this Epistle to have been borrowed from the acknowledged letters of St. Paul. The resemblances however which he points out are not greater than, or indeed so great as, those in other Epistles, and bear no traces of imitation.

Thessalonians, Second Epistle to the. 1. This Epistle appears to have been written from Corinth not very long after the First, for Silvanus and Timothy were still with St. Paul (i. 1). In the former letter we saw chiefly the outpouring of strong personal affection, occasioned by the renewal of the Apostle's intercourse with the Thessalonians, and the doctrinal and hortatory portions are there subordinate. In the Second Epistle, on the other hand, his leading motive seems to have been the desire of correcting errors in the Church of Thessalonica. We notice two points especially which call forth his rebuke. First, it seems that the anxious expectation of the Lord's advent, instead of subsiding, had gained ground since the writing of the First Epistle. Secondly, the Apostle had also a personal ground of complaint. His authority was not denied by any, but it was tampered with, and an unauthorised use was made of his name. Designing men might misrepresent his teaching in two ways, either by suppressing what he actually

had written or said, or by forging letters and in other ways representing him as teaching what he had not taught. St. Paul's language hints in different places at both these modes of false dealing. There are two passages which allude to these misrepresentations of his teaching. In the first of these he tells them in vague language, "not to be troubled either by spirit or by word or by letter, as coming from us, as if the day of the Lord were at hand" (ii. 2, 3). In the second passage at the close of the Epistle he says, "The salutation of Paul with mine own hand, which ~~was~~ token in every Epistle: so I write" (iii. 17)—evidently a precaution against forgery. It will be seen then that the teaching of the Second Epistle is corrective of, or rather supplemental to, that of the First, and therefore presupposes it. 2. This Epistle, in the range of subject as well as in style and general character, closely resembles the First; and the remarks made on that Epistle apply for the most part equally well to this. The structure also is somewhat similar, the main body of the Epistle being divided into two parts in the same way, and each part closing with a prayer (ii. 16, 17, iii. 16). The Epistle ends with a special direction and benediction (iii. 17, 18). 3. The external evidence in favour of the Second Epistle is somewhat more definite than that which can be brought in favour of the First. It seems to be referred to in one or two passages of Polycarp; and the language in which Justin Martyr speaks of the Man of Sin is so similar that it can scarcely be independent of this Epistle. The Second Epistle, like the First, is found in the canons of the Syriac and Old Latin Versions, and in those of the Muratorian fragment and of the heretic Marcion; is quoted expressly and by name by Irenaeus and others at the close of the second century, and was universally received by the Church. The internal character of the Epistle too, as in the former case, bears the strongest testimony to its Pauline origin. Its genuineness in fact was never questioned until the beginning of the present century. The apocalyptic passage (ii. 1-12) is the great stumbling-block. It has been objected to, either as alluding to events subsequent to St. Paul's death, the Neronian persecution for instance; or as betraying religious views derived from the Montanism of the second century; or lastly, as contradicting St. Paul's anticipations expressed elsewhere, especially in the First Epistle, of the near approach of the Lord's advent. 4. The most striking feature in the Epistle is this apocalyptic passage, announcing the revelation of the "Man of Sin" (ii. 1-12), and it will not be irrelevant to investigate its meaning.—(I.) The passage speaks of a great apostasy which is to usher in the advent of Christ, the great judgment. There are three prominent figures in the picture, Christ, Antichrist, and the Restrainer. The "mystery of lawlessness" is already at work. At present it is checked by the Restrainer; but the check will be removed, and then it will break out in all its violence. Then Christ will appear.—(II.) Many different explanations have been offered of this passage. By one class of interpreters it has been referred to circumstances which passed within the circle of the Apostle's own experience. Others again have seen in it the prediction of a crisis yet to be realized, the end of all things. The former of these, the Præterists, have identified the "Man of Sin" with divers historical characters—with Caligula, Nero, Titus,

Simon Magus, Simon son of Giora, the high-priest Abanias, &c., and have sought for an historical counterpart to the Restrainer in like manner. The latter, the Futurists, have also given various accounts of the Antichrist, the mysterious power of evil which is already working. To Protestants for instance it is the Papacy; to the Greek Church, Mohammedanism.—(III.) Now in arbitrating between the Præterists and the Futurists, we are led by the analogy of other prophetic announcements, as well as by the language of the passage itself, to take a middle course. Neither is wholly right, and yet both are to a certain extent right. It is the special characteristic of prophecy to speak of the distant future through the present and immediate. Following the analogy of the older prophets and of our Lord himself, we may agree with the Præterists that St. Paul is referring to events which fell under his own cognizance; for indeed the Restrainer is said to be restraining now, and the mystery of iniquity to be already working: while at the same time we may accept the Futurist view, that the Apostle is describing the end of all things, and that therefore the prophecy has not yet received its most striking and complete fulfilment.—(IV.) If this view be correct, it remains to inquire what particular adversary of the Gospel, and what particular restraining influence, St. Paul may have had in view. But, before attempting to approximate to an explanation, we may clear the way by laying down two rules. *First.* The imagery of the passage must be interpreted mainly by itself, and by the circumstances of the time. The great adversary in the Revelation seems to be the Roman power; but it may be widely different here. There were even in the Apostolic age "many Antichrists;" and we cannot be sure that the Antichrist present to the mind of St. Paul was the same with the Antichrist contemplated by St. John. *Secondly.* In all figurative passages it is arbitrary to assume that a person is denoted where we find a personification. Thus

the "Man of Sin" here need not be an individual man; it may be a body of men, or a power, a spiritual influence.—(V.) Now we find that the chief opposition to the Gospel, and especially to St. Paul's preaching at this time arose from the Jews. It seems on the whole probable that the Antichrist is represented especially by Judaism. Corresponding to this view of the Antichrist, we shall probably be correct in regarding the Roman Empire as the restraining power. It was to Roman justice and Roman magistrates that the Apostle had recourse at this time to shield him from the enmity of the Jews, and to check their violence. It was only at a later date under Nero, that Rome became the antagonist of Christendom, and then she also in turn was fitly portrayed by St. John as the type of Antichrist.

Thessalonica. The original name of this city was Therma; and that part of the Macedonian shore on which it was situated retained through the Roman period the designation of the Thermaic Gulf. The history of the city under its earlier name was of no great note. It rose into importance with the decay of Greek nationality. Cassander the son of Antipater rebuilt and enlarged it, and named it after his wife Thessalonica, the sister of Alexander the Great. The name ever since, under various slight modifications, has been continuous, and the city itself has never ceased to be eminent. *Saloniki* is still the most important town of European Turkey, next after Constantinople. Under the Romans, when MACEDONIA was divided into four governments, Thessalonica was made the capital of the second; afterwards, when the whole was consolidated into one province, this city became practically the metropolis. Strabo in the first century speaks of Thessalonica as the most populous city in Macedonia. Thus we are brought to St. Paul's visit (with Silas and Timothy) during his second missionary journey, and to the introduction of Christianity into Thessalonica. Three circumstances must here be mentioned, which illustrate in an im-

portant manner this visit and this journey as well as the two Epistles to the Thessalonians. (1.) This was the chief station on the great Roman Road, called the *Via Egnatia*, which connected Rome with the whole region to the north of the Aegean Sea. (2.) Placed as it was on this great Road, and in connexion with other important Roman ways, Thessalonica was an invaluable centre for the spread of the Gospel. In fact it was nearly, if not quite, on a level with Corinth and Ephesus in its share of the commerce of the Levant. (3.) The circumstance noted in Acts xvii. 1, that here was the synagogue of the Jews in this part of Macedonia, had evidently much to do with the Apostle's plans, and also doubtless with his success. Trade would inevitably bring Jews to Thessalonica; and it is remarkable that, ever since, they have had a prominent place in the annals of the city. The first scene of the Apostle's work at Thessalonica was the synagogue (Acts xvii. 2, 3). It is stated that the ministrations among the Jews continued for three weeks (ver. 2). Not that we are obliged to limit to this time the whole stay of the Apostles at Thessalonica. A flourishing Church was certainly formed there: and the Epistles show that its elements were much more Gentile than Jewish. The narrative in the Acts affords a singularly accurate illustration of the political constitution of Thessalonica. Not only is the *demus* mentioned (Acts xvii. 5) in harmony with what has been above said of its being a "free city," but the peculiar title, *politarchs* (ib. 6), of the chief magistrates. This term occurs in no other writing; but it may be read to this day conspicuously on an arch of the early Imperial times, which spans the main street of the city. From this inscription it would appear that the number of *politarchs* was seven. The arch just mentioned (called the *Vardar* gate) is at the western extremity of the town. At its eastern extremity is another Roman arch of later date, and probably commemorating some victory of Constantine. The main street, which both these arches cross, and which intersects the city from east to west, is undoubtedly the line of the *Via Egnatia*. A word must be said, in conclusion, on the later ecclesiastical history of Thessalonica. For during several centuries this city was the bulwark, not simply of the later Greek Empire, but of Oriental Christendom, and was largely instrumental in the conversion of the Slavonians and Bulgarians. Thus it received the designation of "the Orthodox City;" and its struggles are very prominent in the writings of the Byzantine historians.

Theudas, the name of an insurgent mentioned in Gamaliel's speech before the Jewish council (Acts v. 35-39) at the time of the arraignment of the Apostles. He appeared, according to Luke's account, at the head of about four hundred men. Josephus speaks of a Theudas who played a similar part in the time of Claudius, about A.D. 44, i. e. some ten or twelve years at least later than the delivery of Gamaliel's speech; and since Luke places his Theudas, in the order of time, before Judas the Galilean, who made his appearance soon after the dethronement of Archelaüs, i. e. A.D. 6 or 7, it has been charged that the writer of the Acts either fabricated the speech put into the mouth of Gamaliel, or has wrought into it a transaction which took place thirty years or more after the time when it is said to have occurred. Various solutions of the difficulty have been offered. (1.) Since Luke

represents Theudas as having preceded Judas the Galilean, it is certain that he could not have appeared later, at all events, than the latter part of the reign of Herod the Great. Now, the very year of that monarch's death was remarkably turbulent; the land was overrun by insurrectionary chiefs or fanatics. Josephus mentions but three of these disturbers *by name*; he passes over the others with a general allusion. Among those whom the Jewish historian has omitted to name, may have been the Theudas whom Gamaliel cites. The name was not an uncommon one. (2.) Another explanation is, that Luke's Theudas may have been one of the three insurgents whose names are mentioned by Josephus in connexion with the disturbances which took place about the time of Herod's death. Sountag argues that the Theudas referred to by Gamaliel is the individual who occurs in Josephus under the name of Simon, a slave of Herod. There can be no valid objection to either of the foregoing suppositions; both are reasonable, and both must be disproved before Luke can be justly charged with having committed an anachronism in the passage under consideration.

Thieves, the two. The men who under this name appear in the history of the crucifixion were robbers rather than thieves, belonging to the lawless bands by which Palestine was at that time and afterwards infested. Against these brigands every Roman procurator had to wage continual war. It was necessary to use an armed police to encounter them (Luke xxii. 52). Of the previous history of the two who suffered on Golgotha we know nothing. They had been tried and condemned, and were waiting their execution before our Lord was accused. It is probable enough, as the death of Barabbas was clearly expected at the same time, that they had taken part in his insurrection. They had expected to die with Jesus Barabbas. They find themselves with one who bore the same name, but who was described in the superscription on his cross as Jesus of Nazareth. They could hardly fail to have heard something of his fame as a prophet, of his triumphal entry as a king. They catch at first the prevailing tone of scorn. But over one of them there came a change. He looked back upon his past life, and saw an infinite evil. He looked to the man dying on the cross beside him, and saw an infinite compassion. There indeed was one unlike all other "kings of the Jews" whom the robber had ever known. Such an one must be all that He had claimed to be. To be forgotten by that king seems to him now the most terrible of all punishments; to take part in the triumph of His return, the most blessed of all hopes. The yearning prayer was answered, not in the letter, but in the spirit. We cannot wonder that a history of such wonderful interest should at all times have fixed itself on men's minds, and led them to speculate and ask questions which we have no data to answer. The simplest and truest way of looking at it has been that of those who have seen in the "dying thief" the first great typical instance that "a man is justified by faith without the deeds of the law." Other conjectures turn more on the circumstances of the history. Bengel finds in the Lord's words to him an indication that the penitent thief was a Gentile, the impenitent a Jew, and that thus the scene on Calvary was typical of the position of the two Churches. Stier reads in the words of reproach the language of one who had all along listened with

grief and horror to the revilings of the multitude, the burst of an indignation previously suppressed. The Apocryphal Gospels, as usual, do their best to lower the divine history to the level of a legend.

Thimna'thah. A town in the allotment of Dan (Josh. xix. 43 only). It is named between Elon and Ekron. The name is the same as that of the residence of Samson's wife.

Thisbe. A name found only in Tob. i. 2, as that of a city of Naphtali from which Tobit's ancestor had been carried captive by the Assyrians. The real interest of the name resides in the fact that it is maintained by some interpreters to be the place which had the glory of giving birth to ELIJAH THE TISHBITE. This, however, is, at the best, very questionable. No name resembling Thisbe or Thibe has been yet encountered in the neighbourhood of *Kedes* or *Safed*.

Thistle. [THORNS AND THISTLES.]

Thomas, one of the Apostles. According to Eusebius, his real name was Judas. This may have been a mere confusion with Thaddeus, who is mentioned in the extract. But it may also be that Thomas was a surname. The word *Thoma*, means "a twin"; and so it is translated in John xi. 16, xxi. 2, *ὁ δίδυμος*. Out of this name has grown the tradition that he had a twin-sister, Lydia, or that he was a twin-brother of our Lord; which last, again, would confirm his identification with Judas (comp. Matt. xiii. 55). He is said to have been born at Autioch. In the catalogue of the Apostles he is coupled with Matthew in Matt. x. 3, Mark iii. 18, Luke vi. 15, and with Philip in Acts i. 13. All that we know of him is derived from the Gospel of St. John; and this amounts to three traits, which, however, so exactly agree together, that, slight as they are, they place his character before us with a precision which belongs to no other of the twelve Apostles, except Peter, John, and Judas Iscariot. This character is that of a man, slow to believe, seeing all the difficulties of a case, subject to despondency, viewing things on the darker side, and yet full of ardent love for his Master. The first trait is his speech when our Lord determined to face the dangers that awaited Him in Judaea on his journey to Bethany. Thomas said to his fellow-disciples, "Let us also go, that we may die with Him" (John xi. 16). The second was his speech during the Last Supper. "Thomas saith unto Him, Lord, we know not whither thou goest, and how can we know the way?" (xiv. 5). It was the prosaic, incredulous doubt as to moving a step in the unseen future, and yet an eager inquiry to know how this step was to be taken. The third was after the Resurrection. He was absent—possibly by accident, perhaps characteristically—from the first assembly, when Jesus had appeared. The others told him what they had seen. He broke forth into an exclamation, the terms of which convey to us at once the vehemence of his doubt, and at the same time the vivid picture that his mind retained of his Master's form as he had last seen Him lifeless on the cross (John xx. 25). On the eighth day he was with them at their gathering, perhaps in expectation of a recurrence of the visit of the previous week; and Jesus stood amongst them. He uttered the same salutation, "Peace be unto you;" and then turning to Thomas, as if this had been the special object of His appearance, uttered the words which convey as strongly the sense of condemnation and tender reproof as those of Thomas had

shown the sense of hesitation and doubt. The effect on Thomas is immediate. The conviction produced by the removal of his doubt became deeper and stronger than that of any of the other Apostles. The words in which he expressed his belief contain a far higher assertion of his Master's divine nature than is contained in any other expression used by Apostolic lips, "My Lord, and my God." The answer of our Lord sums up the moral of the whole narrative: "Because thou hast seen me, thou hast believed: blessed are they that have not seen me, and yet have believed" (xx. 29). In the N. T. we hear of Thomas only twice again, once on the Sea of Galilee with the seven disciples, where he is ranked next after Peter (John xxi. 2), and again in the assemblage of the Apostles after the Ascension (Acts i. 13). The earlier traditions, as believed in the 4th century, represent him as preaching in Parthia or Persia, and as finally buried at Edessa. The later traditions carry him further East. His martyrdom (whether in Persia or India) is said to have been occasioned by a lance; and is commemorated by the Latin Church on Dec. 21, by the Greek Church on Oct. 6, and by the Indians on July 1.

Thomo'i. THAMAH or TAMAH (1 Esd. v. 32).

Thorns and Thistles. There appear to be eighteen or twenty Hebrew words which point to different kinds of prickly or thorny shrubs. These words are variously rendered in the A. V. by "thorns," "briers," "thistles," &c. It were a hopeless task to enter into a discussion of these numerous Hebrew terms; we shall not therefore attempt it, but confine our remarks to some of the most important names, and those which seem to afford some slight indications as to the plants they denote. 1. *Atad* occurs as the name of some spinous plant in Judg. ix. 14, 15, where the A. V. renders it by "bramble" (Marg. "thistle"), and in Ps. lviii. 9 (A. V. "thorns"). The plant in question is supposed to be *Lycium Europaeum* or *L. afrum* (Box-thorn), both of which species occur in Palestine. The Arabic name of this plant is identical with the Hebrew. *Lycium Europaeum* is a native of the south of Europe and the north of Africa; in the Grecian islands it is common in hedges. 2. *Châdek* occurs in Prov. xv. 19, and in Mic. vii. 4. Celsius, referring the Heb. term to the Arabic *Chaduk*, is of opinion that some spinous species of *Solanum* is intended. The Arabic term clearly denotes some kind of *Solanum*; either the *S. melongela*, var. *esculentum*, or the *S. Sodomium* ("apple of Sodom"). The Heb. term may be generic, and intended to denote any thorny plant suitable for hedges. 3. *Chôach*, a word of very uncertain meaning which occurs in the sense of some thorny plant in Is. xxxiv. 13, Hos. ix. 6, Prov. xxvi. 9, Cant. ii. 2, 2 K. xiv. 9. See also Job xxxi. 40 "Let *chôach* (A. V. 'thistles') grow instead of wheat." Celsius believes the blackthorn (*Prunus sylvestris*) is denoted. Perhaps the term is used in a wide sense to signify any thorny plant. 4. *Dardar* is mentioned twice in connexion with the Heb. *kôts*, viz. in Gen. iii. 18, and Hos. x. 8. The Greek *τρίβολος* occurs in Matt. vii. 16. See also Heb. vi. 8. It is probable that either the *Tribulus terrestris*, which, however, is not a spiny or thorny plant, but has spines on the fruit, or else the *Contauria calcitrapa*, is the plant which is more particularly intended by the word *dardar*. 5. *Shâmîr*, almost always found in connexion with the word *shathh*, occurs in several places of the Hebrew text;

It is variously rendered by the LXX. According to 'Abu'l-fadl, cited by Celsius, "the Samur of the Arabs is a thorny tree; it is a species of *Sidra* which does not produce fruit." No thorny plants are more conspicuous in Palestine and the Bible Lands than different kinds of *Rhamnaceae* such as *Paliurus aculeatus* (Christ's Thorn), and *Zizyphus Spina Christi*; this latter plant is the *nebb* of the Arabs, which grows abundantly in Syria and Palestine. The *Nadtséts* of Is. vii. 19, lv. 13, probably denotes some species of *Zizyphus*. The "crown of thorns" which was put in derision upon our Lord's head just before his crucifixion, was probably composed of the thorny twigs of the *nebb* (*Zizyphus Spina Christi*) mentioned above; being common everywhere, they could readily be procured.

Thracia. A Thracian horseman is incidentally mentioned in 2 Macc. xii. 35, apparently one of the bodyguard of Gorgias, governor of Idumaea under Antiochus Epiphanes. Thrace at this period included the whole of the country within the boundary of the Strymon, the Danube, and the coasts of the Aegean, Propontis, and Euxine—all the region, in fact, now comprehended in Bulgaria and Roumelia. In the early times it was inhabited by a number of tribes, each under its own chief. The wars on a large scale which followed the death of Alexander furnished employment for the martial tendencies of the Thracians, who found a demand for their services as mercenaries everywhere. Cavalry was the arm which they chiefly furnished, the rich pastures of Roumelia abounding in horses. The only other passage, if any, containing an allusion to Thrace, to be found in the Bible, is Gen. x. 2, where *Tiras* has by some been supposed to mean Thrace.

Thraseas. Father of Apollonius (1). 2 Macc. iii. 5. [APOLLONIUS.]

Three Taverns, a station on the Appian Road, along which St. Paul travelled from Puteoli to Rome (Acts xxviii. 15). The distances, reckoning southwards from Rome, are given as follows in the *Antonine Itinerary*, "to Aricia, 16 miles; to Three Taverns, 17 miles; to Appii Forum, 10 miles;" and, comparing this with what is observed still along the line of road, we have no difficulty in coming to the conclusion that "Three Taverns" was near the modern *Cisterna*. Just at this point a road came in from Antium on the coast. There is no doubt that "Three Taverns" was a frequent meeting-place of travellers.

Threshing. [AGRICULTURE.]

Threshold. I. [see GATE]. 2. Of the two words so rendered in A. V., one, *niphthán*, seems to mean sometimes a projecting beam or corbel (Ez. ix. 3, x. 4, 18).

Thresholds, the. This word, *Asuppé*, appears to be inaccurately rendered in Neh. xii. 25, though its real force has perhaps not yet been discovered. The "house of the Asuppim," or simply "the Asuppim," is mentioned in 1 Chr. xvi. 15, 17, as a part, probably a gate, of the enclosure of the "house of Jehovah," apparently at its S.W. corner. The allusion in Neh. xii. 25 is undoubtedly to the same place.

Throne. The Hebrew term *cissé* applies to any elevated seat occupied by a person in authority, whether a high-priest (1 Sam. i. 9), a judge (Ps. cxxii. 5), or a military chief (Jer. i. 15). The use of a chair in a country where the usual postures were squatting and reclining was at all times regarded as a symbol of dignity (2 K. iv. 10; Prov.

ix. 14). In order to specify a throne in our sense of the term, it was necessary to add to *cissé* the notion of royalty: hence the frequent occurrence of such expressions as "the throne of the kingdom" (Deut. xvii. 18; 1 K. i. 46; 2 Chr. vii. 8). The characteristic feature in the royal thrones was its elevation: Solomon's throne was approached by six steps (1 K. x. 19; 2 Chr. ix. 18); and Jehovah's throne is described as "high and lifted up" (Is. vi. 1). The materials and workmanship were costly. It was furnished with arms or "stays." The steps were also lined with pairs of lions. As to the form of the chair, we are only informed in 1 K. x. 19 that "the top was round behind." The king sat on his throne on state occasions. At such times he appeared in his royal robes. The throne was the symbol of supreme power and dignity (Gen. xli. 40). Similarly, "to sit upon the throne," implied the exercise of regal power (Deut. xvii. 18; 1 K. xvi. 11).

Assyrian throne or chair of state (Layard, *Nineveh*, II. 301).

Thummim. [URIM AND THUMMIM.]

Thunder. In a physical point of view, the most noticeable feature in connexion with thunder is the extreme rarity of its occurrence during the summer months in Palestine and the adjacent countries. From the middle of April to the middle of September it is hardly ever heard. Hence it was selected by Samuel as a striking expression of the Divine displeasure towards the Israelites (1 Sam. xii. 17). Rain in harvest was deemed as extraordinary as snow in summer (Prov. xxvi. 1), and Jerome asserts that he had never witnessed it in the latter part of June, or in July (*Comm.* on Am. iv. 7). In the imaginative philosophy of the Hebrews, thunder was regarded as the voice of Jehovah (Job xxxvii. 2, 4, 5, xl. 9; Ps. xviii. 13, xxix. 3-9; Is. xxx. 30, 31), who dwelt behind the thunder-cloud (Ps. lxxxi. 7). Thunder was, to the mind of the Jew, the symbol of Divine power (Ps. xxix. 3, &c.), and vengeance (1 Sam. ii. 10; 2 Sam. xxii. 14).

Thyatira. A city on the Lycus, founded by Seleucus Nicator. It was one of the many Macedonian colonies established in Asia Minor, in the sequel of the destruction of the Persian empire by Alexander. It lay to the left of the road from Pergamus to Sardis, on the southern incline of the

watershed which separates the valley of the Caicus (*Bakyrtschai*) from that of the Hermus, on the very confines of Mysia and Ionia, so as to be sometimes reckoned within the one, and sometimes within the other. In earlier times it had borne the names of Pelopia, Semiranis, and Euhippia. At the commencement of the Christian era, the Macedonian element so preponderated as to give a distinctive character to the population; and Strabo simply calls it a Macedonian colony. The original inhabitants had probably been distributed in hamlets round about, when Thyatira was founded. During the continuance of the Attalic dynasty, Thyatira scarcely appears in history; and of the various inscriptions which have been found on the site, now called *Ak Hissar*, not one unequivocally belongs to earlier times than those of the Roman empire. The prosperity of the city seems to have received a new impulse under Vespasian. Dyeing apparently formed an important part of the industrial activity of Thyatira, as it did of that of Colossae and Laodicea (Acts xvi. 14). The principal deity of the city was Apollo, worshipped as the sun-god under the surname *Tyrimnas*. He was no doubt introduced by the Macedonian colonists, for the name is Macedonian. A priestess of Artemis is also mentioned in the inscriptions. Another superstition, of an extremely curious nature, which existed at Thyatira, seems to have been brought thither by some of the corrupted Jews of the dispersed tribes. A fane stood outside the walls, dedicated to *Sanbatha*—the name of the sibil who is sometimes called Chaldaean, sometimes Jewish, sometimes Persian—in the midst of an enclosure designated “the Chaldaean’s court.” This seems to lend an illustration to the obscure passage in Rev. ii. 20, 21, which Grotius interprets of the wife of the bishop. Now there is evidence to show that in Thyatira there was a great amalgamation of races. But amalgamation of different races, in pagan nations, always went together with a syncretism of different reli-

gions, every relation of life having its religious sanction. If the sibil *Sanbatha* was really a Jewess, lending her aid to this proceeding, and not discountenanced by the authorities of the Judæo-Christian Church at Thyatira, both the censure and its qualification become easy of explanation.

Thyine wood occurs once only, viz. in Rev. xviii. 12, where the margin has “sweet” (wood). There can be little doubt that the wood here spoken of is that of the *Thuya articulata*, Desfont., the *Callitris quadrivalvis* of present botanists. This tree was much prized by the ancient Greeks and Romans, on account of the beauty of its wood for various ornamental purposes. By the Romans the tree was called *citrus*, the wood *citrum*. It is a native of Barbary, and grows to the height of 15 to 25 feet. Pliny says that the *citrus* is found abundantly in Mauretania. The resin known by the name of Sandarach is the produce of this tree, which belongs to the cypress tribe (*Cupressineae*), of the nat. order *Coniferae*.

Tiberias, a city in the time of Christ, on the Sea of Galilee; first mentioned in the New Testament (John vi. 1, 23, xxi. 1), and then by Josephus, who states that it was built by Herod Antipas, and was named by him in honour of the emperor Tiberius. It was probably a new town, and not a restored or enlarged one merely; for “Rakkath” (Josh. xix. 35), which is said in the Talmud to have occupied the same position, lay in the tribe of Naphtali, whereas Tiberias appears to have been within the limits of Zebulun (Matt. iv. 13). Tiberias was the capital of Galilee from the time of its origin until the reign of Herod Agrippa II., who changed the seat of power back again to Sepphoris, where it had been before the founding of the new city. Many of the inhabitants were Greeks and Romans, and foreign customs prevailed there to such an extent as to give offence to the stricter Jews. The ancient name has survived in that of the modern *Tibariéh*, which occupies unquestionably the original site, except that it is confined to narrower limits than those of the original city. Near *Tibariéh*, about a mile further south along the shore, are the celebrated warm baths, which the Roman naturalists reckoned among the greatest known curiosities of the world. The intermediate space between these baths and the town abounds with traces of ruins, such as the foundations of walls, heaps of stone, blocks of granite, and the like; and it cannot be doubted, therefore, that the ancient Tiberias occupied also this ground, and was much more extensive than its modern successor. It stood anciently as now, on the western shore, about two-thirds of the way between the northern and southern end of the Sea of Galilee. There is a margin or strip of land there between the water and the steep hills (which elsewhere in that quarter come down so boldly to the edge of the lake), about two miles long and a quarter of a mile broad. The tract in question is somewhat undulating, but approximates to the character of a plain. *Tibariéh*, the modern town, occupies the northern end of this parallelogram, and the Warm Baths the southern extremity; so that the more extended city of the Roman age must have covered all, or nearly all of the peculiar ground whose limits are thus clearly defined. The place is four and a half hours from Nazareth, one hour from Mejdél, possibly the ancient Magdala, and thirteen hours, by the shortest route, from *Rónids* or Caesarea Philippi. It is remark-

Thuya articulata. Art. "Thyine wood."

able that the Gospels give us no information, that the Saviour, who spent so much of his public life in Galilee, ever visited Tiberias. Tiberias has an interesting history, apart from its strictly Biblical associations. It bore a conspicuous part in the wars between the Jews and the Romans. The Sanhedrim, subsequently to the fall of Jerusalem, after a temporary sojourn at Jamnia and Sepphoris, became fixed there about the middle of the second century. Celebrated schools of Jewish learning flourished there through a succession of several centuries. The Mishna was compiled at this place by the great Rabbi Judah Hakkodesh (A.D. 190). The place passed, under Constantine, into the power of the Christians; and during the period of the Crusades was lost and won repeatedly by the different combatants. Since that time it has been possessed successively by Persians, Arabs, and Turks; and contains now, under the Turkish rule, a mixed population of Mohammedans, Jews, and Christians, variously estimated at from two to four thousand.

Tiberias, the Sea of. This term is found only in John xxi. 1, the other passage in which it occurs in the A. V. (ib. vi. 1) being, if the original is accurately rendered, "the sea of Galilee, of Tiberias." [GENNESARET, SEA OF.]

Tiberius (in full, Tiberius Claudius Nero), the second Roman emperor, successor of Augustus, who began to reign A.D. 14, and reigned until A.D. 37. He was the son of Tiberius Claudius Nero and Livina, and hence a step-son of Augustus. He was born at Rome on the 16th of November, B.C. 45. He became emperor in his fifty-fifth year, after having distinguished himself as a commander in various wars, and having evinced talents of a high order as an orator, and an administrator of civil affairs. He even gained the reputation of possessing the sterner virtues of the Roman character, and was regarded as entirely worthy of the imperial honours to which his birth and supposed personal merits at length opened the way. Yet, on being raised to the supreme power, he suddenly became, or showed himself to be, a very different man. His subsequent life was one of inactivity, sloth, and self-indulgence. He was despotic in his government, cruel and vindictive in his disposition. Tiberius died at the age of seventy-eight, after a reign of twenty-three years.

Tibhath, a city of Hadadezer, king of Zobah (1 Chr. xviii. 8), which in 2 Sam. vii. 8 is called Bethah. Its exact position is unknown.

Tibni. After Zimri had burnt himself in his palace, there was a division in the northern kingdom, half of the people following Tibni the son of Ginnath, and half following Omri (1 K. xvi. 21, 22). Omri was the choice of the army. Tibni was probably put forward by the people of Tirzah, which was then besieged by Omri and his host. The struggle between the contending factions lasted four years (comp. 1 K. xvi. 15, 23).

Tidal is mentioned only in Gen. xiv. 1, 9. If the present Hebrew text is accepted the king was called *Thid'at*; while, if the Septuagint more nearly represents the original, his name was *Thargal*, or perhaps *Thargal*. This last rendering is probably to be preferred, as the name is then a significant one in the early Hamitic dialect of the lower Tigris and Euphrates country — *Thur gal* being "the great chief." Thargal is called "king of nations," by which it is reasonable to understand that he was a chief over various nomadic tribes.

Tig'lath-Pileser. In 1 Chr. v. 26, and again in 2 Chr. xxviii. 20, the name of this king is written "Tiglath-pilneser;" but in this form there is a double corruption. The native word reads as *Tigulti-pul-tsiri*, for which the Tiglath-pil-eser of 2 Kings is a fair equivalent. Tiglath-Pileser is the second Assyrian king mentioned in Scripture as having come into contact with the Israelites. He attacked Samaria in the reign of Pekah, on what ground we are not told, but probably because Pekah withheld his tribute, and, having entered his territories, "took Ijon, and Abel-beth-maacah, and Janoh, and Kedesh, and Hazor, and Gilead, and Galilee, and all the land of Naphtali, and carried them captive to Assyria" (2 K. xv. 29). The date of this invasion cannot at present be fixed. After his first expedition, a close league was formed between Rezin, king of Syria, and Pekah, having for its special object the humiliation of Judah. At first great successes were gained by Pekah and his confederate (2 K. xv. 37; 2 Chr. xxviii. 6-8); but, on their proceeding to attack Jerusalem itself, Ahaz applied to Assyria for assistance, and Tiglath-Pileser, consenting to aid him, again appeared at the head of an army in these regions. He first marched, naturally, against Damascus, which he took (2 K. xvi. 9), razing it to the ground, and killing Rezin, the Damascus monarch. After this, probably, he proceeded to chastise Pekah, whose country he entered on the north-east, where it bordered upon "Syria of Damascus." Here he overran the whole district to the east of Jordan, carrying into captivity "the Reubenites, the Gadites, and the half tribe of Manasseh" (1 Chr. v. 26). Before returning into his own land, Tiglath-Pileser had an interview with Ahaz at Damascus (2 K. xvi. 10). This is all that Scripture tells us of Tiglath-Pileser. He appears to have succeeded Pul, and to have been succeeded by Shalmaneser; to have been contemporary with Rezin, Pekah, and Ahaz; and therefore to have ruled Assyria during the latter half of the eighth century before our era. From his own inscriptions we learn that his reign lasted at least seventeen years; that, besides warring in Syria and Samaria, he attacked Bablylonia, Media, Armenia, and the independent tribes in the upper regions of Mesopotamia; thus, like the other great Assyrian monarchs, warring along the whole frontier of the empire; and finally, that he was (probably) not a legitimate prince, but an usurper and the founder of a dynasty. The authority of Berosus and Herodotus, combined with the monumental indications, justifies us in concluding that the founder of the Lower Dynasty or Empire, the first monarch of the New Kingdom, was the Tiglath-Pileser of Scripture. He reigned certainly from B.C. 747 to B.C. 730, and possibly a few years longer, being succeeded by Shalmaneser at least as early as B.C. 725. Tiglath-Pileser's wars do not, generally, appear to have been of much importance. The destruction of Damascus, the absorption of Syria, and the extension of Assyrian influence over Judaea, are the chief events of his reign. No palace or great building can be ascribed to this king. His slabs, which are tolerably numerous, show that he must have built or adorned a residence at Calah (*Nimrud*), where they were found; but, as they were not discovered *in situ*, we cannot say anything of the edifice to which they originally belonged.

Tigris is used by the LXX. as the Greek equivalent of the Hebrew *Hiddel*; and occurs also in

several of the apocryphal books, as in Tobit (vi. 1), Judith (i. 6), and Ecclesiasticus (xxiv. 25). The Tigris, like the Euphrates, rises from two principal sources. The most distant, and therefore the true, source is the western one, which is in lat. $38^{\circ} 10'$, long. $39^{\circ} 20'$ nearly, a little to the south of the high mountain lake called *Gölük* or *Gölenjik*, in the peninsula formed by the Euphrates where it sweeps round between *Palou* and *Telek*. The Tigris' source is near the south-western angle of the lake, and cannot be more than two or three miles from the channel of the Euphrates. The course of the Tigris is at first somewhat north of east, but after pursuing this direction for about 25 miles it makes a sweep round to the south, and descends by *Arghani Muden* upon Diarbekr. It then turns suddenly to the east, and flows in this direction, past *Osman Kieu* to *Til*, where it once more alters its course and takes that south-easterly direction, which it pursues, with certain slight variations, to its final junction with the Euphrates. At *Osman Kieu* it receives the second or Eastern Tigris, which descends from Niphates (the modern *Ala-Tagh*), with a course almost due south. Near *Til* a large stream flows into it from the north-east. This branch rises near *Billi*, in northern Kurdistan. From *Til* the Tigris runs southward for 20 miles through a long, narrow, and deep gorge, at the end of which it emerges upon the comparatively low but still hilly country of Mesopotamia, near *Jexirch*. Through this it flows with a course which is south-south-east to *Mosul*, thence nearly south to *Kileh-Sherghat*, and again south-south-east to *Samara*, where the hills end and the river enters on the great alluvium. The course is now more irregular. The length of the whole stream, exclusive of meanders, is reckoned at 1146 miles. The average width of the Tigris in this part of its course is 200 yards, while its depth is very considerable. Besides the three head-streams of the Tigris, the river receives, along its middle and lower course, no fewer than five important tributaries. These are the river of *Zakho* or Eastern Khnbour, the Great Zab (*Zab Ala*), the Lesser Zab (*Zab Asfal*), the Adhem, and the Diyaleh or ancient Gyndes. All these rivers flow from the high range of Zagros. The Tigris, like the Euphrates, has a flood season. Early in the month of March, in consequence of the melting of the snows on the southern flank of Niphates, the river rises rapidly. Its breadth gradually increases at Diarbekr from 100 or 120 to 250 yards. The stream is swift and turbid. The rise continues through March and April, reaching its full height generally in the first or second week of May. About the middle of May the Tigris begins to fall, and by midsummer it has reached its natural level. In October and November there is another rise and fall in consequence of the autumnal rains; but compared with the spring flood that of autumn is insignificant. The Tigris is at present better fitted for purposes of traffic than the Euphrates; but in ancient times it does not seem to have been much used as a line of trade. We find but little mention of the Tigris in Scripture. It appears indeed under the name of Hiddekel, among the rivers of Eden (Gen. ii. 14), and is there correctly described as "running eastward to Assyria." But after this we hear no more of it, if we except one doubtful allusion in Nahum (ii. 6), until the Captivity, when it becomes well known to the prophet Daniel. With him it is "the Great River." The Tigris, in its

upper course, anciently ran through Armenia and Assyria. Lower down, from about the point where it enters on the alluvial plain, it separated Babylonia from Susiana. In the wars between the Romans and the Parthians, we find it constituting, for a short time (from A.D. 114 to A.D. 117) the boundary-line between these two empires. Otherwise it has scarcely been of any political importance.

Tik'vah. 1. The father of Shallum the husband of the prophetess Huldah (2 K. xxii. 14).—2. The father of Jahziah (Ezr. x. 15).

Tik'vath (properly *Tôkêhath* or *Tokhath*). **TIK-VAH** the father of Shallum (2 Chr. xxxiv. 22).

Tile. For general information on the subject see the articles **BRICK**, **POTTERY**, **SEAL**. The expression in the A. V. rendering of Luke v. 19, "through the tiling" has given much trouble to expositors. 1. Terrace-roofs, if constructed improperly, or at the wrong season of the year, are apt to crack, and to become so saturated with rain as to be easily penetrable. May not the roof of the house in which our Lord performed his miracle, have been in this condition? 2. Or did not St. Luke, a native, probably, of Greek Antioch, use the expression "tiles," as the form of roof which was most familiar to himself and to his Greek readers without reference to the particular material of the roof in question?

Til'gath-pilne'ser. A variation, and probably a corruption, of the name **TIGLATH-PILESER** (1 Chr. v. 6, 26; 2 Chr. xxviii. 20).

Tilon. One of the four sons of Shimon, whose family is reckoned in the genealogies of Judah (1 Chr. iv. 20).

Times'us. The father of the blind man, Bartimaeus (Mark x. 46).

Timbrel, Tabret. By these words the A. V. translates the Heb. *tôph*, which is derived from an imitative root occurring in many languages not immediately connected with each other. It is the same as the Arabic and Persian *duff*, which in Spanish becomes *adufe*, a tambourine. In Old English *tabor* was used for any drum. *Tabouret* and *taborine* are diminutives of *tabor*, and denote the instrument now known as the *tambourine*. *Tabret*

Tar. (Lane's Modern Egyptians, 366, 5th ed.)

is a contraction of *tabouret*. The Heb. *tôph* is undoubtedly the instrument described by travellers as the *duff* or *diff* of the Arabs. It was used in very early times by the Syrians of Padan-aram at their merry-makings (Gen. xxi. 27). It was played principally by women (Ex. xv. 20; Judg. xi. 34; 1 Sam. xviii. 6; Ps. lxxvii. 25 [26]) as an accompaniment to the song and dance (comp. Jud. iii. 7), and appears to have been worn by them as an ornament (Jer. xxxi. 4). The *diff* of the Arabs is described by Russell (*Aleppo*, p. 94, 1st ed.) as "a hoop (sometimes with pieces of brass fixed in it to make a jingling) over which a piece of parchment

is distended. It is beat with the fingers, and is the true tympanum of the ancients, as appears from its figure in several reliefs." In Barbery it is called *tar*.

Tim'na, Tim'nah. 1. A concubine of Eliphaz son of Esau, and mother of Amalek (Gen. xxxvi. 12): it may be presumed that she was the same as Timna, sister of Lotan (ver. 22, and 1 Chr. i. 39).

—2. A duke, or phylarch, of Edom in the last list in Gen. xxxvi. 40-43 (1 Chr. i. 51-54). Timnah was probably the name of a place or a district.

Tim'nah. A name which occurs, simple and compounded, and with slight variations of form, several times, in the topography of the Holy Land.

1. A place which formed one of the landmarks on the north boundary of the allotment of Judah (Josh. xv. 10). It is probably identical with the TIMNATHAH of Josh. xix. 43, and that again with the Timnath, or more accurately Timnathah, of Samson, and the Thamnatha of the Maccabees. The modern representative of all these various forms of the same name is probably *Tibneh*, a village about two miles west of *Ain Shems* (Beth-shemesh), among the broken undulating country by which the central mountains of this part of Palestine descend to the maritime plain. In the later history of the Jews Timnah must have been a conspicuous place. It was fortified by Bacchides as one of the most important military posts of Judaea (1 Macc. ix. 50), and it became the head of a district or toparchy.—2. A town in the mountain district of Judah (Josh. xv. 57). A distinct place from that just examined.

Tim'nath. The form in which the translators of the A. V. inaccurately present two names which are certainly distinct, though it is possible that they refer to the same place. 1. TIMNATH. The scene of the adventure of Judah with his daughter-in-law Tamar (Gen. xxxviii. 12, 13, 14). There is nothing here to indicate its position. It may be identified either with the Timnah in the mountains of Judah, which was in the neighbourhood of Carmel; or with the Timnathah so familiar in the story of Samson's conflicts. The place is named in the specification of the allotment of the tribe of Dan, where the A. V. exhibits it accurately as TIMNATHAH, and its name doubtless survives in the modern *Tibneh*, which is said to lie below *Zareah*, about three miles to the S.W. of it, where the great Wady es-Surár issues upon the plain.—2. TIMNATHAH. The residence of Samson's wife (Judg. xiv. 1, 2, 5).

Tim'nath-he'eres. The name under which the city and burial-place of Joshua, previously called TIMNATH-SERAH, is mentioned in Judg. ii. 9.

Tim'nath-se'rah. The name of the city which was presented to Joshua after the partition of the country (Josh. xix. 50); and in "the border" of which he was buried (xxiv. 30). It is specified as "in Mount Ephraim on the north side of Mount Gash." In Judg. ii. 9, the name is altered to TIMNATH-HERES. The latter form is that adopted by the Jewish writers. Accordingly, they identify the place with *Kefar cheres*, which is said by Rabbi Jacob, hap-Parchi, and other Jewish travellers, to be about 5 miles S. of Shechem (*Nablis*). No place with that name appears on the maps. Another and more promising identification has, however, been suggested by Dr. Eli Smith. In his journey from *Jifna* to *Mejdel-Yaba*, about six miles from the former, he discovered the ruins of

a considerable town. Opposite the town was a much higher hill, in the north side of which are several excavated sepulchres. The whole bears the name of *Tibneh*, and although without further examination it can hardly be affirmed to be the Timnah of Joshua, yet the identification appears probable.

Tim'nite, the. Samson's father-in-law, a native of Timnathah (Judg. xv. 6).

Tim'on. One of the seven, commonly called "deacons" (Acts vi. 1-6). He was probably a Hellenist. The name of Timon stands fifth in the catalogue. Nothing further is known of him with certainty.

Timotheus. 1. A "captain of the Ammonites" (1 Macc. v. 6), who was defeated on several occasions by Judas Maccabaeus, B.C. 164 (1 Macc. v. 6, 11, 34-44). He was probably a Greek adventurer.—2. In 2 Macc. a leader named Timotheus is mentioned as having taken part in the invasion of Nicanor (B.C. 166: 2 Macc. viii. 30, ix. 3). At a later time he was driven to a stronghold, *Gazara*, which was stormed by Judas, and there Timotheus was taken and slain (2 Macc. x. 24-37). It has been supposed that the events recorded in this latter narrative are identical with those in 1 Macc. v. 6-8. But the name Timotheus was very common, and it is evident that Timotheus the Ammonite leader was not slain at Jazer (1 Macc. v. 34).—3. The Greek name of TIMOTHY (Acts xvi. 1, xvii. 14, &c.).

Tim'othy. The disciple thus named was the son of one of those mixed marriages which, though condemned by stricter Jewish opinion, were yet not uncommon in the later periods of Jewish history. The father's name is unknown: he was a Greek, i.e. a Gentile by descent (Acts xvi. 1, 3). The absence of any personal allusion to the father in the Acts or Epistles suggests the inference that he must have died or disappeared during his son's infancy. The care of the boy thus devolved upon his mother Eunice and her mother Lois (2 Tim. i. 5). Under their training his education was emphatically Jewish. "From a child" he learnt (probably in the LXX. version) to "know the Holy Scriptures" daily. The language of the Acts leaves it uncertain whether Lystra or Derbe were the residence of the devout family. The arrival of Paul and Barnabas in Lycaonia (Acts xiv. 6) brought the message of glad-tidings to Timotheus and his mother, and they received it with "unfeigned faith" (2 Tim. i. 5). If at Lystra, as seems probable from 2 Tim. iii. 11, he may have witnessed the half-completed sacrifice, the half-finished martyrdom, of Acts xiv. 19. The preaching of the Apostle on his return from his short circuit prepared him for a life of suffering (Acts xiv. 22). From that time his life and education must have been under the direct superintendence of the body of elders (ib. 23). During the interval of seven years between the Apostle's first and second journeys, the boy grew up to manhood. His zeal, probably his asceticism, became known both at Lystra and Iconium. Those who had the deepest insight into character, and spoke with a prophetic utterance, pointed to him (1 Tim. i. 18, iv. 14), as others had pointed before to Paul and Barnabas (Acts xiii. 2), as especially fit for the missionary work in which the Apostle was engaged. Personal feeling led St. Paul to the same conclusion (Acts xvi. 3), and he was solemnly set apart to do the work and possibly to bear the title of Evangelist (1 Tim. iv. 14; 2 Tim. i. 6, iv. 5). A great obstacle, however, pre-

sented itself. Timothy, though reckoned as one of the seed of Abraham, had been allowed to grow up to the age of manhood without the sign of circumcision. His condition was that of a negligent, almost of an apostate Israelite. The Jews might tolerate a heathen, as such, in the synagogue or the church, but an uncircumcised Israelite would be to them a horror and a portent. With a special view to their feelings, making no sacrifice of principle, the Apostle, who had refused to permit the circumcision of Titus, "took and circumcised" Timothy (Acts xvi. 3); and then, as conscious of no inconsistency, went on his way distributing the decrees of the council of Jerusalem, the great charter of the freedom of the Gentiles (ib. 4). Henceforth Timothy was one of his most constant companions. They and Silvanus, and probably Luke also, journeyed to Philippi (Acts xvi. 12), and there already the young Evangelist was conspicuous at once for his filial devotion and his zeal (Phil. ii. 22). His name does not appear in the account of St. Paul's work at Thessalonica, and it is possible that he remained some time at Philippi. He appears, however, at Beroea, and remains there when Paul and Silas are obliged to leave (Acts xvii. 14), going on afterwards to join his master at Athens (1 Thess. iii. 2). From Athens he is sent back to Thessalonica (ib.), as having special gifts for comforting and teaching. He returns from Thessalonica, not to Athens but to Corinth, and his name appears united with St. Paul's in the opening words of both the letters written from that city to the Thessalonians (1 Thess. i. 1; 2 Thess. i. 1). Of the next five years of his life we have no record. When we next meet with him it is as being sent on in advance when the Apostle was contemplating the long journey which was to include Macedonia, Achaia, Jerusalem, and Rome (Acts xix. 22). It is probable that he returned by the same route and met St. Paul according to a previous arrangement (1 Cor. xvi. 11), and was thus with him when the second Epistle was written to the Church of Corinth (2 Cor. i. 1). He returns with the Apostle to that city, and joins in messages of greeting to the disciples whom he had known personally at Corinth and who had since found their way to Rome (Rom. xvi. 21). He forms one of the company of friends who go with St. Paul to Philippi and then sail by themselves, waiting for his arrival by a different ship (Acts xx. 3-6). The language of St. Paul's address to the elders of Ephesus (Acts xx. 17-35) renders it unlikely that he was then left there with authority. The absence of his name from Acts xxvii. in like manner leads to the conclusion that he did not share in the perilous voyage to Italy. He must have joined the Apostle, however, apparently soon after his arrival in Rome, and was with him when the Epistles to the Philippian, to the Colossians, and to Philemon were written (Phil. i. 1, ii. 19; Col. i. 1; Philem. 1). All the indications of this period point to incessant missionary activity. Assuming the genuineness of the later date of the two epistles addressed to him, we are able to put together a few notices as to his later life. It follows from 1 Tim. i. 3 that he and his master, after the release of the latter from his imprisonment, revisited the proconsular Asia, that the Apostle then continued his journey to Macedonia, while the disciple remained, half-reluctantly, even weeping at the separation (2 Tim. i. 4), at Ephesus, to check, if possible, the outgrowth of heresy and licentiousness

which had sprung up there. The position in which he found himself might well make him anxious. He had to rule presbyters, most of whom were older than himself (1 Tim. iv. 12). There was the risk of being entangled in the disputes, prejudices, covetousness, sensuality of a great city. Leaders of rival sects were there. The name of his beloved teacher was no longer honoured as it had been. We cannot wonder that the Apostle, knowing these trials, should be full of anxiety and fear for his disciple's steadfastness. In the second epistle to him this deep personal feeling utters itself yet more fully. The last recorded words of the Apostle express the earnest hope, repeated yet more earnestly, that he might see him once again (ib. iv. 9, 21). We may hazard the conjecture that he reached him in time, and that the last hours of the teacher were soothed by the presence of the disciple whom he loved so truly. Some writers have even seen in Heb. xiii. 23 an indication that he shared St. Paul's imprisonment and was released from it by the death of Nero. Beyond this all is apocryphal and uncertain. He continues, according to the old traditions, to act as bishop of Ephesus, and dies a martyr's death under Domitian or Nerva. A somewhat startling theory as to the intervening period of his life has found favour with Calmet and others. If he continued, according to the received tradition, to be bishop of Ephesus, then he, and no other, must have been the "angel" of that church to whom the message of Rev. ii. 1-7 was addressed. The conjecture has been passed over unnoticed by most of the recent commentators on the Apocalypse.

Timothy, Epistles to. Authorship.—The question whether these Epistles were written by St. Paul was one to which, till within the last half-century, hardly any answer but an affirmative one was thought possible. They are reckoned among the Pauline Epistles in the Muratorian Canon and the Peshito version. Eusebius (*H. E.* iii. 25) places them among the *ὁμολογούμενα* of the N. T., and, while recording the doubts which affected the 2nd Epistle of St. Peter and the other *ἀντιλεγόμενα*, knows of none which affect these. They are cited as authoritative by Tertullian, Clement of Alexandria, and Irenaeus. There were indeed some notable exceptions to this *consensus*. The three Pastoral Epistles were all rejected by Marcion, Basilides, and other Gnostic teachers. Tatian, while strongly maintaining the genuineness of the Epistle to Titus, denied that of the other two. In these instances we are able to discern a dogmatic reason for the rejection. The sects which these leaders represented could not but feel that they were condemned by the teaching of the Pastoral Epistles. Origen mentions some who excluded 2 Tim. from the Canon for a very different reason. The names of Janes and Jambres belonged to an Apocryphal history, and from such a history St. Paul never would have quoted. The Pastoral Epistles have, however, been subjected to a more elaborate scrutiny by the criticism of Germany. The first doubts were uttered by J. C. Schmidt. These were followed by the *Sendschreiben* of Schleiermacher, who, assuming the genuineness of 2 Tim. and Titus, undertook, on that hypothesis, to prove the spuriousness of 1 Tim. Eichhorn and De Wette denied the Pauline authorship of all three. Schott ventures on the hypothesis that Luke was the writer. Baur assigns them to no earlier period than the latter half of the

second century, after the death of Polycarp in A.D. 167. The chief elements of the alleged evidence of spuriousness may be arranged as follows:—I. *Language*.—The style, it is urged, is different from that of the acknowledged Pauline Epistles. There is less logical continuity, a want of order and plan, subjects brought up, one after the other, abruptly. Not less than fifty words, most of them striking and characteristic, are found in these Epistles which are not found in St. Paul's writings. Some of these words, it is urged, belong to the Gnostic terminology of the 2nd century. On the other side it may be said, (1) that there is no test so uncertain as that of language and style thus applied. The style of one man is stereotyped, formed early, and enduring long. That of another changes, more or less, from year to year. In proportion as the man is a solitary thinker, or a strong assertor of his own will, will he tend to the former state. In proportion to his power of receiving impressions from without, of sympathising with others, will be his tendency to the latter. (2) If this is true generally, it is so yet more emphatically when the circumstances of authorship are different. The language of a Bishop's Charge is not that of his letters to his private friends. (3) Other letters, again, were dictated to an amanuensis. These have every appearance of having been written with his own hand, and this can hardly have been without its influence on their style. (4) It may be added, that to whatever extent a forger of spurious Epistles would be likely to form his style after the pattern of the recognised ones, to that extent the diversity which has been dwelt on is, within the limits that have been above stated, not against, but for the genuineness of these Epistles. (5) Lastly, there is the positive argument that there is a large common element, both of thoughts and words, shared by these Epistles and the others.—II. It has been urged against the reception of the Pastoral Epistles that they cannot be fitted in to the records of St. Paul's life in the Acts. To this there is a threefold answer. (1) The difficulty has been enormously exaggerated. (2) If the difficulty were as great as it is said to be, the mere fact that we cannot fix the precise date of three letters in the life of one of whose ceaseless labours and journeyings we have, after all, but fragmentary records, ought not to be a stumblingblock. (3) Here, as before, the reply is obvious, that a man composing counterfeit Epistles would have been likely to make them square with the acknowledged records of the life.—III. The three Epistles present, it is said, a more developed state of Church organisation and doctrine than that belonging to the lifetime of St. Paul. (1) The rule that the bishop is to be "the husband of one wife" (1 Tim. iii. 2; Tit. i. 6) indicates the strong opposition to second marriages which characterised the 2nd century. (2) The "younger widows" of 1 Tim. v. 11 cannot possibly be literally widows. It follows therefore that the word *χήραι* is used, as it was in the 2nd century, in a wider sense, as denoting a consecrated life. (3) The rules affecting the relation of the bishops and elders indicate a hierarchic development characteristic of the Petrine element, which became dominant in the Church of Rome in the post-Apostolic period. (4) The term *αἵρεσις* is used in its later sense. (5) The upward progress from the office of deacon to that of presbyter, implied in 1 Tim. iii. 13, belongs to a later period. It is not difficult

to meet objections which contain so large an element of mere arbitrary assumption. (1) The rule which makes monogamy a condition of the episcopal office is very far removed from the harsh, sweeping censures of all second marriages which we find in Athenagoras and Tertullian. (2) There is not a shadow of proof that the "younger widows" were not literally such. (3) The use of *ἐπισκοποι* and *πρεσβύτεροι* in the Pastoral Epistles as equivalent (Tit. i. 5, 7), and the absence of any intermediate order between the bishops and deacons (1 Tim. iii. 1-8), are quite unlike what we find in the Ignatian Epistles and other writings of the 2nd century. (4) The word *αἵρεσις* has its counterpart in the *αἵρεσις* of 1 Cor. xi. 19. (5) The best interpreters do not see in 1 Tim. iii. 13 the transition from one office to another.—IV. Still greater stress is laid on the indications of a later date in the descriptions of the false teachers noticed in the Pastoral Epistles. These point, it is said, unmistakably to Marcion and his followers. The "genealogies" of 1 Tim. i. 4, Tit. iii. 9, in like manner, point to the Aeon of the Valentinians and Ophites. The doctrine that the "Resurrection was past already" (2 Tim. ii. 18), was thoroughly Gnostic in its character. Carefully elaborated as this part of Baur's attack has been, it is perhaps the weakest and most capricious of all. The false teachers of the Pastoral Epistles are predominantly Jewish (1 Tim. i. 7), belonging altogether to a different school from that of Marcion. Even the denial of the Resurrection, we may remark, belongs as naturally to the mingling of a Sadducean element with an Eastern mysticism as to the teaching of Marcion. The whole line of argument, indeed, first misrepresents the language of St. Paul in these Epistles and elsewhere, and then assumes the entire absence from the first century of even the germs of the teaching which characterised the second.—Date.—Assuming the two Epistles to Timothy to have been written by St. Paul, to what period of his life are they to be referred?—*First Epistle to Timothy*.—The direct data in this instance are very few. (1) i. 3, implies a journey of St. Paul from Ephesus to Macedonia, Timothy remaining behind. (2) The age of Timothy is described as "youth" (iv. 12). (3) The general resemblance between the two Epistles indicates that they were written at or about the same time. Three hypotheses have been maintained as fulfilling these conditions. (A) The journey in question has been looked on as an unrecorded episode in the two years' work at Ephesus of Acts xix. 10. (B) It has been identified with the journey of Acts xx. 1, after the tumult at Ephesus. On either of these suppositions the date of the Epistle has been fixed at various periods after St. Paul's arrival at Ephesus, before the conclusion of his first imprisonment at Rome. (C) It has been placed in the interval between St. Paul's first and second imprisonments at Rome. Of these conjectures, A and B have the merit of bringing the Epistle within the limit of the authentic records of St. Paul's life, but they have scarcely any other. In favour of C as compared with A or B, is the internal evidence of the contents of the Epistle. The language of the Epistle also has a bearing on the date. Assume a later date, and then there is room for the changes in thought and expression which, in a character like St. Paul's, were to be expected as the years went by. The only objections to the position thus assigned are—(1) the doubtfulness of

the second imprisonment altogether; and (2) the "youth" of Timothy at the time when the letter was written (iv. 12).—*Second Epistle to Timothy.*—The number of special names and incidents in the 2nd Epistle make the chronological data more numerous. Here also there are the conflicting theories of an earlier and later date, (A) during the imprisonment of Acts xxviii. 30, and (B) during the second imprisonment already spoken of. (1) A parting apparently recent, under circumstances of special sorrow (i. 4). Not decisive. (2) A general desertion of the Apostle even by the disciples of Asia (i. 15). Nothing in the Acts indicates anything like this before the imprisonment of Acts xxviii. 30. This, therefore, so far as it goes, must be placed on the side of B. (3) The position of St. Paul as suffering (i. 12), in bonds (ii. 9), expecting "the time of his departure" (iv. 6), forsaken by almost all (iv. 16). Not quite decisive, but tending to B rather than A. (4) The mention of Onesiphorus, and of services rendered by him both at Rome and Ephesus (i. 16-18). Not decisive again, but the tone is rather that of a man looking back on a past period of his life. This therefore tends to B rather than A. (5) The abandonment of St. Paul by Demas (iv. 10). Strongly in favour of B. (6) The presence of Luke (iv. 11). Agrees well enough with A (Col. iv. 14), but is perfectly compatible with B. (7) The request that Timothy would bring Mark (iv. 11). In connexion with the mention of Demas, tends decidedly to B. (8) Mention of Tychicus as sent to Ephesus (iv. 12). Appears, as connected with Eph. vi. 21, 22, Col. iv. 7, in favour of A, yet may just as well fit in with B. (9) The request that Timothy would bring the cloak and books left at Troas (iv. 13). The circumstances of the first journey from Troas present no trace of the haste and suddenness which the request more than half implies. On the whole, then, this must be reckoned as in favour of B. (10) "Alexander the coppersmith did me much evil," "greatly withstood our words" (iv. 14, 15). Somewhat in favour of A. (11) The abandonment of the Apostle in his first defence, and his deliverance "from the mouth of the lion" (iv. 16, 17). Fits in as a possible contingency with either hypothesis. (12) "Erastus abode at Corinth, but Trophimus I left at Miletus sick" (iv. 20). Language, as in (9), implying a comparatively recent visit to both places. If, however, the letter were written during the first imprisonment, then Trophimus had not been left at Miletus, but had gone on with St. Paul to Jerusalem (Acts xxi. 29), and the mention of Erastus as remaining at Corinth would have been superfluous to one who had left that city at the same time as the Apostle (Acts xx. 4). (13) "Hasten to come before winter." Assuming A, the presence of Timothy in Phil. i. 1; Col. i. 1; Philem. 1, might be regarded as the consequence of this; but then, as shown in (5) and (7), there are almost insuperable difficulties in supposing this Epistle to have been written before those three. (14) The salutations from Eubulus, Pudens, Linus, and Claudia. Without laying much stress on this, it may be said that the absence of these names from all the Epistles, which, according to A, belong to the same period, would be difficult to explain. B leaves it open to conjecture that they were converts of more recent date. On the whole, it is believed that the evidence preponderates strongly in favour of the later date.—

Places.—In this respect as in regard to time, 1 Tim. leaves much to conjecture. The absence of any local reference but that in i. 3, suggests Macedonia or some neighbouring district. In A and other MSS. in the Peshito, Ethiopic, and other versions, Laodicea is named in the inscription as the place whence it was sent. The Second Epistle is free from this conflict of conjectures. With the solitary exception of Böttger, who suggests Caesarea, there is a *consensus* in favour of Rome.—*Structure and Characteristics.*—Assuming the genuineness of the Epistles, some characteristic features remain to be noticed. (1) The ever-deepening sense in St. Paul's heart of the Divine Mercy, of which he was the object. (2) The greater abruptness of the Second Epistle. (3) The absence, as compared with St. Paul's other Epistles, of Old Testament references. (4) The conspicuous position of the "faithful sayings" as taking the place occupied in other Epistles by the O. T. Scriptures. (5) The tendency of the Apostle's mind to dwell more on the universality of the redemptive work of Christ (1 Tim. ii. 3-6, iv. 10). (6) The importance attached by him to the practical details of administration. (7) The recurrence of doxologies (1 Tim. i. 17, vi. 15, 16; 2 Tim. iv. 18).

Tin. Among the various metals found among the spoils of the Medianites, tin is enumerated (Num. xxxi. 22). It was known to the Hebrew metal-workers as an alloy of other metals (Is. i. 25; Ez. xxii. 18, 20). The markets of Tyre were supplied with it by the ships of Tarsish (Ez. xxvii. 12). It was used for plummets (Zech. iv. 10), and was so plentiful as to furnish the writer of Ecclesiasticus (xlvii. 18) with a figure by which to express the wealth of Solomon. In the Homeric times the Greeks were familiar with it. Twenty layers of tin were in Agamemnon's cuirass. Copper, tin, and gold were used by Hephaestus in welding the famous shield of Achilles. No allusion to it is found in the *Odyssey*. The melting of tin in a smelting-pot is mentioned by Hesiod (*Theog.* 862). Tin is not found in Palestine. Whence, then, did the ancient Hebrews obtain their supply? "Only three countries are known to contain any considerable quantity of it: Spain and Portugal, Cornwall and the adjacent parts of Devonshire, and the islands of Junk, Ceylon, and Banca, in the Straits of Malacca" (Kenrick, *Phoenicia*, p. 212). There can be little doubt that the mines of Britain were the chief source of supply to the ancient world. With regard to the tin obtained from Spain, although the metal was found there, it does not appear to have been produced in sufficient quantities to supply the Phoenician markets. We are therefore driven to conclude that it was from the Cassiterides, or tin districts of Britain, that the Phoenicians obtained the great bulk of this commodity, and that this was done by the direct voyage from Gades. Pliny (vi. 36) identifies the *cassiteros* of the Greeks with the *plumbum album* or *candidum* of the Romans, which is *oxytin*. *Stannum*, he says, is obtained from an ore containing lead and silver, and is the first to become melted in the furnace. It is the same which the Germans call *Werk*, and is apparently the meaning of the Hebr. *bēḏū* in Is. i. 25.

Tiph'sah is mentioned in 1 K. iv. 24 as the limit of Solomon's empire towards the Euphrates, and in 2 K. xv. 16 it is said to have been attacked by Monahem. It is generally admitted that the town

intended, at any rate in the former passage, is that which the Greeks and Romans knew under the name of Thapsacus, situated in Northern Syria, at the point where it was usual to cross the Euphrates. Thapsacus was a town of considerable importance in the ancient world. Xenophon, who saw it in the time of Cyrus the younger, calls it "great and prosperous." It must have been a place of considerable trade, the land traffic between East and West passing through it. It is a fair conjecture that Solomon's occupation of the place was connected with his efforts to establish a line of trade with Central Asia directly across the continent, and that Tadmor was intended as a resting-place on the journey to Thapsacus. Thapsacus was the place at which armies marching east or west usually crossed the "Great River." It has been generally supposed that the site of Thapsacus was the modern *Deir*. But the Euphrates expedition proved that there is no ford at *Deir*, and indeed showed that the only ford in this part of the course of the Euphrates is at *Suriyeh*, 45 miles below Balis, and 165 above *Deir*. This then must have been the position of Thapsacus.

Tiras. The youngest son of Japheth (Gen. x. 2). We have no clue, as far as the Bible is concerned, to guide us as to the identification of it with any particular people. Ancient authorities generally fixed on the Thracians, as presenting the closest verbal approximation to the name: the occasional rendering *Persia* probably originated in a corruption of the original text. The correspondence between Thrace and Tiras is not so complete as to be convincing. Granted, however, the verbal identity, no objection would arise on ethnological grounds to placing the Thracians among the Japhetic races. Their precise ethnic position is indeed involved in great uncertainty; but all authorities agree in their general Indo-European character. Other explanations have been offered of the name Tiras, of which we may notice the Agathyrsi, the first part of the name (*Agā*) being treated as a prefix; Taurus and the various tribes occupying that range; the river Tyras, *DNiester*, with its cognominous inhabitants, the Tyritae; and, lastly, the maritime Tyrrheni.

Tirathites, the. One of the three families of Scribes residing at Jabez (1 Chr. ii. 55), the others being the Shimeathites and Suchathites. The passage is hopelessly obscure.

Tire. An ornamental headdress worn on festive occasions (Ex. xxiv. 17, 23). [HEADRESS.]

Tirhakah. King of Ethiopia, Cush, the opponent of Sennacherib (2 K. xix. 9; Is. xxxvii. 9). This was B.C. 713, unless we suppose that the expedition took place in the 24th instead of the 14th year of Hezekiah, which would bring it to B.C. cir. 703. If it were an expedition later than that of which the date is mentioned, it must have been before B.C. cir. 698, Hezekiah's last year. But if the reign of Manasseh is reduced to 35 years, these dates would be respectively B.C. cir. 693, 683, and 678, and these numbers might have to be slightly modified, the fixed date of the capture of Samaria, B.C. 721, being abandoned. According to Manetho's epitomists, Tarkos or Tarakos was the third and last king of the xxvth dynasty, which was of Ethiopians. We should perhaps date Tirhakah's accession B.C. cir. 695, and assign him a reign of 26 years. In this case we should be obliged to take the later reckoning of the Biblical events, were it not for the possibility that Tirhakah

ruled over Ethiopia before becoming king of Egypt. The name of Tirhakah is written in hieroglyphics TEHARKA. Of the events of his reign little else is known.

Tirhanah. Son of Caleb ben-Hezron by his concubine Maachah (1 Chr. ii. 48).

Tir'ia. Son of Jehaleleel of the tribe of Judah (1 Chr. iv. 16).

Tirhah'tha (always written with the article). The title of the governor of Judaea under the Persians, derived by Gesenius from a Persian root signifying "stern," "severe." It is added as a title after the name of Nehemiah (Neh. viii. 9, x. 1 [Heb. 2]); and occurs also in three other places. In the margin of the A.V. (Ezr. ii. 63; Neh. vii. 65, x. 1) it is rendered "governor;" an explanation justified by Neh. xii. 26, where Nehemiah is called the *Pechah*, which, according to Gesenius, denotes the prefect or governor of a province of less extent than a satrapy.

Tir'sah. The youngest of the five daughters of Zelophehad (Num. xvi. 35, xxvii. 1, xxxvi. 11; Josh. xvii. 3).

Tir'sah. An ancient Canaanite city, whose king is enumerated amongst the twenty-one overthrown in the conquest of the country (Josh. xii. 24). It reappears as a royal city—the residence of Jeroboam (1 K. xiv. 17), and of his successors. Zimri was besieged there by Omri, and perished in the flames of his palace (ib. 18). Once, and once only, does Tishah reappear, as the seat of the conspiracy of Menahem ben-Gaddi against the wretched Shallum (2 K. xv. 14, 16). Its reputation for beauty throughout the country must have been wide-spread. It

in this sense that it is mentioned in the Song of Solomon. Eusebius mentions it in connexion with Menahem, and identifies it with a "village of Samaritans in Batanea." Brocardus places Thersa on a high mountain, three leagues (*leucæ*) from Samaria to the east. This is exactly the direction, and very nearly the distance, of *Tullizah*, a place in the mountains north of *Nablis*. The name may very probably be a corruption of Tirzah.

Tishbite, the. The well-known designation of Elijah (1 K. xvii. 1, xxi. 17, 28; 2 K. i. 3, 8, ix. 36). (1.) The name naturally points to a place called Tishbeh, Tishbi, or rather perhaps Tesheb, as the residence of the prophet. Assuming that a town is alluded to, as Elijah's native place, it is not necessary to infer that it was itself in Gilead, as Epiphanius, Adrichomius, Castell, and others have imagined. The commentators and lexicographers, with few exceptions, adopt the name "Tishbite" as referring to the place TISHBE in Naphtali, which is found in the LXX. text of Tobit i. 2. The difficulty in the way of this is the great uncertainty in which the text of that passage is involved. Bunsen suggests in support of the reading "the Tishbite from Tishbi of Gilead," that the place may have been purposely so described, in order to distinguish it from the town of the same name in Galilee. (2.) But *hattishbi* has not always been read as a proper name, referring to a place. It has been pointed so as to make it mean "the stranger." This is done by Michaelis.

Titans. These children of Uranus (Heaven) and Gaia (Earth) were, according to the earliest Greek legends, the vanquished predecessors of the Olympian gods, condemned by Zeus to dwell in Tartarus, yet not without retaining many relics of their ancient dignity. By later (Latin) poets they were

confounded with the kindred *Gigantes*. In 2 Sam. v. 18, 22, "the valley of Rephaim" is represented by *ἡ κοιλὰς τῶν τιτάνων* instead of *ἡ κοιλὰς τῶν γιγάντων*, 1 Chr. xi. 15, xiv. 9, 13. Several Christian fathers inclined to the belief that *Τιτάν* was the mystic name of "the beast" indicated in Rev. xiii. 18.

Tithe. Numerous instances of the use of tithes are found both in profane and also in Biblical history, prior to or independently of the appointment of the Levitical tithes under the Law. In Biblical history the two prominent instances are—1. Abram presenting the tenth of all his property, or rather of the spoils of his victory, to Melchizedek (Gen. xiv. 20; Heb. vii. 2, 6). 2. Jacob, after his vision at Luz, devoting a tenth of all his property to God in case he should return home in safety (Gen. xxviii. 22). The first enactment of the Law in respect of tithe is the declaration that the tenth of all produce, as well as of flocks and cattle, belongs to Jehovah, and must be offered to Him. 2. That the tithe was to be paid in kind, or, if redeemed, with an addition of one-fifth to its value (Lev. xxvii. 30-33). This tenth, called *Terumoth*, is ordered to be assigned to the Levites, as the reward of their service, and it is ordered further, that they are themselves to dedicate to the Lord a tenth of these receipts, which is to be devoted to the maintenance of the high-priest (Num. xviii. 21-28). This legislation is modified or extended in the Book of Deuteronomy, i. e. from thirty-eight to forty years later. Commands are given to the people, 1. to bring their tithes, together with their votive and other offerings and first-fruits to the chosen centre of worship, the metropolis, there to be eaten in festive celebration in company with their children, their servants, and the Levites (Deut. xii. 5-18). 2. All the produce of the soil was to be tithed every year, and these tithes with the firstlings of the flock and herd were to be eaten in the metropolis. 3. But in case of distance, permission is given to convert the produce into money, which is to be taken to the appointed place, and there laid out in the purchase of food for a festival celebration, in which the Levite is, by special command, to be included (Deut. xiv. 22-27). 4. Then follows the direction, that at the end of three years all the tithe of that year is to be gathered and laid up "within the gates," and that a festival is to be held, in which the stranger, the fatherless, and the widow, together with the Levite, are to partake (*ib.* vers. 28, 29). 5. Lastly, it is ordered that after taking the tithe in each third year, "which is the year of tithing," an exculpatory declaration is to be made by every Israelite, that he has done his best to fulfil the divine command (Deut. xxvi. 12-14). From all this we gather, 1. That one-tenth of the whole produce of the soil was to be assigned for the maintenance of the Levites. 2. That out of this the Levites were to dedicate a tenth to God, for the use of the high-priest. 3. That a tithe, in all probability a *second* tithe, was to be applied to festival purposes. 4. That in every third year, either this festival tithe or a *third* tenth was to be eaten in company with the poor and the Levites. The question arises, were there *three* tithes taken in this third year; or is the third tithe only the second under a different description? It must be allowed that the *third* tithe is not without support. Josephus distinctly says that one-tenth was to be given to the priest and Levites, one-tenth was

to be applied to feasts in the metropolis, and that a tenth besides these was every third year to be given to the poor (comp. Tob. i. 7, 8). On the other hand, Maimonides says the third and sixth years' *second* tithe was shared between the poor and the Levites, i. e. that there was no third tithe. Of these opinions, that which maintains three separate and complete tithings seems improbable. It is plain that under the kings the tithe-system partook of the general neglect into which the observance of the Law declined, and that Hezekiah, among his other reforms, took effectual means to revive its use (2 Chr. xxxi. 5, 12, 19). Similar measures were taken after the Captivity by Nehemiah (Neh. xii. 44), and in both these cases special officers were appointed to take charge of the stores and store-houses for the purpose. Yet, notwithstanding partial evasion or omission, the system itself was continued to a late period in Jewish history (Heb. vii. 5-8; Matth. xxiii. 23; Luke xviii. 12).

Titus Manlius. [MANLIUS.]

Titus. Our materials for the biography of this companion of St. Paul must be drawn entirely from the notices of him in the Second Epistle to the Corinthians, the Galatians, and to Titus himself, combined with the Second Epistle to Timothy. He is not mentioned in the Acts at all. Taking the passages in the Epistles in the chronological order of the events referred to, we turn first to Gal. ii. 1, 3. We conceive the journey mentioned here to be identical with that (recorded in Acts xv.) in which Paul and Barnabas went from Antioch to Jerusalem to the conference which was to decide the question of the necessity of circumcision to the Gentiles. Here we see Titus in close association with Paul and Barnabas at Antioch. He goes with them to Jerusalem. His circumcision was either not insisted on at Jerusalem, or, if demanded, was firmly resisted. He is very emphatically spoken of as a Gentile, by which is most probably meant that both his parents were Gentiles. Titus would seem, on the occasion of the council, to have been specially a representative of the church of the uncircumcision. It is to our purpose to remark that, in the passage cited above, Titus is so mentioned as apparently to imply that he had become personally known to the Galatian Christians. After leaving Galatia (Acts xviii. 23), and spending a long time at Ephesus (Acts xix. 1-xx. 1), the Apostle proceeded to Macedonia by way of Troas. Here he expected to meet Titus (2 Cor. ii. 13), who had been sent on a mission to Corinth. In this hope he was disappointed, but in Macedonia Titus joined him (2 Cor. vii. 6, 7, 13-15). The mission to Corinth had reference to the immoralities rebuked in the First Epistle, and to the effect of that First Epistle on the offending church. We learn further that the mission was so far successful and satisfactory. But if we proceed further, we discern another part of the mission with which he was entrusted. This had reference to the collection, at that time in progress, for the poor Christians of Judaea (viii. 6). Thus we are prepared for what the Apostle now proceeds to do after his encouraging conversations with Titus regarding the Corinthian Church. He sends him back from Macedonia to Corinth, in company with two other trustworthy Christians, bearing the Second Epistle, and with an earnest request (viii. 6, 17) that he would see to the completion of the collection (viii. 6). It has generally been considered doubtful who the

ἀδελφοί were (1 Cor. xvi. 11, 12) that took the First Epistle to Corinth. Most probably they were Titus and his companion, whoever that might be, who is mentioned with him in the second letter (2 Cor. xii. 18). A considerable interval now elapses before we come upon the next notices of this disciple. St. Paul's first imprisonment is concluded, and his last trial is impending. In the interval between the two, he and Titus were together in Crete (Tit. i. 5). We see Titus remaining in the island when St. Paul left it, and receiving there a letter written to him by the Apostle. From this letter we gather the following biographical details:—In the first place we learn that he was originally converted through St. Paul's instrumentality (i. 4). Next we learn the various particulars of the responsible duties which he had to discharge in Crete. He is to complete what St. Paul had been obliged to leave unfinished (i. 5), and he is to organise the Church throughout the island by appointing presbyters in every city. Next he is to control and bridle (ver. 11) the restless and mischievous Judaizers, and he is to be peremptory in so doing (ver. 13).^{*} He is to urge the duties of a decorous and Christian life upon the women (ii. 3-5), some of whom (ii. 3) possibly had something of an official character (vers. 3, 4). The notices which remain are more strictly personal. Titus is to look for the arrival in Crete of Artemas and Tychicus (iii. 12), and then he is to hasten to join St. Paul at Nicopolis, where the Apostle is proposing to pass the winter. Zenas and Apollon are in Crete, or expected there; for Titus is to send them on their journey, and supply them with whatever they need for it (iii. 13). Whether Titus did join the Apostle at Nicopolis we cannot tell. But we naturally connect the mention of this place with what St. Paul wrote at no great interval of time afterwards, in the last of the Pastoral Epistles (2 Tim. iv. 10); for Dalmatia lay to the north of Nicopolis, at no great distance from it. From the form of the whole sentence, it seems probable that this disciple had been with St. Paul in Rome during his final imprisonment; but this cannot be asserted confidently. The traditional connexion of Titus with Crete is much more specific and constant, though here again we cannot be certain of the facts. He is said to have been permanent bishop in the island, and to have died there at an advanced age. The modern capital, *Candia*, appears to claim the honour of being his burial-place. In the fragment by the lawyer Zenas, Titus is called Bishop of Gortyna. Lastly, the name of Titus was the watchword of the Cretans when they were invaded by the Venetians.

Titus, Epistle to. There are no specialities in this Epistle which require any very elaborate treatment distinct from the other Pastoral Letters of St. Paul. If those two were not genuine, it would be difficult confidently to maintain the genuineness of this. On the other hand, if the Epistles to Timothy are received as St. Paul's, there is not the slightest reason for doubting the authorship of that to Titus. Nothing can well be more explicit than the quotations in Irenaeus, Clemens Alexandrinus, Tertullian, to say nothing of earlier allusions in Justin Martyr, Theophilus, and Clemens Romanus. As to internal features, we may notice, in the first place, that the Epistle to Titus has all the characteristics of the other Pastoral Epistles. This tends to show that this Letter was written about the same time and under similar circumstances with

the other two. But, on the other hand, this Epistle has marks in its phraseology and style which assimilate it to the general body of the Epistles of St. Paul. As to any difficulty arising from supposed indications of advanced hierarchical arrangements, it is to be observed that in this Epistle *πρεσβύτερος* and *ἐπίσκοπος* are used as synonyms (i. 5, 7), just as they are in the address at Miletus about the year 58 A.D. (Acts xx. 17, 28). At the same time this Epistle has features of its own, especially a certain tone of abruptness and severity, which probably arises partly out of the circumstances of the Cretan population, partly out of the character of Titus himself. Concerning the contents of this Epistle, something has already been said in the article on **TITUS**. No very exact subdivision is either necessary or possible. As to the time and place and other circumstances of the writing of this Epistle, the following scheme of filling up St. Paul's movements after his first imprisonment will satisfy all the conditions of the case.—We may suppose him (possibly after accomplishing his long-projected visit to Spain) to have gone to Ephesus, and taken voyages from thence, first to Macedonia and then to Crete, during the former to have written the First Epistle to Timothy, and after returning from the latter to have written the Epistle to Titus, being at the time of despatching it on the point of starting for Nicopolis, to which place he went, taking Miletus and Corinth on the way. At Nicopolis we may conceive him to have been finally apprehended and taken to Rome, whence he wrote the Second Epistle to Timothy.

Tizite, the. The designation of Joha, one of the heroes of David's army (1 Chr. xi. 45). It occurs nowhere else, and nothing is known of the place or family which it denotes.

To'ah. A Kohathite Levite, ancestor of Sampel and Heman (1 Chr. vi. 34 [19]).

Tob-ado'ni'jah. One of the Levites sent by Jehoshaphat through the cities of Judah to teach the Law to the people (2 Chr. xvii. 8).

Tob, the Land of. The place in which Jephthah took refuge when expelled from home by his half-brother (Judg. xi. 3); and where he remained, at the head of a band of freebooters, till he was brought back by the sheikhs of Gilead (ver. 5). The narrative implies that the land of Tob was not far distant from Gilead; at the same time, from the nature of the case, it must have lain out towards the eastern deserts. It is undoubtedly mentioned again in 2 Sam. x. 6, 8, as *Ishtob*, i. e. *Man of Tob*, meaning, according to a common Hebrew idiom, the "men of Tob." After an immense interval it appears again, in the Maccabean history (1 Macc. v. 13) in the names Tobie and Tubieni (2 Macc. xii. 17). No identification of this ancient district with any modern one has yet been attempted. The name *Tell Dobbe*, or, as it is given by the latest explorer of those regions, *Tell Dibbe*, attached to a ruined site at the south end of the *Lejah*, a few miles N.W. of *Kendawat*, and also that of *ed Dab*, some twelve hours east of the mountain *el Kuleit*, are both suggestive of Tob.

Tobiah. 1. "The children of Tobiah" were a family who returned with Zerubbabel, but were unable to prove their connexion with Israel (Ezr. ii. 60; Neh. vii. 62).—2. "Tobiah the slave, the Ammonite," played a conspicuous part in the rancorous opposition made by Sanballat the Moabite and his adherents to the rebuilding of Jerusalem.

The two races of Moab and Ammon found in these men fit representatives of that hereditary hatred to the Israelites which began before the entrance into Canaan, and was not extinct when the Hebrews had ceased to exist as a nation. But Tobiah, though a slave (Neh. ii. 10, 19), unless this is a title of opprobrium, and an Ammonite, found means to ally himself with a priestly family, and his son Johanan married the daughter of Meshullam the son of Berechiah (Neh. vi. 18). He himself was the son-in-law of Shechaniah the son of Arah (Neh. vi. 17), and these family relations created for him a strong faction among the Jews. Ewald conjectures that Tobiah had been a page ("slave") at the Persian court, and, being in favour there, had been promoted to be satrap of the Ammonites. But it almost seems that against Tobiah there was a stronger feeling of animosity than against Sanballat, and that this animosity found expression in the epithet "the slave," which is attached to his name.

Tobias. The Greek form of the name TOBIAH or TOBIJAH. 1. The son of Tobit, and central character in the book of that name.—2. The father of Hycanus, apparently a man of great wealth and reputation at Jerusalem in the time of Seleucus Philopator (cir. B.C. 187). In the high-priestly schism which happened afterwards "the sons of Tobia" took a conspicuous part.

Tobie, the Places of (1 Macc. v. 13). It is in all probability identical with the land of Tob.

Tobie'l, the father of Tobit and grandfather of Tobias (1), Tob. i. 1.

Tobijah. 1. One of the Levites sent by Jehoshaphat to teach the Law in the cities of Judah (2 Chr. xvii. 8).—2. One of the Captivity in the time of Zechariah, in whose presence the prophet was commanded to take crowns of silver and gold and put them on the head of Joshua the high-priest (Zech. vi. 10, 14). Rosenmüller conjectures that he was one of a deputation who came up to Jerusalem, from the Jews who still remained in Babylon, with contributions of gold and silver for the Temple. But Maurer considers that the offerings were presented by Tobijah and his companions.

Tobit. Father of Tobias (Tob. i. 1, &c.). [TOBIT, BOOK OF.]

To'bit, Book of. The book is called simply Tobit in the old MSS. At a later time the opening words of the book were taken as a title. 1. *Text.*—The book exists at present in Greek, Latin, Syriac, and Hebrew texts, which differ more or less from one another in detail, but yet on the whole are so far alike that it is reasonable to suppose that all were derived from one written original, which was modified in the course of translation or transcription. The Greek text is found in two distinct recensions. The one is followed by the mass of the MSS. of the LXX., and gives the oldest text which remains. The other is only fragmentary, and manifestly a revision of the former. Of this, one piece (i. 1-ii. 2) is contained in the Cod. Sinaiticus (=Cod. Frid. Augustanus), and another in three later MSS. The Latin texts are also of two kinds. The common (Vulgate) text is due to Jerome, who formed it by a very hasty revision of the old Latin version with the help of a Chaldee copy, which was translated into Hebrew for him by an assistant who was master of both languages. It is of very little critical value. The ante-Hieronymian (*Vetus Latina*) texts are far more valuable, though these present considerable variations among themselves,

as generally happens, and represent the revised and not the original Greek text. The Hebrew versions are of no great weight. The Syriac version is of a composite character.—2. *Historical character.*—The narrative seems to have been received without inquiry or dispute as historically true till the rise of free criticism at the Reformation. Luther expressed doubts as to its literal truth, and these doubts gradually gained a wide currency among Protestant writers. Bertholdt has given a summary of alleged errors in detail, but the question turns rather upon the general complexion of the history than upon minute objections. This, however, is fatal to the supposition that the book could have been completed shortly after the fall of Nineveh (B.C. 606; Tob. xiv. 15), and written, in the main, some time before (Tob. xii. 20). The whole tone of the narrative bespeaks a later age; and above all, the doctrine of good and evil spirits is elaborated in a form which belongs to a period considerably posterior to the Babylonian Captivity (Asmodeus, iii. 8, vi. 14, viii. 3; Raphael, xii. 15). As the book stands it is a distinctly didactic narrative. Its point lies in the moral lesson which it conveys, and not in the incidents.—3. *Original Language and Revisions.*—In the absence of all direct evidence, considerable doubt has been felt as to the original language of the book. The superior clearness, simplicity, and accuracy of the LXX. text prove conclusively that this is nearer the original than any other text which is known, if it be not, as some have supposed, the original itself. Indeed, the arguments which have been brought forward to show that it is a translation are far from conclusive. The style, again, though harsh in parts, and far from the classical standard, is not more so than some books which were undoubtedly written in Greek (e. g. the Apocalypse); and there is little, if anything, in it which points certainly to the immediate influence of an Aramaic text. To this it may be added that Origen was not acquainted with any Hebrew original; and the Chaldee copy which Jerome used, as far as its character can be ascertained, was evidently a later version of the story. On the other hand, there is no internal evidence against the supposition that the Greek text is a translation. The various texts which remain have already been enumerated. Of these, three varieties may be distinguished: (1) the LXX.; (2) the revised Greek text, followed by the Old Latin in the main, and by the Syriac in part; and (3) the Vulgate Latin. The Hebrew versions have no critical value. (1) The LXX. is followed by A. V., and has been already characterised as the standard to which the others are to be referred. (2) The revised text is based on the LXX. Greek, which is at one time extended, and then compressed, with a view to greater fullness and clearness. (3) The Vulgate text was derived in part from a Chaldee copy which was translated by word of mouth into Hebrew for Jerome, who in turn dictated a Latin rendering to a secretary. On the whole, it is more concise than the Old Latin; but it contains interpolations and changes, many of which mark the asceticism of a late age.—4. *Date and place of Composition.*—The data for determining the age of the book and the place where it was compiled are scanty. Eichhorn places the author after the time of Darius Hystaspis. Bertholdt brings the book considerably later than Seleucus Nicator (cir. B.C. 250-200), and supposes that it was written by a

Galilean or Babylonian Jew, from the prominence given to those districts in the narrative. De Wette leaves the date undetermined, but argues that the author was a native of Palestine. Ewald fixes the composition in the far East, towards the close of the Persian period (cir. 350 B.C.). This last opinion is almost certainly correct. Its date will fall somewhere within the period between the close of the work of Nehemiah and the invasion of Alexander (cir. B.C. 430-334). The contents of the book furnish also some clue to the place where it was written, and would suggest that he was living out of Palestine, in some Persian city, perhaps Babylon, where his countrymen were exposed to the capricious cruelty of heathen governors, and in danger of neglecting the Temple-service. If these conjectures as to the date and place of writing be correct, it follows that we must assume the existence of a Hebrew or Chaldee original. And even if the date of the book be brought much lower, to the beginning of the second century B.C., it is equally certain that it must have been written in some Aramaic dialect, as the Greek literature of Palestine belongs to a much later time. If the historical character of the narrative is set aside, there is no trace of the person of the author.—

5. *History*.—The history of the book is in the main that of the LXX. version. While the contents of the LXX., as a whole, were received as canonical, the Book of Tobit was necessarily included without further inquiry among the books of Holy Scripture. There appears to be a clear reference to it in the Latin version of the Epistle of Polycarp. In a scheme of the Ophites, Tobias appears among the prophets. Clement of Alexandria and Origen practically use the book as canonical; but Origen distinctly notices that neither Tobit nor Judith were received by the Jews, and rests the authority of Tobit on the usage of the Churches. Even Athanasius when writing without any critical regard to the Canon quotes Tobit as Scripture; but when he gives a formal list of the Sacred Books, he definitely excludes it from the Canon. In the Latin Church Tobit found a much more decided acceptance. Cyprian, Hilary, and Lucifer, quote it as authoritative. Augustine includes it with the other apocrypha of the LXX. among "the books which the Christian Church received," and in this he was followed by the mass of the later Latin fathers. Ambrose speaks of the book as "prophetic" in the strongest terms. Jerome, however, followed by Rufinus, maintained the purity of the Hebrew Canon of the O. T. In modern times the moral excellence of the book has been rated highly, except in the heat of controversy. Luther pronounced it, if only a fiction, yet "a truly beautiful, wholesome, and profitable fiction, the work of a gifted poet. . . . A book useful for Christian reading." The same view is held also in the English Church.—

6. *Religious character*.—Few probably can read the book in the LXX. text without assenting heartily to the favourable judgment of Luther on its merits. Nowhere else is there preserved so complete and beautiful a picture of the domestic life of the Jews after the Return. There may be symptoms of a tendency to formal righteousness of works, but as yet the works are painted as springing from a living faith. Of the special precepts one (iv. 15) contains the negative side of the golden rule of conduct (Matt. vii. 12), which in this partial form is found among the maxims of Confucius. But it is chiefly

in the exquisite tenderness of the portraiture of domestic life that the book excels. Almost every family relation is touched upon with natural grace and affection. The most remarkable doctrinal feature in the book is the prominence given to the action of spirits. Powers of evil (iii. 8, 17, vi. 7, 14, 17) are represented as gaining the means of injuring men by sin, while they are driven away and bound by the exercise of faith and prayer (viii. 2, 3). On the other hand Raphael comes among men as "the healer," and by the mission of God (iii. 17, xii. 18), restores those whose good actions he has secretly watched (xii. 12, 13), and "the remembrance of whose prayers he has brought before the Holy One" (xii. 12). This ministry of intercession is elsewhere expressly recognised (xii. 15). A second doctrinal feature of the book is the firm belief in a glorious restoration of the Jewish people (xiv. 5, xiii. 9-18). But the restoration contemplated is national, and not the work of a universal Saviour. In all there is not the slightest trace of the belief in a personal Messiah.

To'chen. A place mentioned (1 Chr. iv. 32 only) amongst the towns of Simeon.

Togarmah. A son of Gomer, and brother of Ashkenaz and Kipthath (Gen. x. 3). Togarmah, as a geographical term, is connected with Armenia, and the subsequent notices of the name (Ez. xxvii. 14, xxxviii. 6) accord with this view. The most decisive statement respecting the Armenians in ancient literature is furnished by Herodotus, who says that they were Phrygian colonists (Herod. vii. 73). The remark of Eudoxus that the Armenians resemble the Phrygians in many respects in language tends in the same direction. It is hardly necessary to understand the statement of Herodotus as implying more than a common origin of the two peoples. We should rather infer that Phrygia was colonised from Armenia, than *vice versa*. There can be little doubt but that the Phrygians were once the dominant race in the peninsula, and that they spread westward from the confines of Armenia to the shores of the Aegean. The Phrygian language is undoubtedly to be classed with the Indo-European family. The Armenian language presents many peculiarities which distinguish it from other branches of the Indo-European family; but in spite of this, however, no hesitation is felt by philologists in placing it among the Indo-European languages.

To'hu. An ancestor of Samuel the prophet, perhaps the same as TOAH (1 Sam. i. 1; comp. 1 Chr. vi. 34).

To'l. King of Hamath on the Orontes, who, after the defeat of his powerful enemy the Syrian king Hadadezer by the army of David, sent his son Joram, or Hadoram, to congratulate the victor and do him homage with presents of gold and silver and brass (2 Sam. viii. 9, 10).

Tola. 1. The first-born of Issachar, and ancestor of the Tolaïtes (Gen. xli. 13; Num. xxvi. 23; 1 Chr. vii. 1, 2).—2. Judge of Israel after Abimelech (Judg. x. 1, 2). He is described as "the son of Punah, the son of Dodo, a man of Issachar." Tola judged Israel for twenty-three years at Shamir in Mount Ephraim, where he died and was buried.

To'lad. One of the towns of Simeon (1 Chr. iv. 29). In the lists of Joshua the name is given in the fuller form of EL-TOLAD.

To'laïtes, the. The descendants of Tola the son of Issachar (Num. xxvi. 26).

Tolbanes. TELEM, one of the porters in the days of Ezra (1 Esd. ix. 25).

Tomb. It has been hitherto too much the fashion to look to Egypt for the prototype of every form of Jewish art; but if there is one thing in the Old Testament more clear than another, it is the absolute antagonism between the two peoples, and the abhorrence of everything Egyptian that prevailed from first to last among the Jewish people. From the burial of Sarah in the cave of Machpelah (Gen. xxiii. 19) to the funeral rites prepared for Dorcas (Acts ix. 37), there is no mention of any sarcophagus, or even coffin, in any Jewish burial. Still less were the rites of the Jews like those of the Pelasgi or Etruscans. They were marked with the same simplicity that characterised all their religious observances. This simplicity of rite led to what may be called the distinguishing characteristic of Jewish sepulchres—the *deep loculus*—which, so far as is now known, is universal in all purely Jewish rock-cut tombs, but hardly known elsewhere. Its form will be understood by referring to the annexed diagram, representing the forms of

Diagram of Jewish Sepulchre.

Jewish sepulture. In the apartment marked A, there are twelve such loculi, about 2 feet in width by 3 feet high. On the ground-floor these generally open on the level of the floor; when in the upper story, as at C, on a ledge or platform, on which the body might be laid to be anointed, and on which the stones might rest which closed the outer end of each loculus. The shallow loculus is shown in chamber B, but was apparently only used when saucophagi were employed, and therefore, so far as we know, only during the Graeco-Roman period, when foreign customs came to be adopted. The shallow loculus would have been singularly inappropriate and inconvenient, where an unembalmed body was laid out to decay—as there would evidently be no means of shutting it off from the rest of the catacomb. The deep loculus on the other hand was as strictly conformable with Jewish customs, and could easily be closed by a stone fitted to the end and luted into the groove which usually exists there. This fact is especially interesting as it affords a key to much that is otherwise hard to be understood in certain passages in the New Testament. Thus in John xi. 39, Jesus says, "Take away the stone," and (ver. 40) "they took away the stone" without difficulty, apparently. And chap. xx. 1, the same expression is used, "the stone is taken away." There is one catacomb—that known as the "Tomb of the Kings"—which is closed by

a stone rolling across its entrance; but it is the only one, and the immense amount of contrivance and fitting which it has required is sufficient proof that such an arrangement was not applied to any other of the numerous rock tombs around Jerusalem, nor could the traces of it have been obliterated had it anywhere existed. Although, therefore, the Jews were singularly free from the pomps and vanities of funeral magnificence, they were at all stages of their independent existence an eminently burying people.—*Tombs of the Patriarchs.*—Turning from these considerations to the more strictly historical part of the subject, we find that one of the most striking events in the life of Abraham is the purchase of the field of Ephron the Hittite at Hebron, in which was the cave of Machpelah, in order that he might therein bury Sarah his wife, and that it might be a sepulchre for himself and his children. There he and his immediate descendants were laid 3700 years ago, and there they are believed to rest now; but no one in modern times has seen their remains, or been allowed to enter into the cave where they rest. Unfortunately none of those who have visited Hebron have had sufficient architectural knowledge to be able to say when the church or mosque which now stands above the cave was erected. Though much more easy of access, it is almost as difficult to ascertain the age of the wall that encloses the sacred precincts of these tombs. There is in fact nothing known with sufficient exactness to decide the question, but the probabilities certainly tend towards a Christian or Sarmenic origin for the whole structure both internally and externally. From the time when Abraham established the burying-place of his family at Hebron till the time when David fixed that of his family in the city which bore his name, the Jewish rulers had no fixed or favourite place of sepulture. Each was buried on his own property, or where he died, without much caring either for the sanctity or convenience of the place chosen.—*Tomb of the Kings.*—Of the twenty-two kings of Judah who reigned at Jerusalem from 1048 to 590 B.C., eleven, or exactly one-half, were buried in one hypogeum in the "city of David." Of all these it is merely said that they were buried in "the sepulchres of their fathers" or "of the kings" in the city of David, except of two—Asa and Hezekiah. Two more of these kings (Jehoram and Joash) were buried also in the city of David, "but not in the sepulchres of the kings." The passage in Nehemiah iii. 16, and in Ezekiel xlii. 7, 9, together with the reiterated assertion of the Books of Kings and Chronicles that these sepulchres were situated in the city of David, leave no doubt but that they were on Zion, or the Eastern Hill, and in the immediate proximity of the Temple. They were in fact certainly within that enclosure now known as the "Haram Area;" but if it is asked on what exact spot, we must pause for further information before a reply can be given. Up to the present time we have not been able to identify the single sepulchral excavation about Jerusalem which can be said with certainty to belong to a period anterior to that of the Macabees, or, more correctly, to have been used for burial before the time of the Romans. The only important hypogeum which is wholly Jewish in its arrangements, and may consequently belong to an earlier or to any epoch, is that known as the Tombs of the Prophets in the western flank of the Mount of Olives. It has every appearance of having ori-

ginally been a natural cavern improved by art, and with an external gallery some 140 feet in extent, into which twenty-seven deep or Jewish loculi open. It has no architectural mouldings, no sarcophagi or shallow loculi, nothing to indicate a foreign origin.—*Graeco-Roman Tombs*.—Besides the tombs above enumerated, there are around Jerusalem, in the Valleys of Hinnom and Jehoshaphat, and on the plateau to the north, a number of remarkable rock-cut sepulchres, with more or less architectural decoration, sufficient to enable us to ascertain, that they are all of nearly the same age, and to assert with very tolerable confidence that the epoch to which they belong must be between the introduction of Roman influence and the destruction of the city by Titus. The excavations in the Valley of Hinnom with Greek inscriptions are comparatively modern. In the village of Siloam there is a monolithic cell of singularly Egyptian aspect, which De Saulcy assumes to be a chapel of Solomon's Egyptian wife. It is probably of very much more modern date, and is more Assyrian than Egyptian in character. The principal remaining architectural sepulchres may be divided into three groups. First, those existing in the Valley of Jehoshaphat, and known popularly as the Tombs of Zechariah, of St. James, and of Absalom. Second, those known as the Tombs of the Judges, and the so-called Jewish tomb about a mile north of the city. Third, that known as the Tombs of the Kings, about half a mile north of the Damascus Gate. Of the three first-named tombs the most southern is known as that of Zechariah, a popular name which there is not

to an earlier age than that of their influence. Above the cornice is a pyramid rising at rather a sharp angle, and hewn like all the rest out of the solid rock. To call this building a tomb is evidently a misnomer, as it is absolutely solid—hewn out of the living rock by cutting a passage round it. It has no internal chambers, nor even the semblance of a doorway. The other, or so-called Tomb of Absalom, figured in p. 10, is somewhat larger, the base being about 21 feet square in plan, and probably 23 or 24 to the top of the cornice. Like the other, it is of the Roman Ionic order, surmounted by a cornice of Ionic type; but between the pillars and the cornice a frieze, unmistakably of the Roman Doric order, is introduced, so Roman as to be in itself quite sufficient to fix its epoch. It is by no means clear whether it had originally a pyramidal top like its neighbour. Immediately in rear of the monolith we do find just such a sepulchral cavern as we should expect. It is called the Tomb of Jehoshaphat, with about the same amount of discrimination as governed the nomenclature of the others. The third tomb of this group, called that of St. James, is situated between the other two, and is of a very different character. It consists of a verandah with two Doric pillars in antis, which may be characterised as belonging to a very late Greek order rather than a Roman example. Behind this screen are several apartments, which in another locality we might be justified in calling a rock-cut monastery appropriated to sepulchral purposes. In the rear of all is an apartment, apparently unfinished, with three shallow loculi meant for the reception of sarcophagi, and so indicating a post-Jewish date for the whole or at least for that part of the excavation. The hypogeum known as the Tombs of the Judges is one of the most remarkable of the catacombs around Jerusalem, containing about sixty deep loculi, arranged in three stories; the upper stories with ledges in front to give convenient access, and to support the stones that closed them; the lower flush with the ground: the whole, consequently, so essentially Jewish that it might be of any age if it were not for its distance from the town, and its architectural character. The latter, as before stated, is identical with that of the Tomb of Jehoshaphat, and has nothing Jewish about it.—*Tombs of Herod*.—The last of the great groups enumerated above is that known as the Tombs of the Kings—*Kebâr es Sultan*—or the Royal Caverns, so called because of their magnificence, and also because that name is applied to them by Josephus. They are twice again mentioned under the title of the "Monuments of Herod." The architecture exhibits the same ill-understood Roman Doric arrangements as are found in all these tombs, mixed with bunches of grapes, which first appear on Maccabean coins, and foliage which is local and peculiar, and, so far as anything is known elsewhere, might be of any age. Its connexion, however, with that of the Tombs of Jehoshaphat and the Judges fixes it to the same epoch. The entrance doorway of this tomb is below the level of the ground. It is closed by a very curious and elaborate contrivance of a rolling stone, often described, but very clumsily answering its purpose. Within, the tomb consists of a vestibule or entrance-hall about 20 feet square, from which three other square apartments open, each surrounded by deep loculi. But perhaps the most remarkable peculiarity of the hypogeum is the sarcophagus chamber in which two sarcophagi were

So-called "Tomb of Zechariah."

even a shadow of tradition to justify. It consists of a square solid basement, measuring 18 feet 6 inches each way, and 20 feet high to the top of the cornice. On each face are four engaged Ionic columns between antae, and these are surmounted, not by an Egyptian cornice, as is usually asserted, but by one of purely Assyrian type, such as is found at Khorsabad. In all its details, it is so distinctly Roman that it is impossible to assume that it belongs

found, one of which was brought home by De Sanley, and is now in the Louvre. There seems no reason for doubting but that all the architectural tombs of Jerusalem belong to the age of the Romans, like everything that has yet been found either at Petra,

Facade of Herod's Tomb. From a Photograph.

Baalbec, Palmyra, or Damascus, or even among the stone cities of the Hauran.—*Tomb of Helena of Adiabene*.—There was one other very famous tomb at Jerusalem, which cannot be passed over in silence, though not one vestige of it exists. We are told that "she with her brother were buried in the pyramids which she had ordered to be constructed at a distance of three stadia from Jerusalem" (Joseph. *Ant.* xx. 4, §3). This is confirmed by Pausanias (viii. 16). It was situated outside the third wall, near a gate between the Tower Psephinus and the Royal Caverns (*B. J.* v. 22, and v. 4, §2). They remained sufficiently entire in the 4th century to form a conspicuous object in the landscape. Since the destruction of the city by Titus, none of the native inhabitants of Jerusalem have been in a position to indulge in much sepulchral magnificence, or perhaps had any taste for this class of display; and we in consequence find no rock-cut hypogea, and no structural monuments that arrest attention in modern times. The people, however, still cling to their ancient cemeteries in the Valley of Jehoshaphat with a tenacity singularly characteristic of the East.

Tongues, Confusion of. The unity of the human race is most clearly implied, if not positively asserted, in the Mosaic writings. The general declaration, "So God created man in His own image. . . male and female created He them" (Gen. i. 27), is limited as to the mode in which the act was carried out, by the subsequent narrative of the creation of the protoplast Adam (Gen. ii. 22). The author of the Book of Genesis conceived the unity of the human race to be of the most rigid nature—not simply a generic unity, nor again simply a specific unity, but a specific based upon a numerical unity, the species being nothing else than the enlargement of the individual. Unity of language is assumed by the sacred historian apparently as a corollary of the unity of race. No explanation is given of the origin of speech, but its exercise is evidently regarded as coeval with the creation of man. Speech being inherent in man as a reflecting being, was regarded as handed down from father to son by the same process of imitation by which it is still perpetuated. The original unity of speech was restored in Noah.

Disturbing causes were, however, early at work to dissolve this twofold union of community and speech. The human family endeavoured to check the tendency to separation by the establishment of a great central edifice, and a city which should serve as the metropolis of the whole world. The project was defeated by the interposition of Jehovah, who determined to "confound their language, so that they might not understand one another's speech." Contemporaneously with, and perhaps as the result of, this confusion of tongues, the people were scattered abroad from thence upon the face of all the earth, and the memory of the great event was preserved in the name Babel. Two points demand our attention in reference to this narrative, viz. the degree to which the confusion of tongues may be supposed to have extended, and the connexion between the confusion of tongues and the dispersion of nations. (1.) It is unnecessary to assume that the judgment inflicted on the builders of Babel amounted to a loss, or even a suspension, of articulate speech. The desired object would be equally attained by a miraculous forestalment of those dialectical differences of language which are constantly in process of production. The elements of the one original language may have remained, but so disguised by variations of pronunciation, and by the introduction of new combinations, as to be practically obliterated. (2.) The confusion of tongues and the dispersion of nations are spoken of in the Bible as contemporaneous events. The divergence of the various families into distinct tribes and nations ran parallel with the divergence of speech into dialects and languages, and thus the 10th chapter of Genesis is posterior in historical sequence to the events recorded in the 11th chapter. —The Mosaic table does not profess to describe the process of the dispersion; but, assuming that dispersion as a *fait accompli*, it records the ethnic relations existing between the various nations affected by it. These relations are expressed under the guise of a genealogy; the ethnological character of the document is, however, clear both from the names, some of which are gentile in form, as Ludim, Jebusite, &c., others geographical or local, as Mizraim, Sidon, &c.; and again from the formulæ, which concludes each section of the subject "after their families, after their tongues, in their countries, and in their nations" (vers. 5, 20, 31). Incidentally, the table is geographical as well as ethnological; but this arises out of the practice of designating nations by the countries they occupy. The general arrangement of the table is as follows:—The whole human race is referred back to Noah's three sons, Shem, Ham, and Japheth. The Shemites are described last, apparently that the continuity of the narrative may not be further disturbed; and the Hamites stand next to the Shemites, in order to show that these were more closely related to each other than to the Japhetites. The identification of the Biblical with the historical or classical names of nations, is by no means an easy task, particularly where the names are not subsequently noticed in the Bible. Equal doubt arises where names admit of being treated as appellatives, and so of being transferred from one district to another. 1. The Japhetite list contains fourteen names, of which seven represent independent, and the remainder affiliated nations, as follows:—(i.) Gomer, connected ethnically with the *Cimmerii*, *Cimbri* (?), and *Cymry*; and geographically with *Crimea*. Associated with

Gomer are the three following:—(a) Ashkenaz. (b) Riphath. (c) Togarmah. (ii.) Magog, the *Scythians*. (iii.) Madai, *Media*. (iv.) Javan, the *Ionians*, as a general appellation for the Hellenic race, with whom are associated the four following:—(a) Elishah. (b) Tarshish. (c) Kittim. (d) Dodanim. (v.) Tubal. (vi.) Meshech. (vii.) Tiras.

2. The Hamitic list contains thirty names, of which four represent independent, and the remainder affiliated nations, as follows:—(i.) Cush, in two branches, the western or African representing *Aethiopia*, the *Kesh* of the old Egyptian, and the eastern or Asiatic being connected with the names of the tribe *Cossaei*, the district *Cissia*, and the province *Susiana* or *Khuzistan*. With Cush are associated:—(a) Seba. (b) Havilah. (c) Sabtah. (d) Raamah, with whom are associated:—(a²) Sheba. (b²) Dedan. (c²) Sabtechah. (f) Nimrod. (ii.) Mizraim, the two *Misrs*, i. e. Upper and Lower Egypt, with whom the following seven are connected:—(a) Ludim. (b) Ananim. (c) Naphtuhim. (d) Pathrusim. (e) Casluhim. (f) Capthorim. (g) Phut. (iii.) Canaan, the geographical position of which calls for no remark in this place. To Canaan belong the following eleven:—(a) Sidon, the well-known town of that name in Phoenicia. (b) Heth, or the Hittites of Biblical history. (c) The Jebusite, of *Jebus* or Jerusalem. (d) The Amoitte. (e) The Girsu-site. (f) The Hivite. (g) The Arkite. (h) The Sinite. (i) The Arvadite. (j) The Zemarite. (k) The Hamathite. 3. The Shemitic list contains twenty-five names, of which five refer to independent, and the remainder to affiliated tribes, as follows:—(i.) Elam. (ii.) Asshur. (iii.) Arphaxad, with whom are associated:—(a) Salah; Salah's son (a²) Eber; and Eber's two sons (a³) Peleg and (b²) Joktan, with the following thirteen sons of Joktan, viz.:—(a⁴) Almodad. (b⁴) Sheleph. (c⁴) Hazarmaveth. (d⁴) Jerah. (e⁴) Iladoram. (f⁴) Uzal. (g⁴) Diklah. (h⁴) Obal. (i⁴) Abimael. (j⁴) Sheba. (k⁴) Ophir. (h⁴) Havilah. (m⁴) Jobab. (iv.) Lud. (v.) Aram, with whom the following are associated:—(a) Uz. (b) Hul. (c) Gether. (d) Mash. There is yet one name noticed in the table, viz. Philistim, which occurs in the Hamitic division, but without any direct assertion of Hamitic descent. The total number of names noticed in the table, including Philistim, would thus amount to 70, which was raised by patristic writers to 72. Before proceeding further, it would be well to discuss a question materially affecting the historical value of the Mosaic table, viz. the period to which it refers. On this point very various opinions are entertained. Knobel, conceiving it to represent the commercial geography of the Phoenicians, assigns it to about 1200 B.C., while others allow it no higher an antiquity than the period of the Babylonish Captivity. Internal evidence leads us to refer it to the age of Abraham on the following grounds:—(1) The Canaanites were as yet in undisputed possession of Palestine. (2) The Philistines had not concluded their migration. (3) Tyre is wholly unnoticed. (4) Various places such as Simyra, Sinna, and Arca, are noticed, which had fallen into insignificance in later times. (5) Kittim, in the age of Solomon was under Phoenician dominion, is assigned to Japheth, and the same may be said of Tarshish, which in that age undoubtedly referred to the Phoenician empire of *Tartessus*, whatever may have been its earlier significance. The chief objection to so early

a date as we have ventured to propose, is the notice of the Medes under the name Madai. The Aryan nation, which bears this name in history, appears not to have reached its final settlement until about 900 B.C. But on the other hand, the name Media may well have belonged to the district before the arrival of the Aryan Medes. The Mosaic table is supplemented by ethnological notices relating to the various divisions of the Terachite family. Besides the nations whose origin is accounted for in the Bible, we find other early populations mentioned in the course of the history without any notice of their ethnology. As these fragmentary populations intermingled with the Canaanites, they probably belonged to the same stock (comp. Num. xiii. 22; Judg. i. 10). They may perchance have belonged to an earlier migration than the Canaanitish, and may have been subdued by the later comers; but this would not necessitate a different origin.—Having thus surveyed the ethnological statements contained in the Bible, it remains for us to inquire how far they are based on, or accord with, physiological or linguistic principles. Knobel maintains that the threefold division of the Mosaic table is founded on the physiological principle of colour, Shem, Ham, and Japheth representing respectively the red, black, and white complexions prevalent in the different regions of the then known world. With regard to the actual prevalence of the hues, it is quite consistent with the physical character of the districts that the Hamites of the south should be dark, and the Japhetites of the north fair, and further that the Shemites should hold an intermediate place in colour as in geographical position. But we have no evidence that this distinction was strongly marked. The linguistic difficulties connected with the Mosaic table are very considerable, and we cannot pretend to unravel the tangled skein of conflicting opinions on the subject. The primary difficulty arises out of the Biblical narrative itself, and is consequently of old standing—the difficulty, namely, of accounting for the evident identity of language spoken by the Shemitic Terachites and the Hamitic Canaanites. Modern linguistic research has rather enhanced than removed this difficulty. The alternatives hitherto offered as satisfactory solutions, namely, that the Terachites adopted the language of the Canaanites, or the Canaanites that of the Terachites, are both inconsistent with the enlarged area which the language is found to cover on each side. We have to explain how the Cushites and other Hamitic tribes, who did not come into contact with the Terachites, acquired the same general type of language. And on the other hand, assuming that what are called Shemitic languages were really Hamitic, we have to explain the extension of the Hamitic area over Mesopotamia and Assyria, which, according to the table and the general opinion of ethnologists, belonged wholly to a non-Hamitic population. A further question, moreover, arises out of this explanation, viz.: What was the language of the Terachites before they assumed this Hamitic tongue? The real question at issue concerns the language not of the whole Hamitic family, but of the Canaanites and Cushites. With regard to the former, various explanations have been offered—such as Knobel's, that they acquired a Shemitic language from a prior population, represented by the *Retaites*, *Zuzim*, *Zamzumim*, &c.; or Bunsen's, that they were a Shemitic race who had long sojourned in Egypt—neither of which is satisfactory. With regard to

the latter, the only explanation to be offered is that a Joktanid immigration supervened on the original Hamitic population, the result being a combination of Cushitic civilization with a Shemitic language. That the Egyptian language exhibits many striking points of resemblance to the Shemitic type is acknowledged on all sides. It is also allowed that the resemblances are of a valuable character, being observable in the pronouns, numerals, in agglutinative forms, in the treatment of vowels, and other such points. There is not, however, an equal degree of agreement among scholars as to the deductions to be drawn from these resemblances. Turning eastward to the banks of the Tigris and Euphrates, and the adjacent countries, we find ample materials for research in the inscriptions recently discovered, the examination of which has not yet yielded undisputed results. The Mosaic table places a Shemitic population in Assyria and Elam, and a Cushitic one in Babylon. Sufficient evidence is afforded by language that the basis of the population in Assyria was Shemitic; and it is by no means improbable that the inscriptions belonging more especially to the neighbourhood of Susa may ultimately establish the fact of a Shemitic population in Elam. The presence of a Cushitic population in Babylon is an opinion very generally held on linguistic grounds; and a close identity is said to exist between the old Babylonian and the *Mahri* language, a Shemitic tongue of an ancient type still living in a district of *Hadramaut*, in Southern Arabia. In addition to the Cushitic and Shemitic elements in the population of Babylonia and the adjacent districts, the presence of a Turanian element has been inferred from the linguistic character of the early inscriptions. With regard to Arabia, it may safely be asserted that the Mosaic table is confirmed by modern research. The Cushitic element has left memorials of its presence in the south in the vast ruins of *Mareh* and *Sana*, as well as in the influence it has exercised on the *Himyaritic* and *Mahri* languages, as compared with the Hebrew. The Joktanid element forms the basis of the Arabian population, the Shemitic character of whose language needs no proof. It remains to be inquired how far the Japhetic stock represents the linguistic characteristics of the Indo-European and Turanian families. Adopting the twofold division of the former, suggested by the name itself, into the eastern and western; and subdividing the eastern into the Indian and Iranian, and the western into the Celtic, Hellenic, Illyrian, Italian, Teutonic, Slavonian, and Lithuanian classes, we are able to assign Madai (*Media*) and Togarmah (*Armenia*) to the Iranian class; Javan (*Ionian*) and Elishah (*Aeolian*) to the Hellenic; Gomer conjecturally to the Celtic; and Dodanim, also conjecturally, to the Illyrian. According to the old interpreters, Ashkenaz represents the Teutonic class, while, according to Knobel, the Italian would be represented by Tarshish, whom he identifies with the Etruscans; the Slavonian by Magog; and the Lithuanian possibly by Tiras. The same writer also identifies Riphath with the Gauls, as distinct from the Cymry or Gomer; while Kitim is referred by him not improbably to the Carians, who at one period were predominant on the islands adjacent to Asia Minor. The evidence for these identifications varies in strength, but in no instance approaches to demonstration. Whether the Turanian family is fairly represented in the Mosaic table may be doubted. Those who advocate

the Mongolian origin of the Scythians would naturally regard Magog as the representative of this family. Tubal and Meshech remain to be considered: Knobel identifies these respectively with the Iberians and the Ligurians.

APPENDIX.—TOWER OF BABEL.—The history of the confusion of languages was preserved at Babylon, as we learn by the testimonies of classical and Babylonian authorities. The Talmudists say that the true site of the Tower of Babel was at Borsif, the Greek Borsippa, the *Birs Nimrud*, seven miles and a half from *Hillah*, S.W., and nearly eleven miles from the northern ruins of Babylon. The Babylonian name of this locality is *Barsip* or *Barzippa*, which we explain by *Tower of Tongues*. Borsippa (the Tongue Tower) was formerly a suburb of Babylon. This building, erected by Nebuchadnezzar, is the same that Herodotus describes as the Tower of Jupiter Belus. The temple consisted of a large substructure, a stade (600 Babylonian feet) in breadth, and 75 feet in height, over which were built seven other stages of 25 feet each. Nebuchadnezzar gives notice of this building in the Borsippa inscription, which contains the following allusion to the Tower of the Tongues:—"We say for the other, that is, this edifice, the house of the Seven Lights of the Earth, the most ancient monument of Borsippa: a former king built it (they reckon 42 ages), but he did not complete its head. Since a remote time people had abandoned it, without order expressing their words. Since that time, the earthquake and the thunder had dispersed its sun-dried clay; the bricks of the casing had been split, and the earth of the interior had been scattered in heaps."

Tongues, Gift of.—I. Γλῶττα, or γλῶσσα, the word employed throughout the N. T. for the gift now under consideration, is used—(1.) for the bodily organ of speech; (2.) for a foreign word, imported and half-naturalised in Greek; (3.) in Hellenistic Greek, for "speech" or "language." (A.) Eichhorn and Bardili, and to some extent Bunsen, starting from the first, see in the so-called gift an inarticulate utterance. (B.) Bleek adopts the second meaning. He infers from this that to speak in tongues was to use unusual, poetic language. (C.) The received traditional view, which starts from the third meaning, and sees in the gift of tongues a distinctly linguistic power, is the more correct one.—II. The chief passages from which we have to draw our conclusion as to the nature and purpose of the gift in question are—(1.) Mark xvi. 17; (2.) Acts ii. 1-13, x. 46, xix. 6; (3.) 1 Cor. xii. xiv.—III. The promise of a new power coming from the Divine Spirit, giving not only comfort and insight into truth, but fresh powers of utterance of some kind, appears once and again in our Lord's teaching. The disciples are to take no thought what they shall speak, for the Spirit of their Father shall speak in them (Matt. x. 19, 20; Mark xiii. 11). The lips of Galilean peasants are to speak freely and boldly before kings. In Mark xvi. 17 we have a more definite term employed: "They shall speak with new tongues." Starting, as above, from (C), it can hardly be questioned that the obvious meaning of the promise is that the disciples should speak in new languages which they had not learnt as other men learn them.—IV. The wonder of the day of Pentecost is, in its broad features, familiar enough to us. What view are we to take of a phenomenon so marvellous and exceptional? What views have men actually

taken? (1.) The prevalent belief of the Church has been, that in the Pentecostal gift the disciples received a supernatural knowledge of all such languages as they needed for their work as Evangelists. The knowledge was permanent. Widely diffused as this belief has been, it must be remembered that it goes beyond the data with which the N. T. supplies us. Each instance of the gift recorded in the Acts connects it, not with the work of teaching, but with that of praise and adoration; not with the normal order of men's lives, but with exceptional epochs in them. The speech of St. Peter which follows, like most other speeches addressed to a Jerusalem audience, was spoken apparently in Aramaic. When St. Paul, who "spoke with tongues more than all," was at Lystra, there is no mention made of his using the language of Lycaonia. It is almost implied that he did not understand it (Acts xiv. 11). Not one word in the discussion of spiritual gifts in 1 Cor. xii.-xiv. implies that the gift was of this nature, or given for this purpose. Nor, it may be added, within the limits assigned by the providence of God to the working of the Apostolic Church, was such a gift necessary. Aramaic, Greek, Latin, the three languages of the inscription on the cross, were media of intercourse throughout the empire. (2.) Some interpreters have seen their way to another solution of the difficulty by changing the character of the miracle. It lay not in any new power bestowed on the speakers, but in the impression produced on the hearers. Words which the Galilean disciples uttered in their own tongue were heard by those who listened as in their native speech. There are, it is believed, weighty reasons against both the earlier and later forms of this hypothesis. (1.) It is at variance with the distinct statement of Acts ii. 4, "They began to speak with other tongues." (2.) It at once multiplies the miracle, and degrades its character. Not the 120 disciples, but the whole multitude of many thousands, are in this case the subjects of it. (3.) It involves an element of falsehood. The miracle, on this view, was wrought to make men believe what was not actually the fact. (4.) It is altogether inapplicable to the phenomena of 1 Cor. xiv. (3.) Critics of a negative school have, as might be expected, adopted the easier course of rejecting the narrative either altogether or in part.—V. What, then, are the facts actually brought before us? What inferences may be legitimately drawn from them? (1.) The utterance of words by the disciples, in other languages than their own Galilean Aramaic, is distinctly asserted. (2.) The words spoken appear to have been determined, not by the will of the speakers, but by the Spirit which "gave them utterance." (3.) The word used, *αποφθέγγεσθαι*, has in the LXX. a special association with the oracular speech of true or false prophets, and appears to imply some peculiar, perhaps musical, solemn intonation (comp. 1 Chr. xxv. 1; Ez. xiii. 9). (4.) The "tongues" were used as an instrument, not of teaching but of praise. (5.) Those who spoke them seemed to others to be under the influence of some strong excitement, "full of new wine." (6.) Questions as to the mode of operation of a power above the common laws of bodily or mental life lead us to a region where our words should be "wary and few." It must be remembered, then, that in all likelihood such words as they then uttered had been heard by the disciples before. The difference was, that, before, the Galilean

praisants had stood in that crowd, neither heeding, nor understanding, nor remembering what they heard, still less able to reproduce it; now they had the power of speaking it clearly and freely. The Divine work would in this case take the form of a supernatural exaltation of the memory, not of imparting a miraculous knowledge of words never heard before. (7.) The gift of tongues, the ecstatic burst of praise, is definitely asserted to be a fulfilment of the prediction of Joel ii. 28. We are led, therefore, to look for that which answers to the Gift of Tongues in the other element of prophecy which is included in the O. T. use of the word; and this is found in the ecstatic praise, the burst of song (1 Sam. x. 5-13, xix. 20-24; 1 Chr. xxv. 3). (8.) The other instances in the Acts offer essentially the same phenomena. By implication in xiv. 15-19, by express statement in x. 47, xi. 15, 17, xix. 6, it belongs to special critical epochs.—VI. The First Epistle to the Corinthians supplies fuller data. The spiritual gifts are classified and compared, arranged, apparently, according to their worth, placed under regulation. The facts which may be gathered are briefly these:—(1.) The phenomena of the gift of tongues were not confined to one Church or section of a Church. (2.) The comparison of gifts, in both the lists given by St. Paul (1 Cor. xii. 8-10, 28-30), places that of tongues, and the interpretation of tongues, lowest in the scale. (3.) The main characteristic of the "tongue" is that it is unintelligible. The man "speaks mysteries," prays, blesses, gives thanks, in the tongue (1 Cor. xiv. 15, 16), but no one understands him. He can hardly be said, indeed, to understand himself. (4.) The peculiar nature of the gift leads the Apostle into what appears, at first, a contradiction. "Tongues are for a sign," not to believers, but to those who do not believe; yet the effect on unbelievers is not that of attracting but repelling. They involve of necessity a disturbance of the equilibrium between the understanding and the feelings. Therefore it is that, for those who believe already, prophecy is the greater gift. (5.) There remains the question whether these also were "tongues" in the sense of being languages. The question is not one for a dogmatic assertion, but it is believed that there is a preponderance of evidence leading us to look on the phenomena of Pentecost as representative. It must have been from them that the word *tongues* derived its new and special meaning. The companion of St. Paul, and St. Paul himself, were likely to use the same word in the same sense. The "divers kinds of tongues" (1 Cor. xii. 28), the "tongues of men" (1 Cor. xiii. 1), point to differences of some kind, and it is at least easier to conceive of these as differences of language than as belonging to utterances all equally wild and inarticulate. If we are to attach any definite meaning to the "tongues of angels" in 1 Cor. xiii. 1, it must be by connecting it with the words surpassing human utterance, which St. Paul heard as in Paradise (2 Cor. xii. 4), and these again with the great Hallelujah hymns of which we read in the Apocalypse (Rev. xix. 1-6). (6.) Here also, as in Acts ii., we have to think of some peculiar intonation as frequently characterising the exercise of the "tongues." The analogies which suggest themselves to St. Paul's mind are those of the pipe, the harp, the trumpet (1 Cor. xiv. 7, 8). In the case of one "singing in the spirit" (1 Cor. xiv. 15), but not with the understanding also, the strain of ec-

static melody must have been all that the listeners could perceive. (7.) Connected with the "tongues," there was the corresponding power of interpretation. Its function must have been twofold. The interpreter had first to catch the foreign words, Aramaic or others, which had mingled more or less largely with what was uttered, and then to find a meaning and an order in what seemed at first to be without either. Under the action of one with this insight the wild utterances of the "tongues" might become a treasure-house of deep truths.—VII. (1.) Traces of the gift are found, as has been said, in the Epistles to the Romans, the Galatians, the Ephesians. From the Pastoral Epistles, from those of St. Peter and St. John, they are altogether absent, and this is in itself significant. (2.) It is probable, however, that the disappearance of the "tongues" was gradual. There must have been a time when "tongues" were still heard; though less frequently, and with less striking results. For the most part, however, the part which they had filled in the worship of the Church was supplied by the "hymns and spiritual songs" of the succeeding age. After this, within the Church we lose nearly all traces of them.—VIII. (i.) A wider question of deep interest presents itself. Can we find in the religious history of mankind any facts analogous to the manifestation of the "tongues"? The three characteristic phenomena are, as has been seen, (1) an ecstatic state of partial or entire unconsciousness; (2) the utterance of words in tones startling and impressive, but often conveying no distinct meaning; (3) the use of languages which the speaker at other times was unable to converse in. (ii.) The history of the O. T. presents us with some instances in which the gift of prophecy has accompaniments of this nature (1 Sam. xix. 24). (iii.) We cannot exclude the false prophets and diviners of Israel from the range of our inquiry. We have distinct records of strange, mysterious intonations. The ventriloquist wizards "peep and mutter" (Is. viii. 19). The "voice of one who has a familiar spirit," comes low out of the ground (Is. xxix. 4). (iv.) The quotation by St. Paul (1 Cor. xiv. 21) from Is. xxviii. 11. With the phenomena of the "tongues" present to his mind, he saw in them the fulfilment of the Prophet's words. A remarkable parallel to the text thus interpreted is found in Hos. ix. 7. (v.) The history of heathen oracles presents, it need hardly be said, examples of the orgiastic state, in which the wisest of Greek thinkers recognised the lower type of inspiration. (vi.) More distinct parallels are found in the accounts of the wilder, more excited sects which have, from time to time, appeared in the history of Christendom. (vii.) The history of the French prophets at the commencement of the 18th century presents some facts of special interest. What is specially noticeable is, that the gift of tongues was claimed by them. It is remarkable that a strange Revivalist movement was spreading, nearly at the same time, through Silesia, the chief feature of which was that boys and girls of tender age were almost the only subjects of it, and that they too spoke and prayed with a wonderful power. (viii.) The so-called Unknown Tongues, which manifested themselves first in the west of Scotland, and afterwards in the Caledonian Church in Regent Square, present a more striking phenomenon, and the data for judging of its nature are more copious. Here, more than in most other cases, there were the con-

ditions of long, eager expectation, fixed brooding over one central thought, the mind strained to a preternatural tension. Suddenly, now from one, now from another, chiefly from women, devout but illiterate, mysterious sounds were heard. The man over whom they exercised so strange a power, has left on record his testimony, that to him they seemed to embody a more than earthly music, leading to the belief that the "tongues" of the Apostolic age had been as the archetypal melody of which all the Church's chants and hymns were but faint, poor echoes. To those who were without, on the other hand, they seemed but an unintelligible gibberish, the yells and groans of madmen. The speaker was commonly unable to interpret what he uttered. (ix.) In certain exceptional states of mind and body the powers of memory are known to receive a wonderful and abnormal strength. In the delirium of fever, in the ecstasy of a trance, men speak in their old age languages which they have never heard or spoken since their earliest youth. In all such cases the marvellous power is the accompaniment of disease.—IX. These phenomena have been brought together in order that we may see how far they resemble, how far they differ from, those which we have seen reason to believe constituted the outward signs of the Gift of Tongues. Whatever resemblances there may be, the points of difference are yet greater. The phenomena which have been described are, with hardly an exception, morbid; the precursors or the consequences of clearly recognisable disease. The Gift of Tongues was bestowed on men in full vigour and activity, preceded by no frenzy, followed by no exhaustion. The gift of the day of Pentecost was the starting-point of the long history of the Church of Christ, the witness, in its very form, of a universal family gathered out of all nations. It belonged, however, to a critical epoch, not to the continuous life of the Church. It implied a disturbance of the equilibrium of man's normal state. But it was not the instrument for building up the Church.

Toparchy. A term applied in one passage of the Septuagint (1 Macc. xi. 28) to indicate three districts to which elsewhere (x. 30, xi. 34) the name *νομῶς* is given. In all these passages the English Version employs the term "governments." The three "toparchies" in question were Aphërima, Lydda, and Ramath. The "toparchies" seem to have been of the nature of *ayaliks*, and the passages in which the word *τοπαρχίας* occurs, all harmonize with the view of that functionary as the *aya*, whose duty would be to collect the taxes and administer justice in all cases affecting the revenue, and who, for the purpose of enforcing payment, would have the command of a small military force.

Topaz (Heb. *pitdâh*: Ex. xxvii. 17, xxxix. 10; Ez. xxviii. 13; Job xxviii. 19; Rev. xxi. 20). The topaz of the ancient Greeks and Romans is generally allowed to be our chrysolite, while their chrysolite is our topaz. The account which Pliny (*N. H.* xxxvii. 8) gives of the *topazos* evidently leads to the conclusion that that stone is our chrysolite; "the *topazos*," he says, "is still held in high estimation for its green tints." Chrysolite, which is also known by the name of olive and peridot, is a silicate of magnesia and iron; it is so soft as to lose its polish unless worn with care.

To'phel. A place mentioned Deut. i. 1, which has been probably identified with *Tüfleh* on a wady of the same name running north of Bozra towards the N.W. into the Ghôr and S.E. corner of the Dead Sea.

To'pheth, and once **To'phat**. It lay somewhere east or south-east of Jerusalem, for Jeremiah went out by the Sun-gate, or east-gate, to go to it (Jer. xix. 2). It was in "the Valley of the Son of Hinnom" (vii. 31), which is "by the entry of the east gate" (xix. 2). Thus it was not identical with Hinnom. It seems also to have been part of the king's gardens, and watered by Siloth, perhaps a little to the south of the present *Birket el-Hamra*. The name Tophet occurs only in the Old Testament (2 K. xxiii. 10; Is. xxx. 33; Jer. vii. 31, 32, xix. 6, 11, 12, 13, 14). The New does not refer to it, nor the Apocrypha. Jerome is the first who notices it; but we can see that by his time the name had disappeared. Hinnom by old writers, western and eastern, is always placed east of the city, and corresponds to what we call the "Mouth of the Tyropoeon." Tophet has been variously translated. Jerome says *latitudo*; others *garden*; others *drum*; others *place of burning or burying*; others *abomination*. The most natural seems that suggested by the occurrence of the word in two consecutive verses, in the one of which it is a *tabret*, and in the other *Tophet* (Is. xxx. 32, 33). The Hebrew words are newly identical; and Tophet was probably the king's "music-grove" or garden, denoting originally nothing evil or hateful. Certainly there is no proof that it took its name from the drums beaten to drown the cries of the burning victims that passed through the fire to Molech. Afterwards it was defiled by idols, and polluted by the sacrifices of Baal and the fires of Molech. Then it became the place of abomination, the very gate or pit of hell. The pious kings defiled it, and threw down its altars and high places, pouring into it all the filth of the city, till it became the "abhorrence" of Jerusalem.

Tor'mah occurs only in the margin of Judg. ix. 31. By a few commentators it has been conjectured that the word was originally the same with ARUMAH in ver. 41.

Tortoise (Heb. *tsáb*). The *tsáb* occurs only in Lev. xi. 29, as the name of some unclean animal.

Psammobatus Scincus.

Bochart with much reason refers the Heb. term to the kindred Arabic *dhab*, "a large kind of lizard," which, from the description of it as given by Damir, appears to be the *Psammobatus Scincus* or *Monitor terrestris* of Cuvier.

CON. D. B.

Toú. **TOI**, king of Hamath (1 Ch. xlviii. 9, 10).

Tower. Watch-towers or fortified posts in frontier or exposed situations are mentioned in Scripture, as the tower of Edar, &c. (Gen. xxxv. 21; Mic. iv. 8; Is. xxi. 5, 8, 11, &c.), the tower of Lebanon (2 Sam. viii. 6). Remains of such fortifications may still be seen, which probably have succeeded to more ancient structures built in the same places for like purposes. Besides these military structures, we read in Scripture of towers built in vineyards as an almost necessary appendage to them (Is. v. 2; Matt. xxi. 33; Mark xii. 1). Such towers are still in use in Palestine in vineyards, especially near Hebron, and are used as lodges for the keepers of the vineyards.

Town-clerk. The title ascribed in our Version to the magistrate at Ephesus who appeased the mob in the theatre at the time of the tumult excited by Demetrius and his fellow-craftsmen (Acts xix. 35). The original service of this class of men, was to record the laws and decrees of the state, and to read them in public. "On the subjugation of Asia by the Romans," says Baumstark, "*grammateis* were appointed there in the character of governors of single cities and districts, who even placed their names on the coins of their cities, caused the year to be named from them, and sometimes were allowed to assume the dignity, or at least the name, of *Ἀρχιεπὺς*."

Trachonitis. This place is mentioned only once in the Bible (Luke iii. 1). *Trachonitis* is, in all probability the Greek equivalent for the Aramaic *Argob*. From Josephus we gather that it lay south of Damascus, and east of Gaulanitis, and that it bordered on Auranitis and Batanea. From Ptolemy we learn that it bordered on Batanea, near the town of Sacene. In the Jerusalem Gemara it is made to extend as far south as Bostra. From these data we have no difficulty in fixing the position of Trachonitis. It included the whole of the modern province called *el-Lejah*, with a section of the plain southward, and also a part of the western declivities of Jebel Haurân. This may explain Strabo's two Trachons. The Lejah is bounded on the east by the mountains of Batanea (now Jebel Haurân), on whose slopes are the ruins of Sacene and Kenath; on the south by Auranitis (now Haurân), in which are the extensive ruins of Bostra; on the west by Gaulanitis (now Jaulân); and on the north by Ituraea (now Jedâr) and Damascus.

Trance. (1.) In the only passage (Num. xxiv. 4, 16) in which this word occurs in the English of the O. T. there is, as the italics show, no corresponding word in Hebrew. In the N. T. we meet with the word three times (Acts x. 10, xi. 5, xlii. 17), the Vulgate giving "excessus" in the two former, "stupor mentis" in the latter. The meaning of the Greek and Latin words is obvious enough. The *ekstasis* is the state in which a man has passed out of the usual order of his life, beyond the usual limits of consciousness and volition. "Excessus," in like manner, became, in ecclesiastical writers, a synonyme for the condition of seeming death to the outer world, which we speak of as a trance. The history of the English word presents an interesting parallel. (2.) Used as the word is by Luke, "the physician," and, in this special sense, by him only, in the N. T., it would be interesting to inquire what precise meaning it had in the medical terminology of the time. From the time of Hippocrates,

who uses it to describe the loss of conscious perception, it had probably borne the connotation which it has had, with shades of meaning for good or evil, ever since. (3.) We may compare with these statements the more precise definitions of modern medical science. There the ecstatic state appears as one form of catalepsy. In catalepsy pure and simple, there is "a sudden suspension of thought, of sensibility, of voluntary motion." In the ecstatic form of catalepsy, on the other hand, "the patient is lost to all external impressions, but wrapt and absorbed in some object of the imagination." There is, for the most part, a high degree of mental excitement. The patient utters the most enthusiastic and fervid expressions or the most earnest warnings. The character of the whole frame is that of intense contemplative excitement. The causes of this state are to be traced commonly to strong religious impressions. (4.) Whatever explanation may be given of it, it is true of many, if not of most, of those who have left the stamp of their own character on the religious history of mankind, that they have been liable to pass at times into this abnormal state. The union of intense feeling, strong volition, long-continued thought (the conditions of all wide and lasting influence), aided in many cases by the withdrawal from the lower life of the support which is needed to maintain a healthy equilibrium, appears to have been more than the "earthen vessel" will bear. The words which speak of "an ecstasy of adoration" are often literally true. (5.) We are now able to take a true estimate of the trances of Biblical history. As in other things, so also here, the phenomena are common to higher and lower, to true and false systems. We may not point to trances and ecstasies as proofs of a true Revelation, but still less may we think of them as at all inconsistent with it. Thus, though we have not the word, we have the thing in the "deep sleep," the "horror of great darkness," that fell on Abraham (Gen. xv. 12). Balaam, as if overcome by the constraining power of a Spirit mightier than his own, "sees the vision of God, falling, but with opened eyes" (Num. xxiv. 4). Saul, in like manner, when the wild chant of the prophets stirred the old depths of feeling, himself also "prophesied" and "fell down" (most, if not all, of his kingly clothing being thrown off in the ecstasy of the moment) "all that day and all that night" (1 Sam. xix. 24). Something there was in Jeremiah that made men say of him that he was as one that "is mad and maketh himself a prophet" (Jer. xxix. 26). In Ezekiel the phenomena appear in more wonderful and awful forms (Ez. iii. 15). (6.) As other elements and forms of the prophetic work were revived in "the Apostles and Prophets" of the N. T., so also was this. Though different in form, it belongs to the same class of phenomena as the GIFT OF TONGUES, and is connected with "visions and revelations of the Lord." In some cases, indeed, it is the chosen channel for such revelations (Acts x. xi., xxii. 17-21). Wisely for the most part did the Apostle draw a veil over these more mysterious experiences (2 Cor. xii. 1-4).

TRESPASS-OFFERING. [SIN-OFFERING.]

Trial. Information on the subject of trials under the Jewish law will be found in the articles on JUDGES and SANHEDRIM, and also in JESUS CHRIST. A few remarks, however, may here be added on judicial proceedings mentioned in Scripture, especially such as were conducted before

foreigners. (1.) The trial of our Lord before Pilate was, in a legal sense, a trial for the offence *luesae majestatis*; one which would be punishable with death (Luke xxiii. 2, 38; John xix. 12, 15). (2.) The trials of the Apostles, of St. Stephen, and of St. Paul before the high-priest, were conducted according to Jewish rules (Acts iv., v. 27, vi. 12, xxii. 30, xxiii. 1). (3.) The trial, if it may be so called, of St. Paul and Silas at Philippi, was held before the *dumviri*, or, as they are called *σπαγγολ*, praetors, on the charge of innovation in religion—a crime punishable with banishment or death (Acts xvi. 19, 22). (4.) The interrupted trial of St. Paul before the pro-consul Gallio, was an attempt made by the Jews to establish a charge of the same kind (Acts xviii. 12-17). (5.) The trials of St. Paul at Caesarea (Acts xxiv., xxv., xxvi.) were conducted according to Roman rules of judicature. (a.) In the first of these, before Felix, we observe the employment, by the plaintiffs, of a Roman advocate to plead in Latin. (b.) The postponement of the trial after St. Paul's reply. (c.) The free custody in which the accused was kept, pending the decision of the judge (Acts xxiv. 23-26). The second formal trial (Acts xxv. 7, 8) presents two new features: (a.) the appeal, *appellatio* or *provocatio*, to Caesar, by St. Paul as a Roman citizen. The effect of the appeal was to remove the case at once to the jurisdiction of the emperor. (b.) The conference of the procurator with "the council" (Acts xxv. 12), the assessors, who sat on the bench with the praetor as *consilarii*. But the expression may denote the deputies from the Sanhedrim. (6.) We have, lastly, the mention (Acts xix. 38) of a judicial assembly which held its session at Ephesus.

Tribute (Matt. xvii. 24, 25). (1.) The chief Biblical facts connected with the payment of tribute have been already given under TAXES. A few remain to be added in connexion with the word which in the above passage is thus rendered, inaccurately enough, in the A. V. The payment of the half-shekel (= half *stater* = two drachmae) was, though resting on an ancient precedent (Ex. xxx. 13), yet, in its character as a fixed annual rate, of late origin. It was proclaimed according to Rabbinic rules, on the first of Adar, began to be collected on the 15th, and was due, at latest, on the first of Nisan. It was applied to defray the general expenses of the Temple. After the destruction of the Temple it was sequestered by Vespasian and his successors, and transferred to the Temple of the Capitoline Jupiter. (2.) The explanation thus given of the "tribute" of Matt. xvii. 24, is beyond all doubt, the true one. To suppose with Chrysostom, Augustine, Maldonatus, and others, that it was the same as the tribute paid to the Roman emperor (Matt. xxii. 17), is at variance with the distinct statements of Josephus and the Mishna, and takes away the whole significance of our Lord's words. It may be questioned, however, whether the full significance of these words is adequately brought out in the popular interpretation of them. As explained by most commentators, they are simply an assertion by our Lord of His divine Sonship, an implied rebuke of Peter for forgetting the truth which he had so recently confessed. (3.) A fuller knowledge of the facts of the case may help us to escape out of the tight routine of commentators, and to rise to the higher and broader truth implied in our Lord's teaching. The Temple-rate, as above

stated, was of comparatively late origin. The question whether the cost of the morning and evening sacrifice ought to be defrayed by such a fixed compulsory payment, or left to the free-will offerings of the people, had been a contested point between the Pharisees and Sadducees, and the former had carried the day after a long struggle and debate, lasting from the 1st to the 8th day of Nisan. We have to remember this when we come to the narrative of St. Matthew. In a hundred different ways, the teaching of our Lord had been in direct antagonism to that of the Pharisees. The Sanhedrim, by making the Temple-offering a fixed annual tax, collecting it as men collected tribute to Caesar, were lowering, not raising the religious condition and character of the people. They were placing every Israelite on the footing of a "stranger," not on that of a "son." In proportion to the degree in which any man could claim the title of a Son of God, in that proportion was he "free" from this forced exaction. (4.) The interpretation which has now been given leads us to see, in these words, a precept as wide and far-reaching as the yet more memorable one, "Render unto Caesar the things that be Caesar's, and unto God the things that be God's."

Tribute-money. [TAXES; TRIBUTE.]

Tripolis. The Greek name of a city of great commercial importance, which served at one time as a point of federal union for Aradus, Sidon, and Tyre. What its Phœnician name was is unknown; but it seems not impossible that it was Kadytis, and that this was really the place captured by Neco of which Herodotus speaks. It was at Tripolis that, in the year 551 B.C., the plan was concocted for the simultaneous revolt of the Phœnician cities and the Persian dependencies in Cyprus against the Persian king Ochus. The destruction of Tyre by Alexander, like that of Sidon by Ochus, would naturally tend rather to increase than diminish the importance of Tripolis as a commercial port. When Demetrius Soter, the son of Seleucus, succeeded in wresting Syria from the young son of Antiochus (B.C. 161), he landed there and made the place the base of his operations. It is this circumstance to which allusion is made in the only passage in which Tripolis is mentioned in the Bible (2 Macc. xiv. 1). The prosperity of the city, so far as appears, continued down to the middle of the 6th century of the Christian era. The possession of a good harbour in so important a point for land-traffic, doubtless combined with the richness of the neighbouring mountains in determining the original choice of the site, which seems to have been a factory for the purposes of trade established by the three great Phœnician cities. Each of these held a portion of Tripolis surrounded by a fortified wall, like the Western nations at the Chinese ports. The ancient Tripolis was finally destroyed by the Sultan El Mansour in the year 1289 A.D.; and the modern *Turablos* is situated a couple of miles distant to the east, and is no longer a port. *El Myna*, which is perhaps on the site of the ancient Tripolis, is a small fishing village.

Troas The city from which St. Paul first sailed, in consequence of a divine intimation, to carry the Gospel from Asia to Europe (Acts xvi. 8, 11). It is mentioned on other occasions (Acts xx. 5, 6; 2 Cor. ii. 12, 13; 2 Tim. iv. 13) and deserves the careful attention of the student of the New Testament. The full name of the city was *Alexandria Troas* (Liv. xxxv. 42), and sometimes

it was called simply *Alexandria*, as by Pliny and Strabo, sometimes simply *Troas*. The former part of the name indicates the period at which it was founded. It was first built by Antigonos, under the name of Antigonæa Troas, and peopled with the inhabitants of some neighbouring cities. Afterwards it was embellished by Lysimachus, and named *Alexandria Troas*. Its situation was on the coast of MYRIA, opposite the S.E. extremity of the island of Tenedos. Under the Romans it was one of the most important towns of the province of ASIA. In the time of St. Paul, *Alexandria Troas* was a *colonia* with the *Jus Italicum*. The modern name is *Eski-Stamboul*. The ruins at *Eski-Stamboul* are considerable. The walls, which may represent the extent of the city in the Apostle's time, enclose a rectangular space, extending above a mile from east to west, and nearly a mile from north to south. That which possesses most interest for us is the harbour, which is still distinctly traceable in a basin about 400 feet long and 200 broad.

Trogyllium. The island of Samos is exactly opposite the rocky extremity of the ridge of Mycale, which is called Trogyllium in the N. T. (Acts xx. 15) and by Ptolemy (v. 2). It is interesting to observe that a little to the east of the extreme point there is an anchorage, which is still called *St. Paul's Port*.

Troop, Band. These words are employed to represent the Hebrew word *gédad*, which has invariably the force of an irregular force, gathered with the object of marauding and plunder.

Trophimus. One of the companions of St. Paul. From Acts xx. 4 we learn that Tychicus, like Trophimus, was a native of ASIA, and that the two were among those companions who travelled with the Apostle in the course of the third missionary journey, and during part of the route which he took in returning from Macedonia towards Syria. Both he and Tychicus accompanied St. Paul from Macedonia as far as Asia, but Tychicus seems to have remained there, while Trophimus proceeded with the Apostle to Jerusalem. There he was the innocent cause of the tumult in which St. Paul was apprehended (Acts xxi. 27-29). From this passage we learn two new facts, viz. that Trophimus was a Gentile, and that he was a native of EPHESUS. A considerable interval now elapses, during which we have no trace of either Tychicus or Trophimus; but in the last letter written by St. Paul, shortly before his martyrdom, from Rome, he mentions them both (2 Tim. iv. 12, 20). From the last of the phrases we gather simply that the Apostle had no long time before been in the Levant, that Trophimus had been with him, and that he had been left in infirm health at Miletus. Trophimus was probably one of the two brethren who, with TITUS, conveyed the 2nd Epistle to the Corinthians (2 Cor. viii. 16-24).

Trumpet. [CORNET.]

Trumpets, Feast of (Num. xxix. 1; Lev. xxiii. 24), the feast of the new moon, which fell on the first of Tisri. It differed from the ordinary festivals of the new moon in several important particulars. It was one of the seven days of Holy Convocation. Instead of the mere blowing of the trumpets of the Temple at the time of the offering of the sacrifices, it was "a day of blowing of trumpets." In addition to the daily sacrifices and the eleven victims offered on the first of every month, there were offered a young bullock, a ram, and seven lambs of.

the first year, with the accustomed meat offerings, and a kid for a sin offering (Num. xxix. 1-6). The regular monthly offering was thus repeated, with the exception of the young bullock. It has been conjectured that Ps. lxxxi., one of the songs of Asaph, was composed expressly for the Feast of Trumpets. The Psalm is used in the service for the day by the modern Jews. Various meanings have been assigned to the Feast of Trumpets. Maimonides considered that its purpose was to awaken the people from their spiritual slumber to prepare for the solemn humiliation of the Day of Atonement, which followed it within ten days (comp. Joel ii. 15). Some have supposed that it was intended to introduce the seventh or Sabbatical month of the year. Philo and some early Christian writers regarded it as a memorial of the giving of the Law on Sinai. But there seems to be no sufficient reason to call in question the common opinion of Jews and Christians, that it was the festival of the New Year's Day of the civil year, the first of Tisri, the month which commenced the Sabbatical year and the year of Jubilee.

Tryphēna and Tryphōsa. Two Christian women at Rome, enumerated in the conclusion of St. Paul's letter (Rom. xvi. 12). They may have been sisters, but it is more likely that they were fellow-deaconesses. We know nothing more of these two sister-workers of the Apostolic time. It is an interesting fact that the columbaria of "Caesar's household" in the *Vigna Codini*, near *Porta S. Sebastiano*, contain the name Tryphena.

Tryphon. A usurper of the Syrian throne. His proper name was Diodotus, and the surname Tryphon was given to him, or, according to Appian, adopted by him after his accession to power. He was a native of Cariana. In the time of Alexander Balas he was attached to the court; but towards the close of his reign he seems to have joined in the conspiracy which was set on foot to transfer the crown of Syria to Ptol. Philometor (1 Macc. xi. 13). After the death of Alexander Balas he took advantage of the unpopularity of Demetrius II. to put forward the claims of Antiochus VI., the young son of Alexander (1 Macc. xi. 39; B.C. 145). After a time he obtained the support of Jonathan, and the young king was crowned (B.C. 144). Tryphon, however, soon revealed his real designs on the kingdom, and, fearing the opposition of Jonathan, he gained possession of his person by treachery (1 Macc. xii. 39-50), and after a short time put him to death (1 Macc. xiii. 23). As the way seemed now clear, he murdered Antiochus and seized the supreme power (1 Macc. xiii. 31, 32). Demetrius was preparing an expedition against him (B.C. 141), when he was taken prisoner (1 Macc. xiv. 1-3), and Tryphon retained the throne till Antiochus VII., the brother of Demetrius, drove him to Dora, from which he escaped to Orthosia (1 Macc. xv. 10-14, 37-39; B.C. 139). Not long afterwards, being hard pressed by Antiochus, he committed suicide, or, according to other accounts, was put to death by Antiochus. Josephus adds that he was killed at Apamea, the place which he made his headquarters.

Tryphōsa. [TRYPHENA and TRYPHOSA.]

Tubal. In the ancient ethnological tables of Genesis and 1 Chr., Tubal is reckoned with Javan and Meshech among the sons of Japheth (Gen. x. 2; 1 Chr. i. 5). The three are again associated in the enumeration of the sources of the wealth of Tyre

(Ez. xxvii. 13). Tubal and Javan (Is. lxvi. 19), Meshech and Tubal (Ez. xxxii. 26, xxxviii. 2, 3, xxxix. 1), are nations of the north (Ez. xxxviii. 15; xxxix. 2). Josephus identifies the descendants of Tubal with the Iberians, that is—not, as Jerome would understand it, Spaniards, but—the inhabitants of a tract of country, between the Caspian and Euxine Seas, which nearly corresponded to the modern Georgia. This approximates to the view of Bochart, who makes the Moschi and Tibareni represent Meshech and Tubal. The Moschi and Tibareni, moreover, are constantly associated, under the names of *Muskai* and *Tiplai*, in the Assyrian inscriptions. In the time of Sargon, according to the inscriptions, Ambris, the son of Khuliyā, was hereditary chief of Tubal (the southern slopes of Taurus). In former times the Tibareni were probably more important, and the Moschi and Tibareni. Meshech and Tubal, may have been names by which powerful hordes of Scythians were known to the Hebrews. But in history we only hear of them as pushed to the furthest limits of their ancient settlements, and occupying merely a strip of coast along the Euxine. The exact limits of the territory of the Tibareni are extremely difficult to determine. Professor Rawlinson conjectures that the Tibareni occupied the coast between Cape *Yasoun* (Jasanium) and the River Melanthius (*Melet Irmak*), but if we follow Xenophon, we must place Boon as their western boundary, one day's march from Cotyora, and their eastern limit must be sought some 10 miles east of the *Melet Irmak*, perhaps not far from the modern *Aptar*, which is $\frac{3}{4}$ hours from that river. In the time of Xenophon the Tibareni were an independent tribe. Long before this they were subject to a number of petty chiefs, which was a principal element of their weakness, and rendered their subjugation by Assyria more easy. The Arabic Version of Gen. x. 2 gives Chorasan and China for Meshech and Tubal; in Eusebius (see Bochart) they are Illyria and Thessaly.

Tubal-Cain. The son of Lamech the Cainite by his wife Zillah (Gen. iv. 22). He is called "a forger of every cutting instrument of copper and iron." The Jewish legend of later times associates him with his father's song. "Lamech was blind," says the story as told by Rashi, "and Tubal-Cain was leading him; and he saw Cain, and he appeared to him like a wild beast, so he told his father to draw his bow, and he slew him. And when he knew that it was Cain his ancestor he smote his hands together and struck his son between them. So he slew him, and his wives withdrew from him, and he conciliates them." In this story Tubal-Cain is the "young man" of the song. The derivation of the name is extremely obscure. Hasse identifies Tubal-Cain with Vulcan. Gesenius proposed to consider it a hybrid word, compounded of the Pers. *tūpal*, iron slag, or scoria, and the Arab. *kāin*, a smith, but this etymology is more than doubtful.

Tubien. The "Jews called Tubien" (2 Mac. xii. 17) were doubtless the same who are elsewhere mentioned as living in the towns of Toubion, which again is probably the same with the Tob of the Old Testament.

Turpentine-tree occurs only once (Ecclus. xxiv. 16). The *τερεβινθος* or *τερεβινθος* of the Greeks is the *Pistacia terebinthus*, terebinth-tree, common in Palestine and the East, supposed by some writers to represent the *elah* of the Hebrew Bible. The terebinth, though not generally so conspicuous a

tree in Palestine as some of the oaks, occasionally grows to a large size. It belongs to the Nat. Order *Anacardiaceae*, the plants of which order generally contain resinous secretions.

Turtle, Turtle-dove (Heb. *tôr*). The name is phonetic, evidently derived from the plaintive cooing of the bird. The turtle-dove occurs first in Scripture in Gen. xv. 9. During the early period of Jewish history, there is no evidence of any other bird except the pigeon having been domesticated, and up to the time of Solomon, who may, with the peacock, have introduced other gallinaceous birds from India, it was probably the only poultry known to the Israelites. It is not improbable that the palm-dove (*Turtur aegyptiacus*, Temm.) may in some measure have supplied the sacrifices in the wilderness, for it is found in amazing numbers wherever the palm-tree occurs, whether wild or cultivated. From its habit of pairing for life, and its fidelity for its mate, it was a symbol of purity and an appropriate offering. The regular migration of the turtle-dove and its return in spring are alluded to in Jer. viii. 7, and Cant. ii. 11, 12. It is from its plaintive note doubtless that David in Ps. lxxiv. 19, pouring forth his lament to God, compares himself to a turtle-dove. In Palestine, besides the rock-dove (*Columba livia*, L.), very common on all the rocky parts of the coast and in the inland ravines, the ringdove (*Columba palumbus*, L.) frequents all the wooded districts of the country. The stock-dove (*Columba oenas*, L.) is as generally, but more sparingly distributed. Another species, allied either to this or to *Columba livia*, has been observed in the valley of the Jordan, perhaps *Col. leuconota*, Vitr. The turtle-dove (*Turtur auritus*, L.) is most abundant, and in the valley of the Jordan, an allied species, the palm-dove, or Egyptian turtle (*Turtur aegyptiacus*, Temm.), is by no means uncommon.

Turtur aegyptiacus.

Tychicus. A companion of St. Paul on some of his journeys, and one of his fellow-labourers in the work of the Gospel. He is mentioned in five separate books of the New Testament, and in four

cases explicitly, in the fifth very probably, he is connected with the district of Asia. (1) In Acts xx. 4 he is expressly called (with Trophimus) *Ἀσιανός*: but while Trophimus went with St. Paul to Jerusalem (Acts xxi. 29); Tychicus was left behind in Asia, probably at Miletus (Acts xx. 15, 38). (2) How Tychicus was employed in the interval before St. Paul's first imprisonment we cannot tell: but in that imprisonment he was with the Apostle again, as we see from Col. iv. 7, 8. Together with Onesimus, he was doubtless the bearer both of this letter and the following as well to Philemon. (3) The language concerning Tychicus in Eph. vi. 21, 22, is very similar, though not exactly in the same words. (4) The next references are in the Pastoral Epistles, the first in chronological order being Tit. iii. 12. Here St. Paul (writing possibly from Ephesus) says that it is probable he may send Tychicus to Crete, about the time when he himself goes to Nicopolis. (5) In 2 Tim. iv. 12 (written at Rome during the second imprisonment) he says, "I am herewith sending Tychicus to Ephesus." Bp. Ellicott suggests that this mission may have been connected with the carrying of the first Epistle. There is much probability in the conjecture that Tychicus was one of the two "brethren" (Trophimus being the other) who were associated with Titus (2 Cor. viii. 16-24), in conducting the business of the collection for the poor Christians in Judaea.

Tyrannus. The name of a man in whose school or place of audience Paul taught the Gospel for two years, during his sojourn at Ephesus (see Acts xix. 9). The presumption is that Tyrannus himself was a Greek, and a public teacher of philosophy or rhetoric. Meyer is disposed to consider that Tyrannus was a Jewish rabbi.

Tyre. A celebrated commercial city of antiquity, situated in Phœnicia, on the eastern coast of the Mediterranean Sea, in latitude 33° 17' N. Its Hebrew name "Tzôr" signifies a rock; which well agrees with the site of *Tûr*, the modern town, on a rocky peninsula, formerly an island. **PALÆTYRUS**, or Old Tyre. There is no doubt that, previous to the siege of the city by Alexander the Great, Tyre was situated on an island; but, according to the tradition of the inhabitants, if we may believe Justin (xi. 10), there was a city on the mainland before there was a city on the island; and the tradition receives some colour from the name of Palætyrus, or Old Tyre, which was borne in Greek times by a city on the continent, 30 stadia to the south. But a difficulty arises in supposing that Palætyrus was built before Tyre, as the word Tyre evidently means "a rock," and few persons who have visited the site of Palætyrus can seriously suppose that any rock on the surface there can have given rise to the name. To escape this difficulty, Hengstenberg makes the suggestion that Palætyrus meant Tyre that formerly existed; and that the name was introduced after the destruction of the greater part of it by Nebuchadnezzar, to distinguish it from that part of Tyre which continued to be in existence. Movers suggests that the original inhabitants of the city on the mainland possessed the island as part of their territory, and named their city from the characteristic features of the island, though the island itself was not then inhabited. This explanation is possible; but other explanations are equally possible. It is important, however, to bear in mind that this question regarding Palætyrus

is merely archaeological, and that nothing in Biblical history is affected by it. Nebuchadnezzar necessarily besieged the portion of the city on the mainland, as he had no vessels with which to attack the island; but it is reasonably certain that, in the time of Isaiah and Ezekiel, the heart or core of the city was on the island. Whether built before or later than Palaetyrus, the renowned city of Tyre, though it laid claims to a very high antiquity (Is. xxiii. 7), is not mentioned either in the *Iliad* or in the *Odyssey*. The tribe of Canaanites which inhabited the small tract of country which may be called Phœnicia Proper was known by the generic name of Sidonians (Judg. xviii. 7; Is. xxiii. 2, 4, 12; Josh. xiii. 6; Ez. xxxi. 30); and this name undoubtedly included Tyrians, the inhabitants being of the same race, and the two cities being less than 20 English miles distant from each other. In the Bible, Tyre is named for the first time in the Book of Joshua (xix. 29), where it is adverted to as a fortified city (in the A. V. "the strong city"), in reference to the boundaries of the tribe of Asher. The Israelites dwelt among the Sidonians or Phœnicians, who were inhabitants of the land (Judg. i. 31, 32), and never seem to have had any war with that intelligent race. Subsequently, in a passage of Samuel (2 Sam. xxiv. 7), it is stated that the enumerators of the census in the reign of David went in pursuance of their mission to Tyre, amongst other cities, which must be understood as implying, not that Tyre was subject to David's authority, but merely that a census was thus taken of the Jews resident there. But the first passages in the Hebrew historical writings, or in ancient history generally, which afford glimpses of the actual condition of Tyre, are in the Book of Samuel (2 Sam. v. 11), in connection with Hiram king of Tyre sending cedar-wood and workmen to David, for building him a palace; and subsequently in the Book of Kings, in connection with the building of Solomon's temple. One point at this period is particularly worthy of attention. "In contradistinction from all the other most celebrated independent commercial cities out of Phœnicia in the ancient and modern world, Tyre was a monarchy and not a republic. Another point is the skill in the mechanical arts which seems to have been already attained by the Tyrians. It is evident that under Solomon there was a close alliance between the Hebrews and the Tyrians. Hiram supplied Solomon with cedar-wood, precious metals, and workmen, and gave him sailors for the voyage to Ophir and India, while on the other hand Solomon gave Hiram supplies of corn and oil, ceded to him some cities, and permitted him to make use of some havens on the Red Sea (1 K. ix. 11-14, 26-28, x. 22). These friendly relations survived for a time the disastrous secession of the Ten Tribes, and a century later Ahab married a daughter of Ethbaal, king of the Sidonians (1 K. xvi. 31), who, according to Menander, was daughter of Ithobal, king of Tyre. When mercantile cupidity induced the Tyrians and the neighbouring Phœnicians to buy Hebrew captives from their enemies and to sell them as slaves to the Greeks and Edomites, there commenced denunciations, and, at first, threats of retaliation (Joel iii. 4-8; Amos i. 9, 10). But the likelihood of the denunciations being fulfilled first arose from the progressive conquests of the Assyrian monarchs. Accordingly, when Shalmaneser, king of Assyria, had taken the city of Samaria, had conquered the kingdom of Israel and

carried its inhabitants into captivity, he turned his arms against the Phœnician cities. At this time, Tyre had reached a high point of prosperity. Shalmaneser seems to have taken advantage of a revolt of the Cyprians; and what ensued is thus related by Menander, who translated the archives of Tyre into the Greek language: "Elulaeus reigned 36 years (over Tyre). This king, upon the revolt of the Kittæans (Cyprians), sailed with a fleet against them, and reduced them to submission. On the other hand, the king of the Assyrians attacked in war the whole of Phœnicia, but soon made peace with all, and turned back. On this Sidon and Ace (*i. e.* Akkô or Acre) and Palaetyrus revolted from the Tyrians, with many other cities which delivered themselves up to the king of Assyria. Accordingly when the Tyrians would not submit to him, the king returned and fell upon them again, the Phœnicians having furnished him with 60 ships and 800 rowers. Against these the Tyrians sailed with 12 ships, and, dispersing the fleet opposed to them, they took five hundred men prisoners. The reputation of all the citizens in Tyre was hence increased. Upon this the king of the Assyrians, moving off his army, placed guards at their river and aqueducts to prevent the Tyrians from drawing water. This continued for five years, and still the Tyrians held out, supplying themselves with water from wells." It is in reference to this siege that the prophecy against Tyre in Isaiah, chap. xxiii., was uttered. After the siege of Tyre by Shalmaneser (which must have taken place not long after 721 B.C.), Tyre remained a powerful state with its own kings (Jer. xxv. 22, xxvii. 3; Ez. xxviii. 2-12), remarkable for its wealth, with territory on the mainland, and protected by strong fortifications (Ez. xxviii. 5, xxvi. 4, 6, 8, 10, 12, xxvii. 11; Zech. ix. 3). Our knowledge of its condition thenceforward until the siege by Nebuchadnezzar depends entirely on various notices of it by the Hebrew prophets; but some of these notices are singularly full, and especially, the twenty-seventh chapter of Ezekiel furnishes us, on some points, with details such as have scarcely come down to us respecting any one city of antiquity, excepting Rome and Athens. One point especially arrests the attention, that Tyre, like its splendid daughter Carthage, employed mercenary soldiers (Ez. xxvii. 10, 11). Independently, however, of this fact respecting Tyrian mercenary soldiers, Ezekiel gives interesting details respecting the trade of Tyre. It appears that its gold came from Arabia by the Persian Gulf (v. 22), just as in the time of Solomon it came from Arabia by the Red Sea. On the other hand, the silver, iron, lead, and tin of Tyre came from a very different quarter of the world, viz. from the South of Spain, where the Phœnicians had established their settlement of Tarshish, or Tartessus. As to copper, we should have presumed that it was obtained from the valuable mines in Cyprus; but it is mentioned here in conjunction with Javan, Tubal, and Meshech, which points to the districts on the south of the Black Sea, in the neighbourhood of Armenia, in the southern line of the Caucasus, between the Black Sea and the Caspian. The country whence Tyre was supplied with wheat was Palestine. Tyre likewise obtained from Palestine, oil, honey, and balm, but not wine apparently, notwithstanding the abundance of grapes and wine in Judah (Gen. xlix. 11). The wine was imported from Damascus, and was called wine of Helbon. The Bedawî

Arabs supplied Tyre with lambs and rams and goats. Egypt furnished linen for sails, and the dyes from shell-fish were imported from the Peloponnesus. Lastly, from Dedan in the Persian Gulf, horns of ivory and ebony were imported, which must originally have been obtained from India (Ez. xxvii. 10, 11, 22, 12, 13, 17, 18, 21, 7, 15). In the midst of great prosperity and wealth, which was the natural result of such an extensive trade (Ez. xxviii. 4), Nebuchadnezzar, at the head of an army of the Chaldees, invaded Judaea, and captured Jerusalem. As Tyre was so near to Jerusalem, and as the conquerors were a fierce and formidable race (Hab. i. 6), it would naturally be supposed that this event would have excited alarm and terror amongst the Tyrians. Instead of this, we may infer from Ezekiel's statement (xxvi. 2) that their predominant feeling was one of exultation. At first sight this appears strange and almost inconceivable; but it is rendered intelligible by some previous events in Jewish history. Only 34 years before the destruction of Jerusalem, commenced the celebrated Reformation of Josiah, B.C. 632. This momentous religious revolution (2 K. xxii., xxiii.) fully explains the exultation and malevolence of the Tyrians. In that Reformation, Josiah had heaped insults on the gods who were the objects of Tyrian veneration and love. Indeed, he seemed to have endeavoured to exterminate their religion (2 K. xxiii. 20). These acts must have been regarded by the Tyrians as a series of sacrilegious and abominable outrages; and we can scarcely doubt that the death in battle of Josiah at Megiddo, and the subsequent destruction of the city and Temple of Jerusalem were hailed by them with triumphant joy as instances of divine retribution in human affairs. This joy, however, must soon have given way to other feelings, when Nebuchadnezzar invaded Phoenicia, and laid siege to Tyre. That siege lasted thirteen years, and it is still a disputed point whether Tyre was actually taken by Nebuchadnezzar on this occasion. However this may be, it is probable that, on some terms or other, Tyre submitted to the Chaldees. The rule of Nebuchadnezzar over Tyre, though real, may have been light, and in the nature of an alliance. During the Persian domination the Tyrians were subject in name to the Persian king, and may have given him tribute. With the rest of Phoenicia, they had submitted to the Persians, without striking a blow. But their connexion with the Persian king was not slavish. They fought with Persia against Greece, and furnished vessels of war in the expedition of Xerxes. At this time Tyre seems to have been inferior in power to Sidon. Towards the close of the following century, B.C. 332, Tyre was assailed for the third time by a great conqueror; and if some uncertainty hangs over the siege by Nebuchadnezzar, the results of the siege by Alexander were clear and undeniable. At that time Tyre was situated on an island nearly half a mile from the mainland, it was completely surrounded by prodigious walls, the loftiest portion of which on the side fronting the mainland reached a height of not less than 150 feet; and notwithstanding his persevering efforts, he could not have succeeded in his attempt, if the harbour of Tyre to the north had not been blockaded by the Cyprians, and that to the south by the Phoenicians, thus affording an opportunity to Alexander for uniting the island to the mainland by an enormous artificial mole. The

immediate results of the capture by Alexander were most disastrous to it, as its brave defenders were put to death; and, in accordance with the barbarous policy of ancient times, 30,000 of its inhabitants, including slaves, free females and free children were sold as slaves. It gradually, however, recovered its prosperity through the immigration of fresh settlers, though its trade is said to have suffered by the vicinity and rivalry of Alexandria. Under the Macedonian successors of Alexander, it shared the fortunes of the Seleucidae. Under the Romans, at first it continued to enjoy a kind of freedom. Subsequently, however, on the arrival of Augustus in the East, he is said to have deprived both Tyre and Sidon of their liberties for seditious conduct. Still the prosperity of Tyre in the time of Augustus was undeniably great. Strabo gives an account of it at that period (xvi. 2, 23), and speaks of the great wealth which it derived from the dyes of the celebrated Tyrian purple, which, as is well known, were extracted from shell-fish found on the coast, belonging to a species of the genus *Murex*. The accounts of Strabo and Pliny have a peculiar interest in this respect, that they tend to convey an idea of what the city must have been, when visited by Christ (Matt. xv. 21; Mark vii. 24). It was perhaps more populous than Jerusalem, and if so, it was undoubtedly the largest city which he is known to have visited. From the time of Christ to the beginning of the 5th century, there is no reason to doubt that, as far as was compatible with the irreparable loss of independence, Tyre continued in uninterrupted prosperity. Jerome, in his Commentaries on Ezekiel, comes to the passage in which the prophet threatens Tyre with the approach of Nebuchadnezzar, king of Babylon (Ez. xxvi. 7); and he then, amongst other points, refers to the verse in which the prophet predicts of Tyre, "Thou shalt be built no more," saying that this raises a question as to how a city can be said not to be built any more, which we see at the present day the most noble and the most beautiful city of Phoenicia. He afterwards, in his remarks on the 3rd verse of the 27th chapter, in which Tyre is called, "a merchant of the people for many isles," says that this continues down to his time, so that commercial dealings of almost all nations are carried on in that city. Jerome's Commentaries on Ezekiel are supposed to have been written about the years 411-414 A.D., so that his testimony respecting the prosperity of Tyre bears date almost precisely a thousand years after the capture of Jerusalem by Nebuchadnezzar, B.C. 588. As to the passage in which Ezekiel states that Tyre shall be built no more, Jerome says the meaning is, that "Tyre will be no more the Queen of Nations, having its own king, as was the case under Hiram and other kings, but that it was destined to be always subject, either to the Chaldeans, or to the Macedonians, or to the Ptolemies, or at last to the Romans." When Jerome spoke of Tyre's subjection to the Romans, which had then lasted more than four hundred years, he could scarcely have anticipated that another subjugation of the country was reserved for it from a new conquering power, coming not from the North, but from the South. In the 7th century A.D. took place the extraordinary Arabian revolution under Mahomet, which has given a new religion to so many millions of mankind. In the years 638-638 A.D. all Syria and Palestine, from the Dead Sea to Antioch, was conquered by the Khalif Omar.

But even this conquest did not cause the overthrow of Tyre. Accordingly, at the time of the Crusades Tyre was still a flourishing city, when it surrendered to the Christians on the 27th of June, 1144. It had early been the seat of a Christian bishopric. In fact, at this period, and down to the close of the 13th century, there was perhaps no city in the known world which had stronger claims than Tyre to the title of the "Eternal City." Tyre had been the parent of colonies, which at a distant period had enjoyed a long life and had died; and it had survived more than fifteen hundred years its greatest colony, Carthage. It had outlived Egyptian Thebes, and Babylon, and ancient Jerusalem. It had seen Grecian cities rise and fall. Rome, it is true, was still in existence in the 13th century; but, in comparison with Tyre, Rome itself was of recent date. At length, however, the evil day of Tyre undoubtedly arrived. It had been more than a century and a half in the hands of Christians, when in March, A.D. 1291, the Sultan of Egypt and Damascus invested Acre, then known to Europe by the name of Ptolemais, and took it by storm after a siege of two months. The result was told in the beginning of the next century by Marinus Sanutus, a Venetian, in the following words: "On the same day on which Ptolemais was taken, the Tyrians, at vespers, leaving the city empty, without the stroke of a sword, without the tumult of war, embarked on board their vessels, and abandoned the city to be occupied freely by their conquerors. On the morrow the Saracens entered, no one attempting to prevent them, and they did what they pleased." This was the turning-point in the history of Tyre, 1879 years after the capture of Jerusalem by Nebuchadnezzar; and Tyre has not yet recovered from the blow. Since the beginning of the present century there has been a partial revival of prosperity. But it has been visited at different times during the last thirty years by biblical scholars, such as Professor Robinson, Dean Stanley, and M. Ernest Renan, who all concur in the account of its general aspect of desolation. Its great inferiority to Beyrout for receiving vessels suited to the requirements of modern navigation will always prevent Tyre from becoming again the most important commercial city on the Syrian coast. The question of whether Tyre was actually taken by Nebuchadnezzar after his thirteen years' siege has been keenly discussed. Gesenius, Winer, and Hitzig decide it in the negative, while Hengstenberg has argued most fully on the other side. The following points may be observed respecting the supposed capture:—1st. The evidence of Ezekiel, a contemporary, seems to be against it. The obvious inference from xxix. 18 is that, however great the exertions of the army may have been in digging intrenchments or in casting up earthworks, the siege was unsuccessful. This is confirmed by the following verses (19, 20). 2ndly. Josephus, who had access to historical writings on this subject which have not reached our times, neither states on his own authority, nor quotes any one else as stating, that Nebuchadnezzar took it. 3rdly. The capture of Tyre on this occasion is not mentioned by any Greek or Roman author whose writings are now in existence. 4thly. In the time of Jerome it was distinctly stated by some of his contemporaries that they had read, amongst other histories on this point, histories of Greeks and Phoenicians, and especially of Nicolaus Damascenus, in which nothing was said of the siege

of Tyre by the Chaldees: and Jerome, in noticing this fact, does not quote any authority of any kind for a counter-statement. On this view of the question there would seem to be small reason for believing that the city was actually captured, were it not for another passage of Jerome in his Commentaries on the passage of Ezekiel already quoted (xxix. 18), in which he explains that the meaning of Nebuchadnezzar's having received no wages for his warfare against Tyre is, not that he failed to take the city, but that the Tyrians had previously removed everything precious from it in ships, so that when Nebuchadnezzar entered the city he found nothing there. But contrary to the most natural meaning of the prophet Ezekiel's words (xxix. 18), it would be unsafe to rely on Jerome's sole authority for the statement that Nebuchadnezzar and his army eventually captured Tyre.

Tyrus. This form is employed in the A.V. of the Books of Jeremiah, Ezekiel, Hosea (Joel has "Tyre"), Amos, Zechariah, 2 Esdras, Judith, and the Maccabees, as follows: Jer. xxv. 22, xxvii. 3, xlvii. 4; Ezek. xxvi. 2, 3, 4, 7, 15, xxvii. 2, 3, 8, 32, xxviii. 2, 12, xxix. 18; Hos. ix. 13; Am. i. 9, 10; Zech. ix. 2, 3; 2 Esd. i. 11; Jud. ii. 28; 1 Macc. v. 15; 2 Macc. iv. 18, 32, 44, 49.

U

U'cal. According to the received text of Prov. xxx. 1, Ithiel and Ucal must be regarded as proper names, and if so, they must be the names of disciples or sons of Agur the son of Jakeh, an unknown sage among the Hebrews. But there is great obscurity about the passage. Most translators and commentators regard them as proper names. J. D. Michaelis renders, "I have wearied myself for God, and have given up the investigation," applying the words to a man who had bewildered himself with philosophical speculations about the Deity, and had been compelled to give up the search. But this translation cannot be admitted. Ewald considers both Ithiel and Ucal as symbolical names, employed by the poet to designate two classes of thinkers to whom he addresses himself.

U'el. One of the family of Bani, who during the Captivity had married a foreign wife (Ezr. x. 34).

U'knaz. In the margin of 1 Chr. iv. 15 the words "even Kennaz" in the text are rendered "Uknaz," as a proper name.

Ula'i is mentioned by Daniel (viii. 2, 16) as a river near to Susa, where he saw his vision of the ram and the he-goat. It has been generally identified with the Eulæus of the Greek and Roman Geographers, a large stream in the immediate neighbourhood of that city. The Eulæus has been by many identified with the Chospes, which is undoubtedly the modern *Kerkhah*, an affluent of the Tigris, flowing into it a little below *Kurnah*. By others it has been regarded as the *Kuran*, a large river, considerably further to the eastward, which enters the *Khor Bamishir* near *Mohammerah*. Some have even suggested that it may have been the *Shapur* or *Shaur*, a small stream which rises a few miles N. W. of Susa, and flows by the ruins into the *Dizful* stream, an affluent of the *Kuran*. The various notices of ancient writers appear to identify the upper Eulæus with the upper *Kerkhah*, and the lower Eulæus with the lower *Kuran*. A recent survey of the ground has suggested a satisfactory

explanation. It appears that the *Kerkhah* once bifurcated at *Pai Pul*, about 20 miles N. W. of Susa, sending out a branch which passed east of the ruins, absorbing into it the *Shapur*, and flowing on across the plain in a S. S. E. direction till it fell into the *Kuran* at *Ahuaz*. Thus the upper *Kerkhah* and the lower *Kuran* were in old times united, and might be viewed as forming a single stream.

Ulam. 1. A descendant of Gilead the grandson of Manasseh, and father of Bedan (1 Chr. vii. 17).—2. The firstborn of Eshek, a descendant of the house of Saul (1 Chr. viii. 39, 40).

Ulla. An Asherite, head of a family in his tribe (1 Chr. vii. 39).

Um'mah. One of the cities of the allotment of Asher (Josh. xix. 30 only). Dr. Thomson conjectures that a place called *Alma* in the highlands on the coast, about five miles E.N.E. of *Bus en-Nakhara*, may be identical with Ummah.

Unclean Meats. These were things strangled, or dead of themselves, or through beasts or birds of prey; whatever beast did not both part the hoof and chew the cud; and certain other smaller animals rated as "creeping things"; certain classes of birds mentioned in Lev. xi. and Deut. xiv. twenty or twenty-one in all; whatever in the waters had not both fins and scales; whatever winged insect had not besides four legs the two hind-legs for leaping; besides things offered in sacrifice to idols; and all blood or whatever contained it (save perhaps the blood of fish, as would appear from that only of beast and bird being forbidden, Lev. vii. 26), and therefore flesh cut from the live animal; as also all fat, at any rate that disposed in masses among the intestines, and probably wherever discernible and separable among the flesh (Lev. iii. 14-17, vii. 23). The eating of blood was prohibited even to "the stranger that sojourneth among you" (Lev. xvii. 10, 12, 13, 14). As regards blood, the prohibition indeed dates from the declaration to Noah against "flesh with the life thereof, which is the blood thereof," in Gen. ix. 4, which was perhaps regarded by Moses as still binding upon all Noah's descendants. Besides these, we find the prohibition twice recurring against "seething a kid in its mother's milk." The general distinction of clean and unclean is rightly observed by Michaelis to have its parallel amongst all nations, there being universally certain creatures regarded as clean, *i. e.* fit for food, and the rest as the opposite (comp. Lev. xi. 47). With the greater number of nations, however, this is only a traditional usage based merely perhaps either on an instinct relating to health, or on a repugnance which is to be regarded as an ultimate fact in itself, and of which no further account is to be given. The same personal interest taken by Jehovah in his subjects, which is expressed by the demand for a ceremonially pure state on the part of every Israelite as in covenant with Him, regarded also this particular detail of that purity, *viz.* diet. It remained for a higher Lawgiver to announce that "there is nothing from within a man that entering into him can defile him" (Mark vii. 15). It is noteworthy that the practical effect of the rule laid down is to exclude all the *carnivora* among quadrupeds, and, so far as we can interpret the nomenclature, the *raptores* among birds. This suggests the question whether they were excluded as being not averse to human carcases, and in most Eastern countries acting as the servants of the battle-field and the gibbet. Even swine have been

known so to feed; and, further, by their constant runcation among whatever lies on the ground, suggest impurity, even if they were not generally foul feeders. Amongst fish those which were allowed contain unquestionably the most wholesome varieties, save that they exclude the oyster. The exclusion of the camel and the hare from allowable meats is less easy to account for, save that the former never was in common use. It is so impossible to substitute any other creature for the camel as the "ship of the desert," that to eat him, especially where so many other creatures give meat so much preferable, would be the worst economy possible in an Eastern commissariat—that of destroying the best, or rather the only conveyance, in order to obtain the most indifferent food. The hare was long supposed, even by eminent naturalists, to ruminate, and certainly was eaten by the Egyptians. The horse and ass would be generally spared from similar reasons to those which exempted the camel. Practically the law left among the allowed meats an ample variety, and no inconvenience was likely to arise from a prohibition to eat camels, horses, and asses. But as Orientals have minds sensitive to teaching by types, there can be little doubt that such ceremonial distinctions not only tended to keep Jew and Gentile apart, but were a perpetual reminder to the former that he and the latter were not on one level before God. Hence, when that ceremony was changed, we find that this was the very symbol selected to instruct St. Peter in the truth that God was not a "respector of persons." It was no mere question of which among several means of supporting life a man chose to adopt, when the persecutor dictated the alternative of swine's flesh or the loss of life itself, but whether he should surrender the badge and type of that privilege by which Israel stood as the favoured nation before God (1 Macc. i. 63, 64; 2 Macc. vi. 18, vii. 1). The same feeling led to the exaggeration of the Mosaic regulations, until it was "unlawful for a man that was a Jew to keep company with or come unto one of another nation" (Acts x. 28); and with such intensity were badges of distinction cherished, that the wine, bread, oil, cheese, or anything cooked by a heathen, were declared unlawful for a Jew to eat. As regards things offered to idols, all who own one God meet on common ground; but the Jew viewed the precept as demanding a literal objective obedience, and had a holy horror of even an unconscious infraction of the law; hence, as he could never know what had received idolatrous consecration, his only safety lay in total abstinence. The prohibition to "seethe a kid in his mother's milk" has caused considerable difference of opinion amongst commentators. Michaelis thought it was meant merely to encourage the use of olive oil instead of the milk or butter of an animal, which we commonly use in cookery, where the Orientals use the former. This will not satisfy any mind by which the clue of symbolism has been once duly seized. Mercy to the beast is one of the under-currents which permeate that law. To soften the feelings and humanise the character was the higher and more general aim. The milk was the destined support of the young creature: viewed in reference to it, the milk was its "life," and had a relative sanctity resembling that of the forbidden blood. The Talmudists took an extreme view of the precept, as forbidding generally the cooking of flesh in milk. It remains to mention

the sanitary aspect of the case. Swine are said to be peculiarly liable to disease in their own bodies. This probably means that they are more easily led than other creatures to the foul feeding which produces it; and where the average heat is great, decomposition rapid, and malaria easily excited, this tendency in the animal is more mischievous than elsewhere. The prohibition on eating fat was salubrious in a region where skin diseases are frequent and virulent, and that on blood had, no doubt, a similar tendency. Yet the beneficial tendency is veiled under a ceremonial difference, for the "stranger" dwelling by the Israelite was allowed it, although the latter was forbidden. As regards the animals allowed for food, comparing them with those forbidden, there can be no doubt on which side the balance of wholesomeness lies.

Uncleaness. The distinctive idea attached to ceremonial uncleaness among the Hebrews was, that it cut a person off for the time from social privileges, and left his citizenship among God's people for the while in abeyance. It did not merely require by law a certain ritual of purification, in order to enhance the importance of the priesthood, but it placed him who had contracted an uncleaness in a position of disadvantage, from which certain ritualistic acts alone could free him. There is an equality in the fact of the Divine Law taking hold of a man by the ordinary infirmities of flesh, and setting its stamp, as it were, in the lowest clay of which he is moulded. The sacredness attached to the human body is parallel to that which invested the Ark of the Covenant itself. It is as though Jehovah thereby would teach them that the "very hairs of their head were all numbered" before him, and that "in his book were all their members written." Thus was inculcated, so to speak, a bodily holiness. Nor were the Israelites to be only "separated from other people," but they were to be "holy unto God" (xx. 24, 26), "a kingdom of priests, and a holy nation," hence a number of such ordinances regarding outward purity, which in Egypt they had seen used only by the priests, were made publicly obligatory on the Hebrew nation. The importance to physical wellbeing of the injunctions which required frequent ablution, under whatever special pretences, can be but feebly appreciated in our cooler and damper climate. Hence the obvious utility of reinforcing, by the sanction of religion, observances tending in the main to that healthy state which is the only solid basis of comfort, even though in certain points of detail they were burdensome. Uncleaness, as referred to man, may be arranged in three degrees; (1) that which defiled merely "until even," and was removed by bathing and washing the clothes at the end of it—such were all contacts with dead animals; (2) that graver sort which defiled for seven days, and was removed by the use of the "water of separation"—such were all defilements connected with the human corpse; (3) uncleaness from the morbid, puerperal, or menstrual state, lasting as long as that morbid state lasted; and in the case of leprosy lasting often for life. As the human person was itself the seat of a covenant-token, so male and female had each their ceremonial obligations in proportion to their sexual differences. Further than this the increase of the nation was a special point of the promise to Abraham and Jacob, and therefore their fecundity as parents

was under the Divine tutelage, beyond the general notion of a curse, or at least of God's disfavour, as implied in barrenness. There is an emphatic reminder of human weakness in the fact of birth and death—man's passage alike into and out of his mortal state—being marked with a stated pollution. Thus the birth of the infant brought defilement on its mother, which she, except so far as necessarily isolated by the nature of the circumstances, propagated around her. Nay, the conjugal act itself, or any act resembling it (vv. 16-18), entailed uncleaness for a day. The corpse, on the other hand, bequeathed a defilement of seven days to all who handled it, to the "tent" or chamber of death, and to sundry things within it. Nay, contact with one slain in the field of battle, or with even a human bone or grave, was no less effectual to pollute, than that with a corpse dead by the course of nature (Num. xix. 11-18). This shows that the source of pollution lay in the mere fact of death. The duration of defilement caused by the birth of a female infant, being double that due to a male, extending respectively to eighty and forty days in all (Lev. xii. 2-5), may perhaps represent the woman's heavier share in the first sin and first curse (Gen. iii. 16; 1 Tim. ii. 14). For a man's "issue," besides the uncleaness while it lasted, a probation of seven days, including a washing on the third day, is prescribed. Similar was the period in the case of the woman, and in that of intercourse with a woman so affected (Lev. xv. 13, 28, 24). With regard to uncleaness arising from the lower animals, Lightfoot remarks, that all which were unclean to touch when dead were unclean to eat, but not conversely; and that all which were unclean to eat were unclean to sacrifice, but not conversely. All animals, however, if dying of themselves, or eaten with the blood, were unclean to eat. The carcass also of any animal unclean as regards diet, however dying, defiled whatever person it, or any part of it, touched. All these defilements were "until even" only, save the eating "with the blood," the offender in which respect was to "be cut off" (Lev. xi. xvii. 14). It should further be added, that the same sentence of "cutting off," was denounced against all who should "do presumptuously" in respect even of minor defilements; by which we may understand all contempt of the legal provisions regarding them. The directions in Deut. xxiii. 10-13, relate to the avoidance of impurities in the case of a host encamped. Amongst causes of defilement should be noticed the fact that the ashes of the red heifer, burnt whole, which were mixed with water and became the standing resource for purifying uncleaness in the second degree, themselves became a source of defilement to all who were *clean*, even as of purification to the unclean, and so the water. Somewhat similarly the scape-goat, who bore away the sins of the people, defiled him who led him into the wilderness, and the bringing forth and burning the sacrifice on the Great Day of Atonement had a similar power. This lightest form of uncleaness was expiated by bathing the body and washing the clothes. Besides the water of purification made as aforesaid, men and women in their "issues," were, after seven days, reckoned from the cessation of the disorder, to bring two turtle-doves or young pigeons to be killed by the priests. The purification after childbirth is well known from the N. T. All these kinds of uncleaness disqualified for holy functions:

as the layman so affected might not approach the congregation and the sanctuary, so any priest who incurred defilement must abstain from holy things (Lev. xxii. 2-8). For the special case of the leper, see LEPROSY. To the remarks there made, it may be added that the priests, in their contact with the leper to be adjudged, were exempted from the law of defilement; that the garb and treatment of the leper seem to be that of one dead in the eye of the Law or rather a perpetual mourner for his own estate of death with "clothes rent and head bare." As regards the analogies which the ceremonial of other Oriental nations offers, it may be mentioned that amongst the Arabs the touching a corpse still defiles. Beyond this, M. Chardin in his account of the religion of the Persians, enters into particulars which show a singularly close correspondence with the Levitical code.

Undergirding, Acts xxvii. 17. [SHIP.]

Unicorn (Heb. *rēēm*, *rēēm*, *rēm*) the rendering by the A. V., following the LXX., of the Hebrew *Rēēm*, a word which occurs seven times in the O. T. as the name of some large wild animal. The *Rēēm* of the Hebrew Bible, however, has nothing at all to do with the one-horned animal mentioned by Ctesias and other Greek and Roman writers, as is evident from Deut. xxxiii. 17, where, in the blessing of Joseph, it is said, "His glory is like the firstling of his bullock, and his horns are like the horns of a unicorn" not, as the text of the A. V. renders it "the horns of unicorns." The two horns of the *Rēēm* are "the ten thousand of Ephraim and the thousands of Manasseh." This text puts a one-horned animal entirely out of the question. Bochart contends that the Hebrew *Rēēm* is identical with the Arabic *Rīm*, which is usually referred to the *Oryx leucoryx*, the white antelope of North Africa,* and at one time perhaps an inhabitant of Palestine. Arnold Boot with much better reason, conjectures that some species of *Urus* or wild-ox is the *Rēēm* of the Hebrew Scriptures. Robinson and Gesenius have little doubt that the buffalo (*Bubalus bubalus*) is the *Rēēm* of the Bible. Little can be urged in favour of the rhinoceros, for it would have been forbidden to be sacrificed by the Law of Moses, whereas the *Rēēm* is mentioned by Isaiah as coming down with bullocks and rams to the Lord's sacrifice. Again, the skipping of the young *Rēēm* (Is. xxix. 6) is scarcely compatible with the habits of a rhinoceros. With regard to the claims of the *Oryx leucoryx*, it must be observed that this antelope, like the rest of the family, is harmless unless wounded or hard pressed by the hunter, nor is it remarkable for the possession of any extraordinary strength. Considering therefore that the *Rēēm* is spoken of as a two-horned animal of great strength and ferocity, that it was evidently well known and often seen by the Jews, that it is mentioned as an animal fit for sacrificial purposes, and that it is frequently associated with bull and oxen, we think there can be no doubt that some species of wild-ox is intended. The allusion in Ps. xcii. 10, "But thou shalt lift up, as a *Rēēm*, my horn," seems to point to the mode in which the *Bovidae* use their horns, lowering the head and then tossing it up. But it is impossible to determine what particular species of wild-ox is signified. Some have conjectured that the *Rēēm* denotes the wild buffalo. It is possible that some wild species,

Bubalus arnee, or *B. brachycerus*, may have existed formerly in Palestine. We are, however, more in favour of some gigantic *Urus*.

Uri. 1. One of the Levite doorkeepers in the time of David (1 Chr. xv. 18, 20).—2. A second Levite (unless the family of the foregoing be intended) concerned in the sacred office after the return from Babylon (Neh. xii. 9).

U'phaz, Jer. x. 9; Dan. x. 5. [OPHIR.]

Ur occurs in Genesis only, and is there mentioned as the land of Haran's nativity (Gen. xi. 28), the place from which Terah and Abraham started "to go into the land of Canaan" (xi. 31). It is called in Genesis "Ur of the Chaldeans" while in the Acts St. Stephen places it, by implication, in Mesopotamia (vii. 2, 4). These are all the indications which Scripture furnishes as to its locality. One tradition identifies Ur with the modern Orfah. There is some ground for believing that this city, called by the Greeks Edessa, had also the name of Orfah as early as the time of Isidore (ab. B.C. 150). According to Pocock that Ur is Edessa or Orfah is "the universal opinion of the Jews;" and it is also the local belief. A second tradition, which appears in the Talmud, and in some of the early Arabian writers, finds Ur in Warka, the *Oppidum* of the Greeks, and probably the Erch of Holy Scripture. A third tradition distinguishes Ur from Warka. There can be little doubt that the city whereto this tradition points is that which appears by its bricks to have been called *Hur* by the natives, and which is now represented by the ruins at *Mugheir*, or *Uingheir*, on the right bank of the Euphrates, nearly opposite to its junction with the *Shat-el-Ilie*. An opinion, unsupported by any tradition, remains to be noticed. Bochart, Calmet, Bunsen, and others, identify "Ur of the Chaldees" with a place of the name, mentioned by a single late writer—Ammianus Marcellinus—as "a castle" existing in his day in Eastern Mesopotamia, between Hatra and Nisibis. Of these four localities two are situated in Upper Mesopotamia, between the Mons Masius and the Sinjar range, while the other two are in the alluvial tract near the sea, at least 400 miles further south. That Chaldaea was, properly speaking, the southern part of Babylonia, the region bordering upon the Gulf, will be admitted by all. Those who maintain the northern emplacement of Ur argue, that with the extension of Chaldean power the name travelled northward, and became coextensive with Mesopotamia; but, in the first place, there is no proof that the name Chaldaea was ever extended to the region above the Sinjar; and secondly, if it was, the Jews at any rate mean by Chaldaea exclusively the lower country, and call the upper, Mesopotamia or Padan-Aram (see Job i. 17; Is. xii. 19, xiii. 14, &c.). Again there is no reason to believe that Babylonian power was established beyond the Sinjar in these early times. Moreover, it is in the lower country only that a name closely corresponding to the Hebrew *Ur* is found. The cuneiform *Hur* represents the *Ur* letter for letter, and only differs from it in the greater strength of the aspirate. The argument that Ur should be sought in the neighbourhood of Arrapachitis and Seruj, because the names Arphaxad and Serug occur in the genealogy of Abraham has no weight till it is shown that the human names in question are really connected with the places, which is at pre-

Ruins of Temple at Mugheir (Loftus).

sent assumed somewhat boldly. On the whole we may regard it as tolerably certain that "Ur of the Chaldees" was a place situated in the real Chaldaea—the low country near the Persian Gulf. The only question that remains in any degree doubtful is, whether Warka or Mugheir is the true locality. Traditions attached to both, but perhaps more distinctly to Warka. On the other hand, it seems certain that Warka, the native name of which was *Huruk*, represents the Erech of Genesis, which cannot possibly be the Ur of the same Book. Mugheir, therefore, which bore the exact name of 'Ur or *Hur*, remains with the best claim, and is entitled to be (at least provisionally) regarded as the city of Abraham. 'Ur or Hur, now *Mugheir*, or *Uin-Mugheir*, "the bitumen," or "the mother of bitumen," is one of the most ancient, if not the most ancient, of the Chaldaean sites hitherto discovered. It lies on the right bank of the Euphrates, at the distance of about six miles from the present course of the stream, nearly opposite the point where the Euphrates receives the *Shat-el-Hie* from the Tigris. It is now not less than 125 miles from the sea; but there are grounds for believing that it was anciently a maritime town. The most remarkable building is near the northern end of the ruins. It is a temple of the true Chaldaean type. The bricks of this building bear the name of a certain *Urulik*, who is regarded as the earliest of the Chaldaean monumental kings. His supposed date is B.C. 2000, or a little earlier. 'Ur was the capital of this monarch. It retained its metropolitan character for above two centuries, and even after it became second to Babylon, was a great city, with an especially sacred character. It is in the main a city of tombs.

Urbane. It would have been better if the word had been written URBAN in the Authorised Version. For unlearned readers sometimes mistake the sex of this Christian disciple, who is in the long list of

those whom St. Paul salutes in writing to Rome (Rom. xvi. 9). We have no means of knowing more about him.

U'ri. 1. The Father of Bezaleel one of the architects of the tabernacle (Ex. xxxi. 2, xxxv. 30, xxxviii. 22; 1 Chr. ii. 20; 2 Chr. i. 5). He was of the tribe of Judah, and grandson of Caleb ben-Hezron.—2. The father of Geber, Solomon's commissariat officer in Gilead (1 K. iv. 19).—3. One of the gatekeepers of the temple in the time of Ezra (Ezr. x. 24).

Uri'ah. 1. One of the thirty commanders of the thirty bands into which the Israelite army of David was divided (1 Chr. xi. 41; 2 Sam. xiii. 39). Like others of David's officers he was a foreigner—a Hittite. His name, however, and his manner of speech (2 Sam. xi. 11) indicate that he had adopted the Jewish religion. He married Bathsheba, a woman of extraordinary beauty, the daughter of Eliam—possibly the same as the son of Ahithophel, and one of his brother officers (2 Sam. xxiii. 34), and hence, perhaps, Uriah's first acquaintance with Bathsheba. It may be inferred from Nathan's parable (2 Sam. xii. 3) that he was passionately devoted to his wife, and that their union was celebrated in Jerusalem as one of peculiar tenderness. In the first war with Ammon he followed Joab to the siege, and with him remained encamped in the open field (2 Sam. xi. 11). He returned to Jerusalem, at an order from the king, on the pretext of asking news of the war,—really in the hope that his return to his wife might cover the shame of his own crime. The king met with an unexpected obstacle in the austere, soldier-like spirit which guided all Uriah's conduct, and which gives us a high notion of the character and discipline of David's officers. On the morning of the third day, David sent him back to the camp with a letter containing the command to Joab to cause his destruction in the battle. The device of Joab was, to observe the part of the wall of Rab-

bath-Ammon; where the greatest force of the besieged was congregated, and thither, as a kind of Jorlorn hope, to send Uriah. A sally took place. Uriah and the officers with him advanced as far as the gate of the city, and were there shot down by the archers on the wall. Just as Joab had forewarned the messenger, the king broke into a furious passion on hearing of the loss. The messenger, as instructed by Joab, calmly continued, and ended the story with the words: "Thy servant also, Uriah the Hittite, is dead." In a moment David's anger is appeased. It is one of the touching parts of the story that Uriah falls unconscious of his wife's dishonour.

—2. High-priest in the reign of Ahaz (Is. viii. 2; 2 K. xvi. 10-16). We first hear of him as a witness to Isaiah's prophecy concerning Maher-shalal-hash-baz, with Zechariah, the son of Jeberchiah. He is probably the same as Urijah the priest, who built the altar for Ahaz (2 K. xvi. 10). If this be so, the prophet may have summoned him as a witness on account of his position as high-priest, not on account of his personal qualities; though, as the incident occurred at the beginning of the reign of Ahaz, Uriah's irreligious subservience may not yet have manifested itself. Of the parentage of Uriah we know nothing. He probably succeeded Azariah, who was high-priest in the reign of Uzziah, and was succeeded by that Azariah who was high-priest in the reign of Hezekiah. Hence it is probable that he was son of the former and father of the latter.—3. A priest of the family of Hakkoz, the head of the seventh course of priests (Ezr. viii. 33; Neh. iii. 4, 21).

Urias. 1. URIAH, the husband of Bathsheba (Matt. i. 6).—2. URIAH, 3 (1 Esd. ix. 43).

Uriel, "the fire of God," an angel named only in 2 Esdr. iv. 1, 36, v. 20, x. 28.

Uriel. 1. A Kohathite Levite, son of Tahath. (1 Chr. vi. 24 [97]).—2. Chief of the Kohathites in the reign of David (1 Chr. xv. 5, 11).—3. Uriel of Gibeah was the father of Maachah, or Michaiah, the favourite wife of Rehoboam, and mother of Abijah (2 Chr. xiii. 2). In 2 Chr. xi. 20 she is called "Maachah the daughter of Absalom." Rashi gives a long note to the effect that her father's name was Uriel Abi-halom.

Urijah. 1. Urijah the priest in the reign of Ahaz (2 K. xvi. 10), probably the same as URIAH, 2.—2. A priest of the family of Koz, or hak-Koz, the same as URIAH, 3.—3. One of the priests who stood at Ezra's right-hand when he read the Law to the people (Neh. viii. 4).—4. The son of Shemaiah of Kirjath-jearim. He prophesied in the days of Jehoiakim and the king sought to put him to death; but he escaped, and fled into Egypt. His retreat was soon discovered: Elnathan and his men brought him up out of Egypt, and Jehoiakim slew him with the sword, and cast his body forth among the graves of the common people (Jer. xvi. 20-23).

Urim and Thummim. I. (1.) When the Jewish exiles were met on their return from Babylon by a question which they had no data for answering, they agreed to postpone the settlement of the difficulty till there should rise up "a Priest with Urim and Thummim" (Ezr. ii. 63; Neh. vii. 65). The inquiry, what those Urim and Thummim themselves were, seems likely to wait as long for a final and satisfying answer. On every side we meet with confessions of ignorance. (2.) The starting-point of such an inquiry must be from the words which the A. V. has left untranslated. (A.) In

Urim, Hebrew scholars, with hardly an exception, have seen the plural of *ur* (= light, or fire). The LXX. translators, however, appear to have had reasons which led them to another rendering. The literal English equivalent would of course be "lights;" but the renderings in the LXX. and Vulg. indicate, at least, a traditional belief among the Jews that the plural form did not involve numerical plurality. (B.) *Thummim*. Here also there is almost a consensus as to the derivation from *tōm* (= perfection, completeness). What has been said as to the plural of Urim applies here also. "Light and Perfection" would probably be the best English equivalent. The mere phrase, as such, leaves it therefore uncertain whether each word by itself denoted many things of a given kind, or whether the two taken together might be referred to two distinct objects, or to one and the same object. In Deut. xxxiii. 8, we have separately, "Thy Thummim and thy Urim," the first order being inverted. Urim is found alone in Num. xxvii. 21; 1 Sam. xxviii. 6; Thummim never by itself, unless we find it in Ps. xvi. 5.—II. (1.) *Scriptural Statements*.—The mysterious words meet us for the first time, as if they needed no explanation, in the description of the high-priest's apparel. Over the Epiton there is to be a "breastplate of judgment" of gold, sapphire, purple, and fine linen, folded square and doubled, a "span" in length and width. In it are to be set four rows of precious stones, each stone with the name of a tribe of Israel engraved on it, that Aaron may "bear them on his heart." Then comes a further order. Inside the breastplate, as the Tables of the Covenant were placed inside the Ark (Ex. xxv. 16, xxviii. 30), are to be placed "the Urim and the Thummim," the Light and the Perfection; and they, too, are to be on Aaron's heart, when he goes in before the Lord (Ex. xxviii. 15-30). Not a word describes them. They are mentioned as things already familiar both to Moses and the people, connected naturally with the functions of the high-priest, as mediating between Jehovah and His people. The command is fulfilled (Lev. viii. 8). They pass from Aaron to Eleazar with the sacred Ephod and other pontificalia (Num. xx. 28). They are mentioned again (Num. xxvii. 21; Deut. xxxiii. 8, 9). Once, and once only, are they mentioned by name in the history of the Judges and the monarchy (1 Sam. xxviii. 6). There is no longer a priest with Urim and Thummim (Ezr. ii. 63; Neh. vii. 65) to answer hard questions. (2.) Besides these direct statements, there are others in which we may, without violence, trace a reference, if not to both, at least to the Urim. When questions precisely of the nature of those described in Num. xxvii. 21 are asked by the leader of the people, and answered by Jehovah (Judg. i. 1, xx. 18)—when like questions are asked by Saul of the high-priest Ahiah, "wearing an ephod" (1 Sam. xiv. 3, 18)—by David, as soon as he has with him the presence of a high-priest with his ephod (1 Sam. xxii. 2, 12, xxx. 7, 8)—we may legitimately infer that the treasures which the ephod contained were the conditions and media of his answer. (3.) It deserves notice before we pass beyond the range of Scriptural data, that in some cases of defection from the established religious order, we find the ephod connected not with the Urim, but with the TERAPHIM, which in the days of Laban, if not earlier, had been conspicuous in Aramaic worship (Judg. xvii. 5,

xviii. 14, 20; Hos. iii. 4).—III. *Theories*.—Of the numerous theories that have been propounded upon the subject the favourite view of Jewish and of some Christian writers has been, that the Urim and Thummim were identical with the twelve stones on which the names of the Tribes of Israel were engraved, and the mode in which an oracle was given was by the illumination, simultaneous or successive, of the letters which were to make up the answer. But it seems to be far simplest and most in agreement with the different accounts of inquiries made by Urim and Thummim (1 Sam. xiv. 3, 18, 19; xxiii. 2, 4, 9, 11, 12, xxviii. 6; Judg. xx. 28; 2 Sam. 5, 23, &c.) to suppose that the answer was given simply by the Word of the Lord to the high-priest (comp. John xi. 51), when he had inquired of the Lord clothed with the ephod and breastplate. Such a view agrees with the true notion of the breastplate, of which it was not the leading characteristic to be oracular, but only an incidental privilege connected with its fundamental meaning. What that meaning was we learn from Ex. xxvii. 30, where we read "Aaron shall bear the judgment of the children of Israel upon his heart before the Lord continually." Now the judicial sentence is one by which any one is either justified or condemned. In prophetic vision, as in actual Oriental life, the sentence of justification was often expressed by the nature of the robe worn. "He hath clothed me with the garments of salvation, He hath covered me with the robe of righteousness, as a bridegroom decketh himself with ornaments, and as a bride adorneth herself with her jewels" (Is. lxi. 10), is a good illustration of this; cf. lxi. 3. In like manner, in Rev. iii. 5, vii. 9, xix. 14, &c., the white linen robe expresses the righteousness or justification of the saints.

Usury. Information on the subject of lending and borrowing will be found under LOAN. It need only be remarked here that the practice of mortgaging land, sometimes at exorbitant interest, grew up among the Jews during the Captivity, in direct violation of the law (Lev. xxv. 36, 37; Ez. xviii. 8, 13, 17). We find the rate reaching 1 in 100 per month, corresponding to the Roman *centesimae usurae*, or 12 per cent. per annum. The law of the Kurán, like the Jewish, forbids all usury. The laws of Menu allow 18 and even 24 per cent. as an interest rate; but, as was the law in Egypt, accumulated interest was not to exceed twice the original sum lent. This Jewish practice was annulled by Nehemiah.

U'ta, 1 Esdr. v. 30. It appears to be a corruption of AKKUB (Ezr. ii. 45).

Uthai. 1. The son of Ammihud, of the children of Pharez, the son of Judah (1 Chr. ix. 4).—2. One of the sons of Bigvai, who returned in the second caravan with Ezra (Ezr. viii. 14).

Uthii. 1 Esdr. viii. 40. [UTHAT 2.]

Uz. 1. A son of Aram (Gen. x. 23; 1 Chr. i. 17), and consequently a grandson of Shem.—2. A son of Nahor by Mithah (Gen. xxii. 21; A.V. HUZ).—3. A son of Dishan, and grandson of Seir (Gen. xxxvi. 28).—4. The country in which Job lived (Job i. 1).—As the genealogical statements of the Book of Genesis are undoubtedly ethnological, and in many instances also geographical, it may be fairly surmised that the coincidence of names in the above cases is not accidental, but points to a fusion of various branches of the Shemitic race in a

certain locality. This surmise is confirmed by the circumstance that other connecting links may be discovered between the same branches. The ethnological fact embodied in these coincidences of names appears to be as follows:—Certain branches of the Aramaic family, being both more ancient and occupying a more northerly position than the others, coalesced with branches of the later Abrahamids, holding a somewhat central position in Mesopotamia and Palestine, and again with branches of the still later Edomites of the south, after they had become a distinct race from the Abrahamids. This conclusion would receive confirmation if the geographical position of Uz, as described in the Book of Job, harmonised with the probability of such an amalgamation. As far as we can gather, it lay either east or south-east of Palestine (Job i. 3); adjacent to the Sabaeans and the Chaldaeans (Job i. 15, 17), consequently northward of the southern Arabians, and westward of the Euphrates; and, lastly, adjacent to the Edomites of Mount Seir, who at one period occupied Uz, probably as conquerors (Lam. iv. 21), and whose troglodyte habits are probably described in Job xxx. 6, 7. From the above data we infer that the land of Uz corresponds to the *Arabia Deserta* of classical geography, at all events to so much of it as lies north of the 30th parallel of latitude. Whether the name of Uz survived to classical times is uncertain: a tribe named Aesitae is mentioned by Ptolemy: this Bochart identifies with the Uz of Scripture.

Uzal. The father of Palal, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 25).

U'zal. The sixth son of Joktan (Gen. x. 27; 1 Chr. i. 21), whose settlements are clearly traced in the ancient name of San'a, the capital city of the Yemen, which was originally Awzál. It has disputed the right to be the chief city of the kingdom of Sheba from the earliest ages of which any traditions have come down to us. From its position in the centre of the best portion of that kingdom, it must always have been an important city, though probably of less importance than Seba itself. Niebuhr says that it is a walled town, situate in an elevated country, in lat. 15° 2', and with a stream (after heavy rains) running through it. It has a citadel on the site of a famous temple. The houses and palaces of San'a are finer than those of any other town of Arabia; and it possesses many mosques, public baths, and caravanserais. Uzal, or Awzál, is most probably the same as the Auzara, or Auzara of the classics. It is perhaps referred to by Ezek. (xxvii. 19), translated in the A.V. "Javan, going to and fro."

Uzza. 1. A Benjamite of the sons of Ehud (1 Chr. viii. 7).—2. Elsewhere called UZZAH (1 Chr. xiii. 7, 9, 10, 11).—3. The children of Uzza were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 49; Neh. vii. 51).—4. Properly "Uzzah." As the text now stands, Uzzah is a descendant of Merari (1 Chr. vi. 29 [14]); but there appears to be a gap in the verse. Perhaps he is the same as Zina, or Zizah, the son of Shimei (1 Chr. xxiii. 10, 11); for these names evidently denote the same person and, in Hebrew character, are not unlike Uzzah.

Us'za, the garden of. The spot in which Manasseh king of Judah, and his son Amon, were both buried (2 K. xxi. 18, 26). It was the garden attached to Manasseh's palace (ver. 18).

The fact of its mention shows that it was not where the usual sepulchres of the kings were. No clue, however, is afforded to its position. It is ingeniously suggested by Cornelius a Lapide, that the garden was so called from being on the spot at which Uzza died during the removal of the Ark from Kirjath-jearim to Jerusalem.

Uzzah. One of the sons of Abinadab, in whose house at Kirjath-jearim the ark rested for 20 years. Uzzah probably was the second, and Ahio the third. They both accompanied its removal, when David first undertook to carry it to Jerusalem. Ahio apparently went before the new cart (1 Chr. xiii. 7) on which it was placed, and Uzzah walked by the side. "At the threshing-floor of Nachon" (2 Sam. vi. 6), or Chidon (1 Chr. xiii. 9), perhaps tripping over the smooth rock, the oxen stumbled. Uzzah caught the ark to prevent its falling. He died immediately by its side. His death was so sudden and awful that, in the sacred language of the Old Testament, it is ascribed directly to the Divine anger. The error or sin is not explained.

Uzzan-She'rah. A town founded or rebuilt by Sherah, an Ephraimite woman, the daughter either of Ephraim himself or of Beriah. It is named only in 1 Chr. vii. 24, in connexion with the two Beth-horons. No trace of Uzzan-She'rah appears to have been yet discovered, unless it be in *Beit Sira*, which is shown in the maps of Van de Velde and Tobler as on the N. side of the *Wady Sulcinan*, about three miles S.W. of *Beitâr et-tahla*.

Uzzi. 1. Son of Bukki, and father of Zerariah, in the line of the high-priests (1 Chr. vi. 5, 51; Ezr. vii. 4). Though Uzzi was the lineal ancestor of Zadok, it does not appear that he was ever high-priest. He must have been contemporary with, but rather earlier than, Eli.—2. Son of Tola the son of Issachar (1 Chr. vii. 2, 3).—3. Son of Bela, of the tribe of Benjamin (1 Chr. vii. 7).—4. Another, or the same, from whom descended some Benjaminite houses, which were settled at Jerusalem after the return from captivity (1 Chr. ix. 8).—5. A Levite, son of Bani, and overseer of the Levites dwelling at Jerusalem, in the time of Nehemiah (Neh. xi. 22).—6. A priest, chief of the father's-house of Jedaiah, in the time of Joiakim the high-priest (Neh. xii. 19).—7. One of the priests who assisted Ezra in the dedication of the wall of Jerusalem (Neh. xii. 42). Perhaps the same as the preceding.

Uzzi'a. One of David's guard, and apparently a native of Ashtaroth beyond Jordan (1 Chr. xi. 44).

Uzziah. 1. Uzziah king of Judah. In some passages his name appears in the lengthened form Azariah, which Gesenius attributes to an error of the copyists. This is possible, but there are other instances of the princes of Judah changing their names on succeeding to the throne. After the murder of Amaziah, his son Uzziah was chosen by the people to occupy the vacant throne at the age of 16; and for the greater part of his long reign of 52 years he lived in the fear of God, and showed himself a wise, active, and pious ruler. He began his reign by a successful expedition against his father's enemies the Edomites, who had revolted from Judah in Jehoram's time, 80 years before, and penetrated as far as the head of the Gulf of Akaba, where he took the important place of Elath (2 K. xiv. 22 2 Chr. xxvi. 1, &c.). Uzziah

waged other victorious wars in the south, especially against the Mehunim, or people of Maan, and the Arabs of Gubbaal. Towards the west, Uzziah fought with equal success against the Philistines, levelled to the ground the walls of Gath, Jabneh, and Ashdod, and founded new fortified cities in the Philistine territory. He strengthened the walls of Jerusalem. He was also a great patron of agriculture. He never deserted the worship of the true God, and was much influenced by Zechariah, a prophet who is only mentioned in connexion with him (2 Chr. xxvi. 5). So the southern kingdom was raised to a condition of prosperity which it had not known since the death of Solomon. The end of Uzziah was less prosperous than his beginning. Elated with his splendid career, he determined to burn incense on the altar of God, but was opposed by the high-priest Azariah and eighty others. (See Ex. xxx. 7, 8; Num. xvi. 40, xviii. 7.) The king was enraged at their resistance, and, as he pressed forward with his censor, was suddenly smitten with leprosy. Uzziah was buried "with his fathers," yet apparently not actually in the royal sepulchres (2 Chr. xxvi. 23). During his reign an earthquake occurred, which, though not mentioned in the historical books, was apparently very serious in its consequences, for it is alluded to as a chronological epoch by Amos (i. 1), and mentioned in Zech. xiv. 5, as a convulsion from which the people "fled." Josephus connects it with Uzziah's sacrilegious attempt to offer incense, but this is very unlikely. It is to be observed, with reference to the general character of Uzziah's reign, that the writer of the second Book of Chronicles distinctly states that his lawless attempt to burn incense was the only exception to the excellence of his administration (2 Chr. xxvii. 2). His reign lasted from B.C. 808-9 to 756-7.—2. A Kohathite Levite, and ancestor of Samuel (1 Chr. vi. 24 [9]).—3. A priest of the sons of Harim, who had taken a foreign wife in the days of Ezra (Ezr. x. 21).—4. Father of Athaiiah, or Uthai (Neh. xi. 4).—5. Father of Jehonathan, one of David's overseers (1 Chr. xxvii. 25).

Uzzi'el. 1. Fourth son of Kohath, father of Mishael, Elzaphan or Elizaphan, and Zithri, and uncle to Aaron (Ex. vi. 18, 22; Lev. x. 4).—2. A Simeonite captain, son of Ishi, in the days of Hezekiah (1 Chr. iv. 42).—3. Head of a Benjaminite house, of the sons of Bela (1 Chr. vii. 7).—4. A musician, of the sons of Heman, in David's reign (1 Chr. xxv. 4).—5. A Levite, of the sons of Jeduthun, in the days of Hezekiah (2 Chr. xxix. 14, 19).—6. Son of Harhuiah, probably a priest, in the days of Nehemiah, who took part in repairing the wall (Neh. iii. 8). He is described as "of the goldsmiths," i.e. of those priests whose hereditary office it was to repair or make the sacred vessels.

Uzzielites, the. The descendants of Uzziel, and one of the four great families of the Kohathites (Num. iii. 27; 1 Chr. xxvi. 23).

Vajezza'tha. One of the ten sons of Haman whom the Jews slew in Shushan (Esth. ix. 9).

Vale, Valley. It is hardly necessary to state that these words signify a hollow sweep of ground between two more or less parallel ridges of high land. Vale is the poetical or provincial form. The

structure of the greater part of the Holy Land does not lend itself to the formation of valleys in our sense of the word. The abrupt transitions of its crowded rocky hills preclude the existence of any extended sweep of valley. "The nearest approach is found in the space between the mountains of Gerizim and Ebal, which contains the town of *Nablás*, the ancient *Shechem*. This, however, is not mentioned in the Bible. Another is the "Valley of Jezreel." Valley is employed in the Authorised Version to render five distinct Hebrew words. 1. *'Emek*. This appears to approach more nearly to the general sense of the English word than any other. It is connected with several places; but the only one which can be identified with any certainty is the *Emek* of Jezreel, already mentioned as one of the nearest approaches to an English valley. 2. *Ga' or Gé*. Of this natural feature there is fortunately one example remaining which can be identified with certainty—the deep hollow which encompasses the S.W. and S. of Jerusalem, and which is without doubt identical with the *Ge-hinnom* or *Ge-ben-hinnom* of the O. T. This identification appears to establish the *Ge* as a deep and abrupt ravine, with steep sides and narrow bottom. 3. *Nachal*. This is the word which exactly answers to the Arabic *wady*, and has been already alluded to in that connexion. It expresses, as no single English word can, the bed of a stream (often wide and shelving, and like a "valley" in character, which in the rainy season may be nearly filled by a foaming torrent, though for the greater part of the year dry), and the stream itself, which after the subsidence of the rains has shrunk to insignificant dimensions. 4. *Bik'ah*. This term appears to mean rather a plain than a valley, wider than the latter, though so far resembling it as to be enclosed by mountains. It is rendered by "valley" in Deut. xxxiv. 3; Josh. xi. 8, 17, xii. 7; 2 Chr. xxxv. 22; Zech. xii. 11. 5. *has-Shefêlâh*. This is the only case in which the employment of the term "valley" is really unfortunate.¹⁸ The district to which alone the name *has-Shefêlâh* is applied in the Bible has no resemblance whatever to a valley, but is a broad swelling tract of many hundred miles in area, which sweeps gently down from the mountains of Judah to the Mediterranean. It is rendered "the vale" in Deut. i. 7; Josh. x. 40; 1 K. x. 27; 2 Chr. i. 15; Jer. xxxiii. 13; and "the valley" or "valleys" in Josh. ix. 1, xi. 2, 16, xii. 8, xv. 33; Judg. i. 9; Jer. xxvii. 44.

Vani'ah. One of the sons of Bani (Ezr. x. 36).

Vashni. The firstborn of Samuel as the text now stands (1 Chr. vi. 28 [13]). But in 1 Sam. viii. 2 the name of his firstborn is Joel. Most probably in the Chronicles the name of Joel has dropped out, and "Vashni" is a corruption of *veshênî*, "and (the) second."

Vash'ti. The "queen" of Ahasuerus, who, for refusing to show herself to the king's guests at the royal banquet, when sent for by the king, was repudiated and deposed (Esth. i.). Many attempts have been made to identify her with historical personages; as by Ussher with Atossa, the wife of Darius Hystaspis, and by J. Capellus with Parysatis, the mother of Xerxes; but it is far more probable that she was only one of the inferior wives, dignified with the title of queen, whose name has utterly disappeared from history.

Veil Under the head of DRESS we have already disposed of various terms improperly rendered

VERSIONS, ANCIENT (ÆTHIOPIO)

"veil" in the A. V., such as *mîtpachash* (Ruth ii. 15), *tsâipli* (Gen. xxiv. 65, xxxviii. 14, 19), and *rdûit* (Cant. v. 7; Is. iii. 23). These have been explained to be rather shawls, or mantles, which might at pleasure be drawn over the face, but which were not designed for the special purpose of veils. It remains for us to notice the following terms which describe the veil proper:—(1.) *Musveh*, used of the veil which Moses assumed when he came down from the mount (Ex. xxxiv. 33-35). (2.) *Mispâchôth*, used of the veils which the false prophets placed upon their heads (Ezek. xiii. 18, 21; A. V. "kerchiefs"). The word is understood by Gesenius of cushions or mattresses, but the etymology is equally, if not more, favourable to the sense of a flowing veil. (3.) *Rê'âbth*, used of the light veils worn by females (Is. iii. 19; A. V. "mufflers"), which were so called from their rustling motion. (4.) *Tsamâmâh*, understood by the A. V. of "locks" of hair (Cant. iv. 1, 3, vi. 7; Is. xlvii. 2); but the contents of the passages in which it is used favour the sense of veil. With regard to the use of the veil, it is important to observe that it was by no means so general in ancient as in modern times. Much of the scrupulousness in respect of the use of the veil dates from the promulgation of the Koran, which forbade women appearing unveiled except in the presence of their nearest relatives. In ancient times, the veil was adopted only in exceptional cases, either as an article of ornamental dress (Cant. iv. 1, 3, vi. 7), or by betrothed maidens in the presence of their future husbands, especially at the time of the wedding (Gen. xxiv. 65, xxix. 25), or, lastly, by women of loose character for purposes of concealment (Gen. xxxviii. 14). Among the Jews of the New Testament age it appears to have been customary for the women to cover their heads (not necessarily their faces) when engaged in public worship.

Veil of the Tabernacle and Temple. [TABERNACLE; TEMPLE.]

Versions, Ancient, of the Old and New Testaments. In treating of the ancient versions that have come down to us, in whole or in part, they will be described in the alphabetical order of the languages. It may be premised that in most of them the Old Test. is not a version from the Hebrew, but merely a secondary translation from the Septuagint in some one of its early forms.

ÆTHIOPIO VERSION.—Christianity was introduced into Æthiopia in the 4th century, through the labours of Frumentius and Aedesius of Tyre, who had been made slaves and sent to the king. Hence arose the episcopal see of Axum, to which Frumentius was appointed by Athanasius. The Æthiopic version which we possess is in the ancient dialect of Axum; hence some have ascribed it to the age of the earliest missionaries; but from the general character of the version itself, this is improbable; and the Abyssinians themselves attribute it to a later period. The Old Testament, as well as the New, was executed from the Greek. In 1513 Potken published the Æthiopic Psalter at Rome. In 1548-9, the Æthiopic New Test. was also printed at Rome, edited by three Abyssinians. The Roman edition was reprinted in Walton's Polyglott; but (according to Ludolf) all the former errors were retained, and new ones introduced. In 1826-30, a new edition, formed by a collation of MSS., was published under the care of Mr. Thomas Pell Platt (formerly Fellow of Trinity College, Cambridge),

whose object was not strictly *critical*, but rather to give to the Abyssinians their Scriptures for ecclesiastical use in as good a form as he conveniently could, consistently with MS. authority. From the notes made by Mr. Platt in the course of his collations, it is evident that the translation had been variously revised. The probability appears to be that there was originally one version of the Gospel, but that this was afterwards revised with Greek MSS. of a different complexion of text; and that succeeding copyists either adopted one or the other form in passages: or else, by omitting nothing from text or margin, they formed a confused combination of readings. It appears probable that all the portion of the New Test. after the Gospels originated from some of the later revisers of the former part; its paraphrastic tone accords with this opinion. An examination of the version proves both that it was executed from the Greek, and also that the translator made such mistakes that he could hardly have been a person to whom Greek was the native tongue. Bode's Latin version enabled critical scholars to use the Roman text with much confidence. The Old Test. of this version, made from the LXX., has been subjected apparently (with the exception of the Psalms) to very little critical examination. A complete edition of the Aethiopic Old Test. has been commenced by Dillmann; the first portion of which appeared in 1853.

ARABIC VERSIONS.—(I.) *Arabic versions of the Old Test.* (A.) Made from the Hebrew text. Rabbi Saadiah Haggai, the Hebrew commentator of the 10th century, translated portions (some think the whole) of the O. T. into Arabic. His version of the Pentateuch was printed at Constantinople, in 1546. The Paris Polyglott contains the same version from a MS. differing in many of its readings: this was republished by Walton. It seems as if copyists had in parts altered the version considerably. The version of Isaiah by Saadiah was printed by Paulus, at Jena, in 1791, from a Bodleian MS.; the same library contains a MS. of his version of Job and of the Psalms. Kimchi quotes his version of Hosea. The Book of Joshua in the Paris and Walton's Polyglotts is also from the Hebrew; and this Rödgiger states to be the fact in the case of the Polyglott text of 1 K. xii. 16; 2 K. xii. 16; and of Neh. i.-ix. 27. Other portions, translated from Hebrew in later times, do not require to be even specified here. (B.) Made from the Peshito Syriac. This is the base of the Arabic text contained in the Polyglotts of the Books of Judges, Ruth, Samuel, Kings, and Nehemiah. (C.) Made from the LXX. The version in the Polyglotts of the books not specified above. Another text of the Psalter in Justinian's *Psalterium Octuplum*, Genoa, 1516.—(II.) *Arabic versions of the New Test.*—1. The Roman editio princeps of the four Gospels, 1590-91. 2. The Erpenian Arabic. The whole New Test. edited by Erpenius, 1616, at Leyden, from a MS. of the 13th or 14th century. 3. The Arabic of the Paris Polyglott, 1645. In the Gospel this follows mostly the Roman text; in the Epistles a MS. from Aleppo was used. The Arabic in Walton's Polyglott appears to be simply taken from the Paris text. 4. The *Carshuni* Arabic text (i. e. in Syriac letters), the Syriac and Arabic New Test., published at Rome, in 1703. For this a MS. brought from Cyprus was used. Juynebol, in his description of an Arabic Codex at Franeker (1838), threw new light on the origin of the Arabic Gospels. He

proves that the Franeker Codex coincides in its general text with the Roman editio princeps, and that both follow the Latin Vulgate. The greater agreement of the Polyglott text with the Greek he ascribes to the influence of an Aleppo MS., which the Paris editor used. Juynebol then identifies the text of the Franeker MS. (and of the Roman edition) with the version made in the 8th century by John, Bishop of Seville. In the Erpenian Arabic the latter part is a translation from the Peshito-Syriac; the Epistles not found in that version and the Apocalypse are said to be from the Memphitic. The latter part of the text in the Polyglotts is from the Greek.

ARMENIAN VERSION.—Before the 5th century the Armenians are said to have used the Syriac alphabet; but at that time Miesrob is stated to have invented the Armenian letters. Soon after this it is said that translations into the Armenian language commenced, at first from the Syriac. Miesrob, with his companions, Joseph and Eznak, began a version of the Scriptures with the Book of Proverbs, and completed all the Old Test.; and in the New, they used the Syriac as their basis, from their inability to obtain any Greek books. But when, in the year 431, Joseph and Eznak returned from the council of Ephesus, bringing with them a Greek copy of the Scriptures, Isaac, the Armenian Patriarch, and Miesrob, threw aside what they had already done, in order that they might execute a version from the Greek. But now arose the difficulty of their want of a competent acquaintance with that language: to remedy this, Eznak and Joseph were sent with Moses Chorenensis (who is himself the narrator of these details) to study that language at Alexandria. There they made what Moses calls their *third* translation. The first printed edition of the Old and New Testaments in Armenian appeared at Amsterdam in 1666, under the care of a person commonly termed *Osman*, or *Uscan*, and described as being an Armenian bishop, Zohrab, in 1789, published at Venice an improved text of the Armenian New Test.; and in 1805 he and his coadjutors completed an edition of the entire Armenian Scriptures. The basis was a MS. written in the 14th century. Dr. Charles Rieu of the British Museum undertook the task of collating the Venice text of 1805 for Tregelles, thus supplying him with a valuable portion of the materials for his critical edition of the Greek Testament. Some have spoken of this version as though it had been made from the Peshito Syriac, and not from the Greek; the only grounds for such a notion can be the facts connected with part of the history of its execution.

CHALDEE VERSIONS. [TARGUMS.]

EGYPTIAN VERSIONS.—I. **THE MEMPHITIC VERSION.**—The version thus designated was for a considerable time the only Egyptian translation known to scholars; *Coptic* was then regarded as a sufficiently accurate and definite appellation. But when the fact was established that there were at least two Egyptian versions, the name *Coptic* was found to be indefinite, and even unsuitable for the translation then so termed: for in the dialect of Upper Egypt there was another; and it is from the ancient *Coptos* in Upper Egypt that the term *Coptic* is taken. Thus *Copto-Memphitic*, or more simply *Memphitic*, the better name for the version in the dialect of Lower Egypt. When Egyptian translations were made we do not know; probably before the middle of the 4th century. When the attention

of European scholars was directed to the language and paces of modern Egypt, it was found that while the native Christians use only Arabic vernacularly, yet in their services and in their public reading of the Scriptures they employ a dialect of the Coptic. This is the version now termed Memphitic. Wilkins in 1716 published at Oxford the first Memphitic New Test., founded on MSS. in the Bodleian, and compared with some at Rome and Paris. In 1846-8 Schwartze published at Berlin an edition of the Memphitic Gospels, in which he employed MSS. in the Royal Library there. The death of Schwartze prevented the continuation of his labours. Since then Boetticher's editions, first of the Acts and then of the Epistles, have appeared. In 1848-52 a magnificent edition of the Memphitic New Test. was published by the Society for Promoting Christian Knowledge, under the editorial care of the Rev. R. T. Lieder of Cairo. The Old Testament of this version was made from the LXX.—II. THE THEBAIC VERSION.—The examination of Egyptian MSS. in the last century showed that besides the Memphitic there is also another version in a cognate Egyptian dialect. To this the name *Sauidic* was applied by some, from an Arabic designation for Upper Egypt and its ancient language. It is, however, far better to assign to this version a name not derived from the language of the Arabian occupants of that land; thus Copto-Thebaic (as styled by Giorgi), or simply Thebaic, is far preferable. In 1785 Mingarelli published a few portions of this version of the New Test. from the Nalian MSS. In 1789 Giorgi edited very valuable Greek and Thebaic fragments of St. John's Gospel, which appear to belong to the fifth century. Münster, in 1787, had published a fragment of Daniel in this version; and in 1789 he brought out portions of the Epistles to Timothy, together with readings which he had collected from MSS. in other parts of the New Test. In the following year Mingarelli printed Mark 29-xv. 2, from MSS. A few copies only seem to have been circulated. Woide's death took place before his edition was completed. In 1799, however, it appeared under the editorial care of Ford.—III. A THIRD EGYPTIAN VERSION.—Some Egyptian fragments were noticed by both Münster and Giorgi amongst the Borgian MSS., which in dialect differ both from the Memphitic and Thebaic. These fragments, of a third Egyptian translation, were edited by both these scholars independently in the same year (1789). In what part of Egypt this third dialect was used, and what should be its distinctive name, has been a good deal discussed. Arabian writers mention a third Egyptian dialect under the name of *Bashmuric*, and this has by some been assumed as the appellation for this version. Giorgi supposed that this was the dialect of the Ammonian Oasis; in this Münster agreed with him; and thus they called the version the *Ammonian*. *The Character and critical use of the Egyptian Versions.*—It appears that the Thebaic version may reasonably claim a higher antiquity than the Memphitic. The two translations are independent of each other, and both spring from Greek copies. The Thebaic has been considered to be the older of the two. The probable conclusions seem to be these:—that the Thebaic version was made in the early part of the third century, for the use of the common people among the Christians in Upper Egypt; that it was formed from MSS. such as were then current in the regions of Egypt

which were distant from Alexandria; that afterwards the Memphitic version was executed in what was the more polished dialect, from the Greek copies of Alexandria; and that thus in process of time the Memphitic remained alone in ecclesiastical use. A few remarks only need be made respecting the third Egyptian version. The fragments of this follow the Thebaic so closely as to have no independent character. This version does however possess critical value, as furnishing evidence in a small portion not known in the Thebaic.

GOTHIC VERSION.—In the year 318 the Gothic bishop and translator of Scripture, Ulphilas, was born. He succeeded Theophilus as bishop of the Goths in 348, when he subscribed a confession rejecting the orthodox creed of Nicaea; through him it is said that the Goths in general adopted Arianism. The great work of Ulphilas was his version of the Scriptures. In 388 he visited Constantinople to defend his heterodox creed, and while there he died. In the latter part of the 16th century the existence of a MS. of this version was known, through Morillon having mentioned that he had observed one in the library of the monastery of Werden on the Ruhr in Westphalia. In 1648, almost at the conclusion of the Thirty Years' War, amongst the spoils from Prague was sent to Stockholm a copy of the Gothic Gospels, known as the *Codes Argenteus*. This MS. is generally supposed to be the same that Morillon had seen at Werden. On the abdication of Queen Christina of Sweden, a few years later, it disappeared. In 1655 it was in the possession of Isaac Vossius in Holland. In 1662 it was repurchased for Sweden by Count Magnus Gabriel de la Gardie, who placed it in the library of the University of Upsal. While the book was in the hands of Vossius a transcript was made of its text, from which Junius, his uncle, edited the first edition of the Gothic Gospels at Dec. in 1665. The MS. is written on vellum that was once purple, in silver letters, except those at the beginning of sections, which are golden. The Gospels have many lacunae: it is calculated that when entire it consisted of 320 folios; there are now but 188. It is pretty certain that this beautiful and elaborate MS. must have been written in the 6th century, probably in Upper Italy when under the Gothic sovereignty. Knittel, in 1762, edited from a Wolfenbüttel palimpsest some portions of the Epistle to the Romans in Gothic, in which the Latin stood by the side of the version of Ulphilas. New light dawned on Ulphilas and his version in 1817. While the late Cardinal Mai was engaged in the examination of palimpsests in the Ambrosian Library at Milan, of which he was at that time a librarian, he noticed traces of some Gothic writing under that of one of the codices. This was found to be part of the Books of Ezra and Nehemiah. In making further examination, four other palimpsests were found which contained portions of the Gothic Version. Mai deciphered these MSS. in conjunction with Count Carlo Ottavio Castiglione, and their labours resulted in the recovery, besides a few portions of the Old Test., of almost the whole of the thirteen Epistles of St. Paul and some parts of the Gospels. The edition of Gabelentz and Loebe (1836-45) contains all that has been discovered of the Gothic Version, with a Latin translation, notes, and a Gothic Dictionary and Grammar. In 1854 Upstörn published an excellent edition of the text of the *Codes Argenteus*, with a beautiful fac-simile. In 1855-6 Maassmann

issued an excellent small edition of all the Gothic portions of the Scriptures known to be extant. This edition is said to be more correct than that of Gabelentz and Loebe. As an ancient monument of the Gothic language the version of Ulfilas possesses great interest; as a version the use of which was once extended widely through Europe, it is a monument of the Christianization of the Goths; and as a version known to have been made in the 4th century, and transmitted to us in ancient MSS., it has its value in textual criticism. In certain passages it has been thought that there is some proof of the influence of the Latin; but its Greek origin is not to be mistaken. The Greek from which the version was made must in many respects have been what has been termed the transition text of the 4th century.

GREEK VERSIONS OF THE OLD TESTAMENT.—1. SEPTUAGINT. [See SEPTUAGINT.]

2. AQUILA.—It is a remarkable fact that in the second century there were three versions executed of the Old Testament Scriptures into Greek. The first of these was made by Aquila, a native of Sinope in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud describes him as a disciple of Rabbi Akiba; and this would place him in some part of the reign of the Emperor Hadrian (A.D. 117-138). It is supposed that his object was to aid the Jews in their controversies with the Christians. This is a probable account of the origin of his version. Extreme literality and an occasional polemical bias appear to be its chief characteristics. It is mentioned that Aquila put forth a second edition (*i.e.* revision) of his version, in which the Hebrew was yet more servilely followed, but it is not known if this extended to the whole, or only to three books, namely, Jeremiah, Ezekiel, and Daniel, of which there are fragments.

3. THEODOCOT.—The second version, of which we have information as executed in the second century, is that of Theodocot. He is stated to have been an Ephesian, and he seems to be most generally described as an Ebionite: if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the LXX. with the Christians, or that of Aquila with the Jews. But it may be doubted if the name of *translation* can be rightly applied to the work of Theodocot: it is rather a revision of the LXX. with the Hebrew text, so as to bring some of the copies then in use into more conformity with the original. The statement of Epiphanius that he made his translation in the reign of Commodus accords well with its having been quoted by Irenaeus; but it cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the New Test. In most editions of the LXX. Theodocot's version of Daniel is still substituted for that which really belongs to that translation. **4. SYMMACHUS** is stated by Eusebius and Jerome to have been an Ebionite: so too in the Syrian accounts given by Assemani; Epiphanius, however, and others style him a Samaritan. It may be that as a Samaritan he made this version for some of that people who employed Greek, and who had learned to receive more than the Pentateuch. Epiphanius says that he lived under the Emperor Severus. The translation which he produced was probably better than the others as to sense and general phraseology. **5. THE FIFTH,**

SIXTH, AND SEVENTH VERSIONS.—Besides the translations of Aquila, Symmachus, and Theodocot, the great critical work of Origen comprised as to portions of the Old Test. three other versions, placed for comparison with the LXX.; which, from their being anonymous, are only known as the fifth, sixth, and seventh; designations taken from the places which they respectively occupied in Origen's columnar arrangement. Eusebius says that two of these versions were found, the one at Jericho, and the other at Nicopolis on the gulf of Actium. Epiphanius says, that the fifth was found at Jericho, and the sixth at Nicopolis; while Jerome speaks of the fifth as having been found at the latter place. The contents of the *fifth version* appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets. The existing fragments prove that the translator used the Hebrew original; but it is also certain that he was aided by the work of former translators. The *sixth version* seems to have been just the same in its contents as the fifth (except 2 Kings). Jerome calls the authors of the fifth and sixth "*Judaicos translatores*;" but the translator of this must have been a Christian when he executed his work, or else the hand of a Christian reviser must have meddled with it before it was employed by Origen. Of the *seventh version* very few fragments remain. It seems to have contained the Psalms and minor prophets; and the translator was probably a Jew. The existing fragments of these varied versions are mostly to be found in the editions of the relics of Origen's Hexapla, by Montfaucon and by Barthe. **6. THE VENETO-GREEK VERSION.**—A MS. of the 14th century, in the library of St. Mark at Venice, contains a peculiar version of the Pentateuch, Proverbs, Ecclesiastes, Canticles, Ruth, Lamentations, and Daniel. All of these books, except the Pentateuch, were published by Villoison at Strasburg in 1784; the Pentateuch was edited by Animon at Erlangen in 1790-91. It may be said briefly that the translation was made from the Hebrew, although the present punctuation and accentuation is often not followed, and the translator was no doubt acquainted with some other Greek versions.

LATIN VERSIONS. [VULGATE.]

SAMARITAN VERSIONS. [SAMARITAN PENTATEUCH.]

SLAVONIC VERSION. In the year 862 there was a desire expressed, or an inquiry made, for Christian teachers in Moravia, and in the following year the labours of missionaries began amongst them. These missionaries were Cyrilus and Methodius, two brothers from Thessalonica: to Cyrilus is ascribed the invention of the Slavonian alphabet, and the commencement of the translation of the Scriptures. He appears to have died at Rome in 868, while Methodius continued for many years to be the bishop of the Slavonians. He is stated to have continued his brother's translation, although how much they themselves actually executed is quite uncertain. The Old Testament is, as might be supposed, a version from the LXX., but what measure of revision it may since have received seems to be by no means certain. As the oldest known MS. of the whole Bible is of the year 1499, it may reasonably be questioned whether this version may not in large portions be comparatively modern. The oldest MS. of any part of this version is an Evangelium, in Cyrillic characters, of the year 1056. The first printed portion is an edition of

the Gospels in Wallachia, in 1512; in 1575 the same portion was printed at Wilna; and in 1581 the whole Bible was printed at Ostrog in Volhynia. The general text is such as would have been expected in the ninth century: some readings from the Latin have, it appears, been introduced in places.

SYRIAC VERSIONS.—I. OF THE OLD TESTAMENT. A. *From the Hebrew.*—In the early times of Syrian Christianity there was executed a version of the Old Testament from the original Hebrew, the use of which must have been as widely extended as was the Christian profession amongst that people. Ephraem the Syrian, in the latter half of the 4th century, gives abundant proof of its use in general by his countrymen. When he calls it *OUR VERSION*, it does not appear to be in opposition to any other Syriac translation, but in contrast to the original Hebrew text, or to those in other languages. At a later period this Syriac translation was designated *Peshito* (*Simple*). It is probable that this name was applied to the version after another had been formed from the Hexaplar Greek text. This translation from the Hebrew has always been the ecclesiastical version of the Syrians. Its existence and use prior to the divisions of the Syrian Churches is sufficiently proved by Ephraem alone. It is highly improbable that any part of the Syriac version is older than the advent of our Lord; those who placed it under Abgarus, king of Edessa, seem to have argued on the account that the Syrian people then received Christianity. All that the account shows clearly is, that it was believed to belong to the earliest period of the Christian faith among them. Ephraem, in the 4th century, not only shows that it was then current, but also gives the impression that this had even then been *long* the case. For in his commentaries he gives explanations of terms which were even then obscure. This might have been from age: if so, the version was made comparatively long before his days; or it might be from its having been in a dialect different from that to which he was accustomed at Edessa. In this case, then, the translation was made in some other part of Syria. Probably the origin of the Old Syriac version is to be compared with that of the Old Latin; and that it differed as much from the polished language of Edessa as did the Old Latin, made in the African Province, from the contemporary writers of Rome. The Old Syriac has the peculiar value of being the first version from the Hebrew original made for Christian use. The proof that this version was made from the Hebrew is twofold: we have the direct statements of Ephraem, and we find the same thing as evident from the internal examination of the version itself. The first printed edition of this version was that which appeared in the Paris Polyglott of Le Jay in 1645; it is said that the editor, Gabriel Sionita, a Maronite, had only an imperfect MS.⁶ In Walton's Polyglott, 1657, the Paris text is reprinted, but with the addition of the Apocryphal books which had been wanting. In the punctuation given in the Polyglotts, a system was introduced which was in part a peculiarity of Gabriel Sionita himself. Dr. Lee collated for the text which he edited for the Bible Society six Syriac MSS. of the Old Test. in general, and a very ancient copy of the Pentateuch: he also used in part the commentaries of Ephraem and of Bar-Hebraeus. From these various sources he constructed his text, with the aid of that found

already in the Polyglotts. But we have now in this country, in the MS. treasures brought from the Nitrian valleys, the means of far more accurately editing this version. It has been much discussed whether this translation were a Jewish or a Christian work. There need be no reasonable objection made to the opinion that it is a Christian work. It may be said that the Syriac in general supports the Hebrew text that we have. A resemblance has been pointed out between the Syriac and the reading of some of the Chaldee Targums: if the Targum is the older, it is not unlikely that the Syriac translator examined the Targums in difficult passages. If existing Targums are more recent than the Syriac, it may happen that their coincidences arise from the use of a common source—an earlier Targum. But there is another point of inquiry of more importance: it is, how far has this version been affected by the LXX. and to what are we to attribute this influence? It is possible that the influence of the LXX. is partly to be ascribed to copyists and revisers; while in part this belonged to the version as originally made. When the extensive use of the LXX. is remembered, and how soon it was superstitiously imagined to have been made by direct inspiration, so that it was deemed canonically authoritative, we cannot feel wonder that readings from the LXX. should have been from time to time introduced. Some comparison with the Greek is probable even before the time of Ephraem; for, as to the Apocryphal books, while he cites some of them (though not as Scripture), the Apocryphal additions to Daniel and the Books of Maccabees were not yet found in Syriac. Whoever translated any of these books from the Greek, may easily have also compared with it in some places *books* previously translated from the Hebrew. In the Book of Psalms this version exhibits many peculiarities. Either the translation of the Psalter must be a work independent of the Peshito in general, or else it has been strangely revised and altered, not only from the Greek, but also from liturgical use. It is stated that, after the divisions of the Syrian Church, there were revisions of this one version by the Monophysites and by the Nestorians. The *Karkaphensian* recension mentioned by Bar-Hebraeus was only known by name prior to the investigations of Wiseman. It is found in two MSS. in the Vatican, and was formed for the use of Monophysites. B. *The Syriac version from the Hexaplar Greek Text.*—The only Syriac version of the Old Test. up to the 6th century was apparently the Peshito. Moses Aglaenus, who lived in the middle of the 6th century, speaks of the versions of the New Test. and the *Psalter*, "which Polycarp (rest his soul!), the Chorepiscopus, made in Syriac for the faithful Xenais, the teacher of Mabug, worthy of the memory of the good." It is said that the Nestorian patriarch, Marabba, A.D. 552, made a version from the Greek. The version by Paul of Tela, a Monophysite, was made in the beginning of the 7th century; for its basis he used the Hexaplar Greek text—that is, the LXX., with the corrections of Origen, the asterisks, obeli, &c., and with the references to the other Greek versions. The Syro-Hexaplar version was made on the principle of following the Greek, word for word, as exactly as possible. It contains the marks introduced by Origen; and the references to the versions of Aquila, Symmachus Theodotion, &c. In fact, it is from this Syriac

version that we obtain our most accurate acquaintance with the results of the critical labours of Origen. It is from a MS. in the Ambrosian Library at Milan that we possess accurate means of knowing this Syriac version. The MS. in question contains the Psalms, Job, Proverbs, Ecclesiastes, Canticles, Wisdom, Ecclesiasticus, minor prophets, Jeremiah, Baruch, Daniel, Ezekiel, and Isaiah. Norberg published, at Lund in 1787, the Books of Jeremiah and Ezekiel, from a transcript which he had made of the MS. at Milan. In 1788 Bugati published at Milan the Book of Daniel; he also edited the Psalms the printing of which had been completed before his death in 1816; it was published in 1820. The rest of the contents of the Milan Codex (with the exception of the Apocryphal books) was published at Berlin in 1835, by Middeldorpf, from the transcript made by Norberg; Middeldorpf also added the 4th (2nd) Book of Kings from a MS. at Paris. Besides these portions of this Syriac version, the MSS. from the Nitrian monasteries now in the British Museum would add a good deal more: amongst these there are six, from which much might be drawn, so that part of the Pentateuch and other books may be recovered. To enumerate the supposed versions is needless. It is only requisite to mention that Thomas of Harkeel seems to have made a translation from the Greek into Syriac of some of the Apocryphal books—at least, the subscriptions in certain MSS. state this.—

II. THE SYRIAC NEW TESTAMENT VERSIONS.—A. *The Peshito Syriac N. T.* It may stand as an admitted fact that a version of the New Test. in Syriac existed in the 2nd century; and to this we may refer the statement of Eusebius respecting Hegesippus, that he “made quotations from the Gospel according to the Hebrews and the Syriac.” It seems equally certain that in the 4th century such a version was as well known of the New Test. as of the Old. To the translation in common use amongst the Syrians, orthodox, Monophysite, or Nestorian, from the 5th century and onward, the name of Peshito has been as commonly applied in the New Test. as the Old. There seem to be but few notices of the old Syriac Version in early writers. Cosmas Indicopleustes, in the former half of the 6th century, incidentally informs us that the Syriac translation does not contain the Second Epistle of Peter, 2 and 3 John, and Jude. In 1552 Moses of Mardin came to Rome to Pope Julius III., commissioned by Ignatius the Jacobite (Monophysite) patriarch, to state his religious opinions, to effect (it is said) a union with the Romish Church, and to get the Syriac New Test. printed. In this last object he failed both at Rome and Venice. At Vienna he was, however, successful. Widmanstadt, the chancellor of the Emperor Ferdinand I., had himself learned Syriac from Theodosius Ambrosius many years previously; and through his influence the emperor undertook the charge of an edition, which appeared in 1555, through the joint labours of Widmanstadt, Moses, and Postell. Having only three Catholic epistles, this Syriac New Test. agreed with the description of Cosmas; the Apocalypse was also wanting, as well as the section John viii. 1-11. One of the principal editions is that of Leusden and Schaaf. The Lexicon which accompanies this edition is of great value. The late Professor Lee published an edition in 1816 in which he corrected or altered the text on the authority of a few MSS. In 1826 the edition of Mr. William Greenfield was

published by Messrs. Bagster. This Syriac Version has been variously estimated: some have thought that in it they had a genuine and unaltered monument of the second, or perhaps even of the first century. Others finding in it indubitable marks of a later age, were inclined to deny that it had any claim to a very remote antiquity. The fact is, that this version as transmitted to us contains marks of antiquity, and also traces of a later age. The two things are so blended, that if either class of phenomena alone were regarded, the most opposite opinions might be formed. The judgment formed by Griesbach seems to be certainly the correct one as to the peculiarity of the text of this version: he says (using the terms proper to his system of recensions); “Nulli harum recensionum Syriaca versio, prout quidem typis excusa est, similis, verum nec ulli prorsus dissimilis est. In multis concinit cum Alexandrina recensione, in pluribus cum Occidentali, in nonnullis etiam cum Constantinopolitana, ita tamen ut quae in hanc posterioribus demum seculis invecta sunt, pleraque repudiet. Diversis ergo temporibus ad Graecos codices plume diversos iterum iterumque recognita esse videtur” (*Nov. Test. Proleg.* lxxv.). Whether the whole of this version proceeded from the same translator has been questioned. It appears probable that the New Test. of the Peshito is not from the same hand as the Old. Not only may Michaelis be right in supposing a peculiar translator of the Epistle to the Hebrews, but also other parts may be from different hands; this opinion will become more general the more the version is studied. The recensions to which the version was subjected may have succeeded in part, but not wholly, in effacing the indications of a plurality of translators. The Acts and Epistles seem to be either more recent than the Gospels, though far less revised; or else, if coeval, far more corrected by later Greek MSS. The MSS. of the *Karkaphensian* recension (as it has been termed) of the Peshito Old Test. contain also the New with a similar character of text. *The Curetonian Syriac Gospels.*—Among the MSS. brought from the Nitrian monasteries in 1842, Dr. Cureton noticed a copy of the Gospels, differing greatly from the common text; and this is the form of text to which the name of Curetonian Syriac has been rightly applied. Every criterion which proves the common Peshito not to exhibit a text of extreme antiquity, equally proves the early origin of this. Dr. Cureton considers that the MS. of the Gospels is of the fifth century, a point in which all competent judges are probably agreed. The MS. contains Matt. i.-viii. 22, x. 31-xiii. 25. Mark, the four last verses only. John i. 1-42, iii. 6-vii. 37, xiv. 11-29; Luke ii. 48-iii. 16, vii. 33-xv. 21, xvii. 24-xxiv. 41. Bar Sahbi, bishop of Amida in the 12th century, says:—“There is found occasionally a Syriac copy, made out of the Hebrew, which inserts these three kings in the genealogy; but that afterwards it speaks of fourteen and not of seventeen generations, because fourteen generations has been substituted for seventeen by the Hebrews on account of their holding to the septenary number,” &c. It shows then that Bar Sahbi knew of a Syriac text of the Gospels in which Ahaziah, Joash, and Amaziah were inserted in Matt. i. 8; there is the same reading in the Curetonian Syriac: but this might have been a coincidence. But in ver. 17 the Curetonian text has in contradiction to ver. 8, fourteen genera-

tions and not *seventeen*: and so had the copy mentioned by Bar Salibi: the former point might be a mere coincidence; the latter, however, shows such a kind of union in contradiction as proves the identity very convincingly. In examining the Curetonian text with the common printed Peshito, we often find such identity of phrase and rendering as to show that they are not wholly independent translations: then, again, we meet with such variety in the forms of words, &c. as seems to indicate that in the Peshito the phraseology had been revised and refined. But the great (it might be said characteristic) difference between the Curetonian and the Peshito Gospels is in their readings; for while the latter cannot in its present state be deemed an unchanged production of the second century, the former bears all the marks of extreme antiquity, even though in places it may have suffered from the introduction of readings current in very early times. A comparison of the two not only shows the antiquity of the text of the Curetonian Syriac, but it also affords abundant proof that the Peshito must have been modernised and revised. The antiquity of the Curetonian text is also shown by the occurrence of readings which were, as we know, early current, even though rightly repudiated as erroneous: it may suffice to refer to the long addition after Matt. x. 28. The Curetonian Syriac presents such a text as we might have concluded would be current in the second century: the Peshito has many features which *could not* belong to that age; unless, indeed, we are ready to reject established facts, and those of a very numerous kind: probably, at least, two thousand. Bar Salibi tells us, when speaking of this version of St. Matthew, "there is found occasionally a Syriac copy made out of the Hebrew;" we thus know that the opinion of the Syrians themselves in the 12th century was that this translation of St. Matthew was not made from the Greek, but from the Hebrew original of the Evangelist: such, too, was the judgment of Dr. Cureton. The more the evidence, direct and indirect, is weighed, the more established it appears will be the judgment that the Curetonian Syriac of St. Matthew's Gospel was translated from the Apostle's Hebrew (Syro-Chaldaic) original, although injured since by copyists or revisers.—B. *The Philoxenian Syriac Version, and its revision by Thomas of Harkel.*—Philoxenus, or Xenaias, a Monophysite, Bp. of Hierapolis or Mabug at the beginning of the 6th century, caused Polycarp, his *Chorepiscopus*, to make a new translation of the New Test. into Syriac. This was executed in A.D. 508, and it is generally termed Philoxenian from its promoter. This version has not been transmitted to us in the form in which it was first made; we only possess a revision of it, executed by Thomas of Harkel in the following century (The Gospels, A.D. 616). From the subscriptions we learn that the text was revised by Thomas with *three* (some copies say *two*) Greek MSS. One Greek copy is similarly mentioned at the close of the Catholic Epistles. In describing this version as it has come down to us, the text is the first thing to be considered. This is characterised by extreme literality. The Syriac idiom is constantly bent to suit the Greek, and everything is in some manner expressed in the Greek phrase and order. As to the kind of Greek text that it represents, it is just what might have been expected in the 6th century. The work of T^m in the text itself is seen in

the introduction of *obeloi*, by which passages which he rejected were condemned; and of *asterisks*, with which his insertions were distinguished. His model in all this was the Hexaplar Greek text. It is probable that the Philoxenian version was very literal, but that the slavish adaptation to the Greek is the work of Thomas.—C. *Syriac Versions of portions wanting in the Peshito.*—I. The second Epistle of Peter, the second and third of John, and that of Jude. The fact has been already noticed, that the Old Syriac Version did not contain these Epistles. They were published by Pococke in 1630, from a MS. in the Bodleian. The suggestion of Dr. Davidson, that the text of Pococke is that of Philoxenus before it was revised by Thomas, seems most probable.—II. *The Apocalypse.*—In 1627 De Dieu edited a Syriac version of the Apocalypse, from a MS. in the Leyden Library, written by one "Caspar from the land of the Indians," who lived in the latter part of the 16th century. A MS. at Florence, also written by this Caspar, has a subscription stating that it was copied in 1582 from a MS. in the writing of Thomas of Harkel, in A.D. 622. But the subscription seems to be of doubtful authority; and until the Rev. B. Harris Cowper drew attention to a more ancient copy of the version, we might well be somewhat uncertain if this were really an ancient work. It is of small critical value, and the MS. from which it was edited is incorrectly written. This book, from the Paris Polyglott and onward, has been added to the Peshito in this relation.—III. *The Syriac Version of John viii. 1-11.*—From the MS. sent by Abp. Ussher to De Dieu, the latter published this section in 1631. From De Dieu it was inserted in the London Polyglott, with a reference to Ussher's MS., and hence it has passed with the other editions of the Peshito, where it is a mere interpolation. Probably the version edited is that of Paul of Tela, the translator of the Hexaplar Greek text into Syriac.—D. THE JERUSALEM SYRIAC LECTIONARY.—The MS. in the Vatican containing this version was pretty fully described by S. E. Assemani in 1756, in the Catalogue of the MSS. belonging to that Library. The MS. was written in A.D. 1031, in peculiar Syriac writing; the portions are of course those for the different festivals, some parts of the Gospels not being there at all. The dialect is not common Syriac; it was termed the *Jerusalem Syriac*, from its being supposed to resemble the Jerusalem Talmud in language and other points. The grammar is peculiar; the forms almost Chaldee rather than Syriac; two characters are used for expressing F and P. For critical purposes this Lectionary has a far higher value than it has for any other: its readings often coincide with the oldest and best authorities. In Adler's opinion its date as a version would be from the 4th to the 6th century; but it can hardly be supposed that it is of so early an age, or that any Syrians then could have used so corrupt a dialect. The first volume, of an edition of this Lectionary, containing the Syriac text, with a Latin translation, has been published by Count Miniscalchi Erizzo.

TARGUM, a Chaldee word of uncertain origin; the general term for the CHALDEE, or, more accurately, ARAMAIC VERSIONS of the Old Testament. The injunction to "read the Book of the Law before all Israel the men, and women, and children, and the strangers," on the Feast of Tabernacles of every Sabbatical year, as a means of solemn instruction and edification, is first found in

Deut. xxi. 10-13. How far the ordinance was observed in early times we have no means of judging. It would appear, however, that such readings did take place in the days of Jeremiah. Certain it is that among the first acts undertaken by Ezra towards the restoration of the primitive religion and public worship is reported his reading "before the congregation, both of men and women" of the returned exiles, "in the Book in the Law of God" (Neh. viii. 2, 8). Aided by those men of learning and eminence with whom, according to tradition, he founded that most important religious and political body called the Great Synagogue, or Men of the Great Assembly, he appears to have succeeded in so firmly establishing regular and frequent public readings in the Sacred Records, that later authorities almost unanimously since this hallowed custom to times immemorial—may to the times of Moses himself. To these ancient readings in the Pentateuch were added, in the course of time, readings in the Prophets (in some Babylonian cities even in the Hagiographa), which were called *Haftaroth*; but when and how these were introduced is still matter for speculation. If, however, the primitive religion was re-established, together with the second Temple, in more than its former vigour, thus enabling the small number of the returned exiles—and these, according to tradition, the lowest of the low, the poor in wealth, in knowledge, and in ancestry, the very outcasts and refuse of the nation as it were—to found upon the ruins of Zion one of the most important and lasting spiritual commonwealths that has ever been known, there was yet one thing which neither authority nor piety, neither academy nor synagogue, could restore to its original power and glory—the Hebrew language. Ere long it was found necessary to translate the national books, in order that the nation from whose midst they had sprung might be able to understand them. And if for the Alexandrine, or rather the whole body of Hellenistic Jews, Greek translations had to be composed, those who dwelt on the hallowed soil of their forefathers had to receive the sacred word through an Aramaic medium. If the common people thus gradually had lost all knowledge of the tongue in which were written the books to be read to them, it naturally followed (in order "that they might understand them") that recourse must be had to a translation into the idiom with which they were familiar—the Aramaic. That further, since a bare translation could not in all cases suffice, it was necessary to add to the translation an explanation, more particularly of the more difficult and obscure passages. Both translation and explanation were designated by the term *Targum*. In the course of time there sprang up a guild, whose special office it was to act as *interpreters* in both senses (*Meturgeman*), while formerly the learned alone volunteered their services. These interpreters were subjected to certain bonds and regulations as to the form and substance of their renderings. Again, certain passages liable to give offence to the multitude are specified, which may be read in the synagogue and translated; others, which may be read but not translated; others, again, which may neither be read nor translated. Altogether these *Meturgemanim* do not seem to have been held generally in very high respect; one of the reasons being probably that they were paid, and thus made the Torah "a spade to dig with it." A fair notion of what was considered a proper Targum may be

gathered from the maxim preserved in the Talmud: "Whoever translates [as *Meturgeman*] a verse in its closely exact form [without proper regard to its real meaning] is a liar, and whoever adds to it is impious and a blasphemer, *e. g.*, the literal rendering into Chaldee of the verse, 'They saw the God of Israel' (Ex. xxiv. 10), is as wrong a translation as 'They saw the angel of God'; the proper rendering being, 'They saw the glory of the God of Israel.'" The same causes which, in the course of time, led to the writing down—after many centuries of oral transmission—of the whole body of the Traditional Law, engendered also, and about the same period, as it would appear, written Targums: for certain portions of the Bible, at least. The fear of the adulterations and mutilations which the Divine Word—and the troubles within and without the Commonwealth—must undergo at the hands of incompetent or impious exponents, broke through the rule, that the Targum should only be oral, lest it might acquire undue authority. The gradual growth of the Code of the written Targum, such as now embraces almost the whole of the O. T., and contains, we may presume, but few snatches of the primitive Targums, is shrouded in deep obscurity. Before, however, entering into a more detailed account, we must first dwell for a short time on the *Midrash* itself, of which the Targum forms part. The centre of all mental activity and religious action among the Jewish community, after the return from Babylon, was the Scriptural Canon collected by the *Sopherim*, or Men of the Great Synagogue. These formed the chief authority on the civil and religious law, and their authority was the Pentateuch. Their office as expounders and commentators of the Sacred Records was twofold. They had, firstly, to explain the exact meaning of such prohibitions and ordinances contained in the Mosaic Books as seemed not explicit enough for the multitude, and the precise application of which in former days had been forgotten during the Captivity. Secondly, laws neither specially contained nor even indicated in the Pentateuch were inaugurated by them according to the new wants of the times and the ever-shifting necessities of the growing Commonwealth. This juridical and homiletical expounding and interpreting of Scripture is called *darash*, and the avalanche of Jewish literature which began silently to gather from the time of the return from the exile and went on rolling uninterruptedly, until about a thousand years after the destruction of the second Temple, may be comprised under the general name *Midrash*—"expounding." The two chief branches indicated are, *Hakchah*, the rule by which to go, = binding, authoritative law; and *Haggadah* = saying, legend,—flights of fancy, dating up from the Divine Word. The *Hakchah*, treating more especially the Pentateuch as the legal part of the O. T., bears towards this book the relation of an amplified and annotated Code. The *Haggadah*, on the other hand, held especial sway over the wide field of ethical, poetical, prophetic, and historical elements of the O. T., but was free even to interpret its legal and historical passages fancifully and allegorically. The aim of the *Haggadah* being the purely momentary one of elevating, comforting, edifying its audience for the time being, it did not pretend to possess the slightest authority. The first collections of the *Hakchah*—embracing the whole field of juridico-political, religious, and prop-

tical life, both of the individual and of the nation: the human and Divine law to its most minute and insignificant details—were instituted by Hillel, Akiba, and Simon B. Gamaliel; but the final redaction of the general code, *Mishna*, to which the later Toseftas and Boraithas form supplements, is due to Jehudah Hannasi in 220 A.D. The masters of the Mishnaic period, after the Soferim, are the Tannaim, who were followed by the Amoraim. The discussions and further amplifications of the Mishna by the latter, form the *Gemara* (Complement), a work extant in two redactions, viz. that of Palestine or Jerusalem (middle of 4th century), and of Babylon (5th century A.D.), which, together with the Mishna, are comprised under the name Talmud. From this indispensable digression we return to the subject of Targum. The Targums now extant are as follows:—I. THE TARGUM OF ONKELOS ON THE PENTATEUCH.—Onkelos is the same name as Aquila, the Greek translator of the O. T. (see p. 979); and the Targum was so called because the new Chaldee Version was stated under the name which had become expressive of the type and ideal of a Bible-translation; so that, in fact, it was a Targum done in the manner of Aquila:—*Aquila-Targum*. With regard to the date, the Targum was begun to be committed to writing about the end of the 2nd century, A.D. So far, however, from its superseding the oral Targum at once, it was on the contrary strictly forbidden to read it in public. Nor was there any uniformity in the Version. Down to the middle of the 2nd century we find the masters most materially differing from each other with respect to the Targum of certain passages, and translations quoted not to be found in any of our Targums. We shall not be far wrong in placing the work of collecting the different fragments with their variants, and reducing them into one—finally authorised Version—about the end of the 3rd, or the beginning of the 4th century, and in assigning Babylon to it as the birthplace. We now turn to the Targum itself. Its language is Chaldee, closely approaching in purity of idiom to that of Ezra and Daniel. It follows a sober and clear, though not a slavish exegesis, and keeps as closely and minutely to the text as is at all consistent with its purpose, viz., to be chiefly, and above all, a version for the people. Its explanations of difficult and obscure passages bear ample witness to the competence of those who gave it its final shape, and infused into it a rare unity. It avoids the legendary character with which all the later Targums entwine the Biblical word, as far as ever circumstances would allow. Only in the poetical passages it was compelled to yield—though reluctantly—to the popular craving for Haggadah; but even here it chooses and selects with rare taste and tact. In spite of its many and important discrepancies, the Targumiever for one moment forgets its aim of being a clear, though free, translation for the people, and nothing more. Wherever it deviates from the literalness of the text, such a course, in its case, is fully justified—nay, necessitated—either by the obscurity of the passage, or the wrong construction that naturally would be put upon its wording by the multitude. The explanations given agree either with the real sense, or develop the current tradition supposed to underlie it. As to the Bible Text from which the Targum was prepared, we have

no certainty whatever on this head, owing to the extraordinarily corrupt state of our Targum texts. It would appear, however, that, broadly speaking, our present Masoretic text has been the one from which the Onk. Version was, if not made, yet edited, at all events. Of the extraordinary similarity between Onkelos and the Samaritan Version we have spoken under SAMARITAN PENTATEUCH.—II. TARGUM ON THE PROPHETS.—viz. Joshua, Judges, Samuel, Kings, Isaiah, Jeremiah, Ezekiel, and the twelve Minor Prophets,—called TARGUM OF JONATHAN BEN UZZIEL. We shall, probably not be far wrong in placing this Targum some time, although not long, after Onkelos, or about the middle of the 4th century;—the latter years of R. Joseph, who, it is said, occupied himself chiefly with the Targum when he had become blind. This Targum may fairly be described as holding, in point of interpretation and enlargement of the text, the middle place between Onkelos, who only in extreme cases deviates into paraphrase, and the subsequent Targums, whose connexion with their texts is frequently of the most flighty character. The interpretation of Jonathan, where it adheres to the text, is mostly very correct in a philosophical and exegetical sense, closely literal even, provided the meaning of the original is easily to be understood by the people. When, however, similes are used, unfamiliar or obscure to the people, it unhesitatingly dissolves them, and makes them easy in their mouths like household words, by adding as much of explanation as seems fit; sometimes, it cannot be denied, less sagaciously, even incorrectly, comprehending the original meaning.—III. and IV. TARGUM OF JONATHAN BEN UZZIEL AND JERUSHALMI-TARGUM ON THE PENTATEUCH.—Onkelos and Jonathan on the Pentateuch and Prophets, whatever be their exact date, place, authorship and editorship, are the oldest of existing Targums, and belong, in their present shape, to Babylon and the Babylonian academies flourishing between the 3rd and 4th centuries A.D. But precisely as two parallel and independent developments of the Oral Law have sprung up in the Palestinian and Babylonian Talmuds respectively, so also recent investigation has proved to demonstration the existence of two distinct cycles of Targums on the Written Law—i. e. the entire body of the Old Testament. The one first collected, revised, and edited in Babylon, called—more especially that part of it which embraced the Pentateuch (Onkelos)—the Babylonian. The other, continuing its oral life, so to say, down to a much later period, was written and edited—less carefully, or rather with a much more faithful retention of the oldest and youngest fancies of Me-turgemanim and Darshanim—on the soil of Judea itself. Of this entire cycle, however, the Pentateuch and a few other books and fragmentary pieces only have survived entire, while of most of the other books of the Bible a few detached fragments are all that is known, and this chiefly from quotations. As not the least cause of the loss of the great bulk of the Palestinian Targum may also be considered the almost uninterrupted martyrdom to which those were subjected who preferred, under all circumstances, to live and die in the Land of Promise. However this may be, the Targum on the Pentateuch has come down to us: and not in one, but in two recensions. More surprising still, the one hitherto considered a fragment, because of its embracing portions only of the individual books, has

in reality never been intended to embrace any further portion, and we are thus in the possession of two Palestinian Targums, preserved in their original forms. The one, which extends from the first verse of Genesis to the last of Deuteronomy, is known under the name of Targum Jonathan (ben Uzziel) or Pseudo-Jonathan on the Pentateuch. The other, interpreting single verses, often single words only, is extant in the following proportions: a third on Genesis, a fourth on Deuteronomy, a fifth on Numbers, three-twentieths on Exodus, and about one-fourteenth on Leviticus. The latter is generally called Targum *Jerushalmi*, or, down to the 11th century (Hai Gaon, Chananial), *Targum Erctis Israel*, Targum of Jerusalem or of the land of Israel. Not before the first half of this century did the fact become fully and unquestionably established that both Targums were in reality one—that both were known down to the 14th century under no other name than Targum *Jerushalmi*—and that some forgetful scribe about that time must have taken the abbreviation "T—T.J." over one of the two documents, and, instead of dissolving it into Targum-Jerushalmi, dissolved it erroneously into what he must fill then have been engaged in copying—viz., Targum-Jonathan, sc. ben Uzziel (on the Prophets). Of the intermediate stage, when only a few MSS. had received the new designation, a curious fact, which Azariah de Rossi (Cod. 37 b) mentions, gives evidence. "I saw," he says, "two complete Targums on the whole Pentateuch, word for word alike; one in Reggio, which was described in the margin, 'Targum of Jonathan b. Uzziel;' the other in Mantua, described at the margin as 'Targum Jerushalmi.'" Yet the difficulty of their obvious dissimilarity, if they were identical, remained to be accounted for. Zunz tries to solve it by assuming that Pseudo-Jonathan is the original Targum, and that the fragmentary *Jerushalmi* is a collection of variants to it. Frankel has gone a step further, and concludes that *Jerushalmi* is a collection of emendations and additions to single portions, phrases, and words of Onkelos, and Pseudo-Jonathan a further emended and completed edition to the whole Pentateuch of *Jerushalmi-Onkelos*. The *Jerushalmi*, in both its recensions, is written in the Palestinian dialect. It is older than the Masora and the conquest of Western Asia by the Arabs. Syria or Palestine must be its birthplace, the second half of the 7th century its date. Its chief aim and purpose is, especially in its second edition, to form an entertaining compendium of all the Halachah and Haggadah, which refers to the Pentateuch, and takes its stand upon it. And in this lies its chief use to us. There is hardly a single allegory, parable, mystic digression, or tale in it which is not found in the other haggadistic writings—Mishna, Talmud, Mechilta, Sifra, Sifri, &c.—V. TARGUMS OF "JOSEPH THE BLIND" ON THE HAGIOGRAPHA.—"When Jonathan ben Uzziel began to paraphrase the Cethubim" (Hagiographa), we read in the Talmud, "a mysterious voice was heard saying: It is enough. Thou hast revealed the secrets of the Prophets—why wouldst thou also reveal those of the Holy Ghost?"—It would thus appear, that a Targum to these books (Job excepted) was entirely unknown up to a very late period. Those Targums on the Hagiographa which we now possess have been attributed vaguely to

different authors, it being assumed in the first instance that they were the work of one man. Popular belief fastened upon Joseph the Blind. Yet, if ever he did translate the Hagiographa, certain it is that those which we possess are not by his or his disciples' hands—that is, of the time of the 4th century. Between him and our hagiographical Targums, many centuries must have elapsed. Yet we do not even venture to assign to them more than an approximate round date, about 1000 A.D. Besides the Targums to the Pentateuch and the Prophets those now extant range over Psalms, Proverbs, Job, the five Megilloth, i.e. Song of Songs, Ruth, Lamentations, Esther, Ecclesiastes; the Chronicles and Daniel, Ezra and Nehemiah alone are left without a Targum at present.—VI. TARGUM ON THE BOOK OF CHRONICLES.—This Targum was unknown up to a very recent period. In 1680 it was edited for the first time from an Erfurt MS. by M. F. Beck, and in 1715 from a more complete as well as correct MS. at Cambridge, by D. Wilkins. The name of Hungary occurring in it, and its frequent use of the Jerusalem-Targum to the Pentateuch, amounting sometimes to simple copying, show sufficiently that its author is neither "Jonathan b. Uzziel," nor "Joseph the Blind," as has been suggested. But the language, style, and the Haggadah, with which it abounds, point to a late period and point out Palestine as the place where it was written. Its use must be limited to philological, historical, and geographical studies.—VII. THE TARGUM TO DANIEL.—It is for the first time that this Targum is here formally introduced into the regular rank and file of Targums, although it has been known for now more than five-and-twenty years. Munk found it, not indeed in the Original Aramaic, but in what appears to him to be an extract of it written in Persian.—VIII. There is also a Chaldean translation extant of the apocryphal pieces of Esther.

Version, Authorised. A. WYCLIFFE (1). 1324; d. 1384).—(1.) It is singular, and not without significance, that the first translation from the Bible connected with the name of Wycliffe should have been that of part of the Apocalypse. The *Last Age of the Church* (A.D. 1356), translates and expounds the vision in which the Reformer read the signs of his own times, the sins and the destruction of "Antichrist and his meynee" (=multitude). Shortly after this he completed a version of the Gospels, accompanied by a commentary. Wycliffe, however, though the chief, was not the only labourer in the cause. Another translation and commentary appear to have been made about the same time, in ignorance of Wycliffe's work. These preliminary labours were followed up by a complete translation of the N.T. by Wycliffe himself. The O.T. was undertaken by his coadjutor, Nicholas de Hereford, but was interrupted, and ends abruptly (following so far the order of the Vulgate) in the middle of Baruch. Many of the MSS. of this version now extant present a different recension of the text, and it is probable that the work of Wycliffe and Hereford was revised by Richard Purvey, circ. A.D. 1388. (2.) It need hardly be said, as regards the method of the translator, that the version was based entirely upon the Vulgate. Many MSS. were compared, and out of this comparison, the true reading ascertained as far as possible. The next step was to

consult the *Glossa Ordinaria*, the commentaries of Nicholas de Lyra, and others, as to the meaning of any difficult passages. After this (we recognise here, perhaps, a departure from the right order) grammars were consulted. Then came the actual work of translating, which he aimed at making idiomatic rather than literal. (3.) The following characteristics may be noticed as distinguishing this version: (1) The general homeliness of its style. (2) The substitution, in many cases, of English equivalents for quasi-technical words. (3) The extreme literalness with which, in some instances, even at the cost of being unintelligible, the Vulgate text is followed, as in 2 Cor. i. 17-19.—II. TYNDAL.—The work of Wycliffe stands by itself. Whatever power it exercised in preparing the way for the Reformation of the 16th century, it had no perceptible influence on later translations. With Tyndal we enter on a continuous succession. He is the patriarch, in no remote ancestry, of the Authorised Version. More than Cranmer or Ridley he is the true hero of the English Reformation. "Ere many years," he said, at the age of thirty-six (A.D. 1520), he would cause "a boy that driveth the plough" to know more of Scripture than the great body of the clergy then knew (Foxe, in Anderson's *Annals of English Bible*, i. 36). Whether Tyndal had gained any knowledge of Hebrew before he left England in 1524 may be uncertain. The fact that in 1530-31 he published a translation of Genesis, Deuteronomy, and Jonah, may be looked on as the first-fruits of his labours, the work of a man who was giving this proof of his power to translate from the original. The N. T. was, however, the great object of his care. First the Gospels of St. Matthew and St. Mark were published tentatively, then in 1525 the whole of the N. T. was printed in 4to. at Cologne and in small 8vo. at Worms. The work was the fruit of a self-sacrificing zeal, and the zeal was its own reward. In England it was received with denunciations. Tonstal, Bishop of London, preaching at Paul's Cross, asserted that there were at least 2000 errors in it, and ordered all copies of it to be bought up and burnt. An Act of Parliament (35 Hen. VIII. cap. 1) forbade the use of all copies of Tyndal's "false translation." The treatment which it received from professed friends was hardly less annoying. In the mean time the work went on. Editions were printed one after another. The last appeared in 1535, just before his death. His heroic life was brought to a close in 1536. We may cast one look on its sad end—the treacherous betrayal, the Judas-kiss of the false friend, the imprisonment at Vilvorden, the last prayer, "Lord, open the King of England's eyes." The work to which a life was thus nobly devoted was as nobly done. To Tyndal belongs the honour of having given the first example of a translation based on true principles, and the excellence of later versions has been almost in exact proportion as they followed his. Believing that every part of Scripture had one sense and one only, the sense in the mind of the writer (*Obedience*, p. 304), he made it his work, using all philological helps that were accessible, to attain that sense. Believing that the duty of a translator was to place his readers as nearly as possible on a level with those for whom the books were originally written, he looked on all the later theological associations that had gathered round the words of the N. T. as hindrances rather than helps, and sought, as far as

possible, to get rid of them. All the exquisite grace and simplicity which have endeared the A. V. to men of the most opposite tempers and contrasted opinions—is due mainly to his clear-sighted truthfulness. The desire to make the Bible a people's book led him in one edition to something like a provincial, rather than a national translation, but on the whole it kept him free from the besetting danger of the time, that of writing for scholars, not for the people.—III. COVERDALE.—(1.) A complete translation of the Bible, different from Tyndal's, bearing the name of Miles Coverdale, printed probably at Zurich, appeared in 1535. The undertaking itself, and the choice of Coverdale as the translator, were probably due to Cromwell. Tyndal's controversial tracts, and the polemical character of his prefaces and notes, had irritated the leading ecclesiastics and embittered the mind of the king himself against him. There was no hope of obtaining the king's sanction for anything that bore his name. But the idea of an English translation began to find favour. The bishops even began to think of the thing as possible. Cromwell, it is probable, thought it better to lose no further time, and to strike while the iron was hot. A divine whom he had patronised, though not, like Tyndal, feeling himself called to that special work, was willing to undertake it. To him accordingly it was intrusted. (2.) The work which was thus executed was done, as might be expected, in a very different fashion from Tyndal's. Of the two men, one had made this the great object of his life, the other, in his own language, "sought it not, neither desired it," but accepted it as a task assigned him. One prepared himself for the work by long years of labour in Greek and Hebrew. The other is content to make a translation at second hand "out of the Douche (Luther's German Version) and the Latine." (3.) An inspection of Coverdale's version serves to show the influence of the authorities he followed. The proper names of the O. T. appear for the most part in their Latin form, Elias, Eliseus, Ochozias; sometimes, as in *Essay* and *Jeremy*, in that which was familiar in spoken English. Some points of correspondence with Luther's version are not without interest. Thus "Cush," which in Wycliffe, Tyndal, and the A. V. is uniformly rendered "Ethiopia," is in Coverdale "Moriaus land" (Ps. lxxviii. 31; Acts viii. 27, &c.), after the "Mohrenlande" of Luther, and appears in this form accordingly in the P. B. version of the Psalms. The proper name Rabshakeh passes, as in Luther, into the "chief butler" (2 K. xviii. 17; Is. xxxvi. 11). "Shiloh," in the prophecy of Gen. xlix. 10, becomes "the worthy," after Luther's "der Held." The singular word "Lania" is taken from the Vulg. (4.) What has been stated practically disposes of the claim which has sometimes been made for this version of Coverdale's, as though it had been made from the original text. It is not improbable, however, that as time went on he added to his knowledge. He, at any rate, continued his work as a painstaking editor. Fresh editions of his Bible were published, keeping their ground in spite of rivals, in 1537, 1539, 1550, 1553. He was called in at a still later period to assist in the Geneva version.—IV. MATTHEW.—(1.) In the year 1537, a large folio Bible appeared as edited and dedicated to the king, by Thomas Matthew. No one of that name appears at all prominently in the religious history of Henry VIII., and this suggests the inference that

the name was pseudonymous, adopted to conceal the real translator. The tradition which connects this Matthew with John Rogers, the proto-martyr of the Marian persecution, is all but undisputed. Matthew's Bible reproduces Tyndal's work, in the N. T. entirely, in the O. T. as far as 2 Chr., the rest being taken with occasional modifications from Coverdale. (2.) The printing of the book was begun apparently abroad, and was carried on as far as the end of Isaiah. At that point a new pagination begins, and the names of the London printers, Grafton and Whitechurch, appear. A copy was ordered, by royal proclamation, to be set up in every church, the cost being divided between the clergy and the parishioners. This was, therefore, the first Authorised Version. (3.) What has been said of Tyndal's Version applies of course, to this. There are, however, signs of a more advanced knowledge of Hebrew. All the technical words connected with the Psalms, Neginoth, Shiggaion, Sheminith, &c., are elaborately explained. Ps. ii. is printed as a dialogue. The names of the Hebrew letters are prefixed to the verses of Lamentations. Reference is made to the Chaldee Paraphrase (Job vi.), to Rabbi Abraham (Job xix.), to Kimchi (Ps. iii.). A like range of knowledge is shown in the N. T. Strabo is quoted to show that the Magi were not kings, Macrobius as testifying to Herod's ferocity (Matt. ii.), Erasmus's Paraphrase on Matt. xii., xv. The popular identification of Mary Magdalene with "the woman that was a sinner" is discussed, and rejected (Luke x.). More noticeable even than in Tyndal is the boldness and fullness of the exegetical notes scattered throughout the book. Strong and asserting what he looked on as the central truths of the Gospel, there was in Rogers a Luther-like freedom in other things which has not appeared again in any authorised translation or popular commentary. (4.) In the order of the books of the N. T. Rogers follows Tyndal, agreeing with the A. V. as far as the Epistle to Philemon. This is followed by the Epistles of St. John, then that to the Hebrews, then those of St. Peter, St. James, and St. Jude. Woodcuts, not freely introduced elsewhere, are prefixed to every chapter in the Revelation.—V. TAVERNER (1539). (1.) The boldness of the pseudo-Matthew had, as has been said, frightened the ecclesiastical world from its propriety. Coverdale's Version was, however, too inaccurate to keep its ground. It was necessary to find another editor, and the printers applied to Richard Taverner. But little is known of his life. The fact that, though a layman, he had been chosen as one of the canons of the Cardinal's College at Oxford indicates a reputation for scholarship, and this is confirmed by the character of his translation. (2.) In most respects this may be described as an expurgated edition of Matthew's.—VI. CRANMER. (1.) In the same year as Taverner's, and coming from the same press, appeared an English Bible, in a more stately folio, printed with a more costly type, bearing a higher name than any previous edition. The title-page is an elaborate engraving, the spirit and power of which indicate the hand of Holbein. A preface, in April, 1540, with the initials T. C., implies the archbishop's sanction. (2.) Cranmer's Version presents, as might be expected, many points of interest. The prologue gives a more complete ideal of what a translation ought to be than we have as yet seen. Words not in the original are to be printed in a

different type. The sign * indicates diversity in the Chaldee and Hebrew. The frequent hands (see) in the margin, in like manner, show an intention to give notes at the end; but Matthew's Bible had made men cautious, and, as there had not been time for "the King's Council to settle them," they were omitted, and no help given to the reader beyond the marginal references. (3.) A later edition in 1541 presents a few modifications worth noticing. It appears as "authorised" to be "used and frequented" in every church in the kingdom. The introduction, with all its elaborate promise of a future perfection disappears, and, in its place, there is a long preface by Cranmer. It was reprinted again and again, and was the Authorised Version of the English Church till 1568—the interval of Mary's reign excepted. From it, accordingly, were taken most, if not all, the portions of Scripture in the Prayer-books of 1549 and 1552. The Psalms, as a whole, the quotations from Scripture in the Homilies, the sentences in the Communion Services, and some phrases elsewhere, still preserve the remembrance of it.—VII. GENEVA. (1.) The reaction under Mary gave a check to the whole work, as far as England was concerned; but the exiles who fled to Geneva entered on it with more vigour than ever. The Geneva refugees—among them Whittingham, Goodman, Pullin, Sampson, and Coverdale himself—laboured "for two years or more, day and night." Their translation of the N. T. was "diligently revised by the most approved Greek examples." The N. T., translated by Whittingham, was printed by Conrad Badins in 1557, the whole Bible in 1560. (2.) Whatever may have been its faults, the Geneva Bible, commonly called the Breeches Bible, from its rendering of Gen. iii. 7, was unquestionably, for sixty years, the most popular of all versions. Not less than eighty editions, some of the whole Bible, were printed between 1558 and 1611. It kept its ground for some time even against the A. V., and gave way, as it were, slowly and under protest. It was the version specially adopted by the great Puritan party through the whole reign of Elizabeth, and far into that of James. As might be expected, it was based on Tyndal's Version. (3.) Some peculiarities are worthy of special notice:—(1.) It professes a desire to restore the "true writing" of many Hebrew names, and we meet accordingly with forms like Izhak (Isaac), Jacob, and the like. (2.) It omits the name of St. Paul from the title of the Epistle to the Hebrews; and, in a short Preface, leaves the authorship an open question. (3.) It avows the principle of putting all words not in the original in Italics. (4.) It presents, in a Calendar prefixed to the Bible, something like a declaration of war against the established order of the Church's lessons, commemorating Scripture facts, and the deaths of the great Reformers, but ignoring saints' days altogether. (5.) It was the first English Bible which entirely omitted the Apocrypha. (6.) The notes were characteristically Swiss, not only in their theology, but in their politics.—VIII. THE BISHOPS' BIBLE.—(1.) The facts just stated will account for the wish of Archbishop Parker, to bring out another version which might establish its claims against that of Geneva. Great preparations were made. The correspondence of Parker with his Suffragans presents some points of interest, as showing how little agreement there was as to the true theory of a translation. (2.) The bishops there-

consulted, eight in number, together with some deans and professors, brought out the fruit of their labours in a magnificent folio (1568 and 1572). Everything had been done to make it attractive. In some points it followed previous translations, and was avowedly based on Cranmer's. Cranmer's Prologue was reprinted. The Geneva division into verses was adopted throughout. The initials of the translators were attached to the Books which they had severally undertaken. (3.) Of all the English versions, the Bishops' Bible had probably the least success. It did not command the respect of scholars, and its size and cost were far from meeting the wants of the people. It had however, at any rate, the right to boast of some good Hebrew scholars among the translators; and, together with the A. V., received from Selden the praise of being "the best translation in the world."—IX. RHEIMS AND DOUAY.—The successive changes in the Protestant versions of the Scriptures were, as might be expected, matter of triumph to the controversialists of the Latin Church. Some saw in it an argument against any translation of Scripture into the spoken language of the people. Others pointed derisively to the want of unity which these changes displayed. There were some, however, who took the line which Sir T. More and Gardiner had taken under Henry VIII. They did not object to the principle of an English translation. They only charged all the versions hitherto made with being false, corrupt, heretical. To this there was the ready retort, that they had done nothing: that their bishops in the reign of Henry had promised, but had not performed. It was felt to be necessary that they should take some steps which might enable them to turn the edge of this reproach, and the English refugees who were settled at Rheims—Martin, Allen (afterwards cardinal), and Bristow—, undertook the work. After an incubation of some years the N. T. was published at Rheims in 1582. Though Martin was compenent to translate from the Greek, it professed to be based on "the authentic text of the Vulgate." Notes were added, as strongly dogmatic as those of the Geneva Bible, and often keenly controversial. The work of translation was completed somewhat later by the publication of the O. T. at Douay in 1609.—X. AUTHORISED VERSION.—(1.) The position of the English Church in relation to the versions in use at the commencement of the reign of James was hardly satisfactory. The Bishops' Bible was sanctioned by authority. That of Geneva had the strongest hold on the affections of the people. Scholars, Hebrew scholars in particular, found grave fault with both. Among the demands of the Puritan representatives at the Hampton Court Conference in 1604 (Dr. Rainolds being the spokesman), was one for a new, or, at least, a revised translation. The bishops treated the difficulties which they raised, with supercilious scorn. Cranmer's words seemed likely to be fulfilled again. Had it been left to the bishops, we might have waited for the A. V. "till the day after doomsday." (2.) But the king was not forgetful of what he thought likely to be the glory of his reign. The work of organising and superintending the arrangements for a new translation was one specially congenial to him, and in 1606 the task was accordingly commenced. The selection of the fifty-four scholars to whom it was intrusted, seems, on the whole, to have been a wise and fair one. Andrews, Saravia, Overal, Montague, and Barlow, represented the

"higher" party in the Church; Rainolds, Chader-ton, and Lively that of the Puritans. Scholarship unconnected with party was represented by Henry Savile and John Boys. (3.) What reward other than that of their own consciences and the judgment of posterity were the men thus chosen to expect for their long and laborious task? The king was no disposed to pay them out of his state revenue. There remained, however, an ingenious form of liberality, which had the merit of being inexpensive. A king's letter was sent to the archbishops and bishops, to be transmitted by them to their chapters, commending all the translators to their favourable notice. They were exhorted to contribute in all 1000 marks, and the king was to be informed of each man's liberality. If any livings in their gift, or in the gift of private persons, became vacant, the king was to be informed of it, that he might nominate some of the translators to the vacant preferment. Heads of colleges, in like manner, were enjoined to give free board and lodging to such divines as were summoned from the country to labour in the great work. That the king might take his place as the director of the whole, a copy of fifteen instructions was sent to each translator, and apparently circulated freely into both Universities. (4.) The instructions thus given will be found in Fuller, and with a more accurate text in Burnet. It will be interesting to note the bearing of each clause upon the work in hand, and its relation to previous versions. (1) The Bishops' Bible was to be followed, and as little altered as the original will permit. (2) The names of prophets and others were to be retained, as nearly as may be as they are vulgarly used. (3) The old ecclesiastical words to be kept. (4) When any word hath divers significations, that to be kept which hath been most commonly used by the most eminent fathers, being agreeable to the propriety of the place and the analogy of faith. (5) The division of the chapters to be altered either not at all, or as little as possible. (6) No marginal notes to be affixed but only for the explanation of Hebrew and Greek words. (7) Such quotations of places to be marginally set down as may serve for fit reference of one Scripture to another. (8 and 9) State plan of translation. Each company of translators is to take its own books; each person to bring his own corrections. The company to discuss them, and having finished their work, to send it on to another company, and so on. (10) Provides for differences of opinion between two companies by referring them to a general meeting. (11) Gives power, in cases of difficulty, to consult any scholars. (12) Invites suggestions from any quarter. (13) Names the directors of the work: Andrews, Dean of Westminster; Barlow, Dean of Chester; and the Regius Professors of Hebrew and Greek at both Universities. (14) Names translations to be followed when they agree more with the original than the Bishops' Bible, *sc.* Tyndal's, Coverdale's, Matthew's, Whitchurch's (Cranmer's), and Geneva. (15) Authorises Universities to appoint three or four overseers of the work. (5.) It is not known that any of the correspondence connected with this work, or any minute of the meetings for conference is still extant. Nothing is more striking than the silence with which the version that was to be the inheritance of the English people for at least two centuries and a half was ushered into the world. (6.) For three years the work went on, the separ-

ate companies comparing notes as directed. When the work drew towards its completion it was necessary to place it under the care of a select few. Two from each of the three groups were accordingly selected, and the six met in London, to superintend the publication. Now, for the first time, we find some more definite remuneration than the shadowy promise held out in the king's letter, of a share in the 1000 marks which Deans and Chapters would not contribute. The Company of Stationers thought it expedient to give the six editors thirty pounds each, in weekly payments, for their nine months' labour. The final correction, and the task of writing the arguments of the several books, was given to Bilson, bishop of Winchester, and Dr. Miles Smith, the latter of whom also wrote the Dedication and Preface. (7.) The version thus published did not all at once supersede those already in possession. The fact that five editions were published in three years, shows that there was a good demand. But the Bishops' Bible probably remained in many Churches, and the popularity of the Geneva Version is shown by not less than thirteen reprints, in whole, or in part, between 1611 and 1617. It is not easy to ascertain the impression which the A. V. made at the time of its appearance. Selden says it is "the best of all translations as giving the true sense of the original." (8.) The highest testimony of this period is that of Walton. From the editor of the Polyglott, the few words "inter omnes eminet" meant a good deal (*Pref.*). With the reign of Anne the tide of glowing panegyric set in. It would be easy to put together a long *catena* of praises stretching from that time to the present. One memorable exception must not, however, be passed over. Hallam (*Lit. of Europe*, in. ch. 2, *ad fin.*) records a brief but emphatic protest against the "enthusiastic praise" which has been lavished on this translation.—XI. SCHEMES FOR A REVISION.—(1.) A notice of the attempts which have been made at various times to bring about a revision of the A. V. though necessarily brief and imperfect, may not be without its use for future labourers. The first half of the 18th century was not favourable for such a work. An almost solitary *Essay for a New Translation* by H. R. (Ross), 1702, attracted little or no notice. A Greek Testament with an English translation, singularly vulgar and offensive, was published in 1729. A folio *New and literal translation* of the whole Bible by Anthony Purver, a Quaker (1764), was a more ambitious attempt. But it was far above the depth of degradation and folly which was reached in Harwood's *Literal Translation of the N. T.* "with freedom, spirit, and elegance" (1768). (2.) Biblical revision was happily not left entirely in such hands as these. A translation by Worsley "according to the present idiom of the English tongue" (1770) was, at least, less offensive. Durell (*Preface to Job*), Lowth (*Preface to Isaiah*), Blayney (*Pref. to Jeremiah*, 1784), were all strongly in favour of a new, or revised translation. Kennicott's labours in collecting MSS. of the O. T. issued in his *State of the present Hebrew Text* (1753, 59), and excited expectations that there might before long be something like a basis for a new version in a restored original. A more ambitious scheme was started by the Roman Catholic Dr. Geddes, in his *Prospectus for a New Translation* (1786). He too like Lowth finds fault with the superstitious adherence to the Masoretic

text, with the undue deference to lexicons, and disregard of versions shown by our translators. The work was issued in parts, according to the terms of the Prospectus, but did not get further than 2 Chron. in 1792, when the death of the translator put a stop to it. (3.) The revision of the A. V., like many other salutary reforms, was hindered by the French Revolution. In 1792, Archbishop Newcome had published an elaborate defence of such a scheme, taking the same line as Lowth. Revised translations of the N. T. were published by Wakefield in 1795, by Newcome himself in 1796, by Scarlett in 1798. Campbell's version of the Gospels appeared in 1788, that of the Epistles by Macknight in 1795. But in 1796 the note of alarm was sounded. There is a long interval before the question again comes into anything like prominence. The opening of the next campaign was an article in the *Classical Journal* (No. 36), by Dr. John Bellamy, proposing a new translation, followed soon afterwards by its publication under the patronage of the Prince Regent (1818). The most masterly of the manifestoes against change, was a pamphlet (*Remarks on the Critical Principles, &c.*, Oxford, 1820), published anonymously, but known to have been written by Archbishop Laurence. (4.) A correspondence between Herbert Marsh, bishop of Peterborough, and the Rev. H. Walter, in 1828, is the next link in the chain. Marsh had spoken (*Lectures on Biblical Criticism*, p. 295) with some contempt of the A. V. as based on Tyndal's, Tyndal's on Luther's, and Luther's on Munster's Lexicon, which was itself based on the Vulgate. Walter, in his answer, proves what is plain enough, that Tyndal knew some Hebrew, and that Luther in some instances followed Rabbinical authority and not the Vulgate; but the evidence hardly goes to the extent of showing that Tyndal's version of the O. T. was entirely independent of Luther's, or Luther's of the Latin. (5.) The last five-and-twenty years have seen the question of a revision, from time to time gaining fresh prominence. Dr. Beard's, *A Revised English Bible the Want of the Church* (1857), though tending to overstate the defects of the A. V., is yet valuable as containing much information, and representing the opinions of the more learned Nonconformists. Far more important, every way, both as virtually an authority in favour of revision, and as contributing largely to it, are Professor Scholefield's *Hints for an Improved Translation of the N. T.* (1832). To Bishop Ellicott also belongs the credit of having spoken at once boldly and wisely on this matter. Dr. Trench (*On the A. V. of the N. T.*, 1858), in like manner, states his conviction that "a revision ought to come," though as yet, he thinks, "the Greek and the English necessary to bring it to a successful issue are alike wanting." The *Revision of the A. V. by Five Clergymen* (Dr. Barrow, Dr. Moberly, Dean Alford, Mr. Humphry, and Dr. Ellicott), represents the same school of conservative progress. As yet, this series includes only the Gospel of St. John, and the Epistles to the Romans and Corinthians. The publications of the American Bible Union are signs that there also the same want has been felt. Mr. Sharpe (1840) and Mr. Highton (1862) have ventured on the wider work of translations of the entire N. T. Mr. Cookesley has published the Gospel of St. Matthew as Part I. of a like undertaking.—XII. PRESENT STATE OF THE QUESTION.—(1.) A few remarks on the chief questions which must necessarily come

before those who undertake a revision will not, perhaps, be out of place. (2.) The translation of the N. T. is from a Text confessedly imperfect. What edition was used is a matter of conjecture; most probably, one of those published with a Latin version by Beza between 1565 and 1598, and agreeing substantially with the *Textus receptus* of 1633. It is clear, on principle, that no revision ought to ignore the results of the textual criticism of the last hundred years. (3.) Still less had been done at the commencement of the 17th century for the text of the O. T. The Jewish teachers, from whom Protestant divines derived their knowledge, had given currency to the belief that in the Masoretic text were contained the *ipsissima verba* of Revelation, free from all risks of error, from all casualties of transcription. The materials for a revised text are, of course, scantier than with the N. T. (4.) All scholars worthy of the name are now agreed that as little change as possible should be made in the language of the A. V. (5.) The self-imposed law of fairness which led the A. V. translators to admit as many English words as possible to the honour of representing one in the Hebrew or Greek text has, as might be expected, marred the perfection of their work. Side by side with this fault, there is another just the opposite to it. One English word appears for several Greek or Hebrew words, and thus shades of meaning, often of importance to the right understanding of a passage, are lost sight of. (6.) Grammatical inaccuracy must be noted as a defect pervading, more or less, the whole extent of the present version of the N. T. (7.) The field of the O. T. has been far less adequately worked than that of the N. T., and Hebrew scholarship has made far less progress than Greek. (8.) The division into chapters and verses is a matter that ought not to be passed over in any future revision. (9.) Other points of detail remain to be noticed briefly: (1) The chapter headings of the A. V. often go beyond their proper province. What should be a meagre table of contents becomes a gloss upon the text. (2) The use of italics in printing the A. V. is at least open to some risks. At first they seem an honest confession on the part of the translators of what is or is not in the original. On the other hand, they tempt to a loose translation. (3) Good as the principle of marginal references is, they need, accordingly, a careful sifting. (4) Marginal readings, on the other hand, indicating variations in the text, or differences in the judgment of translators, might be profitably increased in number. (10.) What has been said will serve to show at once to what extent a new revision is required, and what are the chief difficulties to be encountered.

Villages. It is evident that *châtser*, "a village," lit. an enclosure, a collection of huts, is often used, especially in the enumeration of towns in Josh. xiii., xv., xix., to imply unwall'd suburbs outside the walled towns. And so it appears to mean when we compare Lev. xxv. 31 with v. 34. *Myrash*, A. V. "suburbs," i. e. a place thrust out from the city (see also Gen. xli. 48). Arab villages, as found in Arabia, are often mere collections of stone huts, "long, low, rude hovels, roofed only with the stalks of palm-leaves," or covered for a time with tent-cloths, which are removed when the tribe change their quarters. Others are more solidly built, as are most of the modern villages of Palestine, though in some the dwellings are mere mud-huts. There is little in the O. T. to enable us more precisely to define a village of Palestine,

beyond the fact that it was destitute of walls or external defences. Persian villages are spoken of in similar terms (Ex. xxxviii. 11: Esth. ix. 19). By the Talmudists a village was defined as a place destitute of a synagogue. The places to which in the O. T. the term *châtser* is applied were mostly in the outskirts of the city. The relation of dependence on a chief town of a district appears to be denoted by the phrase "villages of Caesarea Philippi" (Mark viii. 27).

Vine. The well-known valuable plant (*Vitis vinifera*), very frequently referred to in the Old and New Testaments, and cultivated from the earliest times. The first mention of this plant occurs in Gen. ix. 20, 21. The Egyptians say that Osiris first taught men the use of the vine. That it was abundantly cultivated in Egypt is evident from the frequent representations on the monuments, as well as from the Scriptural allusions (Gen. xl. 9-11; Ps. lxxviii. 47). The vines of Palestine were celebrated both for luxuriant growth and for the immense clusters of grapes which they produced. When the spies were sent forth to view the promised land, we are told that on their arrival at the valley of Eshcol they cut down a branch with one cluster of grapes, and bore it between two on a staff (Num. xiii. 23). Travellers have frequently testified to the large size of the grape-clusters of Palestine. Schulz speaks of supping at Beitsin, a village near Ptolemais, under a vine whose stem was about a foot and a half in diameter, and whose height was about thirty feet, which by its branches formed a hut upwards of thirty feet broad and long. "The clusters of these extraordinary vines," he adds, "are so large that they weigh ten or twelve pounds, and the berries may be compared with our small plums." Especial mention is made in the Bible of the vines of Eshcol (Num. xiii. 24, xxxiii. 9), of Sibmah, Heshbon, and Elealeh (Is. xvi. 8, 9, 10; Jer. xlviii. 32), and Engedi (Cant. i. 14). From the abundance and excellence of the vines, it may readily be understood how frequently this plant is the subject of metaphor in the Holy Scriptures. To dwell under the vine and fig-tree is an emblem of domestic happiness and peace (1 K. iv. 25; Mic. iv. 4; Ps. cxxviii. 3); the rebellious people of Israel are compared to "wild grapes," "an empty vine," "the degenerate plant of a strange vine," &c. (Is. v. 2, 4, but see COCKLE; Hos. x. 1; Jer. ii. 21). It is a vine which our Lord selects to show the spiritual union which subsists between Himself and his members (John xv. 1-6). The ancient Hebrews probably allowed the vine to grow trailing on the ground, or upon supports. This latter mode of cultivation appears to be alluded to by Ezekiel (xix. 11, 12). The vintage (*bâtser*), which formerly was a season of general festivity, commenced in September. The towns are deserted, and the people live among the vineyards in the lodges and tents (comp. Judg. ix. 27; Jer. xxv. 30; Is. xvi. 10). The grapes were gathered with shouts of joy by the "grape-gatherers" (Jer. xxv. 30), and put into baskets (see Jer. vi. 9). They were then carried on the head and shoulders, or slung upon a yoke, to the "wine-press." Those intended for eating were perhaps put into flat open baskets of wickerwork, as was the custom in Egypt. In Palestine at present the finest grapes, says Dr. Robinson, are dried as raisins (*tsimmuk*), and the juice of the remainder, after having been trodden

and pressed, "is boiled down to a syrup which, under the name of *dibs*, is much used by all classes, wherever vineyards are found, as a condiment with their food." The vineyard, which was generally on a hill (Is. v. 1; Jer. xxxi. 5; Amos ix. 13), was surrounded by a wall or hedge in order to keep out the wild boars (Ps. lxxx. 13), jackals, and foxes (Num. xxii. 24; Cant. ii. 15; Neh. iv. 3; Ez. xiii. 4, 5; Matt. xxi. 33). Within the vineyard was one or more towers of stone in which the vine-dressers (*côvânîm*) lived (Is. i. 8, v. 2; Matt. xxi. 33). The press (*gath*), and vat (*yekeb*), which was dug (Matt. xxi. 33) or hewn out of the rocky soil, were part of the vineyard furniture (Is. v. 2).

Vine of Sodom occurs only in Deut. xxii. 32. It is generally supposed that this passage alludes to the celebrated apples of Sodom, of which Josephus speaks, "which indeed resemble edible fruit in colour, but, on being plucked by the hand, are dissolved into smoke and ashes." Some travellers, as Maundrell, regard the whole story as a fiction. Pococke supposed the apples of Sodom to be pomegranates. Hasselquist seeks to identify them with the egg-shaped fruit of the *Solanum melongena* when attacked by some species of *tenthredo*, which converts the whole of the inside into dust, while the rind remains entire and keeps its colour. Seetzen thought he had discovered the apples of Sodom in the fruit of a kind of cotton-tree which grew in the plain of El Ghor, and was known by the name of *Abšchar*. Dr. Robinson instantly pronounced in favour of the 'ôsher fruit being the apples of Sodom. He identifies it with the *Asclepius* (*Culotropis*) *procera* of botanists. Mr. Walter Elliot, in an article "on the *Poma Sodomitica*, or Dead-Sea apples," endeavours to show that the apples in question are oak-galls, "which he found growing plentifully on dwarf oaks (*Quercus infectoria*) in the country beyond the Jordan. Dr. Hooker writes, "The Vine of Sodom I always thought might refer to *Cucumis colocynthis*, which is bitter and powdery inside; the term *vine* would scarcely be given to any but a trailing or other plant of the habit of a vine." His remark that the term *vine* must refer to some plant of the habit of a vine, is conclusive against the claims of all the plants hitherto identified with the Vine of Sodom.

Vinegar. The Hebrew term *chônets* was applied to a beverage consisting generally of wine or strong drink turned sour, but sometimes artificially made by an admixture of barley and wine, and thus liable to fermentation. It was acid even to a proverb (Prov. x. 26), and by itself formed a nauseous draught (Ps. lxxix. 21), but was used by labourers (Ruth ii. 14). Similar to the *chônets* of the Hebrews was the *acetum* of the Romans—a thin, sour wine, consumed by soldiers. This was the beverage of which the Saviour partook in His dying moments (Matt. xxvii. 48; Mark xv. 36; John xix. 29, 30).

Vineyards, Plain of the. This place, mentioned only in Judg. xi. 33, has been already noticed under ABEL (5). The writer has only to call attention to the fact that a ruin bearing the name of *Beit el Kerm* ("house of the vine") was encountered by De Sauley to the north of *Kerak*. This may be the *Abel ceramin* of Jephthah, if the Ayoer named in the same passage is the place of that name on the Arnon (*W. Mojob*). It is however by no means certain.

Viol. For an explanation of the Hebrew word translated "viol," see PSALTERY. The old English viol, like the Spanish *vignola*, was a six-stringed guitar. Etymologically, *viol* is connected with the Dan. *Viol* and the A. S. *fíele*, through the Fr. *vielle*, Old Fr. *vielle*, Med. Lat. *stella*.

Viper. [SERPENT.]

Voph'si, father of Nahbi, the Naphtalite spy (Num. xiii. 14).

Vows. The practice of making vows is of extremely ancient date, and common in all systems of religion. The earliest mention of a vow is that of Jacob (Gen. xxviii. 18-22, xxxi. 13). Vows in general are also mentioned in the Book of Job (xxii. 27). The Law therefore did not introduce, but regulated the practice of vows. Three sorts are mentioned:—I. Vows of devotion, *Neder*; II. Vows of abstinence, *Esar* or *Isar*; III. Vows of destruction, *Cherem*. I. As to vows of devotion, the following rules are laid down:—A man might devote to sacred uses possessions or persons, but not the firstborn either of man or beast, which was devoted already (Lev. xxvii. 26). a. If he vowed land, he might either redeem it or not. If he intended to redeem, two points were to be considered: 1. the rate of redemption (Lev. xxvii.); 2. the distance, prospectively and retrospectively, from the year of jubilee. The purchaser of land, in case he devoted and also wished to redeem it, was required to pay a redemption-price according to the priestly valuation, but without the additional fifth. The owner who wished to redeem would thus be required to pay either an annual rent or a redemption-price answering to the number of years short of the jubilee, but deducting Sabbatical years (Lev. xxv. 3, 15, 16), and adding a fifth, or 20 per cent.

either case. If he refused or was unable to redeem, either the next of kin came forward, as he had liberty to do, or, if no redemption was effected, the land became the property of the priests (Lev. xxv. 25, xxvii. 21; Ruth iii. 12, iv. 1, &c.). In the case of a house devoted, its value was to be assessed by the priest, and a fifth added to the redemption-price in case it was redeemed (Lev. xxvii. 15). b. Animals fit for sacrifice, if devoted, were not to be redeemed or changed; and if a man attempted to do so, he was required to bring both the devotee and the changeling (Lev. xxvii. 9, 10, 33). c. The case of persons devoted stood thus:—A man might devote either himself, his child (not the first-born), or his slave. If no redemption took place, the devoted person became a slave of the sanctuary: see the case of Abshalom (2 Sam. xv. 8). Otherwise he might be redeemed at a valuation according to age and sex, on the scale given in Lev. xxvii. 1-7. Among general regulations affecting vows, the following may be mentioned:—I. Vows were entirely voluntary, but once made were regarded as compulsory (Num. xxx. 2; Deut. xxiii. 21; Eccl. v. 4). 2. If persons in a dependent condition made vows, as (a) an unmarried daughter living in her father's house, or (b) a wife, even if she afterwards became a widow, the vow, if (a) in the first case her father, or (b) in the second, her husband heard and disallowed it, was void; but if they heard without disallowance, it was to remain good (Num. xxx. 3-16). 3. Votive offerings arising from the produce of any impure traffic were wholly forbidden (Deut. xxiii. 18).—II., III. For vows of abstinence, see CORBAN; and for vows of extermination, ANATHEMA, and Ezr. x. 8; Mic. iv. 13. It seems that

the practice of shaving the head at the expiration of a votive period was not limited to the Nazaritic vow (Acts xviii. 18, xxi. 24). The practice of vows in the Christian Church, though evidently not forbidden, as the instance just quoted serves to show, does not come within the scope of the present article (see Bingham, *Antiq.* xvi. 7, 9; and Suicer, *ebxi*).

Vulgate, the. (LATIN VERSIONS OF THE BIBLE.) The influence which the Latin Versions of the Bible have exercised upon Western Christianity is scarcely less than that of the LXX. upon the Greek Churches. But both the Greek and the Latin Vulgates have been long neglected. Yet the Vulgate should have a very deep interest for all the Western Churches. For many centuries it was the only Bible generally used; and, directly or indirectly, it is the real parent of all the vernacular versions of Western Europe. The Gothic Version of Ulfilas alone is independent of it. In the age of the Reformation the Vulgate was rather the guide than the source of the popular versions. That of Luther (N. T. in 1523) was the most important, and in this the Vulgate had great weight. From Luther the influence of the Latin passed to our own Authorised Version. But the claims of the Vulgate to the attention of scholars rest on wider grounds. It is not only the source of our current theological terminology, but it is, in one shape or other, the most important early witness to the text and interpretation of the whole Bible.—I. THE ORIGIN AND HISTORY OF THE NAME VULGATE.—The name *Vulgate*, which is equivalent to *Vulgata editio* (the current text of Holy Scripture), has necessarily been used differently in various ages of the Church. There can be no doubt that the phrase originally answered to the *κοινή έκδοσις* of the Greek Scriptures. In this sense it is used constantly by Jerome in his Commentaries. In some places Jerome distinctly quotes the Greek text; but generally he regards the Old Latin, which was rendered from the LXX., as substantially identical with it, and thus introduces Latin quotations under the name of the LXX. or *Vulgata editio*. In this way the transference of the name from the current Greek text to the current Latin text became easy and natural. Yet more: as the phrase *κοινή έκδοσις* came to signify an uncorrected (and so corrupt) text, the same secondary meaning was attached to *vulgata editio*. Thus in some places the *vulgata editio* stands in contrast with the true Hexaplaric text of the LXX. This use of the phrase *Vulgata editio* to describe the LXX. (and the Latin Version of the LXX.) was continued to later times. As a general rule, the Latin Fathers speak of Jerome's Version as "our" Version (*nostra editio, nostri codices*).—II. THE OLD LATIN VERSIONS.—The history of the earliest Latin Version of the Bible is lost in complete obscurity. All that can be affirmed with certainty is that it was made in Africa. During the first two centuries the Church of Rome was essentially Greek. The same remark holds true of Gaul; but the Church of N. Africa seems to have been Latin-speaking from the first. At what date this Church was founded is uncertain. It is from Tertullian that we must seek the earliest testimony to the existence and character of the *Old Latin* (*Vetus Latina*). On the first point the evidence of TERTULLIAN, if cautiously examined, is decisive. He distinctly recognises the general currency of a Latin Version of the N. T., though not

necessarily of every book at present included in the Canon. This was characterised by a "rudeness" and "simplicity" which seems to point to the nature of its origin. The version of the N. T. appears to have arisen from individual and successive efforts; but it does not follow by any means that numerous versions were simultaneously circulated, or that the several parts of the version were made independently. Even if it had been so, the exigencies of the public service must soon have given definiteness and substantial unity to the fragmentary labours of individuals. The work of private hands would necessarily be subject to revision for ecclesiastical use. The separate books would be united in a volume; and thus a standard text of the whole collection would be established. With regard to the O. T. the case is less clear. It is probable that the Jews who were settled in N. Africa were confined to the Greek towns; otherwise it might be supposed that the Latin Version of the O. T. is in part anterior to the Christian era, and that (as in the case of Greek) a preparation for a Christian Latin dialect was already made when the Gospel was introduced into Africa. However this may have been, the substantial similarity of the different parts of the Old and New Testaments establishes a real connexion between them, and justifies the belief that there was one popular Latin Version of the Bible current in Africa in the last quarter of the second century. The exact literalness of the Old Version was not confined to the most minute observance of order and the accurate reflection of the words of the original: in many cases the very forms of Greek construction were retained in violation of Latin usage. With regard to the African Canon of the N. T. the old Version offers important evidence. From considerations of style and language it seems certain that the Epistle to the Hebrews, James, and 2 Peter, did not form part of the original African Version. In the O. T., on the other hand, the Old Latin erred by excess and not by defect. After the translation once received a definite shape in Africa, which could not have been long after the middle of the second century, it was not publicly revised. The old text was jealously guarded by ecclesiastical use, and was retained there at a time when Jerome's version was elsewhere almost universally received. In the O. T. the version was made from the unrevised edition of the LXX. But while the earliest Latin Version was preserved generally unchanged in N. Africa, it varied differently in Italy. There the provincial rudeness of the version was necessarily more offensive. In the fourth century a definite ecclesiastical recension (of the Gospels at least) appears to have been made in N. Italy by reference to the Greek, which was distinguished by the name of *Itala*. The *Itala* appears to have been made in some degree with authority: other revisions were made for private use, in which such changes were introduced as suited the taste of scribe or critic. The next stage in the deterioration of the text was the intermixture of these various revisions.—III. THE LABOURS OF JEROME.—At the close of the 4th century the Latin texts of the Bible current in the Western Church had fallen into the greatest corruption. The evil was yet greater in prospect than at the time; for the separation of the East and West was growing imminent. But in the crisis of danger the great scholar was raised up who

probably alone for 1500 years possessed the qualifications necessary for producing an original version of the Scriptures for the use of the Latin Churches. Jerome—Eusebius Hieronymus—was born in 32 A.D. at Stridon in Dalmatia, and died at Bethlehem in 420 A.D. After long and self-denying studies in the East and West, Jerome went to Rome A.D. 382 probably at the request of Damasus the Pope, to assist in an important synod. His active biblical labours date from this epoch, and in examining them it will be convenient to follow the order of time, noticing (1) the Revision of the Old Latin Version of the N. T.; (2) the Revision of the Old Latin Version (from the Greek) of the O. T.; (3) the New Version of the O. T. from the Hebrew. (1.) *The Revision of the Old Latin Version of the N. T.*—Jerome had not been long at Rome (A.D. 383) when Damasus consulted him on points of Scriptural criticism. Apparently in the same year he applied to Jerome for a revision of the current Latin version of the N. T. by the help of the Greek original, Jerome was fully sensible of the prejudices which such a work would excite among those “who thought that ignorance was holiness” (*Ep. ad Marc. xvii.*), but the need of it was urgent. “There were,” he says, “almost as many forms of text as copies.” The Gospels had naturally suffered most. Jerome therefore applied himself to these first. But his aim was to revise the Old Latin, and not to make a new version. Yet although he proposed to himself this limited object, the various forms of corruption which had been introduced were, as he describes, so numerous that the difference of the Old and Revised (Hieronymian) text is throughout clear and striking. Some of the changes which Jerome introduced were made purely on linguistic grounds but it is impossible to ascertain on what principle he proceeded in this respect. Others involved questions of interpretation. But the greater number consisted in the removal of the interpolations by which the synoptic Gospels especially were disfigured. The preface to Damasus speaks only of a revision of the Gospels, and a question has been raised whether Jerome really revised the remaining books of the N. T. But the omission is probably due to the comparatively pure state in which the text of the rest of the N. T. was preserved. An examination of the Vulgate text, with the quotations of ante-Hieronymian fathers and the imperfect evidence of MSS., is itself sufficient to establish the reality and character of the revision. This will be apparent from a collation of a few chapters taken from several of the later books of the N. T.; but it will also be obvious that the revision was hasty and imperfect. (2.) *The Revision of the O. T. from the LXX.*—About the same time (cir. A.D. 383) at which he was engaged on the revision of the N. T., Jerome undertook also a first revision of the Psalter. This he made by the help of the Greek, but the work was not very complete or careful. This revision obtained the name of the *Roman Psalter*, probably because it was made for the use of the Roman Church at the request of Damasus. In a short time “the old error prevailed over the new correction,” and at the urgent request of Paula and Eustochium Jerome commenced a new and more thorough revision (*Gallican Psalter*). The exact date at which this was made is not known, but it may be fixed with great probability very shortly

CON. D. B.

after A.D. 387, when he retired to Bethlehem, and certainly before 391, when he had begun his new translations from the Hebrew. In the new revision Jerome attempted to represent as far as possible, by the help of the Greek versions, the real reading of the Hebrew. This new edition soon obtained a wide popularity. Gregory of Tours is said to have introduced it from Rome into the public services in France, and from this it obtained the name of the *Gallican Psalter*. Numerous MSS. remain which contain the Latin Psalter in two or more forms. From the second (*Gallican*) revision of the Psalms Jerome appears to have proceeded to a revision of the other books of the O. T., restoring all, by the help of the Greek, to a general conformity with the Hebrew. The revised texts of the Psalter and Job have alone been preserved; but there is no reason to doubt that Jerome carried out his design of revising all the “Canonical Scriptures.” He speaks of this work as a whole in several places, and distinctly represents it as a Latin version of Origen’s Hexaplar text, if, indeed, the reference is not to be confined to the Psalter, which was the immediate subject of discussion. But though it seems certain that the revision was made, there is very great difficulty in tracing its history. (3.) *The Translation of the O. T. from the Hebrew.*—Jerome commenced the study of Hebrew when he was already advanced in middle life (cir. A.D. 374). His first teacher had been a Jewish convert; but afterwards he did not scruple to seek the instruction of Jews, whose services he secured with great difficulty and expense. In some of his earliest critical letters he examines the force of Hebrew words; and in A.D. 384, he had been engaged for some time in comparing the version of Aquila with Hebrew MSS., which a Jew had succeeded in obtaining for him from the synagogue. After retiring to Bethlehem, he appears to have devoted himself with renewed ardour to the study of Hebrew, and he published several works on the subject (cir. A.D. 389). These essays served as a prelude to his New Version, which he now commenced. This version was not undertaken with any ecclesiastical sanction, as the revision of the Gospels was, but at the urgent request of private friends, or from his own sense of the imperious necessity of the work. Its history is told in the main in the Prefaces to the several instalments which were successively published. The *Books of Samuel and Kings* were issued first, and to these he prefixed the famous *Prologus galatensis*, addressed to Paula and Eustochium, in which he gives an account of the Hebrew Canon. At the time when this was published (cir. A.D. 391, 392) other books seem to have been already translated; and in 393 the sixteen prophets were in circulation, and Job had lately been put into the hands of his most intimate friends. Indeed, it would appear that already in 392 he had in some sense completed a version of the O. T.; but many books were not completed and published till some years afterwards. The next books which he put into circulation, yet with the provision that they should be confined to friends, were Ezra and Nehemiah, which he translated at the request of Dominica and Rogatianus, who had urged him to the task for three years. This was probably in the year 394, for in the preface he alludes to his intention of discussing a question which he treats in *Ep. lvii.*, written in 95. In the Preface to the *Chronicles*, he alludes the same Epistle as “lately written,” and these

books may therefore be set down to that year. The three Books of Solomon followed in 398, having been "the work of three days" when he had just recovered from a severe illness, which he suffered in that year. The *Osteteuch* now alone remained (i.e. Pentateuch, Joshua, Judges and Ruth, and Esther). Of this the Pentateuch was published first, but it is uncertain in what year. The Preface, however, is not quoted in the Apology against Rufinus (A.D. 400), as those of all the other books which were then published, and it may therefore be set down to a later date. The remaining books were completed at the request of Eusebius, shortly after the death of Paula, A.D. 404. Thus the whole translation was spread over a period of about fourteen years, from the sixtieth to the seventy-sixth year of Jerome's life. But still parts of it were finished in great haste (e.g. the Books of Solomon). A single day was sufficient for the translation of Tobit; and "one short effort" for the translation of Judith. — IV. THE HISTORY OF JEROME'S TRANSLATION TO THE INVENTION OF PRINTING. — The critical labours of Jerome were received, as such labours always are received by the multitude, with a loud outcry of reproach. He was accused of disturbing the repose of the Church, and shaking the foundations of faith. Acknowledged errors, as he complains, were looked upon as halloved by ancient usage; and few had the wisdom or candour to acknowledge the importance of seeking for the purest possible text of Holy Scripture. Even Augustine was carried away by the popular prejudice, and endeavoured to discourage Jerome from the task of a new translation, which seemed to him to be dangerous and almost profane. Jerome, indeed, did little to smooth the way for the reception of his work. In such cases time is the great reformer. Clamour based upon ignorance soon dies away; and the New translation gradually came into use equally with the Old, and at length supplanted it. In the 5th century it was adopted in Gaul by Eucherius of Lyons, Vincent of Lerins, Sedulius and Claudianus Mamertus; but the Old Latin was still retained in Africa and Britain. In the 6th century the use of Jerome's Version was universal among scholars except in Africa, where the other still lingered; and at the close of it Gregory the Great, while commenting on Jerome's Version, acknowledged that it was admitted equally with the Old by the Apostolic See. But the Old Version was not authoritatively displaced, though the custom of the Roman Church prevailed also in the other churches of the West. In the 7th century the traces of the Old Version grow rare. In the 8th century Bede speaks of Jerome's Version as "our edition;" and from this time it is needless to trace its history, though the Old Latin was not wholly forgotten. Yet throughout, the New Version made its way without any direct ecclesiastical authority. It was adopted in the different Churches gradually, or at least without any formal command. But the Latin Bible which thus passed gradually into use under the name of Jerome was a strangely composite work. The books of the O. T., with one exception, were certainly taken from his Version from the Hebrew; but this had not only been variously corrupted, but was itself in many particulars (especially in the Pentateuch) at variance with his later judgment. Long use, however, made it impossible to substitute his Psalter from the Hebrew for the Gallican Psalter; and thus this

book was retained from the Old Version, as Jerome had corrected it from the LXX. Of the Apocryphal books Jerome hastily revised or translated two only, Judith and Tobit. The remainder were retained from the Old Version against his judgment; and the Apocryphal additions to Daniel and Esther, which he had carefully marked as apocryphal in his own Version, were treated as integral parts of the books. In the N. T. the only important addition which was frequently interpolated was the apocryphal Epistle to the Laodiceans. The text of the Gospels was in the main Jerome's revised edition; that of the remaining books his very incomplete revision of the Old Latin. Thus the present Vulgate contains elements which belong to every period and form of the Latin Version — (1.) *Unrevised Old Latin*: Wisdom, Ecclesi., 1, 2 Macc., Baruch. (2.) *Old Latin revised from the LXX*: Psalter. (3.) *Jerome's free translation from the original text*: Judith, Tobit. (4.) *Jerome's translation from the Original*: O. T. except Psalter. (5.) *Old Latin revised from MSS.*: Gospels. (6.) *Old Latin cursorily revised*: the remainder of N. T. — *The Revision of Alcuin*. Meanwhile the text of the different parts of the Latin Bible was rapidly deteriorating. The simultaneous use of the Old and New Versions necessarily led to great corruptions of both texts. Mixed texts were formed according to the taste or judgment of scribes, and the confusion was further increased by the changes which were sometimes introduced by those who had some knowledge of Greek. From this cause scarcely any Anglo-Saxon Vulgate MS. of the 8th or 9th centuries which the writer has examined is wholly free from an admixture of old readings. As early as the 6th century, Cassiodorus attempted a partial revision of the text (Psalter, Prophets, Epistles) by a collation of old MSS. But private labour was unable to check the growing corruption; and in the 8th century this had arrived at such a height, that it attracted the attention of Charlemagne. Charlemagne at once sought a remedy, and intrusted to Alcuin (cir. A.D. 802) the task of revising the Latin text for public use. This Alcuin appears to have done simply by the use of MSS. of the Vulgate, and not by reference to the original texts. Alcuin's revision probably contributed much towards preserving a good Vulgate text. The best MSS. of his recension do not differ widely from the pure Hieronymian text, and his authority must have done much to check the spread of the interpolations which reappear afterwards, and which were derived from the intermixture of the Old and New Versions. But the new revision was gradually deformed, though later attempts at correction were made by Lanfranc of Canterbury (A.D. 1089), Card. Nicolaus (A.D. 1150), and the Cistercian Abbot Stephanus (cir. A.D. 1150). In the 13th century *Correctoria* were drawn up, especially in France, in which varieties of reading were discussed. Little more was done for the text of the Vulgate till the invention of printing; and the name of Laurentius Valla (cir. 1450) alone deserves mention, as of one who devoted the highest powers to the criticism of Holy Scripture, at a time when such studies were little esteemed. — V. THE HISTORY OF THE PRINTED TEXT. — It was a noble omen for the future progress of printing that the first book which issued from the press was the Bible; and the splendid pages of the Mazarin Vulgate (Mains, Gutenberg and Fust) stand yet unsurpassed

by the latest efforts of typography. This work is referred to about the year 1455, and presents the common text of the 15th century. Other editions followed in rapid succession. The first collection of various readings appears in a Paris edition of 1504, and others followed at Venice and Lyons in 1511, 1513; but Cardinal Ximenes (1502-1517) was the first who seriously revised the Latin text, to which he assigned the middle place of honour in his Polyglott between the Hebrew and Greek texts. This was followed in 1528 (2nd edition 1532) by an edition of R. Stephens. About the same time various attempts were made to correct the Latin from the original texts (Erasmus, 1516; Pagninus, 1518-28; Card. Cajetanus; Steuchius, 1529; Clarus, 1542), or even to make a new Latin version (Jo. Campensis, 1533). A more important edition of R. Stephens followed in 1540, in which he made use of twenty MSS. and introduced considerable alterations into his former text. In 1541 another edition was published by Jo. Benedictus at Paris, which was based on the collation of MSS. and editions, and was often reprinted afterwards. Verellone speaks much more highly of the *Biblia Ordinaria*, with glosses, &c., published at Lyons, 1545, as giving readings in accordance with the oldest MSS., though the sources from which they are derived are not given. — *The Sixtine and Clementine Vulgates*. The first session of the Council of Trent was held on Dec. 13th, 1545. After some preliminary arrangements the Nicene Creed was formally promulgated as the foundation of the Christian faith on Feb. 4th, 1546, and then the Council proceeded to the question of the authority, text, and interpretation of Holy Scripture. A committee was appointed to report upon the subject, which held private meetings from Feb. 20th to March 17th. Considerable varieties of opinion existed as to the relative value of the original and Latin texts, and the final decree was intended to serve as a compromise. In affirming the authority of the 'Old Vulgate' it contains no estimate of the value of the original texts. The question decided is simply the relative merits of the current Latin versions. In spite, however, of the comparative caution of the decree, and the interpretation which was affixed to it by the highest authorities, it was received with little favour, and the want of a standard text of the Vulgate practically left the question as unsettled as before. The theologians of Belgium did something to meet the want. In 1547 the first edition of Hentenius appeared at Louvain, which had very considerable influence upon later copies. It was based upon the collation of Latin MSS. and the Stephanic edition of 1540. In the Antwerp Polyglott of 1568-72 the Vulgate was borrowed from the Complutensian; but in the Antwerp edition of the Vulgate of 1573-4 the text of Hentenius was adopted with copious additions of readings by Lucas Brugensis. This last was designed as the preparation and temporary substitute for the Papal edition: indeed it may be questioned whether it was not put forth as the "correct edition required by the Tridentine decree." But a Papal board was already engaged, however desultorily, upon the work of revision. In 1561 Paulus Manutius (son of Aldus Manutius) was invited to Rome to superintend the printing of Latin and Greek Bibles. During that year and the next several scholars (with Sirletus at their head) were engaged in the revision of the text. In the pontificate of

Pius V. the work was continued, and Sirletus still took a chief part in it (1569, 1570), but it was currently reported that the difficulties of publishing an authoritative edition were insuperable. Nothing further was done towards the revision of the Vulgate under Gregory XIII., but preparations were made for an edition of the LXX. This appeared in 1587, in the second year of the pontificate of Sixtus V., who had been one of the chief promoters of the work. After the publication of the LXX., Sixtus immediately devoted himself to the production of an edition of the Vulgate. He himself revised the text, and when the work was purified he examined the sheets with the utmost care, and corrected the errors with his own hand. The edition appeared in 1590, with the famous constitution *Actornus ille* (dated March 1st, 1589) prefixed, in which Sixtus affirmed with characteristic decision the plenary authority of the edition for all future time. He further forbade expressly the publication of various readings in copies of the Vulgate. It was also enacted that the new revision should be introduced into all missals and service-books; and the greater excommunication was threatened against all who in any way contravened the constitution. During the brief pontificate of Urban VII. nothing could be done; but the reaction was not long delayed. On the accession of Gregory XIV. some went so far as to propose that the edition of Sixtus should be absolutely prohibited; but Bellarmine suggested a middle course. He proposed that the erroneous alterations of the text which had been made in it "should be corrected with all possible speed and the Bible reprinted under the name of Sixtus, with a prefatory note to the effect that errors had crept into the former edition by the carelessness of the printers." This pious fraud, or rather daring falsehood, for it can be called by no other name, found favour with those in power. A commission was appointed to revise the Sixtine text, under the presidency of the Cardinal Colonna (Columna). At first the commissioners made but slow progress, and it seemed likely that a year would elapse before the revision was completed. The mode of proceeding was therefore changed, and the commission moved to Zagorolo, the country-seat of Colonna; and, if we may believe the inscription which still commemorates the event, and the current report of the time, the work was completed in nineteen days. The task was hardly finished when Gregory died (Oct. 1591), and the publication of the revised text was again delayed. His successor, Innocent IX., died within the same year, and at the beginning of 1592 Clement VIII. was raised to the papedom. Clement intrusted the final revision of the text to Toletus, and the whole was printed by Aldus Manutius (the grandson) before the end of 1592. The Preface, which is moulded upon that of Sixtus, was written by Bellarmine, and is favourably distinguished from that of Sixtus by its temperance and even modesty. The respective merits of the Sixtine and Clementine editions have been often debated. In point of mechanical accuracy, the Sixtine seems to be clearly superior. The collections lately published by Verellone place in the clearest light the strange and uncritical mode in which Sixtus dealt with the evidence and results submitted to him. The recommendations of the Sixtine correctors are marked by singular wisdom and critical tact, and in almost every case where Sixtus departs from them he is in error. The Gre-

gorian correctors (whose results are given in the Clementine edition), in the main simply restored readings adopted by the Sixtine board and rejected by Sixtus. In point of fact the Clementine edition errs by excess of caution. While the Clementine edition was still recent some thoughts seem to have been entertained of revising it. Lucas Brugensis made important collections for this purpose, but the practical difficulties were found to be too great, and the study of various readings was reserved for scholars. In the next generation use and controversy gave a sanctity to the authorised text. At length, however, in 1706, Martianay published a new, and in the main better text, chiefly from original MSS., in his edition of Jerome. Vallarsi added fresh collations in his revised issue of Martianay's work, but in both cases the collations are imperfect, and it is impossible to determine with accuracy on what MS. authority the text which is given depends. Sabatier, though professing only to deal with the Old Latin, published important materials for the criticism of Jerome's Version, and gave at length the readings of Lucas Brugensis (1743). More than a century elapsed before anything more of importance was done for the text of the Latin version of the O. T., when at length the fortunate discovery of the original revision of the Sixtine correctors again directed the attention of Roman scholars to their authorised text. The first-fruits of their labours are given in the volume of Vercellone already often quoted, which has thrown more light upon the history and criticism of the Vulgate than any previous work. The neglect of the Latin text of the O. T. is but a consequence of the general neglect of the criticism of the Hebrew text. In the N. T. far more has been done for the correction of the Vulgate, though even here no critical edition has yet been published.—VI. THE CRITICAL VALUE OF THE LATIN VERSIONS.—In estimating the critical value of Jerome's labours, it is necessary to draw a distinction between his different works. His mode of proceeding was by no means uniform; and the importance of his judgment varies with the object at which he aimed. The three versions of the Psalter represent completely the three different methods which he followed. At first he was contented with a popular revision of the current text (the *Roman* Psalter); then he instituted an accurate comparison between the current text and the original (the *Gallican* Psalter); and in the next place he translated independently, giving a direct version of the original (the *Hebrew* Psalter). These three methods follow one another in chronological order, and answer to the wider views which Jerome gradually gained of the functions of a biblical scholar. The revision of the N. T. belongs unfortunately to the first period. When it was made, his aim was little more than to remove obvious interpolations and blunders; and in doing this he likewise introduced some changes of expression which softened the roughness of the old version, and some which seemed to be required for the true expression of the sense. Jerome's revision of the Gospels was far more complete than that of the remaining parts of the N. T. It is, indeed, impossible, except in the Gospels, to determine any substantial difference in the Greek texts which are represented by the Old and Hieronymian Versions.—VII. THE LANGUAGE OF THE LATIN VERSION. Generally it is necessary to distin-

guish two distinct elements both in the Latin Version and in subsequent writings: (1) Provincialisms and (2) Graecisms. The former are chiefly of interest as illustrating the history of the Latin language; the latter as marking, in some degree, its power of expansion. (1.) *Provincialisms*. One of the most interesting facts in regard to the language of the Latin Version is the reappearance in it of early forms which are found in Plautus or noted as archaisms by grammarians. These establish in a signal manner the vitality of the popular as distinguished from the literary idiom, and, from the great scarcity of memorials of the Italian dialects, possess a peculiar value. In addition to these there are many other peculiarities which evidently belong to the African (or common) dialect, and not merely to the Christian form of it. Among the characteristics of the late stage of a language must be reckoned the excessive frequency of compounds, especially formed with the prepositions. (2.) *Graecisms*. The "simplicity" of the Old Version necessarily led to the introduction of very numerous Septuagintal or N. T. forms, many of which have now passed into common use. Generally it may be observed that the Vulgate Latin bears traces of a threefold influence derived from the original text; and the modifications of form which are capable of being carried back to this source, occur yet more largely in modern languages, whether in this case they are to be referred to the plastic power of the Vulgate on the popular dialect, or, as is more likely, we must suppose that the Vulgate has preserved a distinct record of powers which were widely working in the times of the Empire on the common Latin. These peculiarities are found in greater or less frequency throughout the Vulgate. It is natural that they should be most abundant and striking in the parts which have been preserved least changed from the Old Latin, the Apocrypha, the Acts, Epistles, and Apocalypse. Generally it may be said that the Scriptural idioms of our common language have come to us mainly through the Latin; and in a wider view the Vulgate is the connecting link between classical and modern languages. It contains elements which belong to the earliest stage of Latin, and exhibits (if often in a rude form) the flexibility of the popular dialect. On the other hand, it has furnished the source and the model for a large portion of current Latin derivatives. Within a more limited range, the authority of the Latin Versions is undeniable, though its extent is rarely realised. The vast power which they have had in determining the theological terms of Western Christendom can hardly be overrated. By far the greater part of the current doctrinal terminology is based on the Vulgate, and, as far as can be ascertained, was originated in the Latin Version. *Predestination, justification, supererogation (supererogo), sanctification, salvation, mediator, regeneration, revelation, visitation (met.), propitiation, firm* appear in the Old Vulgate. *Grace, redemption, election, reconciliation, satisfaction, inspiration, scripture*, were devoted there to a new and holy use. *Sacrament (μυστήριον) and communion* are from the same source; and though *baptism* is Greek, it comes to us from the Latin. It would be easy to extend the list by the addition of *orders, penance, congregation, priest*. But it can be seen from the forms already brought forward that the Latin Versions have left their mark

both upon their language and upon our thoughts; and if the right method of controversy is based upon a clear historical perception of the force of words, it is evident that the study of the Vulgate, however much neglected, can never be neglected with impunity. It was the Version which alone they knew who handed down to the Reformers the rich stores of mediæval wisdom; the Version with which the greatest of the Reformers were most familiar, and from which they had drawn their earliest knowledge of Divine truth.

Vulture. The rendering in A. V. of the Heb. *dāḥ*, *dayyāh*, and also in Job xxviii. 7, of *ayyāh*. There seems no doubt but that the A. V. translation is incorrect, and that the original words refer to some of the smaller species of raptorial birds, as kites or buzzards. *Dayyāh* is evidently synonymous with Arab. *ḥdayah*, the vernacular for the "kite" in North Africa, and without the epithet "red" for the black kite especially. The Samaritan and all other Eastern Versions agree in rendering it "kite." *Ayyāh* is yet more certainly referable to this bird, which in other passages it is taken to represent. There are two very different species of bird comprised under the English term vulture: the griffon (*gyps fulvus*, Sav.), Arab. *nesser*, Heb. *nessher*; invariably rendered "eagle" by A. V.; and the *percnopter*, or Egyptian vulture (*Neophron percnopterus*, Sav.), Arab. *rakhma*; Heb. *rāchām*; rendered "gier-eagle" by A. V. The identity of the Hebrew and Arabic terms in these cases can scarcely be questioned. However degrading the substitution of the ignoble vulture for the royal eagle may at first sight appear in many passages, it must be borne in mind that the griffon is in all its movements and characteristics a majestic and royal bird, the largest and most powerful which is seen on the wing in Palestine, and far surpassing the eagle in size and power. Its only rival in these respects is the Bearded Vulture or Lammergeyer. If we take the Heb. *ayyāh* to refer to the red kite (*milvus regia*, Temm.), and *dayyāh* to the black kite (*milvus ater*, Temm.), we shall find the piercing sight of the former referred to by Job (xxviii. 7), and the gregarious habits of the latter by Isaiah (xxxiv. 15). Both species are inhabitants of Palestine, the red kite being found all over the country, as formerly in England, but nowhere in great numbers, generally soaring at a great height over the plains, and apparently leaving the country in winter. The black kite, which is so numerous everywhere as to be gregarious, may be seen at all times of the year, hovering over the villages and the outskirts of towns, on the look-out for offal and garbage, which are its favourite food. There are three species of vulture known to inhabit Palestine:—1. The Lammergeyer (*Gypætos barbatus*, Cuv.), which is rare everywhere, and only found in desolate mountain regions. 2. The griffon (*Gyps fulvus*, Sav.), mentioned above, remarkable for its power of vision and the great height at which it soars. Mr. Tristram observed this bird universally distributed in all the mountainous and rocky districts of Palestine, and especially abundant in the south-east. Its favourite breeding-places are between Jerusalem and Jericho, and all round the Dead Sea. The third species is the Egyptian vulture (*Neophron percnopterus*, Sav.), often called Pharaoh's hen, observed in Palestine by Hasselquist and all subsequent travellers, and very numerous everywhere.

W

Wages. The earliest mention of wages is of a recompence not in money but in kind, to Jacob from Laban (Gen. xxix. 15, 20, xxx. 28, xxi. 7, 8, 41). In Egypt, money payments by way of wages were in use, but the terms cannot now be ascertained (Ex. ii. 9). The only mention of the rate of wages in Scripture is found in the parable of the householder and the vineyard (Matt. xx. 2), where the labourer's wages are set at one denarius per day, probably = 7½d., a rate which agrees with Tobit v. 14, where a drachma is mentioned as the rate per day, a sum which may be fairly taken as equivalent to the denarius, and to the usual pay of a soldier (ten asses per diem) in the later days of the Roman republic (Tac. Ann. i. 17; Polyb. vi. 39). In earlier times it is probable that the rate was lower. But it is likely that labourers, and also soldiers, were supplied with provisions. The law was very strict in requiring daily payment of wages (Lev. xix. 13; Deut. xxiv. 14, 15). The employer who refused to give his labourers sufficient victuals is censured (Job xxiv. 11), and the iniquity of withholding wages is denounced (Jer. xxii. 13; Mal. iii. 5; James v. 4).

Waggon. [CART and CHARIOT.] The Oriental waggon or *arabāh* is a vehicle composed of two or three planks fixed on two solid circular blocks of wood, from two to five feet in diameter, which serve as wheels. To the floor are sometimes attached wings, which splay outwards like the sides of a wheelbarrow. For the conveyance of passengers, mattresses or clothes are laid in the bottom, and the vehicle is drawn by buffaloes or oxen. The covered waggons for conveying the materials of the tabernacle were probably constructed on Egyptian models.

Walls. Only a few points need be noticed in addition to what has been said elsewhere on wall-construction, whether in brick, stone, or wood. [BRICKS; HANDICRAFT; MORTAR.] 1. The practice common in Palestine of carrying foundations down to the solid rock, as in the case of the Temple, and in the present day with structures intended to be permanent (Luke vi. 48). 2. A feature of some parts of Solomon's buildings, as described by Josephus, corresponds remarkably to the method adopted at Nineveh of encrusting or veneering a wall of brick or stone with slabs of a more costly material, as marble or alabaster. 3. Another use of walls in Palestine is to support mountain-roads or terraces formed on the sides of hills for purposes of cultivation. 4. The "path of the vineyards" (Num. xxii. 24) is a pathway through vineyards, with walls on each side.

Wandering in the Wilderness. [WILDERNESS OF WANDERING.]

War. The most important topic in connexion with war is the formation of the army, which is destined to carry it on. [ARMY.] Before entering on a war of aggression the Hebrews sought for the Divine sanction by consulting either the Urim and Thummim (Judg. i. 1, xx. 2, 27-8; 1 Sam. xiv. 37, xxiii. 2, xxviii. 6, xxx. 8), or some acknowledged prophet (1 K. xii. 6; 2 Chr. xviii. 5). Divine aid was further sought in actual warfare by bringing into the field the Ark of the Covenant, which was the symbol of Jehovah Himself (1 Sam. iv. 4-

18, xiv. 18). Formal proclamations of war were not interchanged between the belligerents. Before entering the enemy's district spies were sent to ascertain the character of the country and the preparations of its inhabitants for resistance (Num. xiii. 17; Josh. ii. 1; Judg. vii. 10; 1 Sam. xxvi. 4). When an engagement was imminent a sacrifice was offered (1 Sam. vii. 9, xiii. 9), and an inspiring address delivered either by the commander (2 Chr. xx. 20) or by a priest (Deut. xx. 2). Then followed the battle-signal (1 Sam. xvii. 52; Is. xlii. 13, Jer. i. 42; Ez. xxi. 22; Am. i. 14). The combat assumed the form of a number of hand-to-hand contests. Hence the high value attached to fleetness of foot and strength of arm (2 Sam. i. 23, ii. 18; 1 Chr. xii. 8). At the same time various strategic devices were practised, such as the ambuscade (Josh. viii. 2, 12; Judg. xx. 36), surprise (Judg. vii. 16), or circumvention (2 Sam. v. 23). Another mode of settling the dispute was by the selection of champions (1 Sam. xvii.; 2 Sam. ii. 14), who were spurred on to exertion by the offer of high reward (1 Sam. xvii. 25, xviii. 25; 2 Sam. xviii. 11; 1 Chr. xi. 6). The contest having been decided, the conquerors were recalled from the pursuit by the sound of a trumpet (2 Sam. ii. 28, xviii. 16, xx. 22). The siege of a town or fortress was conducted in the following manner:—A line of circumvallation was drawn round the place (Ex. iv. 2; Mic. v. 1), constructed out of the trees found in the neighbourhood (Deut. xx. 20), together with earth and any other materials at hand. This line not only cut off the besieged from the surrounding country, but also served as a base of operations for the besiegers. The next step was to throw out from this line one or more "mounts" or "banks" in the direction of the city (2 Sam. xx. 15; 2 K. xix. 32; Is. xxxvii. 33), which was gradually increased in height until it was about half as high as the city wall. On this mound or bank towers were erected (2 K. xxv. 1; Jer. lii. 4; Ez. iv. 2, xvii. 17, xxi. 22, xxvi. 8), whence the slingers and archers might attack with effect. Battering-rams (Ez. iv. 2, xxi. 22) were brought up to the walls by means of the bank, and scaling-ladders might also be placed on it. The treatment of the conquered was extremely severe in ancient times. The bodies of the soldiers killed in action were plundered (1 Sam. xxxi. 8; 2 Macc. viii. 27): the survivors were either killed in some savage manner (Judg. ix. 45; 2 Sam. xii. 31; 2 Chr. xxv. 12), mutilated (Judg. i. 6; 1 Sam. xi. 2), or carried into captivity (Num. xxxi. 26; Deut. xx. 14). Sometimes the bulk of the population of the conquered country was removed to a distant locality. The Mosaic law mitigated to a certain extent the severity of the ancient usages towards the conquered. The conquerors celebrated their success by the erection of monumental stones (1 Sam. vii. 12; 2 Sam. viii. 13), by hanging up trophies in their public buildings (1 Sam. xxi. 9, xxxi. 10; 2 K. xi. 10), and by triumphal songs and dances in which the whole population took part (Ex. xv. 1-21; Judg. v.; 1 Sam. xviii. 6-8; 2 Sam. xxii.; Jud. xvi. 2-17; 1 Macc. iv. 24).

Washing the Hands and Feet. As knives and forks were dispensed with in eating, it was absolutely necessary that the hand, which was thrust into the common dish, should be scrupulously clean; and again, as sandals were ineffectual against the dust and heat of an Eastern climate, washing the feet on entering a house was an act both of respect

to the company and of refreshment to the traveller. The former of these usages was transformed by the Pharisees of the New Testament age into a matter of ritual observance (Mark vii. 3), and special rules were laid down as to the times and manner of its performance. Washing the feet did not rise to the dignity of a ritual observance, except in connexion with the services of the sanctuary (Ex. xxx. 19, 21). It held a high place, however, among the rites of hospitality. Immediately that a guest presented himself at the tent-door, it was usual to offer the necessary materials for washing the feet (Gen. xviii. 4, xix. 2, xxiv. 32, xliii. 24; Judg. xix. 21). It was a yet more complimentary act, betokening equally humility and affection, if the host actually performed the office for his guest (1 Sam. xxv. 41; Luke vii. 38, 44; John xiii. 5-14; 1 Tim. v. 10). Such a token of hospitality is still occasionally exhibited in the East.

Watches of Night. The Jews, like the Greeks and Romans, divided the night into military watches instead of hours, each watch representing the period for which sentinels or pickets remained on duty. The proper Jewish reckoning recognised only three such watches, entitled the first or "beginning of the watches" (Lam. ii. 19), the middle watch (Judg. vii. 19), and the morning watch (Ex. xiv. 24; 1 Sam. xi. 11). These would last respectively from sunset to 10 P.M.; from 10 P.M. to 2 A.M.; and from 2 A.M. to sunrise. Subsequently to the establishment of the Roman supremacy, the number of watches was increased to four, which were described either according to their numerical order, as in the case of the "fourth watch" (Matt. xiv. 25), or by the terms "even, midnight, cock-crowing, and morning" (Mark xiii. 35). These terminated respectively at 9 P.M., midnight, 3 A.M., and 6 A.M.

Water of Jealousy. (Num. v. 11-31). The ritual prescribed consisted in the husband's bringing the woman before the priest, and the essential part of it is unquestionably the oath, to which the "water" was subsidiary, symbolical, and ministerial. With her he was to bring the tenth part of an ephah of barley-meal as an offering. Perhaps the whole is to be regarded from a judicial point of view, and this "offering" in the light of a court-fee. God Himself was solemnly invoked to judge, and His presence recognised by throwing a handful of the barley-meal on the blazing altar in the course of the rite. In the first instance, however, the priest "set her before the Lord" with the offering in her hand. As she stood holding the offering, so the priest stood holding an earthen vessel of holy water mixed with the dust from the floor of the sanctuary, and declaring her free from all evil consequences if innocent, solemnly devoted her in the name of Jehovah to be "a curse and an oath among her people," if guilty, further describing the exact consequences ascribed to the operation of the water in the "members" which she had "yielded as servants to uncleanness" (vers. 21, 22, 27; comp. Rom. vi. 19). He then "wrote these curses in a book, and blotted them out with the bitter water," and having thrown, probably at this stage of the proceedings, the handful of meal on the altar, "caused the woman to drink" the potion thus drugged, she moreover answering to the words of his imprecation, "Amen, Amen." Josephus adds, if the suspicion was unfounded, she obtained conception, if true, she died infamously. It may be

supposed that a husband would not be forward to publish his suspicions of his own injury, unless there were symptoms of apparent conception, and a risk of a child by another being presented to him as his own. In this case the woman's natural apprehensions regarding her own gestation would operate very strongly to make her shrink from the potion, if guilty. The custom of such an ordeal was probably traditional in Moses' time, and by fencing it round with the wholesome awe inspired by the solemnity of the prescribed ritual, the lawgiver would deprive it to a great extent of its barbarous tendency.

Water of Separation. [PURIFICATION.]

Wave-offering. This rite, together with that of "heaving" or "raising" the offering, was an inseparable accompaniment of peace-offerings. In such the right shoulder, considered the choicest part of the victim, was to be "heaved," and viewed as holy to the Lord, only eaten therefore by the priest; the breast was to be "waved," and eaten by the worshipper. On the second day of the Passover a sheaf of corn, in the green ear, was to be waved, accompanied by the sacrifice of an unblemished lamb of the first year, from the performance of which ceremony the days till Pentecost were to be counted. When that feast arrived, two loaves, the first-fruits of the ripe corn, were to be offered with a burnt-offering, a sin-offering, and two lambs of the first year for a peace-offering. These likewise were to be waved. The Scriptural notices of these rites are to be found in Ex. xxix. 24, 28; Lev. vii. 30, 34, viii. 27, ix. 21, x. 14, 15, xxiii. 10, 15, 20; Num. vi. 20, xviii. 11, 18, 26-29, &c. It seems not quite certain from Ex. xxix. 26, 27, whether the waving was performed by the priest or by the worshipper with the former's assistance. The Rabbinical tradition represents it as done by the worshipper, the priest supporting his hands from below. In conjecturing the meaning of this rite, regard must be had, in the first instance, to the kind of sacrifice to which it belonged. It was the accompaniment of peace-offerings. These not only, like the other sacrifices, acknowledged God's greatness and His right over the creature, but they witnessed to a ratified covenant, an established communion between God and man. The Rabbis explain the heaving of the shoulder as an acknowledgment that God has His throne in the heaven, the waving of the breast that He is present in every quarter of the earth.

Way. This word has now in ordinary parlance so entirely forsaken its original sense, and is so uniformly employed in the secondary or metaphorical sense of a "custom" or "manner," that it is difficult to remember that in the Bible it most frequently signifies an actual road or track. Our translators have employed it as the equivalent of no less than eighteen distinct Hebrew terms. But the term which most frequently occurs, and in the majority of cases signifies an actual road, is *derec*, connected with the German *träte* and the English "tread." It may be truly said that there is hardly a single passage in which this word occurs which would not be made clearer and more real if "road to" were substituted for "way of." There is one use of both *derec* and *δὲς* which must not be passed over, viz. in the sense of a religious course. In the Old Test. this occurs but rarely, perhaps twice: namely in Amos viii. 14, and Ps. cxxxix. 24. But in the Acts of the Apostles *δὲς*, "the way,"

"the road," is the received, almost technical, term for the new religion which Paul first resisted and afterwards supported.

Weapons. [ARMS.]

Weasel (*chôled*) occurs only in Lev. xi. 29, in the list of unclean animals. According to the old versions and the Talmud, the Heb. *chôled* denotes "a weasel;" but if the word is identical with the Arabic *chuld* and the Syriac *chuldô* there is no doubt that "a mole" is the animal indicated. Moles are common enough in Palestine. It is not improbable that both the *Talpa europaea* and the *T. caeca*, the blind mole of which Aristotle speaks, occur there, though we have no definite information on this point.

Weaving. The art of weaving appears to be coeval with the first dawning of civilization. In what country, or by whom it was invented, we know not; but we find it practised with great skill by the Egyptians at a very early period. The "vestures of fine linen" such as Joseph wore (Gen. xli. 42) were the product of Egyptian looms, and their quality, as attested by existing specimens, is pronounced to be not inferior to the finest cambric of modern times. The Israelites were probably acquainted with the process before their sojourn in Egypt; but it was undoubtedly there that they attained the proficiency which enabled them to execute the hangings of the Tabernacle (Ex. xxxv. 35; 1 Chr. iv. 21), and other artistic textures. At a later period the Egyptians were still famed for their manufactures of "fine" (i. e. hackled) flax and of *chôrî*, rendered in the A. V. "networks," but more probably a white material either of linen or cotton (Is. xix. 9; Ex. xxvii. 7). The character of the loom and the process of weaving can only be inferred from incidental notices. The Egyptian loom was usually upright, and the weaver stood at his work. The cloth was fixed sometimes at the top, sometimes at the bottom. The modern Arabs use a procumbent loom, raised above the ground by short legs. The Bible does not notice the loom itself, but speaks of the beam to which the warp was attached (1 Sam. xvii. 7; 2 Sam. xxi. 19); and of the pin to which the cloth was fixed, and on which it was rolled (Judg. xvi. 14). We have also notice of the shuttle, which is described by a term significant of the act of weaving (Job vii. 6); the thrum or threads which attached the web to the beam (Is. xxxviii. 12. *margin*); and the web itself (Judg. xvi. 14; A. V. "beam"). Whether the two terms in Lev. xxi. 43, rendered "warp" and "woof," really mean these, admits of doubt. The textures produced by the Jewish weavers were very various. The coarser kinds, such as tent-cloth, sackcloth, and the "hairy garments" of the poor were made of goat's or camel's hair (Ex. xxvi. 7; Matt. iii. 4). Wool was extensively used for ordinary clothing (Lev. xiii. 47; Prov. xxvii. 26, xxxi. 13; Ex. xxvii. 18), while for finer work flax was used, varying in quality, and producing the different textures described in the Bible as "linen" and "fine linen." The mixture of wool and flax in cloth intended for a garment was interdicted (Lev. xix. 19; Deut. xxi. 11).

Wedding. [MARRIAGE.]

Week. Whatever controversies exist respecting the origin of the week, there can be none about the great antiquity, on particular occasions at least, among the Shemitic races, of measuring time by a

period of seven days (Gen. viii. 10, xxix. 27). The origin of this division of time is a matter which has given birth to much speculation. Its antiquity is so great, its observance so wide-spread, and it occupies so important a place in sacred things, that it has been very generally thrown back as far as the creation of man. The week and the Sabbath are, if this be so, as old as man himself. A purely theological ground is thus established for the week and for the sacredness of the number seven. They who embrace this view support it by a reference to the six days' creation and the Divine rest on the seventh. 1st. That the week rests on a theological ground may be cheerfully acknowledged by both sides; but nothing is determined by such acknowledgment as to the original cause of adopting this division of time. Whether the week gave its sacredness to the number seven, or whether the ascendancy of that number helped to determine the dimensions of the week, it is impossible to say. 2ndly. The prevalence of the weekly division was indeed very great, but a nearer approach to universality is required to render it an argument for the view in aid of which it is appealed to. It was adopted by all the Semitic races, and, in the later period of their history at least, by the Egyptians. On the other hand, there is no reason for thinking the week known till a late period either to Greeks or Romans. 3rdly. So far from the week being a division of time without ground in nature, there was much to recommend its adoption. Where the days were named from planetary deities, as among first the Assyrians and Chaldees, and then the Egyptians, there of course each period of seven days would constitute a whole, and that whole might come to be recognised by nations that disregarded or rejected the practice which had shaped and determined it. But further, the week is a most natural and nearly an exact quadripartition of the month, so that the quarters of the moon may easily have suggested it. In Exodus of course the week comes into very distinct manifestation. Two of the great feasts—the Passover and the Feast of Tabernacles—are prolonged for seven days after that of their initiation (Exod. xii. 15-20, &c.). The division by seven was expanded so as to make the seventh month and the seventh year Sabbatical. In the N. T. we of course find such clear recognition of and familiarity with the week as needs scarcely be dwelt on. The Christian Church, from the very first, was familiar with the week. St. Paul's language (1 Cor. xvi. 2) shows this. We cannot conclude from it that such a division of time was observed by the inhabitants of Corinth generally; for they to whom he was writing, though doubtless the majority of them were Gentiles, yet knew the Lord's Day, and most probably the Jewish Sabbath. But though we can infer no more than this from the place in question, it is clear that if not by this time, yet very soon after, the whole Roman world had adopted the hebdomadal division. Dion Cassius represents it as coming from Egypt.

Weeks, Feast of. [PENTECOST.]

Weights and Measures. I. WEIGHTS.—

Introduction.—The general principle of the present inquiry is to give the evidence of the monuments the preference on all doubtful points. Besides this general principle, it will be necessary to bear in mind the following postulates:—1. All ancient Greek systems of weight were derived, either

directly or indirectly, from an Eastern source. 2. All the older systems of ancient Greece and Persia, the Aeginetan, the Attic, the Babylonian, and the Euboic, are divisible either by 6000, or by 3600. 3. The 6000th or 3600th part of the talent is a divisor of all higher weights and coins, and a multiple of all lower weights and coins, except its two-thirds. 4. Coins are always somewhat below the standard weight. 5. The statements of ancient writers as to the relation of different systems are to be taken either as indicating original or current relation. 6. The statements of ancient writers are to be taken in their seemingly-obvious sense, or discarded altogether as incorrect or unintelligible. 7. When a certain number of drachms or other denominations of one metal are said to correspond to a certain number of drachms or other denominations of another metal, it must not be assumed that the system is the same in both cases.—I. *Early Greek talents.*—Three principal systems were used by the Greeks before the time of Alexander, those of the Aeginetan, the Attic, and the Euboic talents. 1. The Aeginetan talent is stated to have contained 60 minae, and 6000 drachms. Its drachm was heavier than the Attic, by which, when unqualified, we mean the drachm of the full monetary standard, weighing about 67·5 grains Troy. Pollux states that it contained 10,000 Attic drachms and 100 Attic minae. The silver coins of Aegina, however, and of many ancient Greek cities, follow a lower standard, of which the drachm has an average maximum weight of about 96 grs. The drachm obtained from the silver coins of Aegina has very nearly the weight, 92·3 grs. The coins of Athens give a standard, 67·5 grs. for the Solonian drachm. An examination of Mr. Burgon's weights from Athens, in the British Museum, has, however, induced us to infer a higher standard in both cases. From the correct relation of the weights of the two minae given above, we may compute the drachms of the two talents at about 99·8 and 71·7 grs. We thus obtain the following principal standards of the Aeginetan weight. a. The Macedonian talent, or Aeginetan of the writers, weighing about 660,000 grs., containing 60 minae and 6000 drachms. b. The Commercial talent of Athens, used for the coins of Aegina, weighing, as a monetary talent, never more than about 576,000 grs., reduced from a weight talent of about 598,800, and divided into the same principal parts as the preceding. 2. The Attic talent, when simply thus designated, is the standard weight introduced by Solon, which stood to the older or Commercial talent in the relation of 100 to 138½. Its average maximum weight, as derived from the coins of Athens and the evidence of ancient writers, gives a drachm of about 67·5 grs.; but Mr. Burgon's weights enable us to raise this sum to 71·7. It appears that the Attic talent weighed about 430,260 grs. by the weights, and that the coins give a talent of about 405,000 grs. 3. The Euboic talent, though used in Greece, is also said to have been used in Persia, and there can be no doubt of its Eastern origin.—II. *Foreign talents of the same period.*—Two foreign systems of the same period, besides the Hebrew, are mentioned by ancient writers, the Babylonian talent and the Euboic, which Herodotus relates to have been used by the Persians of his time respectively for the weighing of their silver and gold paid in tribute. 1. The Babylonian talent may be determined from existing weights found by Mr. Layard

at Nineveh. The weights represent a double system, of which the heavier talent contained two of the lighter talents. The heavier talent contained 60 manehs. The maneh was divided into thirtieths and sixtieths. The lighter talent contained 60 manehs. According to Dr. Hincks, the maneh of the lighter talent was divided into sixtieths, and these again into thirtieths. The following table exhibits our results.

Heavier Talent.		Grs. troy.
$\frac{1}{2}$ Maneh		266.4
$\frac{1}{2}$ Maneh		532.8
60	30 Maneh	15,984
3600	1800 60 Talent	959,040
Lighter Talent.		Grs. troy.
$\frac{1}{30}$ of $\frac{1}{60}$ Maneh		4.4*
$\frac{1}{30}$ Maneh		133.2
1800	60 Maneh	7,992
108000	3600 60 Talent	479,520

Certain low subdivisions of the lighter talent may be determined from smaller weights, in the British Museum, from Babylonia or Assyria, not found with those last described. Herodotus speaks of the Babylonian talent as not greatly exceeding the Euboic, which has been computed to be equivalent to the Commercial Attic, but more reasonably as nearly the same as the ordinary Attic. Pollux makes the Babylonian talent equal to 7000 Attic drachms. We may therefore suppose that the lighter talent was generally, if not universally, in use in the time of the Persian coins. Herodotus relates that the king of Persia received the silver tribute of the satrapies according to the Babylonian talent, but the gold, according to the Euboic. We may therefore infer that the silver coinage of the Persian monarchy was then adjusted to the former, the gold coinage to the latter, if there was a coinage in both metals so early. * The larger silver coins of the Persian monarchy, and those of the satraps, are of the following denominations and weights:—

	Grs. troy.
Piece of three sigli	253.5
Piece of two sigli	169
Siglos	84.5

The only denomination of which we know the name is the siglos, which, as having the same type as the Daric, appears to be the oldest Persian silver coin. It is the ninetieth part of the maneh of the lighter talent, and the 5400th of that talent. 2. The Euboic talent, though bearing a Greek name, is rightly held to have been originally an Eastern system. As it was used to weigh the gold sent as tribute to the king of Persia, we may infer that it was the standard of the Persian gold money; and it is reasonable to suppose that the coinage of Euboea, was upon its standard. The supposition of the Euboic talent to the Babylonian was probably as 60 to 72, or 5 to 6. Taking the Babylonian maneh at 7992 grs. we obtain 399,600 for the Euboic talent. The principal, if not the only, Persian gold coin is the Daric, weighing about 129 grs. This was the standard coin, according to which the silver money was adjusted. Its double in actual weight is found in the silver coinage, but its equivalent is wanting, as though for the sake of distinction. The double is the thirtieth of the maneh of the lighter or monetary Babylonian talent, of which the Daric is the sixtieth, the latter being, in our opinion, a known division. The

Daric was thus the 3600th part of the Babylonian talent. * It is nowhere stated how the Euboic talent was divided, but if we suppose it to have contained 50 minae, then the Daric would have been the sixtieth of the mina, but if 100 minae, the thirtieth. In any case it would have been the 3000th part of the talent. The coinage of Euboea has hitherto been the great obstacle to the discovery of the Euboic talent. For the present we speak only of the silver coins. The coins give the following denominations.

COINS OF EUBOEA.		COINS OF ATHENS.	
Highest weight.	Assumed true weight.		Assumed true weight.
121	258	Tetradrachm	270
85	129	Didrachm	135
63	64.5	Drachm	67.5
43	43	Tetrobolon	45

It will be perceived that though the weights of all denominations, except the third in the Euboic list, are very near the Attic, the system of division is evidently different. The third Euboic denomination is identical with the Persian siglos, and indicates the Persian origin of the system. The second piece is, however, identical with the Daric. The relation of the Persian and Greek systems may be thus stated:

Persian silver, Babylonian.	Persian gold, Euboic.	Greek Euboic. Actual weight.	Assumed.
253.5			258
169			
	129	121	129
84.5		85	86
		63	64.5
		43	43

3. The talents of Egypt have hitherto formed a most unsatisfactory subject. The gold and silver coins of the Ptolemies follow the same standard as the silver coins of the kings of Macedon to Philip II. inclusive, which are on the full Aeginetan weight. The copper coins have been thought to follow the same standard, but this is an error. The difficulty of explaining the statements of ancient writers as to the Egyptian, Alexandrian, or Ptolemaic talent or talents, probably arises from the use of two systems which could be easily confounded, at least in their lower divisions. 4. The Carthaginian talent may not be as old as the period before Alexander, to which we limit our inquiry, yet it reaches so nearly to that period that it cannot be here omitted. Those silver coins of the Carthaginians which do not follow the Attic standard seem to be struck upon the standard of the Persian coins, the Babylonian talent.—III. *The Hebrew talent or talents and divisions.* 1. * A talent of silver is mentioned in Exodus, which contained 3000 shekels, distinguished as "the holy shekel," or "shekel of the sanctuary." 2. * A gold maneh is spoken of, and, in a parallel passage, shekels are mentioned, three manehs being represented by 300 shekels, a maneh therefore containing 100 shekels of gold. 3. Josephus states that the Hebrew talent of gold contained 100 minae (*Ant.* iii. 6, §7). 4. Josephus states that the Hebrew mina of gold was equal to two librae and a half (*Ant.* xiv. 7, §1). Taking the Roman pound at 5050 grs., the maneh of gold would weigh about 12,625 grs. 5. Epiphanius estimates the Hebrew talent at 125 Roman pounds, which, at the value given above, are equal to about 631,250 grs. 6. A difficult

passage in Ezekiel seems to speak of a maneh of 50 or 60 shekels (xiv. 12). 7. Josephus makes the gold shekel a Daric (*Ant.* iii. 8, § 10). From these data it may be reasonably inferred, (1.) that the Hebrew gold talent contained 100 manehs, each of which again contained 100 shekels of gold, and, basing the calculation on the stated value of the maneh, weighed about 1,262,500 grs. or, basing the calculation on the correspondence of the gold shekel to the Daric, weighed about 1,290,000 grs. ($129 \times 100 \times 100$), the latter being probably nearer the true value, and (2.) that the silver talent contained 3000 shekels, and is probably the talent spoken of by Epiphanius as equal to 125 Roman pounds, or 631,250 grs. which would give a shekel of 210.4 grs. Let us now examine the Jewish coins. 1. The shekels and half-shekels of silver, if we take an average of the heavier specimens of the Maccabaean issue, give the weight of the former as about 220 grs. A talent of 3000 such shekels would weigh about 660,000 grs. This result agrees very nearly with the weight of the talent given by Epiphanius. 2. The copper coins are generally without any indications of value. The two heaviest denominations of the Maccabaean issue, however, bear the names "half" and "quarter." In the following scheme they are compared with the silver coins.

COPPER COINS.		SILVER COINS.	
Average weight.	Supposed weight.	Average weight.	Supposed weight.
Half . . . 235.4	250	Shekel . . . 220	Id.
Quarter 132.0	125	Half-shekel 110	Id.
(Sixth). 81.8	83.3	[Third] . . . 73.3	

Our theory of the Hebrew coinage would be as follows:—Gold . . . Shekel or Daric (foreign) 129 grs. Silver . . . Shekel 220, Half-shekel 110. Copper . Half (-shekel) 264, Quarter (-shekel) 132, (Sixth-shekel) 88. We can now consider the weights. The gold talent contained 100 manehs, and 10,000 shekels. The silver talent contained 3000 shekels, 6000 bekas, and 60,000 gerahs. The copper talent probably contained 1500 shekels. The "holy shekel," or "shekel of the sanctuary," is spoken of both of the gold (*Ex.* xxxviii. 24) and silver (25) talents of the time of the Exodus. We also read of "the king's weight" (2 Sam. xiv. 26). But there is no reason for supposing different systems to be meant. The significations of the names of the Hebrew weights must be here stated. The talent *ciccâr* means "a circle," or "globe," probably "an aggregate sum." The shekel signifies simply "a weight." The beka or half-shekel, signifies "a division," or "half." The "quarter shekel" is once mentioned (1 Sam. ix. 8). The gerah signifies "a grain," or "bean."—IV. *The history and relations of the principal ancient talents.*—The inquiry must be prefaced by a list of the talents:—

A. EASTERN TALENTS.

Hebrew gold . . . 1,320,000	Hebrew silver . . . 660,000
Babylonian (silver) . . . 969,040	Babylonian lesser (silver) . . . 479,520
Egyptian . . . 840,000	
Hebrew copper ? . . . 792,000?	Persian gold . . . 399,600

B. GREEK TALENTS.

Aeginetan	660,000
Attic Commercial	598,800
Attic Commercial, lowered	558,900
Attic Solonian, double	860,420
Attic Solonian, ordinary	430,260
Attic Solonian, lowered	405,000
Euboic	387,000+

We take the Hebrew to be the oldest system of weight. Apart from the evidence from its relation to the other systems, this may be almost proved by our finding it to obtain in Greece, in Phoenicia, and in Judaea, as the oldest Greek and Phoenician system, and as the Jewish system. The Hebrew system had two talents for the precious metals in the relation of 2 : 1. The gold talent, apparently not used elsewhere, contained 100 manehs, each of which contained again 100 shekels, there being thus 10,000 of these units, weighing about 132 grs. each, in the talent. The silver talent, also known as the Aeginetan, contained 3000 shekels, weighing about 220 grs. each. One gold talent appears to have been equal to 24 of these. The reason for making the talent of gold twice that of silver was probably, chiefly for the sake of distinction. The Babylonian talent, like the Hebrew, consisted of two systems, in the relation of 2 to 1, upon one standard. It appears to have been formed from the Hebrew by reducing the number of units from 10,000 to 7200. The system was altered by the maneh being raised so as to contain 120 instead of 100 units, and the talent lowered so as to contain 60 instead of 100 manehs. It is possible that this talent was originally of silver. The derivation, from the lighter Babylonian talent, of the Euboic talent, is easily ascertained. Their relation is that of 6 : 5. The Egyptian talent cannot be traced to any other. The Hebrew copper talent is equally obscure. Perhaps it is the double of the Persian gold talent. The Aeginetan talent was the same as the lesser or silver Hebrew talent. Its introduction into Greece was doubtless due to the Phoenicians. The Attic Commercial was a degradation of this talent, and was itself further degraded to form the Attic Solonian.

II. MEASURES.—The most important topic to be discussed in connexion with the subject of the Hebrew measures is their relative and absolute value. Another topic, of secondary importance perhaps, but possessing an independent interest of its own, demands a few prefatory remarks, viz., the origin of these measures, and their relation to those of surrounding countries. We divide the Hebrew measures into two classes, according as they refer to length or capacity, and subdivide each of these classes into two, the former into measures of length and distance, the latter into liquid and dry measures. 1. Measures of length. (1.) The denominations referring to length were derived for the most part from the arm and hand. We may notice the following four as derived from this source:—(a) The *etsba*, or finger's breadth, mentioned only in Jer. li. 21. (b) The *tephach*, or hand breadth (*Ex.* xxv. 25; 1 K. vii. 26; 2 Chr. iv. 5), applied metaphorically to a short period of time in Ps. lxxxix. 5. (c) The *zereh*, or span, the distance between the extremities of the thumb and the little finger in the extended hand (*Ex.* xxviii. 16; 1 Sam. xvii. 4; *Ex.* xliii. 13), applied generally to describe any small measure in Is. xl. 12. (d) The *ammâh*, or cubit, the distance from the elbow to the extremity of the middle finger. This occurs very frequently in the Bible in relation to buildings. In addition to the above we may notice:—(e) The *gomed*, lit. a rod, applied to Egion's dirk (*Judg.* Ki. 16). Its length is uncertain, but it probably fell below the cubit, with which it is identified in the A. V. (f) The *kânah*, or reed, for measuring buildings on a large scale

(Ex. xl. 5-8, xli. 8, xlii. 16-19). Little information is furnished by the Bible itself as to the relative or absolute lengths described under the above terms. With the exception of the notice that the reed equals six cubits (Ex. xl. 5), we have no intimation that the measures were combined in anything like a scale. The most important conclusion to be drawn from the Biblical notices is, that the cubit, which may be regarded as the standard measure, was of varying length, and that, in order to secure accuracy, it was necessary to define the kind of cubit intended, the result being that the other denominations, if combined in a scale, would vary in like ratio. Thus in Deut. iii. 11, the cubit is specified to be "after the cubit of a man;" in 2 Chr. iii. 3 "after the first," or rather "after the older measure;" and in Ez. xli. 8, "a great cubit," or literally "a cubit to the joint," which is further defined in xl. 5, to be "a cubit and an hand breadth." These expressions involve one of the most knotty points of Hebrew archaeology, viz., the number and the respective lengths of the Scriptural cubits. That there was more than one cubit, is clear; but whether there were three, or only two, is not so clear. It is generally conceded that the "former" or "older" measure of 2 Chr. iii. 3, was the Mosaic or legal cubit, and that the modern measure, the existence of which is implied in that designation was somewhat larger. Further, the cubit "after the cubit of a man" of Deut. iii. 11, is held to be a common measure in contradistinction to the Mosaic one, and to have fallen below this latter in point of length. In this case, we should have three cubits—the common, the Mosaic or old measure, and the new measure. We turn to Ezekiel and find a distinction of another character, viz., a long and a short cubit. Now, it has been urged by many writers, and we think with good reason, that Ezekiel would not be likely to adopt any other than the old orthodox Mosaic standard for the measurements of his ideal temple. If so, his long cubit would be identical with the old measure, and his short cubit with the one "after the cubit of a man," and the new measure of 2 Chr. iii. 3 would represent a still longer cubit than Ezekiel's long one. Other explanations of the Prophet's language have, however, been offered: it has been sometimes assumed that, while living in Chaldean, he and his countrymen had adopted the long Babylonian cubit; but in this case his short cubit could not have belonged to the same country, inasmuch as the difference between these two amounted to only three fingers (Herod. i. 178). Again, it has been explained that his short cubit was the ordinary Chaldean measure, and the long one the Mosaic measure; but this is unlikely on account of the respective lengths of the Babylonian and the Mosaic cubits, to which we shall hereafter refer. Independently of these objections, we think that the passages previously discussed (Deut. iii. 11; 2 Chr. iii. 3) imply the existence of three cubits. It remains to be ascertained whether from the Bible itself we can extract any information as to the length of the Mosaic or legal cubit. An examination of Biblical notices tends to the conclusion that the cubit of early times fell far below the length usually assigned to it; but these notices are so scanty and ambiguous that this conclusion is by no means decisive. The earliest and most reliable testimony as to the length of the cubit is supplied by the existing specimens of old Egyptian measures.

Several of these have been discovered in tombs, carrying us back at all events to 1700 B.C., while the Nilometer at Elephantine exhibits the length of the cubit in the time of the Roman emperors. No great difference is exhibited in these measures, the longest being estimated at about 21 inches, and the shortest at about 20½, or exactly 20.4729 inches. They are divided into 28 digits, and in this respect contrast with the Mosaic cubit, which, according to Rabbinical authorities, was divided into 24 digits. There is some difficulty in reconciling this discrepancy with the almost certain fact of the derivation of the cubit from Egypt. It has been generally surmised that the Egyptian cubit was of more than one length, and that the sepulchral measures exhibit the shorter as well as the longer by special marks. Wilkinson denies the existence of more than one cubit. The use of more than one cubit appears to have also prevailed in Babylon, for Herodotus states that the "royal" exceeded the "moderate" cubit by three digits. The appellation "royal," if borrowed from the Babylonians, would itself imply the existence of another; but it is by no means certain that this other was the "moderate" cubit mentioned in the text. Reverting to the Hebrew measures, we should be disposed to identify the new measure implied in 2 Chr. iii. 3 with the full Egyptian cubit; the "old" measure and Ezekiel's cubit with the lesser one, either of 26 or 24 digits; and the "cubit of a man" with the third one of 23 digits or which Thenius speaks. In the Mishna the Mosaic cubit is defined to be one of six palms. It is termed the moderate cubit, and is distinguished from a lesser cubit of five palms on the one side, and on the other side from a larger one, consisting of six palms and a digit. The palm consisted, according to Maimonides, of four digits; and the digit, according to Arias Montanus, of four barleycorns. This gives 144 barleycorns as the length of the cubit, which accords with the number assigned to the *cubitus justus et medicus* of the Arabians. The length of the Mosaic cubit, as computed by Thenius (after several trials with the specified number of barleycorns of middling size, placed side by side), is 214.512 Paris lines, or 19.0515 inches. It seems hardly possible to arrive at any very exact conclusion by this mode of calculation. The Talmudists state that the Mosaic cubit was used for the edifice of the Tabernacle and Temple, and the lesser cubit for the vessels thereof. This was probably a fiction. Taking the estimate of Thenius, the length of the other denominations will be as follows:—

					Inches.				
Digit	7938				
4		Palm	.	.	3.1752				
12		3		Span	9.5257				
24		6		2		Cubit	19.0515		
144		36		12		6		Reed	114.3090

Land and area were measured either by the cubit (Num. xxxv. 4, 5; Ez. xl. 27) or by the reed (Ez. xlii. 20, xliii. 17, xlv. 2, xlviii. 20; Rev. xxi. 16). There is no indication in the Bible of the use of a square measure by the Jews. Whenever they wished to define the size of a plot, they specified its length and breadth, even if it were a perfect square, as in Ez. xlviii. 16. The difficulty of defining an area by these means is experienced in the interpretation of Num. xxv. 4, 5. (2.) The measures of distance noticed in the Old Testament are the three following:—(a) The *me'ad*, or pace.

(2 Sam. vi. 13), answering generally to our yard. (b) The *Cibrath háárets*, rendered in the A. V. "a little way" or "a little piece of ground" (Gen. xxv. 16, xlviii. 7; 2 K. v. 19). The expression appears to indicate some definite distance, but we are unable to state with precision what that distance was. The only conclusion to be drawn from the Bible is that the *cibrath* did not exceed and probably equalled the distance between Bethlehem and Rachel's burial-place, which is traditionally identified with a spot $1\frac{1}{2}$ mile north of the town. (c) The *derec yóm*, or *mahálac yóm*, a day's journey, which was the most usual method of calculating distances in travelling (Gen. xxx. 36, xxxi. 23; Ex. iii. 18, v. 3, &c.), though but one instance of it occurs in the New Testament (Luke ii. 44). The ordinary day's journey among the Jews was 30 miles; but when they travelled in companies only 10 miles: Neapolis formed the first stage out of Jerusalem, according to the former, and Beeroth according to the latter computation. It is impossible to assign any distinct length to the day's journey. In the Apocrypha and New Testament we meet with the following additional measures:—(d) The sabbath-day's journey. (e) The *stadion*, or "furlong," a Greek measure introduced into Asia subsequently to Alexander's conquest, and hence first mentioned in the Apocrypha (2 Macc. xi. 5, xii. 9, 17, 29), and subsequently in the New Testament (Luke xxiv. 13; John vi. 19, xi. 18; Lev. xiv. 20, xxi. 16). Both the name and the length of the stade were borrowed from the footrace course at Olympia. It equalled 600 Greek feet (Herod. ii. 149), or 125 Roman paces (Plin. ii. 23), or 608 $\frac{1}{2}$ feet of our measure. It thus falls below the furlong by 53 $\frac{1}{2}$ feet. (f) The Mile, a Roman measure, equalling 1000 Roman paces, 8 stades, and 1618 English yards. 2. Measures of capacity. The measures of capacity for liquids were:—(a) The log (Lev. xiv. 10, &c.), the name originally signifying a "basin." (b) The hin, a name of Egyptian origin, frequently noticed in the Bible (Ex. xix. 40, xxx. 24; Num. xv. 4, 7, 9; Ezr. iv. 11, &c.). (c) The bath, the name meaning "measured," the largest of the liquid measures (1 K. vii. 26, 38; 2 Chr. ii. 10; Ezr. vii. 22; Is. v. 10). We gather from Josephus (*Ant.* iii. 8, §3) that the bath contained 6 hins (for the bath equalled 72 *æstæ* or 12 *choë*s, and the hin 2 *choë*s), and from the Rabbinites that the hin contained 12 logs. The relative values therefore stand thus:—

Log	
12	Hin
72	Bath

The dry measure contained the following denominations:—(a) The cab, mentioned only in 2 K. vi. 25, the name meaning literally *hollow* or *concave*. (b) The omer, mentioned only in Ex. xvi. 16-36. The same measure is elsewhere termed *issaron*, as being the tenth part of an ephah (comp. Ex. xvi. 36), whence in the A. V. "tenth deal" (Lev. xiv. 10, xxiii. 13; Num. xv. 4, &c.). The word omer implies a *heap*, and secondarily a *sheaf*. (c) The *sáá*, or "measure," this being the etymological meaning of the term, and appropriately applied to it, inasmuch as it was the ordinary measure for household purposes (Gen. xviii. 6; 1 Sam. xxv. 18; 2 K. vii. 1, 16). The Greek equivalent occurs in Matt. xiii. 33; Luke xiii. 21. The *seah* was otherwise termed *shálsh*, as being the third

part of an ephah (Is. xl. 12; Ps. lxxx. 5). (d) The ephah, a word of Egyptian origin, and of frequent recurrence in the Bible (Ex. xvi. 36; Lev. v. 11, vi. 20; Ruth ii. 17; 1 Sam. i. 24, xvii. 17; Ez. xlv. 11, 13, 14, xvi. 5, 7, 11, 14). (e) The *letho*, or "half-homer," literally meaning what is *poured out*: it occurs only in Hos. iii. 12. (f) The homer, meaning *heap* (Lev. xxvii. 16; Num. xi. 32; Is. v. 10; Ez. xlv. 13). It is elsewhere termed cor, from the circular vessel in which it was measured (1 K. iv. 22, v. 11; 2 Chr. ii. 10, xxvii. 5; Ezr. vii. 22; Ez. xlv. 14). The Greek equivalent occurs in Luke xvi. 7. The following is the scale of relative values:—

Cab		Omer		Seah	
14		34		3	
6		10		3	Ephah
18		100		30	100 Homer

The absolute values of the liquid and dry measures form the subject of a single inquiry, inasmuch as the two scales have a measure of equal value, viz., the bath and the ephah (Ez. xlv. 11): if either of these can be fixed, the conversion of the other denominations into their respective values readily follows. Josephus states that the bath equals 72 *æstæ* (*Ant.* vii. 2, §9), that the hin equals 2 Attic *choë*s (*Ib.* iii. 8, §3, 9, §4), that the *seah* equals 1 $\frac{1}{2}$ Italian *modii* (*Ib.* ix. 4, §5), that the cor equals 10 Attic *medimni* (*Ib.* xv. 9, §2), and that the issaron or omer equals 7 Attic *cotylæ* (*Ib.* iii. 6, §6). It may further be implied from *Ant.* ix. 4, §4, as compared with 2 K. vi. 25, that he regarded the cab as equal to 4 *æstæ*s. Now, in order to reduce these statements to consistency, it must be assumed that in *Ant.* xy. 9, §2, he has confused the *medimnus* with the *metrétês*, and in *Ant.* iii. 6, §6, the *cotylis* with the *æstês*. Such errors throw doubt on his other statements, and tend to the conclusion that Josephus was not really familiar with the Greek measures. Nevertheless his testimony must be taken as decisively in favour of the identity of the Hebrew bath with the Attic *metrétês*. Assuming that Josephus was right in identifying the bath with the *metrétês*, its value would be, according to Boeckh's estimate of the latter, 1993·95 Paris cubic inches, or 8·7053 English gallons, but according to the estimate of Bertheau 1985·77 Paris cubic inches, or 8·6696 English gallons. The Rabbinites furnish data of a different kind for calculating the value of the Hebrew measures. As we are unable to decide between Josephus and the Rabbinites, we give a double estimate of the various denominations, adopting Bertheau's estimate of the *metrétês*:—

	(Josephus.) Gallons.	(Rabbinites.) Gallons.
Homer or Cor	86·696	44·286
Ephah or Bath	8·6696	4·4286
Seah	2·8898	1·4762
Hin	1·4449	·7381
Omer	·8669	·4423
Cab	·4816	·246
Log	·1204	·0615

In the New Testament we have notices of the following foreign measures:—(a) The *metrétês* (John ii. 6; A. V. "firkin") for liquids. (b) The *choenix* (Rev. vi. 6; A. V. "measure"), for dry goods. (c) The *æstês* applied, however, not to the particular measure so named by the Greeks, but to any small vessel, such as a cup (Mark vii.

4, 8; A. V. "pot"). (d) The *modius*, similarly applied to describe any vessel of moderate dimensions (Matt. v. 15; Mark iv. 21; Luke xi. 33; A. V. "bushel"); though properly meaning a Roman measure, amounting to about a peck. The value of the Attic *metrētēs* has been already stated to be 8-6696 gallons, and consequently the amount of liquid in six stone jars, containing on the average $2\frac{1}{2}$ *metrētēs* each, would exceed 110 gallons (John ii. 6). Very possibly, however, the Greek term represents the Hebrew *bath*, and if the bath be taken at the lower estimate assigned to it, the amount would be reduced to about 60 gallons. The *choenix* was $\frac{1}{6}$ of an Attic *modimnus*, and contained nearly a quart.

Well. The special necessity of a supply of water (Judg. i. 15) in a hot climate has always involved among Eastern nations questions of property of the highest importance, and sometimes given rise to serious contention. Thus the well Beersheba was opened, and its possession attested with special formality by Abraham (Gen. xxi. 30, 31). The Kuran potities abandoned wells as signs of desertion (Sur. xlii.). To acquire wells which they had not themselves dug, was one of the marks of favour foretold to the Hebrews on their entrance into Canaan (Deut. vi. 11). To possess one is noticed as a mark of independence (Prov. v. 15), and to abstain from the use of wells belonging to others, a disclaimer of interference with their property (Num. xx. 17, 19, xxi. 22). Similar rights of possession, actual and hereditary, exist among the Arabs of the present day. It is thus easy to understand how wells have become in many cases links in the history and landmarks in the topography both of Palestine and of the Arabian Peninsula. Wells, in Palestine are

Ancient Egyptian machine for raising water, identical with the *shadoof* of the present day. (Wilkinson.)

usually excavated from the solid limestone rock, sometimes with steps to descend into them (Gen. xxiv. 18). The brims are furnished with a curb or low wall of stone, bearing marks of high antiquity in the furrows worn by the ropes used in drawing water. It was on a curb of this sort that our Lord sat when He conversed with the woman of Samaria (John iv. 6), and it was this, the usual stone cover, which the woman placed on the mouth of the well at Bahurim (2 Sam. xvii. 19), where A. V. weakens the sense by omitting the article. The usual methods for raising water are the following:—1. The

rope and bucket, or water-skin (Gen. xxiv. 14-20; John iv. 11). 2. The *sakiyeh*, or Persian wheel. This consists of a vertical wheel furnished with a set of buckets or earthen jars, attached to a cord passing over the wheel, which descend empty and return full as the wheel revolves. 3. A modification of the last method, by which a man, sitting opposite to a wheel furnished with buckets, turns it by drawing with his hands one set of spokes prolonged beyond its circumference, and pushing another set from him with his feet. 4. A method very common, both in ancient and modern Egypt, is the *shadoof*, a simple contrivance consisting of a lever moving on a pivot, which is loaded at one end with a lump of clay or some other weight, and has at the other a bowl or bucket. Wells are usually furnished with troughs of wood or stone, into which the water is emptied for the use of persons or animals coming to the wells. Unless machinery is used, which is commonly worked by men, women are usually the water-carriers.

Whale. As to the significance of the Hebrew terms *tun* and *tannin*, variously rendered in the A. V. by "dragon," "whale," "serpent," "sea-monster," see DRAGON. It remains for us in this article to consider the transaction recorded in the Book of Jonah, of that prophet having been swallowed by some "great fish" which in Matt. xii. 40 is called *κῆτος*, rendered in our version by "whale." In the first place, it is necessary to observe, that the Greek word *κῆτος*, used by St. Matthew, is not restricted in its meaning to "a whale," or any *Cetacean*; like the Latin *ceto* or *cetus*, it may denote any sea-monster, either "a whale," or "a shark," or "a seal," or "a tunny of enormous size." Although two or three species of whale are found in the Mediterranean Sea, yet the "great fish" that swallowed the prophet, cannot properly be identified with any *Cetacean*, for, although the *Sperm whale* (*Catodon macrocephalus*) has a gullet sufficiently large to admit the body of a man, yet it can hardly be the fish intended; as the natural food of *Cetaceans* consists of small animals, such as medusae and crustacea. The only fish, then, capable of swallowing a man would be a large specimen of the White Shark (*Carcharias vulgaris*), that dreaded enemy of sailors, and the most voracious of the family of *Squalidae*. This shark, which sometimes attains the length of thirty feet, is quite able to swallow a man whole. Ruysch says that the whole body of a man in armour (*loricated*), has been found in the stomach of a white shark; and Captain King, in his Survey of Australia, says he had caught one which could have swallowed a man with the greatest ease. Blumenbach mentions that a whole horse has been found in a shark, and Captain Basil Hall reports the taking of one in which, besides other things, he found the whole skin of a buffalo which a short time before had been thrown overboard from his ship (i. p. 27). *C. vulgaris* is not uncommon in the Mediterranean; it occurs, as Forskål assures us, in the Arabian Gulf, and is common also in the Indian Ocean.

Wheat. The well-known valuable cereal, cultivated from the earliest times, and frequently mentioned in the Bible. In the A. V. the Heb. words *bar*, *ḏāḡān*, *riphōth*, are occasionally translated "wheat;" but there is no doubt that the proper name of this cereal, as distinguished from "barley," "spelt," &c., is *chittāh* (Chald. *chmīn*). As to the former Hebrew terms see under CORN. The first men-

tion of wheat occurs in Gen. xxx. 14, in the account of Jacob's sojourn with Laban in Mesopotamia. Egypt in ancient times was celebrated for the growth of its wheat; the best quality, according to Pliny (*Nat. Hist.* xviii. 7), was grown in the Thebaid; it was all bearded, and the same varieties; Sir G. Wilkinson writes (*Anc. Egypt.* ii. 39, ed. 1854), "existed in ancient as in modern times, among which may be mentioned the seven-eared quality described in Pharaoh's dream" (Gen. xli. 22). Babylon was also "noted for the excellence of its wheat and other cereals. Modern writers, as Chesney and Rich, bear testimony to the great fertility of Mesopotamia." Syria and Palestine produced wheat of fine quality and in large quantities (Ps. cxlvii. 14, lxxxi. 16, &c.). There appear to be two or three kinds of wheat at present grown in Palestine, the *Triticum vulgare* (var. *hybernum*), the *T. spelta*, and another variety of bearded wheat which appears to be the same as the Egyptian kind, the *T. compositum*. In the parable of the sower our Lord alludes to grains of wheat which in good ground produce a hundred fold (Matt. xiii. 8). The common *Triticum vulgare* will sometimes produce one hundred grains in the ear. Wheat is reaped towards the end of April, in May, and in June, according to the differences of soil and position; it was sown either broadcast, and then ploughed in or trampled in by cattle (Is. xxxii. 20), or in rows, if we rightly understand Is. xviii. 25, which seems to imply that the seeds were planted apart in order to insure larger and fuller ears. The wheat was put into the ground in the winter, and some time after the barley; in the Egyptian plague of hail, consequently, the barley suffered, but the wheat had not appeared, and so escaped injury.

Whirlwind. The Hebrew terms *sāphāh* and *se'ārāh* convey the notion of a violent wind or hurricane, the former because such a wind sweeps away every object it encounters, the latter because the objects so swept away are tossed and agitated. In addition to this, Gesenius gives a similar sense to *galgal*, in Ps. lxxvii. 13 (A. V. "heaven"), and Ez. x. 13 (A. V. "wheel"). It does not appear that any of the above terms express the specific notion of a whirlwind. The most violent winds in Palestine come from the east. The whirlwind is frequently used as a metaphor of violent and sweeping destruction.

Widow. Under the Mosaic dispensation no legal provision was made for the maintenance of widows. They were left dependent partly on the affection of relations, more especially of the eldest son, whose birthright, or extra share of the property, imposed such a duty upon him, and partly on the privileges accorded to other distressed classes, such as a participation in the triennial third tithe (Deut. xiv. 29, xxvi. 12), in leasing (Deut. xiv. 19-21), and in religious feasts (Deut. xvi. 11, 14). With regard to the remarriage of widows, the only restriction imposed by the Mosaic law had reference to the contingency of one being left childless, in which case the brother of the deceased husband had a right to marry the widow (Deut. xxv. 5, 6; Matt. xxii. 23-30). In the Apostolic Church the widows were sustained at the public expense, the relief being daily administered in kind, under the superintendence of officers appointed for this special purpose (Acts vi. 1-6). Particular directions are given by St. Paul as to the class of persons entitled to such public maintenance (1 Tim. v. 3-16). Out

of the body of such widows a certain number were to be enrolled, the qualifications for such enrolment being (1.) that they were not under sixty years of age; (2.) that they had been "the wife of one man," probably meaning *but once married*; and (3.) that they had led useful and charitable lives (vers. 9, 10). The object of the enrolment is by no means obvious. If we were to form our opinion solely on the qualifications above expressed, we should conclude that the enrolled widows formed an ecclesiastical order, having duties identical with or analogous to those of the deaconesses of the early Church. But if the passage be read as a whole, then the impression derived from it will be that the enrolment was for an eleemosynary purpose, and that the main condition of enrolment was, as before, poverty. But while we thus believe that the primary object of the enrolment was simply to enforce a more methodical administration of the Church funds, it is easy to understand how the order of widows would obtain a quasi-official position in the Church. Hence we find the term "widow" used by early writers in an extended sense, to signify the adoption of the conditions by which widows, enrolled as such, were bound for the future. We are not disposed to identify the widows of the Bible either with the deaconesses or with the *πρεσβυτέριδες* of the early Church. The order of widows existed as a separate institution, contemporaneously with these offices, apparently for the same eleemosynary purpose for which it was originally instituted.

Wife. [MARRIAGE.]

Wild Beasts. [BEASTS.]

Wilderness of the Wandering. With all the material for fixing the localities of the Exodus, the evidence for many of them is so slight that the whole question is involved in much obscurity. The uncertainties commence from the very starting-point of the route of the Wandering. It is impossible to fix the point at which in "the wilderness of Etham" (Num. xxxiii. 6, 7) Israel, now a nation of freemen, emerged from that sea into which they had passed as a nation of slaves. The fact that from "Etham in the edge of the wilderness," their path struck across the sea (Ex. xiii. 20), and from the sea into the same wilderness of Etham, seems to indicate the upper end of the furthest tongue of the Gulf of Suez as the point of crossing. There seems reason also to think that this gulf had then, as also at Ezion-Geber, a further extension northward than at present, owing to the land having upheaved its level. [For the further discussion of this subject, see RED SEA, PASSAGE OF.] Assuming the passage of the Red Sea to have been effected at some spot N. of the now extreme end of the Gulf of Suez, the Israelites would march from their point of landing a little to the E. of S. Here they were in the wilderness of Shur, and in it "went three days and found no water." The next point mentioned is Marah. The *'Ain el-Hawāra* has been thought by most travellers since Burckhardt's time to be Marah. On this first section of their desert-march, Dr. Stanley (*S. and P.* 37) remarks, "There can be no dispute as to the general track of the Israelites after the passage [of the Red Sea]. If they were to enter the mountains at all, they must continue in the route of all travellers, between the sea and the table-land of the *Tih*, till they entered the low hills of *Gharindel*. According to the view taken of the scene of the passage, Marah may either be at the 'springs of Moses,' or

WILDERNESS OF THE WANDERING

else at *Hawdra* or *Ghüründel*." He adds in a note, Dr. Graul, however, was told . . . of a spring near *Tih el-Amära*, right (i. e. south) of *Hawdra*, so bitter that neither men nor camels could drink of it. From hence the road goes straight to *Wady Ghüründel*. Seetzen inclines to view favourably the identification of *el-Amära* with Marah. It seems certain, however, that *Wady Ghüründel*—whether it be Marah, as Lepsius and (although doubtfully) Seetzen thought, or Elin as Niebuhr, Robinson, and Kruse—must have lain on the line of march, and almost equally certain that it furnished a camping station. The scenery in this region becomes a succession of watercourses; and the *Wady Tayyeh*, connected with *Ghüründel* by *Useit*, is so named from the goodly water and vegetation which it contains. These three wadis encompass on three sides the *Jebel Hummādh*; the sea, which it precipitously overhangs, being on the fourth. To judge from the configuration as given in the maps, there seems no reason why all three should not have combined to form Elin, or at any rate, as Dr. Stanley suggests, two of them. From Elin, the next stage brought the people again to the sea. This fact, and the enviable position in respect of water supply, and consequent great fertility, enjoyed by *Tür* on the coast, would make it seem probable that *Tür* was the locality intended; but as it lies more than seventy miles, in a straight line, from the nearest probably assignable spot for Elin, such a distance makes it a highly improbable site for the next encampment. The account in Ex. xvi. knows nothing of this encampment by the sea, but brings the host at once into "the wilderness of Sin." The modern name for this is *el-Kāa*. In the wilderness of Sin occurred the first murmuring for food, and the first fall of manna. [MANNA.] Supposing now that the alluvial plain, where it first begins to broaden to a significant size, is "the wilderness of Sin," all further questions, till we come to Sinai, turn on the situation assigned to Rephidim. If, as seems most likely, Rephidim be found at *Feirān* [REPHIDIM], it becomes almost certain that the track of the host lay to the north of *Serbāl*, a magnificent five-peaked mountain, which some have thought to be Sinai, and which becomes first visible at the plain of *Murkhāh*. [SINAI.] *Feirān* must have been gained by some road striking off from the sea-coast, like the *Wady Mokatteb*, which is now the usual route from Cairo thither, perhaps by several parallel or converging lines. Dr. Stanley, who suggests the road by the S. of *Serbāl*, through *Wady Hebrān* (Robinson, i. 95), as also a possible route to Sinai (S. and P. 38, 4), and designates it "the southern" one, omits to propose any alternative station for Rephidim; as he also does in the case of "the northern" route being accepted. The identification of Sinai itself will probably never be free from obscurity. For the grounds on which a slight preponderance of probability rests in favour of the *Jebel Mūsa*, see SINAI. The approach to *Jebel Mūsa* from the W. is only practicable on foot. It lies through *Wady Solam* and the *Nūbb Hāwy*, "Pass of the Wind," whose stair of rock leads to the second or higher stage of the great mountain-labyrinth. From the head of this pass the cliff-front of Sinai comes in sight through "a long continued plain between two precipitous mountain-ranges, of black and yellow granite." This is the often-mentioned plain *er-Rādheb*. Deep gorges enter it on each side, and the

convent and its gardens close the view. The ascent of *Jebel Mūsa*, which contains "high valleys with abundant springs," is by a long flight of rude steps winding through crags of granite.—The sojourn of the Israelites for a year in the neighbourhood of Mount Sinai was an eventful one. The statements of the Scriptural narrative which relate to the receiving of the two Tables, the Golden Calf, Moses' vision of God, and the visit of Jethro, are too well known to need special mention here. The last incident mentioned before the wilderness of Sinai was quitted for that of Paran is the intended departure of Hobab the Kenite, which it seems he abandoned at Moses' urgency. • They now quitted the Sinaitic region for that of Paran, in which they went three days without finding a permanent encampment (Num. i., ix. 15-23, x. 13, 33, xi. 35, xii. 16). A glance at Kiepert's, or any map showing the region in detail, will prove that here a choice of two main routes begins, in order to cross the intervening space between Sinai and Canaan, which they certainly approached in the first instance on the southern, and not on the eastern side. The roads from Sinai, and those from Petra towards Gaza and Hebron, all converge into one of two trunk-lines of route (Robinson, i. 147, 151, 2, ii. 186). Taberah and Kibroth-Hattaavah, both seem to belong to the same encampment where Israel abode for at least a month (xi. 20), being names given to it from the two events which happened there. These stations seem from Num. x. 11-13, 33-36, to have lain in the wilderness of Paran; but possibly the passage x. 11-13 should come after that 33-36, and the "three days' journey" of ver. 33 lie still in the wilderness of Sinai; and even Taberah and Hazeroth, reached in xi. xii., also there. Hazeroth is coupled with Dizahab, which last seems undoubtedly the *Dahab* on the shore of the gulf of Akabah (Deut. i.). This makes a seaward position likely for Hazeroth, which is probably *el-Hūderā*. In Hazeroth the people tarried seven days, if not more (Num. xi. 35, xii.), during the exclusion of Miriam from the camp while leprous. The next permanent encampment brought them into the wilderness of Paran, and here the greatest difficulties begin. These difficulties resolve themselves into two main questions. Did Israel visit Kadesh once, or twice? And where is it now to be looked for? We read in Num. x. 11, 12, that "on the twentieth day of the second month of the second year . . . the children of Israel took their journeys out of the wilderness of Sinai, and the cloud rested in the wilderness of Paran." The latter statement is probably to be viewed as made by anticipation; as we find that, after quitting Kibroth-Hattaavah and Hazeroth, "the people pitched in the wilderness of Paran" (Num. xii. 16). Here the grand pause was made while the spies, "sent," it is again impressed upon us (xiii. 3), "from the wilderness of Paran," searched the land for "forty days," and returned "to Moses and to Aaron, and to all the congregation . . . unto the wilderness of Paran to Kadesh." This is the first mention of Kadesh in the narrative of the Wanderings (vers. 25, 26). From considerations adduced under KADESH, it seems that Kadesh probably means, firstly, a region of the desert spoken of as having a relation, sometimes with the wilderness of Paran, and sometimes with that of Zin (comp. vers. 21, 26); and secondly, a distinct city within that desert limit. Now all the conditions of the narra-

tive of the departure and return of the spies, and of the consequent despondency, murmuring, and penal sentence of wandering, will be satisfied by supposing that the name "Kadesh," here means the region merely. It has been proposed under KADESH to regard part of the 'Arabah, including all the low ground at the southern and south-western extremity of the Dead Sea, as the wilderness of Zin. Then the broad lower north-eastern plateau, including both its slopes as described above, will be defined as the Paran wilderness proper. If we assume the higher superimposed plateau to bear the name of "Kadesh" as a desert district, and its south-western mountain wall to be "the mountain of the Amorites," then the Paran wilderness, so far as synonymous with Kadesh, will mean most naturally the region where that mountain-wall from *Jebel Arâif en-Nâkah* to *Jebel Mûkhrâh*, and perhaps thence northward along the other side of the angle of the highest plateau, overhangs the lower terrace of the *Tih*. The spies' return to "the wilderness of Paran to Kadesh" means to that part of the lower plateau where it is adjacent to the higher, and probably the eastern side of it. The expression, "from Kadesh-barnea even unto Gaza," is decisive of an eastern site for the former (Josh. x. 41). Here, as is plain both from Num. xiv. 40-45 and from Deut. i. 41-44, followed the wayward attempt of the host to win their way, in spite of their sentence of prohibition, to the "hill" (Num. xiv. 40-45, Deut. i. 41-44) or "mountain" of the Amalekites and Canaanites, or Amorites, and their humiliating defeat. Here then the penal portion of the wanderings commences, and the great bulk of it, comprising a period of nearly thirty-eight years, passes over between this desert in Num. xiv., and the resumption of local notices in Num. xx., where again the names of "Zin" and "Kadesh" are the first that meet us. We gather from Deut.

i. 46, that the greater part, perhaps the whole, of this period of nearly thirty-eight years, if so we may interpret the "many days" there spoken of, was passed in Kadesh,—the region, that is, not the city. But Num. xx. 1 brings us to a new point of departure. The people have grown old, or rather again young, in their wanderings. Here, then, we are at "the desert of Zin, in the first month," with the "people abiding in Kadesh." By the sequel, "Miriam died there, and was buried there," a more precise definition of locality now seems intended; which is further confirmed by the subsequent message from the same place to the king of Edom, "Behold, we are in Kadesh, a city in the uttermost of thy border" (v. 16). This, then, must be supposed to coincide with the encampment, recorded as taking place "in the wilderness of Zin, which is Kadesh," registered in the itinerary (xxxiii. 36). We see then why, in that register of specific camping-spots, there was no necessity for any previous mention of "Kadesh;" because the earlier notice in the narrative, where that name occurs, introduces it not as an individual encampment, but only as a region, within which perpetual changes of encampment went on for the greater part of thirty-eight years. We also see that they came twice to Kadesh the region, if the city Kadesh lay in it, and once to Kadesh the city; but once only to Kadesh the region, if the city lay without it. We are not told how the Israelites came into possession of the city Kadesh, nor who were its previous occupants. The itinerary takes here another stride from Kadesh to Mount Hor. In Deuteronomy (x. 6, 7) we find a short list of names of localities, on comparing which with the itinerary, we get some clue to the line of march from the region Kadesh to Ezion-geber southwards. Their order is, however, slightly changed, standing in the two passages as follows:—

CONJECTURAL SITE.	NUM. xxxiii. 30-35.	DEUT. x. 6, 7.
(a) 'Ain Hasb, N.W. in the 'Arabah.	(a) (Iashmonah).	
(1) Kusheibeh, mouth of the Wady Abu, near the foot of Mount Hor.	(1) Moseroth.	(1) Beeroth of the children of Jaakan.
(2) 'Ain Ghûrindel.	(2) Bene-Jaakan.	(2) Mosera. ●
(3) Wady el-Ghûdhâghûdh.	(3) Hor-hagîdgad.	(3) Gudgodah.
(4) Confluence of Wady el-Adhbeh with el-Jerafeh.	(4) Jotbathah. (Ebronah). (Ezion-geber).	(4) Jotbath.

Now in Num. xx. 14, 16, 22-29, the narrative conducts us from Kadesh the city, reached in or shortly before "the fortieth year," to Mount Hor, where Aaron died, a portion of which route is accordingly that given in Deut. x. 6, 7; whereas the parallel column from Num. xxxiii. gives substantially the same route as pursued in the early part of the penal wandering, when fulfilling the command given in the region Kadesh, "turn you, get you into the wilderness by the way of the Red Sea" (Num. xiv. 25; Deut. i. 40), which command we further learn from Deut. ii. 1 was strictly acted on, and which a march towards Ezion-geber would exactly fulfil. The mountains on the west of the 'Arabah must have been always poor in water, and form a dreary contrast to the rich springs of the eastern side in Mount Seir. From the cliff front of this last, Mount Hor stands out prominently. It has been suggested [HOR HAGIDGAD] that the name Ha-gîdgad, or Gudgodah, may possibly be retraced in the Wady el-Ghûdhâghûdh, which has a confluence with the Wady el-Jerafeh. This

latter runs into the 'Arabah on the west side. Jotbath, or Jotbathah, is described as "a land of rivers of waters" (Deut. x. 7); and may stand for any confluence of wadys in sufficient force to justify that character. It should certainly be in the southern portion of the 'Arabah, or a little to the west of the same. The probabilities of the whole march from Sinai, then, seem to stand as follows: they proceeded towards the N.E. to the 'Ain el-Hûderâh (Hazereth), and thence quitted the maritime region, striking directly northwards to el-'Ain, and thence by a route wholly unknown, perhaps a little to the E. of it across the lower eastern spurs of the el-Tih range, descending the upper course of the Wady el-Jerafeh, until the south-eastern angle of the higher plateau confronted them at the *Jebel el-Mûkhrâh*. Hence, after despatching the spies, they moved perhaps into the 'Arabah, or along its western overhanging hills, to meet their return. Then followed the disastrous attempt at or near es-Sûfa (Zephath), and the penal wandering in the wilderness of Kadesh, with a track wholly undeter-

ined, save in the last half-dozen stations to Ezion-geber inclusively, as shown just above. They then marched on Kadesh the city, probably up the 'Arabah by these same stations, took it, and sent from there the message to Edom. The refusal with which it was met forced them to retrace the 'Arabah once more, and meanwhile Aaron died. Thus the same stations (Deut. x. 6, 7) were passed again, with the slight variation just noticed, probably caused by the command to resort to Mount Hor which that death occasioned. Thence, after reaching 'Akabah, and turning north-eastward, they passed by a nearly straight line towards the eastern border of Moab. Of the stations in the list from Rithmah to Mithcah, both inclusive, nothing is known. The latter, with the few preceding it, probably belong to the wilderness of Kadesh. There is near Elath a promontory known as the *Rās Um Hays*, "the mother of serpents," which seem to abound in the region adjacent; and, if we may suppose this the scene of that judgment, the event would be thus connected with the line of march, rounding the southern border of Mount Seir, whence "turning northward," having "compassed that mountain (Mount Seir) long enough," they "passed by the way of the wilderness of Moab" (v. 3, 8). Some permanent encampment, perhaps represented by Zalmonah in Num. xxxiii. 41, 42, seems here to have taken place, to judge from the urgent expression of Moses to the people in Deut. ii. 13: "Now rise up, said I, and get you over the brook Zered," which lay further N. a little E., being probably the *Wady el-Ahsy*. [ZERED.] The delay caused by the plague of serpents may be the probable account of this apparent urgency, which would on this view have taken place at Zalmonah; and as we have connected the scene of that plague with the neighbourhood of Elath, so, if we suppose Zalmonah to have laid in the *Wady Ithn*, which has its junction with the 'Arabah close to 'Akabah, the modern site of Elath, this will harmonise the various indications, and form a suitable point of departure for the last stage of the wandering, which ends at the brook Zered (v. 14). Three stations, Punon, Obboth, and Ije-Abarim, were passed between this locality and the brook or valley of Zered (Num. xxi. 10-12, comp. xxxiii. 43, 44); but the interval between Ije-Abarim and Nebo, which last corresponds probably (see Deut. xxxiv. 1) with the Pisgah of xxi. 20, is filled by two stations merely, named Dibon-gad and Almon-diblathaim, from whence we may infer that in these two only were permanent halts made. One passage remains in which several names of places yet occur which are identical with some herein considered. The passage in question is Deut. i. 1, where Moses is said to have spoken "on this side Jordan in the wilderness, in the plain over against the Red Sea, between Paran and Tophel, and Laban and Hazeroth and Dizahab." Paran here is perhaps the El Paran to which Chedorlaomer came in Gen. xiv. 6, and probably Tophel the well-known *Tefleth* to the N.N.E. of Petra; and similarly the Red Sea, "over against" which it is spoken of as lying, is defined by Dizahab on its coast, and Hazeroth near the same. The introduction of "Laban" is less clear.

Willows (Heb. 'arabim), undoubtedly the correct rendering of the above Hebrew term, as is proved by the old versions and the kindred Arabic *gharab*. Willows are mentioned in Lev. xxiii. 40; Job xl. 22; Is. xlv. 4; Ps. cxxxvii. 2. With respect

CON. D. B.

to the tree upon which the captive Israelites hung their harps, there can be no doubt that the weeping willow (*Salix Babylonica*) is intended. This tree grows abundantly on the banks of the Euphrates, in other parts of Asia as in Palestine. Sprengel seems to restrict the *arab* to the *Salix Babylonica*; but there can scarcely be a doubt that the term is generic, and includes other species of the large family of *Salices*, which is probably well represented in Palestine and the Bible lands, such as the *Salix alba*, *S. viminalis* (osier), *S. Aegyptiaca*, which latter plant Sprengel identifies with the *safsaf*, which word is probably the same as the *Tsaph-tsaphah* of Ezekiel (xvii. 5), a name in Arabic for "a willow."

Willows, the Brook of the. A wady mentioned by Isaiah (xv. 7) in his dirge over Moab. His language implies that it was one of the boundaries of the country—probably, as Gesenius observes, the southern one. It is possibly identical with a wady mentioned by Amos (vi. 14) as the then recognised southern limit of the northern kingdom. This latter appears in the A. V., as "the river of the wilderness." Widely as they differ in the A. V., the names are all but identical in the original, the only difference being that it is plural in Isaiah and singular in Amos. In the latter it is *ha-Arabah*, the same name which is elsewhere almost exclusively used for the Valley of the Jordan, the *Ghór* of modern Arabs. If the two are regarded as identical, and the latter as the accurate form of the name, then it is probable that the *Wady el-Ahsy* is intended. Should, however, the *Nichal ha-Arabim* be rendered "the Willow-torrent"—which has the support of Gesenius and Pusey, then it is worthy of remark that the name *Wady Safsaf*, "Willow Wady," is still attached to a part of the main branch of the ravine which descends from *Kerak* to the north end of the peninsula of the Dead Sea. Either of these positions would agree with the requirements of either passage.

Wills. [See HEIR.] Under a system of close inheritance like that of the Jews, the scope for bequest in respect of land was limited by the right of redemption and general re-entry in the Jubilee year. But the law does not forbid bequests by will of such limited interest in land as was consistent with those rights. The case of houses in walled towns was different, and there can be no doubt that they must, in fact, have frequently been bequeathed by will (Lev. xxv. 30). Two instances are recorded in the O. T. under the Law, of testamentary disposition, (1) effected in the case of Ahithophel (2 Sam. xvii. 23), (2) recommended in the case of Hezekiah (2 K. xx. 1; Is. xxxviii. 1).

in Ruth iii. 15, but it signifies rather a kind of shawl or mantle.

Window. The window of an Oriental house consists generally of an aperture closed in with lattice-work (Eccl. xii. 3, A. V. "window;" Hos. xiii. 8, A. V. "chimney;" Cant. ii. 9; Judg. v. 23; Prov. vii. 6, A. V. "casement"). Glass has been introduced into Egypt in modern times as a protection against the cold of winter, but lattice-work is still the usual, and with the poor the only, contrivance for closing the window. The windows generally look into the inner court of the house, but in every house one or more look into the street.

In Egypt these outer windows generally project over the doorway.

Winds. That the Hebrews recognised the existence of four prevailing winds as issuing, broadly speaking, from the four cardinal points, north, south, east, and west, may be inferred from their custom of using the expression "four winds" as equivalent to the "four quarters" of the hemisphere (Ez. xxxvii. 9; Dan. viii. 8; Zech. ii. 6; Matt. xxiv. 31). The North wind, or, as it was usually called "the north," was naturally the coldest of the four (Ecclus. xliii. 20), and its presence is hence invoked as favourable to vegetation in Cant. iv. 16. It is described in Prov. xv. 23, as bringing rain; in this case we must understand the north-west wind. The north-west wind prevails from the autumnal equinox to the beginning of November, and the north wind from June to the equinox. The East wind crosses the sandy wastes of Arabia Deserta before reaching Palestine, and was hence termed "the wind of the wilderness" (Job i. 19; Jer. xiii. 24). It blows with violence, and is hence supposed to be used generally for any violent wind (Job xvii. 21, xxxviii. 24; Ps. xlviii. 7; Is. xxvii. 8; Ez. xxvii. 26). It is probably in this sense that it is used in Ex. xiv. 21. The Greek translators appear to have felt the difficulty of rendering *káthēn* in Gen. xli. 6, 23, 27, because the parching effects of the east wind, with which the inhabitants of Palestine are familiar, are not attributable to that wind in Egypt. In Palestine the east wind prevails from February to June. The South wind, which traverses the Arabian peninsula before reaching Palestine, must necessarily be extremely hot (Job xxxvii. 17; Luke xii. 55). In Egypt the south wind (*khamsēen*) prevails in the spring, a portion of which in the months of April and May is termed *el-khamsēen* from that circumstance. The West and south-west winds reach Palestine loaded with moisture gathered from the Mediterranean, and are hence expressively termed by the Arabs "the fathers of the rain." Westerly winds prevail in Palestine from November to February. In addition to the four regular winds, we have notice in the Bible of the local squalls (Mark iv. 37; Luke viii. 23), to which the Sea of Genesareth was liable. In the narrative of St. Paul's voyage we meet with the Greek term *lips* (λίψ) to describe the south-west wind; the Latin *Carus* or *Caurus* (χάρως), the north-west wind (Acts xxvii. 12); and *euroclydon*, a wind of a very violent character coming from E.N.E. (Acts xxvii. 14).

Wine. The manufacture of wine is carried back in the Bible to the age of Noah (Gen. ix. 20, 21), to whom the discovery of the process is apparently, though not explicitly, attributed. The natural history and culture of the vine is described under a separate head. The only other plant whose fruit is noticed as having been converted into wine was the pomegranate (Cant. viii. 2). In Palestine the vintage takes place in September, and is celebrated with great rejoicings. The ripe fruit was gathered in baskets (Jer. vi. 9), as represented in Egyptian paintings, and was carried to the wine-press. It was then placed in the upper one of the two vats or receptacles of which the wine-press was formed, and was subjected to the process of "treading," which has prevailed in all ages in Oriental and South-European countries (Neh. xiii. 15; Job xxiv. 11; Is. xvi. 10; Jer. xxv. 30, xlviii. 33; Am. ix. 13; Rev. xix. 15). A certain amount of juice ex-

uded from the ripe fruit from its own pressure before the treading commenced. This appears to have been kept separate from the rest of the juice, and to have formed the *gleukos* or "sweet wine" noticed in Acts ii. 13. The "treading" was effected by one or more men according to the size of the vat. They encouraged one another by shouts and cries (Is. xvi. 9, 10; Jer. xxv. 30, xlviii. 33). Their legs and garments were dyed red with the juice (Gen. xlix. 11; Is. lxiii. 2, 3). The expressed juice escaped by an aperture into the lower vat, or was at once collected in vessels. A hand-press was occasionally used in Egypt, but we have no notice of such an instrument in the Bible. As to the subsequent treatment of the wine, we have but little information. Sometimes it was preserved in its unfermented state, and drunk as must, but more generally it was bottled off after fermentation, and, if it were designed to be kept for some time, a certain amount of lees was added to give it body (Is. xxv. 6). The wine consequently required to be "refined" or strained previously to being brought to table (Is. xxv. 6). The produce of the wine-press was described in the Hebrew language by a

Egyptian Wine-press, from Wilkinson.

variety of terms, indicative either of the quality or of the use of the liquid. The most general term for wine is *yeyn*, which is undoubtedly connected with the Greek *oinos*, the Latin *vinum*, and our "wine." It has hitherto been the current opinion that the Indo-European languages borrowed the term from the Hebrews. The reverse, however, appears to be the case: the word belongs to the Indo-European languages. *Tirōsh* is referred to the root *yārash*, "to get possession of," but its etymological meaning is not certain. *Asis* (Cant. viii. 2; Is. xlix. 26; Joel i. 5, iii. 18; Am. ix. 13) is derived from a word signifying "to tread," and therefore refers to the method by which the juice was expressed from the fruit. It would very properly refer to *new* wine as being recently trodden out, but not necessarily to unfermented wine. *Sōbe* is derived from a root signifying to "soak" or "drink to excess" (Is. i. 22; Hos. iv. 18; Nah. i. 10). *Chemer* (Deut. xxii. 14), in the Chaldee *chamar* (Ezr. vi. 9, vii. 22) and *chamarā* (Dan. v. 1 ff.), conveys the notion of *foaming* or *ebullition*, and may equally well apply to the process of fermentation or to the frothing of liquid freshly poured out, in which latter case it might be used of an unfermented liquid. *Mesec* (Ps. lxxv. 8) *mozy*

(Cant. vii. 2), and *mimsāc* (Prov. xxiii. 30; Is. lxxv. 11), imply a mixture of wine with some other substance. We may further notice *shēdār*, a generic term applied to all fermented liquors except wine *chémetz*, a weak sour wine, ordinarily termed vinegar; *āshishāh*, rendered "flagon of wine" in the A. V. (2 Sam. xvi. 1; 1 Chr. xvi. 3; Cant. ii. 5; Hos. iii. 1), but really meaning a cake of pressed raisins; and *shēmārīn*, properly meaning the "lees" or dregs of wine, but in Is. xxv. 6 transferred to wine that had been kept on the lees for the purpose of increasing its body. In the New Testament we meet with the following terms: *oinos*, answering to *yayin* as the general designation of wine; *gleukos*, properly *sweet* wine (Acts ii. 13); *sikera*, a Grecised form of the Hebrew *shēdār*; and *akera*, vinegar. From the terms themselves we pass on to an examination of such passages as seem to elucidate their meaning. Both *yayin* and *tirōsh* are occasionally connected with expressions that would apply properly to a fruit. It should be observed, however, that in most, if not all, the passages where these and similar expressions occur, there is something to denote that the fruit is regarded not simply as fruit, but as the raw material out of which wine is manufactured. The question whether either of the above terms ordinarily signified a solid substance, would be at once settled by a reference to the manner in which they were consumed. With regard to *yayin* we are not aware of a single passage which couples it with the act of *eating*. In the only passage where the act of consuming *tirōsh* alone is noticed (Is. lxii. 8, 9), the verb is *shātāhāh*, which constantly indicates the act of *drinking*. There are, moreover, passages which seem to imply the actual manufacture of *tirōsh* by the same process by which wine was ordinarily made (Mic. vi. 15; Prov. iii. 10; Joel ii. 24). Lastly, we have intimations of the effect produced by an excessive use of *yayin* and *tirōsh*. To the former are attributed the "darkly flashing eye" (Gen. xlix. 12; A. V. "red"), the unbridled tongue (Prov. xx. 1; Is. xxvii. 7), the excitement of the spirit (Prov. xxxi. 6; Is. v. 11; Zech. ix. 15, x. 7), the enchainment of its votaries (Hos. iv. 11), the perverted judgment (Prov. xxxi. 5; Is. xxviii. 7), the indecent exposure (Hab. ii. 15, 16), and the sickness resulting from the heat (*chenāh*, A. V. "bottles") of wine (Hos. vii. 5). The allusions to the effects of *tirōsh* are confined to a single passage, but this a most decisive one, viz., Hos. iv. 11, "Whoredom and wine (*yayin*), and new wine (*tirōsh*) take away the heart," where *tirōsh* appears as the climax of engrossing influences, in immediate connexion with *yayin*. The impression produced on the mind by a general review of the above notices is, that both *yayin* and *tirōsh* in their ordinary and popular acceptance referred to fermented, intoxicating wine. The notices of fermentation are not very decisive. A certain amount of fermentation is implied in the distension of the leather bottles when new wine was placed in them, and which was liable to burst old bottles. It is very likely that new wine was preserved in the state of must by placing it in jars or bottles, and then burying it in the earth. But we should be inclined to understand the passages above quoted as referring to wine drawn off before the fermentation was complete, either for immediate use, or for the purpose of *ferming* it into sweet wine after the manner described by the Geoponic writers. The remaining terms call for but few re-

marks. There can be no question that *asā* means wine, and in this case it is observable that it forms part of a Divine promise (Joel iii. 18; Am. ix. 13) very much as *tirōsh* occurs elsewhere, though other notices imply that it was the occasion of excess (Is. xlix. 26; Joel i. 5). We think the passages quoted favour the idea of *strength* rather than *sweetness* being the characteristic of *sāba*. The term occurs in Hos. iv. 18, in the sense of a debauch. The *mingling* implied in the term *mesek* may have been designed either to increase, or to diminish the strength of the wine according as spices or water formed the ingredient that was added. The notices chiefly favour the former view; for mingled liquor was prepared for high festivals (Prov. ix. 2, 5), and occasions of excess (Prov. xxiii. 30; Is. v. 22). At the same time strength was not the sole object sought: the wine "mingled with myrrh" given to Jesus, was designed to deaden pain (Mark xv. 23), and the spiced pomegranate wine prepared by the bride (Cant. viii. 2) may well have been of a mild character. In the New Testament the character of the "sweet wine," noticed in Acts ii. 13, calls for some little remark. It could not be *new* wine in the proper sense of the term, inasmuch as about eight months must have elapsed between the vintage and the feast of Pentecost. The explanations of the ancient lexicographers rather lead us to infer that its luscious qualities were due, not to its being recently made, but to its being produced from the very purest juice of the grape. There can be little doubt that the wines of Palestine varied in quality, and were named after the localities in which they were made. The only wines of which we have special notice, belonged to Syria: these were the wine of Helbon (Ez. xxvii. 18), and the wine of Lebanon, famed for its aroma (Hos. xiv. 7). With regard to the uses of wine in private life there is little to remark. It was produced on occasions of ordinary hospitality (Gen. xiv. 18), and at festivals, such as marriages (John ii. 8). The monuments of ancient Egypt furnish abundant evidence that the people of that country, both male and female, indulged liberally in the use of wine. Under the Mosaic law wine formed the usual drink-offering that accompanied the daily sacrifice (Ex. xxix. 40), the presentation of the first-fruits (Lev. xiii. 13), and other offerings (Num. xv. 5). Tithe was to be paid of wine as of other products. The priest was also to receive first-fruits of wine, as of other articles (Deut. xviii. 4; comp. Ex. xxii. 29). The use of wine at the paschal feast was not enjoined by the Law; but had become an established custom, at all events in the post-Babylonian period. The wine was mixed with warm water on these occasions, as implied in the notice of the warming kettle. Hence in the early Christian Church it was usual to mix the sacramental wine with water.

Wine-press. From the scanty notices contained in the Bible we gather that the wine-presses of the Jews consisted of two receptacles or vats placed at different elevations, in the upper one of which the grapes were trodden, while the lower one received the expressed juice. The two vats are mentioned together only in Joel iii. 13:—"The press (*gath*) is full: the fats (*yekābīm*) overflow"—the upper vat being full of fruit, the lower one overflowing with the must. *Gath* is also strictly applied to the upper vat in Neh. xiii. 15, Lam. i. 15 and Is. lxiii. 2, with *pārāh* in a parallel sense in the following verse. The term *pārāh*, as used in Hag. ii. 16,

probably refers to the contents of a wine-vat, rather than to the press or vat itself. The two vats were usually dug or hewn out of the solid rock (Is. v. 2, margin; Matt. xxi. 23). Ancient wine-presses, so constructed, are still to be seen in Palestine.

Winnowing. [AGRICULTURE.]

Wisdom of Jesus, son of Sirach. [ECCLESIASTICUS.]

Wisdom, the, of Solomon. 1. *Text.*—The Book of Wisdom is preserved in Greek and Latin texts, and in subsidiary translations into Syriac, Arabic, and Armenian. Of these latter, the Armenian is said to be the most important. The Greek text, which is undoubtedly the original, offers no remarkable features. The chief Greek MSS. in which the book is contained are the *Codex Sinaiticus* (M), the *Cod. Alexandrinus* (A), the *Cod. Vaticanus* (B), and the *Cod. Ephraemi reser.* (C). The entire text is preserved in the three former; in the latter, only considerable fragments: viii. 5-xi. 10; xiv. 19-xvii. 18; xviii. 24-xix. 22. Sabatier used four Latin MSS. of the higher class for his edition.—2. *Contents.*—The book has been variously divided; but it seems to fall most naturally into two great divisions: (1) i.-ix.; (2) x.-xix. The first contains the doctrine of Wisdom in its moral and intellectual aspects; the second, the doctrine of Wisdom as shown in history. Each of these parts is again capable of subdivision. The whole argument may be presented in a tabular form in the following shape:—I. Ch. i.-ix. *The doctrine of Wisdom in its spiritual, intellectual, and moral aspects.* (a). i.-v. Wisdom the giver of happiness and immortality: The conditions of wisdom (i. 1-11)—Uprightness of thought (1-5)—Uprightness of word (6-11).—The origin of death (i. 12-ii. 24): Sin (in fact) by man's free will (i. 12-16)—The reasoning of the sensualist (ii. 1-20)—Sin (in source) by the envy of the devil (21-24).—The godly and wicked in life (as mortal), (iii. 1-iv. 1). In chastisement (iii. 1-10)—In the results of life (iii. 11-iv. 6)—In length of life (7-20).—The godly and wicked after death (v.): The judgment of conscience (1-14)—The judgment of God—On the godly (15-16)—On the wicked (17-23).—(β). vi.-ix. Wisdom the guide of life:—Wisdom the guide of princes (vi. 1-21)—The responsibility of power (1-11)—Wisdom soon found (12-16)—Wisdom the source of true sovereignty (17-21).—The character and realm of wisdom: Open to all (vi. 22-vii. 7)—Pervading all creation (vii. 8-viii. 1)—Swaying all life (viii. 2-17)—Wisdom the gift of God (viii. 17-ix.): Prayer for wisdom (ix.).—II. Ch. x.-xix. *The doctrine of Wisdom in its historical aspects:*—(a). Wisdom a power to save and chastise: Wisdom seen in the guidance of God's people from Adam to Moses (x.-xi. 4).—Wisdom seen in the punishment of God's enemies (xi. 5-xii.): The Egyptians (xi. 5-xii. 1)—The Canaanites (xii. 2-18)—The lesson of mercy and judgment (19-27).—(β). The growth of idolatry the opposite to wisdom: The worship of nature (xiii. 1-9)—The worship of images (xiii. 10-xiv. 13)—The worship of deified men (xiv. 14-21)—The moral effects of idolatry (xiv. 22-31).—(γ). The contrast between true worshippers and idolaters (xv.-xix.): The general contrast (xv. 1-17)—The special contrast at the Exodus: The action of beasts (xv. 18-xvi. 13)—The action of the forces of nature—water, fire (xvi. 14-29)—The symbolic darkness (xvii.-xviii. 4)—The action of death (xviii. 5-25)—The powers of nature changed in their

working to save and destroy (xix. 1-21)—Conclusion (xix. 21).—3. *Unity and integrity.*—The book forms a complete and harmonious whole. But the distinct treatment of the subject, theoretically and historically, in two parts, has given occasion from time to time for maintaining that it is the work of two or more authors. C. F. Houbigant supposed that the first nine chapters were the work of Solomon, and that the translator of the Hebrew original (probably) added the latter chapters. Eichhorn fixed the end of the original book at ch. xi. 1. Nachtigal imagined that he could trace in the book the records of (so to speak) an antiphonic "Praise of Wisdom," delivered in three sittings of the sacred schools by two companies of doctors. Bretschneider following out the simpler hypothesis, found three different writings in the book, of which he attributed the first part (i. 1-vi. 8) to a Palestinian Jew of the time of Antiochus Epiph., the second (vi. 9-x.) to a philosophic Alexandrine Jew of the time of our Lord, and the third (xii.-xix.) to a contemporary, but uneducated Jew, who wrote under the influence of the rudest national prejudices. The eleventh chapter was, as he supposed, added by the compiler who brought the three chief parts together. Bertholdt fell back upon a modification of the earliest division. He included chap. i.-xii. in the original book, which he regarded as essentially philosophical, while the later addition (xiii.-xix.) is, in his judgment, predominantly theological. Some, however, admitting the unity of the book, have questioned its integrity. Eichhorn imagined that it was left imperfect by its author; Grotius, apparently, that it was mutilated by some accident of time; and others have been found, in later times, to support each opinion. The idea that the book has been interpolated by a Christian hand is as little worthy of consideration as the idea that it is incomplete.—4. *Style and Language.*—The literary character of the book is most remarkable and interesting. In the richness and freedom of its vocabulary it most closely resembles the fourth Book of Maccabees, but it is superior to that fine declamation, both in power and variety of diction. No existing work represents perhaps more completely the style of composition which would be produced by the sophistic schools of rhetoric. It follows as a necessary consequence that the effect of different parts of the book is very unequal. The florid redundancy and restless straining after effect, which may be not unsuited to vivid intellectual pictures, is wholly alien from the philosophic contemplation of history. The magnificent description of Wisdom (vii. 22-viii. 1) must rank among the noblest passages of human eloquence, and it would be perhaps impossible to point out any piece of equal length in the remains of classical antiquity more pregnant with noble thought, or more rich in expressive phraseology. The language of the Old Latin translation is also itself full of interest. It presents, in great profusion, the characteristic provincialisms which elsewhere mark the earliest African version of the Scriptures.—5. *Original Language.*—The characteristics of the language, which have been just noticed, are so marked that no doubt could ever have been raised as to the originality of the Greek text, if it had not been that the book was once supposed to be the work of Solomon. Yet as it must be obvious, even on a superficial examination, that the style and language of the book show conclusively that it could not have been the

work of Solomon, so it appears with equal certainty that the freedom of the Greek diction was checked by no Aramaic text. But while the original language of the book may be regarded as certainly determined by internal evidence, great doubt hangs over the date and place of its composition.—6. *Doctrinal character.*—The theological teaching of the book offers, in many respects, the nearest approach to the language and doctrines of Greek philosophy which is found in any Jewish writing up to the time of Philo. There is much in the views which it gives of the world, of man, and of the Divine Nature, which springs rather from the combination or conflict of Hebrew and Greek thought than from the independent development of Hebrew thought alone. Thus, in speaking of the almighty power of God, the writer describes Him as "having created the universe out of matter without form," adopting the very phrase of the Platonists, which is found also in Philo. Scarcely less distinctly heathen is the conception which is presented of the body as a mere weight and clog to the soul (ix. 15; contrast 2 Cor. v. 1-4). It is more in accordance with the language of the O. T. that the writer represents the Spirit of God as filling (i. 7) and inspiring all things (xii. 1), but even here the idea of "a soul of the world" seems to influence his thoughts. There is, on the other hand, no trace of the characteristic Christian doctrine of a resurrection of the body. The identification of the tempter (Gen. iii.), directly or indirectly, with the devil, as the bringer "of death into the world" (ii. 23, 24), is the most remarkable development of Biblical doctrine which the book contains. It is in this point that the Pseudo-Solomon differs most widely from Philo, who recognises no such evil power in the world. Generally, too, it may be observed that, as in the cognate books, Proverbs and Ecclesiastes, there are few traces of the recognition of the sinfulness even of the wise man in his wisdom, which forms, in the Psalms and the Prophets, the basis of the Christian doctrine of the atonement (yet comp. xv. 2). With regard to the interpretation of the O. T., it is worthy of notice that a typical significance is assumed to underlie the historic details (xvi. 1, xviii. 4, 5, &c.). In connexion with the O. T. Scriptures, the book, as a whole, may be regarded as carrying on one step further the great problem of life contained in Ecclesiastes and Job.—7. *The doctrine of Wisdom.*—It would be impossible to trace here in detail the progressive development of the doctrine of Wisdom, as a Divine Power standing in some sense between the Creator and creation, yet without some idea of this history no correct opinion can be formed on the position which the Book of the Pseudo-Solomon occupies in Jewish literature. The foundation of the doctrine is to be found in the Book of Proverbs, where (viii.) Wisdom is represented as present with God before (viii. 22) and during the creation of the world. So far it appears only as a principle regulating the action of the Creator. By the personification of Wisdom, and the relation of Wisdom to men (viii. 31), a preparation is made for the extension of the doctrine. This appears, after a long interval, in Ecclesiasticus. In the great description of Wisdom given in that book (xxiv.), Wisdom is represented as a creation of God (xxiv. 9), penetrating the whole universe (4-6), and taking up her special abode with the chosen people (8-12). Her personal existence and providential function are

thus distinctly brought out. In the Book of Wisdom the conception gains yet further completeness. In this, Wisdom is identified with the Spirit of God (ix. 17). By her, in especial, men have fellowship with God (xii. 1). So also her working, in the providential history of God's people, is traced at length (x.); and her power is declared to reach beyond the world of man into that of spirits (vii. 23). The conception of Wisdom, however boldly personified, yet leaves a wide chasm between the world and the Creator. Wisdom answers to the idea of a spirit vivifying and uniting all things in all time, as distinguished from any special outward revelation of the Divine Person. Thus at the same time that the doctrine of Wisdom was gradually constructed, the correlative doctrine of the Divine Word was also reduced to a definite shape. The Word (*Memra*), the Divine expression, as it was understood in Palestine, furnished the exact complement to Wisdom, the Divine thought. Broadly, it may be said that the Word properly represented the mediative element in the action of God, Wisdom the mediative element of His omnipresence. The Book of the Pseudo-Solomon, which gives the most complete view of Divine wisdom, contains only two passages in which the Word is invested with the attributes of personal action (xvi. 12, xviii. 15; ix. 1 is of different character). These however, are sufficient to indicate that the two powers were distinguished by the writer; and it has been commonly argued that the superior prominence given in the book to the conception of Wisdom is an indication of a date anterior to Philo. The doctrine of the Divine wisdom passes by a transmutation, often imperceptible, to that of human wisdom, which is derived from it. This embraces not only the whole range of moral and spiritual virtues, but also the various branches of physical knowledge. In this aspect the enumeration of the great forms of natural science in vii. 17-20 (viii. 8), offers a most instructive subject of comparison with the corresponding passages in 1 K. iv. 32-34.—8. *Place and date of writing.*—Without claiming for the internal indications of the origin of the book a decisive force, it seems most reasonable to believe on these grounds that it was composed at Alexandria some time before the time of Philo (cir. 120-80 B.C.). Alexandria was the only place where Judaism and philosophy, both of the east and west, came into natural and close connexion. It appears further that the mode in which Egyptian idolatry is spoken of, must be due in some degree to the influence of present and living antagonism, and not to the contemplation of past history. It may, indeed, be said justly, that the local colouring of the latter part of the book is conclusive as to the place of its composition. But all the guesses which have been made as to its authorship are absolutely valueless. The earliest was that mentioned by Jerome, which assigned it to Philo. There can be no doubt that he later and famous Philo was intended by this designation. Others have imagined that the elder Philo was intended. Lüttenbeck suggested Arnobius. Eichhorn, Zeller, Jost, and several others supposed that the author was one of the Therapeutae. The opinion of some later writers that the book is of Christian origin, or even definitely the work of Apollonius, is still more perverse.—9. *History.* The history of the book is extremely obscure. There is no trace of the use of it before the Christian era. It is perhaps more surprising that Philo does not

(as it seems) show any knowledge of it. On the other hand, it can scarcely be doubted that St. Paul, if not other of the Apostolic writers, was familiar with its language, though he makes no definite quotation from it (the supposed reference in Luke xi. 49 to Wisd. ii. 12-14, is wholly unfounded). Thus we have striking parallels in Rom. ix. 21 to Wisd. xv. 7; in Rom. ix. 22 to Wisd. xii. 20; in Eph. vi. 13-17 to Wisd. v. 17-19 (the heavenly armour), &c. It may be questioned whether his acquaintance with the book may not have been gained rather orally than by direct study. According to Eusebius Irenaeus made use of it in a lost work, and in a passage of his great work Irenaeus silently adopts a characteristic clause from it (Wisd. vi. 19). From the time of Clement of Alexandria the book is constantly quoted as an inspired work of Solomon, or as "Scripture," even by those Fathers who denied its assumed authorship, and it gained a place in the Canon (together with the other Apocryphal books) at the Council of Carthage, cir. 397 A.D. From this time its history is the same as that of the other Apocryphal books up to the period of the Reformation. In the later times the various estimates which have been formed of the book have been influenced by controversial prejudices. In England, like the rest of the Apocrypha, it has been most strangely neglected, though it furnishes several lessons for Church Festivals. It seems, indeed, impossible to study the book dispassionately, and not feel that it forms one of the last links in the chain of providential connexion between the Old and New Covenants. It would not be easy to find elsewhere any pre-Christian view of religion equally wide.

Wise Men. [MAG.]

Witch, Witchcrafts. [MAGIC.]

Witness. Among people with whom writing is not common, the evidence of a transaction is given by some tangible memorial or significant ceremony. Abraham gave seven ewe-lambs to Abimelech as an evidence of his property in the well of Beer-sheba. Jacob raised a heap of stones, "the heap of witness," as a boundary-mark between himself and Laban (Gen. xxi. 30, xxxi. 47, 52). The tribes of Reuben and Gad raised an "altar" as a witness to the covenant between themselves and the rest of the nation; Joshua set up a stone as an evidence of the allegiance promised by Israel to God (Josh. xxii. 10, 26, 34, xxiv. 26, 27). Thus also symbolical usages, in ratification of contracts or completed arrangements, as the ceremony of shoe-loosing (Deut. xxv. 9, 10; Ruth iv. 7, 8), the ordeal prescribed in the case of a suspected wife, with which may be compared the ordeal of the Styx (Num. v. 17-31). But written evidence was by no means unknown to the Jews. Divorce was to be proved by a written document (Deut. xxiv. 1, 3). In civil contracts, at least in later times, documentary evidence was required and carefully preserved (Is. viii. 16; Jer. xxxii. 10-16). On the whole the Law was very careful to provide and enforce evidence for all its infractions and all transactions bearing on them. Among special provisions with respect to evidence are the following:—1. Two witnesses at least are required to establish any charge (Num. xxxv. 30; Deut. xvii. 6; John viii. 17; 2 Cor. xiii. 1; comp. 1 Tim. v. 19). 2. In the case of the suspected wife, evidence besides the husband's was desired (Num. v. 13). 3. The witness who withheld the truth was censured (Lev. v. 1). 4. False witness was punished with the punish-

ment due to the offence which it sought to establish. 5. Slandorous reports and officious witness are discouraged (Ex. xx. 16, xxiii. 1; Lev. xix. 16, 18, &c.). 6. The witnesses were the first executioners (Deut. xiii. 9, xvi. 7; Acts vii. 58). 7. In case of an animal left in charge and torn by wild beasts, the keeper was to bring the carcass in proof of the fact and disproof of his own criminality (Ex. xxii. 13). 8. According to Josephus, women and slaves were not admitted to bear testimony (Ant. iv. 8, §15). In the N. T. the original notion of a witness is exhibited in the special form of one who attests his belief in the Gospel by personal suffering. Hence it is that the use of the ecclesiastical term "Martyr" has arisen.

Wizard. [MAGIC.]

Wolf. (Heb. *zēbīb*). There can be little doubt that the wolf of Palestine is the common *Canis lupus*, and that this is the animal so frequently mentioned in the Bible. Hemprich and Ehrenberg have described a few species, as, for instance, the *Canis Syriacus* and the *C. (Vulpes) Niloticus*, and Col. Hamilton Smith mentions, under the name of *derboun*, a species of black wolf, as occurring in Arabia and Southern Syria; but nothing definite seems to be known of this animal. Wolves were doubtless far more common in Biblical times than they are now, though they are occasionally seen by modern travellers.

Women. The position of women in the Hebrew commonwealth contrasts favourably with that which in the present day is assigned to them generally in Eastern countries. The most salient point of contrast in the usages of ancient as compared with modern Oriental society was the large amount of liberty enjoyed by women. Instead of being immured in a harem, or appearing in public with the face covered, the wives and maidens of ancient times mingled freely and openly with the other sex in the duties and amenities of ordinary life. Rebekah travelled on a camel with her face unveiled, until she came into the presence of her affianced (Gen. xxiv. 64, 65). Jacob saluted Rachel with a kiss in the presence of the shepherds (Gen. xxix. 11). Women played no inconsiderable part in public celebrations (Ex. xv. 20, 21; Judg. xi. 34). The odes of Deborah (Judg. v.) and of Hannah (1 Sam. ii. 1, &c.) exhibit a degree of intellectual cultivation which is in itself a proof of the position of the sex in that period. Women also occasionally held public offices, particularly that of prophetess or inspired teacher (Ex. xv. 20; 2 K. xxii. 14; Neh. vi. 14; Luke ii. 36; Judg. iv. 4). The management of household affairs devolved mainly on the women. The value of a virtuous and active housewife forms a frequent topic in the Book of Proverbs (xi. 16, xii. 4, xiv. 1, xxxi. 10, &c.). Her influence was of course proportionably great. The effect of polygamy was to transfer female influence from the wives to the mother. Polygamy also necessitated a separate establishment for the wives collectively, or for each individually. Further information on the subject of this article is given under the heads DEACONESS, DRESS, HAIR, MARRIAGE, SLAVE, VEIL, and WIDOW.

Wood. [FOREST.]

Wool. Wool was an article of the highest value among the Jews, as the staple material for the manufacture of clothing (Lev. xiii. 47; Deut. xxii. 11; Job xxxi. 20; Prov. xxxi. 13; Ez. xxiv. 3; Hos. ii. 5). Both the Hebrew terms, *tsemer* and

gáz, imply the act of shearing, the distinction between them being that the latter refers to the "fleece" (Deut. xvii. 4; Job xxxi. 20). The importance of wool is incidentally shown by the notice that Mesha's tribute was paid in a certain number of rams "with the wool" (2 K. iii. 4). The wool of Damascus was highly prized in the mart of Tyre (Ez. xxvii. 18).

Woolen, (Linen, and). Among the laws against unnatural mixtures is found one to this effect: "A garment of mixtures [*shaatnéz*] shall not come upon thee" (Lev. xix. 19); or, as it is expressed in Deut. xxii. 11, "thou shalt not wear *shaatnéz*, wool and flax together." Our version, by the help of the latter passage, has rendered the strange word *shaatnéz* in the former, "of linen and woolen;" while in Deut. it is translated "a garment of divers sorts." Two things only appear to be certain about *shaatnéz*—that it is a foreign word, and that its origin has not at present been traced. Its signification is sufficiently defined in Deut. xxii. 11. Jablonski favours the suggestion of Forster, that a garment of linen and woolen was called by the Egyptians *shontnes*, and that this word was borrowed by the Hebrews, and written by them in the form *shaatnéz*. The reason given by Josephus (*Ant.* iv. 8, §11) for the law which prohibited the wearing a garment woven of linen and woolen is, that such were worn by the priests alone. Spencer conjectured that the use of woollen and linen inwoven in the same garment prevailed amongst the ancient Zabi.

Worm. The representative in the A. V. of the Hebrew words *Sás*; *Rimmáh*, and *Tólé'áh*, *Töld'*, or *Tólaath*, occurs in numerous passages in the Bible. The first-named term, *Sás*, occurs only in Isa. li. 8. The word probably denotes some particular species of moth, whose larva is injurious to wool. 2. *Rimmáh* (Ex. xvi. 20). The Hebrew word points evidently to various kinds of maggots, and the larvae of insects which feed on putrefying animal matter, rather than to earthworms; the words *rimmah* and *tólé'áh* in the original are clearly used indiscriminately to denote either true *annelids*, or the larval condition of various insects. Job uses both *Rimmáh* and *Tólé'áh* in ch. xxv. 6, where he compares the estate of man to a *rimmáh*, and the son of man to a *tólé'áh*. This latter word, in one or other of its forms, is applied in Deut. xxviii. 39 to some kinds of larvae destructive to the vines. Various kinds of insects attack the vine, amongst which one of the most destructive is the *Tortrix vitisana*, the little caterpillar of which eats off the inner parts of the blossoms, the clusters of which it binds together by spinning a web around them. The death of Herod Agrippa I. was caused by worms (Acts xii. 23): according to Josephus (*Ant.* xix. 8), his death took place five days after his departure from the theatre. Whether the worms were the cause or the result of the disease is an immaterial question.

Wormwood (Heb. *laánáh*). The correct translation of the Heb. word occurs frequently in the Bible, and generally in a metaphorical sense. Kitto (*Phys. Hist. of Palestine*, p. 215), enumerates four kinds of wormwood as found in Palestine—*Artemisia nitotica*, *A. Judaica*, *A. fruticosa*, and *A. cinerea*. The Hebrew *Laánáh* is doubtless generic, and denotes several species of *Artemisia*.

Worshipper. A translation of the Greek word *σευκόπος*, used once only, Acts xix. 35; in the

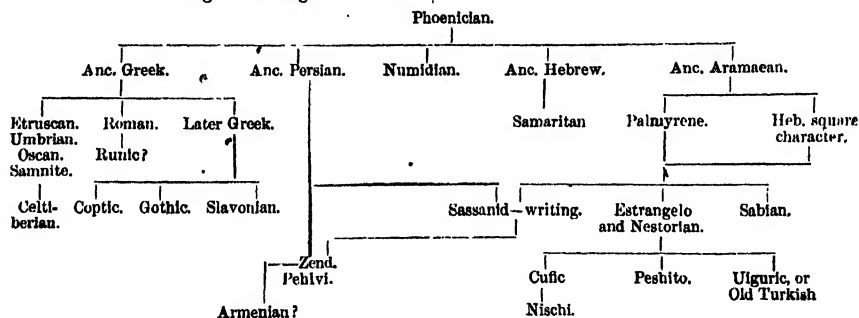

margin "Temple-keeper." The *νεοκορος* was originally an attendant in a temple, probably intrusted with its charge. The divine honours paid in later Greek times to eminent persons even in their lifetime, were imitated and exaggerated by the Romans under the empire, especially in Asia. The term *neocoros* became thus applied to cities or communities which undertook the worship of particular emperors even during their lives. The first occurrence of the term in connexion with Ephesus is on coins of the age of Nero (A.D. 54-68).

Wrestling. [GAMES.]

Writing. It is a remarkable fact that although, with respect to other arts, as for instance those of music and metal working, the Hebrews have assigned the honour of their discovery to the heroes of a remote antiquity, there is no trace or tradition whatever of the origin of letters, a discovery many times more remarkable and important than either of these. Throughout the Book of Genesis there is not a single allusion, direct or indirect, either to the practice or to the existence of writing. That the Egyptians in the time of Joseph were acquainted with writing of a certain kind there is evidence to prove, but there is nothing to show that up to this period the knowledge extended to the Hebrew family. At the same time there is no evidence against it. Writing is first distinctly mentioned in Ex. xvii. 14, and the connexion clearly implies that it was not then employed for the first time, but was so familiar as to be used for historic records. Moses is commanded to preserve the memory of Amalek's onslaught in the desert by committing it to writing. The tables of the testimony are said to be "written by the finger of God" (Ex. xxxi. 18) on both sides, and "the writing was the writing of God, graven upon the tables" (Ex. xxxii. 15). The engraving of the gems of the high-priest's breastplate with the names of the children of Israel (Ex. xxviii. 11), and the inscription upon the mitre (Ex. xxxix. 30) have to do more with the art of the engraver than of the writer, but both imply the existence of alphabetic characters. The curses against the adulteress were written by the priest "in the book;" and blotted out with water (Num. v. 23). This proceeding, though principally distinguished by its symbolical character, involves the use of some kind of ink, and of a material on which the curses were written which would not be destroyed by water. Hitherto, however, nothing has been said of the application of writing to the purposes of ordinary life, or of the knowledge of the art among the common people. Up to this point such knowledge is only attributed to Moses and the priests. From Deut. xxiv. 1, 3, however, it would appear that it was extended to others. It is not absolutely necessary to infer from this that the art of writing was an accomplishment possessed by every Hebrew citizen, though there is no mention of a third party; and it is more than probable that these "bills of divorcement," though apparently so informal, were the work of professional scribes. It was enjoined as one of the duties of the king (Deut. xvii. 18), that he should transcribe the book of the law for his own private study. If we examine the instances in which writing is mentioned in connexion with individuals, we shall find that in all cases the writers were men of superior position. In Is. xxix. 11, 12, there is clearly a distinction drawn between the man who was able to read, and the man who was not, and it seems a natural inference that the accomplishments of read-

ing and writing were not widely spread among the people, when we find that they are universally attributed to those of high rank or education, kings, priests, prophets, and professional scribes. In the name Kirjath-Sepheh (Booktown, Josh. xv. 15) there is an indication of a knowledge of writing among the Phœnicians. The Hebrews, then, a branch of the great Shemitic family, being in possession of the art of writing, according to their own historical records, at a very early period, the further questions arise, what character they made use of, and whence they obtained it. Recent investigations have shown that the square character is of comparatively modern date, and has been formed from a more ancient type by a gradual process of development. What then was this ancient type? Most probably the Phœnician. To the Phœnicians, the daring seamen, and adventurous colonisers of the ancient world, tradition assigned the honour of the invention of letters. Pliny was of opinion that letters were of Assyrian origin, but he mentions as a belief held by others that they were discovered among the Egyptians by Mercury, or that the Syrians had the honour of the invention. The last-mentioned theory is that given by Diodorus Siculus (v. 74), who says that the Syrians invented letters, and from them the Phœnicians having learnt them, transferred them to the Greeks. On the other hand, according to Tacitus (*Ann.* xi. 14), Egypt was believed to be the source whence the Phœnicians got their knowledge. Be this as it may, the voice of tradition represents the Phœnicians as the disseminators, if not the inventors, of the alphabet. Whether it came to them from an Aramaean or Egyptian source can at best be but the subject of conjecture. It may, however, be reasonably inferred that the ancient Hebrews derived from, or shared with, the Phœnicians the knowledge of writing and the use of

letters. The names of the Hebrew letters indicate that they must have been the invention of a Shemitic people, and that they were moreover a pastoral people may be inferred from the same evidence. If, as has been conjectured, the Phœnicians took the first idea of writing from the Egyptians, they would at least have given to the signs which they invented the names of objects with which they themselves were familiar. So far from this being the case the letters of the Hebrew alphabet contain no trace whatever of ships or seafaring matters: on the contrary, they point distinctly to an inland and pastoral people. Perhaps all that can be inferred from the tradition that letters came to the Greeks from the Phœnicians, but that they were the invention of the Egyptians, is that the Egyptians possessed an alphabet before the Phœnicians. Gesenius argues for a Phœnician origin of the alphabet, in opposition to a Babylonian or Aramaean, on the following grounds:— 1. That the names of the letters are Phœnician, and not Syrian. 2. It is not probable that the Aramaic dialect was the language of the inventors; for the letters י ו נ, which to them were certainly consonants, had become so weak in the Aramaic that they could scarcely any longer appear as such, and could not have been expressed by signs by an inventor who spoke a dialect of this kind. 3. If the Phœnician letters are pictorial, as there seems reason to believe, there is no model, among the old Babylonian discoverers of writing, after which they could have been formed. But whether or not the Phœnicians were the inventors of the Shemitic alphabet, there can be no doubt of their just claim to being its chief disseminators; and with this understanding we may accept the genealogy of alphabets as given by Gesenius, and exhibited in the accompanying table.

Whatever minor differences may exist between the ancient and more modern Shemitic alphabets, they have two chief characteristics in common:— 1. That they contain only consonants and the three principal long vowels, א י ו; the other vowels being represented by signs above, below, or in the middle of letters, or being omitted altogether. 2. That they are written from right to left. The Ethiopic, being perhaps a non-Shemitic alphabet, is an exception to this rule, as is the cuneiform character in which some Shemitic inscriptions are found. The old Shemitic alphabets may be divided into two principal classes: 1. The Phœnician, as it exists (a) in the inscriptions in Cyprus, Malta, Carpentras, and the coins of Phœnicia and her colonies. It is distinguished by an absence of vowels, and by sometimes having the words divided and sometimes

not. (b). In the inscriptions on Jewish coins, (c). In the Phœnicio-Egyptian writing, with three vowel signs, deciphered by Caylus on the mummy bandages. From (a) are derived (d), the Samaritan character, and (e), the Greek. 2. The Hebrew-Chaldee character; to which belong (a), the Hebrew square character; (b), the Palmyrene, which has some traces of a cursive hand: (c), the Estrangelo, or ancient Syriac; and (d), the ancient Arabic or Cufic. The oldest Arabic writing (the Himyaritic) was perhaps the same as the ancient Hebrew or Phœnician.—There are many arguments which go to show that the Samaritan character is older than the square Hebrew, for which we must refer the reader to the Larger Dictionary. The often-quoted passage, Matt. v. 18, which is generally brought forward as a proof that the square charac-

ter must have been in existence in the time of Christ, who mentions *lāra*, or *yod*, as the smallest letter of the alphabet, proves at least that the old Hebrew or Phœnician character was no longer in use, but that the Palmyrene character, or one very much like it had been introduced. It was probably about the first or second century after Christ that the square character assumed its present form; though in a question involved in so much uncertainty it is impossible to pronounce with great positiveness. *The Alphabet.*—The oldest evidence on the subject of the Hebrew alphabet is derived from the alphabetical Psalms and poems; Pss. xxv., xxxiv. xxxvii., cxl., cxli., cxix., cxlv.; Prov. xxxi. 10-31; Lam. i.-iv. From these we ascertain that the number of the letters was twenty-two, as at present. The Arabic alphabet originally consisted of the same number. It has been argued by many that the alphabet of the Phœnicians at first consisted only of sixteen letters, or according to Hug of fifteen, א ב ג ד ה ו ז ט י being omitted. The legend, as told by Pliny (vii. 56), is as follows. Cadmus brought with him into Greece sixteen letters; at the time of the Trojan war Palamedes added four others, Θ, Ξ, Φ, Χ, and Simonides of Melos four more, Ζ, Η, Ψ, Ω. Aristotle recorded eighteen letters of the original alphabet, Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ Ν Ο Π Ρ Σ Τ Φ, to which Θ and Χ were added by Epicharmus. But in the oldest story of Cadmus, as told by Herodotus (v. 58) and Diodorus (v. 24), nothing is said of the number of the letters. Recent investigations, however, have rendered it probable that at first the Shemitic alphabet consisted of but sixteen letters. It is true that no extant monuments illustrate the period when the alphabet was thus curtailed, but as the theory is based upon an organic arrangement first proposed by Lepsius, it may be briefly noticed. Dr. Donaldson (*New Chalytus*, p. 171, 3rd ed.) says, "Besides the mutes and breathings, the Hebrew alphabet, as it now stands, has four sibilants, א ב ג ד. Now, it is quite clear that all these four sibilants could not have existed in the oldest state of the alphabet. Indeed we have positive evidence that the Ephraimites could not pronounce ש, but substituted for it the simpler articulation ו (Judg. xii. 6). We consider it quite certain, that at the first there was only one sibilant, namely this א, or *samech*. Finally, to reduce the Semitic alphabet to its oldest form, we must omit *caph*, which is only a softened form of *koph*, the liquid *resh*, and the semivowel *yod*, which are of more recent introduction. . . The remaining 16 letters appear in the following order: א ב ג ד ה ו ז ט י כ ל מ נ ס ע פ צ ק ר ש ת. If we examine this order more minutely, we shall see that it is not arbitrary or accidental, but strictly organic, according to the Semitic articulation. We have four classes, each consisting of 4 letters: the first and second classes consist each of 3 mutes preceded by a breathing, the third of the 3 liquids and the sibilant, which perhaps closed the oldest alphabet of all, and the fourth contains the three supernumerary mutes preceded by a breathing." The original 16 letters of the Greek alphabet, corresponding to those of the Shemitic, are thus given by Dr. Donaldson (*ibid.* p. 175).

א ב ג ד ה ו ז ט י כ ל מ נ ס ע פ צ ק ר ש ת
Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ Ν Ο Π Ρ Σ Τ Φ

With regard to the arrangement of the letters, our chief sources of information are, as before the

alphabetical acrostics in the Psalms and Lamentations. In these poems some irregularities in the arrangement of the alphabet are observable. The names of the letters are given in the LXX. of the Lamentations as found in the Vatican MS. as printed by Mai, and in the Codex Friderico-Augustanus, published by Tischendorf. Both these ancient witnesses prove that in the 4th century after Christ the Hebrew letters were known by the same names as at the present day. The following are the letters of the Hebrew alphabet in their present shape, with their names and the meanings of these names, so far as they can be ascertained, with any degree of probability:—

- א, *Alaph*. An ox. In the old Phœnician forms of this letter can still be traced some resemblance to an ox-head, א, א. Gr. ἄλφα.
- ב, *Beth*. A house. The figure in the square character corresponds more to its name, while the Ethiopic β has greater resemblance to a tent. Gr. βῆτα (B).
- ג, *Gimel*. A camel. The ancient form is supposed to represent the head and neck of this animal.
- ד, *Daleth*. A door. The significance of the name is seen in the older form ד, whence the Greek δῆλα, Δ, a tent-door.
- ה, *He*. Without any probable derivation; perhaps corrupted, or merely a technical term. The corresponding Greek letter is Ε, which is the Phœnician ה turned from left to right.
- ו, *Vau*. A hook or tent-peg; the same as the old Greek βαυ (F), the form of which resembles the Phœnician ו.
- ז, *Zain*. Probably = Syr. zaina a weapon, sword (Ps. xlv. 7). It appears to be the same as the ancient Greek ζά.
- ח, *Cheth*. A fence, enclosure. Comp. the Phœn. ח. Cheth is the Greek χη (H).
- ט, *Tet*. A snake, or a basket. The Greek θῆτα.
- י, *Yod*. A hand. The form of the letter was perhaps originally longer, as in the Greek Ι (iōta).
- כ, *Caph*. The hollow of the hand. The Greek κάππα (κ) is the old Phœnician form (x) reversed.
- ל, *Lamed*. A cudgel or ox-goad. The Greek λάμδα (Λ).
- מ, *Mem*. Water, as it is commonly explained, with reference to the Samaritan מ. In the old alphabets it is מ, in which Gesenius sees the figure of a trident, and so possibly the symbol of the sea. The Greek μ corresponds to the old word מ, "water," Job ix. 30.
- נ, *Nun*. A fish, in Chaldee, Arabic, and Syriac. In almost all Phœnician alphabets the figure is נ. The Greek ν is derived from it.
- ס, *Samech*. A prop. The Greek σῆμα is undoubtedly derived from *Samech*, as its form is from the Phœnician character, although its place in the Greek alphabet is occupied by ς.
- ע, *Ain*. An eye; in the Phœnician and Greek alphabets Ο.
- פ, *Pe*. A mouth. The Greek π.
- צ, *Tsade*. A fish-hook or prong. From *tsade* is derived the Greek ςητα.
- ק, *Koph*. Perhaps the back of the head. The old Hebrew form (P), inverted Q, became the

Greek $\kappa\omicron\mu\mu\alpha$ (Q); and the form (Q), which occurs on the ancient Syracusan coins, suggests the origin of the Roman Q.

7, *Resh*. A head. The Phœnician Q when turned round became the Greek P, the name of which, $\rho\acute{\omicron}$, is corrupted from *Resh*.

8, *Shin*. Compare *shen*, a tooth, sometimes used & for a jagged promontory. The letters ψ , \sin , } ψ and ψ were probably at first one letter, and afterwards became distinguished by the diacritic point. The Greek ξ is derived from *Shin*, as $\nu\delta$ from *Nun*.

9, *Tau*. A mark or sign (Ex. ix. 4); probably a sign in the shape of a cross, such as cattle were marked with. The signification corresponds to the shapes of the old Hebrew letter on coins τ , \times , from the former of which comes the Greek $\tau\alpha\upsilon$ (T).

Divisions of words.—Hebrew was originally written, like most ancient languages, without any divisions between the words. The same is the case with the Phœnician inscriptions. The various readings in the LXX. show that, at the time this version was made, in the Hebrew MSS. which the translators used, the words were written in a continuous series. The modern synagogue rolls and the MSS. of the Samaritan Pentateuch have no vowel-points, but the words are divided, and the Samaritan in this respect differs but little from the Hebrew.—*Final letters, &c.*—In addition to the letters above described, we find in all Hebrew MSS. and printed books the forms \daleth , \mem , \sin , \sin , which are the shapes assumed by the letters \daleth , \mem , \sin , \sin , when they occur at the end of words. Their invention was clearly due to an endeavour to render reading more easy by distinguishing one word from another, but they are of comparatively modern date. The final *nun* is found on the Palmyrene inscriptions. In the Aramaeo-Egyptian writing both final *cap* and final *nun* occur, as may be seen in the *Blacas* fragments given by Gesenius. The five final letters are mentioned in *Beresith Rabba* (parash. i. fol. 1, 4), and in both Talmuds. The final *mem* in the middle of a word (Is. ix. 6) is mentioned in both Talmuds, and by Jerome. The similarity of shape between final *mem* (\daleth) and *samech* (\daleth) is indicated by the dictum of Rab Chasda, as given in the Babylonian Talmud (*Megillah*, c. 1; *Shabbath*, fol. 104, 1), that “*mem* and *samech*, which were on the Tables (of the Law), stood by a miracle.” It was a tradition among the Jews that the letters on the tables of stone given to Moses were cut through the stone, so as to be legible on both sides; hence the miracle by which *mem* and *samech* kept their place. On the ancient Phœnician inscriptions, just as in the Greek uncial MSS., the letters of a word were divided at the end of a line without any indication being given of such division, but in Hebrew MSS. a twofold course has been adopted in this case. If at the end of a line the scribe found that he had not space for the complete word, he either wrote as many letters as he could of this word, but left them unpointed and put the complete word in the next line, or he made use of what are called extended letters, in order to fill up the superabundant space. That abbreviations were employed in the ancient Hebrew writing is shown by the inscriptions on the Maccabæan coins. The greater and smaller letters which occur in the middle of words (comp. Ps. lxxx. 16; Gen.

ii. 4), the *suspended* letters (Judg. xviii. 30 Ps. lxxx. 14), and the *inverted* letters (Num. x. 35), are transferred from the MSS. of the Masoretes, and have all received at the hands of the Jews an allegorical explanation. Numbers were indicated either by letters or figures. The latter are found on Phœnician coins, on the sarcophagus of Eshmunazar, on the Palmyrene inscriptions, and probably also in the Aramaeo-Egyptian writing. On the other hand, letters are found used as numerals on the Maccabæan coins, and among the Arabs, and their early adoption for the same purpose among the Greeks may have been due to the Phœnicians. It is not too much to conjecture from these analogies that figures and letters representing numbers may have been employed by the ancient Hebrews. It is even possible that many discrepancies in numbers may be explained in this way.—*Vowel-points and diacritical marks*.—Almost all the learned Jews of the middle ages maintained the equal antiquity of the vowels and consonants, or at least the introduction of the former by Ezra and the men of the Great Synagogue. The modern date of the vowel-points was first argued by Elias Levita, followed on the same side by Cappellus, who was opposed by the younger Buxtorf. “The dispute about the antiquity and origin of the Hebrew vowels commenced at a very early date; for while Mar-Natronai II., Gaon in Sura (859-869), prohibited to provide the copies of the Law with vowels, because these signs had not been communicated on Mount Sinai, but had only been introduced by the sages to assist the reader; the Karaites allowed no scroll of the Pentateuch to be used in the synagogue, unless it was furnished with vowels and accents, because they considered them as a divine revelation, which, like the language and the letter, was already given to Adam, or certainly to Moses,” (Dr. Kalisch, *Heb. Gr.* ii. 65). “No vowel-points are to be found on any of the Jewish coins, or in the Palmyrene inscriptions, and they are wanting in all the relics of Phœnician writing. A single example of a diacritical mark occurs for the first time on one of the Carthaginian inscriptions. The first certain indication of vowel-points in a Semitic language is in the Arabic. Three were introduced by Ali, son of Abu-Thaleb, who died A.H. 40. The Sabian writing also has three vowel-points, but its age is uncertain. Five vowel-points and several reading-marks were introduced into the Syriac writing by Theophilus and Jacob of Edessa. The present Arabic system of punctuation originated with the introduction of the Nischi character by Ebn Mokla, who died A.D. 939. On the whole, taking into consideration the nature and analogies of the kindred Semitic languages, and the Jewish tradition that the vowels were only transmitted orally by Moses, and were afterwards reduced to signs and fixed by Ezra and the Great Synagogue, the preponderance of evidence goes to show that Hebrew was written without vowels or diacritical marks at the time that it was a living language. “According to a statement on a scroll of the Law, which may have been in Susa from the eighth century, Moses the Punctator (Hannakdan) was the first who, in order to facilitate the reading of the Scriptures for his pupils, added vowels to the consonants, a practice in which he was followed by his son Judah, the Corrector or Reviser (Hannagiah). These were the beginnings of a full system of Hebrew points, the completion of which

has, by tradition, been associated with the name of the Karaite Acha of Irak, living in the first half of the sixth century, and which comprised the vowels and accents, dagesh and rapheh, keri and kethiv. It was, from its local origin, called the Babylonian or Assyrian system. Almost simultaneously with these endeavours, the scholars of Palestine, especially of Tiberias, worked in the same direction, and here Rabbi Mocha, a disciple of Auan the Karaite, and his son Moses, fixed another system of vocalisation (about 570), distinguished as that of Tiberias, which marks still more minutely and accurately the various shades and niceties of tone and pronunciation, and which was ultimately adopted by all the Jews. For though the Karaites, with their characteristic tenacity, and their antagonism to the Rabbanites, clung for some time to the older signs, because they had used them before their secession from the Talmudical sects, they were at last, in 957, induced to abandon them in favour of those adopted in Palestine. Now the Babylonian signs, besides differing from those of Tiberias in shape, are chiefly remarkable by being almost uniformly placed above the letters. There still exist some manuscripts which exhibit them, and many more would probably have been preserved had not, in later times, the habit prevailed of substituting in old codices the signs of Tiberias for those of Babylonia" (Dr. Kalisch, *Hebr. Gram.* ii. 63, 64). From the sixth century downwards the traces of punctuation become more and more distinct. It now remains to say a few words on the accents. The object of the accents is twofold. 1. They serve to mark the tone syllable, and at the same time to show the relation of each word to the sentence: hence they are called *teamin*, as marking the sense. 2. They indicate the modulation of the tone according to which the Old Testament was recited in the synagogues, and were hence called *neginôth*. "The manner of recitation was different for the Pentateuch, the prophets, and the metrical books (Job, the Proverbs, and the Psalms): old modes of cantillation of the Pentateuch and the prophets (in the Haphtaroth) have been preserved in the German and Portuguese synagogues; both differ, indeed, considerably, yet manifestly show a common character, and are almost like the same composition sung in two different keys; while the chanting of the metrical books, not being employed in the public worship, has long been lost" (Kalisch, p. 84).—*Writing materials, &c.*—The oldest documents which contain the writing of a Semitic race are probably the bricks of Nineveh and Babylon on which are impressed the cuneiform Assyrian inscriptions. There is, however, no evidence that they were ever employed by the Hebrews. Wood was used upon some occasions (Num. xvi. 3), and writing tablets of box-wood are mentioned in 2 Esd. xiv. 24. The "lead," to which allusion is made in Job xix. 24, is supposed to have been poured when melted into the cavities of the stone made by the letters of an inscription, in order to render it durable. It is most probable that the ancient as well as the most common material which the Hebrews used for writing was dressed skin in some form or other. We know that the dressing of skins was practised by the Hebrews (Ex. xxv. 5; Lev. xiii. 48), and they may have acquired the knowledge of the art from the Egyptians, among whom it had attained great perfection,

the subdivisions of the third caste. Perhaps the Hebrews may have borrowed, among their other acquirements, the use of papyrus from the Egyptians, but of this we have no positive evidence. In the Bible the only allusions to the use of papyrus are in 2 John 12, where *χαρτης* occurs, which refers especially to papyrus paper, and 3 Macc. iv. 20, where *χαρθηρια* is found in the same sense. In Josephus the trial of adultery is made by writing the name of God on a *skin*, and the 70 men who were sent to Ptolemy from Jerusalem by the high-priest, Eleazar, to translate the Law into Greek, took with them the *skins* on which the Law was written in golden characters (*Ant.* xii. 2, § 10). Herodotus, after telling us that the Ionians learnt the art of writing from the Phœnicians, adds that they called their books *skins*, because they made use of sheep-skins and goat-skins when short of paper. Parchment was used for the MSS. of the Pentateuch in the time of Josephus, and the *μεμβραναι* of 2 Tim. iv. 13, were skins of parchment. It was one of the provisions in the Talmud that the Law should be written on the skins of clean animals, tame or wild, or even of clean birds. The skins when written upon were formed into rolls (*megillôth*; Ps. xl. 8; comp. Is. xxiv. 4; Jer. xxxvi. 14; Ez. ii. 9; Zech. v. 1). They were rolled upon one or two sticks and fastened with a thread, the ends of which were sealed (Is. xxix. 11; Dan. xii. 4; Rev. v. 1, &c.). The rolls were generally written on one side only, except in Ez. ii. 9; Rev. v. 1. They were divided into columns (*dêlathôth*, lit. "doors," A.V. "leaves," Jer. xxxvi. 23); the upper margin was to be not less than three fingers broad, the lower not less than four; and a space of two fingers' breadth was to be left between every two columns. The case in which the rolls were kept was called *τεχος* or *θήκη*. But besides skins, which were used for the more permanent kinds of writing, tablets of wood covered with wax (Luke i. 63) served for the ordinary purposes of life. Several of these were fastened together and formed volumes. They were written upon with a pointed style (*êl*, Job xix. 24), sometimes of iron (Ps. xlv. 2; Jer. viii. 8, xvii. 1). For harder materials a graver (*cheret*, Ex. xxxii. 4; Is. viii. 1) was employed: the hard point was called *tsippôren* (Jer. xvii. 1). For parchment or skins a reed was used (3 John 13; 3 Macc. iv. 20). The ink, *dêyô* (Jer. xxvi. 18), literally "black," like the Greek *μέλας* (2 Cor. iii. 3; 2 John 12; 3 John 13), was to be of lamp-black dissolved in gall-juice. It was carried in an inkstand (*keseth kussôphêr*), which was suspended at the girdle (Ez. ix. 2, 3), as is done at the present day in the East. To professional scribes there are allusions in Ps. xlv. 1 [2]; Ezr. vii. 6; 2 Esdr. xiv. 24.

Xanthicus. [MONTH.]

Y

Yarg. The notice of yarn is contained in an extremely obscure passage in 1 K. x. 28 (2 Chr. i. 16). The Hebrew Received Text is questionable. The probability is that the term does refer to some

entrepôt of Egyptian commerce, but whether Tekeah, as in the LXX., or Coa, as in the Vulg., is doubtful. Gesenius gives the sense of "number" as applying equally to the merchants and the horses:—"A band of the king's merchants bought a drove (of horses) at a price"; but the verbal arrangement in 2 Chr. is opposed to this rendering. The sense adopted in the A. V. is derived from Jewish interpreters.

Year, the highest ordinary division of time. The Hebrew name is identical with the root *shānāh*, "he or it repeated, did the second time." The meaning is therefore thought to be "an iteration," by Gesenius, who compares the Latin *annus*, properly a circle. The sense of the Hebrew might either be a recurring period, or a circle of seasons, or else a period circling through the seasons.—1. Years, properly so called. Two years were known to, and apparently used by, the Hebrews. 1. A year of 360 days, containing twelve months of thirty days each, is indicated by certain passages in the prophetic Scriptures. The time, times, and a half, of Daniel (vii. 25, xii. 7), where "time" means "year," evidently represent the same period as the 42 months (Rev. xi. 2) and 1260 days of the Revelation (xi. 3, xii. 6), for $360 \times 3.5 = 1260$, and $30 \times 42 = 1260$. This year perfectly corresponds to the Egyptian Vague year, without the five intercalary days. It appears to have been in use in Noah's time, or at least in the time of the writer of the narrative of the Flood, for in that narrative the interval from the 17th day of the 2nd month to the 17th day of the 7th of the same year appears to be stated to be a period of 150 days (Gen. vii. 11, 24, viii. 3, 4, comp. 13), and, as the 1st, 2nd, 7th, and 10th months of one year are mentioned (viii. 13, 14, vii. 11, viii. 4, 5), the 1st day of the 10th month of this year being separated from the 1st day of the first month of the next year by an interval of at least 54 days (viii. 5, 6, 10, 12, 13), we can only infer a year of 12 months. A year of 360 days is the rudest known. It is formed of 12 spurious lunar months, and was probably the parent of the lunar year of 354 days, and the Vague year of 365. The Hebrew year, from the time of the Exodus, was evidently lunar, though in some manner rendered virtually solar, and we may therefore infer that the lunar year is as old as the date of the Exodus. As the Hebrew year was not an Egyptian year, and as nothing is said of its being new, save in its time of commencement, it was perhaps earlier in use among the Israelites, and either brought into Egypt by them or borrowed from Shemitic settlers. 2. The year used by the Hebrews from the time of the Exodus may be said to have been then instituted, since a current month, Abib, on the 14th day of which the first Passover was kept, was then made the first month of the year. The essential characteristics of this year can be clearly determined, though we cannot fix those of any single year. It was essentially solar, for the offerings of productions of the earth, first-fruits, harvest-produce, and ingathered fruits, were fixed to certain days of the year, two of which were in the periods of great feasts, the third itself a feast reckoned from one of the former days. But it is certain that the months were lunar, each commencing with a new moon. There must therefore have been some method of adjustment. The first point to be decided is how the commencement of each year was fixed. Probably the Hebrews determined their

new year's day by the observation of heliacal or other star-risings or settings known to mark the right time of the solar year. It follows, from the determination of the proper new moon of the first month, whether by observation of a stellar phenomenon, or of the forwardness of the crops, that the method of intercalation can only have been that in use after the Captivity, the addition of a thirteenth month whenever the twelfth ended too long before the equinox for the offering of the first-fruits to be made at the time fixed. The later Jews had two commencements of the year, whence it is commonly but inaccurately said that they had two years, the sacred year and the civil. We prefer to speak of the sacred and civil reckonings. The sacred reckoning was that instituted at the Exodus, according to which the first month *Gras Abib*: by the civil reckoning the first month was the seventh. The interval between the two commencements was thus exactly half a year. It has been supposed that the institution at the time of the Exodus was a change of commencement, not the introduction of a new year, and that thenceforward the year had two beginnings, respectively at about the vernal and the autumnal equinoxes. We must here notice the theories of the derivation of the Hebrew year from the Egyptian Vague year. The Vague year was commonly used by the Egyptians; and from it only, if from an Egyptian year, is the Hebrew likely to have been derived. Two theories have been formed connecting the two years at the Exodus. (1.) Some hold that Abib, the first month of the Hebrew year by the sacred reckoning, was the Egyptian Epiphi. This, however, is more than doubtful. Supposing that the Hebrew calendar was formed by fixing the Egyptian Epiphi as the first month, what would be the chronological result? The latest date to which the Exodus is assigned is about B.C. 1320. In the Julian year B.C. 1320, the month Epiphi of the Egyptian Vague year commenced May 16, 44 days after the day of the vernal equinox, April 2, very near which the Hebrew year must have begun. Thus at the latest date of the Exodus, there is an interval of a month and a half between the beginning of the Hebrew year and Epiphi 1. This interval represents about 180 years, through which the Vague year would retrograde in the Julian until the commencement of Epiphi corresponded to the vernal equinox, and no method can reduce it below 100. (2.) We have founded an argument for the date of the Exodus upon another comparison of the Hebrew year and the Vague year. The sacred commencement of the Hebrew year was at the new moon about or next after, but not much before, the vernal equinox: the civil commencement must usually have been at the new moon nearest the autumnal equinox. At the earliest date of the Exodus computed by modern chronologists, about the middle of the 17th century B.C., the Egyptian Vague year commenced at or about the latter time. It would be necessary that the 14th day of Abib, on which fell the full moon of the Passover of the Exodus, should correspond to the 14th of Phamenoth, in a Vague year commencing about the autumnal equinox. A full moon fell on the 14th of Phamenoth, or Thursday, April 21, B.C. 1652, of a Vague year commencing on the day of the autumnal equinox, Oct. 10, B.C. 1653. This date of the Exodus, B.C. 1652, is only four years earlier than Hales's, B.C. 1648.—II. Divisions of the Year.

—1. *Seasons*. Two seasons are mentioned in the Bible, "summer" and "winter." The former properly means the time of cutting fruits, the latter, that of gathering fruits; they are therefore originally rather summer and autumn than summer and winter. But that they signify ordinarily the two grand divisions of the year, the warm and cold seasons, is evident from their use for the whole year in the expression, "summer and winter" (Ps. lxxiv. 17; Zech. xiv. 8). 2. *Months*.—The Hebrew months, from the time of the Exodus, were lunar. The year appears ordinarily to have contained twelve, but, when intercalation was necessary, a thirteenth. 3. *Weeks*.—The Hebrews, from the time of the institution of the Sabbath, whether at or before the Exodus, reckoned by weeks.—III. *Sacred Years*.—1. The Sabbatical year, "the fallow year," or, possibly, "year of remission," kept every seventh year, was commanded to be observed as a year of rest from the labours of agriculture and of remission of debts. 2. The Jubilee year, "the year of the trumpet," a like year, which immediately followed every seventh Sabbatical year. It has been disputed whether the Jubilee year was every 49th or 50th: the former is more probable.

Yoke. 1. A well-known implement of husbandry, described in the Hebrew language by the terms *môt*, *môlâh*, and *ôl*, the two former specifically applying to the bows of wood out of which it was constructed, and the last to the application (*binding*) of the article to the neck of the ox. 2. A pair of oxen, so termed as being yoked together (1 Sam. xi. 7; 1 K. xix. 19, 21). The Hebrew term, *tzemed*, is also applied to asses (Judg. xix. 10) and mules (2 K. v. 17), and even to a couple of riders (Is. xxi. 7). 3. The term *tzemed* is also applied to a certain amount of land (1 Sam. xiv. 14), equivalent to that which a couple of oxen could plough in a day (Is. v. 10; A.V. "acre"), corresponding to the Latin *jugum*.

Z

Zaan'aim, the Plain of; or, more accurately, "the oak by Zaanam." A tree—probably a sacred tree—mentioned as marking the spot near which Heber the Kenite was encamped when Sisera took refuge in his tent (Judg. iv. 11). Its situation is defined as "near Kedesh," *i. e.* Kedesh-Naphtali, the name of which still lingers on the high ground, north of *Safed*, and west of the Lake of *el Huleh*. The Targum gives as the equivalent of the name, *mishor agganaya*, "the plain of the swamp," which can hardly refer to anything but the marsh which borders the lake of *Huleh* on the north side, and which was probably more extensive in the time of Deborah than it now is. On the other hand, Dr. Stanley pointed out how appropriate a situation for his memorable tree is afforded by "a green plain studded with massive terebinths," which adjoins on the south the plain containing the remains of Kedesh. These two suggestions—of the ancient Jewish and the modern Christian student—may be left side by side to await the result of future investigation. The *Keri*, or correction, of Judg. iv. 11, substitutes Zaananim for Zaanaim, and the same form is found in Josh. xix. 33.

Zaan'an. A place named by Micah (i. 11) in his address to the towns of the Shefelah. Zaan'an is doubtless identical with ZENAN.

Za'avan. A Horite chief, son of Ezer the son of Seir (Gen. xxxvi. 27; 4 Chr. i. 42).

Zabad. 1. Son of Nathan, son of Attai, son of Ahlai, Sheshan's daughter (1 Chr. ii. 31-37), and hence called son of Ahlai (1 Chr. xi. 41). He was one of David's mighty men, but none of his deeds have been recorded. The chief interest connected with him is in his genealogy, which is of considerable importance in a chronological point of view.—2. An Ephraimite, if the text of 1 Chr. vii. 21 is correct.—3. Son of Shimeath, an Ammonitess: an assassin who, with Jehozabad, slew king Joash, according to 2 Chr. xxiv. 26; but, in 2 K. xii. 21, his name is written, probably more correctly, Jozachar.

A layman of Israel, of the sons of Zattu, who put away his foreign wife at Ezra's command (Ezr. x. 27).—5. One of the descendants of Hashum, who had married a foreign wife after the Captivity (Ezr. x. 33).—6. One of the sons of Nebo, whose name is mentioned under the same circumstances as the two preceding (Ezr. x. 43).

Zabadai'as. ZABAD 6 (1 Esd. ix. 35).

Zabade'ans. An Arab tribe who were attacked and spoiled by Jonathan, on his way back to Damascus from his fruitless pursuit of the army of Demetrius (1 Macc. xii. 31). Josephus calls them Nabataeans (*Ant.* xiii. 5, §10), but he is evidently in error. Nothing certain is known of them. Jonathan had pursued the enemy's army as far as the river Eleutherus (*Nahr el Kebir*), and was on his march back to Damascus when he attacked and plundered the Zabadeans. We must look for them, therefore, somewhere to the north-west of Damascus. Accordingly, on the road from Damascus to Baulbek, at a distance of about 83 hours (26 miles) from the former place, is the village *Zebdany*, standing at the upper end of a plain of the same name, which is the very centre of Antilibanus. The name *Zebdany* is possibly a relic of the ancient tribe of the zabadeans.

Zabba'i. 1. One of the descendants of B-bai, who had married a foreign wife in the days of Ezra (Ezr. x. 28).—2. Father of Baruch, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 20).

Zab'ud. One of the sons of Bigvai, who returned in the second caravan with Ezra (Ezr. viii. 14).

Zabde'us. ZEBADIAH of the sons of Immer (1 Esd. ix. 21).

Zab'di. 1. Son of Zerab, the son of Judah, and ancestor of Achan (Josh. vii. 1, 17, 18).—2. A Benjamite of the sons of Shimhi (1 Chr. viii. 19).—3. David's officer over the produce of the vineyards for the wine-cellar (1 Chr. xxvii. 27).—4. Son of Asaph the minstrel (Neh. xi. 17); called elsewhere ZACCUR (Neh. xii. 35) and ZICHRI (1 Chr. ix. 15).

Zab'diel. 1. Father of Jashobeam, the chief of David's guard (1 Chr. xxvii. 2).—2. A priest, son of the great men, or, as the margin gives it, "Hagedolim" (Neh. xi. 14).—3. An Arabian chieftain who put Alexander Balas to death (1 Macc. xi. 17; Joseph. *Ant.* xiii. 4, §8).

Zab'ud. The son of Nathan (1 K. iv. 8). He is described as a priest (A. V. "principal officer"), and as holding at the court of Solomon the confidential post of "king's friend," which had been occupied by Hushai the Archite during the reign of David (2 Sam. xv. 37, xvi. 16; 1 Chr. xxvii. 23).

Zabulon. The Greek form of the name ZEBULON (Matt. iv. 13, 15; Rev. vii. 8).

Zacca'i. The sons of Zaccai, to the number of 760, returned with Zerubbabel (Ezr. ii. 9; Neh. vii. 14).

Zacchaeus. The name of a tax-collector near Jericho, who being short in stature climbed up into a sycamore-tree, in order to obtain a sight of Jesus as He passed through that place. Luke only has related the incident (ix. 1-10). Zacchaeus was a Jew, as may be inferred from his name and from the fact that the Saviour speaks of him expressly as "a son of Abraham." The term which designates this office is unusual, but describes him no doubt as the superintendent of customs or tribute in the district of Jericho, where he lived, as one having a commission from his Roman principal (*princeps publicanus*) to collect the imposts levied on the Jews by the Romans, and who in the execution of that trust employed subalterns, who were accountable to him, as he in turn was accountable to his superior. The office must have been a lucrative one in such a region, and it is not strange that Zacchaeus is mentioned by the Evangelist as a rich man. The Saviour spent the night probably in the house of Zacchaeus, and the next day pursued his journey to Jerusalem. He was in the caravan from Galilee, which was going up thither to keep the Passover. We read in the Rabbinic writings also of a Zacchaeus who lived at Jericho at this same period, well known on his own account, and especially as the father of the celebrated Rabbi Jochanan ben Zachai.

Zaccheus. An officer of Judas Maccabaeus (2 Macc. x. 19).

Zachur. A Simeonite, of the family of Mishma (1 Chr. iv. 26).

Zac'cur. 1. Father of Shammua, the Reubenite spy (Num. xiii. 4).—2. A Merarite Levite, son of Jaaziah (1 Chr. xxiv. 27).—3. Son of Asaph, the singer (1 Chr. xxv. 2, 10; Neh. xii. 35).—4. The son of Imri, who assisted Nehemiah in rebuilding the city wall (Neh. iii. 2).—5. A Levite, or family of Levites, who signed the covenant with Nehemiah (Neh. x. 12).—6. A Levite, whose son or descendant Hanan was one of the treasurers over the treasures appointed by Nehemiah (Neh. xiii. 13).

Zachariah, or properly ZECHARIAH, was son of Jeroboam II., 14th king of Israel, and the last of the house of Jehu. There is a difficulty about the date of his reign. Most chronologists assume an interregnum of 11 years between Jeroboam's death and Zachariah's accession, during which the kingdom was suffering from the anarchy of a disputed succession, but this seems unlikely after the reign of a resolute ruler like Jeroboam, and does not solve the difference between 2 K. xiv. 17 and xv. 1. We are reduced to suppose that our present MSS. have here incorrect numbers, to substitute 15 for 27 in 2 K. xv. 1, and to believe that Jeroboam II. reigned 52 or 53 years. But whether we assume an interregnum, or an error in the MSS., we must place Zachariah's accession B.C. 771-2. His reign lasted only six months. He was killed in a conspiracy, of which Shallum was the head, and by which the prophecy in 2 K. x. 30 was accomplished.—2. The father of Abi, or Abijah, Hezekiah's mother (2 K. xviii. 2).

Zacharias. 1. Zachariah the priest in the reign of Josiah (1 Esd. i. 8).—2. In 1 Esd. i. 15 Zacharias occupies the place of Heman in 2 Chr. xxxv. 15.

—3. =SERATAH 6, and AZARIAH (1 Esd. v. 8; comp. Ezr. ii. 2; Neh. vii. 7).—4. The prophet ZECHARIAH (1 Esd. vi. 1, vii. 3).—5. ZECHARIAH 8 (1 Esd. viii. 30).—6. ZECHARIAH 9 (1 Esd. viii. 37).—7. ZECHARIAH 10 (1 Esd. viii. 44).—8. ZECHARIAH 11 (1 Esd. ix. 27; comp. Ezr. x. 26).—9. Father of Joseph, a leader in the first campaign of the Maccabean war (1 Macc. v. 18, 56-62).—10. Father of John the Baptist (Luke i. 5, &c.).—11. Son of Baruchias, who, our Lord says, was slain by the Jews between the altar and the temple (Matt. xxiii. 35; Luke xi. 51). There has been much dispute who this Zacharias was. Many of the Greek Fathers have maintained that the father of John the Baptist is the person to whom our Lord alludes; but there can be little or no doubt that the allusion is to Zachariah, the son of Jehoiada (2 Chr. xxiv. 20, 21). The name of the father of Zacharias is not mentioned by St. Luke; and we may suppose that the name of Baruchias crept into the text of St. Matthew from a marginal gloss, a confusion having been made between Zachariah, the son of Jehoiada, and Zacharias, the son of Baruchias (Berechiah) the prophet.

Zach'ary. The prophet Zachariah (2 Esd. i. 40).

Zacher. One of the sons of Jehiel, the father or founder of Gibeon, by his wife Maachah (1 Chr. viii. 31).

Zadok. 1. Son of Ahitub, and one of the two chief priests in the time of David, Abiathar being the other. Zadok was of the house of Eleazar, the son of Aaron (1 Chr. xxiv. 3), and eleventh in descent from Aaron. The first mention of him is in 1 Chr. xii. 28, where we are told that he joined David at Hebron after Saul's death with 22 captains of his father's house, and, apparently, with 900 men (4600—3700, vers. 26, 27). Up to this time, it may be concluded, he had adhered to the house of Saul. But henceforth his fidelity to David was inviolable. When Absalom revolted, and David fled from Jerusalem, Zadok and all the Levites bearing the Ark accompanied him, and it was only at the king's express command that they returned to Jerusalem, and became the medium of communication between the king and Hushai the Achite (2 Sam. xv., xvii.). When Absalom was dead, Zadok and Abiathar were the persons who persuaded the elders of Judah to invite David to return (2 Sam. xix. 11). When Adonijah, in David's old age, set up for king, and had persuaded Joab, and Abiathar the priest, to join his party, Zadok was unmoved, and was employed by David to anoint Solomon to be king in his room (1 K. i.). And for this fidelity he was rewarded by Solomon, who "thrust out Abiathar from being priest unto the Lord," and "put in Zadok the priest" in his room (1 K. ii. 27, 35). From this time, however, we hear little of him. It is said in general terms in the enumeration of Solomon's officers of state that Zadok was the priest (1 K. iv. 4; 1 Chr. xxix. 22), but no single act of his is mentioned. Zadok and Abiathar were of nearly equal dignity (2 Sam. xv. 35, 36, xix. 11). The duties of the office were divided. Zadok ministered before the Tabernacle at Gibeon (1 Chr. xvi. 39), Abiathar had the care of the Ark at Jerusalem. Not, however, exclusively, as appears from 1 Chr. xv. 11; 2 Sam. xv. 24, 25, 29. Hence, perhaps, it may be concluded that from the first there was a tendency to consider the office of the priesthood as somewhat of the nature of a corporate office, although some of

its functions were necessarily confined to the chief member of that corporation.—2. According to the genealogy of the high-priests in 1 Chr. vi. 12, there was a second Zadok, son of a second Ahitub, son of Amariah; about the time of King Ahaziah. It is probable that no such person as this second Zadok ever existed; but that the insertion of the two names is a copyist's error.—3. Father of Jerushah, the wife of King Uziah, and mother of King Jotham (2 K. xv. 33; 2 Chr. xxvii. 1).—4. Son of Bauna, who repaired a portion of the wall in the time of Nehemiah (Neh. iii. 4). He is probably the same who is in the list of those that sealed the covenant in Neh. x. 21, as in both cases his name follows that of Meshezabeel.—5. Son of Immer, a priest who repaired a portion of the wall over against his own house (Neh. iii. 29).—6. In Neh. xi. 11, and 1 Chr. ix. 11, mention is made in a genealogy of Zadok, the son of Meraioth, the son of Ahitub. But it can hardly be doubtful that Meraioth is inserted by the error of a copyist, and that Zadok the son of Ahitub is meant.

Za'hām. Son of Rehoboam by Abihail, the daughter of Eliab (2 Chr. xi. 19).

Za'ir. A place named, in 2 K. viii. 21 only, in the account of Joram's expedition against the Edomites. The parallel account in Chronicles (2 Chr. xxi. 9) agrees with this, except that the words "to Zair" are omitted, and the words "with his princes" inserted. It has been conjectured that the latter were substituted for the former, either by the error of a copyist, or intentionally, because the name Zair was not elsewhere known. Others, again, suggest that Zair is identical with Zoar. A third conjecture grounded on the readings of the Vulgate (*Seira*) and the Arabic version (*Sa'ir*), is, that Zair is an alteration for Seir.

Za'laph. Father of Hanan, who assisted in rebuilding the city wall (Neh. iii. 30).

Zalmon. An Aholite, one of David's guard (2 Sam. xxiii. 28).

Zal'mon, Mount. A wooded eminence in the immediate neighbourhood of Shechem (Judg. ix. 48). It is evident from the narrative that it was close to the city. But beyond this there does not appear to be the smallest indication of its position. The name *Suleimijeh* is attached to the S. E. portion of Mount Ebal; but without further evidence, it is hazardous even to conjecture that there is any connexion between this name and Zalmon. The name of Dalmanutha has been supposed to be a corruption of that of Zalmon.

Zal'monah. The name of a desert-station of the Israelites (Num. xxxiii. 41). It lies on the east side of Edom; but whether or not identical with *Maan*, a few miles E. of Petra, as Raumer thinks, is doubtful. More probably Zalmonah may be in the *Wady Ithm*.

Zal'munna. One of the two "kings" of Midian whose capture and death by the hands of Gideon himself formed the last act of his great conflict with Midian (Judg. vii. 5-21; Ps. lxxxiii. 11).

Zam'bis. The same as AMARIAH (1 Esd. ix. 34; comp. Ezer. x. 42).

Zam'brl. ZIMRI the Simeonite slain by Phinehas (1 Macc. ii. 26).

Za'moth = ZATTU (1 Esd. ix. 28; comp. Ezer. x. 27).

Zam'zummims. The Ammonite name for the people, who by others were called REPHAIM (Deut. ii. 20) only. They are described as having origin-

ally been a powerful and numerous nation or giants. From a slight similarity between the two names, and from the mention of the Emim in connexion with each, it is usually assumed that the Zamzumim are identical with the Zuzim. But the best identification is very conjectural.

Zano'ah. The name of the tribal lists of the tribe of Judah in 1 Chron., Jekuthiel is said to have been the father of Zanoah (iv. 18). Zanoah is the name of a town of Judah, and this mention of Bithiah probably points to some colonisation of the place by Egyptians or by Israelites directly from Egypt.

Zano'ah. The name of two towns in the territory of Judah. 1. in the *Shefelah* (Josh. xv. 34), named in the same group with Zoreah and Jarmuth. It is possibly identical with *Zan'a*, a site which was pointed out to Dr. Robinson from *Belt Nettif*, and which in the maps of Van de Velde and of Tobler is placed on the N. side of the *Wady Ismail*, 2 miles E. of Zoreah, and 4 miles N. of Yarmuk. The name recurs in its old connexion in the lists of Nehemiah. 2. A town in the highland district, the mountain proper (Josh. xv. 56). It is not improbably identical with *Sanute*, which is mentioned by Setzen, as below *Senuta*, and appears to be about 10 miles S. of Hebron.

Zaph'nath-Paane'ah, a name given by Pharaoh to Joseph (Gen. xli. 45). This name has been explained as Hebrew or Egyptian, and always as a proper name. It has not been supposed to be an official title, but this possibility has to be considered. 1. The Rabbins interpreted Zaphnath-paaneah as Hebrew, in the sense "revealer of a secret." 2. Isidore, though mentioning the Hebrew interpretation, remarks that the name should be Egyptian, and offers an Egyptian etymology. "Interpretatur ergo Zaphanath Paaneeca Aegyptio sermone salvator mundi." 3. Modern scholars have looked to Coptic for an explanation of this name, Jablonski and others proposing as the Coptic of the Egyptian original *psot em phenech*, "the preservation" or "preserver of the age." It is impossible to arrive at a satisfactory result without first inquiring when this name was given, and what are the characteristics of Egyptian titles and names. The name, at first sight, seems to be a proper name, but, as occurring after the account of Joseph's appointment and honours, may be a title. Before comparing Zaphnath-paaneah and Psouthomphanech (LXX.) with Egyptian names, we must ascertain the probable Egyptian equivalents of the letters of these forms. The probable originals of the Egyptian name of Joseph may be thus stated:—

Y	D	J	P	D	Y	J	P
T	P	N	T	P	A	N	KH
F							

Y	O	P	θ	O	μ	φ	α	ν	η	χ
PS	N	T	M	.	P	.	N	KH		

The second part of the name in the Hebrew is the same as in the LXX., although in the latter it is not separate: we therefore examine it first. It is identical with the ancient Egyptian proper name P-ANKHEE, "the living." The second part of the name, thus explained, affords no clue to the meaning of the first part. The LXX. form of the first part is at once recognised in the ancient Egyptian words P-SENT-N, "the defender" or "preserver of." The word SENT does not appear to be used except as a divine, and, under the Ptolemies, regu-

title, in the latter case for Soter. The Hebrew form seems to represent a compound name commencing with TETEF, or TEF, "he says." But, if the name commence with either of these words, the rest seems inexplicable. 'It is remarkable that the last two consonants are the same as in Asenath, the name of Joseph's wife. It has been supposed that in both cases this element is the name of the goddess Neith, Asenath having been conjectured to be AS-NEET; and Zaphnath, by Mr. Osburn, we believe TEF-NEET, "the delight (?) of Neith." Neith, the goddess of Sals, is not likely to have been revered at Meliopolis, the city of Asenath. It is also improbable that Pharaoh would have given Joseph a name connected with idolatry.

Zaphon. The name of a place mentioned in the enumeration of the allotment of the tribe of Gad (Josh. xiii. 27). No name resembling it has yet been encountered.

Za'ra. ZARAH the son of Judah (Matt. i. 3).

Zar'aces. Brother^s of Joacim, or Jehoiaquim, king of Judah (1 Esd. i. 38).

Za'rah. ZERAH, the son of Judah (Gen. xxxviii. 30, xlv. 12).

Zarai'as. 1. ZERAHIAH 1 (1 Esd. viii. 2).—2. ZERAHIAH 2 (1 Esd. viii. 31).—3. ZERADIAH 5 (1 Esd. viii. 34).

Za'reah. The same as ZORAH and ZOREAH (Neh. xi. 29).

Za'reathites, the. The inhabitants of ZAREAH or ZORAH (1 Chr. ii. 53).

Za'red, The Valley of. The name is accurately ZERED (Num. xxi. 12).

Zarephath. A town which derives its claim to notice from having been the residence of the prophet Elijah during the latter part of the drought (1 K. xvii. 9, 10). Beyond stating that it was near to, or dependent on, Zidon, the Bible gives no clue to its position. Josephus (*Ant.* viii. 13, §2) says that it was "not far from Sidon and Tyre, for it lies between them." And to this Jerome adds (*Onom.* "Sarepta") that it "lay on the public road," that is the coast road. Both these conditions are implied in the mention of it in the Itinerary of Paula by Jerome, and both are fulfilled in the situation of the modern village of *Sürafend*. Of the old town considerable indications remain. One group of foundations is on a headland called *Ain el-Kantarah*; but the chief remains are south of this, and extend for a mile or more, with many fragments of columns, slabs, and other architectural features. In the N. T. Zarephath appears under the Greek form of SAREPTA.

Zar'etan. ZARTHAN (Josh. iii. 16).

Za'reth-Sha'har. A place mentioned only in Josh. xiii. 19, in the catalogue of the towns allotted to Reuben. It is named between SIBMAH and BETHPEOR, and is particularly specified as "in Mount ha-Emek" (A. V. e. "in the Mount of the Valley"). From this, however, no clue can be gained to its position.

Zar'hites, the. A branch of the tribe of Judah: descended from Zerah the son of Judah (Num. xvi. 13, 20; Josh. vii. 17; 1 Chr. xxvii. 11, 13).

Zar'anah. A place named in 1 K. iv. 12, to define the position of BETHSHEAN. It is possibly identical with ZARTHAN, but nothing positive can be said on the point.

Zar'than. 1. A place in the *ciccar* or circle of Jordan, mentioned in connexion with Succoth (1 K. vii. 46). 2. It is also named, in the account of

the passage of the Jordan by the Israelites (Josh. iii. 16), as defining the position of the city Adam. 3. A place with the similar name of Zartanah. 4. Further, in Chronicles, Zeredathah is substituted for Zarthan, and this again is not impossibly identical with the Zerahah, Zererath, or Zererathah, of the story of Gideon. All these spots agree in proximity to the Jordan, but beyond this we are absolutely at fault as to their position.

Zath'oe. This name occurs in 1 Esd. viii. 32, for ZATTU, which appears to have been omitted in the Hebrew text of Ezr. viii. 5, which should read, "Of the sons of Zattu, Shechaniah the son of Jahaziel."

Zathu'i. ZATTU (1 Esdr. v. 12).

Zat'thu. Elsewhere ZATTU (Neh. x. 14).

Zat'tu. The sons of Zattu were a family of laymen of Israel who returned with Zerubbabel (Ezr. ii. 8; Neh. vii. 13).

Za'van. ZAAVAN (1 Chr. i. 42).

Za'za. One of the sons of Jonathan, a descendant of Jerahmeel (1 Chr. ii. 33).

Zebadi'ah. 1. A Benjamite of the sons of Beriah (1 Chr. viii. 15).—2. A Benjamite of the sons of Elpaal (1 Chr. viii. 17).—3. One of the sons of Jeroham of Gedor (1 Chr. xii. 7).—4. Son of Asalel the brother of Joab (1 Chr. xxvii. 7).—5. Son of Michael of the sons of Shephatiah (Ezr. viii. 8).—6. A priest of the sons of Immer who had married a foreign wife after the return from Babylon (Ezr. x. 20).—7. Third son of Meshelemiah the Korhite (1 Chr. xxvi. 2).—8. A Levite in the reign of Jehoshaphat (2 Chr. xvii. 8).—9. The son of Ishmael and prince of the house of Judah in the reign of Jehoshaphat (2 Chr. xix. 11).

Ze'bah. One of the two "kings" of Midian who appear to have commanded the great invasion of Palestine, and who finally fell by the hand of Gideon himself. He is always coupled with Zal-munna, and is mentioned in Judg. vii. 5-21; Ps. lxxxiii. 11. While Oreb and Zeeb, two of the inferior leaders of the incursion, had been slain, with a vast number of their people, by the Ephraimites, at the central fords of the Jordan, the two kings had succeeded in making their escape by a passage further to the north (probably the ford near Bethshean), and thence by the *Wady Yabis*, through Gilead, to Karkor, a place which is not fixed, but which lay doubtless high up on the Hauran. Here they were reposing with 15,000 men, a mere remnant of their huge horde, when Gideon overtook them. The name of Gideon was still full of terror, and the Bedouins were entirely unprepared for his attack—they fled in dismay, and the two kings were taken. Such was the Third Act of the great Tragedy. Two more remain. First the return down the long defiles leading to the Jordan. Gideon probably strode on foot by the side of his captives. They passed Penuel, where Jacob had seen the vision of the face of God; they passed Succoth; they crossed the rapid stream of the Jordan; they ascended the highlands west of the river, and at length reached Ophrah, the native village of their captor. Then at last the question which must have been on Gideon's tongue during the whole of the return found a vent. "What manner of men were they which ye slew at Tabor?" Up to this time the sheikhs may have believed that they were reserved for ransom; but these words once spoken there can have been no doubt what their fate was to be. They met it like

noble children of the Desert, without fear or weakness. One request alone they make—that they may die by the sure blow of the hero himself—and Gideon arose and slew them.”

Zebaim. The sons of Pochereth of hat-Tsebaim are mentioned in the catalogue of the families of “Solomon’s slaves,” who returned from the Captivity with Zerubbabel (Ezra ii. 57; Neh. vii. 59). The name is in the original all but identical with that of ZEBOIM.

Zeb’edee. A fisherman of Galilee, the father of the Apostles James the Great and John (Matt. iv. 21), and the husband of Salome (Matt. xxvii. 56; Mark xv. 40). He probably lived either at Bethsaida or in its immediate neighbourhood. It has been inferred from the mention of his “hired servants” (Mark i. 20), and from the acquaintance between the Apostle John and Anna the high-priest (John xviii. 15) that the family of Zebedee were in easy circumstances (comp. xix. 27), although not above manual labour (Matt. iv. 21). He appears only once in the Gospel narrative, namely in Matt. iv. 21, 22; Mark i. 19, 20, where he is seen in his boat with his two sons mending their nets.

Zeb’ina. One of the sons of Neboi, who had taken foreign wives after the return from Babylon (Ezr. x. 43).

Zeb’oim. This word represents in the A. V. two names which in the original are quite distinct. 1. One of the five cities of the “plain” or circle of Jordan. It is mentioned in Gen. x. 19, xiv. 2, 8; Deut. xxix. 23; and Hos. xi. 8, in each of which passages it is either coupled with Admah, or placed next it in the lists. No attempt appears to have been made to discover the site of Zeb’oim, till M. de Saulcy suggested the *Talaa Seb’oan*, a name which he, and he alone, reports as attached to extensive ruins on the high ground between the Dead Sea and *Kerak*. * In Gen. xiv. 2, 8, the name is given more correctly in the A. V. ZEBOIM.—2. THE VALLEY OF ZEBOIM, a ravine or gorge, apparently east of Michmash, mentioned only in 1 Sam. xii. 18. The road running from Michmash to the east, is specified as “the road of the border that looketh to the ravine of Zeb’oim towards the wilderness.” The wilderness (*midbar*) is no doubt the district of uncultivated mountain tops and sides which lies between the central district of Benjamin and the Jordan Valley; and here apparently the ravine of Zeb’oim should be sought. In that very district there is a wild gorge, bearing the name of *Shuk ed-Dubba’*, “ravine of the hyena,” the exact equivalent of *Ge hat-tsebo’im*.

Zeb’udah. Daughter of Pedaiah of Rumah, wife of Josiah and mother of king Jehoiakim (2 K. xxiii. 36).

Zeb’ul. Chief man (A. V. “ruler”) of the city of Shechem at the time of the contest between Abimelech and the native Canaanites. His name occurs Judg. ix. 28, 30, 36, 38, 41.

Zeb’ulonite, a member of the tribe of Zebulun. Applied only to ELON, the one judge produced by the tribe (Judg. xii. 11, 12).

Zeb’ulun. The tenth of the sons of Jacob, according to the order in which their births are enumerated; the sixth and last of Leah (Gen. xxx. 20, xxxiv. 23, xli. 14; 1 Chr. ii. 1). His birth is recorded in Gen. xxx. 19, 20. Of the individual Zebulun nothing is recorded. The list of Gen. xli. ascribes to him three sons, founders of the chief families of the tribe (comp. Num. xxvi. 26) at CON. D. B.

the time of the migration to Egypt. During the journey from Egypt to Palestine the tribe of Zebulun formed one of the first camp, with Judah and Issachar (also sons of Leah), marching under the standard of Judah. Its numbers at the census of Sinai, were 57,000, surpassed only by Simeon, Dan, and Judah. At that of Shittim they were 60,500, not having diminished, but not having increased nearly so much as might naturally be expected. The head of the tribe at Sinai was Eliab son of Helon (Num. vii. 24; at Shiloh, Elizaphan son of Parnach (1b. xxxiv. 25). Its representative amongst the spies was Gaddiel son of Sodi (xiii. 10). Besides what may be implied in its appearances in these lists, the tribe is not recorded to have taken part, for evil or good, in any of the events of the wandering or the conquest. Judah, Joseph, Benjamin, had acquired the south and the centre of the country. To Zebulun fell one of the fairest of the remaining portions. It is perhaps impossible, in the present state of our knowledge, exactly to define its limits; but the statement of Josephus (*Ant.* v. 1, §22) is probably in the main correct, that it reached on the one side to the lake of Gennesareth, and on the other to Carmel and the Mediterranean. On the south it was bounded by Issachar, who lay in the great plain or valley of the Kishon; on the north it had Naphtali and Asher. The fact recognised by Josephus that Zebulun extended to the Mediterranean, though not mentioned or implied, as far as we can discern, in the lists of Joshua and Judges, is alluded to in the Blessing of Jacob (Gen. xlix. 13). Situated so far from the centre of government, Zebulun remains throughout the history, with one exception, in the obscurity which envelops the whole of the northern tribes. That exception, however, is a remarkable one. The conduct of the tribe during the struggle with Sisera, when they fought with desperate valour side by side with their brethren of Naphtali, was such as to draw down the especial praise of Deborah, who singles them out from all the other tribes (Judg. v. 18). A similar reputation is alluded to in the mention of the tribe among those who attended the inauguration of David’s reign at Hebron (1 Chr. xii. 33). The same passage, however, shows that they did not neglect the arts of peace (ver. 40). We are nowhere directly told that the people of Zebulun were carried off to Assyria.

Zeb’ulunites, the. The members of the tribe of Zebulun (Num. xxvi. 27 only).

Zechariah. 1. The eleventh in order of the twelve minor prophets. Of his personal history we know but little. He is called in his prophecy the son of Berechiah, and the grandson of Iddo, whereas in the Book of Ezra (v. 1, iv. 14) he is said to have been the son of Iddo. Various attempts have been made to reconcile this discrepancy. Cyril of Alexandria supposes that Berechiah was the father of Zechariah, according to the flesh, and that Iddo was his instructor, and might be regarded as his spiritual father. Gessenius and Rosenmüller take “son” in the passages in Ezra to mean “grandson.” Knobel thinks that the name of Berechiah has crept into the present text of Zechariah from Isaiah viii. 2. It is purely most natural to suppose, as the Prophet himself mentions his father’s name, whereas the historical Books of Ezra and Nehemiah mention only Iddo, that Berechiah had died early, and that there was now no intervening link between the grandfathers

and the grandson. Zechariah, according to this view, like Jeremiah and Ezekiel before him, was priest as well as prophet. He seems to have entered upon his office while yet young (Zech. ii. 4), and must have been born in Babylon, whence he returned with the first caravan of exiles under Zerubbabel and Joshua. It was in the eighth month, in the second year of Darius, that he first publicly discharged his office. In this he acted in concert with Haggai. Both prophets had the same great object before them; both directed all their energies to the building of the Second Temple. It is impossible not to see of how great moment, under such circumstances, and for the discharge of the special duty with which he was intrusted, would be the priestly origin of Zechariah. The foundations of the Temple had indeed been laid, but that was all (Ezr. v. 16). Discouraged by the opposition which they had encountered at first, the Jewish colony had begun to build, and were not able to finish; and even when the letter came from Darius sanctioning the work, and promising his protection, they showed no hearty disposition to engage in it. At such a time, no more fitting instrument could be found to rouse the people, whose heart had grown cold, than one who united to the authority of the Prophet the zeal and the traditions of a sacerdotal family. Accordingly, to Zechariah's influence we find the rebuilding of the Temple in a great measure ascribed. "And the elders of the Jews builded," it is said, "and they prospered through the prophesying of Haggai the prophet, and Zechariah the son of Iddo" (Ezr. vi. 14). Later traditions assume, what is indeed very probable, that Zechariah took personally an active part in providing for the Liturgical service of the Temple. He and Haggai are both said to have composed Psalms with this view. If the later Jewish accounts may be trusted, Zechariah, as well as Haggai, was a member of the Great Synagogue. The patristic notices of the Prophet are worth nothing. According to these, he exercised his prophetic office in Chaldaea, and wrought many miracles there; returned to Jerusalem at an advanced age, where he discharged the duties of the priesthood, and where he died and was buried by the side of Haggai. The genuine writings of Zechariah help us but little in our estimation of his character. Some faint traces, however, we may observe in them of his education in Babylon. He leans avowedly on the authority of the older prophets, and copies their expressions. Jeremiah especially seems to have been his favourite; and hence the Jewish saying, that "the spirit of Jeremiah dwelt in Zechariah." But in what may be called the peculiarities of his prophecy, he approaches more nearly to Ezekiel and Daniel. Like them he delights in visions; like them he uses symbols and allegories, rather than the bold figures and metaphors which lend so much force and beauty to the writings of the earlier prophets; like them he beholds angels ministering before Jehovah, and fulfilling his behests on the earth. He is the only one of the prophets who speaks of Satan. That some of these peculiarities are owing to his Chaldaean education can hardly be doubted. Even in the form of the visions a careful criticism might perhaps discover some traces of the Prophet's early training. Generally speaking, Zechariah's style is pure, and remarkably free from Chaldaisms. As is common with writers in the decline of a language, he seems

to have striven to imitate the purity of the earlier models; but in orthography, and in the use of some words and phrases, he betrays the influence of a later age.—*Contents of the Prophecy.*—The Book of Zechariah, in its existing form, consists of three principal parts, chaps. i.-viii., chaps. ix.-xi., chaps. xii.-xiv. I. The first of these divisions is allowed by all critics to be the genuine work of Zechariah the son of Iddo. It consists, first, of a short introduction or preface, in which the prophet announces his commission; then of a series of visions, descriptive of all those hopes and anticipations of which the building of the Temple was the pledge and sure foundation; and finally of a discourse, delivered two years later, in reply to questions respecting the observance of certain established fasts. 1. The short introductory oracle (chap. i. 1-6) is a warning voice from the past, and manifestly rests upon the former warnings of Haggai. 2. In a dream of the night these passed before the eyes of the prophet a series of visions (chap. i. 7-vi. 15). These visions are obscure, and accordingly the prophet asks their meaning. The interpretation is given by an angel who knows the mind and will of Jehovah. (1.) In the first vision (chap. i. 7-15) the prophet sees, in a valley of myrtles, a rider upon a roan horse, accompanied by others who, having been sent forth to the four quarters of the earth, had returned with the tidings that the whole earth was at rest (with reference to Hagg. ii. 20). Hereupon the angel asks how long this state of things shall last, and is assured that the indifference of the heathen shall cease, and that the Temple shall be built in Jerusalem. (2.) The second vision (chap. ii. 1-17, A. V. i. 18-ii. 13) explains how the promise of the first is to be fulfilled. The old prophets, in foretelling the happiness and glory of the times which should succeed the Captivity in Babylon, had made a great part of that happiness and glory to consist in the gathering together again of the whole dispersed nation in the land given to their fathers. This vision was designed to teach that the expectation thus raised—the return of the dispersed of Israel—should be fulfilled. (3.) The next two visions (iii., iv.) are occupied with the Temple, and with the two principal persons on whom the hopes of the returned exiles rested. The permission granted for the rebuilding of the Temple had no doubt stirred afresh the malice and the animosity of the enemies of the Jews. Joshua the high-priest had been singled out, it would seem, as the especial object of attack, and perhaps formal accusations had already been laid against him before the Persian court. The prophet, in vision, sees him summoned before a higher tribunal, and solemnly acquitted, despite the charges of the Satan or Adversary. This is done with the forms still usual in an eastern court. (4.) The last vision (iv.) supposes that all opposition to the building of the Temple shall be removed. This sees the completion of the work. The two next visions (v. 1-11) signify that the land, in which the sanctuary has just been erected, shall be purged of all its pollutions. (5.) First, the curse is recorded against wickedness in the whole land, v. 3. (6.) Next, the unclean thing, whether in the form of idolatry or any other abomination, shall be utterly removed. (7.) And now the night is waning fast, and the morning is about to dawn. Chariots and horses appear, issuing from between two brazen mountains, the horses

like those in the first vision; and these receive their several commands and are sent forth to execute the will of Jehovah in the four quarters of the earth. Thus, then, the cycle of visions is completed. Scene after scene is unrolled till the whole glowing picture is presented to the eye. All enemies crushed; the land re-peopled and Jerusalem girt as with a wall of fire; the temple rebuilt, more truly splendid than of old, because more abundantly filled with a Divine Presence; the leaders of the people assured in the most signal manner of the Divine protection; all wickedness solemnly sentenced; and the land for ever purged of it;—such is the magnificent panorama of hope which the prophet displays to his countrymen. Immediately on these visions there follows a symbolical act. Three Israelites had just returned from Babylon, bringing with them rich gifts to Jerusalem, apparently as contributions to the Temple, and had been received 'n the house of Josiah the son of Zephaniah. Thither the Prophet is commanded to go—whether still in a dream or not, is not very clear—and to employ the silver and gold of their offerings for the service of Jehovah. He is to make of them two crowns, and to place these on the head of Joshua the high-priest—a sign that in the Messiah who should build the Temple, the kingly and priestly offices should be united. 3. From this time, for a space of nearly two years, the Prophet's voice was silent, or his words have not been recorded. But in the fourth year of King Darius, in the fourth day of the ninth month, there came a deputation of Jews to his Temple, anxious to know whether the fast-days which had been instituted during the seventy years' Captivity were still to be observed. It is remarkable that this question should have been addressed to priests and prophets conjointly in the Temple. This close alliance between two classes hitherto so separate, and often so antagonistic, was one of the most hopeful circumstances of the times. Still Zechariah, as chief of the prophets, has the decision of this question. In language worthy of his position and his office, language which reminds us of one of the most striking passages of his great predecessor (Is. lviii. 5-7), he lays down the same principle that God loves mercy rather than fasting, and truth and righteousness rather than sackcloth and a sad countenance. Again he foretells, but not now in vision, the glorious times that are near at hand when Jehovah shall dwell in the midst of them, and Jerusalem be called a city of truth (viii. 1-15). Again, he declares that "truth and peace" (vers. 16, 19) are the bulwarks of national prosperity. And he announces, in obedience to the command of Jehovah, not only that the fasts are abolished, but that the days of mourning shall henceforth be days of joy, the fasts be counted for festivals. His prophecy concludes with a prediction that Jerusalem shall be the centre of religious worship to all nations of the earth (viii. 16-23).—II. The remainder of the Book consists of two sections of about equal length, i. xi. and xii.-xiv., each of which has an inscription. 1. In the first section he threatens Damascus and 'the sea-coast of Palestine with misfortune; but declares that Jerusalem shall be protected. The Jews who are still in captivity shall return to their land. The land too shall be fruitful as of old (comp. viii. 12). The Teraphim and the false prophets may indeed have spoken lies, but upon these will the Lord execute judgment, and then He will look with favour upon

His people and bring back both Judah and Ephraim from their captivity. The possession of Gilead and Lebanon is again promised, as the special portion of Ephraim; and both Egypt and Assyria shall be broken and humbled. The prophecy now takes a sudden turn. An enemy is seen approaching from the north, who having forced the narrow passes of Lebanon, the great bulwark of the northern frontier, carries desolation into the country beyond. Hereupon the prophet receives a commission from God to feed his flock, which God himself will no more feed because of their divisions. The prophet undertakes the office, and cuts off several evil shepherds whom his soul abhors; but observes at the same time that the flock will not be obedient. Hence he throws up his office. 2. The Second Section xii.-xiv., is entitled "The burden of the word of Jehovah for Israel." But *Israel* is here used of the nation at large, not of Israel as distinct from Judah. Indeed, the prophecy which follows, concerns Judah and Jerusalem. In this the prophet beholds the near approach of troublous times, when Jerusalem should be hard pressed by enemies. But in that day Jehovah shall come to save them, and all the nations which gather themselves against Jerusalem shall be destroyed. At the same time the deliverance shall not be from outward enemies alone. God will pour out upon them a spirit of grace and supplications. Then follows a short apostrophe to the sword of the enemy to turn against the shepherds of the people; and a further announcement of searching and purifying judgments, which, however, it must be acknowledged, is somewhat abrupt. Ewald's suggestion that the passage xiii. 7-9, is here out of place, and should be transposed to the end of chap. xi, is certainly ingenious, and does not seem improbable. The prophecy closes with a grand and stirring picture. All nations are gathered together against Jerusalem; and seem already sure of their prey. Half of their cruel work has been accomplished, when Jehovah Himself appears on behalf of His people. He goes forth to war against the adversaries of His people. He establishes His kingdom over all the earth. All nations that are still left, shall come up to Jerusalem, as the great centre of religious worship, and the city from that day forward shall be a holy city. Such is, briefly, an outline of the second portion of that book which is commonly known as the Prophecy of Zechariah. The next point, then, for our consideration is this,—Is the book in its present form the work of one and the same prophet, Zechariah the son of Iddo, who lived after the Babylonish exile?—*Integrity*.—Mede was the first to call this in question. The probability that the later chapters from the 9th to the 14th were by some other prophet, seems first to have been suggested to him by the citation in St. Matthew. He says (Epist. xxxi.), "It may seem the Evangelist would inform us that these latter chapters ascribed to Zachary (namely, 9th, 10th, 11th, &c.), are indeed the prophecies of Jeremy; and that the Jews had not rightly attributed them." He rests his opinion, partly on the authority of St. Matthew, and partly on the contents of the later chapters, which he considers require a date earlier than the exile. Archbishop Newcome went further. He insisted on the great dissimilarity of style as well as subject between the earlier and later chapters. And he was the first who advocated the theory, that the last six chapters of Zechariah

are the work of two distinct prophets. His words are: "The eight first chapters appear by the introductory parts to be the prophecies of Zechariah, stand in connexion with each other, are pertinent to the time when they were delivered, are uniform in style and manner, and constitute a regular whole. But the six last chapters are not expressly assigned to Zechariah; are unconnected with those which precede; the three first of them are unsuitable in many parts to the time when Zechariah lived; all of them have a more adorned and poetical turn of composition than the eight first chapters; and they manifestly break the unity of the prophetic book." "I conclude," he continues, "from internal marks in chaps. ix., x., xi., that these three chapters were written much earlier than the time of Jeremiah and before the captivity of the tribes. . . . The xiith, xiiith, and xivth chapters form a distinct prophecy, and were written after the death of Josiah: but whether before or after the Captivity, and by what prophets, is uncertain." A large number of critics have followed Mede and Archbishop Newcome in denying the later date of the last six chapters of the Book. Rosenmüller argues that chaps. ix.-xiv. are so alike in style, that they must have been written by one author. From the allusion to the earthquake (xiv. 5, comp. Am. i. 1), he thinks the author must have lived in the reign of Uzziah. Davidson supposes him to have been the Zechariah mentioned Is. viii. 2. Eichhorn is of opinion that chaps. ix.-xiv. are the work of a later prophet who flourished in the time of Alexander. Others, as Bertholdt, Gesenius, Knobel, Maurer, Bunsen, and Ewald, think that chaps. ix.-xi. (to which Ewald adds xiii. 7-9) are a distinct prophecy from chaps. xii.-xiv., and separated from them by a considerable interval of time. Most of them conjecture that the author was the Zechariah mentioned Is. viii. 2. There is the same general agreement among the last-named critics as to the date of the section xii.-xiv. They all assign it to a period immediately previous to the Babylonish Captivity. Bunsen identifies him with Urijah the son of Shemaiah of Kirjath-jearim (Jer. xxvi. 20-23). According to this hypothesis we have the works of three different prophets collected into one book, and passing under one name:—1. Chapters ix.-xi., the book of Zechariah 1., a contemporary of Isaiah, under Ahaz, about 736.—2. Chapters xii.-xiv., author unknown (or perhaps Urijah, a contemporary of Jeremiah), about 607 or 606. 3. Chapters i.-viii., the work of the son (or grandson) of Iddo, Haggai's contemporary, about 520-518. We have then two distinct theories before us. The one merely affirms that the six last chapters of our present book are not from the same author as the first eight. The other carries the dismemberment of the book still further, and maintains that the six last chapters are the work of two distinct authors who lived at two distinct periods of Jewish history. The arguments both for and against the genuineness of the later chapters are set forth fully in the larger Dictionary, to which we must refer the reader.—With regard to the quotation in St. Matthew, there seems no good reason for setting aside the received reading. Jerome observes, "I read a short time since, in a Hebrew volume, which a Hebrew of the sect of the Nazarenes presented to me, an apocryphal book of Jeremiah, in which I found the passage word for word. But still I am rather inclined to think that the quotation is made

from Zechariah." Eusebius is of opinion that the passage thus quoted stood originally in the prophecy of Jeremiah, but was either erased subsequently by the malice of the Jews; or that the name of Zechariah was substituted for that of Jeremiah through the carelessness of copyists. Augustine testifies that the most ancient Greek copies had *Jeremiah*, and thinks that the mistake was originally St. Matthew's. Some later writers accounted for the non-appearance of the passage in Jeremiah, by the confusion in the Greek MSS. of his prophecies—a confusion, however, it may be remarked, which is not confined to the Greek, but which is found no less in our present Hebrew text. Others again suggest that in the Greek autograph of Matthew, ΖΠΙΟΤ may have been written, and that copyists may have taken this for ΠΙΟΤ. But there is no evidence that abbreviations of this kind were in use so early. Epiphanius and some of the Greek Fathers seem to have read *ἐν τοῖς προφήταις*. And the most ancient copy of the Latin Version of the Gospels omits the name of Jeremiah, and has merely *dictum est per Prophetam*. It has been conjectured that this represents the original Greek reading, and that some early annotator wrote *ἱεζεκιαν* on the margin, whence it crept into the text. The choice lies between this and a slip of memory on the part of the Evangelist, if we admit the integrity of our present Book of Zechariah. At the same time it must be borne in mind that the passage as given in St. Matthew does not represent exactly either the Hebrew text of Zechariah or the version of the LXX.—2. Son of Meshelemiah, or Shelemiah, a Korhite, and keeper of the north gate of the tabernacle of the congregation (1 Chr. ix. 21).—3. A Levite of the sons of Jehiel (1 Chr. ix. 37).—4. A Levite of the second order in the Temple band as arranged by David, appointed to play "with psalteries on Alamoth" (1 Chr. xv. 18, 20).—5. One of the princes of Judah in the reign of Jehoshaphat (2 Chr. xvii. 7).—6. Son of the high-priest Jehoiada, in the reign of Josiah king of Judah (2 Chr. xxiv. 20), and therefore the king's cousin. After the death of Jehoiada Zechariah probably succeeded to his office, and in attempting to check the reaction in favour of idolatry which immediately followed, he fell a victim to a conspiracy formed against him by the king, and was stoned in the court of the Temple. The memory of this unrighteous deed lasted long in Jewish tradition, and the evident hold which the story had taken upon the minds of the people renders it probable that "Zecharias son of Barachias," who was slain between the Temple and the altar (Matt. xxiii. 35), is the same with Zechariah the son of Jehoiada, and that the name of Barachias as his father crept into the text from a marginal gloss, the writer confusing this Zechariah either with Zechariah the prophet, who was the son of Berechiah, or with another Zechariah the son of Jeberechiah (Is. viii. 2).—7. A Kohathite Levite in the reign of Josiah (2 Chr. xxiv. 12).—8. The leader of the sons of Pharoah who returned with Ezra (Ezr. viii. 3).—9. Son of Bebai (Ezr. viii. 11).—10. One of the chiefs of the people whom Ezra summoned in council at the river Ahava (Ezr. viii. 16). He stood at Ezra's left hand when he expounded the Law to the people (Neh. viii. 4).—11. One of the family of Elai, who had married a foreign wife after the Captivity (Ezr. x. 26).—12. Ancestor of Athaliah, or Uthai (Neh. xi. 4).—13. A Shilonite, descendant of Perez

(Neh. xi. 5).—**14.** A priest, son of Pashur (Neh. xi. 12).—**15.** The representative of the priestly family of Iddo in the days of Joiakim the son of Jeshua (Neh. xii. 16). Possibly the same as Zechariah the prophet the son of Iddo.—**16.** One of the priests, son of Jonathan, who blew with the trumpets at the dedication of the city wall by Ezra and Nehemiah (Neh. xii. 35, 41).—**17.** A chief of the Reubenites at the time of the captivity by Tiglath-Pileser (1 Chr. v. 7).—**18.** One of the priests who accompanied the ark from the house of Obed-edom (1 Chr. xv. 24).—**19.** Son of Issiah, or Jesiah, a Kohathite Levite descended from Uzziel (1 Chr. xxiv. 25).—**20.** Fourth son of Hosah of the children of Merari (1 Chr. xxvi. 11).—**21.** A Manassite (1 Chr. xxvii. 21).—**22.** The father of Jahaziel (2 Chr. xx. 14).—**23.** One of the sons of Jehoshaphat (2 Chr. xxi. 2).—**24.** A prophet in the reign of Uzziah, who appears to have acted as the king's counsellor, but of whom nothing is known (2 Chr. xxvi. 5).—**25.** The father of Abijah, or Abi, Hezekiah's mother (2 Chr. xxix. 1).—**26.** One of the family of Asaph in the reign of Hezekiah (2 Chr. xxx. 13).—**27.** One of the rulers of the Temple in the reign of Josiah (2 Chr. xxxv. 8).—**28.** The son of Jeberchiah, who was taken by the prophet Isaiah as one of the "faithful witnesses to record," when he wrote concerning Maher-shalal-hash-baz (Is. viii. 2). He may have been the Levite of the same name, who in the reign of Hezekiah assisted in the purification of the Temple (2 Chr. xxx. 13). Another conjecture is that he is the same as Zechariah the father of Abijah, the queen of Ahaz.

Zedad'. One of the landmarks on the north border of the land of Israel, as promised by Moses (Num. xxxiv. 8) and as restored by Ezekiel (xlvi. 15). A place named *Siddad* exists to the east of the northern extremity of the chain of Antilibanus, about 50 miles E.N.E. of Baalbec, and 35 S.S.E. of Huns. It is possible that this may ultimately turn out to be identical with Zedad.

Zedechias. ZEDEKIAH king of Judah (1 Esd. i. 46).

Zedekiah. 1. The last king of Judah and Jerusalem. He was the son of Josiah by his wife Hamutal, and therefore own brother to Jehoahaz (2 K. xxiv. 18; comp. xviii. 31). His original name had been MATTANIAH, which was changed to Zedekiah by Nebuchadnezzar, when he carried off his nephew Jehoiachin to Babylon, and left him on the throne of Jerusalem. Zedekiah was but twenty-one years old when he was thus placed in charge of an impoverished kingdom, and a city which, though still strong in its natural and artificial impregnability, was bereft of wellnigh all its defenders. His history is contained in a short sketch of the events of his reign given in 2 K. xxiv. 17-xxv. 7, and with some trifling variations, in Jer. xxxix. 1-7, lii. 1-11, together with the still shorter summary in 2 Chr. xxxvi. 10, &c.; and also in Jer. xxi. xxiv. xxvii. xxviii. xxix. xxxii. xxxiii. xxxiv. xxxvii. xxxviii. and Ez. xvi. 11-21. To these it is indispensable to add the narrative of Josephus (*Ant.* x. 7, 1-8, §2). From these it is evident that Zedekiah was a man not so much bad at heart as weak in will. It is evident from Jer. xxvii. and xxviii. that the earlier portion of Zedekiah's reign was marked by an agitation throughout the whole of Syria against the Babylonian yoke. Jerusalem seems to have taken the lead, since in the fourth year of Zedekiah's reign we find ambassadors from all the

neighbouring kingdoms—Tyre, Sidon, Edom, and Moab—at his court, to consult as to the steps to be taken. This happened either during the king's absence or immediately after his return from Babylon, whither he went on some errand, the nature of which is not named, but which may have been an attempt to blind the eyes of Nebuchadnezzar to his contemplated revolt (Jer. li. 59). The first act of overt rebellion of which any record survives was the formation of an alliance with Egypt, of itself equivalent to a declaration of enmity with Babylon. As a natural consequence it brought on Jerusalem an immediate invasion of the Chaldeans. The mention of this event in the Bible, though sure, is extremely slight, and occurs only in Jer. xxxvii. 5-11, xxxiv. 21, and Ez. xvii. 15-20; but Josephus (*x.* 7, §3) relates it more fully, and gives the date of its occurrence, namely the eighth year of Zedekiah. It appears that Nebuchadnezzar, being made aware of Zedekiah's defection, either by the non-payment of the tribute or by other means, at once sent an army to ravage Judaea. This was done, and the whole country reduced, except Jerusalem and two strong places in the western plain, Lachish and Azekah, which still held out (Jer. xxxiv. 7).

In the mean time Pharaoh had moved to the assistance of his ally. On hearing of his approach the Chaldeans at once raised the siege and advanced to meet him. The nobles seized the moment of respite to reassert their power over the king. How long the Babylonians were absent from Jerusalem we are not told. All we certainly know is that on the tenth day of the tenth month of Zedekiah's ninth year the Chaldeans were again before the walls (Jer. li. 4). From this time forward the siege progressed slowly but surely to its consummation, with the accompaniment of both famine and pestilence (Joseph.). Zedekiah again interfered to preserve the life of Jeremiah from the vengeance of the princes (xxxviii. 7-13), and then occurred the interview between the king and the prophet, which affords so good a clue to the condition of abject dependence into which a long course of opposition had brought the weak-minded monarch. While the king was hesitating the end was rapidly coming nearer. The city was indeed reduced to the last extremity. The fire of the besiegers had throughout been very destructive (Joseph.), but it was now aided by a severe famine. The bread had for long been consumed (Jer. xxxviii. 9), and all the terrible expedients had been tried to which the wretched inhabitants of a besieged town are forced to resort in such cases. At last, after sixteen dreadful months, the catastrophe arrived. It was on the ninth day of the fourth month, about the middle of July, at midnight, as Josephus with careful minuteness informs us, that the breach in those stout and venerable walls was effected. The moon, nine days old, had gone down below the hills which form the western edge of the basin of Jerusalem, or was at any rate too low to illuminate the utter darkness which reigns in the narrow lanes of an eastern town, where the inhabitants retire early to rest, and where there are but few windows to emit light from the interior of the houses. The wretched remnants of the army, starved and exhausted, had left the walls, and there was nothing to oppose the entrance of the Chaldeans. Passing in through the breach, they made their way, as their custom was, to the centre of the city, and for the first time the Temple was entered by a hostile force. The

alarm quickly spread through the sleeping city, and Zedekiah, collecting his wives and children (Joseph.), and surrounding himself with the few soldiers who had survived the accidents of the siege, made his way out of the city at the opposite end to that at which the Assyrians had entered, by a street which ran between two walls, and issued at a gate above the royal gardens and the Fountain of Siloam. Thence he took the road towards the Jordan. On the way they were met and recognised by some of the Jews who had formerly deserted to the Chaldeans. By them the intelligence was communicated, and, as soon as the dawn of day permitted it, swift pursuit was made. The king's party were overtaken near Jericho, when just within sight of the river. A few of the people only remained round the person of the king. The rest fled in all directions, so that he was easily taken. Nebuchadnezzar was then at Riblah, at the upper end of the valley of Lebanon, some 35 miles beyond Baalbec, and therefore about ten days' journey from Jerusalem. Thither Zedekiah and his sons were despatched. Nebuchadnezzar, with a refinement of cruelty characteristic of those cruel times, ordered his sons to be killed before him, and lastly his own eyes to be thrust out. He was then loaded with brazen fetters, and at a later period taken to Babylon, where he died.—2. Son of Chemanah, a prophet at the court of Ahab, head, or, if not head, virtual leader of the college. He appears but once, viz., as spokesman when the prophets are consulted by Ahab on the result of his proposed expedition to Ramoth-Gilead (1 K. xxii.; 2 Chr. xviii.). Zedekiah had prepared himself for the interview with a pair of iron horns after the symbolic custom of the prophets (comp. Jer. xiii. xix.), the horns of the *reem*, or buffalo, which was the recognised emblem of the tribe of Ephraim (Dent. xxxiii. 17). With these, in the interval before Micaiah's arrival, he illustrated the manner in which Ahab should drive the Syrians before him. When Micaiah appeared and had delivered his prophecy, Zedekiah sprang forward and struck him a blow on the face, accompanying it by a taunting sneer. For this he is threatened by Micaiah in terms which are hardly intelligible to us, but which evidently allude to some personal danger to Zedekiah. Josephus relates that after Micaiah had spoken, Zedekiah again came forward, and denounced him as false on the ground that his prophecy contradicted the prediction of Elijah, that Ahab's blood should be licked up by dogs in the field of Naboth of Jezreel; and as a further proof that he was an impostor, he struck him, daring him to do what Iddo, in somewhat similar circumstances, had done to Jeroboam—viz., with his hand. As to the question of what Zedekiah and his followers were, whether prophets of Jehovah or of some false deity, it seems hardly possible to entertain any doubt.—3. The son of Maaseiah, a false prophet in Babylon (Jer. xxix. 21, 22). He was denounced in the letter of Jeremiah for having, with Ahab the son of Kolaiah, buoyed up the people with false hopes, and for profane and flagitious conduct. Their names were to become a byword, and their terrible fate a warning.—4. The son of Hananiah, one of the princes of Judah in the time of Jeremiah (Jer. xxvi. 12).

Zeeb. One of the two "princes" of Midian in the great invasion of Israel. He is always named with OREB (Judg. vii. 25, viii. 3; Ps. lxxxiii. 11).

Zeeb and Oreb were slain, probably in crossing the Jordan at a ford further down the river. Zeeb, the wolf, was brought to bay in a winepress which in later times bore his name—the "winepress of Zeeb."

Ze'lah. One of the cities in the allotment of Benjamin (Josh. xviii. 28). Its place in the list is between Tarsish and ha-Eleph. None of these places have, however, been yet discovered. The interest of Zelah resides in the fact that it contained the family tomb of Kish the father of Saul (2 Sam. xxi. 14.).

Zel'ek. An Ammonite, one of David's guard (2 Sam. xxiii. 37; 1 Chr. xi. 39).

Zeloph'ehead. Son of Hephher, son of Gilead, son of Machir, son of Manasseh (Josh. xvii. 3). He was apparently the second son of his father Hephher (1 Chr. vii. 15). Zelophehad came out of Egypt with Moses, but died in the wilderness, as did the whole of that generation (Num. xiv. 35, xxvii. 3). On his death without male heirs, his five daughters, just after the second numbering in the wilderness, came before Moses and Eleazar to claim the inheritance of their father in the tribe of Manasseh. The claim was admitted by Divine direction (Num. xxvi. 33, xxvii. 1-11).

Zelo'tes. The epithet given to the Apostle Simon to distinguish him from Simon Peter (Luke vi. 15) [CANANITE; SIMON 5.]

Zel'zah. A place named once only (1 Sam. x. 2), as on the boundary of Benjamin, close to Rachel's sepulchre. No acceptable identification of Zelzah has been proposed. It is usually considered as identical with Zelah, the home of Kish and Saul, and that again with *Beit'fala*. But this is not tenable; at any rate there is nothing to support it.

Zemara'im. One of the towns of the allotment of Benjamin (Josh. xviii. 23). It is named between Beth-ha-Arabah and Bethel, and therefore we should expect to find Zemara'im either in the valley or in some position on its western edge, between it and Bethel. In the former case a trace of the name may remain in *Chirbet el-Samra* or *es-Sumrah*, about 4 miles north of Jericho. In the latter case Zemara'im may be connected, or identical, with MOUNT ZEMARA'IM, which must have been in the highland district. In either event Zemara'im may have derived its name from the ancient tribe of the Zemarim or Zemarites.

Zemara'im, Mount. An eminence mentioned in 2 Chr. xiii. 4 only. It was "in Mount Ephraim," that is to say within the general district of the highlands of that great tribe. It appears to have been close to the scene of the engagement mentioned in the narrative, which again may be inferred to have been south of Bethel and Ephraim (ver. 19). Whether Mount Zemara'im is identical, or related to, the place of the same name mentioned in the preceding article, cannot be ascertained.

Zem'arite, the. One of the Hamite tribes who, in the genealogical table of Gen. x. (ver. 18) and 1 Chron. i. (ver. 16), are represented as "sons of Canaan." Nothing is certainly known of this ancient tribe. The old interpreters (Jerusalem Targum, Arabic Version, &c.) place them at Emessa, the modern *Hims*. Michaelis proposes to locate them at *Sunra* (the *Simyr*, of the classical geographers), which name is mentioned by Shaw as attached to a site of ruins near *Arka*, on the west coast of Syria, 10 or 11 miles above Tripoli. On the new French

map of the Lebanon it appears as *Kobbet oun Shoumra*, and lies between *Arka* and the Mediterranean. Beyond, however, the resemblance in the names, and the proximity of *Ruad* and *Arka*, there is nothing to prove that *Sumra* or *Shoumra* have any connexion with the Tsemarites of the ancient records.

Zem'ira. One of the sons of *Becher* the son of Benjamin (1 Chr. vii. 8).

Zenan'. One of the towns in the allotment of Judah, situated in the district of the *Shefalah* (Josh. xv. 37). It is probably identical with *ZAANAN*. Schwarz (103) proposes to identify it with "the village Zan-abra, situated 2½ English miles S.E. of Mareshah." By this he doubtless intends the place which in the lists of Robinson is called *es-Sendbirah*. But this identification is more than doubtful.

Ze'nas, a believer, and, as may be inferred from the context, a preacher of the Gospel, who is mentioned in Tit. iii. 13 in connexion with Apollos. He is further described as "the lawyer." It is impossible to determine whether *Zenas* was a Roman juriscōnsult or a Jewish doctor. Grotius thinks that he was a Greek who had studied Roman law. The N. T. usage of *νομικός* leads rather to the other inference.

Zephaniah. 1. The pedigree of Zephaniah, ch. i. 1, is traced to his fourth ancestor, Hezekiah: supposed by Aben Ezra to be the celebrated king of that name. *Analysis.* Chap. i. The utter desolation of Judaea is predicted as a judgment for idolatry, and neglect of the Lord, the luxury of the princes, and the violence and deceit of their dependents (3-9). The prosperity, security, and innocence of the people is contrasted with the horrors of the day of wrath (10-18). Ch. ii., a call to repentance (1-3), with prediction of the ruin of the cities of the Philistines, and the restoration of the house of Judah after the visitation (4-7). Other enemies of Judah, Moab, Ammon, are threatened with perpetual destruction (8-15). Ch. iii. The prophet addresses Jerusalem, which he reproves sharply for vice and disobedience (1-7). He then concludes with a series of promises (8-20). The chief characteristics of this book are the unity and harmony of the composition, the grace, energy, and dignity of its style, and the rapid and effective alternations of threats and promises. The general tone of the last portion is Messianic, but without any specific reference to the Person of our Lord. The date of the book is given in the inscription; viz. the reign of Josiah, from 642 to 611 B.C. It is most probable, moreover, that the prophecy was delivered before the 18th year of Josiah.—2. A Kohathite Levite, ancestor of Samuel and Heman (1 Chr. vi. 36 [21]).—3. The son of Maaseiah (Jer. xxi. 1), and sagan or second priest in the reign of Zedekiah. He succeeded Jehoiada (Jer. xix. 25, 26), and was probably a ruler of the Temple, whose office it was among others to punish pretenders to the gift of prophecy. In this capacity he was appealed to by Shemaiah the Nehelamite to punish Jeremiah (Jer. xxix. 28). Twice he was sent from Zedekiah to inquire of Jeremiah the issue of the siege of the city by the Chaldeans (Jer. xxi. 1), and to implore him to intercede for the people (Jer. xxxvii. 3). On the capture of Jerusalem he was taken and slain at Riblah (Jer. lii. 24, 27; 2 K. xxv. 18, 21).—4. Father of Josiah 2 'Zech. vi. 10), and of Hen, according to the reading of the received text of Zech. vi. 14.

Zephath'. The earlier name (Judg. i. 17) of a Canaanite town, which after its capture and destruction was called by the Israelites *HORMAH*. Two identifications have been proposed for Zephath: that of Dr. Robinson with the well-known *Pass es-Sufá*, by which the ascent is made from the borders of the *Arabah* to the higher level of the "South country," and that of Mr. Rowlands with *Sobáta*, 2½ hours beyond *Khalasa*, on the road to Suez, and ½ of an hour north of *Rohdbeh* or *Ruheibeh*. On the identification of Mr. Rowlands some doubt is thrown by the want of certainty as to the name.

Ze'phathah, the Valley of. The spot in which Asa joined battle with Zerah the Ethiopian (2 Chr. xiv. 10 only). It was "at," or rather "belonging to" Mareshah. This would seem to exclude the possibility of its being, as suggested by Dr. Robinson, at *Tell es-Safeh*, which is not less than 8 miles from *Marash*, the modern representative of Mareshah.

Ze'phi, 1 Chr. i. 36. [ZEPHO.]

Ze'pho. A son of Eliphaz son of Esau (Gen. xxxvi. 11), and one of the "dukes," or phylarchs, of the Edomites (ver. 15). In 1 Chr. i. 36 he is called ZEPHII.

Zeph'on. ZIPHION the son of Gad (Num. xxvi. 15), and ancestor of the family of the ZEPHONITES. **Zeph'onites,** the. A branch of the tribe of Gad, descended from Zephon or Ziphion (Num. xxvi. 15).

Zer. One of the fortified towns of the allotment of Naphtali (Josh. xix. 35 only), probably in the neighbourhood of the S.W. side of the Lake of Genesareth; but no similar name appears to have been yet discovered in the neighbourhood of Tiberias.

Ze'rah. A son of Reuel son of Esau (Gen. xxxvi. 13; 1 Chr. i. 37), and one of the "dukes," or phylarchs, of the Edomites (Gen. xxxvi. 17).

Ze'rah, less properly, ZARAH. Twin son with his elder brother Pharez of Judah and Tamar (Gen. xxxviii. 30; 1 Chr. ii. 6; Matt. i. 3). His descendants were called Zarhites, Ezrahites, and Izrahites (Num. xxi. 20; 1 K. iv. 31; 1 Chr. xxvii. 8, 11).—2. Son of 3meon (1 Chr. iv. 24), called ZOHAH in Gen. xlvii. 10.—3. A Gershonite Levite, son of Iddo or Adaiah (1 Chr. vi. 21, 41 [Heb. vi. 26]).—4. The Ethiopian or Cushite, an invader of Judah, defeated by Asa. 1. In its form the name is identical with the Hebrew proper name above. It has been supposed to represent the Egyptian USARKEN, possibly pronounced USARCHEN, a name almost certainly of Semitic origin. 2. The war between Asa and Zerah appears to have taken place soon after the 10th, and shortly before the 15th, year of Asa, probably late in the 14th. It therefore occurred in about the same year of Usarken II., fourth king of the xxiind dynasty, who began to reign about the same time as the king of Judah. Asa's reign, as far as the 14th year inclusive, was B.C. cir. 953-940, or, if Manasseh's reign be reckoned of 35 years, 933-920. 3. The first ten years of Asa's reign were undisturbed by war. Then Asa took counsel with his subjects, and walled and fortified the cities of Judah. He also maintained an army of 580,000 men, 300,000 spearmen of Judah, and 280,000 archers of Benjamin (2 Chr. xiv. 1-8). At length, probably in the 14th year of Asa, the anticipated danger came. Zerah, the Ethiopian, with a mighty army of a million, invaded the kingdom, and advanced unopposed in the field as far as Mareshah. The invading army had swarmed across the border and devoured the

Philistine fields before Asa could march to meet it. "In the Valley of Zephathah at Mareshah," the two armies met. We cannot perfectly determine the site of the battle. From the prayer of Asa we may judge that, when he came upon the invading army, he saw its hugeness, and so that, as he descended through a valley, it lay spread out beneath him. The Egyptian monuments enable us to picture the general disposition of Zerah's army. The chariots formed the first corps in a single or double line; behind them, massed in phalanxes, were heavy-armed troops; probably on the flanks stood archers and horsemen in lighter formations. No doubt the Ethiopian, confident in his numbers, disdained to attack the Hebrews on clear heights, but waited in the broad valley, or the plain. Asa's prayer before the battle is full of the noble faith of the age of the Judges. The chariots, broken by the charge and with horses made unmanageable by flights of arrows, must have been forced back upon the cumbrous host behind. "So the LORD smote the Ethiopians before Asa, and before Judah; and the Ethiopians fled. And Asa and the people that [were] with him pursued them unto Gerar: and [or "for"] the Ethiopians were overthrown, that they could not recover themselves." So complete was the overthrow, that the Hebrews could capture and spoil the cities around Gerar, which must have been in alliance with Zerah. The after years of Asa were troubled with wars (ver. 9); but they were with Baashah (1 K. xv. 16, 32). Zerah and his people had been too signally crushed to attack him again.

4. The identification of Zerah has occasioned some difference of opinion. He has been thought to have been a Cushite of Arabia, or a Cushite of Ethiopia above Egypt. But lately it has been supposed that Zerah is the Hebrew name of Usarken I., second king of the Egyptian xxiid dynasty; or perhaps more probably Usarken II., his second successor. The composition of the army of Zerah, of Cushim and Lubim (2 Chr. xvi. 8), closely resembles that of Shishak, of Lubim, Sukkimi, and Cushim (xii. 3): both armies also had chariots and horsemen (xvi. 8, xii. 3). The Cushim might have been of an Asiatic Cush, but the Lubim can only have been Africans. The army, therefore, must have been of a king of Egypt, or Ethiopia above Egypt. The uncertainty is removed by our finding that the kings of the xxiid dynasty employed mercenaries of the MASHUWASHA, a Libyan tribe, which apparently supplied the most important part of their hired force. That the army was of an Egyptian king therefore cannot be doubted. As to the identification of Zerah with an Usarken, we speak diffidently. The name Usarken has been thought to be Sargon, in which case it is unlikely, but not impossible, that another Hebrew or Shemitic name should have been adopted to represent the Egyptian form. On the other hand, the kings of the xxiid dynasty were of a warlike family, and their sons constantly held military commands. It is unlikely that an important army would have been intrusted to any but a king or prince. Usarken is less remote from Zerah than seems at first sight, and, according to our computation, Zerah might have been Usarken II., but according to Dr. Hincks's, Usarken I.

Zerethiah. A priest, son of Uzzi, and ancestor of Ezra the Scribe (1 Chr. vi. 6, 51 [Heb. v. 32, vi. 38]; Ezr. vii. 4).—2. Father of Elihoenai of the sons of Pahath Moab (Ezr. viii. 4).

Zer'ed. The name of a brook or valley running

into the Dead Sea, near its S.E. corner, which Dr. Robinson with some probability suggests as identical with the *Wady el-Ahsy*. It lay between Moab and Edom, and is the limit of the proper term of the Israelites' wandering (Deut. ii. 14). Laborde, arguing from the distance, thinks that the source of the *Wady Ghazindel* in the Arabah is the site. The *Wady el-Ahsy* forms the boundary between the districts of *Jebel* and *Kerek*.

Zer'eda. The native place, according to the present Hebrew text, of Jeroboam. It occurs in 1 K. xi. 26 only. The LXX. (in the Vatican Codex) for Zereda substitute Saireia. In the long addition to the history of Jeroboam which these translators insert between 1 K. xii. 24 and 25 of the Hebrew text, Saireia is frequently mentioned. It there appears as the town which Jeroboam fortified for Solomon in Mount Ephraim; thither he repairs on his return from Egypt; there he assembles the tribe of Ephraim, and there he builds a fortress. The LXX. further make it the residence of Jeroboam at the time of the death of his child, and they substitute it for Tirzah three times over. Zeredah has been supposed to be identical with ZEREDATHIAH (2 Chr. iv. 17) and ZARTHAN or ZARTANAH. But the two last were in the valley of the Jordan, while Zeredah was, according to the repeated statement of the LXX. on Mount Ephraim.

Zeredathah. Named (in 2 Chr. iv. 17 only) in specifying the situation of the foundries for the brass-work of Solomon's Temple. In the parallel passage in 1 K. vii. 46 ZARTHAN occupies the place of Zeredathah.

Zer'erath. A place named only in Judg. vii. 22, in describing the flight of the Midianite host before Gideon. It is natural to presume that Zer'erath is the same name as Zeredathah. They both appear to have been in the Jordan valley. It is also difficult not to suppose that Zer'erath is the same place with the Sarira which the LXX. present as the equivalent of Zereda and of Tirzah.

Zer'esh. The wife of Haman the Agagite (Esth. v. 10, 14, vi. 13).

Zer'eth. Son of Ashur the founder of Tekoa, by his wife Helah (1 Chr. iv. 7).

Zer'i. One of the sons of Jeduthun in the reign of David (1 Chr. xxv. 3).

Zer'or. A Benjamite, ancestor of Kish the father of Saul (1 Sam. ix. 1).

Zer'uah. The mother of Jeroboam the son of Nebat (1 K. xi. 26).

Zerub'babel. The head of a tribe of Judah at the time of the return from the Babylonish Captivity in the first year of Cyrus. His exact parentage is a little obscure, from his being always called the son of Shealtiel (Ezr. iii. 2, 8, v. 2, &c.; Hagg. i. 1, 12, 14, &c.), and appearing as such in the genealogies (Matt. i. 12; Luke iii. 27), whereas in 1 Chr. iii. 19, he is represented as the son of Pe-daiah, Shealtiel or Salathiel's brother, and consequently as Salathiel's nephew. Probably the genealogy in 1 Chr. exhibits his true parentage, and he succeeded his uncle as head of the house of Judah. The history of Zerubbabel in the Scriptures is as follows:—In the first year of Cyrus he was living at Babylon, and was the recognised prince of Judah in the Captivity, what in later times was called "the Prince of the Captivity," or "the Prince." On the issuing of Cyrus's decree he immediately availed himself of it, and placed himself at the head of those of his countrymen "whose spirit God had

raised to go up to build the House of the Lord which is in Jerusalem." It is probable that he was in the king of Babylon's service, both from his having, like Daniel and the three children, received a Chaldean name [SHESHBAZZAR], and from his receiving from Cyrus the office of governor of Judaea. On arriving at Jerusalem, Zerubbabel's first care was to build the altar on its old site, and to restore the daily sacrifice. But his great work, which he set about immediately, was the rebuilding of the Temple. In the second month of the second year of their return, the foundation was laid with all the pomp which they could command. But there were many hindrances and delays to be encountered before the work was finished. The Samaritans or Cutheans put in a claim to join with the Jews in rebuilding the Temple; and when Zerubbabel and his companions refused to admit them into partnership they tried to hinder them from building, and hired counsellors to frustrate their purpose. They were successful in putting a stop to the work during the seven remaining years of the reign of Cyrus, and through the eight years of Cambyses and Smerdis. Nor does Zerubbabel appear quite blameless for this long delay. The difficulties in the way of building the Temple were not such as need have stopped the work; and during this long suspension of sixteen years Zerubbabel and the rest of the people had been busy in building costly houses for themselves. But in the second year of Darius light dawned upon the darkness of the colony from Babylon. In that year—it was the most memorable event in Zerubbabel's life—the spirit of prophecy suddenly blazed up, with a most brilliant light amongst the returned captives. Their words fell like sparks upon tinder. In a moment Zerubbabel, roused from his apathy, threw his whole strength into the work, zealously seconded by Joshua and all the people. Undeterred by a fresh attempt of their enemies to hinder the progress of the building, they went on with the work even while a reference was being made to Darius; and when, after the original decree of Cyrus had been found at Ecbatana, a most gracious and favourable decree was issued by Darius, enjoining Tatnai and Shetharboznai to assist the Jews with whatsoever they had need of at the king's expense, the work advanced so rapidly that on the third day of the month Adar, in the sixth year of Darius, the Temple was finished, and was forthwith dedicated with much pomp and rejoicing. The only other works of Zerubbabel which we learn from the Scripture history are the restoration of the courses of priests and Levites, and of the provision for their maintenance, according to the institution of David (Ezr. vi. 18; Neh. xii. 47); the registering the returned captives according to their genealogies (Neh. vii. 5); and the keeping of a Passover in the seventh year of Darius, with which last event ends all that we know of the life of Zerubbabel the son of Shealtiel. The apocryphal history of Zerubbabel, which, as usual, Josephus follows, may be summed up in a few words. The story told in 1 Esdr. iii. vii. is, that on the occasion of a great feast made by Darius on his accession, three young men of his body-guard had a contest who should write the wisest sentence. That one of the three (Zerubbabel) writing "Women are strongest, but above all things Truth beareth away the victory;" and afterwards defending his sentence with much eloquence, was declared by acclamation to be the wisest, and claimed for his reward, at the

king's hand, that the king should perform his vow which he had vowed to rebuild Jerusalem and the Temple. Upon which the king gave him letters to all his treasurers and governors on the other side the river, with grants of money and exemption from taxes, and sent him to rebuild Jerusalem and the Temple, accompanied by the families of which the list is given in Ezr. ii., Neh. vii.; and then follows, in utter confusion, the history of Zerubbabel as given in Scripture. Josephus has also another story (*Ant.* xi. 4, §9) which is not found in 1 Esdr., of Zerubbabel going on an embassy to Darius. It only remains to notice Zerubbabel's place in the genealogy of Christ. It has already been observed that in the genealogies Matt. i. 12, and Luke iii. 27, he is represented as son of Salathiel, though the Book of Chronicles tells us he was the son of Pedajah, and nephew of Salathiel. It is of more moment to remark that, while St. Matthew deduces his line from Jechonias and Solomon, St. Luke deduces it through Neri and Nathan. Zerubbabel was the legal successor and heir of Jechonias's royal estate, the grandson of Neri, and the lineal descendant of Nathan the son of David. In the N. T. the name appears in the Greek form of ZOROBABEL.

Zeru'iah. A woman who, as long as the Jewish records are read, will be known as the mother of the three leading heroes of David's army—Abishai, Joab, and Asahel—the "sons of Zeruiah." She and Abigail are specified in 1 Chr. ii. 13-17 as "sisters of the sons of Jesse" (v. 16). The expression is in itself enough to raise a suspicion that she was not a daughter of Jesse, a suspicion which is corroborated by the statement of 2 Sam. xvii. 25, that Abigail was the daughter of Nahash. [NAHASH.] Of Zeruiah's husband there is no mention in the Bible.

Ze'tham. The son of Landan, a Gershonite Levite (1 Chr. xxiii. 8).

Ze'than. A Benjamite of the sons of Bilhan (1 Chr. vii. 10).

Ze'thar. One of the seven eunuchs of Ahasuerus (Esth. i. 10).

Zi'a. One of the Gadites who dwelt in Bashan (1 Chr. v. 13).

Zi'ba. A person who plays a prominent part, though with no credit to himself, in one of the episodes of David's history (2 Sam. ix. 2-12, xvi. 1-4, xix. 17, 29). [MEPHIBOSHETH.]

Zib'ia. A Benjamite, apparently the son of Shahrnaim by his wife Hodesh (1 Chr. viii. 9).

Zib'iah. A native of Beersheba, and mother of king Josiah (2 K. xii. 1; 2 Chr. xiv. 1).

Zib'oon. Father of Anah, whose daughter Aholiabiah was Esau's wife (Gen. xxvi. 2). Although called a Hivite, he is probably the same as Zibeon the son of Seir the Horite (vers. 20, 24, 29; 1 Chr. i. 38, 40).

Zich'ri. 1. Son of Izhar the son of Kohath (Ex. vi. 21).—2. A Benjamite of the sons of Shimhi (1 Chr. viii. 19).—3. A Benjamite of the sons of Shashak (1 Chr. viii. 23).—4. A Benjamite of the sons of Jeroham (1 Chr. viii. 27).—5. Son of Asaph, elsewhere called ZABDI and ZACOURI (1 Chr. ix. 15).—6. A descendant of Eliezer the son of Moses (1 Chr. xxvi. 25).—7. The father of Eliezer, the chief of the Reubenites in the reign of David (1 Chr. xxvii. 16).—8. Of the tribe of Judah, father of Amasiah (2 Chr. xvii. 16).—9. Father of Elishaphat, one of the conspirators with Jehoiada (2 Chr. xxiii. 1).—10. An Ephraimite here

in the invading army of Pekah the son of Remaliah (2 Chr. xxvii. 7).—11. Father or ancestor of JOEL (4 Neh. xi. 9).—12. A priest of the family of Abijah, in the days of Jolaiakim the son of Jeshua (Neh. xii. 17).

Ziddim. One of the fortified towns of the allotment of Naphtali (Josh. xix. 35). The translators of the Vat. LXX. appear to have read the word in the original "the Tyrians," while those of the Peshito-Syriac, on the other hand, read it as "Zidon." The Jerusalem Talmud is probably nearer the mark in identifying hat-Tsiddim with *Kefr Chittai*, which Schwarz (182) with much probability takes to be the present *Hattin*, a few miles west of Tiberias.

Ziddi'jah. A priest, or family of priests, who signed the covenant with Nehemiah (Neh. x. 1).

Zidon or Sidon. Gen. x. 19, 15; Josh. xi. 8, xix. 28; Judg. i. 31, xviii. 28; Joel iii. 4 (iv. 4); Is. xxiii. 2, 4, 12; Jer. xxv. 22, xxvii. 3; Ez. xxviii. 21, 22; Zech. ix. 2; Matt. xi. 21, 22, xv. 21; Luke vi. 17, x. 9, 13, 14; Mark iii. 8, vii. 24, 31.—An ancient and wealthy city of Phoenicia, on the eastern coast of the Mediterranean Sea, in latitude 30° 34' 05" N., less than twenty English miles to the north of Tyre. Its Hebrew name, *Tsidôn*, signifies "Fishing," or "Fishery" (see Gesenius, s. v.). Its modern name is *Saida*. It is situate in the narrow plain between the Lebanon and the sea. From a Biblical point of view, this city is inferior in interest to its neighbour Tyre, with which its name is so often associated. If we could believe Justin (xviii. 3), there would be no doubt that Zidon was of greater antiquity than Tyre, as he says that the inhabitants of Sidon, when their city had been reduced by the king of Ascalon, founded Tyre the year before the capture of Troy. In contradiction of this statement, it has been further insisted on, that the relation between a colony and the mother-city among the Phoenicians was sacred, and that as the Tyrians never acknowledged this relation towards Zidon, the supposed connexion between Tyre and Zidon is morally impossible. This is a very strong point. Certainly, there is otherwise nothing improbable in Zidonians having founded Tyre, as the Tyrians are called Zidonians, but the Zidonians are never called Tyrians. And at any rate this circumstance tends to show that in early times Zidon was the most influential of the two cities. This is shadowed forth in the Book of Genesis by the statement that Zidon was the first-born of Canaan (Gen. x. 15), and is implied in the name of "Great Zidon," or "the Metropolis Zidon," which is twice given to it in Joshua (xi. 8, xix. 28). It is confirmed, likewise, by Sidonians being used as the generic name of the Phoenicians, or Canaanites (Josh. xiii. 6; Judg. xviii. 7); and by the reason assigned for there being no deliverer to Laish when its peaceable inhabitants were massacred, that "it was far from Zidon;" whereas, if Tyre had been then of equal importance, it would have been more natural to mention Tyre, which professed substantially the same religion, and was almost twenty miles nearer (Judg. xviii. 28). From the time of Solomon to the invasion of Nebuchadnezzar Zidon is not often directly mentioned in the Bible, and it appears to have been subordinate to Tyre. When the people called "Zidonians" is mentioned, it sometimes seems that the Phoenicians of the plain of Zidon are meant (i K. v. 6, xvi. 31, xi. 1, 5, 33; 2 K. xxiii. 13).

There is no doubt, however, that Zidon itself, the city properly so called, was threatened by Joel (iii. 4) and Jeremiah (xxvii. 3). Still, all that is known respecting it during the epoch is very scanty, amounting to scarcely more than that one of its sources of gain was trade in slaves, in which the inhabitants did not shrink from selling inhabitants of Palestine; that the city was governed by kings (Jer. xxvii. 3 and xxv. 22); that, previous to the invasion of Nebuchadnezzar, it had furnished mariners to Tyre (Ez. xxvii. 8); that, at one period it was subject, in some sense or other, to Tyre; and that, when Shalmaneser king of Assyria invaded Phoenicia, Zidon seized the opportunity to revolt. During the Persian domination, Zidon seems to have attained its highest point of prosperity; and it is recorded that, towards the close of that period, it far excelled all other Phœnician cities in wealth and importance. It is very probable that the long siege of Tyre by Nebuchadnezzar had tended not only to weaken and impoverish Tyre, but likewise to enrich Zidon at the expense of Tyre. In the expedition of Xerxes against Greece, the Sidonians were highly favoured, and were a pre-eminently important element of his naval power. The prosperity of Sidon was suddenly cut short by an unsuccessful revolt against Persia, which led to one of the most disastrous catastrophes recorded in history. The principal circumstances were these. While the Persians were making preparations in Phœnicia to put down the revolt in Egypt, some Persian satraps and generals behaved oppressively and insolently to Sidonians in the Sidonian division of the city of Tripolis. On this the Sidonian people projected a revolt; and having first concerted arrangements with other Phœnician cities, and made a treaty with Nectanebus, they put their designs into execution. But their King Tennes proved a traitor to their cause—and in performance of a compact with Ochus, he betrayed into the king's power one hundred of the most distinguished citizens of Sidon, who were all shot to death with javelins. Five hundred other citizens, who went out to the king with ensigns of supplication, shared the same fate; and by concert between Tennes and Mentor, the Persian troops were admitted within the gates, and occupied the city walls. The Sidonians, before the arrival of Ochus, had burnt their vessels to prevent any one's leaving the town; and when they saw themselves surrounded by the Persian troops, they adopted the desperate resolution of shutting themselves up with their families, and setting fire each man to his own house (B.C. 351). Forty thousand persons are said to have perished in the flames. After this dismal tragedy, Sidon gradually recovered from the blow. The battle of Issus was fought about eighteen years afterwards (B.C. 333), and then the inhabitants of the restored city opened their gates to Alexander of their own accord, from hatred, as is expressly stated, of Darius and the Persians. The impolicy, as well as the cruelty of Ochus in his mode of dealing with the revolt of Sidon now became apparent; for the Sidonian fleet in joining Alexander was an essential element of his success against Tyre. From this time Sidon, being dependent on the fortunes of war in the contests between the successors of Alexander, ceases to play any important political part in history. It became, however, again a flourishing town. Strabo, in his account of Phœnicia, says of Tyre and Sidon, "Both were illustrious and splendid formerly, and

now; but which should be called the capital of Phœnicia, is a matter of dispute between the inhabitants" (xvi. p. 756). He adds that it is situated on the mainland, on a fine naturally-formed harbour. He speaks of the inhabitants as cultivating the sciences of arithmetic and astronomy; and says that the best opportunities were afforded in Sidon for acquiring a knowledge of these and of all other branches of philosophy. He adds, that in his time, there were distinguished philosophers, natives of Sidon, as *Boethus*, with whom he studied the philosophy of Aristotle, and his brother *Diodotus*. It is to be observed that both these names were Greek; and it is to be presumed that in Strabo's time, Greek was the language of the educated classes at least, both in Tyre and Sidon. This is nearly all that is known of the state of Sidon when it was visited by Christ. It is about fifty miles distant from Nazareth, and is the most northern city which is mentioned in connexion with his journeys. There is no Biblical reason for following minutely the rest of the history of the place. It shared generally the fortunes of Tyre, with the exception that it was several times taken and retaken during the wars of the Crusades, and suffered accordingly more than Tyre previous to the fatal year 1291 B.C. Since that time it never seems to have fallen quite so low as Tyre.

Zidon'ians. The inhabitants of Zidon. They were among the nations of Canaan left to practise the Israelites in the art of war (Judg. iii. 3), and colonies of them appear to have spread up into the hill country from Lebanon to Misrephoth-maim (Josh. xiii. 4, 6), whence in later times they hewed cedar-trees for David and Solomon (1 Chr. xiii. 4). They oppressed the Israelites on their first entrance into the country (Judg. x. 12), and appear to have lived a luxurious, reckless life (Judg. xviii. 7); they were skilful in hewing timber (1 K. v. 6), and were employed for this purpose by Solomon. They were idolaters, and worshipped *Ashthoreth* as their tutelary goddess (1 K. xi. 5, 33; 2 K. xxiii. 13), as well as the sun-god *Baal*, from whom their king was named (1 K. xi. 31). The term Zidonians among the Hebrews appears to have been extended in meaning as that of Phœnicians among the Greeks.

Zif. (1 K. vi. 37.) [MONTH.]

Ziha. 1. The children of Ziha were a family of Nethinim who returned with Zerubbabel (Ezr. ii. 43; Neh. vii. 46).—2. Chief of the Nethinim in Ophel (Neh. xi. 21). The name is probably that of a family, and so identical with the preceding.

Ziklag. A place which possesses a special interest from its having been the residence and the private property of David. It is first mentioned in the catalogue of the towns of Judah in Josh. xv. It next occurs, in the same connexion, amongst the places which were allotted out of the territory of Judah to Simeon (xix. 5). We next encounter it in the possession of the Philistines (1 Sam. xxvii. 6), when it was, at David's request, bestowed upon him by Achish king of Gath. He resided there for a year and four months (ibid. 7; 1 Sam. xxxi. 14, 26; 1 Chr. xii. 1, 20). It was there he received the news of Saul's death (2 Sam. i. 1, iv. 10). He then relinquished it for Hebron (ii. 1). Ziklag is finally mentioned as being reinhabited by the people of Judah after their return from the Captivity (Neh. xi. 28). The situation of the town is difficult to determine, notwithstanding so many notices. On

the one hand, that it was in "the south" seems certain. On the other hand, this is difficult to reconcile with its connexion with the Philistines, and with the fact—which follows from the narrative of 1 Sam. xxx. (see 9, 10, 21)—that it was north of the Brook Besor. On the whole, the only conclusion seems to be that Ziklag was in the south or Negeb country, with a portion of which the Philistines had a connexion which may have lasted from the time of their residence there in the days of Abraham and Isaac. Ziklag does not appear to have been known to Eusebius and Jerome, or to any of the older travellers. Mr. Rowlands was told of "an ancient site called *Asloodg*, or *Kasloodg*, with some ancient walls," three hours east of *Selâta*, which again was two hours and a half south of *Khalasa*. This he considers as identical with Ziklag. The identification is supported by Mr. Wilton (*Negeb*, 209); but it is impossible at present to do more than name it.

Zil'ah. One of the two wives of Lamech the Cainite, to whom he addressed his song (Gen. iv. 19, 22, 23). She was the mother of Tubal-Cain and Naamah.

Zil'pah. A Syrian given by Laban to his daughter Leah as an attendant (Gen. xxix. 24), and by Leah to Jacob as a concubine. She was the mother of Gad and Asher (Gen. xxx. 9-13, xxxv. 26, xxvii. 2, xli. 18).

Zilthai. 1. A Benjamite, of the sons of Shimhi (1 Chr. viii. 20).—2. One of the captains of thousands of Manasseh who deserted to David at Ziklag (1 Chr. xii. 20).

Zim'nah. 1. A Gershonite Levite, son of Jathath (1 Chr. vi. 20).—2. Another Gershonite, son of Shimei (1 Chr. vi. 42); possibly the same as the preceding.—3. Father or ancestor of Josh, a Gershonite in the reign of Hezekiah (2 Chr. xxix. 12). At a much earlier period we find the same collocation of names, Zimnah and Josh as father and son (1 Chr. vi. 20). Unless these names are the names of families and not of individuals, their recurrence is a little remarkable.

Zim'ran. The eldest son of Keturah (Gen. xxv. 2; 1 Chr. i. 32). His descendants are not mentioned, nor is any hint given that he was the founder of a tribe. Some would identify Zimran with the Zimri of Jer. xxv. 25, but these lay too far to the north. The Greek form of the name, as found in the LXX., has suggested a comparison with *Zabpau*, the chief city of the Cineaecolpites, who dwelt on the Red Sea, west of Mecca. But this is extremely doubtful. Hitzig and Lengerke propose to connect the name Zimran with Zimiris, a district of Ethiopia mentioned by Pliny (xxvii. 25); but Grotius, with more plausibility, finds a trace of it in the *Zamereni*, a tribe of the interior of Arabia.

Zimri. 1. The son of Salu, a Simeonite chieftain, slain by Phinehas with the Midianitish princess Cozbi (Num. xxv. 14).—2. Fifth sovereign of the separate kingdom of Israel, of which he occupied the throne for the brief period of seven days in the year B.C. 930 or 929. Originally in command of half the chariots in the royal army, he gained the crown by the murder of king Elah son of Baasha. But the army which at that time was besieging the Philistine town of Gibbethon, when they heard of Elah's murder, proclaimed their general *Omri* king. He immediately marched against Tirzah, and took the city. Zimri retreated into the innermost part

of the late king's palace, set it on fire and perished in the ruins (1 K. xvi. 9-20).—3. One of the five sons of Zerah the son of Judah (1 Chr. ii. 6).—4. Son of Jehoadab and descendant of Saul (1 Chr. viii. 36, ix. 42).—5. An obscure name, mentioned (Jer. xxv. 25) in probable connexion with Dedan, Tema, Buz, Arabia, the "mingled people." Nothing further is known respecting Zimri, but it may possibly be the same as, or derived from, ZIMRAN, which see.

Zin. The name given to a portion of the desert tract between the Dead Sea, Ghôr, and Arabah on the E., and the general plateau of the *Tih* which stretches westward. The country in question consists of two or three successive terraces of mountain converging to an acute angle at the Dead Sea's southern verge, towards which also they slope. Here the drainage finds its chief vent by the *Wady el-Fukrah* into the Ghôr, the remaining waters running by smaller channels into the Arabah, and ultimately by the *Wady el-Jeb* also to the Ghôr. Judging from natural features, it is likely that the portion between, and drained by these wadys, is the region in question; but where it ended westward is quite uncertain. Kadesh lay in it, or on this unknown boundary, and here also Idumea was continuous with Judah; since Kadesh was a city in the border of Edom (see KADESH; Num. xiii. 21, xx. 1, xxvii. 14, xxxiii. 36, xxxiv. 3; Josh. xv. 1).

Zina. ZIZAH the second son of Shimei (1 Chr. xxi. 10, comp. 11) the Gershonite.

Zion. [JERUSALEM, p. 391.]

Zior. A town in the mountain district of Judah (Josh. xv. 54, only). It belongs to the same group with Hebron. By Eusebius and Jerome it is spoken of as a village between Aelia (Jerusalem) and Eleutheropolis (*Beṯ jibron*) in the tribe of Judah. A small village named *Sir* lies on the road between *Tekda* and Hebron, about six miles north-east of the latter, which, but for its distance from Hebron, might be adopted as identical with Zior.

Ziph. The name borne by two towns in the territory of Judah. 1. In the south; named between Ithnan and Telem (Josh. xv. 24). It does not appear again in the history, nor has any trace of it been met with.—2. In the highland district; named between Carmel and Jutta (Josh. xv. 55). The place is immortalised by its connexion with David (1 Sam. xxiii. 14, 15, 24, xxvi. 2). These passages show, that at that time it had near it a wilderness (i.e. a waste pasture-ground) and a wood. The latter has disappeared, but the former remains. The name of *Zif* is found about three miles S. of Hebron, attached to a rounded hill of some 100 feet in height, which is called *Tell Zif*. About the same distance still further S. is *Kûmûl* (Carmel), and between them a short distance to the W. of the road is *Yûtta* (Jutta). "Zib" is mentioned in the *Onomasticon* as 8 miles east of Hebron, "the village," adds Jerome, "in which David hid is still shown." This can hardly be the spot referred to.

Ziph. Son of Jehaleleel (1 Chr. iv. 16).

Ziphah. Another son of Jehaleleel (1 Chr. iv. 16).

Ziphim, the. The inhabitants of ZIPH 2. In this form the name is found in the A.V. only in the title of Ps. liv. In the narrative it occurs in the more usual form of

Ziphites, the, 1 Sam. xxiii. 19; xxvi. 1. o

Ziphion. Son of Gad (Gen. xli. 16); elsewhere called ZEPHON.

Ziphron. A point in the north boundary of the Promised Land as specified by Moses (Num. xxiv. 9). It occurs between Zedad and Hatsu-Enan. If Zedad is *Sûdûd*, and Hatsu-Enan *Kuritein*, as is not impossible, then Ziphron must be looked for somewhere between the two. At present no name at all suitable has been discovered in this direction.

Zippor. Father of Balak king of Moab. His name occurs only in the expression "son of Zippor" (Num. xxii. 2, 4, 10, 16, xxiii. 18; Josh. xiv. 9; Judg. xi. 25). Whether he was the "former king of Moab" alluded to in Num. xxi. 26, we are not told, nor do we know that he himself ever reigned.

Zipporah. Daughter of Reuel or Jethro, the priest of Midian, wife of Moses, and mother of his two sons Gershom and Eliezer (Ex. ii. 21, iv. 25, xviii. 2; comp. 6). The only incident recorded in her life is that of the circumcision of Gershom (iv. 24-26). It has been suggested that Zipporah was the Cushite (A. V. "Ethiopian") wife who furnished Miriam and Aaron with the pretext for their attack on Moses (Num. xii. 1, &c.). The chief ground for this appears to be that in a passage of Habakkuk (iii. 7) the names of Cushan and Midian are mentioned together. The most probable suggestion appears to be that of Ewald, namely that the Cushite was a second wife, or a concubine taken by Moses during the march through the wilderness.

Zithri. Properly "Sithri;" one of the sons of Uzziel, the son of Kohath (Ex. vi. 22). In Ex. vi. 21, "Zithri" should be "Zichri," as in A.V. of 1611.

Ziz, the Cliff of. The pass by which the horde of Moabites, Ammonites, and Mehunim, made their way up from the shores of the Dead Sea to the wilderness of Judah near Tekoa (2 Chr. xx. 16 only; comp. 20). There can be very little doubt that it was the pass of *Ain Jidy*—"the very same route," as Dr. Robinson remarks, "which is taken by the Arabs in their marauding expeditions at the present day." The very name may perhaps be still traceable in *el Hûsâsah*.

Zizra. 1. Son of Shippi a chief of the Simeonites in the reign of Hezekiah (1 Chr. iv. 37).—2. Son of Rehobam by Manahah the granddaughter of Absalom (2 Chr. xi. 20).

Zizah. A Gershonite Levite, second son of Shimei (1 Chr. xxiii. 11); called ZINA in ver. 10.

Zo'an. an ancient city of lower Egypt, near the eastern border. Its Shemitic name indicates a place of departure from a country. The Egyptian name HA-AWAR, or PA-AWAR, Avaris, means "the abode" or "house" of "going out" or "departure." Zoan, or Tanis, is situate in N. lat. 31° E. long. 31° 55', on the east bank of the canal which was formerly the Tanitic branch. Anciently a rich plain extended due east as far as Pelusium, about thirty miles distant, gradually narrowing towards the east, so that in a south-easterly direction from Tanis it was not more than half this breadth. Of old it was a rich marsh-land, watered by four of the seven branches of the Nile, the Pathmitic, Mendesian, Tanitic, and Pelusiac, and swept by the cool breezes of the Mediterranean. Tanis, while Egypt was ruled by native kings, was the chief town of this territory, and an important post towards the eastern frontier. It was rebuilt by Salatis the first of the shepherd kings, the motive of Salatis was not to overawe Egypt but to keep out the Assyrians. The position of Tanis explains

the case. Like the other principal cities of this tract, Pelusium, Bubastis, and Heliopolis, it lay on the east bank of the river, towards Syria. But Tanis, though doubtless fortified, partly with the object of repelling an invader, was too far inland to be the frontier-fortress. Manetho explicitly states Avaris to have been older than the time of the Shepherds; but there are reasons for questioning his accuracy in this matter. The name is more likely to be of foreign than of Egyptian origin, for Zoan distinctly indicates the place of departure of a migratory people, whereas Avaris has the simple signification "abode of departure." A remarkable passage in the Book of Numbers, not hitherto explained, "Now Hebron was built seven years before Zoan in Egypt" (xiii. 22), seems to determine the question. Hebron was already built in Abraham's time, and the Shepherd-invasion may be dated about the same period. Whether some older village or city were succeeded by Avaris matters little: its history begins in the reign of Salatis. What the Egyptian records tell us of this city may be briefly stated. Apepee, probably Apophis of the xvth dynasty, a Shepherd-king who reigned shortly before the xviiith dynasty, built a temple here to Set, the Egyptian Baul, and worshipped no other god. According to Manetho, the Shepherds, after 511 years of rule, were expelled from all Egypt and shut up in Avaris, whence they were allowed to depart by capitulation about B.C. 1500. Rameses II. embellished the great temple of Tanis, and was followed by his son Menptah. We believe that the Pharaoh of Joseph as well as the oppressors were Shepherds, the former ruling at Memphis and Zoan, the latter probably at Zoan only. Zoan is mentioned in connexion with the Plagues in such a manner as to leave no doubt that it is the city spoken of in the narrative in Exodus as that where Pharaoh dwelt (Is. lxxviii. 42, 43). After the fall of the empire, the first dynasty is the xxist, called by Manetho that of Tanites. Its history is obscure. The xxiiiid dynasty is called Tanite, and its last king is probably Sethos, the contemporary of Tirhakah, mentioned by Herodotus. At this time Tanis once more appears in sacred history (Is. xxx. 4). As mentioned with the frontier-town Tahpanhes, Tanis is not necessarily the capital. But the same prophet perhaps more distinctly points to a Tanite line (xix. 13). The doom of Zion is foretold by Ezekiel "I will set fire in Zoan" (xxx. 14), where it occurs among the cities to be taken by Nebuchadnezzar.

Zoar. One of the most ancient cities of the land of Canaan. Its original name was BELA (Gen. xiv. 2, 8). It was in intimate connexion with the cities of the "plain of Jordan"—Sodom, Gomorrah, Admah, and Zeboim (see also xli. 10; but not x. 19). In the general destruction of the cities of the plain, Zoar was spared to afford shelter to Lot (xix. 22, 23, 30). It is mentioned in the account of the death of Moses as one of the landmarks which bounded his view from Pisgah (Deut. xxxiv. 3), and it appears to have been known in the time both of Isaiah (xv. 5) and Jeremiah (xlviii. 34). These are all the notices of Zoar contained in the Bible. 1. It was situated in the same district with the four cities already mentioned, viz. in the "plain" or "circle" "of the Jordan," and the narrative of Gen. xix. evidently implies that it was very near to Sodom (ver. 15, 23, 27). The definite position of Sodom is, and probably will always be, a mystery, but there can be little doubt that the plain of the

Jordan was at the north of the Dead Sea, and that the cities of the plain must therefore have been situated there instead of at the southern end of the lake, as it is generally taken for granted they were. The grounds for this conclusion are as follows:—(a.) The northern and larger portion of the lake has undoubtedly existed in, or very nearly in, its present form since a date long anterior to the age of Abraham. The Jordan therefore at that date discharged itself into the lake pretty nearly where it does now, and thus the "plain of the Jordan," unless unconnected with the river, must have lain on the north of the Dead Sea. (b.) The plain was within view of the spot from which Abraham and Lot took their survey of the country (Gen. xiii. 1-13). Now the lower part of the course of the Jordan is plainly visible from the hills east of Beetha. On the other hand, the southern half of the Dead Sea is not only too far off to be discerned, but is actually shut out from view by intervening heights. (c.) In the account of the view of Moses from Pisgah the *ciccar* is more strictly defined as "the *ciccar* of the plain of Jericho" (A. V. "plain of the valley of Jericho"), and Zoar is mentioned in immediate connexion with it. Now no person who knows the spot from actual acquaintance or from study of the topography can believe that the "plain of Jericho" can have been extended to the southern end of the Dead Sea. These considerations appear to render it highly probable that the Zoar of the Pentateuch was to the north of the Dead Sea, not far from its northern end, in the general parallel of Jericho. That it was on the east side of the valley seems to be implied in the fact that the descendants of Lot, the Moabites and Ammonites, are in possession of that country as their original seat when they first appear in the sacred history. 2. The passages in Isaiah and Jeremiah in which Zoar is mentioned give no clue to its situation. 3. So much for the Zoar of the Bible. When however we examine the notices of the place in the post-biblical sources we find a considerable difference. In these its position is indicated with more or less precision, as at the S.E. end of the Dead Sea. Thus Josephus says that it retained its name to his day (*Ant.* i. 11, §4), that it was at the further end of the Asphaltic Lake, in Arabia—by which he means the country lying S.E. of the lake, whose capital was Petra. The notices of Eusebius are to the same tenour. To these notices of Eusebius St. Jerome adds little or nothing. In more modern times Zoar is mentioned by the Crusading historians. Fulcher states that "having encircled the southern part of the lake on the road from Hebron to Petra, we found there a large village which was said to be Segor, in a charming situation, and abounding with dates. Here we began to enter the mountains of Arabia." The natural inference from the description of Fulcher is, that Segor lay in the *Wady Kera*, the ordinary road, then and now, from the south of the Dead Sea to the eastern highlands. The conjecture of 1875 and Mangles (June 1, and see May 9), that the extensive ruins which they found in the lower part of this Wady were those of Zoar, is therefore probably accurate. The name *Dra'a* or *Dera'ah*, which they, Poole and Burckhardt (July 15), give to the valley, may even without violence be accepted as a corruption of Zoar. 4. To the statements of the mediæval travellers just quoted there are at least two remarkable exceptions. (a.) Brocardus (cir

A.D. 1290), the author of the *Descriptio Terrae Sanctae*, states (cap. vii.) that "five leagues (leucas) to the south of Jericho is the city of Segor, situated beneath the mountain of Engaddi, between which mountain and the Dead Sea is the statue of salt." (2.) The *Statement of Thietmar* (A.D. 1217) is even more singular. After visiting Jericho and Gilgal he arrives at the "fords of Jordan" (xi. 20), where Israel crossed and where Christ was baptised, and where then, as now, the pilgrims bathed (22). Crossing this ford (33) he arrives at "the field and the spot where the Lord overthrew Sodom and Gomorra." After a description of the lake come the following words:—"On the shore of this lake, about a mile (*ad miliare*) from the spot at which the lake was baptised is the statue of salt into which Lot's wife was turned" (47). "Hence I came from the lake of Sodom and Gomorra, and arrived at Segor, where Lot took refuge after the overthrow of Sodom; which is now called in the Syrian tongue Zora, but in Latin the city of palms." It seems almost certain from his description that the site of Sodom and Gomorrah, the pillar of salt, and Zoar, were all seen by him on the east of the Dead Sea—the two first at its north-east end. 5. But putting aside the accounts of Brocardus and Thietmar, as exceptions to the ordinary mediaeval belief which placed Zoar at the *Wady ed Dra'a*, how can that belief be reconciled with the inference drawn above from the statements of the Pentateuch? It agrees with those statements in one particular only, the position of the place on the eastern side of the lake. In everything else it disagrees not only with the Pentateuch, but with the locality ordinarily assigned to Sodom. This has led M. de Saulcy to place Zoar in the *Wady Zuweirah*, the pass leading from Hebron to the Dead Sea. But the names Zuweirah and Zoar are not nearly so similar in the originals as they are in their western forms.

Zo'ba, or Zo'bah, is the name of a portion of Syria, which formed a separate kingdom in the time of the Jewish monarchs, Saul, David, and Solomon. It is difficult to fix its exact position and limits; but there seem to be grounds for regarding it as lying chiefly eastward of Coele-Syria, and extending thence north-east and east, towards, if not even to, the Euphrates. We first hear of Zobah in the time of Saul, when we find it mentioned as a separate country, governed apparently by a number of kings who owned no common head or chief (1 Sam. xiv. 47). Some forty years later than this, we find Zobah under a single ruler, Hadadezer, son of Rehob. He had wars with Toi, king of Hamath (2 Sam. viii. 10), and held various petty Syrian princes as vassals under his yoke (2 Sam. x. 19). David (2 Sam. viii. 3) attacked Hadadezer in the early part of his reign, defeated his army, and took from him a thousand chariots, seven hundred (seven thousand, 1 Chr. xviii. 4) horsemen, and 20,000 footmen. Hadadezer's allies, the Syrians of Damascus, were defeated in a great battle. The wealth of Zobah is very apparent in the narrative of this campaign. It is not clear whether the Syrians of Zobah submitted and became tributary on this occasion, or whether, although defeated, they were able to maintain their independence. At any rate a few years later, they were again in arms against David. The war was provoked by the Ammonites, who hired the services of the Syrians of Zobah. The allies were defeated in a great battle

by Joab, who engaged the Syrians in person (2 Sam. x. 9). Hadadezer, upon this, made a last effort (1 Chr. xix. 16). A battle was fought near Helam, where the Syrians of Zobah and their new allies were defeated with great slaughter. Zobah, however, though subdued, continued to cause trouble to the Jewish kings. A man of Zobah, Rezon, son of Eliadah, made himself master of Damascus, where he proved a fierce adversary to Israel all through the reign of Solomon (1 K. xi. 23-25). Solomon also was, it would seem, engaged in a war with Zobah itself (2 Chr. viii. 3). This is the last that we hear of Zobah in Scripture. The name, however, is found at a later date in the Inscriptions of Assyria, where the kingdom of Zobah seems to intervene between Hamath and Damascus.

Zo'bebah. Son of Uz, of the tribe of Judah (1 Chr. iv. 8).

Zo'har. 1. Father of Ephron the Hittite (Gen. xxiii. 8, xxv. 9).—2. One of the sons of Simeon (Gen. xlv. 10; Ex. vi. 15); called ZERAH in 1 Chr. iv. 24.

Zohel'eth, the Stone. This was "by En Rogel" (1 K. i. 9); and therefore, if En Rogel be the modern *Um-ed-Dera'*, this stone, "where Adonijah slew sheep and oxen," was in all likelihood not far from the well of the Virgin. The Targumists translate it "the rolling stone;" and Rashi affirms that it was a large stone on which the young men tried their strength in attempting to roll it. Others make it "the serpent stone." Others connect it with running water; but there is nothing strained in making it "the stone of the conduit" (*Mazchelah*) from its proximity to the great rock-conduit or conduits that poured into Siloam.

Zo'heth. Son of Ishi of the tribe of Judah (1 Chr. iv. 20).

Zophah. Son of Helem, or Hotham, the son of Heber, an Asherite (1 Chr. vii. 35, 36).

Zophai. A Kohathite Levite, son of Elkanah and ancestor of Samuel (1 Chr. vi. 26 [11]). In ver. 35 he is called ZUPH.

Zophar. One of the three friends of Job (Job ii. 11, xi. 1, xx. 1, xlii. 9).

Zo'phim, the Field of. A spot on or near the top of Pisgah, from which Balaam had his second view of the encampment of Israel (Num. xxiii. 14). If the word *sadeh* (rendered "field") may be taken in its usual sense, then the "field of Zophim" was a cultivated spot high up on the top of the range of Pisgah. But that word is the almost invariable term for a portion of the upper district of Moab. The position of the field of Zophim is not defined. May it not be the same place which later in the history is mentioned as MIZPAH-MOAB?

Zorah. One of the towns in the allotment of the tribe of Dan (Josh. xix. 41). It is previously mentioned (xv. 33) in the catalogue of Judah, among the places in the district of the Shefelah (A. V. ZOREAH). In both lists it is in immediate proximity to ESHTAOL. Zorah was the residence of Manoah and the native place of Samson. Zorah is mentioned amongst the places fortified by Rehoboam (2 Chr. xi. 10). In the *Onomasticon* it is mentioned as lying some 10 miles north of Eleutheropolis on the road to Nicopolis. By the Jewish traveller hap-Parchi, it is specified as three hours S.E. of Lydd. These notices agree in direction—

though in neither is the distance nearly sufficient — with the modern village of *Sūr'ah*, which has been visited by Dr. Robinson and Tobler. It lies just below the brow of a sharp-pointed conical hill, at the shoulder of the ranges which there meet and form the north side of the *Wady Ghurāb*, the northernmost of the two branches which unite just below *Sūr'ah*, and form the great *Wady Surar*. In the A. V. the name appears also as ZAREAH and ZOREAH.

Zo'rathites, the, i. e. the people of ZORAH, mentioned in 1 Chr. iv. 2 as descended from Zuhri.

Zo'reah. Another form (Josh. xv. 33) of the name usually given in the A. V. as ZORAH.

Zo'rites, the, are named in the genealogies of Judah (1 Chr. ii. 54) apparently amongst the descendants of Salma and near connexions of Joab.

Zorob'abel. 1 Esd. iv. 13; v. 5-70; vi. 2-29; Jerus. xlii. 11; Matt. i. 12, 13; Luke iii. 27. [ZERUBBABEL.]

Zu'ar. Father of Nethaneel the chief of the tribe of Issachar at the time of the Exodus (Num. i. 8, v. 5, vi. 18, 23, x. 15).

Zuph, the land of. A district at which Saul and his servant arrived after passing through those of Shalisha, of Shalim, and of the Benjamites (1 Sam. ix. 5 only). It evidently contained the city in which they encountered Samuel (ver. 6), and that again was certainly not far from the tomb of Rachel." The only trace of the name of Zuph in modern Palestine, in any suitable locality, is to be found in *Soba*, a well-known place about

seven miles due west of Jerusalem, and five miles south-west of *Noby Samwil*. But this is at the best no more than conjecture, and unless the land of Zuph extended a good distance east of *Soba*, the city in which the meeting with Samuel took place could hardly be sufficiently near to Rachel's sepulchre.

Zuph. A Kohathite Levite, ancestor of Elkanah and Samuel (1 Sam. i. 1; 1 Chr. vi. 35 [20]). In 1 Chr. vi. 26 he is called ZOPHAI.

Zur. 1. Father of Cozbi (Num. xxv. 15), and one of the five princes of Midian who were slain by the Israelites when Balaam fell (Num. xxxi. 8). — 2. Son of Jehiel the founder of Gibeon (1 Chr. viii. 30, ix. 36).

Zu'riel. Son of Abihail, and chief of the Merarite Levites at the time of the Exodus (Num. iii. 35).

Zurishaddai. Father of Shelumiel, the chief of the tribe of Simeon at the time of the Exodus (Num. i. 6, ii. 12, vii. 36, 41, x. 19).

Zuzims, the. The name of an ancient people who lying in the path of Chedorlaomer and his allies were attacked and overthrown by them (Gen. xiv. 5 only). Of the etymology or signification of the name nothing is known. Hardly more ascertainable is the situation which the Zuzim occupied. There is some plausibility in the suggestion of Ewald, that the Zuzim inhabited the country of the Ammonites, and were identical with the Zam-zummim, who are known to have been exterminated and succeeded in their land by the Ammonites.

THE END.
